DICTIONARY

OF

MEDICAL SCIENCE.

A

DICTIONARY

OF

MEDICAL SCIENCE:

CONTAINING

A FULL EXPLANATION OF THE VARIOUS SUBJECTS AND TERMS OF ANATOMY, PHYSIOLOGY, MEDICAL CHEMISTRY, PHARMACY, PHARMACOLOGY, THERAPEUTICS, MEDICINE, HYGIENE, DIETETICS, PATHOLOGY, BACTERIOLOGY, SURGERY, OPHTHALMOLOGY, OTOLOGY, LARYNGOLOGY, DERMATOLOGY, GYNECOLOGY, OBSTETRICS, PEDIATRICS, MEDICAL JURISPRUDENCE, DENTISTRY, Etc.

BY

ROBLEY DUNGLISON, M. D., LL.D.,

Late Professor of Institutes of Medicine and Medical Jurisprudence in the Jefferson Medical College of Philadelphia, etc.

TWENTY-FIRST EDITION,

THOROUGHLY REVISED AND GREATLY ENLARGED,

WITH THE

PRONUNCIATION, ACCENTUATION, AND DERIVATION OF THE TERMS,

BY

RICHARD J. DUNGLISON, A.M., M.D.

PREFACE TO THE TWENTY-FIRST EDITION.

Motives of affectionate memory and professional duty have sustained the Editor in the years of arduous labor absorbed in revising this Dictionary for its twenty-first edition. For nearly two generations it has been the recognized standard among English-speaking peoples in matters of medical terminology, and its undiminished vitality still reflects the peculiar fitness of Robley Dunglison for the vastly complicated task which he executed as the best work of his busy and productive life.

Realizing that the Dictionary would survive him, the Author spared no pains to provide for its prolonged existence by training the Editor minutely in the methods which the experience of forty years had approved. This association began with the edition of 1857 and extended until 1869, when the Author's death left a considerable amount of manuscript which formed a basis for the thorough and complete revision made by the Editor in 1874. No test of utility could be proposed which would be more searching and conclusive than the continuous favor which that edition of the Dictionary has enjoyed during a period of unexampled activity in medicine and in all departments of its literature. How great this activity has been may appropriately be measured in the successive additions to a work covering the whole terminology of medicine. The six thousand subjects and terms added to the preceding edition were deemed worthy of special note; in the present edition the new subjects and terms aggregate by actual count more than *forty-four thousand.* This increase would itself fill a large volume, but by rigid condensation, by the omission of obsolete matter, and by an enlargement of the page the whole is accommodated within the limits of a volume convenient for the hand. Quickness of reference and comfort for the eye have been consulted in every detail of typography.

The great growth in matter has been paralleled by a development of the Author's fundamental purpose—namely, "to make the work not a mere lexicon of terms, but to afford under each a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science." In the present edition this purpose has been extended in several important directions which may appropriately be mentioned here.

Pronunciation is now for the first time introduced in the work. It is indicated throughout by a simple and obvious system of phonetic spelling, fully explained in the Introduction. The existing diversity in medical speech is to be deplored, but, fortunately, it can be removed by reference to a simple guide to the best usage. Accentuation is of course indicated. As stated in the title, the work is now a "pronouncing dictionary."

Derivation not only furnishes the greatest possible aid to the recollection of meanings, but also confers the power of analyzing and understanding new compounds. This feature has been greatly expanded, so that it now affords all the information which could be desired. In the derivations Greek words are given in English letters, and thus acquaintance with the Greek alphabet is rendered unnecessary as a key to the knowledge afforded by derivation.

Definitions, full and clear, have always distinguished this work. This most valuable feature of a dictionary has been elaborated in the present edition, especial care having been devoted to the addition of matter of practical value. Such information has been added throughout, but it may be well to mention a few of the classes into which it has been systematized for introduction: *Chemical terms, formulæ, properties; Diseases, symptoms, treatment, and prognosis; Drugs, preparations, doses, effects; Medicinal plants, derivatives, effects; Poisons, symptoms, treatment, antidotes*, etc. A vast amount of useful information, not otherwise easily accessible, will be found in the tables, which, for obvious reasons of convenience, have been incorporated alphabetically in the text. This feature also has been greatly elaborated, and new tables have been introduced wherever they might promote a clearer understanding of the subject. Examples may be found under the headings *Antiseptic*, *Bacteria*, *Doses*, *Eruptive Diseases*, *Examination of Urine*, *Laryngeal Diseases*, *Localization of Lesions*, *Ptomaïnes and Leucomaïnes*, *Reflexes*, *Skin Diseases*, etc.

At a period when the coining of new terms is taking place every day, many of them destined to the most ephemeral existence, no lexicographer can flatter himself that he has succeeded in collecting every word that has appeared in print; but the Editor hopes that the conscientious labor of years has not been fruitless, and that few omissions of importance will be found.

Although the great bulk of the revision has been accomplished directly by the Editor, he has had, in this arduous undertaking, assistance at various points from several gentlemen whom he takes this occasion to thank, especially Dr E. J. Stout for valuable services frequently rendered.

R. J. D.

PHILADELPHIA, September, 1893.

INTRODUCTION.

EACH word is, as far as possible, pronounced, accentuated, and defined; but if the word has several synonyms, the definition is usually given under the main or most prominent word, and the synonyms are referred to it, especially when a long explanatory definition is necessary. In terms of more words than one the definition is generally given under the more significant word, but if not it will be found under the other. *Respiratory murmur*, for instance, is defined under *Murmur; Shaking palsy*, under *Palsy*.

To facilitate reference, a heavy type has been employed for main and subordinate words, and italic type for synonyms occurring in connection with such words.

In the pronunciation a simple phonetic system has been adopted, which, it is believed, will be readily intelligible, and which requires but little explanation. Indeed, any explanation as to the sound or accentuation of the letters is rendered unnecessary by the self-evident character of the division of the syllables. The English pronunciation is given in all English or anglicized words.

The derivations of the words given throughout the work are generally from the Latin and Greek languages, but for easy understanding the Greek alphabet is not employed, the English characters being substituted.

LIST OF ABBREVIATIONS.

A.		Anode.
A.	Ana	Of each.
āā.	Ana	Of each.
Abd. or Abdom.	Abdomen	The belly.
Abs. feb.	Absente febre	When there is no fever.
Abst. or Abstr.	Abstractum	Abstract.
A. C.		Anodal contraction.
A. C. C.		Anodal closure contraction.
Acc.		Accommodation.
Ad. or Add.	Adde	Add.
	Addetur	Let it be added.
Ad 2 dos.	Ad duos doses	For two doses.
Ad 2 vic.	Ad duos vices	For two doses.
Ad 3 dos.	Ad tertias doses	For three doses.
Ad 3 vic.	Ad tertias vices	For three doses.
Ad deliq.	Ad deliquium	Up to point of fainting.
Ad grat. acid.	Ad gratiam aciditatem,	To an agreeable sourness.
Adhib.	Adhibetur	Let it be administered.
Ad lib.	Ad libitum	At pleasure.
Admov.	Admoveatur	Let it be applied.
Ad pond. om.	Ad pondus omnium,	To the whole weight.
Adv.	Adversum	Against.
Aggred. febr.	Aggrediente febre,	While the fever is coming on.
Ah.		Hyperopic astigmatism.
Al.		Aluminium.
Alt. dieb.	Alternis diebus	Every other day.
Alt. hor.	Alternis horis	Every other hour.
Altern. hor.	Alternis horis	Every other hour.
Alv. adstrict.	Alvo adstricta	The bowels being confined.
Alv. deject.	Alvi dejectiones	Evacuations from the bowels.
Am.		Myopic astigmatism.
An.		Anode.
Ana.		Of each.
Anat.		Anatomy or Anatomical.
A. O.		Anodal opening.
A. O. C.		Anodal opening contraction.

Aq.	Aqua	Water.
Aq. astr.	Aqua astricta	Frozen water.
Aq. bull.	Aqua bulliens	Boiling water.
Aq. cal.	Aqua calida	Warm water.
Aq. comm.	Aqua communis	Common water.
Aq. dest.	Aqua destillata	Distilled water.
Aq. ferv.	Aqua fervens	Hot water.
Aq. fluv.	Aqua fluvialis or fluviatilis,	River-water.
Aq. font.	Aqua fontana or fontis,	Spring-water.
Aq. mar.	Aqua marina	Sea-water.
Aq. pur.	Aqua pura	Pure water.
Ar.		Arabic.
As.		Arsenic.
Ast.		Astigmatism.
At. wt.		Atomic weight.
Avoir.		Avoirdupois.
Av. wt.		Avoirdupois.
B.		Boron.
B. A.	Balneum arenæ	Sand-bath.
Ba.		Barium.
Bals.	Balsamum	Balsam.
BB.BBDS.	Barbadensis	Of Barbadoes.
Belg.		Belgic.
Bi.		Bismuth.
Bib.	Bibe	Drink.
Biol.		Biology.
Bis. ind. or in d.	Bis in die	Twice daily.
B. M.	Baccalaureus medicinæ,	Bachelor of Medicine.
B. m.	Balneum mariæ	Water-bath.
Bol.	Bolus	A large pill.
Bot.		Botany, botanical, or botanist.
Br.		Bromine.
B. S.		Bachelor of Science or Bachelor of Surgery.
Bull.	Bulliens	Boiling.
	Bulliat	Let it boil.
But.	Butyrum	Butter.
B. v.	Balneum vaporis	Vapor-bath.
C.		Cathode.
C.		Cubic.
C.		Centigrade thermometer.
C.	Congius	A gallon.
Ca.		Calcium.
Cærul.	Cæruleus	Blue.
Cap.	Capiat	Let him take.
Caut.	Caute	Cautiously.
C. C.		Cathodal closure.
C. c.	Cornu cervi	Hartshorn.
c.c.		Cubic centimeter.
C. C. C.		Cathodal closure contraction.
C. c. u.	Cornu cervi ustum,	Burnt hartshorn.
C. D.		Cathodal duration.
Cd.		Cadmium.
Ce.		Cerium.
Cel.		Celsius.
Celt.		Celtic.
Cent.		Centigrade.
Cg.		Centigramme.
Ch.		Chaussier.
Chart.	Charta or Chartula,	Paper or small paper; powder.
Chem.		Chemistry or Chemical.
Cib.	Cibus	Food.
C. M.	Chirurgiæ magister,	Master in Surgery.
C. m.	Cras mane	To-morrow morning.
cm.		Centimetre.
C. m. s.	Cras mane sumendus,	To be taken to-morrow morning.
C. n.	Cras nocte	To-morrow night.
Co.		Cobalt.
Coch. or Cochl. or Cochlear.,	Cochleare	Spoonful.
	Cochlearia	Spoonfuls.
Cochl. ampl.	Cochleare amplum,	A large spoonful (tablespoonful).
Cochl. infant.	Cochleare infantum,	A child's spoonful.
Cochl. mag.	Cochleare magnum,	A tablespoonful.
Cochl. med. or mod.,	Cochleare medium or modicum,	A dessertspoonful.
Cochl. min. or minim.,	Cochleare minimum,	A teaspoonful.
Cochl. parv.	Cochleare parvum,	A teaspoonful.
Cod.	Codex	French Pharmacopœia.
Col.	Cola	Strain.
Colat.	Colatus	Strained. To material strained (Colato).
Colet.	Coletur	Let it be strained.
Collut.	Collutorium	Mouth-wash.
Collyr.	Collyrium	Eye-wash.
Coloret.	Coloretur	Let it be colored.
Comp.	Compositus	Compound.
Concis.	Concisus	Cut.
Conf.	Confectio	Confection.
Cong.	Congius	A gallon.
Cons.	Conserva	Conserve. Keep.
Cont.	Continuetur	Let it be continued.
	Contunde	Bruise.
	Contusus	Bruised.
Cont. rem.	Continuetur remedium,	Let the medicine be continued.
Coq.	Coque	Boil.
	Coquetur	Let it be boiled.
Corr.		Corrupted.
Cort.	Cortex	Bark.
Crast.	Crastinus	For to-morrow.
Crys.		Crystal; crystallography.
C. S.		Current strength.
Cs.		Cæsium.
Cu.	Cuprum	Copper.
Cuj.	Cujus	Of which.
Cujusl.	Cujuslibet	Of any.
C. v.	Cras vespere	To-morrow evening.
Cwt.		A hundredweight.
Cyath.	Cyathus	A wineglassful.
Cyath. theæ	Cyathus theæ	A teacupful.
Cyath. vinar.		A wineglassful.
Cyl.		Cylinder; cylindrical lens.
D.	Dosis	A dose.
D.		Dutch.
D.		Duration.
D.		Density.
D. D. S.		Doctor Dental Surgery.
Deaur. pil.	Deauretur pilula	Let the pill be gilded.
Deb. spiss.	Debita spissitudo	Due consistence.
Decub.	Decubitus	Lying down.
De d. in d.	De die in diem	From day to day.
Deg.		Degeneration. Degree.
Dej. alv.	Dejectiones alvi	Evacuations from the bowels.
Dep.	Depuratus	Purified.
Dest.	Destilla	Distil.
Det.	Detur	Let it be given.
D. et s.	Detur et signetur,	Let it be given as directed.
Dieb. alt.	Diebus alternis	Every other day.
Dieb. tert.	Diebus tertiis	Every third day.
Dig.	Digeretur	Let it be digested.

Dil.	Dilutus	Dilute.
Dim.	Dimidius	One-half.
Dim.		Diminutive.
D. in p. æq.	Dividetur in partes æquales,	Let it be divided in equal parts.
	Divide in partes æquales,	Divide into equal parts.
Div.	Divide	Divide.
Donec alv. sol. fuer.,	Donec alvus soluta fuerit,	Until the bowels be opened.
D. p.	Directione propriâ,	With a proper direction.
Dr.	Drachma	A drachm.
Drach.	Drachma	A drachm.
D. V. S.		Doctor of Veterinary Surgery.
E.		English; electromotive force; emmetropia; erbium.
Eb.		Erbium.
Ecl. or Eclect.		Eclectic.
Ed.		Edinburgh.
E. g.	Exempli gratiâ	For example.
Ejusd.	Ejusdem	Of the same.
Elect.	Electuarium	Electuary.
Emb.		Embryology.
En. or Enc.		Encyclopædia.
Enem.	Enema	Injection by the rectum.
Ent. or Entom.		Entomology.
Er.		Erbium.
Ethnol.		Ethnology.
Etym.		Etymology.
Exhib.	Exhibeatur	Let it be given.
Ext.	Extractum	Extract.
	Externus	External.
Ext. super alut.	Extende super alutam,	Spread upon leather.
F.	Fac.	Make.
	Fiat or fiant	Let it or them be made.
		Fahrenheit's thermometer.
		French.
		Fluorine.
		Field of vision.
		Formula.
F.	Fac	Make, or let it or them be made.
F′		Symbol of first focal distance.
F″		Symbol of second focal distance.
Fah. or Fahr.		Fahrenheit.
Fam.		Family.
Fasc.	Fasciculus	Small bundle.
Feb. dur.	Febre durante	During the fever.
Fem.		Feminine.
Fem. intern.	Femoribus internis,	To the inside of the thighs.
Filt.	Filtra	Filter.
Fist. armat.	Fistula armata	Clyster-pipe and bladder fitted for use.
Fl.	Flores	Flowers.
Fl. or Fld.	Fluidus	Fluid.
Flor.	Flores	Flowers.
F. m. or mist.	Fiat mistura	Let a mixture be made.
Fol.	Folia	Leaves.
		Folio.
F. p.	Fiat potio	Make a potion.
F. pil.	Fiat pilula	Let a pill be made.
Fr.		French.
Fract. dos.	Fractâ dosi	In a divided dose.
F. R. C. P.		Fellow of the Royal College of Physicians.
F. R. C. S.		Fellow Royal College of Surgeons.
F. R. S.		Fellow of the Royal Society.
Fruct.	Fructus	Fruit.
Frust.	Frustillatim	In small pieces.
F. s. a.	Fiat secundum artem,	Prepare skilfully.
Ft.	Fiat, Fiant	Let it or them be made.
Ft. emp. vesic.	Fiat emplastrum vesicatorium,	Let a blister be made.
Ft. haust.	Fiat haustus	Let a draught be made.
F. v. or F. vs.	Fiat venæsectio	Let the patient be bled.
G.		German.
G.	Gramme	Gramme (15.4323 grains).
Galv.		Galvanism; galvanic.
Garg.	Gargarisma	A gargle.
Gel.	Gelatina	Gelatin or jelly.
Gel. quavis	Gelatinâ quâvis	In any kind of jelly.
Gen.		Genitive.
Ger.		German.
G. G. G.	Gummi guttæ, Gambiæ,	Gamboge.
Glyc.	Glycyrrhiza	Licorice.
	Glycerinum	Glycerin.
Gm.	Gramme	Gramme (15.4323 grains).
Gr.	Granum or grana	Grain or grains.
Grad.	Gradatim	By degrees.
Gt.	Gutta	A drop.
Gtt.	Guttæ	Drops.
Gum.	Gummi	Gum.
Guttat.	Guttatim	By drops.
H.		Hydrogen.
Haust.	Haustus	A draught.
Herp.		Herpetology.
Hg.	Hydrargyrum	Mercury.
		Hectogramme.
Hipp.		Hippocrates.
Hl.		Hectolitre.
Hm.		Hectometre.
Hor. decub.	Horâ decubitûs	At bedtime.
Hor. interm.	Horis intermediis	In intermediate hours.
Hor. spat.	Horæ unius spatio,	After one hour.
H. s. or Hor. som.	Horâ somni	At bedtime.
I.		Iodine.
		Italian.
Ichth.		Ichthyology.
Id.	Idem	The same.
I. e.	Id est	That is.
Imp. meas.		Imperial measure.
In d.	In dies	Daily.
Inf.	Infunde	Infuse or pour in.
Infr.	Infrico	To rub in.
Inj.	Injectio	An injection.
Inj. enem.	Injiciatur enema,	Let a clyster be given.
In pulm.	In pulmento	In gruel.
Ir.		Iridium.
It. or Ital.		Italian.
Jul.	Julepus	A julep.
K.	Kalium	Potassium.
		Kathode.
K. C.		Kathodal closure.
K. C. C.		Kathodal closure contraction.
K. C. T.		Kathodal closure tonic.
K. D.		Kathodal duration.
K. D. T.		Kathodal duration tetanus.
Kl.		Kilolitre.
Km.		Kilometre.
L.		Latin.
		Litre.
		Lithium.

Lat. dol.	Lateri dolenti	To the painful side.
Lb. and Lib.	Libra	A pound weight.
L. D. S.		Licentiate of Dental Surgery.
Li.		Lithium.
Lib.	Liber	Book.
Lib. and Llb.	Libræ	Pounds.
Linn.		Linnæus or Linnæan.
Liq.	Liquor	Liquor or solution.
L. R. C. P.		Licentiate of the Royal College of Physicians.
M.	Manipulus	Handful.
	Mensurâ	By measure.
		Myopia.
		Metre.
	Meridies	Noon.
	Minimum	Minim.
	Misce	Mix.
	Mistura	Mixture.
Mac.	Macera	Macerate.
Man.	Manipulus	A handful.
Man. prim.	Mane primo	Early in the morning.
Masc.		Masculine.
Mass. pil.	Massa pilularum,	Pill mass.
M. B.	Medicinæ baccalaureus,	Bachelor of Medicine.
M. D.	Medicinæ doctor	Doctor of Medicine.
Med.		Medicine; medicinal.
Mg.		Magnesium.
Mi.		Milliampère.
Mic. pan.	Micæ panis	Crumbs of bread.
Min.	Minimum	Minim (60th part of a drachm by measure).
Mitt.	Mitte	Send.
Mitt. sang.	Mittatur sanguis,	Let blood be drawn.
Mod. prescript.	Modo præscripto,	In the manner prescribed.
Mor. sol.	More solito	In the usual manner.
M. R. C. P.		Member of the Royal College of Physicians.
M. R. C. S.		Member of the Royal College of Surgeons.
M. R. C. V. S.		Member of the Royal College of Veterinary Surgeons.
Muc.	Mucilago	Mucilage.
Myg.		Myriagramme.
Myl.		Myrialitre.
Mym.		Myriametre.
N.		Nitrogen.
Na.	Natrium	Sodium.
Nat. Hist.		Natural history.
Nat. Ord.		Natural order.
Nb.		Niobium.
N. B.	Nota bene	Note well.
Neg.		Negative.
Ni.		Nickel.
N. M.	Nux moschata	Nutmeg.
No.	Numero	By number.
Noct.	Nocte	In the night.
Noct. maneq.	Nocte maneque	At night and in the morning.
Non repetat.	Non repetatur	Let it not be repeated.
Num.		Number.
O.	Octarius	A pint.
		Oxygen.
		Opening of the circuit.
Obs.		Obsolete.
Oct.	Octarius	Pint.
O. D.	Oculus dextrus	Right eye.
Odont.		Odontology.
Of.		Official or Officinal.
Ol.	Oleum	Oil.
Ol. lini s. i.	Oleum lini sine igne,	Cold-drawn linseed oil.
Ol. ol.	Oleum olivæ	Olive oil.
Ol. res.	Oleoresina	Oleoresin.
O. m.	Omni mane	Every morning.
Omn. bid.	Omni biduo	Every two days.
Omn. bih.	Omni bihorâ	Every two hours.
Omn. hor.	Omni horâ	Every hour.
Omn. man.	Omni mane	Every morning.
Omn. noct.	Omni nocte	Every night.
Omn. quadr. hor.	Omni quadrante horæ,	Every quarter hour.
O. o. o.	Oleum olivæ optimum,	Best olive oil.
Ophth.		Ophthalmology.
Ord.		Order.
O. S.	Oculus sinister	Left eye.
Ov.	Ovum	Egg.
Ox.		Oxymel.
Oz.	Uncia	Ounce.
P.	Pondere	By weight.
	Pars	A part.
		Phosphorus.
	Pugillus	A handful.
		Pupil.
Pa.		Palladium.
Part. vic.	Partibus vicibus	In divided doses.
Path. or Pathol.		Pathology.
Pb.	Plumbum	Lead.
P. B. or Br.	Pharmacopœia Britannica,	British Pharmacopœia.
P. C.	Pondus civile	Avoirdupois weight.
P. D.	Pharmacopœia Dublinensis,	Dublin Pharmacopœia.
Penicil. cam.	Penicillum camelinum.	Camel's-hair pencil.
Peract. op. emet.,	Peractâ operatione emetici,	Operation of emetic being over.
Ph. B. or Br.		British Pharmacopœia.
Ph. G.	Pharmacopœia Germanica,	German Pharmacopœia.
Ph. G.		Graduate in Pharmacy.
Phren.		Phrenology.
Ph. U. S.		Pharmacopœia of United States.
Phys.		Physical.
		Physiology.
Pil.	Pilula	Pill.
Pill.	Pilulæ	Pills.
Pl.		Plural.
P. or Part. æq.	Partes æquales	Equal parts.
Pocil.	Pocillum	A little cup.
Pocul.	Poculum	A cup.
Pond.	Pondere	By weight.
Post cib.	Post cibum	After eating.
Post sing. sed. liq.,	Post singulas sedes liquidas,	After every liquid evacuation.
Pot.	Potio	Potion.
	Potassa	Potash.
P. p.	Pulvis patrum	Jesuits' bark.
P. p.	Punctum proximum,	Nearest point of accommodation to which the eye can adjust itself.
P. p. a.	Phialâ priusquam agitatâ,	First shaking the bottle.
Ppt.	Præparata	Prepared.
	Præcipitatum	Precipitate or precipitated.
Pr.		Presbyopia.

P. r.	Punctum remotum,	Farthest point of accommodation to which the eye can adjust itself.
P. rat. ætat.	Pro ratâ ætatis	According to age.
Priv.		Privative.
P. r. n.	Pro re natâ	When required.
Pron.		Pronounced.
Psychol.		Psychology.
Pt.		Platinum. / Pint.
Pug.	Pugillus, Pugillum,	A handful.
Pulv.	Pulvis / Pulveres	Powder. / Powders.
Q. l.	Quantum libet	As much as is necessary.
Q. p.	Quantum placeat,	In amount at discretion.
Qq.	Quoque	Also.
Qq. hor.	Quâquâ horâ	Every hour.
Q. s.	Quantum sufficit	Enough.
Qt.		Quart.
Quod vide		Which see.
Quor.	Quorum	Of which.
Quot. or Quotid.	Quotidie	Daily.
Q. v.	Quantum voueris,	As much as you wish.
℞	Recipe	Take.
R.		Réaumur. / Resistance (electrical).
Rad.	Radix	Root. / Radical.
Ras.	Rasuræ	Shavings.
Rb.		Rubidium.
R. E.		Right eye.
Rec.	Recipe	Take.
Rect.	Rectificatus	Rectified.
Red. or Redig. in pulv.,	Redactus in pulverem, or Redigatur in pulverem,	Reduced to powder, or Let it be reduced to powder.
Reg. umbil.	Regio umbilici, or Regio umbilicalis,	Umbilical region.
Rep. or Rept.	Repetatur	Let it be repeated.
Rh.		Rhodium.
Ru.		Ruthenium.
S.	Signa / Spanish.	Mark or label.
S. a.	Secundum artem	Prepared according to art.
Sax.		Saxon.
Sb.		Stibium.
Scr.		Scruple.
Scrup.		Scruple.
Sel.		Selenium.
Sem.	Semen, Semina	Seed, Seeds.
Semidr.	Semidrachma	Half a drachm.
Semih.	Semihora	Half an hour.
Serv.	Serva	Keep; preserve.
Sesquih.	Sesquihora	An hour and a half.
Sesunc.	Sesuncia	Ounce and a half.
Sex. syst.		Sexual system.
S. g.		Specific gravity.
Si.		Silicon.
Sig.	Signetur	Let it be labelled.
Sig. n. pr.	Signa nomine proprio,	Label with its common name.
Sing.	Singulorum	Of each.
Si non val.	Si non valeat	If it does not answer or have the effect.
Si. op. sit.	Si opus sit	If requisite.
Si vir. perm.	Si vires permittant,	If strength permit.
Sn.	Stannum	Tin.
Solv.	Solve	Dissolve.
Sp.	. . . . . / Spiritus	Spanish. / Spirit.
Sp. gr.		Specific gravity.
Sph.		Spherical. / Spherical lens.
Spir.	Spiritus	Spirit.
Sp. vin. rect.	Spiritus vini rectificatus,	Rectified spirit of wine (alcohol).
ss.	Semi, Semissis	One-half.
St.	Stet	Let it stand.
Stat.	Statim	Immediately.
Sub. fin. coct.	Sub finem coctionis,	To the end of the boiling.
Sum.	Sumat	Let him or her take.
Sum.	Summitates	Tops.
Surg.		Surgery. / Surgical.
S. v.	Spiritus vini or vinosus,	Spirit of wine.
S. v. r.	Spiritus vini rectificatus,	Rectified spirit of wine.
S. v. t.	Spiritus vini tenuior,	Proof spirit.
Syr.	Syrupus	Syrup.
T.		Tension of the eyeball. / Tungsten.
Tal.	Talis	Such a one (as a dose).
Tal. qual.	Talis qualis	So much (as a dose).
T. d.	Ter in die	Thrice a day.
Te.		Tetanic contraction. / Tellurium.
Temp. dext.	Tempori dextro	To the right tempel.
Teut.		Teutonic.
Th.		Thallium.
Ti.		Titanium.
Tinct.	Tinctura	Tincture.
T. o.	Tinctura opii	Tincture of opium.
Tr., Tra., and Tinct.,	Tinctura	Tincture.
Trit.	Tritura	Triturate.
U.		Uranium.
Ult. præs.	Ultimus præscriptus,	The last prescribed.
Unc.	Uncia	Ounce.
Ung.	Unguentum	Ointment.
Unof.		Unofficial or Unofficinal.
Usq. ad deliq.	Usque ad deliquium,	To fainting.
Ut dict.	Ut dictum	As directed.
V.	Visus	Acuteness of vision.
V.		Vanadium.
V.		Vision.
Ves. or Vesic.	Vesicatorium	A blister.
Vesp.	Vespere	In the evening.
Vid.	Vide	See.
V. o. s. or Vit. ov. sol.,	Vitello ovi solutus,	Dissolved in yolk of egg.
Vs.	Venæsectio	Venesection.
Vs. b.	Venæsectio brachii,	Bleeding at the arm.
Vulg.	Vulgariter	Commonly.
Y.		Yttrium.
Y. s.		Yellow spot of the retina.
Zr.		Zirconium.
ZZ.		Anciently myrrh, now zinziber or ginger.

A PRONOUNCING DICTIONARY

OF

MEDICAL SCIENCE.

A.

A and **An**, as prefixes, have, in compound medical terms, privative (negative) or debasing signification, like that of particles *in, im, un, ir*. Thus: *Sthenia* means strength, *Asthenia*, want of strength; *Anæmia*, want of blood, etc. **Ab** and **Abs**, as prefixes, have like signification. Occasionally, in compound words, they have an intensive meaning.

A, or **āā**. See *Abbreviations* (table of).

Aabeck bush-bark. Bark of Australian bush, diaphoretic.

Aande. Breath.

Aans. Terminalia alata.

Aaron, ahr'on. Arum maculatum.

Aasmus, ah-as'mus. Respiration, breathing; asthma.

Ab, as prefix, see *A*.

Abaca. Hemp of West Indies.

Abactio, ab-ak'she-o (*ab, ago*, to drive). Driving away or expelling, as A. fœtûs or A. partûs, expulsion of fœtus, as in abortion or premature delivery.

Abactus, ab-ak'tus (same etymon). Driven out or expelled, as A. ven'ter (*venter*, stomach), artificial abortion.

Ab'ades. Cantharides.

Abagmentum, ab-ag-men'tum (*abigo*, to expel). Agent capable of producing abortion.

Abaiucu. Fruit of Cynometra ramiflora.

Abalienated, ab-a'le-en-a-ted (*ab, alienus*, different). Debilitated; benumbed; separated.

Abalienatio mentis, ab-ah-le-en-ah'she-o men'tis (*ab, alienus*, different; *mens*, mind). Insanity.

Abalienation, ab-a'le-en-a-shun. Failure of mental or physical power.

Abalienatus, ab-ah-le-ah-nah'tus. Useless or unserviceable, as *membra abalienata*, limbs dead or benumbed.

Abama, ab-ah'ma. Narthecium.

Aban'ga or **Abau'ga.** Fruit of palm tree of St. Thomas, seeds of which are used in diseases of the chest.

Abaptist'a, Abaptist'on, or **Abaptist'um** (*a, baptizo*, to plunge). Trepan, of conical shape, to prevent it from plunging suddenly into cavity of cranium.

Abapus, ab'ap-us. Gethyllis.

Abariga, ab-ah're-gah. Palm growing in St. Thomas, yielding fruit abanga.

Abariga. Abanga.

Abarthrosis, ab-ar-thro'sis (*ab, arthron*, joint). Diarthrosis.

Abarticulation, ab-ar-tic-u-la'shun (*ab, articulus*, a joint). Diarthrosis; synarthrosis; dislocation.

Abasia, ab-ah'ze-ah (*a, basis*, step). Inability to walk. Want of co-ordination in walking.

Abattoir, ab-at-twar'. Place for the slaughter of animals.

Abbreviation, ab-bre-ve-a'shun (*brevis*, short). Abbreviations, chiefly used in medical formulæ, are not as frequently employed as of old. See Table of *Abbreviations* (in preliminary pages).

Abcessus, ab-ses'sus (*ab, cedo*, to depart). Abscess.

Abdomen, ab-do'men (*abdo*, to conceal, because it conceals viscera; or, fancifully, from *abdo*, to conceal, *omentum*, caul). The belly; largest of the three splanchnic cavities. It is bounded above by the diaphragm; below by the pelvis; behind by the lumbar vertebræ; and at sides and fore part by muscular expansions. It is divisible into three anterior regions, from above to below—epigastric, umbilical, and hypogastric—each divided into three others, one middle and two lateral; thus, the *epigastric region* comprises the epigastrium and hypochondria; the *umbilical region*, umbilicus and flanks or lumbar regions; the *hypogastric region*, hypogastrium and iliac regions. Chief viscera contained in the abdomen are stomach, intestines, liver, spleen, pancreas, kidneys, etc. Term is sometimes used to designate that portion above the brim of the pelvis. Also genital organs; gluttony. **A., pend'ulous**, excessive corpulency; physconia.

Abdominal, ab-dom'i-nal. Belonging or relating to the abdomen. **A. ao'rta**, portion of aorta distributed to the abdomen, see *Aorta*. **A. ar'tery**, superior epigastric branch of internal mammary artery. **A. brain**, solar plexus. **A. cavity**, see *Abdomen*. **A. fever**, typhoid fever. **A. gan'glion**, semilunar ganglion. **A. gesta'tion**, extra-uterine pregnancy. **A. lines**, lines on abdomen formed by adhesion of the skin to the deep fascia. **A. muscles**, see *Muscles* (table of). **A. preg'nancy**, extra-uterine pregnancy. **A. re'flex**, involuntary muscular contraction of abdominal walls following stimulation of skin of that region. **A. regions**, see *Abdomen*. **A. respira'tion**, gentle normal respiration with muscles of abdomen and diaphragm. **A. rings**, openings in transversalis fascia (*internal ring*) and aponeurosis of external oblique muscle of abdomen (*external ring*), giving passage to spermatic cord in the male and round ligament in the female. See *Inguinal Ring*. **A. section**, see *Gastrotomy*. **A. sweet'bread**, pancreas. **A. typhus**, typhoid fever. **A. vis'cera**, see *Abdomen*.

Abdominis exploratio, ab-do'min-is ex-plo-rah'she-o. Abdominoscopy.

Abdom'ino-ante'rior. Term given to position of fœtus in utero with abdomen presenting anteriorly.

Abdom'ino-poste'rior. Term given to position of fœtus with abdomen presenting posteriorly.

Abdominoscopy (ab-dom-in-os'ko-pe) or **Abdominoscop'ia** (*abdomen, skopeo*, to view). Examination of lower belly by auscultation or other means of diagnosis; laparoscopy.

Abdomino-thoracic, ab-dom'in-o-tho-ras'ik. Relating to abdomen and thorax.

Abdominous, ab-dom'in-us. Abdominal; having a large abdomen.

Abdomino-uterotomy, ab-dom'in-o-u-ter-ot'om-e. Laparo-hysterotomy.

Abducens, ab-du'sens (*ab, duco*, to lead). Muscle or nerve concerned in drawing (*abducting*) a part from median line of body. Term applied to external rectus muscle of eye and sixth cranial nerve, which is its motor nerve. **A. labio'rum**, levator anguli oris muscle. **A. muscle**, external rectus muscle of eye. **A. nerve**, sixth cranial nerve, motor nerve of external rectus muscle of eye. **A. nu'cleus**, point from which abducens nerve takes its origin in the medulla.

Abducent, ab-du'sent. Abducens.

Abduct, ab-dukt'. To draw away from median line.

Abduction, ab-duk'shun (*ab, duco*, to lead). Movement separating limb or other part from axis of body. Fracture near articular extremity of bone, with separation of fragments; rupture.

Abductor, ab-duk'tor. Nerve or muscle concerned in moving certain parts by abduction. **A. an'guli o'ris**, accessory orbicular muscle of mouth. **A. au'ris** or **auricula'ris**, portion of posterior auricular branch of facial nerve; retrahens aurem muscle. **A. bre'vis al'ter**, inner deep portion of abductor pollicis muscle; A. pollicis brevis. **A. coccy'gis**, coccygeus. **A. dig'iti quin'ti**, A. minimi digiti. **A. of ear**, A. auris muscle. **A. of Eusta'chian tube**, tensor palati. **A. of eye**, rectus externus oculi. **A. hallu'cis**, muscle passing on inner side of foot from os calcis and internal lateral ligament to first phalanx of large toe. **A. humera'lis pol'licis**, anomalous form of extensor carpi radialis longior, arising from supracondyloid ridge of humerus, inserted on first phalanx of thumb. **A. in'dicis**, muscle arising from os trapezium and metacarpal bone of thumb, and inserted into first bone of forefinger. Use, to bring forefinger toward thumb. **A. in'dicis pe'dis**, prior indicis pedis, posterior indicis pedis. **A. inter'nus**, A. brevis alter. **A. laryn'gis**, crico-arytenoideus posticus. **A. lon'gus auric'ulæ**, see *Cervico-auricularis*. **A. longus pol'licis**, abductor pollicis longus. **A. metacar'pi**, see *Extensor obliquus metacarpi*. **A. min'imi dig'iti ma'nûs**, originates, fleshy, from os pisiforme and annular ligament near it; inserted, tendinous, into inner side of base of first phalanx of little finger. Use, to draw little finger from the rest. See, also, *Flexor parvus minimi digiti*. **A. min'imi dig'iti pe'dis** (by Winslow, divided into two portions—*parathenar major* and *metatarseus*). This muscle forms outer margin of sole of foot, and is immediately beneath plantar aponeurosis. It arises, tendinous and fleshy, from outer side of protuberance of os calcis, and from root of metatarsal bone of little toe, and is inserted into outer part of root of first bone of little toe. Use, to draw little toe outward. **A. nerve**, abducens nerve. **A. obli'quus hallu'cis**, A. hallucis. **A. oc'uli**, rectus externus oculi. **A. os'sis metatar'si min'imi dig'iti**, A. minimi digiti pedis. **A. os'sis metartar'si quin'ti**, rare muscle, passing from os calcis to fifth metatarsal bone. **A. pol'licis bicor'nis**, extensor ossis metacarpi pollicis. **A. pol'licis bre'vis**, short, flat, triangular muscle, arising from anterior surface of os scaphoides and annular ligament of carpus, and terminating at outside of upper extemity of first phalanx of thumb. A portion, on inner side of this muscle, is called, by Albinus, *abductor brevis alter*. **A. pol'licis lon'gus** or **A. longus pollicis**, long, thin muscle, arising from posterior surface of ulna, radius, and interosseous ligament, and inserted at outer side of upper extremity of first metacarpal bone. **A. pól'licis ma'nûs**, abductor pollicis brevis. **A. pol'licis pe'dis**, arises, fleshy, from anterior and inner part of protuberance of os calcis, and tendinous from same bone where it joins with os naviculare. Inserted, tendinous, into internal os sesamoideum and root of first bone of great toe. Use, to pull great toe from the rest. **A. pupil'læ**, rectus oculi externus. **A. of thigh**, gluteus maximus, G. minimus, superior portion of G. medius, combined. **A. transver'sus hallu'cis**, transversus pedis. **A. tu'bæ**, tensor palati.

The name *Abductor* has been given also to all interosseous muscles of the hand and foot performing motion of abduction on fingers or toes, and to muscles executing same function in other parts of the body.

Abdumen, ab-du'men, Abdomen.

Abebæos, ab-a-be'os (*a*, neg., *bebaios*, firm). Weak, infirm, unsteady.

Abecedaria, ab-a-sa-dah're-ah. Acmella mauritiana.

Abelasis, ab-el'ah-sis. Cyperus esculentus, African groundnut, having galactagogue properties.

Abelme'luch. African name for ricinus.

Abelmosch (ab'el-mosk) or **Abelmusk**, Hibiscus abelmoschus.

Abelmoschus, ab-el-mos'kus. Hibiscus abelmoschus. **A. esculen'tus**, Hibiscus esculentus. **A. moscha'tus**, Hibiscus abelmoschus.

Abepithymia, ab-ep-e-thim'e-ah (*ab, epi, thumos*, seat of soul). Paralysis of solar plexus; anepithymia.

Aberia, ab-a're-ah. Genus of Bixineæ, of which A. coffra is best known at Cape of Good Hope, having acid fruit called kei apple.

Ab'ernethy, sarco'ma of. Sarcoma, vascular.

Aberrans, ab-er'rans. Aberrant. **A. vas**, see *Vas*.

Aberrant, ab-er'rant (*ab, erro*, to wander). Wandering away, or from straight line or direction. **A. duct**, vasculum aberrans of testicle. **A. ducts**, bile-ducts in liver, not connected with normal biliary apparatus of that organ; probably result of atrophy in early life. **A. ves'sels**, see *Vasa aberrantia*.

Aberratio, ab-er-rah'she-o. Aberration. **A. lac'tis**, galactoplania. **A. lo'ci**, heterotopia. **A. men'sium** or **menstruo'rum**, menstruation, vicarious. **A. tem'poris**, heterochronia.

Aberration, ab-er-ra'shun (*ab* and *erro*, to wander). Passage of fluid of living body into order of vessels not destined for it; error loci. Flow of fluid toward organ different from that to which it is ordinarily directed, as in vicarious hemorrhage. Aberration of sense or judgment is an error in perceptions or derangement of intellectual faculties. In optics aberration is dispersion of rays of light in passing through lens. **A., chromat'ic**, aberration of refrangibility. **A., distan'tial**, see *Aberration of sphericity*. **A., men'tal**, abnormal action of the mind, not always amounting to insanity. **A., Newto'nian**, A., chromatic. **A. of refrangibil'ity**, error of dispersion, exists when, as in a common lens, rays passing near circumference of lens are decomposed, so that a colored image is observed. This in human eye is corrected by iris, not permitting rays to fall near circumference of lens, and also by crystalline lens itself serving purposes of achromatic glass. **A. of spheric'ity**, or **spher'ical aberra'tion**, takes place when rays, as in common lens, passing through centre of lens, and those passing near circumference, are unequally refracted, so that they do not meet at common focus. This aberration in human eye is corrected by iris and lens. Defect from imperfect adjustment of focus is known as distantial aberration.

Abevacuation, ab-e-vak-u-a'shun (*evacuo*, to empty). Partial or imperfect evacuation; immoderate evacuation; metastatic secretion. See *Apocenosis*.

Abhal or **Abhel.** Fruit of Indian cypress; emmenagogue.

Abicum, ab'ik-um. Thyroid cartilage.

Abies, ab'e-aze. Pinus picea. **A. al'ba**, Pinus picea. **A. balsa'mea**, Pinus balsamea. **A. balsamif'era**, Pinus balsamea. **A. Canadensis**, Pinus Canadensis. **A. commu'nis**, A. excelsa. **A. excel'sa**, see *Pinus abies*. **A. Fraseri**, indigenous; a source of Canada turpentine. **A. Gal'lica**, Pinus picea. **A. lar'ix**, Pinus larix. **A. Menzie'sii**, balsam pine of W. United States. **A. ni'gra**, black spruce, Pinus nigra. **A. pectina'ta**, Pinus picea. **A. pi'cea**, Pinus picea. **A. ru'bra**, Pinus abies. **A. toxifo'lia**, Pinus picea.

Abietic, ab-e-et'ik. Relating to abies or fir-tree. **A. acid**, acid formed by acting on pine-resin with dilute alcohol.

Abietin, ab-e'a-tin. Resinous substance from A. balsamea, A. pectinata, and other Abies.

Abietine, ab-e'a-teen. Distilled oil from Pinus sabiniana.

Abi'etis resi'na. Resin from fir tree.

Abietite, ab-e'a-tite. Neutral extractive from Abies pectinata, $C_6H_8O_3$.

Ab'iga. Ajuga, Teucrium chamæpitys.

Abiogenesis, ah-be-o-jen'e-sis (*a, bios,* life, *genesis,* generation). Spontaneous generation.

Abiogenetic, ah-be-o-jen-et'ik. Relating to or occurring by abiogenesis.

Abiogeny, ah-be-oj'e-ne. Abiogenesis.

Abionarce, ah-be-o-nar'se (*a, bios,* life; *narke,* stupor). Paralytic torpor.

Abiosis, ah-be-o'sis (*a, bios,* life). Death; lifelessness.

Abiotic, ah-be-ot'ic. Dead; inanimate; lifeless; nearly dead.

Abiotus, ah-be-o'tus. Conium maculatum.

Abirritant, ab-ir'ri-tant. Devoid of irritability; calmative.

Abirritation, ab-ir-re-ta'shun (*ab, irritatio,* irritation). Absence or defect of irritation; debility, asthenia.

Abisga. Capparis sodada.

Ablactation, ab-lak-ta'shun (*ab, lacto,* to suckle). Weaning; stoppage of lactation.

Ablactatus, ab-lak-tah'tus. Weaned.

Ablastemic, ah-blas-te'mik. Not formative; not connected with germination or generation.

Ablastes, ah-blas'tes (*a, blastos,* germ). Sterile.

Ablastous, ah-blas'tus (*a, blastos,* germ). Sterile.

Ablation, ab-la'shun (*ab, fero, latum,* to take). Extirpation, as by excision; remission, as of fever or acute disease; separation or detachment, as ablation of the retina.

Ablepha'ria or **Ablepharon,** ah-blef'ar-on (*a, blepharon,* eyelid). Absence of an eyelid or eyelids.

Blepharus, ah-blef'a-rus (*a,* priv., *blepharon,* eyelid). Without eyelids.

Ablepsia (ah-blep'se-ah) or **Ablepsy,** ah'bleps-e. Blindness; epilepsy.

Abluentia (ab-lu-en'she-ah) or **Ab'luents** (*ab, luo,* to wash). Detergents.

Ablution, ab-lu'shun. Washing; legal ceremony in which body is subjected to particular affusions. Ablution with cold or tepid water is employed, therapeutically, to reduce febrile heat.

Abmortal, ab-mor'tal (*ab, mors,* death). Direction of electric current in wounded muscle toward uninjured portion.

Abneural, ab-nu'ral (*ab, neuron,* nerve). Part of embryo opposite to central nervous system.

Abnormal (ab-nor'mal) or **Abnormous,** ab-nor'mus (*ab, norma,* rule). Not conformable to rule; irregular.

Abnormality (ab-nor-mal'e-te), **Ab-nor'mi-ty,** or **Abnormitas,** ab-nor'me-tas. Anomaly; malformation.

Aboborah, ab-o'bo-rah. Pumpkin or gourd. **A. doma'ta,** Brazilian species, used in dropsy.

Abolition, ab-o-lish'un. Destruction or suppression; complete suspension of any symptom or function or of consciousness.

Aboma'sum or **Abomasus,** ab-o-mah'sus. Rennet; lowermost or fourth stomach of ruminating animals.

Abomina'tio. Disgust.

Aboral, ab-o'ral (*ab, os,* mouth). Remote from the mouth.

Aborsio (ab-or'se-o) or **Aborsus,** ab-or'sus. Abortion.

Abor'sive. Abortive.

Abort'. To miscarry; to check or arrest before development, as a disease—small-pox, for instance.

Aborticide, ab-ort'i-side (*abortus, cædo,* to kill). Destruction of fœtus by induction of abortion.

Aborticidium, ab-ort-e-sid'e-um. Aborticide.

Abortient, ab-or'she-ent. Abortive or abortifacient.

Abortifacient, ab-ort-i-fa'she-ent (*abortus, facio,* to make). Abortive; drug or other agent producing abortion or arresting disease before development.

Abortion, ab-or'shun (*ab, orior,* to rise). Miscarriage; expulsion of fœtus before seventh month of utero-gestation, or before it is viable. Causes are referable either to mother, and particularly to uterus, or to fœtus and its dependencies. It most frequently occurs between eighth and twelfth weeks of gestation. The causes of abortion may be conveniently arranged as follows (Duncan):

Pathological Causes.	Reflex.	Lactation, gastric irritation, neuralgic toothache, rectal irritation, operations.
	Systemic.	Scarlet fever, typhus fever, typhoid fever, relapsing fever, small-pox, cholera, syphilis, chorea, inhalation of noxious gases, plumbism, pertussis.
	Local.	Uterine flexions, fibroids, polypi, endometritis and cervicitis, laceration of cervix, pelvic adhesions, diseases of the ovum or its membranes.
Accidental Causes.	Physical.	Blows, falls, excessive coitus, etc.
	Psychical.	Fright, anxiety, fear, anger, etc.

It is *incomplete* when placenta or membranes surrounding fœtus are not expelled; *embryonic,* when occurring between twentieth and ninetieth days of pregnancy; *fœtal,* between third and sixth months; *habitual* or *chronic,* when occurring in successive pregnancies. Symptoms are: uterine hemorrhage with or without flakes of decidua, with intermitting pain. When it once takes place, it is apt to recur in subsequent pregnancies about same period. Some call abortion, occurring prior to three months, *effluxion.* Within twenty days after conception it is called *ovular abortion.* It is *induced* or *provoked* when caused intentionally. Treatment must vary according to constitution of the patient and causes. Horizontal posture and perfect quietude are indispensable. The term Abortion is likewise applied to the product of untimely birth. **A., crim'inal,** fœticide. **A., missed,** expulsion of fœtus some time after its death. **A., o'vular,** abortion taking place soon after conception. **A., sponta'neous,** abortion occurring naturally; that is, without artificial interference of any kind.

Abortionist, ab-or'shun-ist. Practitioner or procurer of criminal abortion.

Abortium, ab-or'she-um. Abortion.

Abor'tive. Parturient, parturifacient, ecbolic; without result; cutting short, as abortive treatment; ectrotic; imperfectly developed; medicine having property of causing abortion.

Abortivum, ab-or-te'vum. Abortive; abortifacient; abortion.

Abort'ment. Abortion.

Abor'tum. Abortion.

Abor'tus. Abortion. **A. habitua'lis,** habitual abortion. **A. period'icus,** habitual abortion. **A. procura'tio,** induced or criminal abortion.

Aboulia. See *Abulia.*

Aboulomania, ab-oo-lo-mah'ne-ah (*a, boule,* will, *mania*). Inability to exert powers of will; mental torpor.

A'brabax, A'bracax, or **A'brasax.** Mystic term, expressing number 365, to which were attributed miraculous properties. Amulet.

Abracadabra (ab-rah-kah-dah'brah) or **Abrasadabra,** ab-rah-sah-dah'brah. Pronounced and repeated in a certain form and certain number of times, or figured on amulets and worn around the neck, supposed to have power of curing fevers and preventing diseases.

Abracalan'. Cabalistic term to which same virtue was attributed.

A'bracax, ah'brah-kaks. Abrabax.

Abrachia, ah-brak'e-ah (*a, brachion,* arm). Absence of arm or arms.

Abrachiocephalia, ah-brak-e-o-sef-ah'le-ah (*a, brachion,* arm, *kephale,* head). Absence of arms and head.

Abrachius, ah-brak'e-us. One without arm or arms.

Abrade, ab-rade'. To remove surface of skin; to excoriate.

A'braham balm. Vitex agnus castus, or chaste-tree. **A. man**, vagrant lunatic. "To sham Abraham or Abram" is used for one feigning sickness or infirmity.

Abranchiata, ah-brank-e-ah'tah (*a*, *branchia*, gills). Without gills; a section of Annelidæ, of which leeches and earth-worms are examples.

Abrasadabra, ab-rah-sah-dah'brah. Abracadabra.

A'brasax. Abrabax.

Abrasin, ab'rah-sin. Elæococca cordata.

Abrasio, ab-rah'ze-o. Abrasion. **A. den'tium**, odontotripsis. **A. intestina'lis** or **intestino'rum**, see *Abrasion*.

Abrasion, ab-ra'zhun (*ab*, *rado*, to rasp). Superficial excoriation or ulceration of skin; or ulceration, with loss of small shreds of substance, of mucous membrane of intestines, *abrasio intestinalis* or *intestinorum*.

Abrasor, ab-ra'zor. Instrument for scraping; raspatory.

Abrasum, ab-rah'sum. Abrasion.

Abrasus, ab-rah'sus. Abraded.

Abrathan, ab'rah-than. Artemisia abrotanum.

Abraxas, ah'braks-as. Abrabax.

A'bric acid. Acid from jequirity or Abrus precatorius.

Abrin, ab'rin. Principle or ferment from abrus or jequirity; yellowish soluble powder, very poisonous, $\frac{1}{100}$ of a grain being fatal.

Abroma angustum, ab-ro'mah an-gus'tum. Root of this Indian tree is employed in dysmenorrhœa.

Abro'motoun. Ashantee plant, bruised leaves of which are used externally for boils.

Abrong. Chinese laxative and vermifuge grain.

Abrosia, ah-bro'se-ah (*a*, *brosis*, food). Abstinence from food.

Abrotanum (ab-rot'ah-num) or **Abrotonum**, ab-rot'-o-num. Artemisia abrotanum. **A. cath'sum**, Artemisia abrotanum. **A. mas**, Artemisia abrotanum.

Abrotonites, ab-rot-o-ne'tes. Wine impregnated with Artemisia abrotanum.

Abrot'onum. Artemisia abrotanum.

Abroulaza, ab-ru-lah'zah. Aboulaza.

Abruption, ab-rup'shun (*ab*, *rumpo*, to break). Abduction; rupture.

Abrus precatorius, ah'brus pra-kah-to're-us (*habros*, elegant, *preces*, prayers). *Jequirity*, *Licorice-bush*, *Red bean*, *Love pea*, *Wild licorice*. Small ornamental shrub growing from Florida to Brazil, India, Pacific islands, tropical Africa, Egypt, and West Indies; with scarlet seeds having black spot; nat. ord. Leguminosæ. Root (abri radix) and leaves are sweet, mucilaginous demulcents. Seeds of American kind are purgative and poisonous; *jequirity seeds*, *crabs' eyes*, are employed to form rosaries, hence called, in mockery, jumble or prayer beads. In poultice has been used for ulcerative skin diseases, often in infusion (℥iiss in Oj of water) of the crushed cotyledons has been employed in granular conjunctivitis, but they may produce purulent conjunctivitis, unless infusion is always fresh when used. In paste, used in India in sciatica, paralysis, and other nervous diseases.

Abs, as a prefix, see *A*.

Abscedentia, ab-se-den'she-a (*abs*, *cedo*, to depart). Parts of body, such as bones, which are liable to ulceration from disordered state of the system.

Abscess, ab'ses (*abs*, *cedo*, to depart). Gathering, rising; collection of pus in a cavity, result of morbid process. See *Pyogenia* and *Suppuration*. *Acute abscess* is one following acute or violent inflammation. *Cold*, *chronic*, *strumous*, or *scrofulous abscess* is result of chronic or scrofulous inflammation. *Congestive* or *diathesic abscess* is symptomatic form occurring in part at distance from inflammation occasioning it; as a lumbar abscess, in which inflammation may be in lumbar region, whilst pus exhibits itself at the groin. **A., acute**, see *Abscess*. **A., alve'olar**, parulis. **A., Bartholin'ian**, abscess of vulvo-vaginal or Bartholin's gland. **A., bil'iary**, abscess of gall-bladder or bile-duct. **A. of the breast**, mastodynia apostematosa. **A., bursal**, abscess of bursa mucosa. **A., ca'seous**, cheesy suppuration of tubercular gumma. **A., chron'ic**, see *Abscess*. **A., cir'cumscribed**, cavity bounded by wall or exudation. **A., cold**, see *Abscess*. **A., conges'tive**, see *Abscess*. **A., critical**, abscess taking place in course of acute disease, at a critical stage **A., den'tal**, alveolar abscess. **A., der'moid**, scrofulous, phlegmonous abscess of skin. **A., diathe'sic**, see *Abscess*. **A., diffuse**, purulent infiltration. **A., embol'ic**, abscess from embolism; A., metastatic. **A. emphysem'atous**, abscess containing air, generally putrescent. **A., encys'ted**, abscess of a cyst or enclosed in serous sac. **A., epithe'lial**, A. of epithelial layer. **A., fe'cal**, abscess formed by entrance of contents of bowel into contiguous purulent cyst. **A., follic'ular**, abscess consecutive to inflammation of follicle. **A., gland'ular**, A. from inflammation of lymphatic gland. **A., gravita'tion**, congestive or wandering abscess, from dependent position. **A., hemat'ic**, A. caused by clot of effused blood. **A., hepat'ic**, A. of liver. **A., hypostat'ic**, A., gravitation. **A., idiopath'ic**, A. not arising from any other morbid condition. **A., il'iac**, A. situate in, or pointing in, iliac region. **A., interlamel'lar**, A. between lamellæ of membrana tympani. **A., ischio-rec'tal**, A. of ischio-rectal fossa. **A., lac'rymal**, A. of lacrymal sac. **A., lacu'nar**, A. of lacuna of urethra. **A., lum'bar**, A. situate in, or pointing in, lumbar region. **A., lymphat'ic**, A. of lymphatic gland. **A., mam'mary**, mastodynia apostematosa. **A., mar'ginal**, A. at margin of anus. **A., mas'toid**, A. of mastoid portion of temporal bone. **A., metastat'ic**, abscess forming suddenly, sometimes without precursory signs of inflammation, in part of body remote from one in state of suppuration, a result of phlebitis. **A., mil'iary**, slight suppuration, generally embolic. **A., milk**, mastodynia apostematosa. **A., mul'tiple**, a number of abscesses, as in pyæmia. **A., mu'ral**, A. of wall of abdomen or other large cavity. **A., ossif'luent**, A. of morbid conditions of bone. **A., otic** or **otit'ic**, A. of ear or due to inflammation of ear, often causing cerebral disease. **A., paramet'ric**, A. of cellular tissue of female pelvis. **A., parametrit'ic**, A., parametric. **A., perforating, of the lung**, see *Lung, perforating abscess of*. **A., perilarynge'al**, see *Perilaryngitis*. **A., perimet'ric**, A. consequent upon inflammation of serous coat of uterus. **A., perimetrit'ic**, A., perimetric. **A., perineph'ric** or **perinephrit'ic**, A. of connective tissue around kidney. **A., peripleu'ric** or **peripleurit'ic**, A. in connective tissue associated with pleura. **A., peritone'al**, A. connected with peritoneum, consequent on inflammation of that membrane. **A., periu'terine**, A., perimetric, see *Periuterine*. **A., phleg'monous**, acute abscess of cellular tissue. **A., post-fas'cial**, abscess behind fascia. **A., post-mam'mary**, abscess behind the mammary gland. **A., post-pharynge'al**, abscess behind the pharynx. **A. prelac'rymal**, A. at inner canthus of eye, in lacrymal bone, due to caries of latter. **A., preperitone'al**, abscess between peritoneum and anterior wall of abdomen. **A. of proxim'ity**, A. in vicinity of morbid structure. **A., psoas**, lumbar abscess. **A., puer'peral**, A. of skin of new-born infants, due to ante-partum causes. **A., pyemic**, see *Pyæmia*. **A., resid'ual**, abscess in or about residues of former inflammations, as in adhesions, thickening, or other lowly organized products of previous inflammation. **A., retromam'mary**, A. behind or under mammary gland. **A., retrœsophage'al**, A. behind œsophagus, in front of spinal column. **A., retroperitone'al**, A. behind or under peritoneum. **A. retropharynge'al**, A. between pharynx and spinal column. **A. root**, Polemonium reptans. **A., scrof'ulous**, see *Abscess*. **A., sec'ondary**, consecutive or metastatic A. **A., shirt-button** or **shirt-stud**, deep-seated mammary abscess, eventually giving rise to one or more subcutaneous abscesses. A cavity exists between integuments and gland, communicating by narrow passage with another and larger cavity between mamma and chest; whole having

appearance of shirt-stud. **A., spermat'ic,** A. connected with spermatic apparatus. **A., spi'nal,** A. dependent on spinal disease. **A., stercora'ceous** or **ster'coral,** A., fecal. **A., stru'mous,** see *Abscess.* **A., subaponeurot'ic,** A. beneath aponeurosis. **A., subare'olar,** A. beneath areolar tissue or under areola of nipple. **A., subfas'cial,** A. beneath fascia. **A., submam'mary,** A., retromammary. **A., subpec'toral,** A. beneath pectoral muscles. **A., subperios'teal,** see *Periostitis.* **A., subperitone'al,** A., retroperitoneal. **A., sudorip'arous,** abscess from inflammation or obstruction of sweat-gland. **A., supramam'mary,** A. of connective tissue over mammæ. **A., sympathet'ic,** A. arising apparently from sympathy or extension through lymphatic vessels or other channels, as a bubo. **A., symptomat'ic,** A. dependent on disordered condition of general system. **A., the'cal,** A. of sheath of tendon. **A., trop'ical,** hepatic abscess of tropical climates. **A., tuber'culous,** A. of tubercular gland. **A., tympanit'ic,** A., emphysematous. **A., ure'thral,** A. of lacunæ of urethra or of periurethral structures. **A., u'rinary,** A. associated with extravasation of urine. **A., verm'inous,** A. connected with intestines, and characterized by presence of worms. **A., wan'dering,** form of congestive abscess occurring at point remote from its original location.

Abscess'io or **Absces'sion.** Abscess.

Abscess'us. Abscess. **A. arthrit'icus,** abscess of bowels due to gouty diathesis. **A. artic'uli,** pyarthrosis. **A. bursa'lis,** abscess of bursa mucosa. **A. cap'itis sanguin'eus neonato'rum,** cephalæmatoma. **A. cer'ebri,** encephalo-pyosis. **A. congestio'nis** or **congesti'vus,** abscess, congestive or wandering. **A. embol'icus,** abscess, embolic. **A. flatuo'sus,** abscess, emphysematous. **A. follicula'ris,** abscess, follicular. **A. frig'idus,** abscess, cold. **A. gangrænes'cens** or **gangræno'sus,** gangrenous form of abscess, as seen in anthrax. **A. gingiva'rum,** parulis. **A. lac'teus,** mastodynia apostematosa. **A. lumba'lis, lumba'ris,** or **lumbo'rum,** lumbar abscess. **A. lymphat'icus,** abscess of lymphatic gland. **A. mam'mæ,** mastodynia apostematosa. **A. metastat'icus,** abscess, metastatic. **A. nuclea'tus,** furunculus. **A. oc'uli,** hypopyon. **A. pec'toris,** empyema. **A. psoad'icus,** psoas abscess. **A. pulmo'num,** pneumapostema. **A. rena'lis,** nephrapostasis. **A. spirituo'sus,** aneurism. **A. stercora'lis** or **stercoro'sus,** abscess, fecal. **A. sudorip'arus,** abscess of sweat-gland. **A. thora'cis,** empyema. **A. urina'lis** or **urino'sus,** uropostema. **A. vermino'sus,** abscess, verminous.

Abscis'sæ. Lines crossing other lines at right angles, forming bases of graphic records, as of pulse-beats.

Abscissio, ab-sis'se-o. Abscission or cutting off. **A. oc'uli,** removal of part of globe of eye. **A. præpu'tii,** circumcision.

Abscission, ab-sizh'un (*ab, scindo,* to cut off). Excision or extirpation of part, especially soft part; fracture or injury of soft parts, with loss of substance; diminution or loss of voice; sudden and premature termination of disease; suppression of function.

Absconsio, ab-skon'she-o (*abs, condo,* to hide). Sinus; articular cavity of bone.

Ab'sence. Slight mental aberration. See *Epilepsy.*

Ab'sinth. Wormwood.

Absinthe (F.). See *Artemisia absinthium.*

Absinthin, ab-sin'thin. White bitter principle of wormwood; $C_{16}H_{20}O_4$; narcotic.

Absinthism, ab'sinth-izm. Effects of indulgence in absinth. See *Artemisia absinthium.*

Absinthites (ab-sin-the'tes) or **Apsinthi'tes.** Wine impregnated with absinthium.

Absinthium. ab-sinth'e-um. Artemisia absinthium. **A. alpi'num,** Swiss species of artemisia, used for making absinthe. **A. mari'num** or **marit'imum,** Artemisia maritima. **A. mi'nus,** Artemisia pontica. **A. pon'ticum,** Artemisia pontica. **A. roma'num,** Artemisia pontica. **A. santon'icum,** Artemisia santonica. **A. vulga're,** Artemisia absinthium.

Absinthol, ab-sin'thol. Derivative of oil of wormwood, isomeric with camphor.

Ab'solute al'cohol. See *Alcohol.* **A. hypermetro'pia, A. strabis'mus,** see *Hypermetropia* and *Strabismus.*

Absorb'ent, (from *absorbeo,* to suck up). That which absorbs or causes absorption; medicine used for absorbing acidity in stomach and bowels, as magnesia, chalk, etc.; any substance, such as cobweb, sponge, etc., which, applied to bleeding surfaces, arrests hemorrhage. **A. cotton,** see *Gossypium.* **A. vessels** and **glands,** those concurring in exercise of absorption.

Absorbents, ab-sorb'ents. Absorbent vessels.

Absorp'tio. Absorption. **A. morbo'sa,** absorption of excretive matter into circulation **A. pulmona'lis,** absorption in lungs. **A. sa'na,** absorption in condition of health. **A. san'guinis,** hæmorrhophesis.

Absorption, ab-sorp'shun. Act of absorbing, sucking up, or imbibing; function of absorbent vessels. External absorption obtains, from without the organs, materials intended for their composition. Internal absorption, or absorption of decomposition, takes up from the organs materials that have to be replaced. External absorption takes place at external surface of body, and also from that of mucous membranes of digestive and respiratory passages. Hence, again, the division of external absorption into *cutaneous, intestinal* or *digestive,* and *pulmonary* or *respiratory.* Internal absorption is subdivided into—1. *Molecular* or *interstitial, nutritive, organic* or *decomposing,* taking up from each organ materials that constitute it, so that decomposition is always *in equilibrio* with deposition. 2. *Absorption of recrementitial secreted fluids,* such as fluid of serous membranes, synovia, etc. These would augment indefinitely if absorption did not remove them in same proportion as that in which they are deposited. 3. *Absorption of part of the excrementitial secreted fluids,* as they pass over the excretory passages. The agents of external absorption are veins and chyliferous vessels; of internal absorption, lymphatics. In chyliferous vessels and lymphatics fluid is always found to possess same general properties; action of elaboration or selection must have taken place. Veins seem to exert no selection; any fluid, possessing necessary tenuity, passes through coats of vessel readily by imbibition, and proceeds along with the torrent of circulation. Watery fluids thus enter the blood when taken into the stomach. Substances requiring digestion may pass through the chyliferous vessels and thoracic duct. **A. band,** see *Spectrum.* **A. of composi'tion,** see *Absorption.* **A., cuta'neous,** see *Absorption.* **A., decompo'sing,** see *Absorption.* **A. of decomposi'tion,** see *Absorption.* **A., diges'tive,** see *Absorption.* **A., disjunc'tive,** absorption of living part of tissue, in immediate connection with dead portion; latter being thus detached, as in separation of slough. **A. of excrementi'tial secre'ted fluids,** see *Absorption.* **A., exter'nal,** see *Absorption.* **A., inter'nal,** see *Absorption.* **A., intersti'tial,** see *Absorption.* **A., intes'tinal,** see *Absorption.* **A., molec'ular,** see *Absorption.* **A., nu'tritive,** see *Absorption.* **A., organ'ic,** see *Absorption.* **A., progres'sive,** absorption apparently caused by interference of pressure with nutrition of a part, as of deep-seated tumor approaching the surface and inducing absorption of interposed structures. **A., pul'monary,** see *Absorption.* **A., pu'rulent,** pyæmia. **A. of recrementi'tial secre'ted fluids,** see *Absorption.* **A., res'piratory,** see *Absorption.* **A., ve'nous,** absorption through the venous system.

Abstemious, ab-ste'me-us (*abs, temetum,* wine). One who abstains from wine or fermented liquors.

Abstention, ab-sten'shun (*ab, teneo,* to hold). Retention. **A. sterco'rum,** constipation.

Abstergentia (ab-ster-jen'she-ah), **Abstersiva** (ab-ster-se'vah), or **Abstersoria,** ab-ster-so're-ah (*abs, tergo,* to clean). Detergents or abstergents, agents having cleansing qualities.

Abstinence, ab'stin-ense (*abs, teneo,* to hold). Fasting. Privation, usually voluntary, of drink or food. Fasting is a useful remedial agent in disease, particularly in that of inflammatory character.

Abstract, abs'trakt (*abs, traho,* to draw). Abstractum (Ph. U. S.); formed by evaporation of alco-

holic fluid extract to dry powder with milk-sugar. One part of abstract equals two parts of drug or fluid extract. Abstracts of aconite, belladonna, conium, digitalis, hyoscyamus, ignatia, jalap, nux vomica, podophyllum, senega, and valerian are officinal in Ph. U. S.

Abstracta, abs-trakt-ah' (pl. of *Abstractum*). Class of preparations officinal in Ph. U. S. See *Abstractum*.

Abstraction, abs-trak'shun. Taking away, as A. of blood; distillation; exclusive attention.

Abstractitious, ab-strak-tish'us. Possessing the capability of being abstracted without maceration or fermentation.

Abstractum, abs-trak'tum. Officinal name of Abstract in Ph. U. S.: **A. aconi'ti**, **A. belladon'næ**, **A. coni'i**, **A. digita'lis**, **A. hyoscy'ami**, **A. igna'tiæ**, **A. jalap'æ**, **A. nucis vom'icæ**, **A. podophyl'li**, **A. sen'egæ**, **A. valerian'æ**. See *Abstract*.

Ab'sus. Cassia growing in Egypt and India, employed as dry collyrium in endemic ophthalmia.

Abterminal, ab-tur'me-nal (*ab*, *terminus*, end). Term applied to electric current passing from end of a muscle, as tendon, to body or belly of muscle.

Abulia, ab-u'le-ah (*a*, *boule*, will). Loss of will-power.

Abulic, ab-u'lik. One who has lost power of will.

Abuta, ab-u'tah. Pareira brava.

Abutilon Avicennæ, ab-u'til-on ah-ve-sen'ne (*a*, priv., *bous*, ox, *tilos*, diarrhœa). Indian or yellow mallow, velvet leaf; order, Malvaceæ; naturalized in United States; mucilaginous and demulcent. **A. corda'tum**, A. Avicennæ.

Abvacuatio, ab-vak-u-ah'she-o (*ab*, *vacuo*, to empty). Excessive or colliquative evacuation.

Ac, as a prefix, same as *Ad*.

Acacanthrax, ah-kak-an'thraks (*a*, *kakos*, bad, *anthrax*). Non-malignant anthrax.

Acacia (Ph. U. S.), ak-ash'e-ah. Acaciæ gum'mi (Ph. Br.). Gum arabic or gum acacia. Ord. Mimoseæ. Gummy exudation from Acacia verek and other species of Acacia (Ph. U. S.), from Acacia Senegal and other species of Acacia (Ph. Br.); in irregular pieces, colorless or pale yellow, hard, brittle, of shining fracture, transparent, soluble in water and insoluble in alcohol, s. g. 1.4 to 1.5. Mucilaginous; but chiefly used in pharmacy; sometimes administered alone as a demulcent. See *Arabin*. Officinal preparation, Mucilago acaciæ. **A. Acapulcen'sis**, Mexican gum, astringent. **A. Adanso'nii**, from Senegambia, yielding Senegal gum. **A. al'bicans**, a species from Brazil, a source of kuisache gum. **A. al'bida**, also from Senegambia. **A. ama'ra**, Albizzia amara. **A. an'gico**, from S. America. **A. anthelmin'tica**, Albizzia anthelmintica. **A. Arab'ica**, babul or babool tree of India. Bark is astringent and tonic. **A. bas'tard**, see *Prunus spinosa*. **A. capen'sis**, A. horrida. **A. cat'echu**, catechu. **A. cochlio'carpa**, tree of Brazil, a source of cortex Brasiliensis. **A. concin'na**, species of India, emetic and expectorant. **A. decur'rens**, wattle-tree, source of Australian gum. **A. Ehrenber'gii**, from Libya and Nubia, yielding gum arabic. **A. falca'ta**, tree of New South Wales, astringent bark of which is used to poison fish. **A., false**, Robinia pseudo-acacia. **A. farnesia'na**, tree of W. Indies, yielding gum like gum arabic; astringent bark and leaves used in affections of bladder. **A. ferrugin'ea**, Indian tree, with astringent bark. **A. fis'tula**, source of Suakin gum, inferior variety of acacia. **A. German'ica**, see *Prunus spinosa*. **A. grave'olens**, tree of India, bitter diaphoretic. **A. homalophylla**, from Australia, yielding gum used in diarrhœa. **A. hor'rida**, from S. Africa, yielding astringent Cape gum. **A. In'dica**, tamarindus. **A. jure'ma**, from Brazil; substitute for barbatimao bark. **A. lebbek**, Arabian tree labach; leaves are used for fomentation in rheumatism. **A. leucophlœ'a**, astringent bark, source of kuteera gum; strong liquor is distilled from it. **A. Nilot'ica**, see *Acacia*. **A. niopo** or **niops**, species of S. America; used as substitute for tobacco, also as an exhilarating snuff. **A. nos'tras**, see *Prunus spinosa*. **A. odoratis'sima**, tree of E. Indies; juice of bark is used in leprosy and ulcers. **A. orfota**, Arabian species, resin of which is used in fumigation in epilepsy. **A. pycnan'tha**, source of Australian gum. **A. raddia'na**, species of Egyptian acacia, yielding galls from attacks of insects. **A. sas'sa**, Abyssinian species, yielding gum like gum arabic. **A. scan'dens**, plant is emetic; yields gum, lotion of which is applied in alopecia. **A. Senegal**, source of Acacia (Ph. Br.). **A. specio'sa**, sirissa-tree, parts of which are used externally in foul ulcers, leprosy, ophthalmia, etc. **A. stenocar'pa**, of Northern Africa, source of Suakin gum. **A. su'ma** or **sun'dra**, grows in India, yielding black catechu. **A. tenuifo'lia**, astringent buds and root of this W. Indian tree are used in diarrhœa and hemorrhages. **A. tor'tilis**, of Arabia, yields gum arabic. **A. ve'ra**, see *Acacia*. **A. ve'rek**, of Africa, source of acacia (Ph. U. S.). It is another name for gum Senegal. **A. virgina'lis**, Pithecollobium avaremotemo. **A. Zeylon'ica**, Hæmatoxylon Campechianum.

Aca'ciæ gum'mi. Acacia.

Acacin, ak'ah-sin. Arabin.

Acacos (ah'kak-os) or **Acacus**, ah'kak-us (*a*, *kakos*, evil). Not malignant. Aphthæ.

Acacu, ak'ah-ku. Tree of Brazil, sap of which is used in morphœa.

Acajah. Akasga.

Acajou. Anacardium occidentale.

Acajuba, ak-ah-ju'bah. Anacardium occidentale.

Acalypha, ah-kal'e-fah (*a*, priv., *kalos*, beautiful, *haphe*, touch). A. mentacea. **A. betuli'na**, infusion of leaves employed in India as stomachic and in cholera. **A., birch-leaved**, A. fruticosa. **A. carpinifo'lia**, plant of San Domingo; leaves are antispasmodic. **A. cilia'ta**, plant of Asia and Africa, applied, ground up, to relieve pain of chest. **A. frutico'sa**, shrub of India, alterative, used in dyspepsia, cholera, etc. **A. his'pida**, Caturus spiciflorus. **A. in'dica**, common plant of the gardens of India; infusion of root and decoction of leaves are cathartic. **A. menta'cea**, A. betulina. **A. prunifo'lia**, decoction used as vulnerary. **A. virgin'ica**, three-seeded mercury, indigenous; expectorant and diuretic.

Acamasia, ah-kah-mah'ze-a (*a*, *kamno*, to labor). Tolerance of labor; freedom from fatigue.

Acamatus (ah-kam'at-us), **Acam'athos**, or **Acam'atos** (*a*, *kamno*, to labor). One of good constitution of body. Having position of limb intermediate between flexion and extension, so maintained without fatigue.

Acampsia, ak-amp'she-ah (*a*, *kampsis*, flexion). Contraction or rigidity of limb.

Acanaca, ak-an'ah-kah. Diaphoretic antisyphilitic of E. Indies.

Acanos, ak'ah-nos (a prickle). Onopordon acanthium. **A. spi'na**, Onopordon acanthium.

Acantha, ak-an'thah (spine or thorn). Vertebral column; spinous process of vertebra.

(See *Akanth* for words not mentioned under *Acanth*.)

Acanthabolus (ak-an-thab'o-lus) or **Acanthobolus** (*akantha*, spine, *ballo*, to cast out). Forceps for removing extraneous substances from wounds.

Acanthalzu'ca. Echinops.

Acanthavola, ak-an-thav'o-lah. Acanthabolus.

Acanthia (ak-an'the-ah) **lectula'ria**. Bedbug; cimex.

Acanthichthyosis, ak-anth-ik-the-o'sis (*akantha*, thorn, *ichthus*, fish). Ichthyosis spinosa.

Acanthium, ak-an'the-um. Onopordon acanthium.

Acanthocephala, ak-an-tho-sef'ah-lah (*akantha*, spine, *kephale*, head). Parasitic worms with thorny or spinous heads.

Acantholysis, ak-an-thol'e-sis (*akantha*, spine, *lusis*, loosening). Disease of prickle-cell layer of epidermis, with separation of upper layers.

Acanthoma, ak-an-tho'mah. Elevation of surface of skin from hyperplasia of prickle layer.

Acantho-mastich, ak-an'tho-mas'tik. Gum from Astragalus gummifera.

Acanthopelvis, ak-an-tho-pel'vis. Pelvis narrowed by bony growth.

Acanthopelys, ak-an-thop'e-lis. Akanthopelys.

Acanthoses, ak-an-tho'ses. Akanthoses.

Acanth'ulus. Acanthabolus.

Acanthus mollis, ak-an'thus mol'lis (*akantha,* spine). Brankursine, bear's breech; mucilaginous and demulcent. **A. spino'sa,** of S. Europe, has similar properties. **A. vi'rus** or **vulga'ris,** A. mollis.

Acapatli, ak-ah-pat'le. Piper longum.

Acapsular, ah-kap'su-lar. Devoid of capsule.

Acardia, ah-kar'de-ah (*a, kardia,* heart). State of fœtus without a heart—acardiac fœtus.

Acardiac, ah-kar'de-ak. Without a heart.

Acardiohæmia, ah-kar-de-o-he'me-ah (*a, kardia,* heart, *haima,* blood). Want of blood in the heart.

Acardionervia, ah-kar-de-o-nur've-ah (*a, kardia,* heart, *neuron,* nerve). Want of nervous action in the heart.

Acardiotrophia, ah-kar-de-o-trof'e-a (*a, kardia,* heart, *trophe,* nourishment). Atrophy of the heart.

Acar'dus. Acardiac.

Acariasis, ak-ar-e'as-is (*acarus,* itch insect). Scabies.

Acaricide, ak'ar-e-side (*acarus, cædo,* to kill). Destroyer of acari, as of Acarus scabiei.

Acaricoba, ak-ar-ik-o'bah. Brazilian name for Hydrocotyle umbellatum; aromatic, alexipharmic, emetic.

Acarina, ak-ar-e'nah (*akares,* mite). Order of Arachnida, in which head, thorax, and abdomen are fused in one mass.

Acarinoses, ak-ar-in-o'ses (*acarus, nosos,* disease). Erosive catarrhs of skin, due to parasites, as wood tick, itch mite, harvest mite, etc.

Acaro-dermatitis, ak'ar-o dur-mah-te'tis. Inflammation of skin caused by acarus.

Acaron, ak'ar-on (small, short). Myrica gale.

Acarotoxic, ak-ar-o-toks'ik (*acarus, toxikon,* poison). Acaricide.

Acarpæ, ah-kar'pe (*a, karpos,* fruit). Division of cutaneous diseases in which there is no "fruit," or production from cutaneous surface, as tubercles, vesicles, or pustules. Lentigo, chloasma, argyria, and pityriasis belong to it.

Acarpia, ah-kar'pe-ah (same etymon). Unfruitfulness.

Acarpous, ah-kar'pus. Barren; devoid of elevations.

Acarus, ak'ar-us (*a, karo,* to divide). Minute insect, one species of which, A. scabiei, is the exciting cause of itch. **A. America'nus,** Pulex penetrans. **A. autumna'lis,** harvest bug. **A. brachy'pus,** Sarcoptes scabiei. **A. ci'ro,** see *Psora.* **A. comedo'num,** Acarus folliculorum. **A. domes'ticus,** common tick. **A. dysente'riæ,** mite found in dysenteric evacuations. **A. exul'cerans,** Sarcoptes scabiei. **A. folliculo'rum,** articulated animalcule in sebaceous substance of cutaneous follicles; see *Parasites.* **A. hor'dei,** barley mite, causing inflammation of skin. **A. huma'nus,** Sarcoptes scabiei. **A. ric'inus,** dog tick. **A. sacch'ari,** sugar acarus, occurring in sugar and causing grocer's itch. **A. sca'biei,** acarus; Sarcoptes scabiei, see *Psora.*

Acatalepsia, ah-kat-a-lep'se-ah. Acatalepsy.

Acatalepsy, ah-kat'a-lep-se (*a, katalambano,* to comprehend). Uncertainty in diagnosis; dementia; epilepsy. Its opposite is catalepsy.

Acataleptic, ah-kat-ah-lep'tic. Relating to, or affected with, acatalepsy.

Acata'lis. See *Juniperus communis.*

Acataphasia, ah-kat-ah-fah'zhe-ah. Akataphasia.

Acataposis, ah-kah-tap'o-sis (*a, kataposis,* deglutition). Incapacity of swallowing; difficulty of deglutition.

Acatastasia, ah-kat-as-tah'se-ah. Akatastasia.

Acatastatic, ah-kat-as-tat'ik (*a, kathistemi,* to determine). An epithet for fevers, etc. irregular in periods or symptoms.

Acatera, ak-at-e'rah. Juniperus communis.

Acatharsia, ah-kath-ar'se-ah (*a, katharizo,* to purge). Sordes; impurities; omission of a purgative; absence of discharge, such as menses.

Acathartus, ah-kath-ar'tus. Not having discharge, as of menses.

Acatopotos, ah-kah-top'o-tos (same etymon). Not capable of being swallowed.

Acatsjaval'li. Astringent aromatic Malabar plant used in hemicrania; Cassythra filiformis.

Acaudate, ah-kaw'date (*a, cauda,* tail). Without a tail; deficient as to coccyx.

Acaweria, ak-ah-wa're-ah. Ophioxylum.

Acayiba. Anocardium occidentale.

Accel'erans (*ac, celer,* quick). Nerve from medulla to heart.

Acceleration, ak-sel-er-a'shun. Increased motion or activity of functions, fluids, or muscular actions.

Accelerator, ak-sel'er-a-tor. Muscle stimulating or increasing discharge, as of urine. **A. nerves,** those which increase cardiac action. **A. par'tûs,** ecbolic, abortifacient. **A. sem'inis,** A. urinæ. **A. uri'næ,** muscle of penis, arising, fleshy, from sphincter ani and membranous part of urethra, and tendinous from crus and beginning of corpus cavernosum penis, the muscles of both sides completely enclosing bulb of urethra; inserted into its fellow by tendinous line running longitudinally on middle of bulb. Its use is to propel urine or semen forward.

Accensio, ak-sen'se-o (*accendo,* to kindle). Kindling or lighting up of inflammation; sensation of burning.

Accent, ak'sent (*ad, cano,* to sing). Inflection or modification of voice, consisting in raising or dropping it on certain syllables.

Accentuated, ak-sent'u-a-ted. Emphasized or unnaturally distinct, as cardiac sounds.

Access, ak'ses. Accession, attack, paroxysm, copulation.

Accessiflexor, ak-ses-se-fleks'or. Auxiliary flexor muscles of the fingers and toes.

Accession, ak-ses'shun (*accedo,* to approach). Invasion, approach, or commencement of disease.

Accessorii orbicularis oris, ak-ses-so're-e or-bik-u-lar'is. Small muscles passing from the jaws and forming part of corners of mouth.

Accessorium, ak-ses-so're-um. Appendage.

Accessorius, ak-ses-so're-us. Accessory; spinal accessory nerve. **A. flexo'ris lon'gi digito'rum pe'dis,** see *Flexor longus digitorum pedis profundus perforans* (*accessorius*). **A. obturato'ris inter'ni,** gemelli muscles. **A. pe'dis hippocam'pi,** see *Cornu ammonis.* **A. ad sacro-lumbalem,** see *Sacro-lumbar.* **A. saphe'ni exte'rius,** communicans peronei. **A. tricip'itis,** dorso-epitrochlearis. **A. Willis'ii,** spinal accessory nerve.

Accessory, ak-ses'so-re. A consequence or dependence on anything; as, accessory ligament, muscle, nerve, etc. **A. aud'itory nu'cleus,** ganglion of auditory nerve. **A. brach'ial mus'cle,** brachialis accessorius. **A. car'tilages,** small cartilages in cartilages of nose. **A. floc'culus,** small lobule of cerebellum on inferior peduncle. **A. glands of pan'creas,** glands of Brunner. **A. liv'er,** additional lobule of liver. **A. ob'turator nerve,** occasional branch to hip-joint and pectineus muscle. **A. pancreat'ic duct,** occasional additional duct, opening into small intestine. **A. parot'id gland,** small gland accompanying parotid duct, and commonly mere prolongation of parotid itself; see *Parotid gland.* **A. process,** tubercle at base of transverse process of lumbar vertebra. **A. pyr'amid,** lobule on inferior surface of middle lobe of cerebellum. **A. thy'roid glands,** small bodies near thyroid gland, having similar appearance. **A. par va'gum,** spinal nerve.

Accessus, ak-ses'sus. Coition, paroxysm.

Accidens, ak'se-dens (*accido,* to happen). Symptom, accident.

Accident, ak'se-dent. Casualty, unforeseen event, symptom; unexpected symptom, miscarriage.

Accident'al. That which happens unexpectedly, see *Tissue, accidental.* **A. an'us,** artificial anus. **A. col'ors,** complementary colors—any two colors which combine and give white light. **A. hem'orrhage,** that occurring during pregnancy. **A. im'ages,** persistent impression on retina.

Accidentalism, ak-se-dent'al-ism. Doctrine of disease founded on symptoms rather than causes.

Accidentalist, ak-se-dent'al-ist. One who treats symptoms rather than causes.

Accipiter, ak-sip'e-ter (*accipio,* to take). The hawk;

bandage applied over nose, so called from likeness to claw of hawk. **A. quin'queceps**, same bandage with five heads. **A. tri'ceps**, one made with three heads.

Acci'sa. Leaves of Ilex Paraguayensis.

Acclimated (ak-kli'ma-ted) or **Accli'matized.** Accustomed to a climate.

Acclimation, ak-kli-ma'shun. Climation, seasoning. Act of becoming acclimated or accustomed to a climate.

Acclimatization, ak-kli-ma-ti-za'shun. Acclimation.

Acclimatized, ak-kli'ma-tized. Acclimated.

Acclivis, ak-kle'vis. Obliquus internus muscle.

Accocay. Bark of Senegal, having febrifuge properties.

Accommodation, ak-kom-mo-da'shun. Ability of the eye to accommodate itself by change of refractive condition to different distances. This is regulated by the ciliary muscle. Within a certain line of vision (*accommodation line*) no change of accommodation is required. Also accommodation of fœtus to the canal during parturition. **A., ab'solute**, separate accommodation of each eye. **A., astheno'pia of**, see *Asthenopia.* **A. line**, see *Accommodation.* **A., mech'anism of**, method and apparatus of eye concerned in accommodation. **A., neg'ative**, adjustment of the two eyes when passive or resting. **A., paral'ysis of**, paralysis of ciliary muscle. **A. phos'phenes**, streaks of light visible in the dark after accommodation of the eyes. **A., range of**, distauce between nearest and most remote points of distinct vision. **A., spasm of**, spasmodic contraction of ciliary muscle. **A., tension of**, tension or contraction of ciliary muscle.

Accompaniment, ak-kum'pa-ni-ment (*ac, compagnon*, associate). That which is joined to anything; as, *accompaniment of the cataract*, whitish, viscid substance sometimes surrounding the opaque crystalline lens, and remaining after operation, causing what was once called secondary cataract.

Accouchée (F.). One delivered of a child.

Accouchement (F.), ak-koosh'mong. Parturition.

Accoucheur (F.), ak-koo-shur'. One who practises art of midwifery. *Accoucheuse* is such female practitioner.

Accrementition, ak-kre-men-tish'un. Augmentation or growth by division or new formation, or addition of similar material.

Accretion, ak-kre'shun (*ac, cresco*, to increase). Augmentation; increase by juxtaposition; adhesion.

Accubation, ak-ku-ba'shun (*accubo*, to recline). Reclining position; taking to one's bed, as from sickness.

Accubitus, ac-cu'bit-us (*accubo*, to recline). Lying of a person with another, as young person with old one, or healthy person with one that is sick; a couch.

Accumulation, ak-ku-mu-la'shun. Excess from retention, as in fecal impaction.

Accumulator, ak-ku'mu-la-tor. Apparatus—as jar—for storage of electricity.

Accusatio, ak-ku-sah'she-o (*ac, causa*, cause). Indication.

Acedia, ah-sa'de-ah (*a, kedos*, care). Want of care; neglect; fatigue; melancholy.

Acella, ah-sel'lah. Axilla.

A. C. E. mixture. Alcohol 1 part, chloroform 2 parts, ether 3 parts; anæsthetic.

Aceognosia, ah-se-og-no'ze-ah (*akeomai*, to cure, *gnosis*, knowledge). Knowledge of drugs.

Aceology, ak-e-ol'o-je (*akeomai*, to cure, *logos*, discourse). Materia medica; akology.

Acephalæmia, a-sef-al-e'me-ah (*acephalo, haima*, blood). Want of blood; anæmia of the brain.

Acephalia or **Acephalism**, ah-sef-ah'le-ah, ah-sef'al-ism. See *Acephalus.*

Acephalo, ah-sef'al-o (*kephale*, head). In composition, devoid of head.

Acephalobrachius, ah-sef-ah-lo-brak'e-us (*acephalo, brachion*, arm). Fœtus without head or arms; condition is *Acephalobrach'ia.*

Acephalocardia, ah-sef-al-o-kard'e-ah (*acephalo, kardia*, heart). Monstrosity with absence of head and heart; monster is called *Acephalocar'dius.*

Acephalocheirus or **Acephalochirus**, ah-sef-al-o-ki'rus (*acephalo, cheir*, hand). Fœtus without head or hands; state of *Acephalocheir'ia* or *Acephalochir'ia.*

Acephalocyst, ah-sef'al-o-sist (*acephalo, kustis*, bladder.) Hydatiform vesicle without head or visible organs, formerly ranked among Entozoa, although possessed of few animated characteristics; frequently found in the liver. Generally it is the multiple acephalocyst, acephalocystis socialis or prolifera; at times the solitary acephalocyst, acephalocystis eremita or sterilis. The acephalocystis endogena, pillbox hydatid, has a firm coat and is composed of different layers, having numbers of smaller hydatids within them, and thrown off from interior of parent cyst. In the acephalocystis exogena of ruminant animals the young vesicles are developed from the exterior of parent vesicles. See *Hydatid.*

Acephalocystis, a-sef-al-o-sis'tis. Acephalocyst. **A. endog'ena, A. eremi'ta**, and **A. exog'ena**, see *Acephalocyst* and *Parasites.* **A. multi'fida**, see *Parasites.* **A. pla'na**, concretions in tendinous and muscular sheaths. **A. prolif'era, A. socia'lis**, and **A. ster'ilis**, see *Acephalocyst.* **A. racemo'sa**, hydatid mole of uterus.

Acephalogaster, ah-sef-al-o-gas'ter (*acephalo, gaster*, belly). Monster devoid of head, chest, and abdomen; or having abdomen, but no chest or head; condition is *Acephalogas'tria.*

Acephalopodia, ah-sef-al-o-pod'e-ah. See *Acephalopodus.*

Acephalopodus, ah-sef-al-op'o-dus (*acephalo, pous*, foot). Monster devoid of head and feet; condition is *Acephalopod'ia.*

Acephalorhachia, ah-sef-al-o-rhack'e-ah (*acephalo, rhachis*, spine). Absence of head and spine.

Acephalostoma, ah-sef-al-os'to-mah (*acephalo, stoma*, mouth.) Acephalous fœtus, at upper part of which there is opening resembling mouth; such monster is termed *Acephalos'tomus*; condition is *Acephalostom'ia.*

Acephalothoracia, ah-sef-al-o-tho-rah'se-ah (*acephalo, thorax*). Monstrosity with absence of head and chest; the individual is called *Acephalotho'rus.*

Acephalus, ah-seph'al-us (*a, kephale*, head). Born devoid of head; the condition is *Acepha'lia* or *Aceph'alism.* **A. dibrach'ius**, headless monster having both upper limbs, but imperfect. **A. monobrach'ius**, headless monster with one upper limb. **A. sym'pus**, headless monster with conical termination of trunk from fusion of lower extremities.

Acer, ah'ser. Acrid; generic name of maple trees, Aceraceæ. **A. palmifo'lium** (*acer*, maple), A. saccharinum. **A. Pennsylva'nicum**, striped maple, whistle-wood, striped dogwood; decoction of bark used internally and externally in cutaneous affections; and of leaves and twigs in nausea and vomiting. **A. ru'brum**, red or swamp maple; indigenous; inner bark is mild astringent. **A. sacchari'num**, maple, rock maple, sugar maple, contains sweet sap, whence sugar may be extracted, scarcely to be distinguished from that from cane.

Aceraceæ, ah-sur-ah'se-e. See *Acer.*

Aceras anthropophora, ah'ser-as an-thro-pof'o-rah (*a, keras*, horn). Green man, man orchis; leaves are sudorific.

Acerates (ah-ser-ah'tes) **decum'bens.** Plant of South-western States and Mexico, genus Asclepiadeæ; used for snake-bites. **A. longifo'lia**, long-leaved green milk-weed; indigenous, diaphoretic.

Aceratosis, ah-ser-at-o'sis (*a, keras*, horn). Defective development of corneous tissue.

Aceratotherion, ah-ser-at-o-tha're-on. Monster with defective development of corneous tissue.

Aceratus, ah-ser'at-us (*a, keras*, horn, or *a, keran-numi*, to mix). Not mixed or corrupted; without horns, or deficient in corneous tissue.

Acerb, ah-serb' (*acer*, sharp). Savor or taste, acid, bitter, and astringent, such as that of unripe fruits, etc.

Acerb'ity. Acidity with astringency.

Acercus, a-ser'kus (*kerkos*, tail). Monster devoid of tail or of coccyx.

Aceric, a-se'rik (*acer*, maple tree). Relating to the

maple tree, as aceric acid, which is obtained from the sap of the maple tree.

Acerides (ah-ser'e-des) or **Acerodes**, ah-ser'o-des (*a, cera*, wax). Plasters devoid of wax.

Acervuli (ah-serv'u-le) **gland'ulæ pinea'lis.** See *Pineal.*

Acervulus (ah-serv'u-lus) **cer'ebri** (dim. of *acervus*, heap). See *Pineal gland.*

Acescency (as-es'sen-se) or **Aces'cence** (*acesco*, to grow sour). Disposition to acidity, as in wines.

Acescentia, as-es-sen'she-ah. Acescency; also food causing acidity of stomach.

Acesia (as-a'se-ah) or **Ac'esis.** Cure, medicament; water sage.

Acesinosus, as-es-e-no'sus. Curative.

Acesiponus, as-es-ip'on-us (*akesis*, cure, *ponos*, pain). Anodyne.

Acesius, as-a'si-us. Curative.

Acesma, as-es'ma. Medicament.

Acesmius (as-es'me-us) or **Aces'mus.** Curable.

Acesodyne, as-es'o-dine (*akesis*, cure, *odune*, pain). Anodyne.

Acesophorus, as-es-of'o-rus (*akesis*, cure, *phoreo*, to carry). Curative.

Acester (as-es'ter) or **Aces'tor.** Physician.

Aces'tis. Medicament.

Acestoria, as-es-to're-ah. Medicine or healing art.

Aces'toris. Midwife, female physician.

Acestos, as-es'tos. Curable.

Aces'tra. Needle.

Aces'tria or **Acestris.** Midwife.

Aces'tron or **Aces'trum.** Medicament.

Aceta medicata, as-e'ta med-i-cah'ta. Medicated vinegars. Officinal name of vinegars (Ph. U. S. and Br.); these are **Acetum lobeliæ, A. opii, A. sanguinariæ**, and **A. scillæ.** See *Acetum* and *Acetica.*

Acetabula uterina, as-e-tab'u-lah u-ter-e'nah (pl. of *Acetabulum*). Cotyledons.

Acetabular, as-e-tab'u-lar. Relating to the acetabulum; as, A. artery, branch of obturator artery to hip-joint; A. bone, rare bone at junction of pubes and acetabulum; A. fossa, fossa in acetabulum to which round ligament is attached.

Acetab'uliform. Shape of acetabulum; cup-shaped.

Acetabulum, as-e-tab'u-lum (*acetum*, because it resembles old vinegar vessels). Measure capable of containing eighth part of modern pint. Cup-shaped depression in hip-bone to receive head of femur. Lobes or cotyledons of placentæ of ruminating animals—*acetabula.* See *Cotyle* and *Cotyloid.* **A. hu'meri**, glenoid fossa of scapula. **A. mari'num**, umbilicus marinus.

Acetal, as'e-tal. $C_6H_{14}O_2$. Ethylidene ethylate, ethylidene diethyl ether. Result of oxidation of ethylic alcohol; ethereal liquid, sp. gr. 0.831 at 68° F. Hypnotic.

Acetal'dehyde. Aldehyde.

Acetamid, as-et'a-mid. Crystallized substance from action of ammonia on acetic ether.

Acetanilid, as-e-tan'il-id. C_8H_9NO. Phenylacetamid, antifebrin. Chemical result of action of glacial acetic acid on pure aniline at a high temperature; white crystalline powder, soluble in hot water, alcohol, and ether. Dose, three to six grains or more as antipyretic. Toxic in large doses, sometimes depressant in small doses.

Acetaria, as-a-tah're-ah (from *acetum*). Salad or pickle.

Acetas, as-a'tas. Acetate. **A. æthyl'icus**, acetic ether. **A. alumin'icus** or **A. argil'læ**, aluminium acetate. **A. ammo'nicus**, ammonium acetate. **A. cal'cicus**, calcium acetate. **A. cu'pricus**, copper acetate. **A. ka'licus**, potassium acetate. **A. morph'icus** or **morphein'icus**, morphine acetate. **A. nat'ricus**, sodium acetate. **A. plum'bicus**, lead acetate. **A. potas'sicus**, potassium acetate. **A. quin'icus**, quinine acetate. **A. so'dicus**, sodium acetate. **A. strych'nicus**, strychnia acetate. **A. zin'cicus**, zinc acetate.

Acetate, as'e-tate. Salt formed by union of acetic acid with alkaline, earthy, or metallic base. See *Ammonii acetas, Plumbi acetas, Ferri acetas*, etc.

Acetic acid, as-e'tik as'id. Acid of vinegar; derived from oxidation or dry distillation of wood. Hydrate or hydrated oxide of ethyl, $C_2H_4O_2$. **A. al'dehyde**, aldehyde. **A. ether**, see *Æther sulphuricus* and *Anæsthetics.*

Acetica, as-a'te-kah. Preparations of vinegar.

Aceticum acidum, as-e'te-kum as'id-um. *Acidum aceticum glaciale* (Ph. B.), glacial acetic acid, strong acetous acid, radical vinegar; spirit of verdigris, when made from verdigris. Concentrated acetic acid, prepared by decomposing an acetate and receiving acetic acid by distillation. Very pungent and grateful odor, acid and acrid taste. Rubefacient and escharotic; used to destroy warts, etc. Acidum aceticum, *acetic acid*, sp. gr. 1.048 (Ph. U. S.). Results from purification of crude acetic acid, pyroligneous acid, obtained by destructive distillation of wood. Colorless volatile liquid of pungent smell and sharp taste; vapor is stimulating in syncope, headache, etc., and when the acid is diluted sufficiently it is refrigerant and diaphoretic; employed also as local remedy in cancer. An *aromatic spirit of vinegar* was formed of this strong acid, camphor, and alcohol. A strong acetic acid was formerly ordered by the London Pharmacopœia, prepared from wood; it was called *vinegar of wood, improved distilled vinegar, pyroligneous acid, acetum lignorum.* Acidum aceticum dilutum, distilled vinegar, is prepared by distilling vinegar until seven-eighths have passed over. *Acidum aceticum dilutum* (Ph. U. S.), diluted acetic acid, is made by mixing 17 parts of acetic acid with 83 parts of distilled water; its properties are like those of vinegar.

Ace'ticum martia'le. Ferri acetas.

Acetidin, as-et'id-in. Acetic ether.

Acetite, as'e-tite. Salt of acetous acid.

Acetomel, as-et'o-mel. Oxymel.

Acetometer, as-e-tom'et-ur (*acetum*, vinegar, *metron*, measure). Instrument for ascertaining strength of commercial acetic acid. Such process is *Acetom'etry.*

Acetonæmia, as-e-ton-e'me-ah. Condition of nervous derangement, peculiar odor of breath, etc., supposed to be due to presence of acetone in the blood, it having, according to some writers, the property of breaking up blood-corpuscles.

Acetone, as'e-tone. C_3H_6O. *Pyroacetic spirit* or *Ether, Mesitic alcohol, Bihydrate of mesitylene*, erroneously called *Naphtha, Wood naphtha*, and *Pyroxylic spirit.* Limpid, colorless, inflammable, liquid, with peculiarly penetrating and slightly empyreumatic odor. Density in liquid state almost same as that of alcohol; taste analogous to that of peppermint; miscible in all proportions with water, alcohol, and ether; prepared by distillation of wood, of the acetates of sugar and other carbohydrates; feeble anæsthetic; excitant in chronic bronchitis; used also in gout, rheumatism, and worms.

Acetonuria, as-e-ton-u're-ah. Excess of acetone in urine, as in cancer, fevers, diabetes, alcoholism, etc.

Acetophenilidine, as-e-to-fen-il'e-deen. Phenacetine.

Aceto-phenone, as'e-to-fe'none. Hypnone.

Acetosa alpina, as-a-to'sah al-pe'nah. Rumex alpinus. **A. arven'sis**, Rumex acetosa. **A. nos'tras**, Rumex acetosa. **A. officina'lis**, Rumex acetosa. **A. oxal'idis**, Rumex acetosa. **A. praten'sis**, Rumex acetosa. **A. rom'ana**, Rumex scutatus. **A. rotundifol'ia**, Rumex scutatus. **A. scuta'ta**, Rumex scutatus. **A. vulga'ris**, Rumex acetosa.

Acetosella, as-a-to-sel'lah. Oxalis acetosella.

Acetphenetidine, ah-set-fe-net'e-deen. Derivative of phenetidine; *phenacetin;* antipyretic.

Acetum, as-e'tum. Common vinegar (*acer*, sharp). Liquor obtained by acetous fermentation; pungent odor, pleasant acid taste. Officinal preparation made with vinegar or acetic acid. It is refrigerant in fevers; antiseptic and antinarcotic. Dose, f℥j to f℥ij. Externally, it is stimulant and discutient. *Vinegar whey* is made by stirring small wine-glassful of vinegar, sweetened with dessert-spoonful of sugar,

in pint of milk, boiling for fifteen minutes, and straining; agreeable drink in febrile affections. **A. acer'rimum,** distilled vinegar. **A. aceto'sum,** distilled vinegar. **A. antisep'ticum,** A. aromaticum. **A. aromat'icum,** thieves' vinegar, vinegar of the four thieves, Marseilles vinegar. Aromatic herbs or oils infused or dissolved in vinegar or acetic acid, made of fresh aromatic herbs steeped in vinegar. Used as perfume. **A. Berolinen'se,** A. aromaticum. **A. bezoard'icum,** A. aromaticum. **A. Britan'nicum,** acetum. **A. camphora'tum,** camphorated vinegar. **A. canthar'idis,** vinegar of cantharides, a preparation of Ph. B., used as a prompt vesicant. **A. cardi'acum,** A. aromaticum. **A. cerevis'iæ,** vinegar. **A. col'chici,** vinegar of meadow saffron. Preparation formally officinal in Ph. U. S. It is used as a diuretic, and also in gout. Dose, f℥ss to f℥iss. **A. commu'ne,** vinegar. **A. concentra'tum,** acetic acid or concentrated vinegar. **A. cru'dum,** acetum. **A. destilla'tum,** see *Aceticum acidum.* **A. emet'icum,** antimony acetate. **A. empyreumat'icum,** wood vinegar. **A. Gal'licum,** acetum. **A. glacia'le,** glacial acetic acid. **A. ligno'rum,** see *Aceticum acidum.* **A. lobe'liæ** (Ph. U. S.), vinegar of lobelia. Employed in all cases in which lobelia is indicated. Dose, 30 to 60 drops or more; as emetic, f℥ss. **A. muls'um dul'ce,** oxyglucus. **A. o'pii,** (Ph. U. S.), black drop made with diluted acetic acid. Its strength is one grain of opium in nearly ten of the solution. Dose is same as that of laudanum. **A. phenyla'tum,** carbolated vinegar. **A. plum'bicum** or **saturni'num,** solution of subacetate of lead. **A. prophylac'ticum,** acetum aromaticum. **A. purifica'tum,** A. destillatum. **A. pu'rum,** distilled vinegar. **A. pyroligneo'sum,** wood vinegar. **A. quat'uor fu'rum** or **latro'num,** acetum aromaticum. **A. radica'le,** aceticum acidum. **A. rosa'tum,** oxyrrhodinon. **A. ru'bi idæ'i,** raspberry vinegar. **A. sanguina'riæ** (Ph. U. S.), vinegar of bloodroot, made by action of diluted acetic acid on sanguinaria. Dose, as expectorant, gtt. xv–xxx; as emetic, f℥iij–iv. **A. satur'ni,** solution of subacetate of lead in dilute acetic acid. **A. scil'læ,** vinegar of squills. Officinal in Ph. U. S. and Br.; made by action of diluted acetic acid on squills; usually employed to make the syrup; dose is ℥xv–xxx. Diuretic, expectorant, and emetic. **A. scillit'icum,** A. scillæ. **A. theba'icum,** acetum opii. **A. theriaca'le,** A. aromaticum. **A. vi'ni,** vinegar.

Acetyl, as'e-til, C_2H_3O, hypothetical radicle of acetic acid. The bromide, chloride, iodide, and oxide are the most important compounds.

Acetylphenylhydrazine, as-e-til-fen-il-hy'dra-zeen. Hydracetine.

Achaca'na. Edible cactus of Peru.

Achalybæmia (ah-kal-ib-e'me-ah) or **Achalybhæmia,** ah-kal-ib-he'me-ah (*a, chalups,* steel, *haima,* blood). Deficiency of iron in the blood.

Achana'ca. African sudorific and antisyphilitic plant.

Achaovan or **Achoavan.** Egyptian chamomile used in jaundice. **A. abiat,** Egyptian plant, Cineraria maritima, used for diseases of women.

A'char. Atchar.

Achariston (ah-kar-is'ton) or **Acharis'tum** (*acharistos,* thankless). Rapidly-acting drug, thus bringing little or no profit to medical attendant.

Ache, ake (*achos,* pain). To be affected with pain.

Achebone, ake'bone. Innominate bone.

Acheilia (ah-ki'le-ah) or **Achilia** (*a, cheilos,* lip). Malformation consisting in deficiency of lip or lips.

Acheilus (ah-ki'lus) or **Achilus.** One without lips.

A'cheir (*a, cheir,* hand). One devoid of hands.

Acheiria, ah-ki're-ah. State of being without hands.

Achelia, a-ka'le-ah. Acheilia.

Acherois, ak-er-o'is. White poplar.

A'chia or **A'chiar.** Pickled shoots of Indian bamboo atchar.

Achicolum, ah-chik'o-lum. Sudatory, sweating-house, sweating-bath. Sweating-room in ancient bagnios. Sweating-baths were once known in England as hot-houses.

Achilia, ak-e'le-ah. Acheilia.

Achillea ageratum, ak-il-le'ah ah-ge'rah-tum (after Achilles). *Maudlin, Sweet maudlin, Maudlin tansy.* Ord. Compositæ. Same bitter and aromatic properties as tansy; used for dyspepsia, constipation, worms, etc. **A. ambig'ua,** A. millefolium. **A. atra'ta,** Alpine species used in diarrhœa, pneumonia, etc. **A. falca'ta,** leaves are used in Levant and the East in hypochondriasis. **A. her'ba-ro'ta,** plant of S. Europe; essential oil is sudorific and emmenagogue. **A. i'va,** A. moschata. **A. lu'tea,** A. ageratum. **A. millefo'lium,** *Nosebleed, Bastard pellitory, Yarrow,* or *Milfoil.* Herb and flowers of achillea (Ph. U. S.) have aromatic smell, rough, bitterish, somewhat pungent taste; bitter aromatic tonic, used in dyspepsia, flatulence, malarial fevers, hemorrhage, etc. Extract of plant, made with proof spirit and called *Achillein,* is used by Italians in intermittent fever. Name achillein also given to alkaloid from Achillea millefolium and A. moschata. Achilleic acid has also been obtained from it. Glucoside, called achillein, has been obtained from some species of Achillea. • **A. moscha'ta,** Alpine plant, diaphoretic and stomachic tonic. Volatile oil, esprit d'Iva, is obtained from it in Switzerland; much prized for its musky odor. It is stimulant, antispasmodic. **A. myriophyl'lon,** A. millefolium. **A. os'sica,** A. millefolium. **A. ptar'mica,** *Sneezewort, Bastard pellitory.* Roots and flowers of this plant of Northern United States, Canada, Europe, and Asia have hot, biting taste, approaching that of pyrethrum. Principal use is as masticatory and sialagogue. **A. seta'cea,** Hungarian plant, tonic and stimulant. **A. visco'sa,** A. ageratum.

Achille'ic acid. See *Achillea millefolium.*

Achillein, ak-kil-le'in. See *Achillea millefolium.*

Achilleis, ak-kil-le'is. Species of barley, decoction of which was used in fevers and jaundice.

Achilles (ak-il'lees) **ten'don.** Achillis tendo. **A. ten'don reac'tion** or **re'flex,** see *Reflex.*

Achilletin, ah-kil-la'tin. Substance produced by action of dilute acids upon achillein.

Achilleum, ak-il-le'um. Telephium.

Achillis (ak-il'lis) **tendo.** Tendon of Achilles, Achilles tendon, heelstring; strong tendon of gastrocnemii muscles above heel; so called because only vulnerable part of Achilles, or because of its strength; largest tendon in the body. See *Gastrocnemii.*

Achillotenotomy, ak-il-lo-ten-ot'o-me. Division or section of tendon Achillis.

Achillotomy, ak-il-lot'o-me. Achillotenotomy.

Achilus, ah-ke'lus (*a, chilos,* fodder). Deficient in nourishment; without lips; acheilus.

Achimbassi. Archiater or chief physician; magistrate at Grand Cairo who licensed physicians.

A'chir. Without hands; acheir.

Achi'ria. State of being without hands; acheiria.

Achitolus, atch-it'o-lus. Sweating-room of ancient bath.

Achlorop'sia (*a,* priv, *chloros,* green color, *opsis,* sight). Inability to distinguish green.

Achlys, ak'lys. Opacity of cornea.

Achmella, ak-mel'la. Spilanthus acmella.

Achne, ak-ne. Lint, see *Linteum;* mucous flocculi seen in front of cornea; froth; scraped lint.

Acholia, ah-kol'e-ah (*a, chole,* bile). Deficiency or want of bile; obstruction to escape of bile; Asiatic cholera.

Acholus, ak'o-lus. Acholic; wanting bile; one deficient in bile.

Achondroplasia, ah-kon-dro-plah'ze-ah (*a, chondros,* cartilage, *plasso,* to form). Imperfect formation or development of cartilage.

Achor, ah'kor. Small superficial ulceration on skin of face and head. **A. bar'batus,** sycosis. **A. cap'itis,** porrigo scutellatus, scabies capitis. **A. favo'sus,** favus. **A. granula'tus,** impetigo, followed by granular crust. **A. lactumino'sus,** A. larvalis. **A. mucif'luus** or **muco'sus,** favus; eczema with mucous discharge. **A. larva'lis** or **larva'tus,** porrigo larvalis. **A. muco'sus,** favus. **A. Schoenlein'ii,** tinea trichophytina. **A. scutella'tus,** seborrhœa sicca, porrigo larvalis, crusta lactea.

Achord'al. Formed separately from or away from the chorda dorsalis; spheno-ethmoidal portion of base of skull.

Achoresis, ah-kor-a'sis (*a, choreo,* to make room). Diminution of capacity of bladder or other cavity.

Achoria, ah-ko'ri-a. Achoresis; mammalia which are devoid of chorion.

Acho'rion. Fungous organism in the skin- and hair-follicles. **A. keratoph'agus,** fungus producing onychomycosis. **A. Lebert'ii,** see *Porrigo decalvans* and *Parasites.* **A. Schoenlein'ii,** see *Porrigo favosa* and *Parasites.*

Achoristus, ah-ko-ris'tus (*a, chorizo,* to separate). Any sign necessarily accompanying state of health or disease.

A'chras Austra'lis (*achras,* wild pear). Sapota. **A. bala'ta** or **dissec'ta,** species of Sapotaceæ, bruised leaves of which are applied in paralysis; fruit is said to aid digestion. **A. mammo'sa,** Sapota mammosa; *American marmalade; Jamaica bully-tree; Mammee.* Milky juice is emetic; externally caustic, as for warts. **A. Milleri** or **Mülleri** grows in Central America, yields balata, from which bougies are made. **A. sapo'ta,** sapota. **A. zapota** or **zapotu,** sapota.

Achroa, ah'kro-ah (*a, chroa,* color). Paleness of cachectic condition.

Achroi, ah'kroi (*a, chroma,* color). Pale individuals; nearly synonymous with *leiphæmi,* persons without color; bloodless. Condition is called *Achroi'a.*

Achroma (ah-kro'ma) or **Achroma'sia** (*a, chroma,* color). Partial privation of color of skin; vitiligo; see *Albino.* **A. vitili'go,** vitiligo, as in the pied negro.

Achromader'ma (*a, chroma,* color). Leucoderma.

Achromasia (ah-kro-mah'ze-ah) or **Achroma'tia.** Decoloration; achroma.

Achromati, ah-kro'mah-te. Achroi.

Achromatic, ah-kro-mat'ic. Devoid of color, or not producing it; lens constructed to correct aberration of refrangibility of common lenses is so termed. The crystalline is an achromatic lens.

Achromatin, ah-kro'mah-tin. Term applied to nuclear filaments devoid of chromatism, which have special affinity for coloring matters, and do not become thoroughly stained by microscopic agents.

Achromatism, a-kro'ma-tism. Absence of chromatic aberration.

Achromatisti, ah-kro-mah-tis'te. Achroi.

Achromatis'tous. Having unhealthy pallor of cachexiæ.

Achromatopsia (ah-kro-mah-top'se-a) or **Achromatop'sis,** (*a, chroma,* color, *optomai,* to see). *Dichromic Vision, Dichromism, Acritochromacy, Idiotcy, Daltonism.* Color-blindness; a defect situate in cerebral part of visual organ.

Achromatopsy, ah-kro'mah-top-se. Achromatopsia.

Achromatoses, ah-kro-mah-to'ses. Cutaneous diseases attended with deficiency of pigment formation in skin.

Achromi, ah-kro'me. Achroi.

Achromia, ah-kro'me-ah. Achroma; albinism.

Achromodermia, ah-kro-mo-dur'me-ah. Albinism.

Achroödextrin, ak-ro-o-dex'trin. Acroödextrin.

Achylia (ah-kile'e-ah) or **Achylosis,** ah-kile-o'sis (*a, chulos,* juice, chyle). Defective chylosis or formation of chyle.

Achylous, ah-kile'us. Without chyle; juiceless.

Achymosis, ah-ke-mo'sis (*a, chumos,* juice, chyme). Defective chymification.

Achymous, ah-kime'us. Deficient in chyme or chyle.

Achyranthes (ak-er-an'thes) **as'pera** (*achuron,* chaff, *anthe,* flower). Species of Achyrantheæ growing in Egypt, India, Africa, etc., known as *cadelari*; diuretic and astringent. **A. ca'lea,** Mexican plant; febrifuge. **A. fruti'cosa,** of East Indies, has similar properties to A. aspera. **A. globulifo'lia,** employed in Madagascar as antisyphilitic. **A. lana'ta,** chaya-root, diuretic, is derived from this species. **A. obtusifo'lia,** Indian species, with diuretic properties. **A. re'pens,** forty knot; indigenous; decoction is diuretic in dropsy, ischuria, etc. **A. vir'idis,** leaves are emollient.

Achyrodes, ak-er-o'des. Acerosus.

Achyron, ak-e'ron. Furfur.

Achyrophorous, ak-e-rof'o-rus (*achuron,* chaff, *phoreo,* to bear). Apargioides; species of Compositæ eaten in Chile as food, *escorzonera.* **A. scorzone'ræ,** similarly used under same name. **A. sessiliflo'rus,** decoction of this New Granadan species is expectorant.

Achytus, ah'ke-tus (*a, chutos,* fluid). Not flowing; retained without possibility of discharge.

Acia, ah'se-ah (*akis,* point). Needle; thread; kind of suture.

Acicular, as-ik'u-lar. Pointed like a needle.

Acicus, as'e-kus. Infirm.

Acid, as'id (*akis,* point). Sharp; sour, especially as applied to odorous or sapid substances; substance electro-negative, changing blue litmus to red, capable of saturating bases to form salts. Sharp and shrill, as the voice. Acids are a class of substances usually sour, soluble, reddening litmus, and getting color changed by alkalies, and forming with alkalies alkaline salts. **A., ace'tic,** aceticum acidum. **A., ace'tic** of commerce, pyroligneous acid. **A., ace'tic,** dilute, see *Aceticum acidum.* **A., ace'tic, gla'cial,** aceticum acidum. **A., ace'tous, strong,** aceticum acidum. **A., achille'ic,** see *Achillea millefolium.* **A., acry'lic,** see *Acrylic acid.* **A., a'erial** or **of air,** carbonic acid. **A., albu'min,** from action of dilute acids on serum or white of egg. **A., allan'toic,** see *Allantoic acid.* **A., am'nic** or **amniot'ic,** allantoic acid. **A., antimo'nious,** antimonium diaphoreticum. **A. of ants,** formic acid. **A. of apples,** malic acid. **A., ar'abic,** arabin. **A., arse'nious,** arsenicum album. **A., atrop'ic,** see *Tropic acid.* **A., au'ric,** see *Gold.* **A., azo'tic,** nitric acid. **A., benzu'ric,** acid, hippuric. **A., bezoar'dic,** uric acid. **A., bil'iary.** There are several of these, chief of which are taurocholic, glycocholic, and hyoglycocholic acids. **A., bo'ric,** see *Boric.* **A., bromohy'dric,** hydrobromic acid. **A., buty'ric,** see *Butyric.* **A., calca'reous,** carbonic acid. **A., cal'culous,** uric acid. **A., camphor'ic,** result of protracted action of hot nitric acid on camphor. In white odorless crystals; used in sore throat, coryza, bronchitis, cystitis, night-sweats, etc. Camphorates of quinia, morphia, and atropia have been given in same cases as valerianates of same bases. **A., carbazot'ic,** *Nitropicric acid, Carbonitric acid, Picric* or *Trinitrophenic acid.* Frequently formed by action of concentrated nitric acid on animal and vegetable substances, and especially on oil of tar. Like carbazotates or picrates, it is tonic, astringent, and antiperiodic. **A., carbol'ic,** see *Carbolic.* **A., carbol'ic,** impure, see *Carbolic.* **A., carbona'ceous,** carbonic acid. **A., carbon'ic,** carbonic acid. **A., carboni'tric,** acid, carbazotic. **A., carbo'nous,** oxalic acid. **A., ca'seic,** lactic acid. **A., cathar'tic,** see *Cathartic acid.* **A., cer'ebric,** cerebric acid. **A., cetra'ric,** bitter principle of Cetraria Icelandica. **A., chalk'y,** carbonic acid. **A., chino'vic,** acid, kinovic. **A., chlorace'tic,** see *Chloracetic.* **A., chlorohy'dric,** muriatic acid. **A., cho'lic,** see *Cholic.* **A., chro'mic,** see *Chromic.* **A., chrysophan'ic,** chrysophanic acid. **A., cincho'nic,** A., kinic. **A., cinchotan'nic,** tannic acid of cinchona-bark, but differing in its reactions from tannic acid of galls. **A. cinnam'ic** or **cinnamyl'ic,** used in lupus, tuberculosis, etc. **A., ci'tric,** see *Citric.* **A., cresyl'ic,** see *Carbolic acid.* **A., croton'ic,** see *Croton tiglium.* **A., cube'bic,** principle from cubebs, used in gonorrhœa. **A., cyanhy'dric,** hydrocyanic acid. **A., cyanohy'dric,** hydrocyanic acid. **A., del'phic,** acidum valerianicum. **A., delphin'ic,** acidum valerianicum. **A., dephlogis'ticated marine,** chlorine. **A., fat'ty,** acid of fatty hydrocarbons, or of fixed oils and fats, such as oleic acid. **A., for'mic,** see *Formic.* **A., galac'tic,** lactic acid. **A., gal'lic,** acid prepared from galls, found in most astringent plants containing tannic acid of kind obtained from galls; in delicate, silky needles, somewhat yellowish, inodorous, and of harsh, astringent taste; dissolves in 100 parts of cold and 3 parts of boiling water; very soluble in alcohol, but slightly so in ether; astringent, especially used in internal hemorrhage, as from intestines, urinary

organs and uterus, and in various disorders attended by excessive secretion. Dose, from 5 to 10 or 20 grains; used externally in form of glycerite to sore throats, and in ointment to hemorrhoids, unguentum gallæ (Ph. U. S.). **A. of galls,** acid, gallic. **A., gas'tric,** see *Gastric juice.* **A., glycoch'olic,** cholic acid. **A., gum'mic,** arabin. **A., gynocar'dic,** chaulmoogra oil. **A., hippu'ric,** urobenzoic, urino-benzoic, or benzuric acid; acid found in urine of graminivorous animals and in human urine, especially after benzoic acid has been taken. See *Hippuric.* **A., hydriod'ic,** made by action of iodine on phosphorus in presence of water; used medicinally in officinal syrup, containing 1 per cent. of acid; dose, of syrup ɱxxx–fʒij. Excellent method of introducing iodine into system and producing its alterative effects; used in same cases as preparations of iodine in general. **A., hydrobro'mic,** see *Hydrobromic.* **A., hydrocarbon'ic,** acidum oxalicum. **A., hydrochlo'ric,** muriatic acid. **A., hydrochloric, dilute,** dilute muriatic acid. **A., hydrochloroni'tric,** nitromuriatic acid. **A., hydrocyan'ic,** see *Hydrocyanic.* **A., hydrocyanic, dilute,** see *Hydrocyanic acid.* **A., hydrofluo'ric,** see *Hydrofluoric.* **A., hydrosulphu'ric,** hydrogen, sulphuretted. **A., hydrothion'ic,** hydrogen, sulphuretted. **A., igasu'ric,** see *Jatropha curcas.* **A., ino'sic,** see *Muscle.* **A., io'dic,** white, transparent solid, slightly deliquescent, very soluble in water; given with sulphate of quinia in hoarseness, scrofula, incipient phthisis, chronic inflammation, syphilis, etc. Dose, 3 to 6 grains or more. **A., jatroph'ic,** see *Jatropha curcas.* **A., ki'nic,** $C_7H_{12}O_6$, exists in various plants, but is usually prepared from kinate of calcium, which is left as residue in manufacture of sulphate of quinine; by heating kinic acid or a kinate with manganese dioxide and sulphuric acid, kinone or quinone, $C_6H_4O_2$, is obtained. Kinic acid acts on the system like other vegetable acids. See *Kinate.* **A., kino'vic** or **kinovat'ic,** quinovic or chinovic acid; kinova bitter, $C_{28}H_{34}O_4$; found in chinova-bark and bark of plants of genus Nauclea; given in diarrhœa and dysentery, and as a febrifuge; also used in form of kinate of calcium. **A., lac'tic,** see *Lactic.* **A. of lemons,** citric acid. **A., lithen'ic,** uric acid. **A., lithi'asic,** uric acid. **A., lith'ic,** uric acid. **A., mangan'ic,** see *Potassii permanganas.* **A., marine,** hydrochloric acid. **A., marine, a'erated,** chlorine. **A., marine, dephlogis'ticated,** chlorine. **A., marine, dulcified,** spiritus ætheris muriatici. **A., meco'nic,** see *Meconic.* **A., mephit'ic,** carbonic acid. **A., of milk,** lactic acid. **A., muriat'ic,** see *Muriatic.* **A., muriat'ic, dilute,** see *Muriatic acid.* **A., nance'ic,** lactic acid. **A., ni'tric,** see *Nitric.* **A., ni'tric, dilute,** see *Nitric acid.* **A., ni'tro-hydrochlo'ric,** nitromuriatic acid. **A., nitro-hydrochlo'ric, dilute,** acidum nitro-hydrochloricum dilutum. **A., nitromuriat'ic,** nitromuriatic acid. **A., nitropic'ric,** acid, carbazotic. **A., ni'trous, dephlogis'ticated,** nitric acid. **A., ole'ic,** acidum oleicum (Ph. U. S.). Yellowish oily liquid, used as bland application to skin, and as addition to ointments and other external applications; used in manufacture of oleates. See *Oleates.* **A., os'mic,** see *Osmic.* **A., oxal'ic,** see *Oxalic.* **A., oxysep'tonic,** nitric acid. **A., paraffin'icum,** see *Paraffin.* **A., phe'nic,** carbolic acid. **A., phenyl'ic,** carbolic acid. **A., phenylsulphu'ric,** sulphocarbolic acid. **A., phosphor'ic, dilute,** acidum phosphoricum dilutum. **A., phosphor'icum,** see *Phosphoric.* **A., pic'ric,** acid, carbazotic. **A., pneu'mic** (*pneumon,* lung), crystallizable principle found in substance of lung of mammalia; used in pulverized state in phthisis. **A., poly'alic,** see *Polygala senega.* **A., prus'sic,** hydrocyanic acid. **A., pyroace'tic,** or **A., pyroxyl'ic,** acetic acid. **A., pyrogal'lic,** see *Pyrogallic.* **A., pyrolig'neous,** pyroligneous acid, see *Aceticum acidum.* **A., pyrolig'nic,** pyroligneous acid. **A., quercitan'nic,** tannin. **A., qui'nic,** A., kinic. **A., quino'vic,** acid, kinovic. **A., ricino'leic,** see *Ricinoleic.* **A., rosa'cic,** see *Porphyruria.* **A., salicyl'ic,** see *Salicylic.* **A., sclerotin'ic,** see *Ergota.* **A. of sea-salts,** hydrochloric acid. **A. of sor'rel,** oxalic acid. **A. of su'gar,** oxalic acid. **A. of sugar of milk,** m cic acid. **A., sulphhy'dric,** hydrogen, sulphuretted. **A., sulphocarbol'ic,** see *Sulphocarbolic.* **A., sulphohy'dric,** hydrogen, sulphuretted. **A., sulphophe'nic,** sulphocarbolic acid. **A., sulphovi'nic,** ethyl-sulphuric acid, from addition of sulphuric acid to alcohol; yellowish astringent liquid, dissolving iodoform, camphor, sulphur, and other remedies for skin diseases; hence used as vehicle for them. Sulphovinate of sodium is given internally as cathartic. **A., sulphu'ric,** see *Sulphuric.* **A., sulphu'ric, aromatic,** acidum sulphuricum aromaticum. **A., sulphu'ric, dilute,** acidum sulphuricum dilutum. **A., sul'phurous,** acidum sulphurosum. **A., tan'nic,** tannin. **A. of tar'tar,** tartaric acid. **A., tauroch'olic,** cholic acid. **A., thy'mic,** see *Thymic.* **A., trinitrophe'nic,** acid, carbazotic. **A., tro'pic,** see *Tropic.* **A., u'ric,** see *Uric.* **A. of u'rine,** uric acid; phosphoric acid. **A., urinobenzo'ic,** acid, hippuric. **A., urobenzo'ic,** acid, hippuric. **A., u'rous,** uric oxide. **A., uryl'ic,** uric acid. **A., valeria'nic,** acidum valerianicum. **A., vale'ric,** acidum valerianicum. **A., vitriol'ic,** sulphuric acid. **A. of wood,** pyroligneous acid. **A., zoo'tic** or **zootin'ic,** hydrocyanic acid.

A'cid albu'min. Proteid dissolved in strong acid and having acid reaction. **A. rad'icle,** element or elements forming acid with hydrogen.

Acidiferous, as-id-if'er-us (*acidum,* acid, *fero,* to bear). Capable of being converted into an acid.

Acidifiable, as-id-i-fi'a-bl (*acidum, fio,* to become). Convertible into an acid.

Acidification, as-id-i-fi-ca'shun. Change to an acid condition.

Acid'ifying prin'ciple. Name formerly given to oxygen, as it was supposed that oxygen was required to form acids.

Acidimeter, as-id-im'eter (*acidum, metron,* measure). Hybrid term to denote instrument to determine strength of acid.

Acidimetry (as-id-im'-e-tre) or **Acidom'etry.** Measurement of amount of acid. See *Acidometer.*

Aciditatio (as-id-e-tah'she-o) or **Acidit'ies.** Sourness of stomach, indicated by acid eructations, etc.; common affection of children; must be obviated by absorbents, as magnesia, chalk, etc., and regulated diet.

Acidity, as-id'i-te. Acid condition; sourness, as of stomach; excessive amount of acid secretion in stomach.

Acidology, as-id-ol'o-je (*akis,* sharp instrument, *logos,* a description). Description of surgical instruments.

Acidometer, as-id-om'e-tur (*acidum, metron,* measure). Hydrometer for determining density of acids. Instrument to measure amount of acid.

Acidometry. See *Acidimetry.*

Acido-peirastica, as-e'do-pi-ras'te-kah (*akis,* point, *peirazo,* to test). Puncture for exploratory purposes.

Acidosteophyte, as-id-os'te-o-fite (*akis,* point, *osteon,* bone, *phuton,* growth). Pointed exostosis or osteophyte.

Acids. See *Acid.*

Acidulate, as-id'u-late. To render acidulous or slightly acid.

Acidulous, as-id'u-lus. Possessing sourish taste, as acidulous fruits, oranges, gooseberries, etc. **A. waters,** mineral waters containing carbonic acid gas sufficient to render them sourish. See *Waters, mineral.* **A. water, sim'ple,** aqua acidi carbonici (Ph. U. S.), soda water, mineral water, water impregnated with carbonic acid. There is no carbonate of sodium in it. It is cooling and slightly stimulating; used benefically in dyspepsia and in vomiting, etc., and an excellent refrigerant in fever, given ice-cold and in small quantities oft repeated.

Acidum, as'id-um. Acid. **A. ace'ticum,** aceticum acidum. **A. ace'ticum aroma'ticum,** acetum aromaticum. **A. ace'ticum camphora'tum,** aromatic spirit of vinegar. **A. ace'ticum debil'ius,** see *Aceticum acidum.* **A. ace'ticum destilla'tum,** see *Aceticum acidum.* **A. ace'ticum dilu'tum,** see *Aceticum acidum.* **A. ace'ticum e lig'no ven'ale,** pyrolig-

neous acid. **A. ace'ticum empyreumat'icum,** pyroligneous acid. **A. ace'ticum for'te,** aceticum acidum. **A. ace'ticum for'tius,** aceticum acidum. **A. ace'ticum glacia'le,** aceticum acidum. **A. aceticum pu'rum,** aceticum acidum. **A. ace'ticum pyroligno'sum,** pyroligneous acid. **A. ace'ticum scillit'icum,** acetum scillæ. **A. ace'ticum ten'ue,** see *Aceticum acidum.* **A. acetosel'læ,** oxalic acid. **A. aceto'sum,** acetum. **A. aceto'sum camphora'tum,** aromatic spirit of vinegar. **A. a'dipis,** acid of fat. **A. aë'reum,** carbonic acid. **A. alcohol'icum,** acetic acid. **A. allanto'icum,** allantoic acid. **A. am'nicum or amnio'ticum,** amniotic acid. **A. arsenico'sum,** arsenious acid. **A. arsen'icum,** arsenic acid. **A. arsenio'sum,** arsenicum album. **A. aseptin'icum,** aseptinic acid. **A. atmosphær'icum,** carbonic acid. **A. atrop'icum,** see *Tropic acid.* **A. azo'ticum,** nitric acid. **A. benzo'icum,** benzoin, flowers of. **A. benzoyl'icum,** benzoin, flowers of. **A. bezoar'dicum,** uric acid. **A. bora'cicum or bo'ricum,** boracic acid. **A. borosalicyl'icum,** borosalicylic acid. **A. borus'sicum,** hydrocyanic acid. **A. bromhy'dricum,** hydrobromic acid. **A. buty'ricum,** butyric acid. **A. camphor'icum,** acid, camphoric. **A. carbazot'icum,** acid, carbazotic. **A. carbol'icum,** carbolic acid. **A. carbol'icum impu'rum,** carbolic acid, impure. **A. carbon'icum,** carbonic acid. **A. cathart'icum,** see *Cassia senna* and *Rhamnus.* **A. chi'nicum,** quinic acid. **A. chlorhy'dricum,** hydrochloric acid. **A. chlo'ricum,** chloric acid. **A. chloroace'ticum,** dichloroacetic acid. **A. chlorohydrargy'ricum,** corrosive sublimate. **A. chlorohydrocyan'icum,** chlorohydrocyanic acid. **A. chlorohydrogena'tum,** hydrochloric acid. **A. chloronitro'sum,** nitromuriatic acid. **A. chro'micum,** chromic acid. **A. chrysophan'icum,** chrysophanic acid. **A. cit'ricum,** citric acid. **A. copaib'icum,** resin of copaiba. **A. cresyl'icum,** cresylic acid. **A. creta'ceum,** carbonic acid. **A. cu'pricum,** cupric acid. **A. cyanhy'dricum,** hydrocyanic acid. **A. elain'icum,** oleic acid. **A. fluo'ricum,** hydrofluoric acid. **A. formica'rum,** formic acid. **A. galac'ticum,** lactic acid. **A. galla'ceum, gal'læ** or **galla'rum,** acid gallic. **A. glycochol'icum,** glycocholic acid. **A. gynocar'dicum,** gynocardic acid. **A. hippu'ricum,** acid, hippuric. **A. hydriod'icum,** acid hydriodic. **A. hydriod'icum dilutum,,** see *Acid, hydriodic,* **A. hydrobro'micum or hydrobroma'tum,** hydrobromic acid. **A. hydrocarbon'icum,** oxalic acid. **A. hydrochlo'ricum or hydrochlora'tum,** hydrochloric acid. **A. hydrochlo'ricum dilu'tum,** dilute, hydrochloric acid. **A. hydrochloroni'tricum,** nitrohydrochloric acid. **A. hydrocyan'icum,** hydrocyanic acid. **A. hydrocyan'icum dilu'tum,** see *Hydrocyanic acid.* **A. hydrofluor'icum,** hydrofluoric acid. **A. hydroioda'tum or hydroio'dicum,** hydriodic acid. **A. hydrosulfura'tum, hydrosulfu'ricum, hydrosulphura'tum,** or **hydrosulphu'ricum,** hydrogen, sulphide. **A. hydrothion'icum,** hydrogen sulphide. **A. hydrothion'icum liq'uidum,** see *Hydrosulphuretted water.* **A. hyperos'micum,** osmic acid. **A. hypochloro'sum,** hypochlorous acid. **A. ioda'tum or iodhy'dricum,** hydriodic acid. **A. io'dicum,** acid, iodic. **A. jatroph'icum,** see *Jatropha curcas.* **A. kino'vicum,** acid, kinovic. **A. lac'ticum or lac'tis,** lactic acid. **A. lig'neum or lig'ni py'ro-oleo'sum,** or **ligno'rum empyreumat'icum,** pyroligneous acid. **A. limo'nis or limo'num,** citric acid. **A. lith'icum,** uric acid. **A. ma'licum,** malic acid. **A. mari'næ or mari'num,** hydrochloric acid. **A. meco'nicum,** meconic acid. **A. mephit'icum,** carbon dioxide. **A. mercu'ricum,** mercuric acid. **A. morbo'sum,** morbid acidity, as of stomach. **A. muriat'icum,** M. acidum. **A. muriat'icum dilu'tum,** muriatic acid. **A. muriat'icum nitro'so-oxygena'tum,** nitromuriatic acid. **A. ni'tri,** nitric acid. **A. ni'tri dulsifica'tum or vino'sum,** spiritus ætheris nitrosi. **A. nitrico-hydrochlora'tum,** nitrohydrochloric acid. **A. ni'tricum,** see *Nitric.* **A. ni'tricum dilu'tum,** nitric acid. **A. ni'tricum vena'le,** commercial nitric acid. **A. nitrochlorhy'dricum or nitrohydrochlo'ricum,** nitromuriatic acid. **A. nitromuriat'icum,** nitromuriatic acid. **A. nitromuriat'icum dilu'tum,** dilute nitro-muriatic acid. **A. nitro-nitro'sum,** fuming nitric acid. **A. nitroxan'thicum,** picric acid. **A. ole'icum or olein'icum,** oleic acid. **A. osmin'icum,** osmic acid. **A. os'sium,** phosphoric acid. **A. oxal'icum or oxali'num,** oxalic acid. **A. peros'micum,** osmic acid. **A. phe'nicum or phenyl'icum or phenylo'sum,** carbolic acid. **A. phosphor'icum,** phosphoric acid. **A. phosphoro'sum,** phosphorous acid. **A. pic'ricum or picrin'icum,** acid, carbazotic. **A. pneu'micum,** acid, pneumic. **A. po'micum,** malic acid. **A., prima'rum via'rum,** acidities. **A. prus'sicum,** hydrocyanic acid. **A. pyroace'ticum,** pyroligneous acid. **A. pyrogal'licum,** pyrogallic acid. **A. pyrolig'neum,** pyroligneous acid. **A. pyroxyl'icum,** pyroligneous acid. **A. quercitan'nicum,** tannin. **A. qui'nicum,** quinic acid. **A. quino'vicum,** acid, kinovic. **A. sac'chari or sacchari'num,** oxalic acid. **A. salicyl'icum,** salicylic acid. **A. sa'lis or sa'lis culina'ris,** or **sa'lis mari'ni,** muriatic acid. **A. sclerotin'icum,** see *Ergot.* **A. scytodeph'icum,** tannin. **A. sep'ticum,** nitric acid. **A. stearin'icum,** stearic acid. **A. stib'icum,** antimonic acid. **A. stibio'sum,** antimonious acid. **A. suc'cini or succin'icum,** succinic acid. **A. sulfhy'dricum or sulfohydrogena'tum,** hydrogen sulphide. **A. sulfuo'sum,** sulphurous acid. **A. sulfu'ricum,** sulphuric acid. **A. sulphohy'dricum,** hydrogen sulphide. **A. sulphu'ricum,** sulphuric acid. **A. sulphu'ricum alcoolisa'tum,** elixir acidum Halleri. **A. sulphu'ricum aromat'icum,** sulphuric acid, aromatic. **A. sulphu'ricum dilu'tum,** sulphuric acid, diluted. **A. sulphu'ricum vena'le,,** commercial sulphuric acid. **A. sulph'uris,** sulphuric acid. **A. sulph'uris volat'ile,** sulphurous acid. **A. sulphuro'sicum or sulphuro'sum,** sulphurous acid. **A. tan'nicum,** tannin. **A. tar'tari, A. tar'tari essentia'le, tartar'icum,** or **tartaro'sum,** tartaric acid. **A. thy'micum,** thymol. **A. trinitrophe'nicum,** picric acid. **A. trop'icum,** tropic acid. **A. u'ricum or uri'næ,** acid of urine; uric or phosphoric acid; uric acid. **A. urolith'icum,** uric acid. **A. valerian'icum or vale'ricum,** valerianic or valeric acid. Acid found in valerian plants, angelica root, oil of Delphinus globiceps (delphic or delphinic acid), etc. Produced, also, by oxidation of fusel oil and albuminous matters, and by putrefaction of animal substances, but in greater quantity in rotten cheese. Dose, gtt. v–xv., as a nervine. **A. vitri'oli or vitriol'icum,** sulphuric acid. **A. vitriol'icum alcoho'le aromat'icum,** acidum sulphuricum aromaticum. **A. vitriol'icum aromat'icum,** acidum sulphuricum aromaticum. **A. vitriol'icum vino'sum,** elixir acidum Halleri. **A. zoo'ticum or zootin'icum,** hydrocyanic acid.

Acidurgia, as-id-ur'je-ah (*akis,* sharp instrument, *ergon,* work). Operative surgery.

Acies, ah'se-aze (steel). Chalybs; eminence at side of foramen of Monro; pupil of eye; keen eyesight. **A. digito'rum ma'nûs** (*acies,* phalanx), see *Phalanx.* **A. diur'na** (*acies,* keen eyesight), hemeralopia.

Aciesis, ah-se-a'sis. Acyesis.

Acinesia (ah-sin-a'ze-ah) or **Acine'sis,** ah-sin-a'sis (*a, kineo,* to move). Absence, depravation, or loss of power of motion; period of rest of heart between systole and diastole; rest.

Acinesiatrophia, ah-sin-a-ze-at-rof'e-ah (*a, kinesis,* motion, *trophe,* nourishment). Atrophy from want of nourishment or loss of muscular power.

Acineses, ah-sin-a'ses. Neuroses of which acinecis is chief symptom.

Acinesic (ah-sin-e'zik) or **Acinetic,** ah-sin-et'ik. Affected with loss of muscular power or motor paralysis; agent capable of producing such effect.

Acine'sis. Acinesia.

Acinetatrophia, ah-sin-et-at-rof'e-ah. Acinesiatrophia.

Acini, as'in-e, pl. of **Acinus.** See *Corpora Malpighiana and Spleen.* **A. bilio'si,** acini or lobules of liver. **A. glandulo'si,** acini of a gland. **A. inter'ni,** acini of Malpighi. **A. lie'nis,** corpuscles of spleen, see *Spleen.*

A. of Malpig'hi, see *Corpora Malpighiana and Spleen.* **A. rena'les**, corpora Malpighiana.

Ac'iniform. Like a bunch of grapes. **A. tunic**, the choroid, uvea, etc.

Acinos, as'in-os. Species of thyme, formerly used internally as an astringent, and externally as an application to ulcers, etc.

Acinose (as'in-ose) or **Acinous**, as'in-us. Like grapes, as acinous lobules or acini. See *Acinus.*

Acino-tubular, as'in-o-tu'bu-lar. Glands having acini and tubules for secretion.

A'cinus, A. glandulo'sus (*acinus*, bunch of grapes). A glandiform corpuscle; smallest part of a racemose gland, in which secretion takes place and the excretory radicle arises; minute lobule of lung or liver; portion of duct of racemose gland communicating with alveolar cavities; small closed cavity in ductless gland, such as the thyroid. Acini glandulosi are found in glands like the pancreas, arranged in clusters; such glands are called glandulæ acinosæ, acinous glands. See *Lobule* and *Acini.*

Acipen'ser. See *Ichthyocolla.*

Acis, as'is (*akis*, point). Sharp point; acute pain; bandage.

Aciur'gia (*akis*, sharp instrument, *ergon*, work). Operative surgery.

Aclastic, ah-klas'tik (*a*, *klao*, to break). Not refracting.

Acleidian, ah-kleid'e-an (*a*, *kleis*, clavicle). Devoid of clavicle or clavicles.

Acleitocardia, ah-klei-to-kar'de-ah (*akleitos*, not closed, *kardia*, heart). Cyanopathy or blue disease from imperfectly closed foramen ovale.

Acmæ, ak'me (*akme*, prime of life). Acme; acne.

Acmæamorpha, ak-me-ah-mor'fah. Amorpha or intertrigo of adults.

Acmæochlorosis, ak-me-o-klo-ro'sis. Chlorosis of adults.

Acmæopimelorrhœa, ak-me-o-pim-el-or-rhe'ah. Pimelorrhœa or seborrhœa oleosa of adults.

Acmœopolysarcia, ak-me-o-pol-e-sark'e-ah. Polysarcia or excessive obesity of adults.

Acmæos, ak-me'os (vigorous). Adult; in full maturity.

Acmas'tic (*akme*, *astikos*, unmarked). Continuous, as a fever which preserves an equal degree of intensity throughout its course.

Ac'me. Vigor. Period of disease at which the symptoms are most violent. *Arche* is the commencement, *anabasis* the period of increase, *acme* the height. Acne.

Acme'la, Aeme'lia, Acmel'la. Spilanthus acmella. **A. Linnæ'i**, plant of India and S. America; sialagogue and antiscorbutic. **A. Mauritia'na**, Spilanthus acmella. **A. re'pens**, grows in United States; has same properties as A. Linnæi.

Ac'mon. Incus.

Ac'na. Acne.

Ac'ne (*akme*, bloom, or *ake*, point). *Stonepock, Whelk, Bubucle.* Chronic inflammation of sebaceous glands and surrounding tissues; papules, pustules, or tubercles usually appearing on the forehead, pimples on chin, breast, and back. Group of diseases of skin, including acne, eczema, and strophulus. **A., ad'enoid**, disseminated variety of A. vulgaris. **A. al'bida**, milium. **A. artificia'lis**, eruption due to use of certain drugs, as iodine, bromine, etc. **A. atroph'ica**, acne accompanied with atrophy and subsequent scars; a form of lupus erythematosus. **A. broma'ta**, acne from internal use of bromides. **A. cachectico'rum**, acne of cachectic or broken-down persons, on the trunk or limbs. **A. cervi'cis**, inflammation of follicles of cervix uteri. **A. cilia'ris**, inflammation of sebaceous glands of edge of eyelids. **A. coagmina'ta**, acne in which pustules are aggregated together. **A. contagio'sa**, pustular affection of horses. **A. cor'nea**, acne with indurated sebaceous matter; follicular ichthyosis. **A. dissemina'ta**, disseminated variety of A. vulgaris. **A. erythemato'sa**, A. rosacea. **A. fronta'lis**, A. varioloformis. **A. granulo'sa**, A. cachecticorum. **A. horde'olans** or **hordeola'ris**, acne in which pustules are like grains of barley. **A. hypertroph'ica**, acne accompanied with hypertrophy; hypertrophic form of A. rosacea. **A. indura'ta**, acne with hardened papules or tubercles. **A. ioda'ta**, acne from internal use of iodine or iodides. **A. ke'loid**, dermatitis papillaris capillitii. **A. kerato'sa**, variety of A. vulgaris, the hair-follicles becoming horny. **A. medicamento'sa**, acne from internal use of drugs. **A. ment'agra**, sycosis. **A. milia'ris**, milium; pustular acne rosacea. **A. mollus'cum**, molluscum contagiosum. **A. papulo'sum**, papular form of acne. **A. pend'ulum**, molluscum pendulum. **A. picea'lis**, papular form of acne from external use of tar. **A. puncta'ta**, papular form of acne with comedones. **A. pustulo'sa**, pustular form of acne that is usually met with, the pustules being aggregated together. **A. rosa'cea**, gutta rosea. **A. scrophuloso'rum**, A. cachecticorum. **A. seba'cea**, seborrhœa, xeroderma. **A. seni'lis**, gutta rosea. **A. sim'plex**, acne. **A. sola'ris**, papular acne on parts of the body exposed to the sun. **A. strophulo'sa**, milium, strophulus albidus. **A. syphilit'ica**, pustular syphilide; acne of the throat; follicular pharyngitis. **A. tubera'ta** or **tuberculo'sa**, A. indurata. **A. umbilica'ta**, A. varioloformis. **A. variolofor'mis**, pustular form attended with eruption like smallpox; molluscum contagiosum. **A. viri'lis**, acne indurata. **A. vulga'ris**, term including three forms: A. simplex, A. indurata, A. punctata.

Ac'neform. Resembling acne.

Acne'mia (*a*, *kneme*, leg). Absence or imperfect development of legs.

Acnemos, ak-na'mos. One affected with acnemia.

Acnesmos, ak-nes'mos (*a*, *knesmos*, itching). Free from itching.

Acnes'tis (*a*, *knao*, to scratch). Part of spine extending in quadrupeds from between the shoulders to the loins; middle of the loins; vertebral column; nettle.

Ac'nida cannab'ina. Virginia hemp.

Acnisos, ak-ne'sos (*a*, *knisa*, fat). Thin.

Acoccygeus, ah-kok-se-ja'us (*a*, *kokkux*, coccyx). Devoid of coccyx; without tail.

Acoe, ak'o-a. Audition; ear.

Acœlia, ah-se'le-ah (*a*, *koilia*, cavity). Absence of cavity; deficiency of abdomen.

Acœlius, ah-se'le-us (*a*, *koilia*, belly). Devoid of belly; one so emaciated as to appear to have no belly.

Acœlosis, ah-se-lo'sis. Acœlia.

Acoemeter, ak-o-e'me-tur (*akoe*, hearing, *metron*, measure). Acoumeter.

Acoemetrum, ak-o-a'me-trum. Acoumeter.

Acoenosi, ak-o-en'o-se (*akoe*, hearing, *nosos*, disease). Diseases of audition or organ of hearing.

Acoesis, ak-o-e'sis. Audition.

Acognosia, ak-og-no'se-ah (*akos*, remedy, *gnosis*, knowledge). Study of drugs.

Acography, ak-og'ra-fe (*akos*, *grapho*, to describe). Description of drugs or remedies.

Acolabis, ak-ol'ah-bis (*akis*, point, *labis*, forceps). Artery forceps.

Acolasia, ah-ko-lah'se-ah (*a*, *kolazo*, to restrain). Intemperance, as of appetite or passions.

Acolastic, ak-o-las'tik. Intemperate; pertaining to acolasia.

Acology, ak-ol'o-je (*akos*, a remedy, *logos*, discourse). Materia medica; therapeutics; restricted by some to operative surgery, like aciurgia (from *akis*, point).

Acolous, ah-ko'lus (*a*, priv., *kolon*, limb). Devoid of limbs or feet.

Acoluthia, ak-o-lu'the-ah (sequence). Sequela.

Acolyctine, ak-o'lik-teen. Alkaloid from Aconitum lycoctonum.

Acomas, ak-o'mas. Name given to several trees in Guiana, roots of which are used in gonorrhœa.

Acomia, ah-ko'me-ah (*a*, *kome*, hair). Want of hair, baldness, alopecia, acosmia.

Ac'omus (same etymon). Devoid of hair.

Ac'ona. West Indian shrub; fruit is aromatic and stimulant.

Acondylous, ah-kon'de-lus (*a*, priv., *kondulos*, joint). Not provided with joints.

Acone, ah'ko-ne. Mortar.

Aconella (ak-o-nel'lah) or **Aconelline,** ak-o-nel'leen. Alkaloid from Aconitum napellus, resembling narcotin in composition.

Aconita, ak-o-ne'tah. Aconitine.

Aconite, ak'o-nite. See *Aconitum napellus.* **A., ab'stract of,** abstractum aconiti. **A., Amer'ican,** aconitum uncinatum. **A., ex'tract of,** extractum aconiti. **A., flu'id ex'tract of,** extractum aconiti fluidum. **A., In'dian,** Aconitum ferox. **A. leaves,** see *Aconitum napellus.* **A. lin'iment,** linimentum aconiti. **A., moun'tain,** Aconitum neomontanum. **A., Nepal,** various species of aconitum growing in Nepal. **A. plas'ter,** emplastrum aconiti. **A. root,** see *Aconitum napellus.* **A., tinc'ture of,** tinctura aconiti. **A., win'ter,** Eranthis hiemalis.

Aconiti folia, ak-o-ne'te fo'le-ah. See *Aconitum napellus.* **A. ra'dix** (Ph. Br.), see *Aconitum napellus.*

Aconitia, ak-o-nish'e-a. Aconitine.

Aconit'ic acid. Crystallized acid in aconite and other plants; when citric acid is decomposed by heat this acid is one of the results.

Aconitin, ak-on'it-in. Aconitine.

Aconitina (Ph. Br.), ak-on-it-e'nah. Aconitine.

Aconitinæ (ak-on-it-e'ne) **azo'tas.** Aconitine nitrate. **A. olea'tum,** see *Oleate;* used externally in neuralgia. **A. unguen'tum,** ointment of aconitine; officinal in Ph. B., containing 1.6 parts of aconitine in 100 of ointment.

Aconitine, ak-on'it-een. $C_{33}H_{43}NO_{12}$. White powder, soluble in chloroform, alcohol, and ether, insoluble in water, very poisonous; active principle of Aconitum napellus and other Aconita; numbness and tingling are produced by even small fractional doses; powerful cardiac sedative; it has been used internally, and externally as an oleate or ointment. Dose is gr. $\frac{1}{200}$–$\frac{1}{100}$. **A. ni'trate,** $C_{33}H_{43}NO_{12},HNO_3$. Moderately soluble salt.

Aconiti'num. Aconitine.

Aconitium, ak-o-nish'e-um. Aconitine.

Aconitum, ak-on-e'tum (from *Acone,* a place in Bithynia). *Wolfsbane, Monkshood.* Ord. Ranunculaceæ. Various species of aconitum have been used in medicine in fevers, throat affections, inflammation of the lungs and bronchial tubes, etc.; they are all poisonous in different degrees. **A. altigalea'tum,** A. cammarum. **A. an'thora** or **anthoroid'eum,** *Salutary monkshood, Wholesome wolfsbane, Yellow helmet-flower.* Root of this plant, growing in the Alps, is cathartic and anthelmintic. **A. barba'tum,** species from Siberia; root is stimulant, diaphoretic, diuretic. **A. Bernhardia'num,** A. cammarum. **A. cam'marum** resembles Aconitum napellus in properties. **A. Candol'lei,** A. anthora. **A. Chinen'se,** Chinese species, the root of which is used to poison arrows and as local anæsthetic. **A. columbia'num,** A. anthora. **A. eu'lophum,** A. anthora. **A. fe'rox,** violent poison growing in Nepaul; *bish* or *bikh poison* of that country; its effects are like those of Aconitum napellus. **A. Fisch'eri,** a species growing in Japan and United States; very poisonous. **A. heterophyl'lum,** root of this Himalayan species has tonic and antiperiodic properties; plant is eaten as vegetable. **A. interme'dium,** A. neomontanum. **A. Jacqui'ni,** A. anthora. **A. Japon'icum,** species growing in Japan, root of which resembles in properties that of A. Chinense. **A. Kusnezo'vii,** A. cammarum. **A. lu'teum,** yellow aconite, A. lycoctonum. **A. lycoc'tonum,** great yellow wolfsbane; species growing in various parts of Europe; root is poisonous. **A. macran'thum,** A. cammarum. **A. multif'idum,** species of aconite having edible roots. **A. napel'lus,** *Aconite, Common monkshood,* or *Wolfsbane;* root, leaves, and flowering tops of this perennial herbaceous plant, indigenous in Asia and Northern Europe, are used medicinally; powerful sedative and anodyne. Leaves (aconiti folia, Ph. Br.) and root (aconiti radix, Ph. Br., aconitum, Ph. U. S.) are both used. Aconite is seldom given in substance (the dose of the powder is gr. ss–ij), but usually in the form of extract or tincture; the chief pharmacopœial preparations are — abstractum aconiti, extractum aconiti, extractum aconiti fluidum, linimentum aconiti, tinctura aconiti. Action and uses of aconite are referred to under its alkaloid, *Aconitine.* **A. nasu'tum,** A. Fischeri. **A. nemoro'sum,** A. anthora. **A. neomonta'num,** mountain aconite of Europe; A. napellus. **A. ochroleu'cum,** non-poisonous Caucasian species. **A. palma'tum,** non-poisonous Himalayan species. **A. panicula'tum,** A. cammarum. **A. ponticum,** A. lycoctonum. **A. Pyrena'icum,** species from Pyrenees, variety of A. lycoctonum. **A. racemo'sum,** Actæa spicata. **A. reclina'tum,** species growing in Southern United States. **A. rostra'tum,** A. cammarum. **A. rotundifo'lium,** species with edible roots. **A. salutif'erum,** A. anthora. **A. scan'dens,** A. uncinatum. **A. septentriona'le,** variety of A. lycoctonum growing in northern parts of Europe, and having poisonous root. **A. Sinen'se,** Chinese aconite. **A. spica'tum,** variety of A. napellus. **A. Stoerkea'num,** species of aconitum, sometimes gathered by mistake for officinal aconite; amount of alkaloid in it is, however, small. **A. stric'tum,** variety of A. napellus. **A. uncina'tum,** wild monkshood; indigenous; said to have virtues similar to Aconitum napellus. **A. vanab'ile,** A. napellus. **A. variega'tum,** A. cammarum. **A. viro'sum,** A. ferox. **A. vulga'rum,** A. napellus. **A. vulpa'ria,** A. lycoctonum.

Aconusi, ak-on-u'se (*akoe,* audition, *nosos,* disease). Diseases of the ear and of audition.

Acoönosi, ak-o-on'o-se. Aconusi.

Acopon (ak'o-pon) or **Acopum,** ak'o-pum. Remedy against weariness.

Acopria, ah-kop're-ah (*a, kopros,* excrement). Constipation; defect in fecal formation.

Acopro'des. Producing only small amount of excrement.

Acoprosis, ah-kop-ro'sis. Constipation; acopria.

Acop'rous. Having only small amount of excrement.

Ac'opum. Acopon.

A'cor (*acer,* sour). Sourness. **A. ace'ticus,** glacial acetic acid. **A. benzo'inus,** benzoic acid. **A. bora'cicus,** boric acid. **A. hydrochlo'ricus,** hydrochloric acid. **A. phosphor'icus,** phosphoric acid. **A. Prus'sicus,** hydrocyanic acid. **A. succin'eus** or **succin'icus,** succinic acid. **A. sul'phuris,** sulphuric acid. **A. tartar'icus,** tartaric acid. **A. ventric'uli,** acidity of stomach.

Acorea, ah-kor'e-ah (*a,* pr., *kore,* the pupil). Absence of pupil of eye.

Acores, ac-o'res. Acids; acidities.

Acoria, ah-kor'e-ah (*a, koreo,* to satiate). Inordinate or canine appetite, or opposite state of moderation in eating.

Acorin, ak'or-in. Bitter principle of calamus.

Acormus, ah-kor'mus (*a, kormos,* trunk). Monster devoid of trunk.

A'corn. Nut of oak-tree. **A., Ju'piter's,** Fagus castanea. **A., oil'y,** Guilandina moringa. **A., Sardin'ian,** Fagus castanea. **A., sweet,** fruit of Quercus ballota.

A'corns. Fruit of the oak, Quercus alba.

Acorus adulterinus (ak'o-rus ad-ul-ter-e'nus). Iris pseudacorus. **A. aromat'icus,** A. calamus. **A. Brasilien'sis,** A. calamus. **A. cal'amus,** sweet flag or acorus, flag-root, sweet cane, myrtle flag, sweet grass, sweet root, sweet rush, ord. Aroideæ, indigenous in N. America and Asia. Rhizome, calamus (Ph. U. S.), is stomachic and carminative **A. fal'sus,** Iris pseudacorus. **A. gramin'eus,** aromatic species growing in China, Japan, etc. **A. Indicus,** A. gramineus. **A. odora'tus,** A. calamus. **A. palus'tris,** Iris pseudacorus. **A. terres'tris,** Chinese species, tonic and antispasmodic. **A. ve'rus,** A. calamus. **A. vulga'ris,** Iris pseudacorus.

Acos, ah'kos. Remedy.

Acosmia, ah-kos'me-ah (*a, kosmos,* order, ornament). Disorder; irregularity in critical days, according to Galen, who uses the word *kosmos* for regularity in those days. Others call bald persons *akosmoi,* because deprived of a beautiful ornament.

Acosmus, ah-kos'mus (same etymon). Affected with acosmia.

Acoucroba. Plant of Guinea used in small-pox.

Acoumeter, ak-oo'met-ur (*akouo,* to hear, *metron,* measure). Instrument for measuring degree of hearing.

Acoumetry, ak-oo'me-try (same etymon). Measurement of degree of hearing.

Acouometer, ak-oo-om'e-ter. Acoumeter.

Acouophonia, ak-oo-o-fo'ne-ah. Acouophony.

Acouophony, ak-oo-of'o-ne (*akouo,* to hear, *phone,* voice). Auscultatory percussion. Mode of auscultation, in which observer places ear on chest and analyzes sound produced by percussion.

Acouoxylon, ak-oo-ox'il-on (*akouo,* to hear, *xulon,* wood). Stethoscope made of one piece of wood, devised by Niemeyer.

Acouphonia, ak-oo-fo'ne-ah. Acouophonia.

Acousia, ak-oos'e-ah. Involuntary action.

Acousma, ak-oos'mah (*akousma,* anything heard). Imaginary noise; depraved sense of hearing.

Acousmetric (ak-oos-met'ric) or **Acousmometric,** ak-oos-mo-met'ric. Relating to measurement of sense of hearing.

Acoustic, ak-oos'tik (*akoustikos,* relating to hearing). That which belongs to the ear or to hearing. **A. appara'tus,** see *Ear.* **A. duct,** external auditory meatus. **A. med'icine,** one used in diseased audition. **A. nerve,** auditory nerve. **A. re'flex,** see *Reflex.* **A. stri'æ,** medullary striæ. **A. tu'bercle,** projection on floor of fourth ventricle of brain.

Acous'tica (same etymon). Remedies for impaired hearing.

Acous'tico-mallæ'us. Laxator tympani.

Acoustics, ak-oos'ticks. Part of physics treating of theory of sounds.

Acquired diseases, ak-kwired dis-eze'es. Adventitious diseases; diseases which occur after birth, and are not dependent upon hereditary predisposition. **A. move'ments,** muscular actions that have become voluntary only after conscious effort.

Acracholia, ak-rah-kol'e-ah (*akros,* extreme, *chole,* bile). Excessive temper or spleen.

Acræpala (ah-kre'pah-lah) or **Acraipala,** ah-kra'-pah-lah (*a, kraipale,* drunkenness). Remedies against effects of a debauch.

Acræpalous, ak-re'pal-us (*a,* priv., *kraipale,* debauch). Having remedial power against the effects of a debauch.

Ac'rai. Arabic term for satyriasis or excessive sexual irritation.

Acralea, ak-ral'a-ah (*akros,* at the extremity). Extreme parts of the body, as head, hands, feet, nose, ears, etc.

Acrania, ah-kran'e-ah (*a, kranion,* cranium). Want of cranium, wholly or in part; monstrosity with such condition.

Acranial, ah-krane'e-al. Vertebrate animals formed as described under *Acrania.*

Acrasia, ah-krah'se-ah (*krasis,* mixture). Intemperance; excess of any kind.

Acratia, ah-krat-e'ah (*a, kratos,* strength). Impotence; weakness, fainting; intemperance.

Acratisma, ah-krat-iz'ma (*akratos,* unmixed). Breakfast of bread steeped in wine, not mixed with water.

Acratocholus, ah-krat-ok'o-lus (*akratos,* unmixed, *chole,* bile). Produced by bile alone.

Acratomeli, ah-krat-om'a-le (*akratos,* unmixed wine, *meli,* honey). Wine mixed with honey.

Acraton, ah'krat-on. Acratum.

Acratopegæ, ah-krat-o-pa'ge (*a, kratos,* strength, *pege,* a spring). Mineral waters having no marked chemical qualities.

Acratoposia, ah-krat-o-pos'e-ah (*akratos,* unmixed, *posis,* drink). Drinking of pure or unmixed wine.

Acratum, ah'krat-um (*akratos,* unmixed). Unmixed wine.

Acraturesis, ah-krat-u-ra'sis (*akrateia,* weakness, *ouresis,* the act of discharging urine). Inability to void urine, as from paralysis or atony of bladder.

Acre, ak're (*akre,* the summit). Extremity or tip of anything, as of nose.

Acrea, ak're-a. Acralea; also extreme parts of animals that are used as food.

Acretopos'ia. Acratoposia.

Acria, ak're-ah (pl. of *Acer,* bitter). Acrid or bitter articles or remedies, or poisons. Irritant or acrid abortifacients, anthelmintics, diuretics, emetics, emmenagogues, etc., have been variously called A. abortiva, A. anthelmintica, A. diuretica, A. emetica, A. emmenagogua, etc.

Acribometer, ak-rib-om'e-tur (*akribes,* precise, *metron,* measurement). Instrument for measuring small objects.

Acrid, ak'rid (*akros,* pointed). Term applied to substances of hot, biting taste which occasion disagreeable sense of irritation and constriction in the throat; or which, when applied externally, cause heat and irritation of the skin. **A. poisons,** see *Poisons.*

Acridity, ak-rid'it-e. State of being acid or irritating.

Acrid'ium. Scammony.

Acridophagi, ak-rid-of'ah-je (*akris,* a locust, *phago,* to eat). Locust-eaters. Acridophagous tribes are said to exist in Africa.

Acridophagy, ak-rid-of'aj-e (same etymon). Eating of locusts, or disease in Ethiopia supposed to be caused by use of locusts as food, or by irritation of the skin from action of locusts upon it.

Acrimony, ak'rim-o-ne (*acer,* acrid). Imaginary acrid condition of blood, lymph, etc., which was conceived to cause many diseases. Irritation produced by a sore.

Acrinia, ah-krin'e-ah (*a, krino,* to separate). Diminution of quantity or total suspension of secretion.

Acris, ak'ris. Sharp bony prominence; locust; acrisia.

Acrisia, ah-kris'e-a (*a, krisis,* judgment). Absence of crisis in disease; condition in which no judgment can be formed.

Acrisis, ah'kris-is. Acrisia.

Acrita, ah'kre-tah (*a,* priv., *krino,* to separate). Lowest subdivision of vertebrate animals (Owen).

Acritas, ah'krit-as. Acridity.

Acritical, a-krit'ik-al. Taking place without crisis; not foretelling a crisis, as acritical symptom, etc.

Acritochromacy, a-krit-o-kro'ma-se (*a, krino,* to choose, *chroma,* color). Color-blindness.

Acritos, ah'krit-os. Acritical.

Acritus, ah'krit-us. Acritical.

Acriviola, ak-riv-e'o-lah (*acer,* sharp, *viola,* a violet). Tropæolum majus.

A'cro (*akron,* top, extremity). In composition, top or extremity.

Acroæsthesia, ak-ro-ees-the'ze-ah (*akron,* top, *æsthesis,* sensation). High degree of nervous sensibility, as in hysteria.

Acroasis, ak-ro-as'is (*akroasthai,* to listen). Use of the ear in diagnosis.

Acroblasts, ak'ro-blasts (*acro, blastos,* germ). Cells between ectoblast and endoblast.

Acrobystia, ak-ro-bis'te-ah (*akron,* top, *buo,* to cover). Prepuce, or extremity of prepuce.

Acrobys'tic. Preputial.

Acrobystiolith, ak-ro-bis'te-o-lith (*akrobustia,* prepuce, *lithos,* a stone). Preputial calculus.

Acrobystitis, ak-ro-bis-te'tis. Inflammation of prepuce; or of sheath of penis of horse.

Acrocarpid'ium hispid'ulum. Species of tonic, piperaceous, West Indian plants.

Acrocepha'lia (*acro, kephale,* head). Unusual prominence at the top of the head.

Acrocephalic (ak-ro-sef-al'ic) or **Acrocephalous,** ak-ro-sef'al-us (same etymon). Term applied to heads unusually prominent on the top.

Acrocephalus, ak-ro-cef'al-us. Acrocephalic.

Acrocephaly, ak-ro-sef'al-e. See *Acrocephalic.*

Acrocheir, ak'ro-kire (*acro, cheir,* hand). Forearm; extremity of hand or fingers.

Ac'rochir. Acrocheir.

Acrocholia, ak-ro-kol'e-ah (*acro*, *chole*, bile). Choleric disposition.

Acrochordon, ak-ro-kor'don (*acro*, *chorde*, string). Tumor hanging by pedicle; kind of hard wart; enlarged sebaceous gland of eyelids, neck, etc.

Acrocinesis, ak-ro-sin-a'sis (*acro*, *kinesis*, movement). Increased power of movement.

Acrocolia, ak-ro-ko'le-ah (*acro*, *kolon*, member). Extreme parts of body, as head, hands, feet, nose, ears.

Acrocolium, ak-ro-ko'le-um. Acromion process.

Acrocomia (ak-ro-ko'me-ah) **lasiospatha** (*acro*, *kome*, hair). Brazilian tree, with edible fruit. **A. sclerocar'pa**, tree of West Indies and South America whose nut is used in catarrh.

Acrodac'tylum (*acro*, *daktulos*, finger). Upper surface of finger.

Acrodiclid'ium cama'ra. Indigenous in Brazil; wood is bitter, and fruit, ackawai nutmeg, is employed in dysentery.

Ac'rodont (*acro*, *odous*, tooth). Having teeth attached by their bases to upper part of jaw.

Acrodynia, ak-ro-din'e-ah (*acro*, *odune*, pain). Epidemic erythema. Literally, pain in the extremities. Painful affection of wrists and ankles, with erythematous eruption and dark pigmentation, with nervous disorders, epidemic in 1828–29 in Paris. Dengue; rheumatic affection of nervous system. A condition like dengue, pellagra, or ergotism.

Acrodyny, ak-rod'in-e. Acrodynia.

Acroi'sa. Blindness.

Acrokinesis, ak-ro-kin-a'sis. Acrocinesis.

Acro'leine (*acer*, sharp, *oleum*, oil). C_3H_4O. Volatile liquid obtained in destructive distillation of glycerine.

Acrolenion, ak-ro-len'e-on (*acro*, *olene*, ulna). Olecranon process.

Acromania, ak-ro-mah'ne-ah. Incurable or hopeless insanity.

Acromastium, ak-ro-mas'te-um (*acro*, *mastos*, breast). Nipple.

Acromegaly (ak-ro-meg'al-e) or **Acromegalia**, ak-ro-meg-al'e-ah (*akron*, *megas*, large). *Marie's disease*, the chief characteristic of which is great hypertrophy of the hands, feet, face, etc., with thickening of soft parts; the muscles are sometimes atrophied. The disease may last for many years. There is enlargement of the bones, and also of the pituitary body, which last is credited by some as the cause of the disease.

Acromia, ak-ro'me-ah. Acromion process.

Acro'mial. Relating to acromion process. **A. ar'tery**, external scapular artery. It arises from anterior part of axillary artery opposite upper edge of pectoralis minor; divides into two branches, superior and inferior; branches being distributed to subclavius, serratus major anticus, first intercostal, deltoid, and pectoralis major muscles, shoulder-joint, etc. They anastomose with superior scapular, thoracic, and circumflex arteries. **A. bur'sa**, the external bursa is upper portion of subdeltoid bursa; the internal the subcoracoid bursa. **A. nerves**, branches of fourth cervical nerve distributed to acromial region. **A. vein** has same arrangement as artery.

Acromioclavicular, ak-ro-me-o-klav-ik'u-lar. Belonging to acromion and clavicle, as acromio-clavicular articulation, acromio-clavicular ligaments.

Acromioclavicularis, ak-ro-me-o-klav-ik-u-lar'is. Delicate muscle passing from acromion process to outer third of clavicle.

Acromiocoracoid, ak-ro-me-o-kor'ak-oid. Belonging to acromion and coracoid process, as acromio-coracoid or coraco-acromial ligaments.

Acromiocoracoideus, ak-ro-me-o-kor-ak-o-id-a'us. Belonging to acromion and coracoid process; triangular ligament between these processes is so called.

Acromiohumeralis, ak-ro-me-o-hu-mer-al'is. Belonging to acromion and humerus; deltoid muscle is so called.

Acromiohyoid, ak-ro-me-o-hy'oid. Belonging to acromion and hyoid bone; part of omo-hyoid muscle is so called.

Acromion, ak-ro'me-on (*acro*, *omos*, shoulder). Process terminating spine of scapula and articulated with clavicle. Deltoid muscle is attached to it.

Acromiorrheuma, ak-ro-me-or-rhu'mah. Rheumatism of shoulder.

Acromiothoracic, ak-ro-me-o-tho-rah'sik. Belonging to acromion and thorax. **A. artery**, branch from axillary muscle to pectoralis muscle, deltoid, and contiguous parts.

Acromis (ak-ro'mis) or **Acromium**, ak-ro'me-um. Acromion.

Acromphalium (ak-rom-fal'e-um), **Acromphalus** (ak-rom'fal-us), or **Achromphalon**, ak-rom'fal-on (*acro*, *omphalos*, navel). Extremity of umbilical cord remaining attached to fœtus after birth; protuberance of navel, as at beginning of umbilical hernia.

Acromylē, ak-rom'e-la (*acro*, *mule*, patella). Patella.

Acron. Extremity.

Acronarcotic, ak-ro-nar-kot'ik. Acrid and narcotic, as an acronarcotic poison.

Acroneuroses, ak-ro-nu-ro'ses (*acro*, *neuron*, nerve). Functional affections of nervous system of the extremities.

Acronia, ak-ro'ne-ah (mutilation). Amputation or mutilation of a part; monstrosity having such defect.

Acronorrheuma, ak-ro-nor-rhu'mah. Acromiorrheuma.

Acronychia, ak-ro-nik'e-ah (*acro*, *onux*, nail). Extremity of nail. **A. laurifo'lia**, rutaceous plant of Java, astringent bark of which is used in diarrhœa. **A. peduncula'ta**, species of E. Indies with edible fruit. **A. resino'sa**, Chinese plant containing resin used externally in rheumatism.

Acronyx, ak'ro-niks (*acro*, *onux*, nail). Growing in of the nail.

Acroparalysis, ak-ro-par-al'is-is. Palsy of extremities.

Acropathy, ak-rop'a-the (*acro*, *pathos*, disease). Disease of the extremities, as feet or hands.

Acrophobia, ak-ro-fo'be-ah. Hydrophobia.

Acroplethysmograph, ak-ro-pleth-is'mo-graf. Plethysmograph.

Acropodium, ak-ro-po'de-um (*acro*, *podion*, foot). Upper surface of foot.

Acroposthia (ak-ro-pos'the-ah) or **Acroposthion**, ak-ro-pos'the-on (*acro*, *posthe*, prepuce). Prepuce.

Acroposthitis, ak-kro-pos-the'tis. Inflammation of prepuce.

Acropsilon, ak-rop-se'lon (*acro*, *psilos*, naked). Extremity of glans penis.

Acroria, ak-ro-re'ah (*akron*, top.) Vertex.

Acrorrhuma, ak-ror-rhu'mah (*acro*, *rheuma*, defluxion, rheumatism). Rheumatism of the extremities.

Acros, ak'ros (*akros*, at the extremity, top). Strength of athletæ and of diseases; prominence of a bone; extremity of fingers, etc.

Acrosapes, ak-ros'ah-pes (*acro*, *sepo*, to corrupt). Rotten at the extremity; easily digested, because easily disintegrated.

Acrostethion, ak-ro-steth'e-on (the chest). Thorax.

Acrostichum aureum, ak-ros'tik-um au're-um. Decoction of this Jamaica plant, Ord. Polypodiaceæ, is used in dysentery and splenic disease, and externally for ulcers. **A. dichot'omum**, leaves of this Arabian tree are applied to burns. **A. fla'veus**, species from New Granada having cathartic action. **A. furca'tum**, elk's horn; roots of this New Zealand species are edible. **A. huascaro**, species from Peru, having diaphoretic and anthelmintic properties. **A. sorbifo'lium**, juice of this Jamaica tree is used as a local application in headache.

Acrostoma, ak-ros'to-mah. Entozoon found in amnion of cow.

Acrotarsium, ak-ro-tar'se-um. Upper part of tarsus in certain birds.

Acroteria, ak-ro-ta're-ah (*akros*, at the extremity, top). The extremities; limbs.

Acroteriasis (ak-ro-ta-re'ah-sis), **Acroterio'sis** or **Acroteriasmus**, ak-ro-ta-re-as'mus (*akroteria*, the extremities). Amputation or mutilation of extremities; acroteriasis is also applied to absence of hand or foot.

Acrothymion (ak-ro-thim'e-on), **Acrothmyo'sis**, or

Acrothym'ium (*acro*, *thumon*, thyme). Conical, rugous, bloody wart; moist wart, like flower of thyme.

Acrotic, ak-rot'ik. Relating to glands of skin.

Acrotica, ak-rot'e-kah. Diseases of excernent functions of surface of the body; pravity of fluids or emunctories opening on the surface.

Acrotism, ak'ro-tism (*a*, *krotos*, pulse). Pulselessness; defective pulse-beat.

Acrus, ak'rus (*akros*, complete). Perfect personal salubrity.

Act. Effective exercise of a power or faculty. **A., sex'ual**, coitus; asphyxia.

Actæa alba, ak-te'ah al'bah (*aktea*, the elder). *White cohosh, White baneberry, Necklace weed, Coral and pearl, Noah's ark, White bead*, indigenous in United States; emetic and cathartic. It is a variety of A. Americana; A. rubra is another variety with similar properties. **A. America'na**, there are two varieties, white and red cohosh, indigenous in the United States; it has same properties as A. spicata. **A. brachypet'ala**, red variety of Actæa Americana, growing in United States; has properties similar to A. spicata. **A. Christophoria'na**, A. spicata. **A. cimicif'uga**, A. racemosa. **A. monog'yna**, A. racemosa. **A. ra'cemis longis'simis**, A. racemosa. **A. racemo'sa**, *Black snake-root, Richweed, Cohosh, Squaw-root, Rattleweed, Black cohosh*, ord. Ranunculaceæ. Common plant in United States. Under the name Cimicifuga (Ph. U. S.), are included rhizome and rootlets of the plant. Stomachic tonic and expectorant, somewhat astringent, and arterial and nervous sedative in rheumatism, bronchitis, catarrh, neuralgia, etc. **A. ru'bra**, red variety of A. Americana. **A. spicata**, *Baneberry, Herb Christopher*, perennial herbaceous European plant, root resembling that of black hellebore. It is cathartic, sometimes emetic, and in overdoses powerful irritant.

Ac'te. Elder.

Actinæsthesia, ak-tin-ees-the'se-ah (*aktis*, a ray, *aisthesis*, perception). Perception of light by some larvæ without visible organs of sight.

Actinic, ak-tin'ik (*aktis*, a ray). Inducing chemical action, as certain rays affecting salts of silver.

Actinism, ak'tin-ism (*aktis*, a ray). Power which portion of spectrum possesses to induce chemical action.

Actinobolia (ak-tin-o-bol'e-ah) or **Actinobolism**, ak-tin-ob'o-lizm. Radiation; literally, emission of rays of light. Transmission of will-power to various organs; hypnotism.

Actinogastra, ak-tin-o-gas'trah (*aktis*, a ray, *gaster*, stomach). Star-fishes, having radiated arrangement of digestive organs.

Actinograph, ak-tin'o-graf, (*aktis*, a ray, *grapho*, to write). Instrument for determining exact amount of actinism existing.

Actinoid, ak'tin-oid (*aktis*, ray, *eidos*, resemblance). Possessing a radiate form.

Actinomeris helianthoides, ak-tin-om'e-ris hel-e-an-tho-e'des (*aktis*, a ray, *meris*, part, *helios*, sun, *anthos*, flower). Ord. Compositæ; *Gravel weed, Diabetes weed*; indigenous plant used in dropsy, diabetes, and gravel.

Actinometer, ak-tin-om'e-ter (*aktis*, ray, *metron*, measure). Instrument devised to estimate the sun's rays or the amount of actinism present.

Actinomyces, ak-tin-om'e-ses (*aktis*, a ray, *mukes*, mushroom). Ray fungus, so called from radiating clusters of the spores. Vegetable parasitic microorganisms, producing tumors of varying size in jaws, lungs, ribs, teeth, vertebræ, etc., first observed in cattle, and thence transmitted to man, to which condition term *actinomycosis* is applied. It is due to presence of a parasite, a form of leptothrix. When the disease can be reached, treatment is dietetic if intended as prophylactic, and surgical for evacuation of abscesses, etc., with antiseptic precautions. If the lungs are affected, successful treatment is problematical. **A. bo'vis**, species of actinomyces inducing actinomycosis of cattle.

Actinomycoma, ak-tin-o-me-ko'mah (*actinomyces*, *oma*, tumor). Tumor indicating existence of actinomycosis.

Actinomycosis, ak-tin-o-me-ko'sis. Chronic infectious sarcoma-like condition produced by actinomyces. See *Actinomyces*.

Actinophthalmic, ak-tin-of-thal'mik (*aktis*, a ray, *ophthalmos*, eye). Condition of eye in which intense degree of reflection of light occurs from reflecting layer of choroid in some animals.

Actinosteophyte, ak-tin-os'te-o-fite (*aktis*, a ray, *osteon*, bone, *phuton*, growth). Osteophyte or bony growth having radiated appearance.

Actinozoa, ak-tin-o-zo'ah, pl. of **Actinozo'on** (*aktis*, a ray, *zoon*, animal). Division of Cœlenterata in zoology, in which digestive canal is separated from outer wall by space surrounding viscera.

Action, ak'shun. Mode in which one object influences another; function. Animal actions are those occurring in animal body; vital, those essential to life; physiological, those of healthy character; pathological or morbid, those of disease. **A., re'flex**, see *Reflex*.

Active, ak'tiv. Energetic. In pathology it implies superabundant energy or strength. Active symptoms are those of excitement. In therapeutics it signifies energetic or active treatment; drastic. In physiology it has a similar signification, functions being divided into active and passive. **A. prin'ciple**, see *Principle*. **A. spots**, cortical centres, which when stimulated are followed by certain muscular movements.

Activity, ak-tiv'it-e. Capability of action; vitality.

Actual, ak'tu-al. Acting immediately. Term usually restricted to red-hot iron (actual cautery) or to heat in any form; in contradistinction to potential or virtual, term applied to caustics or escharotics.

Actuarius, ak-tu-ah're-us. Title of dignity given to Byzantine physicians, corresponding to modern physician-in-ordinary.

Actus, ak'tus. Act. **A. parturitio'nis**, parturition.

Acuductor, ak'u-duk-tor (*acus*, *duco*, to lead). Needle-carrier, used in ligation of arteries.

Acufilopressure, ak-u-file'o-pres-sure (*acus*, needle, *filum*, thread). Term used by Billroth for acupressure, holding vessel between needle and closely-applied ligature.

Acuitas, ak-u'it-as (*acus*, a needle). Acrimony; sharpness.

Acuity, ak-u'it-e. Sharpness. **A., vis'ual**, or **A. of vision**, sharpness or acuteness of vision.

Acumen, ak-u'men (*acuo*, to sharpen). Point. Prominence or projection of bone; tuberosity. **A. na'si**, pinched condition of nose in extreme debility, sometimes just before death.

Acumeter, ak-u'me-ter. Instrument for measuring degree of hearing.

Acu'minate. Pointed.

Acuophonia, ak-u-o-fo'ne-ah. Acouophonia.

Ac'upress. To employ acupressure.

Acupression, ak-u-pres'shun. Acupressure.

Acupressure, ak'u-pres-sure (*acus*, needle, *premo*, *pressum*, to press). Process for arresting hemorrhage, proposed by Sir James Y. Simpson of Edinburgh, consisting in passing needle or pin through substance of wound to compress and close, by middle portion of the needle, tube of bleeding vessel on cardiac side of bleeding point.

Acupunctation (ak-u-punk-ta'shun), **Acupunctuation** (ak-u-punk-tu-a'shun), or **Acupuncturation**, ak-u-punk-tu-ra'shun. Acupuncture.

Acupuncture, ak'u-punkt-yur (*acus*, needle, *punctura*, puncture). Puncturing of parts with very fine needle; employed in obstinate rheumatic affections, neuralgia, etc. It is a mode of infanticide in some countries, a needle being forced into the brain through the fontanelles, or into the spinal marrow, etc.

Acurgia, ak-ur'je-ah (*akis*, sharp instrument, *ergon*, work). Operative surgery.

Acus, ah'kus. Needle; probe; groove on upper part of transverse medullary lamina. **A. cannula'ta**, delicate trocar or hollow needle. **A. capita'ta**, A pin. **A. cataracta'ria**, cataract needle. **A. interpuncto'ria**, cataract needle. **A. invagina'ta**, form of

needle used for counter-opening; trocar. **A. moscha'ta**, Geranium maculatum. **A. ophthal'mica**, cataract needle. **A. paracentet'ica**, trocar. **A. pasto'ris**, shepherd's needle. **A. trique'tra vulga'ris**, trocar. **A. ven'eris**, Eryngium campestre.

Acusia (ak-u'ze-ah) or **Acusis**, ak-u'sis (*akousis*, hearing). Audition.

Acusimeter, ak-u-zim'e-tur (*akousis*, hearing, *metron*, measure). Instrument for measuring degree of hearing.

Acus'ma. Acousma.

Acustica, ak-ust'e-kah. Acoustics.

Acus'ticus. Relating to hearing, as nervus acusticus, auditory nerve.

Acute (*akis*, a point). Term applied to disease with certain degree of severity, rapid progress, and short duration. Diseases were formerly subdivided into Morbi acutissimi, very acute, lasting only three or four days; M. subacutissimi, continuing seven days; and M. subacuti, from twenty to forty days. Antithesis to *acute* is *chronic*. Acute, when applied to pain, cries, etc., means sharp or intense.

Acutenaculum, ak-u-ten-ak'u-lum (*acus*, needle, *tenaculum*, holder). Form of needle tenaculum or holder employed in ligation of arteries.

Acutissimus, ak-u-tis'sim-us (superl. degree of acutus). Very acute or malignant.

Acutorsion, ak-u-tor'shun (*acus*, needle, *torqueo*, to twist). Compression of blood-vessel by twisting it with needle used in acupressure.

Acutus, ak-u'tus (*a*, *kuo*, to conceive). Non-pregnant; sterile.

Acyanoblepsia, ah-se-an-o-blep'se-ah (*a*, *kuanos*, blue, *blepo*, to see). Defective vision consisting in incapability of distinguishing blue. One so affected is *Acyanoblep'tic*.

Acyanopsia, ah-se-an-op'se-ah (*a*, *kuanos*, blue, *ops*, eye). Blue-blindness, see *Acyanoblepsia*.

Acyclia, ah-sik'le-ah (*a*, *kuklos*, circle). Failure or suspension of circulation.

Acyesis, ah-se-a'sis (*a*, *kuesis*, pregnancy). Sterility; non-pregnant condition; condition requiring artificial means of delivery.

Acyeterion, ah-se-a-ta're-on. Agent or remedy to prevent conception; abortifacient.

Acyetic, ah-se-et'ik. Relating to acyesis.

Acymon, ah'se-mon (*a*, *kuo*, to conceive). Sterile.

Acyoblepsia, ah-se-o-blep'se-ah. Acyanoblepsia.

Acyrus, as'er-us. Arnica montana.

Acysis, ah'cis-is. Acyesis.

Acystia, ah-sis'te-ah (*a*, *kustis*, bladder). Absence of urinary bladder.

Acystinervia or **Acystonervia**, ah-sist-o-nur've-ah (*a*, *kustis*, bladder, *neuron*, nerve). Paralysis of the bladder.

Acysturonerv'ia (*a*, *kustis*, bladder, *ouron*, urine, *neuron*, nerve). Paralysis of the bladder.

Acysturotrophia, ah-sist-u-ro-trof'e-ah (*a*, *kustis*, bladder, *ouron*, urine, *trophe*, nourishment). Atrophy of the bladder.

Acyterius, ah-se-ta're-us (*a*, *kuo*, to conceive). Abortive.

A'da. E. Indian term for ginger.

Adabadani. Tree of British Guiana; bark is vesicant.

Adaca. Sphæranthus Indicus; acrid and aromatic.

Adacrya, ah-dak're-ah (*a*, *dakruo*, to weep). Defective secretion of tears.

Adactylia, ah-dak-tyl'e-ah (*a*, *daktulos*, finger). Absence of fingers. One having this condition is said to be *Adac'tylous*. Such a limb is *Adac'tyl*.

Adæmonia, ah-de-mon'e-ah. Anxiety; depression, nostalgia, or home-sickness.

Adako'dien. Malabar plant used as astringent and in diseases of eyes.

Ad'ali. Malabar plant which Orientals regard as an antidote to snake-bites.

Ad'am and Eve. Orchis maculata; aplectrum hiemale.

Ad'amant. Magnet.

Adamant'ine sub'stance or **layer.** Enamel of teeth.

Adamas, ad'am-as. The enamel of teeth. Hyoscyamus.

Adami morsus, ad-am'e mor'sus. Pomum Adami.

Adamita, ad-am-e'tah. Hard white calculus of bladder.

Adamitum, ad-am-e'tum. Lithiasis or calculous condition.

Adam's ap'ple. Pomum Adami, projection of thyroid cartilage in neck. Fruit of Musa paradisiaca. **A.'s flan'nel**, mullein, Verbascum thapsus.

Adams's operation. Operation practised by Mr. W. Adams of England in ankylosis of hip-joint, by subcutaneous section of neck of thigh-bone. Also operation for division of the bands of fascia in Dupuytren's contraction by the subcutaneous method, the sections being made at many points. See *Alexander's operation*. **A.'s saw**, saw with slender blade and serrated edge of limited extrent, for subcutaneous division of bone.

Adansonia digitata, ad-an-so'ne-ah dij-e-tah'tah (after M. Adanson, French naturalist). African plant, baobab, from fruit of which—monkey bread—a refreshing drink is made. Bark has been used as substitute for cinchona. Leaves are used in dysentery, hæmoptysis, etc. All parts are mucilaginous. **A. Grego'rii**, cream-of-tartar tree of Australia, so called from its taste.

Adansonine, ad-an'so-neen. Bitter alkaloid derived from leaves of Adansonia digitata, employed as febrifuge.

Adaptation, ad-ap-ta'shun. Accommodation as of eye; acclimatization; coaptation as of fractured bone.

Adapter, ad-ap'tur (*ad*, *apto*, to fit). Tube employed for various purposes in pharmaceutical operations. Portion of a microscope.

Adarigo (ad-ah-re'go) or **Adarnech**, ad-ar'nek. Orpiment.

Adarticulatio, ad-ar-tik-u-lah'she-o (*ad*, *articulo*, to join). Arthrodia.

Adaxoma, ad-aks-o'mah (*adaxasthai*, to experience intense pain). Intense burning pain.

Adclivity, ad-kliv'it-e. Spine or projection. **A. of tibia**, spine of tibia.

Ad cu'tem abdom'inis (arte'ria). Superficial artery of abdomen, branch of crural or femoral, arising at lower part of Poupart's ligament, ascending toward the umbilicus, being distributed to the integuments.

Addental, ad-den'tal (*ad*, *dens*, tooth). Maxillary bone of fishes.

Addephagia, ad-de-fah'je-ah (*adden*, in excess; *phago*, to eat). Voraciousness. Voracious appetite in children affected with worms. Bulimia, goddess of gluttony.

Ad'der's tongue. Ophioglossum vulgatum; Erythronium Americanum. **A.'s wort**, Polygonum bistorta.

Ad'dison's disease. Singular condition of cachexia, *suprarenal cachexia*, leading characteristics of which are anæmia, general languor and debility, remarkable feebleness of heart's action, irritability of stomach, and peculiar bronzed skin, first described by Dr. Thomas Addison of London as connected with diseased condition of suprarenal capsules. Death occurs from exhaustion. It is known as the disease of Addison, or bronzed-skin disease. **A.'s keloid**, morphœa.

Additamentum, ad-dit-am-en-'tum (*addo*, to adjoin). Addition; epiphysis; prolongation of lambdoidal and squamous sutures of skull. **A. co'li**, vermiform appendix of cæcum. **A. neca'tum**, olecranon. **A. ad sa'cro-lumba'lem**, see *Sacro-lumbalis*. **A. ul'næ**, radius. **A. unca'tum ul'næ**, olecranon.

Adducens, ad-du'sens (*ad*, *duco*, to draw). Drawing toward axis of body. **A. hu'meri**, pectoralis major. **A. oc'uli**, rectus oculi internus.

Adduction, ad-duk'shun. Action by which parts are drawn toward axis of body. Muscles executing it are called *adductors*.

Adduc'tor an'guli o'ris. Accessory muscle of orbicularis oris. **A. au'ris**, part of platysma muscle attached to auricle of ear; zygomatico-auricularis; temporo-auricularis. **A. bre'vis**, see *Adductors of thigh*. **A.**

dig'iti ter'tii pe'dis, second plantar interosseous muscle. **A. dig'iti quin'ti**, opponens minimi digiti. **A. femoris primus**, adductor. **A. femoris secundus**, adductor brevis. **A. femoris tertius et quartus**, adductor magnus. **A. grac'ilis**, gracilis muscle. **A. hallu'cis**, muscle of sole of foot, A. pollicis pedis, or oblique head only, at origin of same muscle. **A. in'dicis pe'dis**, first dorsal interosseous muscle of foot; it is, however, abductor. **A. lon'gus fem'oris**, see *Adductors of thigh*. **A. magnus**, see *Adductors of thigh*. **A. me'dii dig'iti pe'dis**, first plantar interosseous muscle. **A. me'dius au'ris**, levator auris brevis. **A. metacar'pi min'imi dig'iti**, situate between adductor and flexor, next to metacarpal bone; arises, fleshy, from unciform process of os unciforme and contiguous part of annular ligament of wrist, and is inserted, tendinous and fleshy, into fore part of metacarpal bone of little finger. **A. min'imi dig'iti**, prior minimi digiti; opponens minimi digiti. **A. ad min'imum dig'itum**, adductor pollicis manus. **A. min'imus**, portion of adductor magnus muscle above superior profunda artery. **A. obli'quus hallu'cis**, adductor of great toe of ape. **A. oc'uli**, rectus oculi internus. **A. os'sis metacar'pi dig'iti auricula'ris** or **A. o. m. d. ma'nûs**, opponens minimi digiti. **A. pectin'eus**, pectineus muscle. **A. pol'licis**, A. pollicis manûs. **A. pol'licis manûs**, muscle arising, fleshy, from almost whole length of metacarpal bone of middle finger, and inserted into inner part of root of first bone of thumb. **A. pol'licis pe'dis** arises by long thin tendon from under part of os calcis, os cuboides, os cuneiforme externum, and root of metatarsal bone of second toe. It is divided into two fleshy portions, and is inserted into external sesamoid bone and root of metatarsal bone of great toe. **A. pri'mus**, A. longus. **A. pros'tatæ**, levator prostatæ. **A. pupil'læ**, rectus internus oculi. **A. quar'tus**, A. minimus. **A. secun'dus**, A. brevis. **A. ter'tii dig'iti pe'dis**, prior tertii digiti pedis. **A. ter'tius**, A. magnus. **A. tibia'lis**, semimembranosus and semitendinosus muscles. **A. transversa'lis hallu'cis**, adductor of great toe in apes. **A. tri'ceps fem'oris**, adductor mass of thigh, see *Adductors of the thigh*. **A. tu'bercle**, eminence on the os femoris for attachment of the tendon of the adductor magnus.

Adduc'tors of the thigh. Three in number, by some anatomists united into one muscle—triceps adductor femoris. 1. *Adductor longus femoris*, by strong tendon from upper and fore part of os pubis and ligament of symphysis, at inner side of pectinalis; runs downward and outward, and is inserted by broad, flat tendon into middle of linea aspera. 2. *Adductor brevis* arises, tendinous, from os pubis, at side of symphysis, below and behind last muscle; runs obliquely outward, and is inserted by short, flat tendon into inner and upper part of linea aspera, from little below trochanter minor to beginning of insertion of adductor longus. 3. *Adductor magnus* is much larger than either of the others; arises from ramus of pubis, that of ischium, and tuber ischii, and is inserted into whole length of linea aspera, near lower part of which it is pierced by an oblique fibrous canal, through which the crural artery and vein pass.

Adecta, ah-dek'tah (*a, dakno*, to bite). Sedatives, demulcents, antidotes.

Adel. Whitlow.

Adeliparia, ad-el-ip-ar'e-ah (*aden*, to excess, *liparos*, fat). Excessive corpulency.

Adelocephalous, ad-e-lo-cef'a-lus (*adelos*, unseen, *kephale*, head). Condition in which the head is almost invisible.

Adelomorphous, ad-e-lo-mor'fus (*adelos*, invisible, *morphe*, shape). Term applied to columnar cells lining secretory portion of glands of stomach.

Adelopneumonous, ad-e-lo-nu'mon-us (*adelos*, unseen, *pneumon*, lung). Having organs of respiration concealed.

Adelopoda, ad-el-op'o-dah (*adelos*, unseen, *pous*, foot). Animals which have feet or limbs concealed.

Adelostomata, ad-el-o-stom'at-ah (*adelos*, unseen, *stoma*, mouth). Animals which have mouth concealed.

Adelphia, ad-el'fe-ah (*adelphos*, brother). Monstrosity double anteriorly or posteriorly.

Adelphism, ad-el'fism. Adelphia.

Adelphixia (ad-el-fix'e-ah) or **Adelphixis**, ad-el-fix'is (*adelphos*, brother). Consanguinity of parts in health or disease; diseases that resemble each other; sympathy.

Adelus, ad-e'lus. Insensible, as insensible perspiration; indefinite or hidden, as symptoms of disease.

Ademonia, ad-a-mon'e-ah. Depression, nostalgia.

Ademosyne, ad-a-mos'in-a. Depression, nostalgia.

A'den (a gland). In composition, gland; bubo. **A. fe'ver**, dengue. **A. ulcer**, a form of ulcer of the foot and leg met with in tropical countries; known under other names, as Cochin-China ulcer, Yemen ulcer, etc. See *Beriberi*.

Adenalgia, ad-en-al'je-ah (*aden*, *algos*, pain). Glandular pain.

Adenalgic, ad-en-al'jik. Relating to adenalgia.

Adenandra, ad-en-an'dra (*aden*, gland, *aner*, man). South African plant; stimulant, diuretic, and sedative expectorant.

Adenanthera (ad-en-an'the-rah) **Pavoni'na** (*aden*, gland, *antheros*, blooming). Mandsjadi or mandsiadi. Root is emetic; leaves are used in rheumatism and seeds in epilepsy.

Adenectomy, ad-en-ek'to-me (*aden*, *ektome*, excision). Excision of a gland.

Adenectopia, ad-en-ek-top'e-ah (*aden*, *ektopos*, out of place). Dislocation or unusual location of a gland.

Adenemphraxis, ad-en-em-frax'is (*aden*, *emphraxis*, obstruction). Glandular obstruction.

Adenia, ad-en'e-ah (*aden*, a gland). Hodgkin's disease. **A. venena'ta**, tree of Arabia with caustic juice; climbing plant of Africa with vesicant properties.

Adeniform (ad-en'e-form) or **Adenoid**, ad'en-oid (*aden*, *forma*, form or resemblance). Glandiform or resembling a gland.

Adenine, ad'en-een. $C_5H_5N_5$. Alkaloid substance or leucomaïne obtained from glandular structures, as pancreas, from liver and urine of leucæmic patients, etc., from decomposition of nuclein. It is in clear crystals, slightly soluble in cold water, more so in hot. See *Leucomaïnes* (table). **A. hypoxan'thine**, $C_5H_5N_5 + C_5H_4N_4O$, leucomaïne obtained by making a hot watery solution of equal parts of the two bases, and allowing it to cool.

Adenitis, ad-en-e'tis (*aden*, gland). Glandular inflammation. **A. blennorrhœ'a**, gonorrhœal bubo. **A. inguina'lis**, bubo. **A. lymphat'ica**, inflammation of lymphatic gland; lymphadenitis. **A. palpebra'rum contagio'sa**, see *Ophthalmia*. **A. universa'lis**, general inflammation of lymphatic glands. **A. vene'rea**, venereal bubo. **A. vul'vo-vagina'lis**, inflammation of vulvo-vaginal gland.

Adeniza'tion. Adenoid degeneration.

Ad'enoblasts (*aden*, *blastos*, germ). Formative cells of glands.

Adenocarcinoma, ad-en-o-kar-sin-o'mah. Degeneration of adenoid structure into carcinoma; adenoid cancer.

Adenocele, ad-en-o-seel'e (Eng. ad'en-o-seel) (*aden*, *kele*, rupture, tumor). Cystic glandular tumor of mammary ducts and sinuses; adenoma.

Adenocheirapsology or **Adenochirapsology**, ad-en-o-kire-ap-sol'o-je (*aden*, *cheir*, hand, *apto*, to lay hold of, *logos*, description). Doctrine of curing scrofula or king's evil by royal touch.

Adenochœradologia or **Adenochoiradologia**, ad-en-o-koi-rah-do-lo'je-ah (*aden*, *choiros*, scrofulous disease, *logos*, description.) Treatise on scrofula; see *Adenocheirapsology*.

Adenochrondrius, ad-en-o-kon'dre-us (*aden*, *chondros*, cartilage). Relating to gland and cartilage; tumefaction of glands and cartilages of joints.

Adenocystoma, ad-en-o-sis-to'mah. Cystic tumor taking its growth from a new formation of glandular structure. Adenoma with formation of cysts.

Adenodermia, ad-en-o-dur'me-ah (*aden*, *derma*, skin). Disease of glands of skin.

Adenodes, ad-en-o'des (*aden*, *eidos*, appearance). Resembling a gland; adenoid.

Adenodiastasis, ad-en-o-de-as'tas-is (*aden*, gland, *diastasis*, separation). Abnormal separation or division of lobes of gland; dislocation of gland.

Adenodiastatic, ad-en-o-di-as-tat'ik (same etymon). Relating to adenodiastasis.

Adenodynia, ad-en-o-din'e-ah (*aden*, *odune*, pain). Glandular pain; adenalgia.

Adenofibroma, ad-en-o-fib'ro-mah. Fibroma of glands; adenoma with fibrous structure.

Adenogenesis, ad-en-o-jen'a-sis (*aden*, gland, *genesis*, formation). Formation of glands or glandular structures.

Adenography, ad-en-og'ra-fe (*aden*, *grapho*, to describe). Part of anatomy describing glands.

Adenoid, ad'en-oid. Resembling or relating to a gland. **A. body**, prostate gland. **A. can'cer**, adenocarcinoma. **A. disease**, Hodgkin's disease. **A. mus'cle**, small detached portion of inferior constrictor muscle placed on each side of thyroid gland. **A. tiss'ue**, lymphoid or retiform tissue; tissue composing follicles of lymphatic glands, Malpighian corpuscles of spleen, Peyer's glands, solitary glands of intestine, thymus gland, etc., possessing same general structure everywhere. **A. tu'mor**, adenoma.

Adenoi'des. Adeniform.

Adenologaditis, ad-en-o-log-ad-e'tis (*aden*, *logas*, white of eye, *itis*). Ophthalmia of new-born.

Adenology, ad-en-ol'o-je (*aden*, *logos*, description). Treatise on glands; description of glands.

Adenolymphitis, ad-en-o-lim-fe'tis. Lymphadenitis.

Adenolymphocele, ad-en-o-lim-fo-seel'e (Eng. ad-en-o-lim'fo-seel). Enlargement of lymphatics connected with a gland; cystic dilatation of lymphatic glands.

Adenolymphoma, ad-en-o-lim-fo'ma. Hodgkin's disease; lymphadenoma.

Adenoma, ad-en-o'mah (*aden*, gland). Adenoid tumor; glandular growth or hypertrophy of gland texture. **A., a'cinous**, adenoma of racemose glands. **A. carcinomato'sum**, adenocarcinoma. **A., cys'tic**, adenoma with cysts. **A. fibro'sum**, fibrous growth in a gland. **A. lupifor'me**, lupus erythematosus. **A. myomato'sum**, adenoma complicated with myoma; myoma developed in a gland. **A. myxomato'sum**, adenoma complicated with myxoma; myxoma developed in a gland. **A. ra'cemosum**, A., acinous. **A. sarcomato'sum**, adenoma complicated with sarcoma; sarcoma developed in a gland. **A. seba'ceum**, adenoma of skin having structure like sebaceous gland. **A. sudorip'arum**, adenoma of skin resembling sweat-glands in structure. **A., tu'bular**, adenoma of glandular structure of mucous membranes; cystic tumor of ovaries.

Adenomalacia, ad-en-o-mal-ak'e-ah (*aden*, *malakia*, softening). Mollescence or softening of a gland.

Adenomeningeal, ad-en-o-men-in-je'al (*aden*, *meninx*, membrane). Relating to glands of a membrane.

Adenomesenteritis, ad-en-o-mes-en-tur-e'tis. Inflammation of mesenteric gland or glands.

Adenomyxoma, ad-en-o-mix-o'ma (*aden*, *muxa*, mucus). Tumor composed of glandular and myxomatous structures, or of adenoma and myxoma.

Adenoncosis, ad-en-on-ko'sis (*aden*, *onkos*, tumor, *osis*). Adenophyma.

Adenoncus, ad-en-on'kus (*aden*, *onkos*, tumor). Glandular swelling or enlargement; adenophyma.

Adenonervous (ad-en-o-ner'vus) **fever.** Plague.

Adenoneuro'sus (*aden*, gland, *neuron*, nerve). Adenoneurotic.

Adenoneurotic, ad-en-o-nu-rot'ik (*aden*, *neuron*, nerve). Relating to glands and nerves.

Adenopathy, ad-en-op'a-the. Disease of a gland; bubo. **A., syphilit'ic**, affections of glands occurring in syphilis.

Adenopharyngeal, ad-en-o-far-in-je'al (*aden*, *pharynx*). Relating to pharynx and gland, as thyroid. **A. mus'cle** is made up of fleshy fibres passing from the constrictor pharyngis inferior to thyroid gland.

Adenopharyngitis, ad-en-o-far-in-ge'tis. Inflammation of tonsils and pharynx.

Adenophlegmon, ad-en-o-fleg'mon (*aden*, *phlegmone*, inflammation). Intense inflammation of a lymphatic gland.

Adenophora (ad-en-of'o-rah) **tracheloï'des** (*aden*, gland, *phoreo*, to bear). Root of this Chinese plant is expectorant. **A. verticilla'ta** has similar properties.

Adenophthalmia (ad-en-of-thal'me-ah) or **Adenophthalmitis**, ad-en-of-thal-me'tis. Ophthalmia tarsi.

Adenophyma, ad-en-o-fe'mah (*aden*, *phuma*, swelling). Swelling of a gland; glandiform ganglion. By some used to signify soft glandular swelling; adenoncus is one of harder character. **A. inguina'le**, bubo.

Adenosarcoma, ad-en-o-sar-ko'mah (*aden*, *sarcoma*, fleshy growth). Sarcoma of lymphatic gland, or combination of sarcoma and adenoma. **A., cys'tic**, A. with cystic degeneration.

Adenoscirrhus, ad-en-o-skir'rus (*aden*, *skirrhos*, induration). Scirrhous induration of a gland; adenoma complicated with scirrhus.

Adenosclerosis, ad-en-o-skler-o'sis (*aden*, *skleros*, hard). Induration of a gland; adenoscirrhus.

Adenose, ad'en-oze. Glandular; having numerous glands.

Adeno'ses. Chronic morbid conditions of glands.

Adenosis, ad-en-o'sis. Abnormal condition of a gland; formation of gland; Hodgkin's disease. **A. scrophulo'sa**, scrofula.

Adenostyles (ad-en-os'te-laze) **alpi'na.** Alpine plant, order Compositæ, leaves of which were employed to allay cough. **A. gla'bra**, of S. Europe, has similar properties.

Adenosus, ad-en-o'sus. Glandular.

Adenosynchitonitis, ad-en-o-sin-ke-ton-e'tis (*aden*, *sunchiton*, conjunctiva, *itis*, inflammation). Ophthalmia neonatorum. Inflammation of Meibomian glands.

Adenotomy, ad-en-ot'o-me (*aden*, *tome*, incision). Dissection of a gland or glands.

Adenoty'phoid fe'ver. Typhoid fever; Malta or Mediterranean fever.

Adenoty'phus. Typhoid fever.

Adenous, ad'en-us. Adenoid.

Adephagia, ad-e-fah'je-ah (*aden*, in excess, *phago*, to eat). Addefagia; boulimia; insatiable desire for food.

Adephagous, ad-ef'a-gus (same etymon). Having excessive desire for food.

Ad'eps. Lard, pig's flare. In Ph. U. S. prepared internal fat of abdomen of Sus scrofa, or the hog, free from saline matter. **A. anseri'nus** or **an'seris**, goose grease; emollient; emetic. **A. benzoina'tus** (Ph. U. S.) or **benzoa'tus**, benzoinated lard. **A. canthari'dibus medica'tus**, unguentum lyttæ medicatum. **A. col'li equi'ni**, fat from neck of horse, used by veterinary surgeons. **A. cor'tice Daph'nes gnid'ii medica'tus**, unguentum epispasticum de Daphne gnidio. **A. huma'nus**, human fat. **A. hydrar'gyri muria'te oxygena'to medica'tus**, unguentum muriatis hydrargyri oxygenati medicatum. **A. hydrar'gyri nitra'te medica'tus**, unguentum hydrargyri nitratis. **A. hydrar'gyri oxi'do ru'bro et plum'bi aceta'te medica'tus**, unguentum ophthalmicum. **A. hydrar'gyro medica'tus**, unguentum hydrargyri. **A. ex hydrar'gyro mit'ius dic'tum cine'reum**, unguentum oxidi hydrargyri cinereum. **A. lau'ro medica'tus**, unguentum laurinum. **A. myris'ticæ**, expressed oil of nutmeg. **A. nucis'tæ**, expressed oil of nutmeg. **A. ovil'li** or **o'vis**, mutton suet. **A. ox'ido zin'ci medica'tus**, unguentum zinci oxidi. **A. oxygena'tus**, oxygenated lard, from action of nitric acid on lard; used in skin diseases. **A. papav'ere, hyoscy'amo, et belladon'nâ medica'tus**, unguentum populeum. **A. pe'dum tau'ri**, neat's-foot oil. **A. petro'lei**, petrolatum. **A. por'ci** or **porci'nus**, hog's lard. **A. præpara'tus** (Ph. Br.), hog's lard, barrow's grease, lard; prepared by melting pig's flare and straining it. This is called *rendering*. It is emollient, but chiefly used for forming ointments and plasters. **A. stibia'tus**, tartar

emetic ointment. **A. suil'lus**, hog's lard. **A. suil'lus benzoina'tus**, benzoinated lard. **A. suil'lus cura'tus**, prepared lard. **A. suil'lus præpara'tus**, prepared lard. **A. sul'fure et ammo'niæ muria'te medica'tus**, unguentum sulphuratum ad scabiem. **A. sul'fure et carbona'te potas'sæ medica'tus**, unguentum sulphuratum alcalinum ad scabiem. **A. tar'taro stib'ii medica'tus**, unguentum antimonii.

Adept' (*adipiscor*, to acquire). One versed in alchemy.

Adepta medicina, ad-ep'tah med-e-se'nah. Medicine which treated of diseases contracted by celestial operations, or communicated from heaven. **A. philoseph'ia**, alchemy.

Adermia, ah-dur'me-ah (*a*, *derma*, skin). Absence or deficiency of skin.

Adermonervia, ah-dur-mo-nur've-ah (*a*, *derma*, skin, *neuron*, nerve). Neuroses of the skin.

Adermotrophia, ah-dur-mo-trof'e-ah (*a*, *derma*, skin, *trophe*, nourishment). Extenuation or atrophy of the skin.

Adesmia balsamifera, a-des'me-ah bal-sam-if'er-ah. Species of leguminous plant employed in Chili as vulnerary.

Adesmosis, ah-des-mo'zis (*a*, *desmos*, bond or cord). Atrophy or imperfect development of connective tissues.

Adesmy, ah-dez'me. Adesmosis.

Adflatus, ad-flat'us. Afflatus.

Adhatoda, ad-hah-to'dah. Malabar nut-tree. Nat. ord. Acanthaceæ. Leaves, flowers, and root are antispasmodic; employed in thoracic affections, and in India as emmenagogue for expelling dead fœtus in abortion. **A. Tranquebarien'sis**, Indian plant, contused leaves of which are applied to bruises. **A. vas'ica**, Justicia adhatoda.

Adhe'rence or **Adhe'sion** (*adhæreo*, to stick to). These words are usually employed synonymously. The French often use adherence for state of union, and adhesion for act of adhering.

Adherent, ad-he'rent. Abnormally attached by pathological growth.

Adhesion, ad-he'zhun. **A., pri'mary**, term used in surgery (*per primam intentionem*, by first intention) to denote the healing of a wound without granulation or suppuration. **A., sec'ondary**, healing of a wound (*per secundam intentionem*, by second intention) by opposite granulating surfaces becoming united.

Adhe'sions. Pathological formations of organized bands of lymph connecting neighboring organs, as in pleurisy (pleuritic adhesions).

Adhesive, ad-he'ziv. Sticking, uniting. **A. inflamma'tion**, inflammation terminating by adhesion between inflamed and separated surfaces, at one time supposed necessary for such adhesion. **A. plas'ter**, emplastrum resinæ.

Adhib. Euphrasia officinalis.

Adhibit'ion. Employment of a remedy.

Adhotoda. Adhatoda.

Adiantum (ah-de-an'tum) or **Adianthum** (*a*, *diaino*, to grow wet, from leaves not being easily moistened). A genus of plants, nat. ord. Filices; several species are used medicinally. **A. Æthiop'icum**, S. African plant, infusion of which is emollient in bronchial and pulmonary affections. **A. al'bum**, Asplenium ruta muraria. **A. au'reum**, Polytrichum. **A. Canaden'se**, A. pedatum. **A. capil'lus ven'eris**, maiden-hair. European plant, of feeble aromatic and demulcent properties. **A. coriandrifo'lium**, A. capillus veneris. **A. fra'gile**, species growing in Jamaica, used in pulmonary affections. **A. melanocau'lon**, species growing in E. Indies; tonic. **A. nigrum**, A. capillus veneris. **A. pa'tens**, A. pedatum. **A. peda'tum**, *Canada maidenhair*, *American maidenhair*, *Rockfern*, *Sweetfern*; aromatic and demulcent. **A. ru'brum**, Asplenium trichomanoïdes. **A. ten'erum**, species of S. America, with same medicinal properties as A. capillus veneris. **A. trapezifor'me**, species from Mexico and S. America, with expectorant properties. **A. ve'rum ni'grum**, A. capillus veneris. **A. vulga're**, A. capillus veneris.

Adiaphania, ah-de-af-an'e-ah (*a*, *diaphaneia*, transparency). Cataract.

Adiaphoresis (ah-de-ah-for-a'sis) or **Adiaphorosis**, ah-de-ah-for-o'sis (*a*, *diaphoreo*, to discharge by perspiration). Defect or suppression of perspiration.

Adiaphorous, ah-di-af'o-rus (same etymon). Neutral; medicine which will do neither harm nor good. Listless, indifferent, inert.

Adiaplast, ah-di'a-plast (*a*, *dia*, through, *plasso*, to form). Abortion, the fœtus being imperfectly developed.

Adiapneustia, ah-de-ah-nu'ste-ah (*a*, *dia*, through, *pneo*, to breathe). Defect or suppression of perspiration.

Adiarrhœa, ah-di-ar-rhe'ah (*a*, *diarrheo*, to flow). Retention of any excretion; constipation.

Adiarthrotos, ah-de-arth'ro-tos (*a*, *diarthrosis*, articulation). Not jointed; inarticulate as to speech.

Adiathermic, ah-di-a-ther'mik (*a*, *dia*, through, *therme*, heat). Not admitting of passage of heat.

Adiathesic (a-di-a-the'zik) or **Adiasthetic**, a-di-as-thet'ic (*diathesis*, constitution or disposition). Occurring without any antecedent diathesis, as adiasthesic diseases.

Adice, ad'ese (*adikeo*, to injure). Common nettle.

Adietetic, ah-di-e-tet'ik. Not suitable for food; not careful as to proper diet.

Adipatus, ad-e-pah'tus (*adeps*, fat). Fatty.

Adipic (ad'ip-ik) **ac'id.** Dibasic product of oxidation of fatty acids; $C_6H_{10}O_4$.

Adipocellular, ad-i-po-sell'u-lar. Consisting of, or relating to, fatty and cellular tissues.

Adipocera, ad-ip-o-se'rah. Adipocere. **A. ceto'sa**, spermaceti, such as moisture.

Adiposeration, ad-i-po-se-ra'shun (*adeps*, fat, *cera*, wax). Conversion into adipocere.

Adipocere, ad'i-po-sere (*adeps*, fat, *cera*, wax). *Corpse fat; Grave wax.* Base of biliary calculi, called also cholesterin; sort of soap, formed from decomposition of animal matter under certain circumstances. It is a combination of fatty acids and alkaline earths, etc. The human body, when it has been for some weeks in water, often assumes this appearance.

Adipocira, ad-ip-o-se'rah. Adipocere.

Adipociriform, ad-i-po-se're-form (*adipocira*, *forma*, form). Like adipocere; term applied to such tumors as cholesteatoma.

Adipogenous, ad-i-poj'en-ous (*adeps*, *gennao*, to create). Producing fat.

Adipo'ma, (*adeps*, fat). Fatty tumor, such as lipoma.

Adipose, ad'i-pose (*adeps*, fat). That which relates to fat; fatty, as adipose membrane. **A. ar'teries**, capsular arteries; branches from thoracic aorta to adipose tissue of heart. **A. cap'sule**, layer of fat, surrounding kidney as a means of support. **A. sarco'ma of Ab'ernethy**, a suety or fatty tumor enclosed in a capsule of areolar substance, connected by minute vessels; chiefly found on the trunk. **A. tis'sue**, fat-cells united by connective tissue in all parts of the body.

Adiposis, ad-ip-o'sis (*adeps*, and *osis*). Obesity. **A. hepat'ica**, *Fatty liver*, *Fatty degeneration of the liver*. Disease of liver dependent on accumulation of fat in its secreting cells; gland is dull yellow, generally greasy and flabby, and if degeneration is excessive it may impede circulation in the capillaries and obstruct excretion of bile.

Adipositas, ad-i-pos'it-as. Adiposity.

Adiposity, ad-i-pos'it-e. Adiposis.

Adiposuria, ad-ip-o-zu're-ah (*adeps*, fat, *ouron*, urine). Fatty urine.

Adiposus, ad-e-po'sus. Fatty; adipose.

Adipous, ad'i-pus. Fatty; adipose.

Adipsa, ah-dip'sah (*a*, *dipsa*, thirst). Medicines to relieve thirst; food that does not cause it.

Adipsia, ah-dip'se-ah (*a*, *dipsa*, thirst). Absence of thirst.

Adipsic, a'dip-sik (same etymon). Relieving thirst; relating to adipsia.

Adipson, ah-dip'son. Any substance which relieves thirst.

Adip'sos. Licorice.

Adipsous, ah-dip'sus. Not thirsty; adipsic.

Adipsy, ah'dip-se. Adipsia.

Aditus, ad'-it-us (entrance). Entrance to a canal or duct. **A. ad aquæduc'tum Fallo'pii,** entrance to Fallopian canal. **A. ad aquæduc'tum Syl'vii,** entrance to aqueduct of Sylvius. **A. ad infundib'ulum,** vulva; entrance from third ventricle of brain to infundibulum. **A. laryn'gis,** superior or pharyngeal orifice of larynx.

Adivas. Inflammation of throat, like quinsy, in some animals

Adivie amida. Jatropha curcas.

Adjunctive, ad-junk'tiv (*ad,* to, *jungo,* to join). Term used in surgery to denote preservation of a part.

Adjus'tal bone. Pterygoid bone of fishes (Owen).

Adjuster, ad-jus'ter. Instrument for adjustment of relation of parts, as in dislocations, displacements, etc.

Ad'jutor min'ister (helper or aid). Assistant in an operation. **A. par'tûs,** accoucheur.

Adjutorium, ad-ju-to're-um. Adjuvant; humerus.

Adjuvant, ad'ju-vant (*adjuvo,* to aid). Medicine introduced into a prescription to aid operation of principal ingredient; whatever assists in removal or prevention of disease.

Adminic'ulum (*ad, manus,* hand). Prop; support; anything aiding action of remedy. **A. lin'eæ al'bæ,** ligament of the lineæ albæ.

Admor'tal (*ad,* to, *mors,* death). Term applied to a current of electricity passing from living tissues to a dead muscle.

Adnasal, ad-na'zal (*ad,* to, *nasus,* nose). Premaxillary bone of fishes (Owen).

Adnascence, ad-nas'sense (*ad, nascor,* to grow). Morbid adhesion or growing together, as of eyelids.

Adnata (ad-nat'ah) **tu'nica** (*ad, nascor,* to grow). Conjunctiva; vaginal coat of testicle.

Adnexa, ad-neks'ah. Appendages. **A. u'teri,** uterine appendages.

Adolescence, ad-o-les'sense (*adolesco,* to grow). Youth; period between puberty and that at which body acquires full development, in man between 14th and 25th years, and in woman between 12th and 21st. The period varies in different countries; in Italy, for instance, in men it is from 15th to 25th, women, 12th to 20th year.

Adolescent, ad-o-les'sent. Youth; one at period of adolescence.

Adolia, ad-o'le-ah. Malabar plant, whose leaves are used in labor.

Adonidine, ad-on'id-een. Bitter uncrystallizable glucoside obtained from all parts of Adonis vernalis; regulates action of heart, increases arterial pressure, and augments diuresis, resembling digitalis in action. Dose, gr. $\frac{1}{12}$ to gr. $\frac{1}{6}$ in a day. It does not accumulate in the system.

Adonis æstivalis, ad-o'nis ees-tiv-a'lis. Pheasant's eye, European species of Ranunculaceæ; vesicant, and used internally, in infusion of seeds, in colic. **A. anom'ala,** leaves are vesicant, as are also those of **A. Apenni'na**; latter is used internally to produce abortion. **A. Capen'sis,** species from Cape of Good Hope, leaves of which are used as substitute for cantharides. **A. cupania'na,** species growing in Sicily; active principle resembles adonidine, and is used as substitute for it. **A. grac'ilis,** leaves of this S. African plant are vesicant. **A. verna'lis,** ord. Ranunculaceæ. Indigenous in south of Europe, growing in U. States, usually prescribed in form of adonidine, or of infusion, aqueous extract, or tincture. (For properties of the plant as a heart tonic, see *Adonidine.*) The roots are purgative.

Adop'ter. See *Adapter.*

A'dor. Zea mays.

Adoral, ad-o'ral (*ad,* to, *os,* mouth). Near or connected with the mouth.

Adorbital, ad-or'bit-al (*ad,* to or near, *orbita,* orbit). Lacrymal bone of fishes (Owen).

Adorion, ad-o're-on. Carrot.

Adosculation, ad-os-ku-la'shun (*ad,* to, *osculor,* to kiss). Impregnation without complete penetration. Articulation in a cavity.

Adox'a moschatelli'na. Musk crow's foot, growing in Europe and America; ord. Caprifoliaceæ; antispasmodic.

A'dra ri'za (*hadros,* thick, *rhiza,* root). Aristolochia clematitis.

Adra'ragi. Crocus.

Adrenals, ad-re'nals (*ad, ren,* kidney). Suprarenal capsules.

Adrobolon, ad-ro-bo'lon (*hadros,* thick, *bolos,* mass). Bdellium of India.

A'dros (full). Applied to habit of body, and also to pulse.

Adrostral, ad-ros'tral (*ad,* to, *rostrum,* beak). Connected with anterior part of face; part of maxillary bone of some animals.

Adrostro-labial, ad-ros'tro-la'bi-al. Connected with the face and lip.

Ad'rue. Root of Cyperus articulatus, antiemetic aromatic of the West Indies.

Adsamar. Urine.

Adsaria pala, ad-sah're-ah pah'lah. Dolichos pruriens.

Adscensus, ad-sen'sus (ascent). Determination of blood to the head.

Ad'sia. Bignonia catalpa.

Adspection, ad-spek'shun (*ad,* to, *specio,* to see). Examination or inspection, as of an organ or patient.

Adspergo, ad-spur'go (sprinkling). Sprinkling with water, as spray, or dusting with fine powder.

Adspersio, ad-spur'se-oh. Adspergo.

Adspersus, ad-spur'sus (*ad,* to, *sparsus,* speckled). Spotted.

Adspiratio, ad-spir-ah'she-o (*ad, spiro,* to breathe). Aspiration, inspiration.

Ad'stans (*ad,* near, *sto,* to stand). Accessory (organ); prostate gland; nurse.

Adstites glandulosi, ad'ste-tes gland-u-lo'se. Prostate gland.

Adstriction, ad-strik'shun (*ad, stringo,* to bind). Astringent action; ligation; constipation.

Adstrictoria, ad-strik-to're-ah. Astringents.

Adstrictory, ad-strik'to-re. Astringent.

Adstrin'gens. Astringent. **A. Fothergil'lii,** kino.

Adstringentia, ad-strin-gen'she-ah. Astringents.

Adulas'so. Shrub in India used locally in gout.

Adult (*ad, oleo,* to grow). One who has reached full or legal age. **A. age,** virility, manhood; age succeeding adolescence and preceding old age; in common law, one of full age.

Adulterant, ad-ul'te-rant. Person or article producing adulteration.

Adulteration, ad-ul-te-ra'shun. Falsification; fraudulent addition of other matters to food, drugs, etc., for purposes of profit or deception. See *Falsification.*

Aduncatio unguium, ad-un-kah'she-o un'gwe-um (*ad, uncus,* hook, *unguis,* nail). Curvature of nails; onychogryphosis.

Adurens, ad-u'rens (*ad, uro,* to burn). Caustic.

Adurion, ad-u're-on. Rhus coriaria.

Adust (*aduro,* to burn). Term applied to blood and fluids when there is much constitutional heat, and but little serum in the blood.

Adustion, ad-ust'shun. Burn, cauterization; adust state.

Aduterum, ad-u'ta-rum. Oviduct of birds or lower portion of it.

Advancement, ad-vans'ment. Operation for strabismus, usually accompanied with tenotomy, in which the unaffected tendon is also cut and brought forward or advanced to better position to control the ball, or by shortening the muscle. **A. of round lig'aments,** Alexander's operation.

Advehens, ad've-hens (*ad, veho,* to carry). Going to a part, as a nerve or vessel.

Adventitia, ad-ven-tish'e-ah. External coat of blood-vessels; neurilemma. **A. capilla'ris,** external coat of capillary vessels.

Adventitious, ad-ven-tish'us. Accidental, unusual,

or acquired, as opposed to hereditary; as, *Adventitious diseases,* acquired diseases; *A. membrane,* false membrane; *A. murmurs,* accidental or acquired sounds heard on auscultation of the heart.

Ady'ao. Shrub used locally for headache, colic, etc.

Adynamia, ah-din-ah'me-ah (*a, dunamis,* strength). Weakness or want of power; debility of vital or muscular powers, as in typhoid fever. Some nosologists have grouped such diseases under the name Adynamiæ. **A. viri'lis,** impotence.

Adynamic, ad-in-am'ik. Affected with debility of vital powers; weak. **A. fever,** typhoid or other local form of fever. **A. sink'ing,** sinking or loss of power, observed in adynamic cases.

Adynamico-ataxic, ad-e-nam'e-co-a-taks'ik. Impaired in mental or bodily vigor and in power of muscular co-ordination.

Ady'namy. Adynamia.

Adynasia (ad-in-ah'ze-ah) or **Adynatia,** ad-in-ah'-she-ah. Adynamia.

Adynatocomium, ah-din-at-o-ko-me'um (*a, dunatos,* weak or sick; *komeo,* to take care of). Hospital.

Adynatocrasia, ah-din-at-o-kra'se-a (*a, dunatos,* strength, *krasis,* mixing). Abnormal looseness of texture of organic parts of body.

Adynatodochium, ah-din-at-o-dok-ke'um (*a, dunatos,* weak, *dechomai,* to receive). Hospital.

Adynatus, ah-din'at-us. Sickly.

Adyno- ner'vous fever. Typhoid fever; plague.

Aëchryson, ah-ek'ry-son. Sedum.

Ædicidium, e-sid'e-um (*aikia,* blow with whip). Wheal.

Ædœa, e-de'ah (*aidoia,* parts of generation). Genital organs.

Ædœagra, e-de'ah-grah (*aidoia,* genital organs; *agra,* seizure). Gout in the genitals.

Ædœagraphy (e-de-ag'ra-fe) or **Ædœography** (*ædœa, grapho,* to describe). Description of organs of generation.

Ædœalogy (e-de-al'o-je) or **Ædœol'ogy** (*ædœa, logos,* description). Treatise on organs of generation.

Ædœatomy (e-de-at'o-me) or **Ædœot'omy** (*ædœa, tome,* incision). Dissection of parts of generation.

Ædœauxe, e-de-auks'e (*ædœa, auxe,* increase). Tumefaction of genital organs.

Ædœci, e-de'se (*ædœa*). Diseases of genital organs.

Ædœitis (e-de-e'tis) or **Ædœititis,** e-de-it-e'tis (*ædœa, itis*). Inflammation of genital organs.

Ædœo'agra. Ædœagra.

Ædœoblennorrhœa, e-de'o-blen-nor-rhe'ah (*ædœa, blenna,* mucus, *rheo,* to flow). Mucous discharge or blennorrhœa from genital organs. **Æ. femina'rum,** leucorrhœa.

Ædœodynia, e-de-o-din'e-ah (*ædœa, odune,* pain). Pain in the genitals.

Ædœogargalis'mus or **Ædœogargarismus,** e-de-o-gar-gar-iz'mus (*ædœa, gargairo,* to vibrate). Masturbation, nymphomania.

Ædœogargalus, a-da-o-gar'gah-lus (*ædœa, gargalizo,* to tickle). Masturbation, nymphomania.

Ædœography, e-de-og'ra-fe. Ædœagraphy.

Ædœoïtis, e-de-o-e'tis (*ædœa, itis,* inflammation). Inflammation of genital organs.

Ædœology, e-de-ol'o-je. Ædœalogy.

Ædœomania, e-de-o-ma'ne-ah (*ædœa, mania*). Nymphomania.

Ædœomycoderma (e-de-o-mik-o-der'ma) or **Ædœomycodermis,** e-de-o-mi-co-der'mis, (*ædœa, mukos,* mucus, *derma,* skin). Mucous membrane of genital organs.

Ædœomycodermitis, e-de-o-mik-o-der-me'tis. Inflammation of mucous membrane of genital organs.

Ædœon, e-de'on (*aidoion,* the groin). Genital organ, groin.

Ædœopal'mus (*ædœa, palmos,* throbbing). Throbbing of genital organs.

Ædœopsia, e-de-op'se-ah (*ædœa, opsis,* vision). Ædœoscopy.

Ædœopsophesis (e-de-op-so-fa'sis) or **Ædœopsophia,** e-de-op-sof'e-ah (*ædœa, psopheo,* to make a noise). Emission of wind by urethra in man or vagina in woman. **Æ. uteri'na,** *Physometra.*

Ædœoptosis, e-de-op-to'sis (*ædœa, ptosis,* falling). Prolapse of genital organs or bladder. **Æ. u'teri,** prolapse of uterus. **Æ. vagi'næ,** prolapse of vagina. **Æ. vesi'cæ,** prolapse of bladder.

Ædœorraphe (e-de-or'raf-e) or **Ædœorrhaphia,** e-de-o-raf'e-ah (*ædœa, raphe,* suture). Episiorrhaphy.

Ædœoscopy (e-de-os'ko-pe) or **Ædœop'sy,** e-de-op'se (*ædœa, skopeo,* to view). Examination of organs of generation.

Ædœotitis, e-de-o-te'tis. Ædœitis, medeitis. **Æ. gangræno'sa,** colpocace. **Æ. gangræno'sa puella'rum,** colpocace infantilis. **Æ. gangræno'sa puerpera'rum,** colpocace puerperarum.

Ædœotome (e-de-ot'o-ma) or **Ædœotomia,** e-de-o-tom'e-ah. Ædœatomy.

Ædœotomy, e-de-ot'o-me. Ædœatomy.

Ædoptosis, e-dop-to'sis. Ædœoptosis. See *Hysteroptosis.* **Æ. u'teri,** prolapse of uterus. **Æ. u'teri inver'sa,** uterus, inversion of. **Æ. u'teri retrover'sa,** retroversio uteri. **Æ. vagi'næ,** prolapse of vagina. **Æ. vesi'cæ,** prolapsing of bladder, see *Exocyste.*

Ægagropila (e-gah-gro-pe'lah) or **Ægagropilus,** e-gah-gro-pe'lus (*aigagros,* rock goat, *pilos,* hair). Ball composed of hairs found in stomach of some animals, as the goat; once used medicinally.

Ægeiros, e-gi'ros. Black poplar.

Æger, e'ger. Sick.

Ægias, e'je-as (*aigis,* goat's skin). Ulcer or speck on transparent cornea.

Ægilops, e'gil-ops (*aix,* a goat, *ops,* eye). Ulcer at inner angle of eye, sometimes penetrating to lacrymal sac, constituting fistula lacrymalis. Inflammation of lacrymal duct.

Æginetia (e-jin-a'te-ah) **in'dica.** Malabar plant, used as antiscorbutic.

Ægiphila, e-gif'il-ah (*aix,* goat, *phileo,* to love). S. American plant, used for snake-bites.

Ægis, e'jis. Ægias.

Æg'le mar'melos (*aigle,* splendor). Covolam.

Æg'lia. Ægias.

Æ'go (*aix,* a goat). In composition, goat.

Ægobronchophony, e-go-bronk-of-o'ne (*aix,* goat, *bronchia, phone,* sound). Ægophony.

Ægoceras, e-gok'e-ras (*ægo, keras,* horn). Trigonella fœnum.

Ægolethron (e-gol'eth-ron) or **Ægol'ethros** (*ægo, olethros,* destruction). Goatsbane, Ranunculus ficaria.

Ægony, a'go-ne. Ægophony.

Ægonychon, e-gon'ik-on (*ægo, onux,* a hoof). Lithospermum officinale.

Ægophony, e-gof'o-ne. Ægophony.

Ægopodium podagraria, e-go-po'de-um pod-ag-rah'-re-ah (*ægo, podion,* little foot). *Gout weed* or *wort, Ash weed, English masterwort, Herb-Gerard.* Ligusticum podagraria.

Ægrippa, e-grip'pah. Agrippa.

Ægritudo, e-gre-tu'do (*æger,* sick). Sickness, disease. **Æ. ventric'uli,** nausea, vomiting.

Ægrotat, e'gro-tat (Latin word meaning "He is sick"). Medical certificate in English colleges to show that student is unfit for duty.

Ægrotatio, e-gro-tah'she-o (*æger,* sick). Disease.

Ægrotus, e-gro'tus. Sick.

Ægylops, e'gil-ops. Ægilops.

Ægyptia, e-jip'te-ah. Epithet for several medicines mentioned by older medical writers. **Æ. moscha'ta,** Hibiscus abelmoschus. **Æ. stypte'ria,** Egyptian alum. **Æ. ul'cera,** Egyptian ulcers; ulcers of fauces and tonsils once common in Egypt and Syria.

Ægyptiacum (e-jip-te'ak-um) or **Ægyption,** e-jip'-te-on. Preparation of vinegar, honey, and verdigris, formerly used by veterinary surgeons as a detergent.

Ægyptius pessus, e-jip'te-us pes'sus. Egyptian pessary; pessary of honey, turpentine, butter, oil of lily or of rose, and saffron and verdigris.

Æides, e-i'des. Deformed; condition itself being called æidea.

Æipatheia (e-i-path-i'ah) or **Æipathia,** e-i-path-e'ah (*aei,* ever, *pathos,* disease). Continuous disease, as

continued fever; disease continuing with suffering or without prospect of cure.

Æipathi'a. Aipathia.

Æluropsis, e-lu-rop'sis (*ailouros,* cat, *opsis,* vision). Cat's-eye, seen in Mongolians, in whom the palpebral fissure is oblique.

Æmoptoica passio, e-mop-to'e-kah pash'e-o (*haima,* blood, *ptuo,* to spit). Expectoration of blood.

Ænas afer, e-nas ah-fur. Spanish coleopterous insect employed for vesication.

Æncephalus, een-sef'a-lus. Anencephalus.

Ænea, e-ne'a (*æneus,* of brass). Catheter.

Æodœotomy, e-o-de-ot'o-me. Ædœotomy.

Æolanthus suavis, e-o-lan'thus swah'vis. Brazilian plant, ord. Labiatæ; diuretic.

Æolecthyma, e-o-lek'thim-ah (*aiolos,* of different colors, *ecthyma*). Small-pox.

Æollion, e-ol'le-on. Chicken-pox.

Æolodermous, e-ol-o-der'mus. Having skin of varying hue, as in nettle rash.

Æon, e'on. Entire age of man from birth till death. Spinal marrow.

Æonesis, e-o-na'sis (*aionao,* to moisten). Fomentation.

Æonion, e-o'ne-on. Sedum.

Æorah, e-o'rah. Suspension, as by apparatus; swinging, gentle exercise, as by riding, sailing, etc.

Æquator oculi, e-kwah'tor ok'u-le. Line formed by union of upper and under eyelid when they are closed. It is below the middle of the globe. Also largest circle that can be drawn upon the globe of the eye in transverse plane to axis.

Æquilibrium, e-kwil-ib're-um (*æquus,* equal, *libra,* weight). Term used in medicine to denote harmony of action of the different parts of the system.

Æquimanous, e-quim'an-us (*æquus,* equal, *manus,* hand). Ambidextrous.

Æquivocus, e-quiv'o-kus. Equivocal, as *E. generatio,* spontaneous generation.

A'ër. Air. **A. dephlogistica'tus,** dephlogisticated air; oxygen. **A. ingen'itus** or **inna'tus,** air in cavity of tympanum. **A. mephit'icus,** carbon dioxide. **A. pu'rus,** oxygen. **A. vita'lis,** oxygen; vital air.

Aëræmotoxia, ah-er-e-mo-toks'e-ah (*aër,* air, *haima,* blood, *toxicum,* poison). Toxic condition resulting from entrance of air into blood-vessels.

Aërate, a'er-ate. To furnish with fresh air; to ventilate; to supply oxygen to the blood through the lungs.

Aërated, a'er-ated. Supplied with fresh air or oxygen.

Aëra'tion. Act of supplying with fresh air or oxygen; converting venous blood into arterial; ventilation. **A. of blood,** oxygenation of blood, as in respiration in hæmatosis.

Aërdiaphthoroscope, a-er-di-af'thor-o-skope (*aërodiaphthora,* corrupt state of the air, *skopeo,* to see). Apparatus for determining amount of impurities in the air.

Aërendocardia, ah-er-en-do-kar'de-ah. Presence of air in endocardium or heart-cavities.

Aërenterectasia, ah-er-en-ter-ak-tah'se-ah (*aër, enteron,* intestine, *ektasis,* dilatation). Tympanites; flatulence.

Æ'resis (*airesis,* removal of anything). Suffix denoting removal or separation, as aphæresis, diæresis, etc.

Aërethmia, ah-er-eth'me-ah. Emphysema.

Aërethmopneumonia, ah-er-eth-mo-nyu-mo'ne-ah (*aër,* air, *ethmos—pneumonia*). Emphysema of the lungs.

Aërgia, ah-er'ge-ah (*a, ergon,* work). Torpor.

Aërhæmatox'ia or **Aëræmatoxia,** ah-er-e-mah-tox'-e-ah (*aër, haima,* blood, *toxikon,* poison). Poisoning by reception of air into the blood-vessels.

Aërhæmoctonia, ah-er-he-mok-ton'e-ah (*aër, haima,* blood, *ktonos,* killing). Death caused by entrance of air into a blood-vessel; embolism from similar cause.

Aërial, a-e're-al (*aër,* air). Relating to, consisting of, or resembling air; through the air as a medium, as *A. conduction, A. disinfection,* etc. **A. fis'tula,** fistula having communication with the air-passages, as from a wound.

Aëricolous, a-er-ik'o-lus (*aër, colo,* to dwell). Living in the open air.

Aërif'erous (*aër, fero,* to carry). Epithet for tubes conveying air, as the larynx, trachea, and bronchia.

Aërification, a-er-if-ik-a'shun (*aër, facio,* to make). Act of converting into air or of introducing air. **A. of lung,** pulmonary emphysema.

Aëriflux'us (*aër, fluo,* to flow). Discharge of gas and fetid emanations from the sick; flatulence.

Aëriform, a-er'e-form (*aer,* air, *forma,* form). Possessing the nature or form of air or gas.

Aërobia, ah-er-o'be-ah (*aër, bios,* life). Existence in an atmosphere containing oxygen. **A., fac'ultative,** acquired power of existing in air containing oxygen by an organism naturally anaërobic.

Aërobic, a-er-o'bik (same etymon). Term applied to organisms, such as some pathogenic bacteria, which require air or oxygen for their existence and growth.

Aërobion, ah-er-o'be-on (same etymon). Organism requiring air or oxygen in order to live and grow.

Aërobioscope, a-er-o-bi'o-skope (*aër, bios,* life, *skopeo,* to see). Instrument or apparatus for examining organisms living in the air.

Aëro'bious. Aërobic.

Aërocomia sclerocarpa, ah-er-o-ko'me-ah skler-o-kar'pah. Astringent S. American plant, used in leucorrhœa, diarrhœa, etc.

Aërodermecta'sia (*aër, derma,* skin, *ektasis,* dilatation). Emphysema.

Aërodiaph'thora (*aër, diaphthora,* corruption). Corrupt state of the air.

Aëroduc'tor (*aër, duco,* to lead). Instrument for keeping external orifice of the vagina open in delivery, to admit entrance of air to the child.

Aërodynamics, a-er-o-di-nam'iks (*aër,* air, *dunamis,* power). Science treating of the motion of air and its mechanical effects while in motion.

Aëroënterectasia, ah-er-o-en-tur-ek-tah'se-ah. Tympanites.

Aërogoniscope, a-er-o-gon'is-kope (*aër,* air, *gone,* seed, *skopeo,* to observe). Instrument devised for the purpose of collecting the organic dust from the air.

Aërography, a-er-og'ra-fe (*aër,* air, *grapho,* to write). See *Aërology.*

Aërohydrop'athy (*aër, hudor,* water, *pathos,* affection). Mode of treating disease, air and water being chief agents employed.

Aërol'ogy (*aër, logos,* description). Part of physics treating of air, its qualities, uses, and action.

Aëromancy, a'er-o-man-se (*aër, manteia,* divination). Foretelling by means of the air or substances found in the atmosphere.

Aëromanti'a. Aëromancy.

Aëro'meli (*aër, meli,* honey). Fraxinus ornus.

Aërometer, a-er-om'e-ter (*aër, metron,* measure). Apparatus for measuring density of air or gases.

Aëromicrobion, ah-er-o-mik-ro'be-on (*aër, mikros,* small, *bios,* life). Micro-organism requiring oxygen to sustain life.

Aëroperitonia, ah-er-o-per-e-to-ne'ah. Peritoneal emphysema, P. tympanites.

Aëropho'bia or **Aëroph'oby** (*aër, phobos,* fear). Dread of the air; symptom often accompanying hydrophobia, hysteria, and other affections.

Aërophob'icus or **Aëroph'obus** (same etymon). One affected with aërophobia.

Aërophone, a-er'o-fone (*aër, phone,* sound). Apparatus to produce distinct sound of voice at a distance.

Aërophore, a'er-o-for (*aër,* air, *phero,* to carry). Apparatus for conveying air to the lungs for the purpose of resuscitating new-born children.

Aërophorous, a-er-of'or-us (same etymon). Carrying or holding air; effervescent.

Aëroph'thora (*aër, phthora,* corruption). Corrupt state of the air.

Aërophyte, a'er-o-fite (*aër,* air, *phuton* plant). Plant growing and existing entirely in air.

Aëropleuria, ah-er-o-plu're-ah. Pneumothorax.

Aëropneumonasia (ah-er-o-nu-mon-az'e-ah) or **Aëropneumonectasia,** ah-er-o-nu-mon-ek-taz'e-ah (*aër, pneumon,* lung, *ektasis,* dilatation). Pulmonary emphysema.

Aërorra'chia, Aërorrha'chia, or **Aërorrha'chis** (*aër, rhachis,* spine). Accumulation of air in the spinal canal.

Aëroscope, a-er'o-skope (*aër, skopeo,* to see). Instrument for examination of the air and matters contained in it (aëros'copy).

Ae'rose (*æs,* copper). Possessing the qualities of copper.

Aërosis, ah-er-o'sis. Pneumatosis, tympanites.

Aërostatics, a-er-o-stat'iks (*aër,* air, *statikos,* causing to stand). Science treating of equilibrium of elastic fluids.

Aërotherapy (a-er-o-ther'a-pe) or **Aërotherapeutics,** a-er-o-ther-a-peu'tiks. Therapeutics directed to the air-passages. Application of air or gases as a means of treatment, pressure being varied.

Aërotho'rax. Pneumothorax.

Aërotonometer, a-er-o-ton-om'e-ter (*aër, tonos,* tension, *metron,* measure). Instrument for determining the tension of gases in the blood.

Aëroxerotes, ah-er-ox-er-o'tes (*aër, xerotes,* dryness). Dryness of the air.

Aërozoa, ah-er-o-zo'ah (*aër, zoon,* animal). Animals requiring air for their existence.

Aërteriver'sion (*aër, tereo,* to hold, *verto,* to turn). Mode of checking hemorrhage by eversion of cut extremity of an artery, self-invagination of the vessel, and fixation of the parts with a needle.

Aërua. E. Indian plant; root is used in strangury.

Æru'ca (*æs,* copper). Subacetate of copper.

Æru'ginous (*ærugo,* verdigris). Resembling verdigris in color, as bile when discharged from the stomach.

Æru'go (*æs, æris,* copper). Rust of any metal or its salts. **Æ. crystallisa'ta,** acetate of copper. **Æ. fer'ri,** ferri subcarbonas. **Æ. plum'bi,** plumbi subcarbonas.

Ærumna, e-rum'nah. Mental anxiety or worry.

Ærydriasis, ah-er-id-ry'ah-sis. Ærohydropathy.

Ærydropathia, ah-er-id-ro-path'e-ah. Ærohydropathy.

Ærysipelas, e-re-sip'e-las. Erysipelas.

Æs. Copper.

Æschos, ees'kos (*aischos,* deformity). Deformity.

Æschromythesis, ees-kro-mith-e'sis (use of obscene language). Verbal obscurity of delirious conditions.

Æschuyæ, ees-ky'e (obscene women). Tribodes.

Æschynomene (sensitiveness) **aspera,** ees-ky-nom'-e-ne as'per-ah. Species of E. Indies, used in dropsy. **Æ. grandiflora.** Species of E. Indies, having antipyretic properties.

Æs'culin. White, soluble crystalline glucoside, obtained from bark of various species of Æsculus, $C_{15}H_{16}O + 2H_2O_9$; antiperiodic.

Æsculus, ees'ku-lus. Genus of plants, nat. ord. Sapindaceæ, of which the following have been used medicinally: **Æ. glab'ra,** Ohio buckeye, fetid buckeye; used in congestion of liver. **Æ. hippocas'tanum,** horse-chestnut buckeye; native of Persia and India; bark has been advised as substitute for cinchona; bark and fruit are astringent. Externally it has been employed, like cinchona, in gangrene; oil of the seed is used for embrocation in gout and rheumatism. **Æ. macrostach'ya,** shrub of Southern States, having edible fruit. **Æ. pavi'a,** red buckeye of Southern United States; bark is antipyretic; fruit is tetanic, like strychnia. **Æ. rubicun'da,** Æ. pavia.

Æstates, ees-tah'tes (*æstas,* summer). Ephelides; lentigo; freckles.

Æsthe'ma (*aisthema,* sensation) (in plural **Æsthemata**). Apparatus of the senses.

Æsthematology, ees-the-ma-tol'o-je (*æsthema, logos,* discourse). Doctrine of, or treatise on, senses or apparatus of senses.

Æsthematonusi (ees-tha-ma-ton-u'se) or **Æsthematorganusi,** ees-tha-mah-tor-gan-u'se (*æsthema,* and *nousoi,* diseases). Diseases affecting sensation or organs of sense.

Æsthematorganon, ees-the-mah-torg'an-on (*æsthema,* sensation, *organon,* organ). Organ of sensation or of senses.

Æsthesia, ees-the'ze-ah. Æsthesis.

Æsthesimeter, ees-the-zim'e-ter. Æsthesiometer.

Æsthe'sin. Anhydrous compound occurring in the tissue of the brain.

Æsthesiogenic, ees-the-ze-o-gen'ik (*æsthesis,* sensation, *gennao,* to produce). Term applied to agents having special influence upon sensation or sensibility.

Æsthesiography, ees-the-ze-og'ra-phe (*æsthesis, graphe.* description). Description of sensorial apparatus.

Æsthesiology, ees-the-ze-ol'o-je (*æsthesis, logos,* discourse). Doctrine of, or treatise on, sensation or senses.

Æsthesiometer, ees-the-ze-om'e-tur (*æsthesis, metron,* measure). Measurer of sensation; instrument of beam-compass kind to indicate distance at which two points can be distinguished when brought in contact with any portion of cutaneous surface; such measurement is called *Æsthesiometry.*

Æsthesioneuro'ses. Disorders of the nervous system, of sensation, or of the senses. **Æ., vis'ceral,** sensory affections of internal organs.

Æsthesis (ees-tha'zis) or **Æsthe'sia** (*aisthesis,* sensation). Faculty of being affected by sensation; perception; sensibility, as well as senses themselves.

Æsthesodic, ees-the-zod'ik (*æsthesis, hodos,* way). Having faculty of conveying sensation; gray matter of cord has been called æsthesodic substance, being path of sensory impressions. *Kinesodic* is the antithesis to *Æsthesodic.*

Æstheterion (ees-tha-ta're-on) or **Æstheterium,** ees-tha-ta're-um (*æsthesis,* sensation). Sensorium.

Æsthetic, ees-thet'ik. Relation to sensation.

Æsthetica, ees-thet'e-kah (*aisthesis,* sensation). Diseases affecting sensations; dulness, depravation, or abolition of one or more external organs of sense; agents that affect sensation.

Æsthetics, ees-thet'iks. Science of sensation.

Æstival, ees'tiv-al. Relating to summer.

Æstivation, ees-tiv-a'shun. Dormancy of animal life during summer.

Æstuarium, ees-tu-ah're-um (*æstas,* summer). Stove; vapor bath; well-heated room.

Æstuation, ees-tu-a'shun. Ebullition; fermentation; heat of body or of the blood.

Æst'us (heat). Heat. **Æ. volat'icus,** sudden heat; scorching or flushing of the face.

Ætal, e'tal. Belonging to any age, as *Æ. changes of the teeth* in dentition.

Ætas, e'tas. Age. **Æ. bo'na,** adolescence. **Æ. decrep'ita,** decrepitude. **Æ. firma'ta,** period of full vitality. **Æ. in'euns,** childhood. **Æ. infir'ma,** old age. **Æ. ingraves'cens,** approaching old age. **Æ. in'tegra,** full adolescence. **Æ. ma'la,** old age. **Æ. matu'ra,** manhood. **Æ. me'dia,** middle age. **Æ. provec'ta,** old age. **Æ. pueri'lis,** boyhood. **Æ. senec'ta** or **seni'lis,** old age. **Æ. viri'lis,** adult age.

Æthales, ee'thal-ees. Evergreen. Sempervivens tectorum.

Ætheomma, e-the-om'mah (*aitho,* to burn, *omma,* eye). Leonine eye, humors and membranes of which are dark. Condition of eye characterized by flashes of light.

Æther, e'ther (*aither,* subtle air of upper regions). Naphtha; volatile liquid obtained by distillation from mixture of alcohol and concentrated acid. See *Æther sulphuricus* and *Ether.* **Æ. ace'ticus** or **aceto'sus,** acetic ether; ethyl acetate. **Æ. alcohol'icus,** spiritus ætheris. **Æ. ammoniaca'lis** or **ammoniaca'tus,** ether with ammonia. **Æ. am'ylo-nitro'sus** or **amyl'icus nitro'sus,** amyl nitrite. **Æ. anæsthet'icus** or **Æ. Aran'ii,** colorless liquid made by acting upon ethyl chloride or ethylidene dichloride with chlorine; prepared by Dr. Aran. **Æ. azo'ticus,** Æ. nitrosus. **Æ. benzo'icus,** benzoic ether; ethyl benzoate. **Æ. broma'tus,** ethyl bromide. **Æ. bromhy'dricus,** ethyl

bromide; hydrobromic ether. **Æ. butyr'icus**, ethyl butyrate. **Æ. cantharida'tus**, ethereal extract of cantharides; liquor epispasticus. **Æ. chlora'tus**, hydrochloric ether. **Æ. chlora'tus alcohol'icus**, spiritis ætherus. **Æ. chlorhy'dricus** or **chlorohy'dricus**, hydrochloric ether; ethyl chloride. **Æ. c. chlora'tus**, Æ. anæstheticus. **Æ. chlo'ricus**, chloric ether; chloroform. **Æ. cyp'ricus**, ethereal solution of copper sulphate, used in epilepsy. **Æ. ferra'tus**, compound of iron and ether. **Æ. for'micus** or **formi'cicus**, formic ether; ethyl formate. **Æ. for'tior**, stronger ether; see *Æther sulphuricus*. **Æ. Frobe'nii**, ethylic ether, after chemist Frobenius. **Æ. hy'dricus**, ethylic ether. **Æ. hydrio'dicus**, *Hydriodic* or *Iodhydric Ether, Iodide* of *Ethyl*. Obtained by mixing alcohol, iodine, and phosphorus and distilling; used for inhalation; ethyl iodide. **Æ. hydrobro'micus**, ether, hydrobromic; ethyl bromide. **Æ. hydrochlo'ricus**, hydrochloric ether; ethyl chloride; see *Æther muriaticus*. **Æ. hydrocyan'icus**, *Hydrocyanic* or *Prussic ether, Hydrocyanate* or *Cyanide of Ethylen* or *Ethyl*. Cyanide or cyanuret has been advised in whooping cough and where hydrocyanic acid is indicated. Dose, 6 drops. **Æ. ioda'tus**, ethyl iodide; iodine dissolved in ether. **Æ. iodhy'dricus**, hydriodic ether; ethyl iodide. **Æ. ligno'sus**, acetone. **Æ. lo'tus**, washed ether; ethylic ether deprived of alcohol by washing with water. **Æ. martia'lis**, tinctura sulphurico-ætherea ferri. **Æ. mercuria'lis**, ethereal solution of corrosive sublimate. **Æ. methyl'icus**, methylic ether. **Æ. muriat'icus**, *Muriatic, Chlorohydric, or Marine ether; Muriate of ethylen; Ethyl chloride*, C_2H_5Cl, made by action of muriatic acid on alcohol. Colorless liquid, used as a local anæsthetic, on account of its frigorific effects, in dentistry, minor surgery, opening of abscesses, facial neuralgia, etc. See *Æther sulphuricus*. A chlorinated chlorohydric or muriatic ether, Æther muriaticus trichloratus, Æther anæstheticus, formed by action of chlorine on chlorohydric ether, has been used as local anæsthetic. **Æ. muriat'icus alcohol'icus**, spiritus ætheris muriatici. **Æ. muriat'icus trichlora'tus**, see *Æther muriaticus*. **Æ. ni'trico-alcohol'icus**, spiritus ætheris nitrosi. **Æ. ni'tricus**, nitric ether. **Æ. ni'tricus alcoolisa'tus**, spiritus ætheris nitrosi. **Æ. nitro'sus**, ether, nitrous; ethyl nitrite. See *Spiritus ætheris nitrosi*. **Æ. petro'lei**, rhigolene. **Æ. phosphora'tus**, colorless liquid made by infusing phosphorus in ether. **Æ. phosphor'icus**, ethylic ether, made by decomposing alcohol with phosphoric acid. **Æ. Pruss'icus**, æther hydrocyanicus. **Æ. pu'rus**, pure ether; see *Æ. fortior*. **Æ. pyroace'ticus**, acetone. **Æ. rectifica'tus**, stronger ether. **Æ. spirituo'sus**, ethylic ether, spiritus ætheris. **Æ. sulphu'ricus**, *Æther* (Ph. U. S. and Br.), prepared by action of sulphuric acid on alcohol; colorless, very inflammable, volatile liquid, of penetrating and fragrant odor and hot pungent taste; s. g. 0.750 Ph. U. S. and 0.732 Ph. Br. *Æther fortior* (Ph. U. S.), stronger ether, is a liquid composed of about 94 per cent. of ethyl oxide and about 6 per cent. of alcohol, containing a little water; sp. gr. is not higher than 0.725 at 59° F., or 0.716 at 77° F. *Æthur purus* (Ph. Br.), pure ether, is made by agitating ether with chloride of calcium, lime, and water, decanting the ether after standing, and distilling off half the amount of ether used; s. g. 0.725. Used for inhalation as anæsthetic. Ether is diffusible stimulant, narcotic, and antispasmodic, and, externally, refrigerant. Dose, gtt. xxx to f℥iss. It has been prescribed internally also in capsules (pearls of ether), or externally by shaking up with white of egg in form of gelatinized ether. When inhaled, it is a valuable anæsthetic, employed in spasmodic affections and in surgical operations, or, externally, as local anæsthetic, in form of ether spray. See *Anæsthetic*. **Æ. sulphu'ricus a'cidus**, elixir acidum Halleri. **Æ. sulphu'ricus cum al'cohole aromat'icus**, spiritus ætheris. **Æ. sulphu'ricus alcoolisa'tus** or **cum alcoho'le**, spiritus ætheris. **Æ. terebinthina'tus**, terebinthinated ether, made by mixing alcohol, spirit of turpentine, concentrated nitric acid, and distilling; employed externally and internally in biliary calculi, rheumatism, etc. Dose, 20 to 40 drops in honey or yolk of egg. **Æ. valerian'icus**, valerianic ether; ethyl valerianate. **Æ. vitri'oli** or **vitriol'icus**, Æther sulphuricus.

Æthe'rea. Term given formerly to preparations of ether. **Æ. herba**, eryngium maritimum.

Æthereal, e-the're-al. Ethereal, ethereous. Ethereal tincture is one formed by action of sulphuric ether, at ordinary temperature, on medicinal substances. Ethereal oil is a volatile oil.

Æthereo-oleosa (e-tha'ra-o-o-la-o'sah) **remedia** (*ætheroleum*, volatile oil). Remedies whose properties depend upon the volatile oil they contain.

Æthereus (e-tha'ra-us) or **Ætherius**, e-tha'rius. Relating to ether; ethereal.

Æthe'rial. Ethereal.

Ætherisatio, e-tha-re-zah'she-o. Etherization.

Ætherisatus, e-tha-re-zah'tus. Etherized.

Ætherismus, e-tha-ris'mus. Etherism.

Ætherolea, e-tha-ro'la-ah. Volatile oils.

Æthiopification, e-the-o-pe-fik-a'shun (*æthiops*, black, *facio*, to make). Mummy-like coloring of skin induced by use of mercurial or sulphur ointment, or of nitrate of silver internally, and seen in bodies poisoned by arsenic.

Æthiopismus, e-the-o-pis'mus. Æthiopification.

Æthiopoleucophlegmatia, e-the-o-po-leu-ko-fleg-mah'she-ah (*æthiops*, *leukos*, white, *phlego*, to inflame). Phlegmasia or chlorosis of negroes.

Æthiopopoesis, e-the-o-po-po-a'sis (*poieo*, to make). Æthiopification.

Æthiopoprocalymma, e-the-o-pop-rok-a-lim'mah (*æthiops*, *prokalumma*, a veil). Hottentot apron.

Æthioposis, e-the-o-po'sis. Æthiopification.

Æthiops, e'the-ops (*aitho*, to burn, *ops*, countenance). Black or burnt countenance; æthiopian; negro. Ancient name of certain black oxides and sulphurets of metals. **Æ. al'bus**, albino; hydrargyrum cum cretâ. **Æ. alcalisa'tus**, hydrargyrum cum cretâ. **Æ. anima'lis**, impure animal charcoal; see also *Choroidea tunica*. **Æ. antimonia'lis**, compound of æthiops mineral and sulphide of antimony. **Æ. creta'ceus**, hydrargyrum cum cretâ. **Æ. fer'ricus**, Æ. martialis. **Æ. martia'lis**, *Martial Ethiops;* black deutoxide of iron, once in repute as a tonic. **Æ. mercuria'lis**, hydrargyri sulphuretum nigrum. **Æ. minera'lis**, hydrargyri sulphuretum nigrum. **Æ. narcot'icus**, hydrargyri sulphuretum nigrum. **Æ. per se**, hydrargyri oxidum cinereum. **Æ. pur'gans**, mercury with calomel or jalap. **Æ. sacchara'tus**, hydrargyri saccharatum. **Æ. vegetab'ilis**, see *Fucus vesiculosus*.

Æthiopsis, e-the'op-sis. Salvia sclarea.

Æthiopus, e-the'o-pus. Æthiops.

Æthmoid, eeth'moyd. Ethmoid.

Æthogen, e'tho-gen (*aithon*, brilliant, *gennao*, to produce). Ethogen; compound of boron and nitrogen, which gives a very brilliant light when heated with the blowpipe.

Ætholices, e-thol'e-ces, pl. of **Ætholix** (*aitho*, to burn, *helios*, sun). Fiery pustules on the skin; bullæ; boils.

Æthusa, e-thu'sah (*aitho*, to burn). Ammi, Sison ammi. **Æ. cyna'pium**, fool's parsley, nat. ord. Umbelliferæ. Poisonous European plant mistaken for true parsley, producing vomiting, giddiness, sopor, and at times fatal results; diuretic and emmenagogue. **Æ. me'um**, spignel, baldmoney; the root has been advised as carminative, stomachic, etc.

Æthusine, e-thu'zeen. Poisonous alkaloid, active principle of Æthusa cynapium.

Æthyl, e'thil. Ethyl. **Æ. bro'midum**, ethyl bromide. **Æ. chlor'idum**, ethyl chloride. **Æ. io'didum**, ethyl iodide.

Æthylaldehyde, eth-il-al'de-hide. Acetaldehyd.

Æthylenum, eth-il-a'num. Ethylene. **Æ. bichlora'tum** or **bichloridum**, ethylene bichloride. **Æ. chlora'tum**, ethylene bichloride.

Æthylices, eth-il'e-ses. Ætholices.

Æthylicodes, eth-il-ik-o'des. Bullar.

Æthylidenum, eth-il-id-e'num. Ethylidene. Æ.

bichlora'tum, ethylidene chloride. **Æ. chlora'tum**, ethylidene chloride.

Æthylum, eth'il-um. Ethyl. **Æ. bromatum** (bromah'tum), ethyl bromide. **Æ. chlora'tum**, ethyl chloride. **Æ. ioda'tum**, ethyl iodide.

Æ'tia (cause). Cause of disease.

Ætioi phlebes, e'te-oi fla'bes (eagle veins). Temporal veins.

Ætiologist, e-te-ol'o-gist. One who investigates causes of disease.

Ætiology or **Etiology**, e-te-ol'o-je (*aitia*, cause, *logos*, discourse). Doctrine of causes of disease.

Ætionymous, e-te-on'im-us (*aitia*, cause, *onoma*, name). Named according to cause, as lead paralysis, mercurial tremor, etc.

Ætites (e-te'tase) or **Aëtites** (*aëtos*, an eagle). Eagle-stone. Formerly supposed to facilitate delivery if bound on the thigh, and to prevent abortion if bound on the arm.

Ætonychum, e-ton'e-kum. Lithospermum.

Æxtoxicum, eaks-toks'e-kum. Ægotoxicum.

Af, as a prefix to. See *Ad.*

Afebrile, ah-feb'ril (*a*, *febris*, fever). Without fever.

Af'fadil. Narcissus pseudo-narcissus.

Affect'. See *Affection.*

Affectio, af-fek'she-o (*affecto*, to move or influence). Affection, disease. **A. arthrit'ica cor'dis**, cardiagra. **A. eveli'aca**, obstruction of bowels. **A. hypochondri'aca**, hypochondriasis. **A. hyster'ica**, hysteria. **A. Sarmat'ica**, plica. **A. scorbu'tica pustulo'sa**, pemphigus. **A. tympanit'ica**, tympanites. **A. uteri'na**, hysteria.

Affection, af-fek'shun. Mode in which mind or body is affected or modified; disease.

Affectiones animi, af-fek-she-o'nes an'e-me. Affections of the mind, as passions, sensations, etc.

Affec'tive. That which affects, touches, etc. *Affective faculties*, functions dependent upon organization of the brain, comprising sentiments, affections, etc. **A. insan'ity**, emotional insanity.

Affectus, af-fek'tus. Morbid condition; passion. **A. an'imi**, affections of the mind. **A. fau'cium pes'tilens**, cynanche maligna. **A. flatulen'tus**, hypochondriasis. **A. hydero'des**, dropsy. **A. hyster'icus**, hysteria. **A. implica'tus**, disease complicated with other affections. **A. mag'nus**, epilepsy. **A. melancholi'cus**, melancholy. **A. præcordia'lis**, hypochondriasis. **A. spasmod'ico-convulsi'vus labio'rum**, neuralgia, facial.

Afferent, af'fe-rent (*affero*, to carry). Centripetal, esodic. Conveying inward, as from periphery to centre. **A. nerve**, nerve conveying impressions to nervous centres. **A. ves'sel**, vessel conveying contents to central portions of the body.

Affinity, af-fin'it-e. In chemistry, the attraction occurring between heterogeneous substances and forming compounds. In medicine this term implies the predilection shown by diseases to affect certain parts. **A. of aggrega'tion**, attraction and cohesion. **A. of composi'tion**, tendency of several substances to combine and form new matter without affecting any compound existing before. **A., compound**, in chemistry, denotes the tendency shown by two or more bodies to unite and form a compound. **A., divel'lent**, term denoting the force leading to formation of new compounds through decomposition of the old ones. **A., elec'tive**, affinity shown by one body for combining with a certain other. **A., interme'diate**, affinity by which a substance is capable of causing direct combination with other substances which possess no affinity for one another. **A., quies'cent**, affinity which keeps the dissimilar elements of a compound united.

Affion (af'fe-on) or **Affium.** Opium; crude opium; electuary of which opium is basis.

Afflatus, af-flah'tus (*af*, *flo*, to blow). Air striking the body and producing disease. Expulsion of flatus; belching; sudden attack of erysipelas.

Affluence (af'flu-ence) or **Af'flux** (*affluo*, to flow to). Flow or determination of humors, particularly of blood, toward a part. Accumulation of fluid in part or organ. Fluxion.

Affluent, af'fluent. Flowing toward a part or organ, or accumulating in it.

Afflux, af-fluks. Affluence.

Aff'rodile. Daffodil, Narcissus pseudo-narcissus.

Affunena, af-fu-na'nah. Plant of Guinea with purgative properties.

Affuse, af-fuse' (*affundo*, to pour upon). To sprinkle.

Affusio, af-fu'zhe-o (*ad*, *fundo*, to pour). Affusion or suffusion; infusion; cataract. **A. frig'ida**, cold affusion. **A. oc'uli**, cataract. **A. orbicula'ris**, placenta.

Affusion, af-fu'zhun. Action of pouring liquid on any body. Affusions, cold and warm, are used in different diseases. Cold affusion consists in placing patient in tub and pouring cold water over him, then wiping him dry and putting him to bed. Precaution is necessary to use it in state of greatest heat and exacerbation to reduce fever and quiet excited nervous conditions, not when chilliness or topical inflammation is present.

Afiac. Vitex trifolium (Madagascar).

Af'ioun, Af'ium, or **Af'iun.** Opium.

Af'oba. Plant of Guinea used for scabies.

Afœ'tal, a-fe'tal. Without fœtus.

Af'rican date-mark. Biskra button. **A. fe'ver**, malignant malarial fever. **A. leech**, leech from Algiers, in Africa. **A. leth'argy**, fatal sleep disease or sleeping sickness, to which negroes of West Africa are subject, sleepiness being the chief symptom; the arachnoid membrane is found on post-mortem examination to be hyperæmic. **A. sleep disease**, A. lethargy.

Afsantin, af-san'tin. Arabian name for wormwood.

After-action. Brief negative variation in electric current after spasm of a muscle.

Af'ter-birth. Placenta, umbilical cords, and membranes expelled after birth of child; placenta alone.

After-brain. Fifth cerebral vesicle of embryo.

After-burthen. After-birth.

After-cat'aract. Secondary cataract.

After-damp. Irrespirable atmosphere following explosion of fire-damp. See *Hydrogen, carburetted.*

After-im'ages. Impressions remaining upon retina after illuminated object is removed; when the image is simply prolonged, the after-image is said to be positive; when seen in complementary colors, negative.

After-pains. Pains after labor, resulting from uterine contractions.

After-percep'tion. Appreciation of impression on sensory organs after withdrawal of cause producing it.

After-produc'tion. Neoplasm or new formation.

After-sensa'tion. Continuance of impression after withdrawal of stimulating cause.

After-shaft. Hollow in small of back.

After-treatment. Subsequent treatment of a case, as after operation.

Af'yun. Affion.

Ag, in composition, to. See *Ad.*

A'gah. Intermittent fever.

A'gal. Agallochum.

Agalactatio (ah-gal-ak-tah'she-oh) or **Agalactia**, ah-gal-ak'te-ah (*a*, *gala*, milk). Absence of milk in the mammæ; defective lactation.

Agalactos, ah-gal-ak'tos (same etymon). Without milk; having deficiency of milk.

Agalactous, ah-gal-ak'tus (same etymon). Without milk; not naturally nursed (referring to infant). Having property of checking lactation.

Agalasia, ah-gal-az'e-ah. Agalactia. **A. contagio'sa**, epidemic disease attacking sheep and goats, in which there is diminution or absence of secretion of milk.

Agalax, ah'gal-acks. Agalactous.

Agalaxia (ah-gal-aks'e-ah) or **Agalaxis**, ah-gal-ak'sis. Agalactia.

Agalaxy, ah-gal'aks-e. Agalactia.

Agalloch, ag-al'lok. Agallochum.

Agallochum, ag-al'lo-kum (*agallo*, to decorate). Aloes-wood. Resinous aromatic wood of E. Indies.

Agalorrhœa, ah-gal-or-rhe'ah (*a*, *gala*, milk, *rheo*, to flow). Stoppage of secretion of milk.

Agamic, a-gam'ik (*a, gamos,* marriage). Without sex; not of sexual origin; generating without impregnation.

Agamogen'esis (*a, gamos,* marriage, *genesis,* generation). Reproduction without sexual intercourse.

Agamonema, ah-go-mon-e'mah (*a, gamos,* marriage, *nema,* thread). Germs of nematode worms.

Agamone'matode (*agomonema, eidos,* resemblance). Larval condition of agomonema, existing in intestinal canal or peritoneal cavity of some animals.

Agamous, a'gam-us (*a, gameo,* to marry). Without sexual organs; reproducing without intercourse, as in budding; cryptogamous.

Aganactesis, ah-gan-ak'te-sis (*aganakteo,* to feel pain). Pain.

Aganobleph'aron (*aganos,* mild, *blepharon,* eyelid). Abnormal adhesion of the eyelids.

Aganostakis, ag-an-os'ta-kis. Ophthalmoscope was so-called, being the name of a young Greek physician who claimed to have invented it.

A'gar-agar. Japanese or Bengal isinglass, consisting of dried sea-weed, used as food; species of Algæ used as medium for bacterial cultures, and in medicine to make suppositories.

Ag'aric. See *Agaricus.* **A. acid,** agaricin. **A., ed'ible,** Agaricus edulis. **A. of oak,** Agaricus chirurgorum. **A., white,** Agaricus albus.

Agaricin, ag-ar'is-in. White active principle of Agaricus albus, given in night sweats of phthisis; alkaloid from various species of Agaricus. Dose, gr. $\frac{1}{20}$–$\frac{1}{15}$.

Agaricin'ic acid. Agaricin.

Agaricum, ag-ar'ik-um. Agaricus.

Agaricus, ag-ar-ik'us. Genus of plants, Agaricini, or mushrooms, some of which are edible, others poisonous. The edible variety has received several names—A. campestris, A. edulis, A. arvensis, A. sylvaticus. A. odoratus is also similarly employed. **A. al'bus,** white agaric, parasitic fungus on the European larch, cathartic and emetic, used in night sweats of phthisis. Dose, gr. xxx–℥j. **A. arven'sis,** see *Agaricus.* **A. auranti'acus,** delicate variety of genus Amanitæ, that must not be confounded with A. pseudo-aurantiacus, which is very poisonous. **A. auriculæfor'mis,** Peziza auricula. **A. campes'tris,** see *Agaricus.* **A. chirurgo'rum,** variously called spunk, amadou, punk, agaric of the oak, touchwood, boletus, female agaric, tinder, has been used as moxa. **A. edu'lis,** A. campestris. **A. ignia'rius,** A. albus. **A. lar'icis,** A. albus. **A. musca'rius,** fly agaric, fungus amanita muscaria, growing in Europe, from which the alkaloid muscarine is obtained. **A. neca'tor,** poisonous variety. **A. præpara'tus,** A. chirurgorum. **A. psuedo-aurantia'cus,** poisonous fungus of genus Amanitæ. **A. quer'cus** or **querci'nus,** A. chirurgorum. **A. sylvat'icus,** A. campestris.

Agaster, ah-gas'tur (*a, gaster,* stomach). Devoid of stomach or alimentary canal.

Agas'tor (*a, gaster,* uterus). Without uterus; agaster.

Agas'tric (*a, gaster,* stomach). Without digestive organs.

Agastronervia, ah-gas-tro-nur've-ah (*a, gaster,* stomach, *neuron,* nerve). Want of nervous action or power in the stomach.

Agastronomia, ah-gas-tro-no'me-ah (*a, gaster,* stomach, *nomos,* rule). Agastronervia.

Agastrozo'a (*a, gaster,* stomach, *zoon,* animal). Agastric animals.

Agasyllis galbanum, ag-as-il'lis gal'ban-um. Bubon galbanum.

Agathin, ag'ath-in. Salicyl-aldehyde-methyl-phenyl-hydrazone. Small white leaflets, insoluble in water, used in sciatica, neuralgia, and rheumatism. Dose, 0.5 gramme, or 7½ grains, two or three times daily; analgesic and antithermic.

Agathis damarra, ag'ath-is dam-ar'rah (*agathis,* clew of thread). Pinus damarra.

Agathodes angustifolia, ag-ath-o'des an-gus-te-fo'le-ah. Species of Gentianaceæ; bitter root is tonic and antipyretic.

Agathophyllum aromaticum, ag-ath-o-fil'lum ar-o-mat'ik-um. Tree of Madagascar; fruit is stimulant; leaves are condiment.

Agathosma crenata, ag-ath-os'mah kren-at'ah (*agathos,* good, *osme,* odor). Diosma crenata.

Agathotes chirayita (a-gath'o-tes ke-ray-i'tah) or **chiray'ta** (*agathotes,* goodness). Gentiana chirayta.

Agave, ah-ga've (*a, agauos,* admirable). Genus of plants, nat. ord. Amyrillidaceæ, of which several have been used in medicine. **A. America'na,** *American agave, American aloe, Century plant, Maguey.* This plant of tropical America is diuretic, antisyphilitic, laxative, and emmenagogue. **A. lu'tea,** species growing in Mexico; from juice of leaves a pectoral syrup is prepared. **A. Mexica'na,** juice is diuretic, laxative, and emmenagogue. **A. potato'rum,** Mexican plant, same properties as A. salmiana. **A. ramo'sa,** A. Americana. **A. salmia'na,** species of A. growing in Mexico; leaves are rubefacient; root is diuretic; sweet juice of plant, *aguamiel,* is called pulque when fermented; when pulque is distilled, a brandy is obtained, called *mezcal* or *aguardiente de maguey.* **A. virgin'ica,** rattlesnake's master, false aloe, grows in Southern States. Root very bitter; has been used in tincture as carminative in colic, and as remedy for bites of serpents.

Age. Period of life; time that has elapsed since birth. Five ages are often designated. 1. First infancy, infantia; 2. Second infancy, pueritia; 3. Adolescence; 4. Adult or virile age, manhood or womanhood; 5. Old age. **A., adult',** see *Age.* **A. of consent',** legal age of consent to sexual intercourse. **A. of matu'rity,** adult or virile age. **A. of pu'berty,** see *Puberty.* **A. of viril'ity,** see *Age.*

Agelæ'a emet'ica. Madagascar plant; leaves are emetic. **A. Lamarckii,** Madagascar plant, used for dysentery and gonorrhœa.

Ageneios, ah-gen-i'os (*a, geneion,* beard). Beardless.

Agenesia (ah-gen-a'ze-ah) or **Agenesis,** ah-gen'e-sis (*a, genesis,* generation). Impotence; imperfect development of any part. **A., cer'ebral,** imperfect development of brain in fœtus. **A. rec'ti,** imperforate anus.

Agennesia (ah-gen-na'ze-ah) or **Agennesis,** ah-jen'ne-sis (*a, genesis,* generation). Impotence, sterility; absence of any sexual organ. Agenesia.

Agenosomus, ah-gen-os-o'mus (*a, gennao,* to generate, *soma,* body). Monster with malformation in which fissure and eventration are chiefly in lower part of the abdomen—urinary or sexual apparatus is absent or very rudimentary. Condition is called *Agenoso'ma.* See *Celosoma.*

Agent, a'jent (*ago,* to act). Any power producing or tending to produce effect on the body. Morbific agents are causes of disease; therapeutical agents, means of treating it.

A'ger natu'ræ. Field of nature; uterus.

Agerasia, ah-ger-az'e-ah (*a, geras,* old age). Vigorous old age.

Ager'asy. Agerasia.

Ageratum, ah-je'rat-um. Achillea ageratum. **A. altis'simum,** Eupatorium ageratoides. **A. ptar'micum,** species having sialagogue and errhine properties.

Agerazia, ah-ger-ah'ze-a. Agerasia.

A'ges (wicked). Palm of hand (because sometimes employed in evil deeds).

Ages'ter. Without stomach or alimentary canal.

Ageusia (ah-gu'se-ah), **Ageusis** (ah-gu'sis), or **Ageustia,** a-goost'e-ah (*a, geusis,* taste). Diminution or loss of taste; anæsthesia of the tongue; disease of organ or sense of taste.

Ageustus, a-goos'tus. Affected with ageusia; not tasted.

Agger, ag'ger. Prominence or projection. **A. auric'ulæ,** ridge on middle surface of outer ear, on which is inserted retrahens aurem muscle. **A. na'si,** rudiment of nasal turbinate bone of lower animals, seen in man at anterior free extremity of middle turbinate bone. **A. perpendicula'ris,** A. auriculæ. **A. pontic'ulus,** A. auriculæ. **A. valvula'rum,** projection at base of valves of a vein.

Agglom'erate (*agglomero,* to collect together). Col-

lected together; a term applied to tumors or glands in aggregation. **A. glands**, glands of Peyer.

Agglutinant, ag-gloo'te-nant (*ag, gluten*, glue). Joining or gluing together; remedies considered capable of uniting divided parts; some plasters which adhere strongly to the skin and certain bandages are so termed.

Agglutinate, ag-gloo'te-nate. To reunite, as lips of a wound.

Agglutina'tio. Agglutination. **A. maxil'læ inferio'ris**, lockjaw. **A. pilo'rum**, cure of ingrowing lashes by application of glutinous material.

Agglutination, ag-gloo-te-na'shun. First degree of adhesion; action of agglutinants; coition.

Agglutinative, ag-gloo'te-na-tive. Having power of producing adhesion, as collodion, etc.

Aggluti'tio. Obstruction of œsophagus; dysphagia.

Aggrava'tion. Increase in severity of disease.

Ag'gregate (*aggrego*, to flock together), massed together. Glands are called aggregate which are in clusters, such as Peyer's glands. Aggregate pills were those believed to contain properties of a number of medicines, and to supply their place.

Aggur or **Aghar.** Aloes-wood.

Agheustia, ah-goost'e-ah. Ageustia.

Aghoul. Agul.

Agis. Thigh.

Agitation, adj-e-ta'shun (*ago*, to act). Constant and fatiguing motion of the body or distressing restlessness; mental inquietude.

Agitator caudæ, ah'je-ta-tor kau'da. Muscular fascicle, especially of the lower animals, passing from side of coccyx and last sacral vertebra to femur.

Agitatorius, adj-e-tah-to're-us. Convulsive.

Aglactation, ag-lak-ta'shun. Agalactia.

Aglaxis, ag-laks'is. Agalactia.

Aglia, ag'le-ah. See *Ægias*.

Ag'lithes. Bulbs or cloves of garlic.

Aglobu'lia (*a, globulus*, globule). Anæmia; diminution in number of red blood-corpuscles.

Aglossia (ah-glos'se-ah) or **Aglot'tia** (*a, glossa*, tongue). Malformation consisting in want of tongue; dumbness.

Aglossostoma, ah-glos-sos'to-mah (*aglossia*, and *stoma*, mouth). Mouth without a tongue.

Aglossostomography, a-glos-sos-to-mog'ra-fe (*a, glossa*, tongue, *stoma*, mouth, *grapho*, to describe). Description of mouth without a tongue.

Aglossus, ah-glos'sus (*a, glossa*, tongue). Without a tongue.

Aglottia, ah-glot'te-ah. Aglossia.

Aglutition, ah-glu-tish'un (*a, glutio*, to swallow). Hybrid term designating impossibility of swallowing.

Ag'ma. Fracture.

Agmatology, ag-ma-tol'o-je (*agma, logos*, description). Treatise on fractures.

Ag'me. Fracture.

Agmina digitorum manûs, ag'min-ah dij-e-to'rum ma'nus (*agmen*, phalanx). Phalanges of fingers. **A. membra'na**, amnion. **A. Pey'eri**, Peyer's glands.

Agminate, ag'min-ate. Grouped together. **A. follicles** or **glands**, Peyer's glands.

Ag'mos. Fracture.

Ag'nail. Hangnail.

Agnathia, ag-nath'e-ah (*a, gnathos*, jaw). Malformation consisting in want of the jaw, especially of the lower jaw.

Agna'thus. One with congenital absence of jaw or jaws.

Agnina membrana, ag-ne'nah mem-bran'ah (*agnus*, lamb). Amnion.

Ag'nine (*agnus*, lamb). Fatty matter obtained from wool. See *Lanoline*.

Agnœa (ag-ne'ah) or **Agnoia**, ag-noy'ah (*agnoia*, ignorance). State of patient who does not recognize individuals.

Ag'nus cas'tus. Vitex or chaste-tree. **A. christ'us**, Ricinus communis.

Agoge, a-go'ge (*ago*, lead). Order or condition of disease. State of the air.

Agogue, ag-og' (*agogos*, a leader). A suffix denoting driving or expelling, as cholagogue, driver or expeller of bile; hydragogue, expeller of water, etc.

Agomphiasis (ah-gom-fe'as-is) or **Agomphosis**, ah-gom-fo'sis (*a, gomphosis*, fastening by wedges). Looseness of teeth.

Agom'phious (same etymon). Without teeth.

A'gon (*agon*, combat). Agony; last struggle before death. Cichorium intybus.

Agone, ag'o-na (*agonos*, barren). Hyoscyamus.

Agonia, ag-o'ne-ah (*agon*, combat). Agony.

Agon'ia (*agonos*, barren). Sterility. **A. bark**, bark of Plumifera lancifolia; used in fevers. A glucoside called *Agoni'adin* has been obtained from it.

Agon'isis, Agonis'ma, or **Agonis'mus.** Agony.

Agonistica (ag-o-nis'te-kah), **Agonis'ticon**, or **Agonis'ticum** (*agon*, combat). Part of ancient gymnastics, having reference to combats of athletæ. Also, very cold water, given internally to calm febrile heat.

Agonizans, ag-o-ne'zans. One who is moribund.

Ag'onos (*agonos*, barren). Sterile; impotent; unborn.

Agony, ag'o-ne (*agon*, combat). *Throe, Patient of death.* Last struggle of life, characterized by great change in features, gradual abolition of sensation and motion, loss of voice, dryness or lividity of tongue and lips, rattling in the throat, small and intermittent pulse, and coldness of extremities. Intense suffering.

A'gor. Aloes-wood.

Agori'adin. Glucoside, $C_{10}H_{14}O_6$, from bark of Agoriada of Brazil; antiperiodic.

Agorophobia, ag-or-o-fo'be-ah (*agora*, market-place, *phobos*, fear). Nervous condition marked by fear of open spaces; dread of living alone.

Agos'tos or **Agos'tus** (*ago*, to lead). Forearm from elbow to fingers; palm of hand.

A'gra (*agreo*, to seize hold of). Seizure, as odontagra, tooth seizure, toothache; podagra, pain in the feet, gout, etc.

Agraha'lid. Agiahalid.

Agrammatism, a-gram'ma-tism (*a, gramma*, mark or letter). Incapacity to form words grammatically, or to group them intelligibly in a sentence.

Agraphia, ah-graf'e-ah (*a, grapho*, to describe, to write). Form of cerebral disorder in which there is, as in aphasia as regards speech, total or partial inability to express ideas by written symbols. **A. litera'lis**, aphasia, with inability to form letters. **A. verba'lis**, aphasia, in which, after letters are formed, words are improperly formed or connected. See *Aphasia*.

Agrelco'sis, ag-rel-ko'sis. Agrielcosis.

Agremia, ag-ra'me-ah (*agra, aima*, blood). Altered condition of blood in gout; gout.

Agria, ag're-ah (*agrios*, wild). Term applied to several severe forms of skin disease, as herpes, lichen, etc.; malignant pustule. Holly.

Agriampelos, ag-re-am'pe-los (*agrios*, wild, *ampelos*, vine). White bryony.

Agrielæa (ag-re-el-e'ah) or **Agrielaia**, ag-re-el-i'ah (*agrios*, wild, *elaia*, olive tree). Wild olive tree.

Agrielcosis, ag-re-el-ko'sis (*agrios*, wild, *helkosis*, ulceration). Malignant ulceration.

Agrifolium, ag-re-fo'le-um. Ilex aquifolium.

Agrimonia, ag-re-mo'ne-ah. Agrimony. *Cocklebur, Stickwort.* Nat. ord. Rosaceæ, including A. eupatoria or A. odorata, A. officinalis or vulgaris agrimony, and A. parviflora, small-flowered or sweet-scented agrimony. A. eupatoria is tonic and astringent. See *Agrimony*.

Ag'rimony. See *Agrimonia*. Mild astringent and stomachic. Dose, in powder, from ℈j to ʒj. **A., hemp**, Eupatorium cannabinum. **A., small-flowered**, see *Agrimonia*. **A., sweet-scented**, see *Agrimonia*.

Agriocastanum, ag-re-o-kast'an-um (*agrios*, wild, *kastanon*, chestnut). Bunium bulbocastanum, lycoperdon, tuber.

Agriocinara, ag-re-o-sin'ar-ah (*agrios*, wild, *kinara*, artichoke). Sempervivum tectorum.

Agriococcimelea, ag-re-o-cok-sim-el-e'ah (*agrios*, wild, *kokkos*, berry, *melon*, apple). Prunus spinosa.

Agriophyma, ag-re-of-e'mah (*agrios*, wild, *phuma*, growth). Malignant swelling.

Agriopso'ra, (*agrios, psora*, itch). Obstinate itch or scabies.

Agrioriganum, ag-re-o-rig'an-um (*agrios*, wild, *origanon*, marjoram). Sweet marjoram.

Agrioselinum, ag-re-o-sel-e'num (*agrios*, wild, *selinon*, parsley). Smyrnum olusatrum.

Agriothymia, ag-re-o-thim'e-ah (*agrios*, wild, *thumos*, disposition). Ferocious, maniacal, or homicidal insanity. **A. hydrophob'ica,** furious mental condition of rabies.

Agripalma gallis, ag-re-pal'mah gal'lis (*agrios*, wild, *palma*, palm). Leonurus cardiaca.

Agrippa, ag-rip'pah (*æger partus*, difficult birth; perhaps *agra*, taking or seizure, *pous*, foot). One born by the feet. The family of Agrippa are said to have obtained their name from this circumstance. Parturition where feet present is called agrippæ or agrippinus partus.

Agrius, ag're-us. Malignant; severe.

Ag'rom. Disease of India in which the tongue becomes rough and cracked.

Agroma'nia (*agros*, field, *mania*, madness). Mania for country life.

Agropyrum lævissimum, ag-rop'ir-um le-vis'simum (*agros*, field, *puros*, wheat). Triticum repens, **A. pungens,** triticum repens. **A. re'pens,** triticum repens.

Agrostemma githago, ag-ro-stem'ma gith-ah'go (*agros*, field, *stemma*, a garland). Lychnis githago.

Agrostis, ag-ros'tis (*agros*, a field). Bryonia alba. **A. verticilla'ta,** Andropogon muricatus.

Agruna (ag-ru'nah) or **Agrunela,** ag-ru-nel'ah. Prunus spinosa.

Agrypina (ag-rip-e'nah) or **Agrypine,** ag-rip'een (*agrupnos*, sleepless), Swollen head, possibly causing loss of sleep.

Agrypnia, ag-rip'ne-a (*agrios*, wild, *hupnos*, sleep). Insomnia.

Agrypnocoma, ag-rip-no-ko'mah (*agrios*, wild, *coma*). Unconsciousness with delirium; coma vigil.

Agrypnodes, (*agrupnos*, sleepless, and *odes*). Characterized by sleeplessness, as febris agrypnodes, fever accompanied with sleeplessness.

Agryp'nos. Sleepless.

Agrypnot'ic. Producing wakefulness. Remedy for stupor.

Agryp'nus. Sleepless, vigilant.

Aguamiel (S.) (honey water). See *Agave samiana*.

Aguar'diente (S.) (hot water). Brandy. See *Spirit*. **A. de maguey,** see *Agave samiana*.

Ague, a'gew (Gothic *agis*, trembling). Intermittent fever; often used in the sense of chill or rigor. **A. and fe'ver,** intermittent fever. **A., brassfound'ers'** or **brass,** series of morbid phenomena, resembling ague, in those exposed to fumes of deflagrating zinc in brass foundries. **A. brow,** frontal neuralgia, usually ascribed to malaria. **A. cake,** visceral obstruction—generally in spleen—following agues, distinctly felt by external examination. **A., cat'enating,** one linked with other diseases. **A., dead,** see *Fever, masked*. **A. drop, taste'less,** Fowler's solution. **A., dumb,** masked intermittent fever. **A., face,** facial neuralgia, often malarial. **A. fit,** paroxysm of ague. **A., free,** Laurus sassafras. **A. grass,** Aletris farinosa. **A., irreg'ular,** masked intermittent fever. **A., latent,** intermittent fever without chill or without well-defined paroxysms. **A., leaping,** ague with increased efficiency but depraved direction of the will, producing irresistible desire to dance or move about in a fantastic manner. See *Mania, dancing*. **A., masked,** malarial impression resembling intermittent fever. **A. plant,** transparent cottony flocks in urine, scarcely visible to the eye, said to be developed in organism of intermittent-fever patients; gemiasma. **A. poison,** malaria; see *Intermittent fever*. **A., quar'tan,** intermittent fever with paroxysms recurring every fourth day. **A., quotid'ian,** daily recurring intermittent fever. **A. root,** Aletris farinosa. **A. spell,** paroxysm of intermittent fever; spell or charm to prevent it. **A., ter'tian,** intermittent fever with paroxysms recurring every third day. **A., third-day,** tertian. **A. tree,** Laurus sassafras. **A. weed,** Eupatorium perfoliatum.

Aguios (*a, guion*, limb). Mutilated or wanting limbs; weak, feeble.

Aguish, a'gew-ish. Affected with ague; likely to cause ague.

Aguishness, a'gew-ish-ness. Manifestation or condition of ague.

A'gul. Thorny shrub of Persia and Mesopotamia, affording manna; leaves are purgative.

Aguomada. Plumeria lancifolia.

Agy. Capsicum annuum, so called in Peru.

Agy'rias (*aguris*, collection). Opacity of crystalline; cataract.

Agyrta (ah-gur'tah) or **Agyri'tes** (*agurtes*, one who collects a crowd). A stroller who pretended to supernatural powers; subsequently, quack or illiterate pretender; charlatan.

Agyrtia, ah-gur'te-ah. Charlatanry.

Agyrto'des. Inclined to, or practising, quackery.

Ahora, ah-ho'rah (*a, hora*, youth). Tardy development of organs; opposite to *Hyperhora*.

Ahoua (a-hoo'ah), **Ahouai, Ahouni, Ahovai, A. thev'etictush, Ahoval, Ahtua, Ahuai.** Thevetia ahouai.

Ahuber. Fruit of Juniperus phœnicea, used internally in gastralgia, and infused in oil in rheumatism.

Ahul. Staphyloma.

Ahund madoo. Chenopodium, used externally in Abyssinia for ulcers.

Ahypnia, ah-hip'ne-ah (*a, hupnos*, sleep). Insomnia.

Ai. Gascon name for tumefaction of fibro-synovial grooves of tendons; frequently noticed in external radial tendons of abductor longus and extensor brevis pollicis, and accompanied by peculiar crepitation. Name *Ai* doubtless denotes outcry or expression of pain of patient.

Aiavoe. Ajowan.

Aidoiag'raphy, Aidoioma'nia (nymphomania, erotomania), etc., see *Ædœography, Ædœomania*, etc.

Aido'ici (*morbi*) (*aidoia*, genital organs). Diseases of generative organs.

Aier'sa. Iris Germanica.

Aigilops, a'gil-ops. Ægilops.

Aigi'tis. Anagallis arvensis.

Aij-puti. Melaleuca leucadendron, yielding cajeput oil.

Ailanthic (a-lan'thik) or **Ailantic** (a-lan'tik) **acid.** Acid found in bark of Ailanthus excelsa.

Ailanthus excelsa, i-lan'thus ex-sel'sah. Tree of India and Ceylon whose bark resembles quassia in bitter tonic properties. **A. glandulo'sa,** *Chinese sumach, Tree of heaven*. Native of China, well known in United States as shade tree, flowers of which have strong peculiar odor; powdered bark, dose viij–x, is anthelminthic and purgative. **A. integrifo'lia,** A. excelsa. **A. Malabar'ica,** tree of India, juice of which is used in dysentery and dyspepsia, and as tonic and antipyretic.

Ail'ing. Sick; sickly.

Ail'ment. Disease.

Ai'ma. Blood. See *Hæma*.

Aimagogon, i-ma-go'gon (*haima*, blood, *agogos*, expeller). Pœonia officinalis.

Aimorrhœ'a. Hemorrhage.

Aimorrhœis (i-mor'rhe-is), **Aimorrois** (i-mor'ro-is), or **Aimorrhois,** i-mor'rho-is. Hemorrhoid.

Aimoscopy, i-mos'ko-py. Hæmatoscopy.

Ainhum. In Brazil, to saw; spontaneous amputation of little toes, sometimes great toe, of negroes, unaccompanied by other affection or constitutional derangement; met with only in African negroes, and, more rarely, in their unmixed descendants born in Brazil, also in Hindostan; it occurs on W. coast of Africa and in S. America.

Aiocochtli. Small bone in tail of armadillo, made into minute round masses and placed in external auditory canal for earache.

Aipath'es (*aei*, ever, *pathos*, disease). Continually sick or ailing.

Aipathia, i-path-e'a (same etymon). Continuous disease.

Aipi, Aipima coxera, Aipipoca. Jatropha manihot.

Air (*ao*, to breathe). Common air; atmospheric air; invisible, transparent, inodorous, insipid, ponderable, compressible, and elastic fluid, which under form of atmosphere surrounds the earth to height of 15 or 16 leagues; it is essentially composed of two gases, oxygen and nitrogen, in proportion of about 20 of the former to 77 of the latter. Oxygen is the vital portion, but nitrogen is necessary to dilute it. Air also contains a small portion of carbonic acid gas, and has always floating in it aqueous vapor, different terrestrial emanations, etc. The average composition of atmospheric air is as follows (Attfield):

	In 100 Vols.
Oxygen	20.61
Nitrogen	77.95
Carbonic acid gas	.04
Aqueous vapor	1.40
Nitric acid, Ammonia, Carburetted hydrogen	traces.
Sulphuretted hydrogen, Sulphurous acid	traces in towns.

Its effects upon the body vary according to its density, temperature, moisture, etc. Sp. gr. of air compared with hydrogen is 14.47. Change of air is found extremely serviceable in prevention and cure of certain morbid conditions.

Air-bath. Method of applying air to surface of body; see *Baths*. **A. bed**, bed or mattress that may be inflated for sick or injured. **A. blad'der**, *Swim-bladder, Swimming bladder, the Swim;* abdominal organ in many fishes, sometimes communicating by duct, ductus pneumaticus, with alimentary canal, at others not. Its contents are the elements of atmospheric air, but in different proportions. **A. breathing**, see *Lung*. **A. cells**, A. vesicles of lungs; bronchic cellules; see *Lung*. **A. chamber**, folliculus aëris. **A., complement'al** or **complement'ary**, air that can be inhaled after ordinary inspiration. **A., compressed** or **condensed**, atmosphere, compressed. **A. cure**, see *Atmosphere, compressed*. **A. cush'ion**, air-tight cushion that may be inflated. **A., dephlogis'ticated**, oxygen. **A. douche**, inflation of middle ear. **A. dress'ing**, dressing open to air. **A. em'bolism**, obstruction of blood-vessels by air. **A., empyre'al**, oxygen. **A., expired**, air forced from lungs in act of expiration. **A., factit'ious**, carbonic acid. **A., fixed**, carbonic acid. **A., mephit'ic**, carbonic acid; nitrogen. **A. pass'ages**, nasal passages, mouth, larynx, trachea, bronchia, etc., through which air passes to the lungs. **A. pes'sary**, air-tight rubber pessary filled with air. **A. poise**, apparatus for determining the weight of the air. **A. pump**, machine for exhausting the air in a closed vessel. **A., reserve**, air that can be exhaled after ordinary expiration. **A., resid'ual**, air remaining in lungs after forced expiration. **A. sacs**, see *Lung*. **A. shaft**, open space or flume for ventilating purposes. **A. sol'id of Hales**, carbonic acid. **A. space**, space filled with air from rupture or other injury to air-cells. **A., sta'tionary**, old air in the lungs to which tidal air gives oxygen, and from which it takes carbonic acid. **A., supplement'al** or **supplement'ary**, air that can be exhaled after ordinary expiration. **A. thermom'eter**, thermometer in which air is used in place of mercury or alcohol to denote changes in temperature. **A., ti'dal**, air inspired and expired during each respiration. **A. ves'icles**, air-cells. **A., vi'tal**, oxygen.

Airen. Fermented cows' milk of Tartary.

Aisthesia (ase-the'ze-ah) or **Aisthe'sis**. Perception, sensibility. See *Æsthesis*.

Aistheterion (ais-tha-ta're-on) or **Aistheterium**, ise-tha-ta'rium. Sensorium.

Aithemo'ma, Aithom'ma, or **Aithomo'ma** (*aithos*, black, *omma*, eye). Black condition of humors of eye.

Ai'ther. Ether.

Ai'tia. Cause.

Aitiology, ate-e-ol'o-je. Doctrine of cause of disease.

Ai'tion. Cause.

Aiti'opis. Æthiopis.

Aiu'ga. Abiga.

Aizoon, ah-i'zo-on (*aei*, always, ever, *zoos*, alive). Sempervivum tectorum. **A. Canarien'se**, species native to the Canary Islands; its ashes are used in scurvy.

Ajame or **Ajami.** Dios versicolor.

Ajav'a. Ajwain fruit, fruit of A. carum.

Aje. Fatty substance from insect *Coccus axio*, used externally as discutient and applied to wounds.

Ajihalid. Bush of Egypt; leaves are used for lumbricoid worms.

Ajouain (adj'u-ain), **Ajowaen** (adj'o-wa-en), or **Ajowan**, adj'o-wan. Bishop's weed; carminative in colic, diarrhœa, etc. **A. cam'phor**, thymol. **A. seeds**, see *Ptychotis ajowan*.

Ajuagas. Ulcer of horse's hoof in Spain.

Ajuapar. Sand-box tree, Hura crepitans.

Ajuga, aj'u-gah. Genus of plants, nat. ord. Labiatæ. **A. chamæ'pitys**, ground pine; abortifacient, diuretic, and aperient. Teucrium chamæpitys. **A. decum'bens**, used for ague in Himalaya. **A. iva**, species growing in Europe, used by Arabs in cholera. **A. pyramida'lis**, *Upright bugles, Middle consound, Mountain bugle*, bitter, astringent tonic. **A. rep'tans**, common bugle; leaves are astringent; formerly used in phthisis.

Ajuratiba. Bush of Brazil, oil of which is used for bathing or anointing the skin.

Ajvan or **Ajwain fruit.** Omum, omam. Fruit of Ajowan carum, stimulant and carminative.

Akamathesia, (ah-kam-ath-a'ze-ah) or **Akamathesis**, ah-kam-ath-a'sis (want of understanding). Dulness of intellect.

Akantha, ak-an'thah (a spine or thorn). Vertebral column; spinous process of vertebra. In composition, spine.

Akanthabolus, ak-an-thab'o-lus (*akantha, ballo*, cast out). Form of forceps for removing extraneous substances from wounds.

Akanthæsthesia, ak-an-thees-tha'ze-ah (*akantha, aisthesis*, sensation). Perverted sensibility, in which there seems to be pressure of a sharp point on the surface.

Akanthavola, ak-an-thav'o-lah. Akanthabolus.

Akanthion, ak-an'the-on. Point on middle line in measurement of skull, at base of anterior nasal spine.

Akanthocephala, ak-an-tho-sef'al-ah (*akantha, kephale*, head). Parasitic worm, found in lower animals especially.

Akan'thoid. Thorny or spinous.

Akantholysis, ak-an-thol'is-is (*akantha, lusis*, loosening). Disease characterized by loosening or separation of cells of mucous layer of epidermis.

Akanthoma, ak-an-tho'mah. Morbid growth of prickle-cell layer of epidermis.

Akanthopelys, ak-an-thop'el-is (*akantha, pelux*, basin). Pelvis having bony growths projecting into its cavity.

Akanthoses, ak-an-tho'ses. Diseases of prickle-cell layer of epidermis, as in lichen planus, impetigo, pemphigus, etc.

Akanthous, ak-an'thus. Spinous or thorny.

Akanthulus, ak-an'thu-lus. Akanthabolus.

Akan'thus mol'lis. Bear's breech; mucilaginous plant, demulcent and emollient.

Akasga, ak-as'gah. Ordeal used in west coast of Africa and Java (*nkasga*, pain or hurt). Colorless amorphous substance, obtained from bark of plant of family Loganiaceæ by treating with alcohol and evaporating. It is an alkaloid—*akasgia, akasgine, akazgia*, or *akazgine*—resembling strychnia.

Akatalis (ak-at'al-is) and **Akatera**, ak-at-a'rah. Berries of juniper-tree.

Akataphasia, ah-kat-af-az'e-ah (*a, kataphasis,* affirmation). Want of power or facility to form, or communicate by speech, a sentence.

Akebia quinata, ak-a'be-ah kwyn-at'ah. Species of Lardizabalcæ growing in Japan; fruit is emollient.

Akeratodiaphania, ah-ka-rat-o-de-af-an'e-ah (*a, keras,* horn, *diaphanes,* transparent). Opacity of cornea.

Akeratodiaphany, ah-ke-rat-o-di-af'an-e (*a, keras,* horn, *diaphanes,* transparent). Opacity of cornea.

Akeratosis, ah-ker-at-o'sis (*a, keras,* horn). Imperfect growth of horny tissue.

Akestoma, ak-es-to'mah (*akesthai,* to heal). Granulation tissue.

Akidurgia, ak-id-ur'ge-ah (*akis,* instrument, *ergon,* work). Operative surgery.

Akinesia (ah-kin-a'ze-ah) or **Akine'sis** (*a, kinesis,* motion). Rest; immobility; interval between systole and diastole of heart. Under term *Akineses* are included paralytic neuroses, or those characterized by defect of motive power. **A., re'flex,** diminution or loss of reaction in the reflex mechanisms situated in the different parts of the nervous system.

Akinesic, ah-kin-e'sic. Relating to akinesia or immobility or paralysis of motion.

Akiur'gia (*akis,* instrument, *ergon,* work). Operative surgery.

Akne, ak'ne. Acne.

Aknemia, ak-na'me-ah (*a, kneme,* leg). Absence of legs.

Akology, a-kol'o-je (*akos,* remedy, *logos,* description). Materia Medica; operative surgery.

Akoniton (ak-o-ni'ton) or **Akonitos,** ak-o-ni'tus. Aconitum.

Akosmoi, ah-kos'moi (*a, kosmos,* ornament). Bald persons.

Akratopegæ, ak-rat-o-pa'ge (*a, kratos,* strength, *pege,* a spring). Mineral waters without marked chemical qualities.

A'kro. In composition, top or extremity.

Akroblast, ak'ro-blast (*akro, blastema,* growth). Tissue of germinal wall.

Akrokinesis, ak-ro-kin-a'sis (*akro, kinesis,* movement). Increased power of movement.

Akroposthitis, ak-ro-pos-the'tis (*akro, posthe,* foreskin). Inflammation of the prepuce. See *Balanitis.*

Akrothymion, ak-ro-thim'e-on. Acrothymion.

Ak'sis. Intermittent fever.

Aktinom'yces. Actinomyces.

Aku'meter. Acoumeter.

Akyanoblepsia, ah-ke-an-o-blep'se-ah (*a, kuanos,* blue, *bleps,* to see). Blue-blindness.

Akyanopsia, ah-ke-an-op'se-ah (*a, kuanos,* blue, *ops,* eye). Blue-blindness.

Akyesis, ah-ke'es-is (*a, kuesis,* pregnancy) Sterility; non-pregnant condition.

Al. In composition, to.

Ala, ah'lah (wing). Term often used by anatomists for parts which project like a wing from median line, as ala nasi, ala of uterus; also axilla, pavilion of ear, pterygion, arm, shoulder-blade. **A. al'ba latera'lis,** eminence on floor of fourth ventricle. **A. al'ba media'lis,** hypoglossal area. **A. auric'ulæ** or **au'ris,** pinna of ear. **A. cine'rea,** triangular space on floor of fourth ventricle, corresponding to nuclei of pneumogastric and glosso-pharyngeal nerves. **A. ethmoi'da'lis,** alar process of ethmoid bone. **A. par'va ingrassiæ,** spine of sphenoid bone. **A. pon'tis,** posterior portion of roof of fourth ventricle. **A. u'vulæ,** a band of gray matter on under surface of cerebellum between uvula and amygdalæ. **A. vespertilio'nis,** part of broad ligament of uterus between Fallopian tube and ovarian ligament. See also *Alæ.*

Alabaster, al-a-bas'tur. A native granular sulphate of calcium; a white stalactitic carbonate of calcium; used in ointment as a discutient, and in dentifrices.

Alactia, ah-lak'te-ah. Agalactia.

Alæ, al'e (pl. of **Ala,** wing). **A. descenden'tes,** pterygoid processes of sphenoid. **A. diaphrag'matis,** three divisions of central tendon of diaphragm. **A. for'nicis,** posterior crura or pillars of fornix. **A. inter'næ mino'res clitor'idis,** nymphæ. **A. lob'uli centra'lis,** processes of matter passing from central lobule of cerebellum to lateral hemispheres. **A. mag'næ,** processes projecting laterally from body of sphenoid bone; labia. **A. majo'res,** greater wings of sphenoid. **A. min'imæ,** small processes from upper surface of sphenoid. **A. mino'res,** labia minora. **A. mulie'bres mino'res,** labia minora. **A. na'rium** or **na'si,** lateral parts of nose. **A. orbita'les,** lesser wings of sphenoid. **A. palati'næ,** pterygoid processes of sphenoid. **A. par'væ,** lesser wings of sphenoid. **A. pterygoi'deæ,** pterygoid processes of sphenoid. **A. puden'di,** labia pudendi. **A. pulmo'num,** lobes of lung. **A. of sac'rum,** lateral portions of that bone. **A. sphenoida'les,** wings of sphenoid. **A. spi'næ nasa'lis,** processes on each side of nasal spine of frontal bone. **A. tempora'les,** greater wings of sphenoid. **A. u'vulæ,** delicate osseous laminæ from back part of uvula of cerebellum to the amygdalæ. **A. of vo'mer,** semiellipticaI ledges on that bone, receiving between them rostrum of sphenoid. **A. vul'væ,** labia minora.

Alagas. Sacrum, coccyx.

Alalia, ah-lal'e-ah (*a, laleo,* to speak). Loss of power to express ideas in spoken words. See *Aphasia.*

Alanfuta, al-an-fu'tah. Arabian name of vein between chin and lower lip, which was opened in case of fœtor of breath.

Alangium decapetalum (al-an'ge-um de-kap-et'al-um) and **A. metapet'alum.** Indian plants, hydragogue carthartics, used in dropsy.

Al'anson's method. Circular amputation, one incision being made down to the muscles, another through the muscular mass directly down to the bone.

Alantin, al-an'tin. Inulin.

Alantois, al-an'to-is. Allantois.

Alan'tol. Inulol.

Alaos. Obscure form of tabes.

Alar, a'lar. Wing-like; relating to shoulder or axilla. **A. car'tilages,** cartilages forming sides of nose at lower part. **A. lig'aments,** folds of synovial membrane of knee-joint passing downward and outward from patella. **A. mus'cles,** pterygoid muscles. **A. odon'toid lig'aments,** thick ligaments from odontoid process of axis to condyles of occipital bone. **A. pro'cess,** two little processes from fore part of ethmoidal crest. **A. thora'cic artery,** small branch from axillary artery to glands of axilla. **A. veins,** superficial veins at fold of arm.

Ala'ria os'sa. Wing-like processes of sphenoid bone.

Ala'ris (*ala,* a wing). Wing-shaped; alar.

Alaternus (al-at-urn'us), **com'mon.** Rhamnus alaternus. **A. latifo'lius,** Rhamnus alaternus.

Alatus, al-ah'tus. Alate; one whose scapulæ project backward like wings.

Al'ba (**tunica**). White nervous substance. **A. sclerot'ica,** sclerotic coat of the eye.

Alba'daran. Sesamoid bone of metatarso-phalangeal joint of great toe.

Albamentum, al-bam-en'tum (*albus,* white). White of egg.

Albanum, al'ban-um (*albul,* urine). Salt of urine.

Albaræs (al'bar-ees) or **Albaras alba,** al'bah-ras al'bah. Lepra alphoides. **A. ni'gra,** lepra nigricans.

Albaros, al'bar-os. Lepra alphoides.

Albedo (al-ba'do) **ret'inæ** (*albus,* white). Œdema of retina. **A. un'guium** (*unguis,* nail), whitish semilunar portion of root of nail, or lanula, situate above part where epidermis terminates.

Alberas, al'ba-ras. Albaras; staphisagria.

Albescent, al-bes'sent (*albus,* white). Moderately whitish; becoming white.

Albian, al'be-an. Albino.

Albicans, al'be-kans (*albico,* to grow white). Whitish, as corpora albicantia at base of brain.

Albiduria, al-bid-u're-ah (*albus,* white, *urina,* urine). Whitish or pale urine; abuminuria.

Albina, al-be'nah. Female albino.

Albinism, al'bin-izm. See *Albino* and *Albinism*.

Albinismus, al-bin-iz'mus. Albinism. **A. partia'lis**, partial or localized albinism, seen especially in negroes. **A. universa'lis**, condition of being an albino.

Albino, al-be'no (white) ([L.] *albus*, white). Spanish word applied to individuals who have skin and hair white, iris very pale, bordering on red, and eyes so sensitive that they cannot bear light of day. Condition is called *Albinism*, *Kakerlakism*, and is dependent on deficiency of pigment in skin, eyes, or hair, *Congenital leucoderma*, *achroma*.

Albinoism, al-bin'o-izm. Albinism.

Albinot'ic. Relating to or affected with albinism.

Albinum, al-be'num. Graphalium murorum.

Albinuria, al-bin-u're-ah. Albuminuria.

Albitudo, al-bit-u'do. Albinism.

Albizzia anthelmintica, al-biz'ze-ah an-thel-min'te-kah. Abyssinia tree, bark of which, *besenna*, *kumada*, *mesenna*, is tæniafuge,

Albor, al'bore. Whiteness or paleness, as of urine. **A. cu'tis**, achromatosis. **A. nati'vus**, albinism. **A. o'vi**, white of egg.

Albora, al'bor-ah. Kind of itch or complicated leprosy. Albaras.

Albotim, al'bo-tim. Turpentine.

Albuginea, al-bu-jin'e-ah (*albus*, white). White fibrous investing tissue of a part or organ. **A. epididym'idis**, fibrous coat of epididymis. **A. lie'nis**, white elastic fibrous tissue investing spleen, beneath serous coat. **A. oc'uli**, sclerotic coat. **A. ova'rii**, tunica albuginea of ovary, layer of fibrous tissue below the epithelial covering. **A. pe'nis**, white fibrous investment of penis, see *Cavernous bodies*. **A. re'num**, capsule of kidneys. **A. testic'uli** or **tes'tis**, strong fibrous resisting membrane immediately enveloping the testicle, having at its upper part an enlargement, corpus Highmorianum. From its inner surface it sends off flat, filiform prolongations or septa, between which are seminiferous vessels. Externally it is covered by tunica vaginalis testis.

Albugineal, al-bu-jin'e-al. Albugineous. **A. mem'brane**, fascia separating fat of orbit from middle and posterior parts of eyeball.

Albugineous, al-bu-jin'e-ous. Term applied to white textures, humors, etc. **A. fi'bre**, name given by Chaussier to what he considers one of the four elementary fibres, tenacious, elastic, but little extensible, and of shining, satiny appearance. It forms fasciæ or fasciculi, constituting tendons, articular ligaments, and aponeuroses; hence name *Albugineous membranes* given to fibrous membranes, *Albugineous tissue*, etc.

Albuginitis, al-bu-jin-e'tis. Inflammation of white fibrous tissue, or of albuginea; orchitis. Gout and rheumatism have been regarded as species of albuginitis.

Albu'ginous. Albugineous.

Albugo, al-bu'go (*albus*, white). White opacity of the cornea; leucoma. **A. oc'uli** or **oculo'rum**, leucoma; white of the eye; white of egg. **A. o'vi**, white of egg.

Albukalin, al-bu'kal-in. $C_8H_{16}N_2O_6 + H_2O$. Substance detected in cases of leucæmia.

Albula, al'bu-lah (*albus*, white). Albugo, leucoma.

Album canis, al'bum kan'is (*albus*, white). Album græcum. **A. ceti**, spermaceti. **A. græ'cum**, white dung of the dog, consisting almost wholly of phosphate and carbonate of lime, derived from bones used as food. Formerly applied as discutient gargle in quinsies, and as an antiepileptic. **A. Hispan'icum**, subnitrate of bismuth. **A. ni'grum**, excrement of mouse, once used medicinally. **A. oc'uli**, white of eye. **A. o'vi**, white of egg.

Albumen (al-bu'men) or **Albumin**, al-bu'min (*albus*, white). Immediate nitrogenous principle of animals and vegetables. Liquid, coagulating at about 140° F., found in blood, chyle, serous and synovial fluids, brain, liquor amnii, etc. There is not much difference in chemical composition between animal and vegetable albumin, fibrin, and casein. Native albumins are soluble in water, and not precipitated by alkaline carbonates, chloride of sodium, or by slightly dilute acids. Solutions of albumin are coagulated by heating at 150° to 165° F. Serum albumin amounts to about 4.5 per cent. in human serum. The proportion of albumin in the body may be thus given:

Substance.	*Parts per 1000.*
Cerebro-spinal fluid	0.9
Aqueous humor	1.4
Liquor amnii	7.0
Intestinal juice	9.5
Pericardial fluid	23.6
Lymph	24.6
Pancreatic juice	33.3
Synovia	39.1
Milk	39.4
Chyle	40.9
Spinal cord	74.9
Brain	86.3
Liver	117.4
Muscle	161.8
Blood	195.6
Middle coat of arteries	273.3
Crystalline lens	383.0

For tests of albumen in urine, see *Urine*. **A., a'cid**, see *Acid*. **A. al'kali**, see *Alkali*. **A., living**, protoplasm. **A., na'tive**, A. occurring in a natural condition in animal tissues and fluids. **A. oc'uli**, the white of the eye. **A. o'vi**, egg albumin; *Glair*, *White of egg*. Egg albumin appears in the urine when much egg albumin is taken as food. Used in pharmacy for suspending oils, etc. in water. **A. pep'tone**, albumose. **A., sal'ivary**, ptyaline. **A., se'rum**, see *Albumen*.

Albumenoid, al-bu'men-oid. Albuminoid.

Albumentum, al-bu-men'tum. White of egg.

Albumenuria, al-bu-men-u're-ah. Albuminuria.

Albumin, al-bu'min. Albumen.

Albuminate, al-bu'min-ate. Salt resulting from union of albumen with a base. **A. of mer'cury** has been used hypodermically in syphilis; **A. of iron**, in chlorosis and anæmia.

Albuminim, al-bu'min-im. Material of wall of cell containing albumen.

Albuminimeter, al-bu-min-im'et-ur (*albumin*, *metron*, measure). Apparatus for measuring quantity of albumen in urine or other liquid. Process is called *Albuminim'etry*.

Albuminiparous, al-bu-min-ip'ar-us (*albumen*, *pario*, to bring forth). Producing albumin.

Albuminiza'tion. Conversion into albumen.

Albu'mino-ca'sein. Amygdalin.

Albumino-fibrin, al-bu'min-o-fi'brin. Material composed of those two ingredients.

Albumino-gelatin, al-bu'min-o-jel'a-tin. Material composed of albumen and gelatin.

Albumino-gluten, al-bu'min-o-glu'ten. Substance composed of albumen and gluten.

Albuminoid (al-bu'min-oid) or **Albu'menoid** (*albumen*, *eidos*, resemblance). Resembling albumen, as fibrin, casein, etc. Term applied to aliments in the same sense as proteinous. Albuminoid substances are non-crystalline, amorphous colloids, resembling in chemical reactions so-called proteids or albuminous constituents of blood, lymph, and chyle. They are composed of carbon, hydrogen, oxygen, nitrogen, and sulphur. They exist in fluid state, and include mucin, chondrin, gelatin, keratin and neuro-keratin, nuclein, and kindred substances. Type of substances of this class is albumen or white of egg. **A. ammo'nia**, ammonia obtained from water or air by undergoing distillation with an alkali. **A. degenera'tion**, amyloid degeneration.

Albuminom'eter. Albuminimeter.

Albuminone, al-bu'min-one. Derivative of an albuminoid.

Albumino-purulent, al-bu'min-o-pu'ru-lent. Containing albumen and pus.

Albuminorrhœa, al-bu-min-or-rhe'ah (*albumen*, *rheo*, to flow). Albuminuria.

Albuminosa, al-bu-min-o'zah. Medicines or food containing albumin as chief ingredient.

Albuminose, al-bu'min-ose. Peptone; substance

into which albumin is converted by decomposition of fibrin by weak acid or gastric juice. Albumose.

Albuminosis, al-bu-min-o'sis. Condition of blood in which ratio of albumen is increased, as in abdominal typhus, variola, rubeola, etc.

Albuminous, al-bu'min-us. Containing or resembling albumin. **A. degenera'tion**, lardaceous or waxy disease or degeneration of organs; see *Amyloid degeneration*. **A. gland**, gland in which the alveoli are lined with albuminous cells, as the parotid gland. **A. infiltra'tion**, degeneration in which cells become distended with albuminous granules. **A. sarco'ma**, giant-celled sarcoma.

Albuminuretica, al-bu-min-u-ret'ik-ah. Medicines producing albumin and urine.

Albuminuria (al-bu-min-u're-ah), less correctly **Albumenu'ria** (*albumen, ouron*, urine). Condition of urine in which it contains albumen, presence of which is indicated by coagulation on application of adequate heat, nitric acid, etc. May be temporary, as in scarlatina. Term applied also to diseases characterized by such condition of urine. See *Kidney, Bright's disease of*. **A., car'diac**, A. dependent on valvular disease. **A., cy'clic**, periodical daily increase of albumen in urine. **A., dyscra'sic**, A. dependent on faulty condition of blood, and not of kidney. **A., false**, A. dependent on transient nature or causation. **A., fat'ty**, chyluria. **A. gravida'rum**, A. of pregnant women. **A., hemato'genous**, A., dyscrasic. **A., nephro'genous**, A. having origin or seat in kidney. **A., physiolog'ical**, temporary A. after food, emotion, etc., or in new-born children. **A., spas'tic**, A. following convulsions. **A., tox'ic**, A. dependent on presence of poison in the system.

Albuminuric, al-bu-min-u'rik. Relating or appertaining to albuminuria, as A. retinitis. One laboring under albuminuria.

Albuminurorrhœa, al-bu-min-u-ror-rhe'ah (*albumen, ouron*, urine, *rheo*, to flow). Albuminuria.

Albumor, al'bu-mor. White of eggs.

Albumose (al'bu-mose) or **Albu'min pep'tone**. It is believed that during gastric digestion the first action on albumins produces parapeptone, then an intermediate substance, to which name of albumose is given, before full change to peptone occurs. Globulin undergoes similar change into globulose, casein into caseose, and soluble proteose includes all three.

Albumosuria, al-bu-mo-zu're-ah. Presence of albumose, or peptone formed during digestion, in the urine.

Alcaest (al'ka-est) or **Alcahest**, al'ka-hest. Liquor; fancied universal solvent, capable of reducing every body to its elements or removing every swelling.

Alcahol, al'ka-hol. Alcohol.

Alcales'cence. Alkalescence.

Alcali, al'kal-e. Alkali. **A. ammoni'acum aceta'tum**, liquor ammonii acetatis. **A. a. aquo'sum**, water or watery solution of ammonia. **A. a. flu'idum**, liquor ammoniæ. **A. a. spirituo'sum**, spiritus ammoniæ. **A. a. succina'tum**, succinate of ammonium. **A. a. vino'sum**, spiritus ammoniæ. **A. a. volat'ile**, ammonium carbonate. **A., an'imal**, ammonia. **A. fix'um**, fixed alkali, as potash. **A. flu'or**, ammonia. **A. ligno'rum**, potassium carbonate. **A. minera'le**, inorganic alkali. **A., organ'ic**, organic alkaloid. **A. pne'um**, borax. **A. tar'tari**, potassium carbonate. **A. t. aceta'tum**, potassium acetate. **A. urino'sum**, ammonia. **A. volat'ile**, ammonia.

(See also *Alkali*.)

Alcaligone. Alkaligone.

Alcaline, al'ka-line. Alkaline.

Alcalinity, al-kal-in'it-e. Alkalinity.

Alcalinuria, al-kal-in-u're-ah. Alkalinuria.

Alcaloid, al'kal-oid. Alkaloid.

Alcaloides, al-kal-o-e'des. Alkaloids. **A. cadaver'ici**, cadaveric alkaloids; ptomaïnes.

Alcaluretica, al-kal-u-ret'e-kah. Alkaluretica.

Alcana, al-kan'ah. Anchusa officinalis.

Alcanna major latifolia dentata, al-kan'nah ma'jor lat-e-fo'le-ah den-tah'tah. The black alder. **A. orienta'lis**, Lawsonia inermis. **A. spu'ria**, Anchusa tinctoria. **A. ve'ra**, Lawsonia inermis.

Alcap'ton. Unfermentable yellowish substance, like glucose, found in urine; the condition being called *Alcaptonu'ria*.

Al'car (defense). Remedy.

Al'ce, al'se (strength). Health; vigor; strength.

Alcea, al'se-ah (*alke*, help). Hibiscus abelmoschus. **A. Ægypti'aca villo'sa**, Hibiscus abelmoschus. **A. In'dica**, Hibiscus abelmoschus. **A. ro'sea**, *Common hollyhock, Hoc, Hocks*. Emollient, like althæa.

Alcebar, al'se-bar. Aloes-wood.

Alces cornu, al'ses (the elk) kor'nu. Hartshorn.

Alchaest, al'ka-est. Alcaest.

Alchemia, al-kem-e'ah. Alchemy.

Alchemilla, al-kem-il'lah. *Lady's mantle*, nat. ord. Rosaceæ. Formerly in great repute as astringent in hemorrhage; also tonic. **A. alpi'na**, *Silvery lady's mantle;* same properties as alchemilla. **A. arven'sis**, *Parsley piert;* ounce of plant to pint of water has been used in strangury. **A. vulga'ris**, alchemilla.

Alchemist, al'kem-ist. One pretending to alchemy.

Alchemy, al'kem-e (*al*, Arabic particle, signifying excellence, *chemeia*, chemistry). Formerly synonymous with chemistry, but from 7th century applied to mysterious art of endeavoring to discover a universal remedy, elixir of life, and mode of transmuting baser metals into gold—philosopher's stone.

Alchermes, al-ker'mes. Alkermes.

Alchimella, al-kim-el'lah. Alchemilla.

Alchimia, al-kim-e'ah. Alchemy.

Alchimilla, al-kim-il'lah. Alchemilla.

Alchitram (al'kit-ram) or **Alchitura**, al-kit-u'rah. Tar, resin.

Alchool, al'ko-ol. Alcohol.

Alchornea (al-kor'ne-ah) **corda'ta**. Euphorbiaceous plant of Senegal and vicinity; sudorific. **A. iricura'na**, species from Brazil, used in sore throat. **A. latifo'lia**, species growing in Jamaica, diaphoretic. See *Alcornoque*.

Alchymia, al-kim-me'ah. Alchemy.

Alchymilla, al-kim-il'lah. Alchemilla.

Alcocalum, al-kok'al-um. Artichoke; cynara.

Alcohol, al'ko-hol. Ethylic alcohol, spirit of wine. Arabic word formerly used for an impalpable powder, and signifying very subtle, much divided. Peculiar liquid, generated for most part in vegetable juices and infusions by vinous or alcoholic fermentation; now applied to highly rectified spirit of wine. In the Ph. U. S. alcohol is rectified spirit, of specific gravity 0.820 at 15.6 C. or 60° F. It is composed of 91 per cent. by weight of ethylic alcohol, C_2H_6O, and 9 per cent by weight of water.

Diluted alcohol, alcohol dilutum (Ph. U. S.), is a liquid composed of 45.5 per cent. by weight (53 per cent. by volume) of ethylic alcohol and 54.5 per cent. by weight (47 per cent. by volume) of water; sp. gr. 0.928 at 15.6° C. or 60° F.

Ethylic alcohol is type of a series, principal of which are methylic, amylic, propylic, and butylic alcohols, the two first-named being of therapeutic interest. Term alcohol is used generically for a series of compounds of C, H, and O, derived from a hydrocarbon by replacing one or more atoms of hydrogen by an equal number of the group HO.

Alcohol is an inflammable liquid lighter than water, of warm, acrid taste, colorless, transparent, and of a pungent aromatic smell. It is a product of distillation of vinous liquors; is miscible with water in all proportions, and a direct solvent of resins, balsams, and various other vegetable principles. Hence it is used in different states of concentration in preparation of elixirs, tinctures, essences, etc.

Alcohol acts as a powerful stimulus; as such, in dilute form, it is used in prevention and cure of disease; in larger quantities it is a depressant narcotic poison. It is usually given in the form of wine, whiskey, or brandy; its habitual and inordinate use is cause of many serious affections, of chronic character especially, as visceral obstructions, dropsy, etc.

Alcohol, ab'solute, alcohol free of water. **A. ace'ti**, acetic acid. **A. Æthe'reus ferra'tus**, tinctura sulphurico-ætherea ferri. **A. cum al'oe perfolia'ta**,

tinctura aloes. **A. ammo'niæ et guai'aci,** tinctura guaiaci ammoniata. **A. ammonia'tum,** spiritus ammoniæ. **A. ammmonia'tum aromat'icum,** spiritus ammoniæ aromaticus. **A. ammonia'tum fœt'idum,** spiritus ammoniæ fœtidus. **A. amyl'icum,** oil, fusel. **A. cum aromat'ibus compos'itus,** tinctura cinnamomi composita. **A. cum aromat'ibus sulphurica'tus,** aromatic sulphuric acid. **A. aromat'icum ammonia'tum,** spiritus ammoniæ aromaticus. **A. aromat'icum sulphu'ricum,** acidum sulphuricum aromaticum. **A. camphora'tum,** spirit of camphor. **A. castoria'tum,** tinctura castorei. **A. cum citro auran'tio,** tinctura aurantii. **A. cum croto'ne cascaril'lâ,** tinctura cascarillæ. **A. dehydrogena'tum,** aldehyde. **A. dilu'tum,** see *Alcohol.* **A. ethyl'icum,** ethylic alcohol, absolute alcohol. **A. ferra'tum** or **ferratus,** tinctura ferri chloridi. **A. cum fer'ri sulpha'te tartariza'tus,** see *Ferrum tartarizatum.* **A. fort'ius,** alcohol of sp. gr. 0.817, U. S. Ph. 1870, stronger alcohol of various pharmacopœias. **A., gly'ceric,** glycerin. **A. cum guai'aco officina'le ammonia'tus,** tinctura guaiaci ammoniata. **A. io'dii,** tinctura iodinii. **A. junip'eri compos'itum,** spiritus juniperi compositus. **A., mesit'ic,** acetone. **A., methyl'ic,** spiritus pyroxylicus. **A. ni'trico-æthe'reum,** nitrous ether, ethyl nitrate. **A. ni'tricum,** spiritus ætheris nitrosi. **A. cum o'pio,** tinctura opii. **A., phenyl'ic,** carbolic acid. **A., pyrolig'neous,** methyl alcohol. **A., pyrox'ylic,** spiritus pyroxylicus. **A. cum rhe'o,** tinctura rhei. **A. sapona'tum,** tinctura saponis. **A. sulphurica'tum,** elixir acidum Halleri. **A. sulphu'ricum,** elixir acidum Halleri. **A. sul'phuris,** carbon bisulphate. **A. terebin'thinæ,** oil of turpentine. **A. vi'ni,** spiritus rectificatus. **A., wood,** spiritus pyroxylicus.

Alcoholate, al'ko-hol-ate. Crystallizable substance formed by combination of alcohol with a saline.

Alcoholatura, al-ko-hol-at-u'rah. See *Alcoölatum.*

Alcoho'lea. Alcoholic tinctures (French Codex).

Alcoholetum, al-ko-hol-et'um. Medicinal substance to which alcohol is added as solvent.

Alcoholic, al-ko-hol'ik. Spirituous; relating to or containing alcohol, as alcoholic drink or remedy. An habitual drinker to excess. **A. a'taxy,** condition produced by alcohol, resembling locomotor ataxy. **A. co'ma,** coma from over-indulgence in alcoholic liquors. **A. extract,** product of evaporation of alcoholic tinctures, alcohol being employed with substances insoluble in water, as resins, etc. **A. ma'nia,** mania-a-potu. **A. pseudota'bes,** alcoholic ataxy.

Alcoholica, al-ko-hol'ik-ah. Medicines whose activity depends upon alcohol.

Alcoholimeter, al-ko-hol-im'e-tur. Alcoholometer.

Al'coholism. Series of morbid phenomena produced by use of alcoholic liquors, as gastritis, loss of appetite, nervous irritation, delirium tremens, etc.

Alcoholization, al-ko-hol-i-za'shun. Process of rendering alcoholic, either by converting into alcohol or mixing with alcohol.

Alcoholometer, al-ko-hol-om'e-ter. Instrument for ascertaining amount of alcohol in a liquid or measuring its specific gravity, the process being called *Alcoholometry* or *Alcoholimetry.*

Alcoholophilia, al-ko-hol-o-fil'e-ah (*alcohol, phileo,* to love). Uncontrollable impulse for use of alcoholic liquors.

Alcoholosis, al-ko-hol-o'sis. Alcoholism.

Alcol. Alcohol, vinegar.

Alcolæ, al'ko-le. Aphthæ; anthrax; gravel or sediment in urine.

Alcolitus, al-kol'it-us. Containing sediment, as urine.

Al'cöol, al'ko-ol. Alcohol.

Alcöolatum, al-ko-ol-at'um. See *Tincture.* **A. antiscorbu'ticum,** tinctura de cochleariis. **A. carminati'vum Syl'vii,** tinctura carminativa Sylvii. **A. de cochlea'riis,** tinctura de cochleariis. **A. de cro'co compos'itum,** tinctura de croco composita. **A. fra'grans,** cologne-water. **A. vulnera'rium,** remedy for bruises and other injuries, prepared by macerating and distilling nearly twenty different plants.

Alcöolature, al-ko-ol'at-ure. Name given to certain preparations consisting of alcohol, charged, by maceration, with soluble principles of fresh plants. Properties of such plants would suffer by drying or pressing.

Alcöolismus, al-ko-ol-iz'mus. Alcoholism.

Alcöolometer (al-ko-ol-om'e-tur) or **Alcöometer,** al-ko-om'e-tur (*metron,* measure). Alcoholometer.

Alcöomel, al'ko-o-mel. Mixture of alcohol and honey.

Alcor'nin. Fatty principle from alcornoque-bark.

Alcornoc or **Alcornoco,** al-kor-no'ko. Alcornoque.

Alcornoque, al-kor-noke' (after Alchorne, English botanist). Bark of Alchornea latifolia of Jamaica and S. America, used in phthisis; it is bitter, tonic, diaphoretic, and slightly astringent. Also bark of Bowdichia virgilioides. **A. of Brazil,** Bowdichia major.

Alcyon, al'se-on (*hals,* sea, *kuo,* to conceive). Halcyon. Swallow of Cochin China, whose gelatinous nest is nutritious, analeptic, and aphrodisiac.

Alcyoneum (al-ce-o'ne-um) or **Alcyo'nium.** Bastard sponge. The ashes were formerly employed as a dentifrice and to favor growth of hair in alopecia.

Aldab'aran. Albadaran.

Al'dehyde (abridged from *alcohol dehydrogenatum,* alcohol deprived of hydrogen). Volatile pungent liquid, C_2H_4O, produced in oxidation of ethylic alcohol with limited supply of oxygen, two atoms of hydrogen being removed. Also product of first stage of oxidation of all the alcohols. Has been used as an anæsthetic. It is also intoxicant.

Aldehydum (al-da-he'dum) **trichloratum,** trik-lorat'um. Chloral hydrate, formed by displacement of three atoms of hydrogen in ethyl aldehyde.

Alder, al'der. Ordinary name of genus Alnus. **A., Amer'ican,** Alnus serratula. **A. bark,** bark of A. serratula and A. glutinosa. **A., black,** Prinos, Rhamnus frangula. **A., buck'thorn,** Rhamnus frangula, Prinos. **A., Europe'an,** Alnus glutinosa. **A., swamp,** Alnus incana. **A., tag,** Alnus incana. **A., white,** Clethra alnifolia.

Ale. Alcoholic beverage produced by rapid fermentation, at high temperature, of infusion of malt in hops. It contains 4 to 7 per cent. of alcohol.

Ale'berry. A beverage made by boiling ale with spice and sugar and sops of bread; given to invalids.

Alecithal, ah-les'ith-al (*a, lekithos,* yolk of egg). Term applied to ova in which segmentation goes on uniformly and with even distribution of yolk.

A'lecost. Tanacetum balsamita.

Alector, ah-lek'tor (unmarried). One who cannot sleep (*a, lectus,* bed).

Alectoria, al-ek-to're-ah. Genus of lichens, several species of which are used medicinally.

Alectorius lapis, al-ek-to're-us lap'is (*alektor,* cock). A stone supposed to exist in stomach of the cock or capon; marvellous properties were attributed to it.

Alectorolithos, ah-lek-to-rol'ith-os (*alektor,* cock, *lithos,* stone). Alectorius lapis.

Alectorolophus, ah-lek-to-rol'o-fus. Crista galli of ethmoid.

Alegar, al'e-gar. Vinegar from ale.

Ale'hoof. Glechoma hederacea.

Aleim'ma. Anointing; liniment; ointment.

Alei'pha. Liniment; ointment.

Aleipsis, al-eip'sis. Anointing; steatosis. **A. auc'ta,** hypersteatosis. **A. diminu'ta,** asteatosis.

Aleipte'rium (*aleipho,* to anoint). Place in ancient gymnasium where combatants anointed themselves.

Aleip'tron. Box for ointments.

Aleison, al-i'son. Acetabulum.

Ale'ma. Farina, flour.

Alembic, al-em'bik. Moorshead; utensil made of glass, metal, or earthenware adapted for distillation; a still.

Alembroth, al-em'broth. Sal alembroth; product of sublimation of mixture of corrosive sublimate and sal ammoniac, employed as stimulant.

Alep'po but'ton, A. evil, A. pus'tule, A. ul'cer. Terms applied to an endemic cutaneous affection in Syria and Africa, characterized by one or more tuber-

cles on face or limbs, which soften and become covered with a scar. Ulcerations formed are long in healing, and, generally, leave a mark. It is usually left to itself, but is said to be benefited by crucial incisions into the tubercle prior to period of softening. The disease appears to be anthracoid in its character. **A. galls**, best commercial variety of galls. **A. worm'-seed**, Artemisia santonica.

Aleton, al'e-ton (*aleo*, to grind). Farina.

Aletrin, al-et'rin. A resinous extract obtained from Aletris farinosa; dose, gr. ½–iij; cathartic.

Aletris, al-et'ris (*aleiar*, meal). A. farinosa. **A. al'ba**, A. farinosa. **A. au'rea**, indigenous, has similar virtues to **A. farinosa**, *Star-grass, Starwort, Blazing star, Aloe-root, Bitter-grass, Black-root, Unicorn-root, Ague-root, Ague-grass, Colic-root, Devil's bit, Mealy starwort*, ord. Hæmoderaceæ. Root is intense and permanent bitter; tonic, emetic, and cathartic.

Aletudo, al-it-u'do. Corpulence.

Aleurites (al-u-re'tes) **corda'ta** (*aleurites*, mealy, from meal-like substance covering it). Tung-tree of China, used medicinally. **A. Gome'sii**, euphorbiaceous plant of Brazil, oil of which is purgative. **A. Moluc-ca'na**, species growing in Molucca and Java, having purgative nut. **A. tri'loba**, *Akkrout, Candle-nut* or *Candle-berry tree*, ord. Euphorbiaceæ. Plant common in Sandwich, Society, and other islands in the Southern seas; also in East and West Indies. Oil of the fruit—kukui oil in Sandwich Islands, kekune oil in Ceylon, known in Jamaica as Spanish walnut oil, and in India as Belgaum walnut oil—is cathartic, resembling castor oil in its action.

Aleur'on. Farina.

Aleurotesis, al-u-ro-ta'sis (*aleuron*, wheaten flour). Strainer for separating bran from meal. See *Cribration.*

Alexander-Adams operation. Alexander's operation.

Alexan'ders. Smyrnium olusatrum.

Alexander's operation, Alexander-Adams operation. Operation devised by Dr. W. Alexander of Liverpool, England, by which the round ligaments of the uterus are shortened in cases of prolapse, retroversion, or retroversion combined with retroflexion of that organ. Under the view that they become lengthened in such displacements, he dissects down to them, and, drawing them well out through the external abdominal ring, replaces the uterus in its normal position.

Alexan'dria. Prunus laurocerasus.

Alexeterium, al-eks-et-a're-um. See *Alexiteria.*

Alexia, ah-leks'e-ah (*a*, *lego*, to read). Form of loss of faculty of expression of thought. The person can think and speak, but cannot read.

Alexicacum, al-eks-ik'ak-um (*alexo*, to repel, *kakon*, evil). Amulet, alexipharmic.

Alexipharmic, al-eks-e-far'mik (*alexo*, to repel, *pharmakon*, poison). Term formerly used for medicines proper for expelling morbific principles or preventing bad effects of poisons taken inwardly.

Alexipyretic, al-eks-i-py-ret'ik (*alexo*, to repel, *puretos*, fever). Febrifuge, antipyretic.

Alex'ir. Elixir.

Alexiteria, al-eks-it-a're-ah (*alexo*, to repel). Originally used synonymously with remedies. Applied also to medicines that counteract poisons placed in contact with the exterior of the body, in contradistinction to alexipharmics; antidote.

Alexiteric, al-eks-it-er'ik. Antidotal.

Alexiterium chloricum, al-eks-it-a're-um klo'rik-um. Fumigation with chlorine. **A. ni'tricum**, nitrous fumigation.

Aleze. A cloth or other material to protect the bed from evacuations from the bowel or bladder.

Alfusa, al-fu'sah. A form of oxide of zinc.

Alga marina, al'gah ma-ree'nah (*ad*, *ligo*, to bind). Sea-wrack; Pila marina. **A. of the mouth**, microscopic vegetable parasite noticed in aphthous condition of the mouth, and even in buccal secretions of healthy persons.

Algæstheses, al-gees-tha'zes (*algos*, pain, *aisthesis*, sensation). Painful sensations, or diseases attended with them.

Algæsthesis, al-gees-tha'zis (*algos*, pain, *aisthesis*, sensation). Sensation of pain.

Algalia (al-gal'e-ah) or **Algalie**, al'gal-e. Catheter.

Algaroba, al-gar-o'bah. Ceratonia siliqua.

Algarobia, al-gar-o'be-ah. Resin from A. glandulosa. **A. ferrugin'ea**, plant of India, bark of which is stimulant. **A. glandulo'sa**. Small leguminous tree of southern America, from which mesquite gum is obtained. **A. leucophœ'a** has similar properties.

Algarobilla, al-gar-o-bil'lah. Pods of Balsamocarpum brevifolium are so called.

Algaroth (from V. Algarotti, a Veronese physician), al'gar-oth. *Flowers of antimony, Antimonious oxychloride.* Has been used in preparation of tartrate of antimony and potassium and as an emetic, purgative, and diaphoretic.

Algebra, al'je-brah. Fracture; also its treatment by the surgeon.

Algedo, al-ja'do (*algos*, pain). Violent pain about the neck of the bladder or testicles, occasionally occurring in gonorrhœa; stoppage of gonorrhœal discharge.

Algedon (al-je'don), **Algema** (al-ga'mah), or **Algesis**, al-ga'sis. Pain.

Alge'sia. Sensibility to pain; excessive pain.

Algesichronometer, al-ge-ze-kro-nom'e-tur (*algesis*, pain, *chronos*, time, *metron*, measure). Instrument to measure time elapsing from painful impression to appreciation of it by the nervous system.

Algesimeter, al-ges-im'e-tur (*algesis*, pain, *metron*, measure). Instrument to indicate amount of cutaneous sensibility.

Algetic, al-jet'ik. Painful.

Algia, al'je-ah. As suffix denotes pain, as *neuralgia*, pain of a nerve; *cephalalgia*, headache. Astringent.

Algid, al'jid. Cold; pernicious intermittent, accompanied by icy coldness, often fatal. **A. chol'era**, Asiatic cholera. **A. fe'ver**, fever accompanied with coldness.

Algidism (al'jid-izm), **Algidity** (al-jid'it-e), or **Algidness**, al'jid-ness. Coldness; chilliness.

Al'gin. Albuminoid substance obtained in separation of iodine from algæ.

Al'goid cells. Cells resembling lower algæ, noticed in cases of chronic diarrhœa.

Algometer, al-gom'e-ter. Instrument for determining acuteness of sensation of pain.

Al'gor. Rigor; chilliness. **A. mor'tis**, coldness of body after death. **A. progressi'vus**, sclerema neonatorum.

Al'gos. Pain.

Algosis, al-go'sis. Algæ as a cause of disease.

Algospasmus, al-go-spas'mus (*algos*, pain, *spasmos*, spasm). Painful spasm or cramp.

Algospastic, al-go-spas'tik. Relating to, or similar to, cramps.

Alhagi, al-hah'ge. Thorny shrub of Persia and Mesopotamia, from which manna is derived; leaves are purgative. **A. mauro'rum**, *Hebrew manna*, native of Egypt, Syria, Persia, and India. From leaves and branches sweet saccharine substance is obtained, called turanjeban, which many pharmacologists identify with Hebrew manna.

Alhandal, al-han'dal. Colocynth.

Alhasef, al-hah'sef. Sudamina.

Alibert's disease or **ke'loid.** True keloid; fungoid mycosis.

Alibility, al-i-bil'it-e (*alo*, to nourish). Capability of supplying nourishment.

Al'ible. Nutritious.

Alices, al'e-ces (*alizo*, to sprinkle). Spots preceding eruption of small-pox.

Alienatio, al-e-en-ah'she-o (*alienus*, strange). Anomaly, irregularity. **A. men'tis**, insanity. **A. par'tis**, gangrene of any part.

Alienation (ale-e-en-a'shun), **men'tal.** Insanity.

Alienatus, al-e-en-at'us. Insane; gangrenous.

Alienist, a'le-en-ist. Physician who devotes special attention to insanity and the insane.

Alienus, al-e-a'nus. Delirious; insane.

Aliferous, a-lif'er-us (*ala*, wing, *fero*, to bear). Wing-bearing.

Aliform, a'le-form (*ala,* wing, *forma,* shape). Wing-like. **A. mus'cles,** pterygoid muscles.

Aligulus, al-ig'u-lus. Confection.

Alima, al'im-ah (*alo,* to nourish). Aliments.

Alimellæ, al-im-el'la. Parotid gland.

Aliment, al'i-ment. Food; any substance which, if introduced into the system, is capable of nourishing it and repairing its losses. A classification of aliments or foods is usually founded on chemical analysis of the different principles contained in them. The following, by Yeo, presents a systematic arrangement of them:

Nitrogenous.
1. *Albuminates.* Nitrogenous substances having the same or nearly the same chemical composition as albumen. Examples: albumen, fibrin, syntonin, myosin, globulin, casein, from the animal kingdom; gluten and legumin, from the vegetable kingdom. (*a*) Subordinate nitrogenous substances referred to this class, and known as—
   Gelatinous substances: Gelatin, Casein, Chondrin.

Non-nitrogenous.
2. *Fats* or *hydrocarbons,* containing carbon, hydrogen, and oxygen, the proportion of oxygen being insufficient to convert all the hydrogen into water. Examples: olein, stearin, margarin (butter is a familiar one).
3. *Carbohydrates* contain carbon, hydrogen, and oxygen, the two latter elements in the proportions to form water. Examples: starch, dextrin, cane-sugar, grape-sugar, lactose or milk-sugar. (*a*) The *vegetable acids,* oxalic, tartaric, citric, malic, acetic, and lactic, are by some authors referred to this class.

Mineral.
4. *Mineral:* Water, salts, sodium and potassium chlorides, calcium and magnesium phosphates, iron, etc.

Alimental, al-i-ment'al. Nutritious.

Alimentary, al-i-ment'a-re. Nutritious; relating to food. **A. bo'lus,** food in the mouth, just ready to be swallowed. **A. canal, duct,** or **tube,** the digestive canal, beginning at the mouth and ending at the anus.

Alimentation, al-i-men-ta'shun. Act or power of nourishing; feeding. **A., artifi'cial,** feeding of those unable to receive food in the usual way. **A., cu'rative,** treatment by food without medicine. **A., io'dic,** giving of iodine internally in combination, with bread and other farinaceous substances. **A., organs of,** alimentary canal. **A., rec'tal,** feeding by the rectum, as by nutrient injections.

Alimentiveness, al-i-men'tiv-ness. Instinct for taking food, from a phrenological point of view.

Alimentum, al-im-en'tum. Aliment.

Alimonia, al-im-o'ne-ah. Aliment.

Alimos, al'im-os. Preventing hunger.

Alimus, al'im-us. Licorice.

Alinasal, al-i-na'sal. Relating to ala and nose.

Alindesis, al-in-da'sis (*alindesis,* rolling on the ground). Species of exercise consisting in rolling in the dust after having been anointed with oil.

Alipænos (al-ip-e'nos) or **Alipantos,** al-ip-an'tos (*a, lipaino,* to be fat). Epithet formerly given to external remedies devoid of fat or moisture, such as powders.

Alipasma, al-ip-az'mah (*aleipho,* to anoint, *pasma,* plaster). Ointment to prevent sweating.

Alipta, al-ip'tah (*aleiptes,* one who anoints). He who anointed athletæ after bathing; place was called *Alipterium.*

Aliptic, al-ip'tik. Relating to inunction or gymnastics.

Aliptica, al-ip'tik-ah. The part of ancient medicine treating of inunction as a means of preserving health.

Alisma, al-is'mah (*alisma,* water plantain). Gen. Alismaceæ. A. plantago, Arnica montana. **A. America'na,** variety of A. plantago. **A. graminifo'lia,** A. plantago. **A. lanceola'ta,** A. plantago. **A. planta'go,** water plantain; grows in swampy places in Europe and United States. Fresh root is acrid; dried leaves are vesicant. The leaves have been proposed as substitute for uva ursi.

Alisphenoid, al-i-sfe'noid. Portion of skull including greater wing and external pterygoid plate of sphenoid bone. **A. a'rea,** arca of skull separated from squamoso-temporal area by spheno-squamous suture.

Alisphenoidalia, al-e-sfen-oi-dal'e-ah. Greater wings of sphenoid bone.

Alitura, al-it-u'rah (*alo,* to nourish). Nutrition.

Alizarin, al-i'zar-in. Coloring matter of madder, used for staining microscopic preparations.

Alkahest, al'kah-hest. Alcaest.

Alkalescence, al-kal-es'sense. Condition in which a fluid becomes alkaline. **A. of the hu'mors,** an old notion of the humorists; can only occur during putrid fermentation of animal matters containing nitrogen, and producing ammonia.

Alkales'cent. Possessing properties of an alkali.

Alkali, al'ca-li (*al* [Arab.], the, *kali,* salsola, soda, plant containing large quantity of soda). Electropositive substance, soluble in water, possessing generally acrid, caustic taste, turning syrup of violets green, and restoring to blue infusion of litmus which has been reddened by acids; reddening yellow of turmeric, and having great tendency to unite with acids to form salts. In medicine potassa, soda, ammonia, and lithia are chief alkalies used; soda and potassa are fixed alkalies, ammonia is volatile alkali. **A. al'bumen,** produced by action of dilute alkalies on egg albumen. **A. ammoni'acum aceta'tum,** liquor ammonii acetatis. **A. ammoni'acum caus'ticum,** ammonia. **A. ammoni'acum flu'idum,** liquor ammoniæ. **A. ammoni'acum spirituo'sum,** spiritus ammoniæ. **A., caus'tic,** a pure alkali; one deprived of its carbonic acid. **A., fix'ed,** see *Alkali.* **A. fix'um tartariza'tum,** potassii tartras. **A. minera'le nitra'tum,** sodii nitras. **A. minera'le phosphora'tum,** sodii phosphas. **A. minera'le sali'num,** sodium chloride. **A. minera'le sulphu'ricum,** sodium sulphate. **A. tar'tari ace'to-satura'tum,** potassium acetate. **A. vegeta'bile cum ace'to,** potassium acetate. **A. vegeta'bile fix'um caus'ticum,** potassa fusa. **A. vegeta'bile sa'lito-dephlogistica'tum,** potassæ murias hyperoxygenatus. **A. vegeta'bile tartariza'tum,** potassium tartrate. **A. vegeta'bile vitriola'tum,** potassium sulphate. **A., veg'etable,** potash. **A. volat'ile,** ammonia. **A. volatile aceta'tum,** liquor ammonii acetatis. **A. volatile aëratum,** ammonium carbonate. **A. volatile ammoni'acale,** ammonium carbonate. **A. vola'tile caus'ticum,** ammonia. **A. vola'tile concre'te,** ammonium carbonate. **A. vola'tile, mild,** ammonium carbonate. **A. vola'tile nitra'tum,** ammonium nitrate. **A. vola'tile ex sale ammoni'aco,** ammonium carbonate. **A. v. tartariza'tum,** ammonium tartrate. **A. v. vitriola'tum,** ammonium sulphate.

Alkaligene, al'kal-i-jene (*alcali, gennao,* to generate). Nitrogen.

Alkaligenous, al-kal-ij'en-us. Producing alkali.

Alkalimeter, al-kal-im'et-ur (*alkali, metron,* measure). Apparatus for determining the amount of alkaline matter in any substance.

Alkalimetry, al-ka-lim'e-tre (*alkali, metron,* measure). Determination of amount of alkaline matter in any substance.

Alkaline, al'ka-line. Having properties of an alkali. **A. baths,** baths of sodium bicarbonate, borax, etc., dissolved in water, used in eczema, psoriasis, urticaria, etc. **A. earths,** see *Earths.*

Alkalinity, al-kal-in'it-e. Quality of being alkaline.

Alkalinuria, al-ka-lin-u're-ah (*alkali, ouron,* urine). Alkaline condition of urine.

Alkaliza'tion or **Alkaliniza'tion.** Process of rendering a substance alkaline.

Alkaloid, al'kal-oid (*alcali, eidos,* form). Literally, resembling an alkali. The name has, however, been given to nitrogenous organic alkalies to distinguish them from mineral, from which they differ in composition and properties; they all contain nitrogen. They are all most important on account of their medicinal and therapeutic action. The most valued are the following, according to Simon; coniine and

nicotine are liquid and volatile; the others are solid and fixed:

Coniine, $C_8H_{17}N$—In Conium maculatum.
Nicotine, $C_{10}H_{14}N_2$—In Tobacco-plant.
Morphine, $C_{17}H_{19}NO$
Codeine, $C_{18}H_{21}NO_3$
Thebaine, $C_{19}H_{21}NO_3$
Papaverine, $C_{21}H_{21}NO_4$
Narcotine, $C_{22}H_{23}NO_7$
Narceine, $C_{23}H_{29}NO_9$
Pseudomorphine, $C_{17}H_{19}NO_4$ } In Opium.
Protopine, $C_{20}H_{19}NO_5$
Codamine, $C_{20}H_{23}NO_4$
Laudamine, $C_{21}H_{27}NO_4$
Meconidine, $C_{21}H_{23}NO_4$
Cryptopine, $C_{21}H_{23}NO_5$
Laudamosine, $C_{21}H_{27}NO_4$
Quinine, $C_{20}H_{24}N_2O_2+3H_2O$
Cinchonine, $C_{19}H_{22}N_2O$
Quinidine, isomeric with quinine } In Cinchona-bark.
Cinchonidine, isomeric with cinchonine
Strychnine, $C_{21}H_{22}N_2O_2$ } In Nux vomica.
Brucine, $C_{23}H_{26}N_2O_4 + (4H_2O)$ }
Solanine, $C_{43}H_{71}NO_{16}$
Atropine, $C_{17}H_{23}NO_3$ } In Solanaceæ.
Hyoscyamine, $C_{17}H_{23}NO_3$
Cocaine, $C_{17}H_{21}NO_4$—In Erythroxylon coca.
Veratrine, $C_{32}H_{49}NO_9$—In Veratrin.
Aconitine, $C_{33}H_{43}NO_{12}$—In Aconitum napellus.
Colchicine, $C_{17}H_{19}NO_5$—In Colchicum autumnale.
Berberine, $C_{20}H_{17}NO_4$—In Berberis vulgaris.
Hydrastine, $C_{21}H_{21}NO_6$—In Hydrastis Canadensis.
Piperine, $C_{17}H_{19}NO_3$—In Pepper.
Emetine, $C_{28}H_{40}N_2O_5$—In Ipecacuanha-root.
Eserine, or Physostigmatine, $C_{15}H_{21}N_3O_2$—In Calabar bean.
Pilocarpine, $C_{11}H_{16}N_2O_2$—In Pilocarpus.
Caffeine, $C_8H_{10}N_4O_2+H_2O$—In Coffee and tea.
Theobromine, $C_7H_8N_4O_2$—In seeds of Theobroma cacao.

A., cadav'eric, see *Ptomaïnes.* **A., putrefac'tive,** see *Ptomaïnes.*

Alkaluret'ic. Producing or relating to alkaline urine.

Al'kanet, bas'tard. Lithospermum officinale. **A., dy'er's** or **false,** Anchusa tinctoria. **A., gar'den** or **offi'cinal,** Anchusa officinalis. **A. root,** Anchusa officinalis.

Alkanna, al-kan'nah. Isinglass; alkanet. **A. ma'jor latifo'lia denta'ta,** Primos verticillatus. **A. spino'sa,** Lawsonia inermis. **A. spu'ria** or **tincto'ria,** Anchusa tinctoria. **A. ve'ra,** Lawsonia inermis, L. alba. **A. vulga'ris,** Anchusa tinctoria.

Alkan'nin. Red coloring matter of alkanet-root, used for staining.

Alkaptone, al-kap'tone. Amorphous nitrogenous substance sometimes found in urine when latter is alkaline. Condition is called *Alkaptonu'ria.*

Alkar, al'kar. Medicament.

Alkarsin, al-kar'sin. Oily poisonous liquid produced by action of arsenic trioxide on potassium acetate.

Alkarva, al-kar'vah. Alkerva.

Alkekengi, al-ka-ken'je. Physalis.

Alkekengin, al-ka-ken'jin. Physalin.

Alkermes, al-ker'mes. Celebrated stimulant electuary, named from kermes contained in it; kermes.

Alkerva, al-ker'vah. Recently drawn castor oil.

Alkitran, al'kit-ran. Cedria.

Al'kol or **Alkool,** al-ko'ol. Alcohol.

Alkymistre, al-kim'is-tra. Alchymist.

Al'la. Ale.

Allæsthesia, al-lees-the'ze-ah. See *Allochoria.*

Allamanda, al-lam-an'dah (after Allamand, Leyden naturalist). Shrub of Guiana, infusion of whose leaves has been used in colic and colica pictonum. **A. cathar'tica,** allamanda. **A. grandiflo'ra,** allamanda.

Allanti'asis (*allas,* sausage). Sausage-poisoning, from putrefactive degeneration; met with more frequently in Germany.

Allan'tis. Allantois.

Allantodes, al-lan-to'des. Allantois.

Allantoic, al-lan'to-ik. Belonging or relating to the allantois. **A. acid,** amnic or amniotic acid; peculiar acid found in liquor of allantois of the cow. **A. ar'teries,** umbilical arteries. **A. flu'id,** liquor amnii.

Allantoid, al-lan'toid. Relating to the allantois. **A. mem'brane** or **ves'icle,** allantois.

Allan'toin. Substance found sometimes in minute quantities in allantoic fluid and in urine; it may be obtained from uric acid by oxidation. $C_4H_6N_4O_3$.

Allantois, al-lan'to-is (*allas,* sausage, *eidos,* shape). A structure developed as a hollow ventral outgrowth of the hinder portion of the primitive intestine of the embryo; its walls consist of the hypoblastic and splanchnopleural layers (Gray). In some animals it is called the allantoid or urinary vesicle of the fœtus, a sort of elongated bladder between the chorion and amnion, thrown out from the caudal extremity of the embryo, and communicating with the bladder by the urachus. As the allantois is developed, its walls become very vascular, and contain ramifications of what become umbilical artery and vein, which, by elongation of the allantois, are brought through the villi of the chorion into indirect communication with the vessels of the mother. The inferior part of the allantois becomes the bladder; other portions the urachus.

Allantotoxicon (al-lan-to-tocks'ik-on) or **Allantotoxicum,** al-lan-to-tocks'ik-um (*allas,* sausage, *toxicon,* poison). Sausage-poison; poison developed in sausages, especially when made of blood and liver.

Allantum, al-lan'tum. Substance found sometimes in minute quantities in allantoic fluid and in urine; may be obtained from uric acid by oxidation.

Al'larton's operation of lithot'omy. See *Lithotomy.*

Allasia payos, al-lah'se-ah pay'os. Cucurbitaceous plant of Southern Africa, leaves of which are said to be parturifacient.

Allaxis, al-laks'is (*allasso,* to change). Change; transformation.

Allectuary, al-lek'tu-a-re. Electuary.

Alleluia, al-le-lu'e-ah. Wood sorrel, Oxalis acetosella.

Allenthesis (al-len'tha-sis), **Allentheton** (al-len'tha-ton), or **Allenthetum,** al-len'tha-tum (*allos,* another, *enthesis,* introduction). Entrance into or presence of extraneous bodies in the organism.

Allentois, al-len'to-is. Allantois; large toe.

Alleot'ic. See *Allœotic.*

Allerimbrabo, al-ler-im-brah'bo. Brazilian name of Hypericum laxiusculum.

Allevamentum, al-la-vam-en'tum (*allevo,* to relieve). Alleviation; means of relief.

Alleviation, al-le-ve-a'shun (*ad, levo,* to raise). Process of relieving pain.

Alleviator, al-le've-a-tor (*ad, levo,* to raise). Instrument for raising invalids.

Allex, al'leks (*allomai,* to leap). Thumb; big toe. See *Hallux.*

All'flower-wa'ter. Cow's urine; once used as purgative.

All'good. Chenopodium bonus Henricus.

All'heal. Panacea; Heraclium spondylium, species of Ferula; Stachys palustris; Panax heracleum; Opoponax chironium.

Alliaceous, al-le-a'she-us (*allium,* garlic). Belonging to garlic, as alliaceous odor.

Alliaria, al-le-ah're-ah (*allium,* garlic, from its smell). *Jack-in-the-hedge, Stinking hedgemustard, Hedge-garlic, Sauce-alone.* Ord. Cruciferæ. Plant sometimes used in humid asthma and dyspnœa; reputed to be diaphoretic, diuretic, and antiscorbutic.

Alligamen, al-lig-am'en (*alligo,* to bind to). Bandage.

Alligation, al-le-ga'shun (*alligo,* to bind to). Combination of several metals.

Alliga'tor pear. Seeds of Persea gratissima, Avocado pear. Used externally in intercostal neuralgia. **A. pear, Chinese,** seeds are antisyphilitic.

Alliga'tor-jaw for'ceps. Instrument with wide jaws and long sliding handles, used to seize foreign bodies in the urethra and other passages.

Alligatura, al-lig-at-u'rah (*alligo,* to bind to). Fascia; ligature; ligation.

Allii (al'le-e) **bul'bus.** Bulb of A. sativum.

Allioticus, al-le-ot'ik-us. Alterative.

Allium, al'le-um. Garlic. Ord. Liliaceæ. Native of Sicily, but cultivated for use. Bulbs or cloves have strong, offensive, and penetrating odor, and sweetish, biting, and caustic taste, and contain pungent volatile oil, allyl sulphide. Bulb of A. sativum, Ph. U. S. Internally, garlic is stimulant, diuretic, expectorant, diaphoretic, and anthelmintic; externally, rubefacient, maturative, and repellent. It is applied as rubefacient to the chest in croup. Virtues of genus Allium depend upon acrid principle soluble in water, alcohol, acids, and alkalies. **A. ampelopra'sum** or **ascen'dens,** species of European allium, used as diuretic, emmenagogue, and antidote to snakebites. **A. Ascalon'icum,** shallot. **A. Canaden'se,** meadow garlic, wild garlic; indigenous; has same properties as allium. **A. ce'pa,** common onion; acrid, stimulating, and possessing little nutriment. Onions have been used as stimulants, diuretics, and anthelmintics; boiled or roasted, as cataplasm, emollient, and maturating; fresh root is rubefacient; expressed juice is used in otalgia and rheumatism. **A. cer'nuum,** wild onion; indigenous; medicinal properties similar to others of this class. **A. fistulo'sum,** Welsh onion, rock onion, of Northern Europe; edible. **A. Gal'licum,** Portulaca. **A. leptophyl'lum,** edible species of E. Indies. **A. mo'ly,** garden garlic of S. of France; aperient. **A. moscha'tum,** species growing in S. of France; diuretic. **A. obli'quum** and **A. o'dorum** are edible European species. **A. olera'ceum,** field garlic; bulb is diuretic. **A. plantagin'eum,** A. victoriale. **A. por'rum,** leek or porret, possesses same property as onion as an edible and a medicine. **A. red'olens,** Teucrium scordium. **A. sati'vum,** allium. **A. Schoenopra'sum,** chive, chives, or cive; properties of bulb similar to garlic. **A. uligino'sum,** species in Asia, used externally in tooth-ache; internally, in hemorrhage, spermatorrhœa, etc. **A. ursi'num,** species of Siberia and Central Europe; antiscorbutic, diuretic, anthelmintic. **A. victoria'le** or **victorialis,** root which, when dried, loses alliaceous smell and taste; has been used to allay abdominal spasms of pregnant women. **A. vulga're,** A. sativum.

Al'lo (*allos,* another). In composition, another.

Allochetia (al-lo-ket'e-ah) or **Allochezia,** al-lo-kez'e-ah (*allo, chezo,* to go to stool). Discharge of extraneous matters from the bowels; discharge of fæces by an abnormal opening.

Allochiria, al-lo-kir'e-ah (*allos,* another, *cheir,* hand). Perverted sensibility, impression on the part seeming to be felt on the other side; a symptom of tabes dorsalis and other spinal diseases, and of hysteria.

Allochoos, al-lo'ko-os. Talking in a wild and delirious manner.

Allochroic (al-lo-kro'ik) or **Allochröous,** all-lok'ro-us (*allo, chroma,* color). Changing color; varying in color. Condition is called *Alloch'roism.*

Allochromasia, al-lo-kro-mah'ze-ah (*allo, chroma,* color). Change of color; color blindness.

Allocinetic, al-lo-sin-et'ik (*allo, kinesis,* motion). Acting in response to external impressions from without on motor nerves.

Allœomor'phia or **Allœomorpho'sis** (*alloios,* different, *morphe,* shape). Change of form; metamorphosis.

Allœopathia, al-le-o-path-e'ah (*alloios,* different, *pathos,* disease). Allopathy.

Allœopathic, al-le-o-path'ik. Allopathic.

Allœosis, al-le-o'sis. Alteration; mental disturbance.

Allœotic, al-le-ot'ik. Alterative.

Allogotrophia, al-lo-go-trof'e-ah (*allo, trophe,* nourishment). Act of nourishing one portion of the body by material derived from another portion.

Alloiosis, al-loy-o'sis. Alteration.

Alloiotic, al-loy-ot'ik. Alterative.

Allolalia, al-lo-lal'e-ah (*allo, lalia,* speech). Disorder or impediment of speech. One so affected is *Allol'alous.*

Allomorphism, al-lo-mor'fism. Allœomorphia.

Allopath, al'lo-path. Allopathist.

Allopathes, al-lop'ah-thes. Allopathic.

Allopathic, al-lo-path'ik. Relating to ordinary rational method of medical practice, in contradistinction to homœopathy. See *Allopathy.*

Allopathist, al-lop'a-thist (*allo, pathos,* affection). One who believes in or practises allopathy.

Allopathy, al-lop'a-the (*allo, pathos,* disease). Disease produced by external causes. Method of treatment in which remedial agents are employed, the action of which produces symptoms different from those observed in the sick person; opposite to homœopathy. A term often employed, as a name for rational medication, by those who do not understand the principles of the latter.

Allophasis, al-lof'as-is (*allo, phao,* to say). Delirium.

Allorhythmia (al-lo-rhith'me-ah) or **Allorythmia,** al-lo-rith'me-ah (*allo, rhuthmos,* rhythm). Variation in rhythm of pulse.

Allosorus crispus, al-lo-so'rus kris'pus. Rockbrake; decoction is expectorant.

Allosteatodes, al-lo-ste-at-o'des (*allo, stear,* suet). Alteration of sebaceous secretion of skin.

Allotriapostema, al-lo-tre-ap-os-ta'mah (*allotrios,* foreign, *apostema,* abscess). Abscess containing a foreign body.

Allotrio, al-lo'tre-oh (*allotrios*). In composition, pertaining to others; foreign.

Allotriochetia (al-lo-tre-o-ket'e-ah) or **Allotriochesia,** al-lo-tre-o-kez'e-ah (*allotrio, chezo,* to go to stool). Allochetia.

Allotriodontia, al-lo-tre-o-don'she-ah (*allotrio, odous,* tooth). Transplantation of teeth; insertion of false teeth; unusual position of teeth.

Allotrioëccrisis, al-lo-tre-o-ek'kris-is (*allotrio, ekkrisis,* separation). Separation of extraneous matters from the body in disease.

Allotriogeustia (al-lo-tre-o-goost'e-ah) or **Allotriogeusia,** al-lo-tre-o-goos'e-ah (*allotrio, geusis,* taste). Absence of perversion of taste.

Allotriolithiasis, al-lo-tre-o-lith-e'as-is (*allotrios,* foreign, *lithiasis,* formation of stone). Formation of calculus from foreign material or in an unusual position.

Allotriophagy, al-lo-tre-of'a-je (*allotrio, phago,* to eat). Inclination or taste for articles not suitable for food. One so addicted is an *Allotrioph'agist.* See *Pica.*

Allotriotectic, al-lo-tre-o-tek'tik. Born preternaturally.

Allotriotexis, al-lo-tre-o-teks'is (*allotrio, texis,* parturition). Bringing forth an abnormous fœtus.

Allotriuria, al-lo-tre-u're-ah (*allotrio, ouron,* urine). Admixture of foreign matters with urine.

Allotrophic, al-lo-trof'ik (*allo, trophe,* nourishment). Perverted in nutrition; lacking nutritive qualities; affecting nutrition in an unusual manner.

Allotrop'ic. Relating to allotropism.

Allotropism (al-lot'ro-pizm) or **Allotropy,** al-lot'ro-pe (*allo, tropos,* turn or change). Term of modern chemistry to express property possessed by certain bodies of assuming different qualities when subjected to certain modes of treatment. Carbon, for example, furnishes three forms—plumbago, charcoal, diamond.

Alloxan, al-loks'an. $C_4H_2N_2O_4$. Result of action of nitric acid or nascent chlorine on uric acid at low temperature; found occasionally in mucus of intestine in catarrhal enteritis.

Alloxan'ic acid. Acid obtained by treating alloxan with alkalies.

Alloxanthin (al-loks-an'thin) or **Alloxantin,** al-loks-an'tin. Result of action of very dilute nitric acid or uric acid on alloxan. $C_8H_4N_4O_7 + 3H_2O$.

Alloy'. See *Allegation.*

All'spice. Berries of Myrtus pimenta. **A. bush,** laurus benzoin. **A., Caroli'na,** calycanthus. **A., Japan,** Chimonanthus fragrans. **A. tree,** pimenta; calycanthus. **A., wild,** laurus benzoin.

Allucinatio, al-lu-sin-ah'she-oh. Hallucination.

Allus, al'lus (*allomai*, to leap). Great toe. **A. pol'lex**, great toe; thumb.

Allux, al'luks. Great toe.

Allyl, al'lil. Organic radicle, base of volatile oils of alliaceous plants. **A. sul'phide** $(C_3H_5)_2S$, essential oil of garlic.

Allylamine, al-lil'a-mine. If atom of allyl be substituted for one of H in ammonia, liquid results, producing sneezing and flow of tears when inhaled.

Allyl'ic al'cohol. C_3H_5OH. A liquid obtained by distilling a mixture of glycerine and oxalic acid. **A. al'dehyde**, acrolein.

Alma, al'mah. Sea-water. Movement of fœtus; movement of pulse; palpitation of heart.

Almariab, al-mah're-ab. See *Plumbi oxidum semivitreum*.

Almarida (al-mar'id-ah) **cathar'tica.** Plant of Cayenne, used as cathartic and in colic.

Almendora, al-men-do'rah. Geoffroya superba.

Almen's test for blood. Addition of freshly prepared tincture of guaiacum and ozonized ether gives blue color if blood be present in the matter examined.

Almezerion, al-ma-za're-on. Cneorum tricoccum.

Al'mond. Amygdala. **A., bitter**, amygdala amara. **A. cake**, amygdalæ placenta. **A. confec'tion**, pulvis amygdalæ compositus. **A. of the ear**, tonsil. **A. earth**, arachis hypogæa. **A., Jordan**, see *Amygdala*. **A. legu'min**, amandin. **A. milk**, mistura amygdalæ. **A. mixture**, mistura amygdalæ. **A. oil**, oleum amygdalæ. **A. paste**, amygdalæ pasta. **A. pow'der**, amygdalæ placenta. **A., sweet**, amygdala dulcis. **A. of the throat**, tonsil.

Alnus. Alder. **A. commu'nis**, A. glutinosa. **A. fran'gula**, Rhamnus frangula. **A. glau'ca**, A. incana. **A. glutino'sa**, European alder; bark and leaves are astringent and bitter; hence employed in intermittents and as tonic and astringent, and externally leaves are applied to sweating feet, and to the breast as an antigalactic. **A. inca'na**, tag alder, plant common in United States and Canada; bark is used, externally and internally, as hæmostatic in all forms of hemorrhage. **A. ni'gra**, Rhamnus frangula. **A. serrula'ta**, American alder, has similar properties to A. glutinosa.

Alo. Adansonia digitata.

Alocasia (al-o-kah'se-ah) **monta'na.** E. Indian variety of genus Colocasia; juice is stimulant and rubefacient.

Alochia, al-o'ke-ah (*a*, *locheia*, lochia). Absence of lochial discharge.

Al'oe or **Al'oë** (Arab.). Aloes. Nat. ord. Liliaceæ. **A. Africa'na**, Cape aloes. **A. America'na**, Agave Americana. **A. Barbaden'sis**, Aloes hepatica. **A. caballi'na**, horse aloes, fetid aloes; used chiefly for horses; collected in Spain and Portugal, and very coarse. **A. Capen'sis**, Cape aloes. **A. Dioscor'idis**, Barbadoes aloes. **A., false**, Agave virginica. **A. fe'rox**, Cape aloes. **A. hepat'ica**, hepatic aloes, Bombay or Barbadoes aloes; disagreeable taste and odor; cathartic. **A. lu'cida**, Socotrine aloes. **A. Natalen'sis**, Natal aloes. **A. perfolia'ta**, a source of Cape aloes. **A. Perryi**, a source of Socotrine aloes. **A. purifica'ta**, aloes, purified. **A. root**, Aletris farinosa. **A. spica'ta**, Cape aloes. **A. variega'ta**, Mexican species of aloes; juice is cathartic and anthelmintic. **A. vulga'ris**, Indian and African plant, cultivated in West Indies; important source of Barbadoes aloes.

Aloëdarium, al-o-a-dar'e-um. *Aloedary.* Compound medicine containing aloes.

Aloeresin, al-o-res'in. Aloes resin.

Al'oes. Inspissated juice of the aloe. **A., Amer'ican**, Agave Americana. **A., Barba'does**, A. hepatica. **A., bastard**, Agave Americana. **A., Beth'elsdorf**, see *Aloes, Cape*. **A., blue**, Agave Americana. **A., Bombay'**, A. hepatica. **A., cab'alline**, Aloe caballina. **A., Cape**, shining aloes; cheap and excellent form of aloes, collected at Cape of Good Hope from Aloe ferox, A. Africana, A. spicata, and other species. Finest kind, collected at Bethelsdorf, is called Bethelsdorf aloes. **A., cen'tury**, Agave Americana. **A., East India**, A., Socotrine. **A., extract of**, extractum aloës. **A., fet'id**, Aloes caballina. **A. Guiniensis**, A. caballina. **A., hepat'ic**, Aloe hepatica. **A., horse**, A. caballina. **A., In'dian**, Bombay aloes. **A., insol'uble**, aloes resin. **A., liv'er**, Aloe hepatica. **A., Natal'**, variety of aloes from Natal. **A., pills of**, see *Pilulæ aloes, etc.* **A., pu'rified**, aloes purified by action of alcohol. **A. res'in**, resinous substance deposited from hot-water solution of aloes on cooling; supposed to be cause of griping produced by aloes. **A. root**, Aletris farinosa. **A., shin'ing**, Cape aloes. **A., Soc'otrine** or **Socoto'ra**, *Turkey* or *East India aloes;* is the best species. It is cathartic, warm, and stimulating; emmenagogue, anthelmintic, and stomachic. As a cathartic it affects the rectum chiefly. Dose, as a cathartic, gr. v to ℈j in pill. Chief constituent is aloin, a glucoside, named, according to kind of aloes, socaloin, barbadaloin, etc. See *Extractum, Tinctura, Pilula*, etc. **A., translu'cent**, aloes, Socotrine. **A., Tur'key**, A., Socotrine. **A., Turkistan**, aloes, Bombay. **A., vulga'ris** or **v. extrac'tum**, Aloe hepatica. **A. wood**, agallochum. **A., Zan'zibar**, aloes, Socotrine. **A., Zocotori'na** or **Zocotri'na**, A., Socotrine.

Aloësin, al-o'a-sin. Aloin.

Al'oes-wood. Various plants have been credited with the production of this wood, which, when burned, gives rise to a stimulating perfume.

Aloëtic, al-o-et'ik. Preparation containing aloes. **A. acid**, $C_7H_2(NO_2)_2O$, is obtained from aloes by acting upon it with nitric acid.

Aloëtica, al-o-et'ik-ah. Remedies containing aloes.

Aloëtin, al-o'e-tin. See *Aloin*.

Aloëxylon, al-o-eks'il-on (*xulon*, wood). Agallochum.

Aloghermaphroditia, al-og-her-maf-ro-dish'e-ah (*alogos*, abnormal, *hermaphroditos*, hermaphrodite). Hermaphroditism.

Alogia, ah-lo'ge-ah (*logos*, word). Impossibility of speaking, from defect in formation of ideas.

Alogotrophy, al-o-got'ro-fe (*alogos*, disproportionate, *trophe*, nutrition). Irregular nutrition; irregular manner in which nutrition of bones is effected in rickets.

Alogous, al'og-us (*a*, *logos*, discourse). Unable to speak; not clear in ideas.

Aloïn, al'o-in. Name given to bitter glucoside obtained from different varieties of aloes, and hence called barbaloin, socaloin, etc. Dose as cathartic, half a grain to three grains. The soluble uncrystallizable principle of which aloes mainly consists is called aloëtin, dose of which is slightly less than that of aloes.

Alomania, al-o-man'e-ah (*hals*, salt). Mania or craving for salt.

Alon'soa. Plant of Peru, anodyne and stomachic.

Alopeces, al-o'pa-ses (*alopex*, fox, being strong in that animal). Psoas muscles.

Alopecia, al-o-pa'she-a (*alopex*, fox, this animal being said to be subject to the affection). Baldness; falling off or loss of hair. When confined to the crown of the head, it is called calvities, although the terms are often used synonymously. When congenital, it is called *atrichia* or *alopecia aduata*; falling off of hair in old age is termed *alopecia senilis*. **A. adna'ta**, see *Alopecia*. **A. a'rea** or **area'ta**, porrigo decalvans. **A. circumscrip'ta**, porrigo decalvans. **A. furfura'cea**, pityriasis capitis. **A. neurit'ica**, alopecia consequent on neuritis. **A. neurot'ica**, baldness produced by disease of nervous system. **A. partialis**, porrigo decalvans. **A. pityroïdes**, baldness from parasitic growth, as on scalp; see *Seborrhœa*. **A. præseni'lis**, premature loss of hair before old age. **A. senilis**, alopecia of old persons. **A. syphilit'ica**, alopecia due to syphilitic origin. **A. trichophyt'ina**, loss of hair from Tinea trichophytina. **A. un'guis**, onychoptosis.

Alosa menhaden, al-o'sah men-had'en. Menhaden fish, oil of which has been used, like cod-liver oil, internally.

Aloy'sia citriodo'ra. Lemon verbena, growing in S. America; leaves are stimulant and antispasmodic.

Alpha oxynaphthoic acid, al'fa ocks-in-af'tho-ik as'id. Disinfectant obtained from naphthol.

Alpha-orcein, al'fah-or'se-in. Term applied to substance supposed to compose orcein of archil.

Alpha-orsellic acid, al'fah-or-sel'lik as-id. Substance found in orchella containing the colorific matter.

Alpha-resin, al'fah-res'in. Term applied to one of the two resins of colophony.

Alphelasma, al-fel-as'mah (*alphos*, white). Disease of mucous membrane of mouth and lips, characterized by grayish-white spots.

Alphicus, alf'ik-us (*alphos*, leprosy). Leprosy-curer.

Al'phita. Nux vomica.

Alphitedon, alf-it-e'don (*alphiton*, meal). Comminuted fracture.

Alphiton (alf'it-on) or **Alphitum**, alf'it-um. Farina; any kind of meal; toasted barley-meal. Food composed of Indian meal, cheese, etc. See *Farina*.

Alphodeopsoriasis, al-fo-da-o-sor-e'as-is (*alphos*, leprosy). Psoriasis having appearance of leprosy.

Alphodermia, al-fo-dur'me-ah (*alphos*, white, *derma*, skin). Achromatosis; albinism.

Alphonsin, al-fon'sin. Bullet forceps, called from inventor, Alphonso Ferri of Naples.

Alphos, al'fos (*alphos*, white). Lepra alphoides, psoriasis, vitiligo, alphus. **A. achromato'sis**, albinism. **A. Æthiop'ica**, albinism. **A. a'grius**, psoriasis agria. **A. confer'tus**, herpes scrophulosus. **A. gutta'tus**, psoriasis guttata. **A. linguæ**, eruptive lingual disease, like psoriasis. **A. papulo'sus**, psoriasis. **A. puncta'tus**, punctate or pointed form of psoriasis. **A. pustulo'sus**, pustular psoriasis. **A. universa'lis**, general psoriasis.

Alphous, al'fus. Relating to lepra alphoïdes.

Alphus, al'fus. Alphos; scrofulous pustular disease. **A. confer'tus**, form of clustered impetigo. **A. leu'ce**, vitiligo with white spots. **A. spar'sus**, scattered form of ecthyma.

Alpinia (al-pin'e-ah) (after Prosper Alpinus) **allughas.** Species growing in India, anodyne, emmenagogue, and antiarthritic. **A. aromat'ica**, species growing in Guiana, carminative. **A. cardamo'mum**, Amomum cardamomum. **A. exalta'ta**, Renealmia exaltata. **A. galan'ga**, Maranta galanga. **A. racemo'sa**, species of Guiana and West Indies; root is used as external application to cancerous tumors and ulcers. **A. tubula'ta**, Renealmia exaltata.

Alpi'us bal'samum. See *Balsamum alpini*.

Alsan'ders. Smyrnium olusatrum.

Alseodaphne amara, al-se-o-daf'ne am-ar'ah. Species of lauraceous plant of Brazil; bark is aromatic tonic. **A. cymba'rum**, Brazilian tree, bark of which is bitter aromatic tonic; yields laurel oil, used in joint affections. **A. opif'era**, from bark of which species balsam is procured, used externally for rheumatism.

Alsidium (al-sid'e-um) **Blodget'ti.** Grows in North America; used in scrofula and phthisis. **A. helminthochor'ton**, Corallina Corsicana.

Alsine avicularum (al-se'na av-ik-u-lah'rum), or **me'dia**, or **vulga'ris** (*alsos*, a grove). *Mouse-ear, Chickweed, Chickenwort.* Ord. Caryophyllaceæ. This plant boiled may be eaten like spinach, and externally is used as emollient poultice.

Alstonamine, al-sto'nam-een. Alkaloid derived from bark of Alstonia spectabilis.

Alstonia, al-sto'ne-ah (after Prof. C. Alston of Edinburgh) or **A. constric'ta**, *Native quinine, Australian fever-tree, Bitter bark of Australia*, nat. ord. Apocynaceæ. Species of Alstonia growing in Australia, bark of which is antiperiodic. **A. schola'ris**, devil-tree; tree of East Indies, from which dita-bark is obtained; used in dysentery. **A. spectab'ilis**, tree indigenous to Java; antiperiodic. **A. theæfor'mis**, Santa Fé tea; plant of New Mexico, leaves of which are used as tea. **A. venen'ata**, species of East Indies, having poisonous juice.

Alstonicine (al-ston'is-een), **Alstonidine** (al-ston'id-een), and **Alstonine**, al'sto-neen. Alkaloids from alstonia-bark; antiperiodic and stimulant.

Alstroeme'ria (after Alstroemer of Göthenburg). Source of Talcuahana arrow-root; several species yield arrow-root.

Al'ter (*alter*, other). To begin menstruation; to castrate. **A. sex'us**, "the other sex;" female sex.

Alterant, awl'ter-ant. Alterative.

Alterantia nervina, al-ter-an'she-ah ner-ve'nah. Nervous alteratives; term given to substances whose use is followed by changes in the cerebrum and is accompanied by disturbance of the intellectual faculties.

Alteration, awl-ter-a'shun (*alter*, other). Any change, as in expression of countenance, structure of organ, or nature of fluids excreted, as milk, wine, etc.; intense thirst in disease; castration. **A. the'ory**, see *Difference theory*.

Alterative, awl'ter-a-tiv. Agent producing a salutary change in disease by improving the nutrition of the body, without exciting sensible evacuation or any very marked action on individual organs; such remedies have hence been called eutrophics, or improvers of nutrition. The chief alteratives are arsenic, iodine, cod-liver oil, gold, and mercury. See *Materia Medica* (table). Also that which causes thirst.

Altercangenon (awl-ter-can'ge-non) or **Altercum**, awl-ter'kum. Hyoscyamus.

Altered, awl'terd. Castrated.

Alternate, awl-tur'nate. Opposite, successive; as *A. hemiplegia*, paralysis of one side of the face, accompanied with paralysis of the limb on opposite side.

Alterna'tion. Opposite condition or succession; as *A. of generation*, difference in progeny from parents of same species, with reproduction afterward of original form.

Althæa (al-the'ah) or **A. officina'lis** (*altheo*, to heal). Marshmallow, ord. Malvaceæ. Leaves, *althææ folia*, and root, *a. radix*, contain much mucilage; are emollient and demulcent. Althæa (Ph. U. S.) is the root of Althæa officinalis; alkaloids, *asparagin* and *althæin*, are derived from it; former is sedative and diuretic in ascites and gout.

Altheus, al-tha'us (*altheus*, one who cures). Physician or surgeon.

Althexis, al-thecks'is (*althexis*, act of healing). Cure; act of curing.

Althos, al'thos (*althos*, cure). Medicament.

Altrix, al'triks (*alo*, to nourish). Foster-mother; wet-nurse.

Alucinatio, al-u-sin-a'she-o. Hallucination.

Alula, al'u-la (dim. of **ala**, wing). Little wing.

Al'um. Alumen, aluminii et ammonii sulphas, symphytum. **A., ammo'nia**, or **A., ammoni'acal**, aluminii et ammonii sulphas. **A., ammoniofer'ric**, ferri et ammonii sulphas. **A., burnt**, alumen exsiccatum. **A., car'mine**, fluid used for staining, made of carmine boiled in solution of alum. **A. cat'aplasm**, coagulum aluminis. **A., com'mon**, alumen commune. **A. curd**, coagulum aluminis. **A., dried**, alumen exsiccatum. **A., Egyp'tian**, Ægyptia stypteria. **A., Eng'lish**, common alum. **A. oint'ment**, ointment consisting of turpentine, lard, and powdered alum. **A. potas'sa**, alumen. **A. poul'tice**, coagulum aluminis. **A., rock**, alumen commune. **A., Ro'man**, alumen Romanum. **A. root**, astringent root of Heuchera Americana and Geranium maculatum; see *Geranium* and *Heuchera*. **A., solu'tion of, com'pound**, liquor aluminis compositus. **A. water**, solution of alum in water. **A. whey**, liquid separated when milk is coagulated by powdered alum.

Alumen, al-u'men (Arabic term, *alum* or *als*, salt). *Alum, Sulphate of aluminium and potassium* (Ph. U. S.). Potassa alum. Has sweetish taste; soluble in water; astringent and emetic. Dose as an emetic, a teaspoonful; as an astringent, gr. v–xx. Used externally in solution and as a gargle. **A. ammo'nio-fer'ricus**, sulphate of iron and ammonia; astringent. **A. calcina'tum**, dried or burnt alum. **A. catinum**, potash of commerce. **A. commu'ne**, *Common alum, English alum, Rock alum*, the variety usually employed. Generally in large, white, semitransparent masses; has sweetish, styptic taste; effloresces in air, and is soluble in water. **A. crystal'linum**, common alum. **A. exsicca'tum**, *Burnt alum, Dried alum.* Alum melted in an earthen vessel until ebullition ceases, the water

of crystallization being driven off. Escharotic. **A. factit'ium,** common alum. **A. fæ'cum,** see *Potash.* **A. kinosa'tum,** pulvis sulphatis aluminæ compositus. **A. ru'peum,** A. commune. **A. sicca'tum,** alumen exsiccatum. **A. us'teum,** A. exsiccatum.

Alumina, al-u'min-ah. Oxide of aluminium, used as astringent in diarrhœa and dysentery. **A., a'cetate of,** aluminii acetas. **A. acet'ica,** aluminii acetas. **A. and ammo'nia, sulphate of,** aluminii et ammonii sulphas. **A., ben'zinated solution of,** see *Aluminii sulphas.* **A. depura'ta,** argilla pura. **A. pura,** argilla pura.

Aluminated copper, al-u'min-a-ted kop'per. Preparation formerly used as a collyrium.

Alumin'ii ace'tas. Aluminium acetate. Deliquescent salt having same properties as aluminium sulphate. Has been used externally in parasitic skin diseases and as antiseptic. **A. et ammo'nii sul'phas** (Ph. U. S.), sulphate of aluminium and ammonium, ammonia alum; combination of sulphate of aluminium and sulphate of ammonium. Term alum was at one time officinally applied to this salt. **A. chlo'ridum,** Al_2Cl_6, colorless, deliquescent salt; disinfectant. **A. hy'dras** (Ph. U. S.), hydrate of aluminium, mild astringent for external use. **A. ox'idum,** argilla pura. **A. et potas'sii hypersul'phas,** alumen. **A. et potassii sulphas,** alumen (Ph. U. S.). **A. et potas'sii supersul'phas,** alumen. **A. sul'phas** (Ph. U. S.), sulphate of aluminium, S. of alumina; made by direct combination of alumina and sulphuric acid, or by double decomposition from sulphate of aluminium and carbonate of sodium; dissolving precipitate in dilute sulphuric acid. Deliquescent salt, antiseptic and detergent to ulcers, astringent, escharotic, and disinfectant; is used as an injection in fetid abscesses, leucorrhœa, etc., and as a gargle in throat affections; chiefly used to preserve dead bodies, a strong solution—one pound in two pints of water—being injected into the arteries. **A. sul'phas acid'ulus cum potassâ,** alumen. **A. sul'phas fu'sus,** alumen exsiccatum.

Aluminium (al-u-min'e-um), **a'cetate of.** Aluminii acetas. **A. a'ceto-tar'trate** has been employed sometimes in place of carbolic and salicylic acids. **A. and ammo'nium sul'phate,** aluminii et ammonii sulphas. **A., chlo'ride of,** chloralum. **A., hy'drate of,** white, tasteless powder, formed by precipitating solution of alum with sodium carbonate. **A. and iron, sulphate of,** formed by dissolving alumina and carbonate of iron in sulphuric acid; astringent, styptic, and vermifuge. **A., o'leate of,** see *Oleates.* **A. and potassium sulphate,** alumen. **A., sul'phate of,** aluminii sulphas. **A., tan'nate of,** see *Tannin.*

Aluminosis, al-u-min-o'sis. Condition of bronchial irritation noticed in workers in porcelain, the dust of clay used being deposited in the lungs.

Al'ums. Name given to group of salts resembling common alum.

Alus (a'lus) or **A. Gal'lica.** Symphytum.

Alusia, al-u'ze-ah. Hallucination. Abstinence from washing. **A. hypochondri'asis,** hypochondriasis.

Aluta, al-u'tah. Leather for spreading plaster; cosmetic.

Alvearium, al-ve-ar'e-um (*alveus,* cavity). External auditory canal.

Alveary, al've-ar-e. See *Alvearium.*

Al'veloz or **Al'veoloz.** Syrupy juice from Euphorbia heterodoxia, suggested as topical suppurative application in cancer; also diuretic.

Alveolar, al-ve'o-lar (dim. of *alveus,* cavity). Having small cavities; relating to alveoli or sockets of teeth. **A. ab'scess,** parulis. **A. ar'ches,** arches formed by arches or borders of the two jaws, which are hollowed by alveoli. **A. ar'tery,** supramaxillary artery, arises from internal maxillary, descends behind tuberosity of upper jaw, and gives branches to upper molar teeth, gums, periosteum, membrane of maxillary sinus, and buccinator muscle. **A. bor'der,** part of jaws hollowed by alveoli. **A. can'cer,** colloid cancer. **A. ducts,** minute canals passing from terminal bronchioles to pulmonary air-vesicles. **A. mem'brane,** delicate membrane between teeth and alveoli, formed by portion of sac or follicle enclosing the tooth before it pierces the gum; has been called alveolo-dental periosteum. **A. nerves,** dental branches of maxillary nerves. **A. pas'sages,** terminal branches of bronchioles. **A. point,** central point in front of upper alveolar arch, used in measurements of skull. **A. pro'cess,** thick border of upper and lower jaw, pierced with alveoli in sockets of teeth. **A. sarco'ma,** form of sarcoma in which cells are arranged in alveoli. **A. of sto'mach,** etc., honeycomb depressions in stomach and other parts of alimentary canal. **A. struc'ture,** name given to honeycomb depressions in the mucous membrane of the stomach and other parts of the alimentary canal. **A. veins** have similar distribution with the artery.

Alveolarium, al-va-o-lar'e-um. External auditory canal.

Alveolate, al-ve'o-late. Full of small cavities.

Alveolez, al-va'o-lez. Alveloz.

Alveoli (al-va'o-le) and **A. den'tis.** Sockets of the teeth. **A. larynge'i,** ventricles of the larynx. **A. of lungs,** air-cells. **A. of lymphat'ic glands,** small spaces in lymphatic glands, formed by trabeculæ and containing adenoid tissue. **A. Morgagn'ii,** ventricles of the larynx. **A. pulmo'num,** air-cells.

Alveoliform, al-ve'o-le-form. Having small spaces or alveoli.

Alveolitis, al-va-o-le'tis. Inflammation of socket of tooth.

Alveolo-condyle'an ang'le and **plane.** Angles and planes in facial measurement taken with alveolar arch and condyles of occipital bone as chief points.

Alve'olo-cuta'neous mus'cle. Orbicularis oris.

Alveolo-dental periosteum, al-ve'o-lo-den'tal pe-re-os'te-um. Alveolar membrane or periodontium.

Alveolo-labial (al-ve'o-lo-la'be-al) **mus'cle.** Buccinator muscle; molaris externus and internus.

Alveolo-lingual groove, al-ve'o-lo-lin'gwal groov. Groove between lower jaw and tongue.

Alveolo-maxillary (al-ve'o-lo maks'il-la-re) **mus'cle.** Buccinator.

Alveolo-nasal (al-ve'o-lo-na'sal) **muscle.** Depressor alæ nasi.

Alveolus, al-va'o-lus. Sockets of the teeth, into which they are, as it were, driven. Their size and shape are determined by the teeth which they receive. They are pierced at apex by small holes, giving passage to dental vessels and nerves; air-cell; pits in mucous membrane of stomach, intestines, etc.

Alveus, al'va-us (cavity). Auricle or ventricle of the heart; see *Auge.* **A. ampulles'cens** or **ampullo'sus,** thoracic duct, receptaculum chyli. **A. commu'nis,** see *Semicircular canals.* **A. larynge'us,** sacculus laryngis. **A. pulmo'nis,** air-cell of lung; one connected with infundibulum of lung is called terminal alveolus. **A. urogenita'lis,** prostatic vesicle. **A. utriculo'sus,** utricle.

Alvi adstrictio (al've ad-strick'she-o) or **astrictio,** ah-strik'she-o. Constipation. **A. excre'tio,** defecation. **A. flux'us** or **flux'us aquo'sus** or **lax'itas** or **profiu'vium,** diarrhœa.

Alviducus, al-ve-du'kus (*alvus,* abdomen, *duco,* to lead). Laxative.

Alvifluxus, al-ve-fluks'us (*alvus,* belly, *fluxus,* flux). Diarrhœa.

Alvine, al'vine (*alvus,* abdomen). Relating to the abdomen or bowels, as alvine discharges, A. flux.

Alvum evacuans, al'vum e-vak'u-ans. Cathartic.

Al'vus. Abdomen, uterus, excrement, diarrhœa. **A. adstric'ta** or **astric'ta,** constipation. **A. ci'ta,** diarrhœa. **A. coac'ta,** constipation. **A. compac'ta** or **compres'sa** or **constipa'ta,** constipation. **A. du'ra,** constipation. **A. flu'ens** or **flu'ida** or **fu'sa** or **liq'uidus** or **mol'lis,** diarrhœa. **A. re'nis** or **re'num,** pelvis of kidney. **A. seg'nis,** constipation. **A. solu'ta,** diarrhœa. **A. suppres'sa** or **tarda** or **te'nax,** constipation. **A. vir'idis,** dejection.

Alyce, al'e-sa. Anxiety.

Alymphia, ah-limf'e-ah (*a, lympha,* lymph). Deficiency of lymph.

Alypia, ah-lip'e-ah. Absence of pain.

Alypon, ah'lip-on (*a, lupe,* pain). Acrid purging plant, Globularia alypum.

Alysis (al'is-is) or **Alysmus**, al-is'mus. Anxiety.

Alyssum, ah-lis'sum (*a, lussa,* hydrophobia). Several species have been used in treatment of insanity and hydrophobia. **A. Plin'ii,** galium mollugo.

Alyssus, ah-lis'sus (*a, lyssa*). Antihydrophobic.

Alyxia aromatica (ah-liks'e-ah ar-o-mat'ik-ah) or **Rein'wardii** or **stella'ta.** Plant, aromatic bark of which resembles Canella alba; antipyretic.

Alyxis, ah-liks'is. Alysis.

Am, as prefix, like *Amphi.*

Amabile, am-ab'il-a (lovely, *amo,* to love). Lacuna or depression in upper lip.

Amadou, am'ad-ou. Fungus, *Agaric* or *Touchwood,* used to stop hemorrhage and as dressing for wounds.

Amalgam, am-al'gam (*ama,* with, *gameo,* to unite). Mixture of mercury and other metals; amalgam of silver used, in dentistry, for filling teeth.

Amalgamation, am-al-ga-ma'shun. Mixture of races.

Amamelis, am-am-a'lis. Hamamelis.

Amandin, am-an'din. Albuminous substance in sweet almonds.

Amanita muscaria, ah-man-e'tah mus-kar'e-ah. Agaricus muscarius.

Amanitæ, ah-man-e'te (*a, mania,* madness). Name given by Greeks and Romans to edible mushrooms.

Amanitine, ah-man'it-een. Agaricine.

Amara, am-ar'ah. Bitters. **A. alkaloid'ea,** bitter alkaloids. **A. aromat'ica** or **cal'ida,** aromatic bitter tonics. **A. dul'cis,** dulcamara. **A. tetan'ica,** tetanic bitters, as strychnia.

Amaracum (am-ar'ak-um) or **Amaracus**, am-ar'-ak-us. Origanum majorana. **A. tomento'sus,** Origanum dictamnus.

Amar'æ. Bitters. See *Amarus.* Depressions in outer ear.

Amaranthus (am-ar-an'thus) or **Amarantus**, am-ar-an'tus. Genus of herbs of nat. ord. Amaranthaceæ, several species of which are used in medicine, as *A. campestris,* demulcent; *A. caudatus,* astringent; *A. cernua,* astringent; *A. debilis,* antisyphilitic; *A. hypochondriacus,* prince's feather, astringent; *A. spicatus,* diuretic; *A. spinosa,* an Indian shrub, the fresh root of which is used in gonorrhœa.

Amargosin, am-ar'go-sin. Active principle of Castela Nicholsoni.

Amarin, am-ar'in. An alkaloid from bitter almonds, with the formula $C_{21}H_{18}O_2$.

Amaritas (am-ar'it-as), **Amarities** (am-ar-ish'e-es), **Amaritudo** (am-ar-it-u'do), or **Amaror**, am-ar'or. Bitterness.

Amarthritis, am-arth-re'tis. General gouty inflammation of joints.

Amarucachu. Polianthes tuberosa.

Amarulence, am-ar'u-lence. Bitterness.

Amarum, am-ar'um. Bitter magnesium sulphate. **A. dul'ce,** dulcamara.

Amarus, am-ar'us. Bitter. The bitter principle of vegetables is the great natural tonic, and hence bitters, so termed collectively, belong to the class of tonics.

Amaryllis (am-ar-il'lis) **belladon'na.** Belladonna lily; emetic. **A. eques'tris,** poisonous West Indian plant. **A. formosis'sima,** Mexican plant, bulbs of which are emetic. **A. Zeylon'ica,** Asiatic species; bulb is diuretic.

Amarythrin, am-ar'ith-rin (*amarus,* bitter, and *erythrin*). Bitter extract derived from erythrin.

Amasesis (ah-mas-a'sis), **Amasse'sis,** or **Amaste'-sis** (*a, masesis,* mastication). Impeded or impracticable mastication.

Amastia, ah-mas'te-ah (*a, mastos,* breast). Absence of breast; absence of nipple.

Amastozoarius, ah-mas-to-zo-ar'e-us (*a, mastos,* breast, *zoon,* animal). Animal or tribe devoid of breasts.

Ama'te. Milky fluid pressed from Picus Benjamina of Mexico.

Amathia, ah-math'e-ah. Amazia.

Amatorii (am-at-o're-e) **mus'culi.** Oblique muscles of eye.

Amatorium, am-at-o're-um. Lacuna or depression on the upper lip. **A. venefic'ium,** philter.

Amatorius musculus, am-at-o're-us mus'ku-lus. Oblique muscle of eye.

Amaurosis, am-o-ro'sis (*amauros,* obscure, and *osis*). Formerly called *Drop serene, Gutta serena, Black cataract, Nervous blindness,* and then defined as diminution or complete loss of sight, generally owing to loss of power of the optic nerve or retina—optic anæsthesia—from primary or degenerative atrophy of that nerve; but the ophthalmoscope has shown that these cases are usually referable to diseases of the choroid, retina, or optic nerve. At the present day amaurosis seems to be a synonym for total blindness. **A., albuminu'ric,** A. due to retinitis of albuminuria. **A. alcohol'ica,** A. due to excessive use of alcohol. In like manner we have **A. arthrit'ica,** due to gout; **A. aton'ica,** from debility; **A., cat's-eye,** see *Amaurotic cat's-eye;* **A., cer'ebral,** A. from pressure on optic nerve. **A. compressio'nis,** from pressure of optic nerve; **A. congesti'va,** from congestion of the brain; **A., diabe'tic,** A. due to diabetic retinitis. **A. dimidia'ta,** hemiopia. **A., diur'nal,** nyctalopia. **A. epilep'tica,** A. occurring during epileptic seizure. **A., epilep'tiform** or **epilep'-toid,** retinal epilepsy, being sudden attack of blindness not necessarily occurring in epileptics. **A. exanthemat'ica,** A. accompanying eruptive diseases. **A. gravida'rum,** A. occurring in puerperal state. **A. imperfec'ta,** hyperamaurosis. **A. intermit'tens,** A. accompanying intermittent fever. **A. lactan'tium,** A. occurring during lactation. **A., noctur'nal,** hemeralopia. **A. partia'lis fu'gax,** form of transient obscuration of vision happening alone or in connection with migraine. **A., re'flex,** A. due to irritation of sensory nerve. **A. spina'lis,** A. due to lesion of spinal cord. **A., tobac'co,** tobacco amblyopia or amaurosis. **A. uræ'mica,** A. due to renal disease.

Amaurotic, am-or-ot'ik. Affected with amaurosis. **A. cat's eye,** amaurotic affection, with remarkable change of color in pupil, presenting, apparently in fundus of eye, lighter tint, instead of natural clear black. It is due to morbid growths or deposit from inflammation.

Amaxophobia, am-aks-o-fo'be-ah (*amaxa,* wagon, *phobos,* fear). Nervous dread of riding in a wagon or car.

Amazia, ah-maz'e-ah (*a, mazos,* breast). Monstrosity with absence of one or both breasts.

Amb, as a prefix. See *Am.*

Am'bar or **Ambarum** (am'bar-um) or **A. cinerit'ium.** Ambergris.

Ambe, am'ba (*ambaino,* to ascend). Border of orbit; superficial eminence or crest on a bone; old surgical machine for reducing dislocations of the shoulder.

Ambelania acida, am-bel-an'e-ah as'id-ah. Fruit is eaten in French Guiana 'as cure for dysentery.

Amber, am'bur. Succinum. **A., acid of,** succinic acid. **A., cam'phor,** volatile resin of camphor. **A., gray,** ambergris. **A., liquid,** see *Liquidamber styraciflua.* **A., oil of,** oleum succini. **A., yellow,** succinum.

Ambergris, am'bur-grese. Gray amber, concrete substance of consistence of wax, cineritious color, and exhaling a pleasant odor. It is probably formed in intestines of spermaceti whale, and voided with its excrement. It is antispasmodic and excitant, and employed as a perfume.

Ambi, am'be. Ambe.

Ambicus, am'bik-us. Alembic.

Ambidexter, am-be-deks'tur (*ambo,* both, *dexter,* right). One who uses both hands with equal facility. Such a person is *Ambidex'trous;* the condition is *Ambidexter'ity* or *Ambidex'trousness.*

Ambilævus, am-be-le'vus (*ambo, lævus,* left). Opposite condition to ambidextrous.

Ambiopia, am-be-o'pe-ah (*ambo, ops,* eye). Double vision.

Ambitus, am'bit-us. Circumference. **A. cerebel'li,**

space including cerebellum, medulla oblongata, and pons Varolii. **A. genita'lis mulie'bris,** vestibule of genital organs of female.

Ambliopia, am-ble-o'pe-ah. Amblyopia.

Ambloma (am-blo'mah), or **Amblosis** (am-blo'sis), or **Amblosmus,** am-bloz'mus (*blosko,* to go). Abortion.

Amblothridion (am-blo-thrid'e-on) or **Amblothridium,** am-blo-thrid'e-um. Product of untimely birth. Abortifacient.

Amblotic, am-blot'ik. Abortive; producing abortion.

Ambly, am'ble (*amblus,* obscure). In composition, obscure.

Amblyaphia, am-ble-af'e-ah (*ambly, haphe,* feeling). Dulness of sense of touch.

Amblyogmus, am-ble-og'mus. Amblyopia.

Am'blyope. One affected with amblyopia.

Amblyopia, am-ble-o'pe-ah (*ambly, ops,* eye). Feebleness of sight. Impairment of vision caused by irregularities in nervous system or circulation, congenital or from mechanical injury, poisons, etc. The term is now usually restricted to those cases of weak sight which cannot be relieved by suitable glasses; the condition may be congenital. See *Nyctalopia, Hemeralopia.* **A. amaurot'ica,** blindness from atrophy of nervous apparatus of vision. **A. ex anop'sia,** A. from non-use of eye when excluded for any length of time from binocular vision. **A. centra'lis sim'plex,** simple variety of A., with slight hyperemic condition of disc, and obscured edges. **A. crepuscula'ris,** hemeralopia. **A. diabe'tica,** A. occurring in diabetes; usually slight hyperæmia is visible. **A. dissito'rum,** myopia. **A. glycosu'ric,** A. diabetica. **A., lead,** A. saturnina. **A. lu'minis,** hemeralopia. **A. meridia'na,** nyctalopia. **A. nicotia'na,** see *A., tobacco.* **A., noctur'nal,** hemeralopia. **A. potato'rum,** amblyopia of drunkards; alcoholic amblyopia. **A. proximo'rum,** presbytia. **A. saturni'na,** A. from lead-poisoning. **A., tobac'co,** A. from abuse of tobacco; resembles alcoholic amblyopia. **A., ure'mic,** form of the disease due to uremic blood-poisoning, such as occurs in Bright's disease.

Amblyopic, am-ble-op'ik. Relating to or affected with amblyopia.

Amblyopsa (am-ble-op'sah) or **Amblyopsia,** am-ble-op'se-ah. Amblyopia.

Amblyopy, am-ble'o-pe. Amblyopia.

Amblyosmos, am-ble-os'mos. Amblyopia.

Amblys, am'blys. Weak or weak-sighted.

Ambolic, am-bol'ik (*ballo,* to cast out). Abortive; producing abortion.

Am'bon (*ambon,* raised rim of shield or dish). Fibrocartilaginous ring surrounding articular cavity, as glenoid cavity of scapula, acetabulum, etc.; superciliary arch; circumference of orbit of eye.

Amboyna (am-boi'na) **butt'on** or **pim'ple.** Syphiliform disease at one time epidemic in island of Amboyna.

Ambra, am'brah. Amber. **A. ambrosi'aca,** ambergris. **A. cinera'cea,** ambergris. **A. gris'ea,** ambergris. **A. liq'uida,** storax.

Ambre'ic acid. Acid produced by treating ambrein with nitric acid.

Ambrein, am'bre-in. Constituent of ambergris resembling cholesterin.

Ambrina ambrosioïdes, am-bre'nah am-bro-ze-o-i'des. Chenopodium ambrosioïdes. **A. anthelmin'tica,** Chenopodium anthelminticum. **A. bot'rys,** Chenopodium botrys.

Ambrosia, am-bro'ze-ah (*brotos,* mortal). Genus of Compositæ. Food which makes immortal, or food of the gods; Chenopodium botrys. **A. artemisiæfo'lia,** *Hag-weed, Bitterweed, Roman wormwood.* Grows in North America. Astringent and antiperiodic. **A. ela'tior,** ragweed. **A. marit'ima,** plant growing on shores of Levant, having pleasant, bitter, aromatic taste; given in infusion as tonic and antispasmodic. **A. trif'ida,** *Horseweed, Richweed, Horsemint, Horsecane, Bitterweed, Great* or *Tall ragweed, Wild hemp.* Indigenous in all parts of United States; astringent, stimulant, antiperiodic. Infusion has been used locally in mercurial salivation.

Ambulacral, am-bu-lak'ral (*ambulacrum,* private walk). Relating to locomotion.

Ambulance, am'bu-lance (*ambulo,* to walk). Military hospital attached to an army, and moving along with it; vehicle for conveyance of sick and wounded.

Ambulans (am'bu-lans) or **Ambulant,** am'bu-lant. Ambulatory.

Ambulation, am-bu-la'shun (*ambulo,* to walk). Act of walking.

Ambulative, am'bu-la-tiv. Ambulatory.

Ambulatory (am'bu-la-to-re) or **Am'bulative.** Term applied to morbid affection, such as erysipelas, when it skips from one part to another; mild typhoid fever. When blisters are applied successively on different parts of the body, they are called ambulatory blisters. Ambulatory clinic is one in which lecturer and auditors walk from bed to bed. Dispensatory.

Ambuleia, am-bu-le'ah. Cichorium intybus.

Ambuli, am'bu-le. Indian aquatic herb, having sweet smell. Decoction is very bitter and an excellent febrifuge; taken in milk in cases of vertigo.

Am'bulo (to walk). Painful distension of the abdomen, which shifts about, due to flatulence.

Ambulo-flatulentus et furiosus, am'bu-lo-flat-u-len'tus et fu-re-o'sus. Term applied to painful, mobile, and periodical tumors affecting different parts.

Ambury, am'ber-re. Tumor containing blood, a term employed in veterinary medicine.

Ambustio (am-bus'te-o) or **Ambustum,** am-bus'tum (*ambi,* around, *uro,* to burn). Burn; blister from a burn. **A. ex frig'ore,** frost-bite.

Ambu'tuah. Pareira brava.

Ambuya-embo, am-by'ah-em'bo. Creeping aristolochia of Brazil, decoction of which is used in obstructions; also in fumigation and in baths as a tonic.

Amcher. Antiscorbutic, recently employed in India; made from green mangoes.

Ameleia (carelessness), am-el-i'ah. Apathy.

Ameli. Malabar shrub; decoction of its leaves is used to relieve colic; its roots, boiled in oil, to repel tumors.

Amelia, ah-ma'le-ah (*a, melos,* member). Loss or entire absence of limb or limbs. One thus affected is said to be *A'melus.*

Amelia (carelessness), am-a-le'ah. Apathy.

Amelin (am'e-lin) or **Am'melin.** Cyanurdiamic acid.

Amend'ment. Decrease of severity of disease.

Amenenos, ah-men-a'nos (weak). One who is debilitated.

Amenia, ah-ma'ne-ah (*a, men,* month). Amenorrhœa; emmenagogues.

Amenomania, am-en-o-man'e-ah (*amœnus,* agreeable, *mania*). Gay or agreeable form of insanity.

Amenorrhœa (ah-men-or-rhe'ah) or **Amenomonomia,** ah-men-o-mo-no'me-ah (*a, menes, rheo,* to flow). Suppression of menses. This suppression is commonly symptomatic, and hence chief attention must be paid to the cause. Usually there is atonic state of the system generally, and hence chalybeates and other tonics are advisable. Two great varieties of amenorrhœa are commonly reckoned: 1. Retention of the menses when menses do not appear at the usual age; and 2. Suppression, in which catamenia are obstructed in their regular periods of recurrence. This is the usual significance of the term. The menses may also be secreted, but not evacuated. See *Emansio mensium* and *Menses.* **A. diffic'ilis,** dysmenorrhœa. **A. emansio'nis,** retention of menses. **A. hymen'ica,** see *Hymenica amenorrhœa.* **A., ova'rian,** A. due to non-ovulation. **A. partia'lis,** dysmenorrhœa. **A., prim'itive,** non-appearance of menses at puberty. **A. suppressio'nis,** obstruction of the regular period of recurrence of the menses.

Amenorrhœal, ah-men-or-rhe'al. Relating to amenorrhœa.

Amens, ah'mens (*a, mens,* mind). Hybrid term for insanity.

Amentia, ah-men'she-ah (*a, mens,* mind). Dementia; see also *Fatuitas* and *Idiotism.* **A. congen'ita,** idiotism. **A. ingen'ita,** idiotism. **A. microcephal'ica,** A. from deficiency of brain matter. **A. seni'lis,** dementia of the aged. **A. traumat'ica,** A. from injury.

Amer'ican bal'sam. Balsam of Peru. **A. hemp,** Cannabis sativa. **A. plague,** yellow fever. **A. sen'na,** Cassia marilandica.

Ametabolic, ah-met-ab-ol'ik (*a, metabole,* change). Not undergoing alteration, as of tissue in nutrition or secretion; not producing such change.

Amethyst, am'e-thist (*a, methuo,* to be drunk). Precious stone, to which ancients attributed the property of preventing drunkenness; also used as antidiarrhœic and absorbent, and in ophthalmia.

Amethysum, am-eth'is-um. Remedy for drunkenness.

Ametria, ah-met're-ah (*a, metron,* measure.) Intemperance. Absence of uterus (*a, metra,* uterus) (*Ame'tria*).

Ametrohæmia, ah-met-ro-he'me-ah (*a, metra,* uterus, and *haima,* blood). Amenorrhœa; uterine anæmia.

Ametrometer, ah-met-rom'et-ur (*a, metron,* measure). Instrument devised for measuring degree of ametropia.

Ametrope, ah'met-rope. One affected with ametropia.

Ametropia, ah-met-ro'pe-ah (*a, metron,* measure, and *ops,* eye). Abnormal condition of dioptric media of the eye, in which parallel rays of light are not exactly focused on the retina when the eye is at rest. It includes myopia, presbyopia, hypermetropia, and astigmatism (which see).

Ametrous, ah-met'rus (*a, metra,* uterus). Without uterus.

Amianthinopsy, ah-me-an-thin-op'se (*a, ianthinos,* violet, *ops,* eye). Blindness as to violet color.

Amianthium muscætoxicum, am-e-an'the-um muse-toks'ik-um (*amiantos,* pure, *anthos,* a flower). Fly poison, fall poison; indigenous; narcotic poison.

Amian'thus (*a, amiantos,* unpolluted). Flexible asbestos.

Amiculum, am-ik'u-lum (*amicio,* to wrap around). Amnion.

Amide, am'ide. By substituting for one or more atoms of hydrogen in ammonia (NH_3) one or more acid radicals, or combinations of them, we obtain a number of other substances. If latter are electronegative, they terminate in amide, as acetamide, carbamide, etc.; if electro-positive, in amine, as ethylamine, phenylamine, etc. Amide is also used as synonym of amidogen, NH_2.

Amidin, am'id-in. Starch changed by heat.

Amido-benzol, am'id-o-ben'zol. Anilin. **A.-capro'ic acid,** leucin. **A.-myelin,** see *Myelin.* **A.-succin'amide,** asparagin. **A.-succinic acid,** aspartic acid.

Amidogen, am-id'o-gen. Hypothetical radical of ammonium, NH_2.

Amid'ulin. Soluble starch.

Amidum, am'id-um. Amylum.

Amilene, am'il-een. See *Amylene.*

Amimia, am-im'e-ah (*a, mimos,* gesture). Aphasia with want of power to employ signs or gestures.

Amine, am'een. See *Amide.*

Amitotic, am-it-ot'ik (*a, mitos,* thread). Relating to direct division of cells.

Amma, am-mah. Truss.

Ammania (am-man'e-ah) or **Amman'ia vesicatoria,** ves-ik-at-o're-ah. Herbaceous E. Indian plant, used for vesication.

Ammi, am'me. *Bishop's weed.* Genus of Umbelliferæ. Seeds are aromatic and pungent, carminative, diuretic, tonic, and stomachic. **A. beri-be'ri,** ammi. **A. cicutæfo'lium,** ammi. **A. cop'ticum,** Carus ajowan. **A. majus,** ammi. **A. ve'rum,** see *Sison ammi.* **A. visna'ga,** el kallah; variety of S. Europe, from which kellin is obtained; seeds in decoction are used in rheumatism and uric-acid calculi, the leaves for poultices, the fruit as an astringent lotion. **A. vulga're,** ammi.

Ammion, am'me-on. Cinnabar.

Ammism, am'mizm (*ammos,* sand). Treatment by sand-bath.

Ammochosia (am-mo-ko'ze-ah) or **Ammocho'sis** (*ammos,* sand, *cheo,* to pour). Putting the body in hot sand for cure of disease.

Ammonæmia, am-mo-ne'me-ah. Ammoniæmia.

Ammonia, am-mo'ne-ah. *Ammonia* or *Ammoniacal gas, Volatile alkali.* An alkali, so called because obtained principally by decomposing sal ammoniac (chloride of ammonium) by lime. This gas is colorless, transparent, elastic, of pungent, characteristic odor, and acrid, urinous taste. It turns the syrup of violets green, and its specific gravity is 0.589. When inhaled, largely diluted with common air, it is a powerful irritant. When unmixed, it instantly induces suffocation. It is soluble in water or alcohol. **A., a'cetate of, solu'tion of,** liquor ammonii acetatis. **A., al'um,** sulphate of aluminium and ammonium. **A., arse'niate of,** arseniate of ammonium. **A., ben'zoate of,** ammonii benzoas. **A., bicar'bonate of,** ammonii bicarbonas. **A. bo'ras,** ammonium. **A., carbazotate of,** ammonium. carbazotate **A., car'bonate of,** ammonii carbonas. **A. caus'tica,** ammonia. **A. caus'tica liquida,** liquor ammoniæ. **A., chlorohy'drate of,** ammoniæ murias. **A., ci'trate of,** ammonii citras. **A., for'miate of,** formiate of ammonia. **A., hydri'odate of,** ammonium iodide. **A., hydrochlo'rate of,** ammoniæ murias. **A., hydrosul'phuret of,** ammonii sulphuretum. **A., hypophos'phite of,** see *Calcis hypophosphis.* **A., i'odide of,** see *Iodine.* **A. and i'ron, tart'rate of,** ferri et ammonii tartras. **A., lin'iment of,** linimentum ammoniæ. **A. liq'uida,** liquor ammoniæ. **A. muriat'ica,** ammoniæ murias. **A., ni'trate of,** ammonii nitras. **A., nitrosul'phate of,** ammonii nitrosulphas. **A. oint'ment,** made of water of ammonia and lard. **A., phos'phate of,** ammonii phosphas. **A. præpara'ta,** ammonii carbonas. **A. pu'ra,** ammonia. **A. pu'ra liq'uida,** liquor ammoniæ. **A., solu'tion of,** liquor ammoniæ. **A., solution of, stronger,** liquor ammoniæ fortior. **A., subcar'bonate of,** ammonii carbonas. **A., suc'cinate of,** see *Succinic acid.* **A., sul'phate of,** ammonii sulphas. **A., sul'phuret of,** ammonium sulphuretum. **A., tart'rate of,** ammonii tartras. **A., u'rate of,** see *Urates.* **A., vale'rianate of,** ammonii valerianas. **A. water,** liquor ammoniæ.

Ammo'niac. Relating to ammonia; ammoniacal. **A. fermenta'tion,** production of ammonia by fermentation from urea. **A., gum,** *Ammoniacum* (Ph. U. S.), from Ammonia, in Lybia, whence it is brought. A gum-resin, concrete juice of Dorema ammoniacum of Persia; also gum-resin of Ferula tingitana. The latter is the ammoniacum of commerce. It is in irregular, dry masses, yellow externally, whitish within; its odor is peculiar, and not ungrateful. taste nauseous, sweet, and bitter. It forms a white emulsion with water; is soluble in vinegar, partially so in alcohol, ether, and solutions of the alkalies. It is expectorant, antispasmodic, discutient, and resolvent; used also in formation of certain plasters. Dose, gr. x–xxx in emulsion. **A. mix'ture,** mistura ammoniaci. **A. plas'ter,** emplastrum ammoniaci, e. a. cum hydrargyro. **A., sal,** ammonii chloridum.

Ammoniacæ nitras, am-mo-ne'as-ee ni'tras. Ammonii nitras. **A. sul'phas,** ammonii sulphas. **A. sulphure'tum,** ammonii sulphuretum.

Ammoni'acal. Ammoniac. **A. amal'gam,** substance resulting from subjecting a salt of ammonia to galvanism in contact with mercury. **A. gas,** ammonia.

Ammoniacum, am-mo-ne'ak-um. Ammonia, ammoniac gum. **A. caus'ticum,** ammonia. **A. hydrochlora'tum ferra'tum,** ferrum ammoniatum. **A. succina'tum,** spiritus ammoniæ succinatus. **A. vola'tile mi'te,** ammonii carbonas.

Ammo'niæ ace'tas, A. ben'zoas, etc, see *Ammonii acetas, Ammonii benzoas,* etc. **A. liq'uor,** see *Liquor ammoniæ.*

Ammoniæmia, am-mo-ne-e'me-ah (*ammonia, haima,* blood). Condition of blood in which it contains ex-

cess of ammonia—a grave disease, usually dependent on retention or extravasation of urine. Sometimes uræmia coexists with it.

Ammoniated, am-mo'ne-a-ted. Containing ammonia, as A. copper, A. iron, etc. Compounds of other substances with ammonia, as ether, camphor, opium, etc., are variously called A.-ammoniato-ætherius, A.-camphoratus, A.-opiatus, etc. The prefix ammonio is also similarly used.

Ammonii acetas, am-mo'ne-e as-a'tas. Liquor ammonii acetatis. **A. arse'nias**, arseniate of ammonium. **A. ben'zoas** (Ph. U. S.), *Benzoate of Ammonium, B. of Ammonia*, a salt formed by the union of benzoic acid and ammonia, which has been prescribed for the removal of gouty depositions of urate of soda in the joints; it is regarded as a good diuretic. Dose, gr. xv to xxx and more. **A. bicarbo'nas**, *Bicarbonate of Ammonium, B. of Ammonia*, was officinal in the Dublin Pharmacopœia; it has the same properties as the carbonate, and is more palatable. Dose, gr. vj to xxiv. **A. bo'ras**, *Borate of Ammonium, B. of Ammonia*, made by dissolving boracic acid in heated water of ammonia; used in renal colic, catarrh of bladder, etc. **A. bromidum** (Ph. U. S.), bromide of ammonium. White granular salt, becoming yellow on exposure, prepared by acting on bromide of iron with water of ammonia. Its medical effects are similar to those of bromide of potassium. Dose, from two to twenty grains. See *Bromides*. **A. carbo'nas**, *Ammonii carbonas* (Ph. U. S.), *Salt of bones, Salt of woodsoot, Salt of urine, Volatile sal ammoniæ, Baker's salt, Concrete* or *Mild volatile alkali, Carbonate* or *Subcarbonate of ammonia, Carbonate of ammonium, Sal volatile, Smelling salt* (Ph. U. S.). (Formerly obtained by dry distillation of hartshorn, bones, and other animal matters.) A white, striated, crystalline mass; odor and taste pungent and ammoniacal; soluble in two parts of water; insoluble in alcohol; effloresces in the air. It is stimulant, antacid, diaphoretic, expectorant, and antispasmodic. Dose, gr. v to xv. Carbonate of ammonium is at times used to form effervescing draughts with lemon-juice, crystallized tartaric acid, and crystallized citric acid. Carbonate of ammonium is the usual smelling salts. When a few drops of aqua ammoniæ fortior are added to it coarsely powdered, and some volatile oil, it forms Preston salts. **A. carbo'nas alkali'nus**, A. carbonas. **A. c. incomple'tus**, A. carbonas. **A. c. superammoni'acus**, A. carbonas. **A. ci'tras**, *Citrate of ammonium, C. of ammonia.* Made by saturating lemon- or lime-juice, or a solution of citric acid, with carbonate of ammonia. It may also be made extemporaneously and taken in an effervescent state. **A. chlo'ridum** (U. S. Ph.), ammoniæ murias, *Muriate of ammonia, Chloride of ammonium, Hydrochlorate of ammonia, Chlorohydrate of ammonia, Sal ammoniacum, Sal ammoniac* (from the temple of Jupiter Ammon, near which it was obtained), a saline concrete formed by the combination of muriatic acid with ammonia. It is also prepared, in great quantities, by adding sulphuric acid to the volatile alkali obtained from soot, bones, etc., mixing this with common salt, and subliming. Muriate of ammonium is inodorous, but has an acrid, pungent, bitterish, and urinous taste. Three parts of cold water dissolve one. Soluble also in 4.5 parts of alcohol. It is aperient, diuretic, tonic, and resolvent. Dose, gr. v–xxx. Externally it is employed, producing cold during its solution, in inflammations, etc. It is also inhaled in chronic catarrh. The U. S. Pharmacopœia contains *Ammonii chloridum purificatum*, purified chloride of ammonium, made by dissolving chloride of ammonium in water by the aid of heat, adding water of ammonia, filtering, and evaporating. **A. chlo'ridum purificatum**, see *Ammoniæ murias*. **A. cuprosul'phas**, cuprum ammoniatum. **A. et fer'ri mu'rias**, ferrum ammoniatum. **A. fer'ro-ci'tras**, ferri ammonio-citras. **A. hydri'odas**, ammonium iodide. **A. hydrochlo'ras**, ammoniæ murias. **A. hydrosul'phas**, ammoniæ sulphuretum. **A. hydrosulphuretum**, ammoniæ sulphuretum; see *Liquor fumans Boylii*. **A. hypocarbo'nas**, ammonii carbonas. **A. io'didum** or **iodure'tum**, ammonium iodide. **A. ni'tras** (Ph. U. S.), *Ammonii nitras, Nitrate of ammonia, Nitrate of ammonium*, a salt composed of nitric acid and ammonia. It is diuretic and deobstruent. Externally it is discutient and sialagogue. **A. nitrosul'phas**, nitrosulphate of ammonium, a salt formed by passing nitric oxide through a solution of ammonium sulphate, which has been used in Paris in typhoid fever. **A. phos'phas**, ammonium phosphoricum, ammonium phosphate. This salt has been recommended as an excitant, diaphoretic, and discutient; more recently has been proposed as a remedy for gout and rheumatism, as a solvent of uric-acid calculus, and for diseases, acute and chronic, connected directly with the lithic-acid diathesis. Dose, gr. x. to xl. **A. sesquicarbo'nas**, A. carbonas. **A. subcarbo'nas**, A. carbonas. **A. sul'phas**, ammonii sulphas, *Sulphate of ammonium, Sulphate of ammonia.* Formed by adding sulphuric acid either to sal ammoniac or to ammoniacal liquor. Its properties are like those of the muriate of ammonia. **A. sulphure'tum**, sulphuret of ammonia, hydrosulphuret of ammonia. Odor very fetid; taste nauseous and styptic; color dark yellowish green. It is reputed to be sedative, nauseating, emetic, disoxygenizing, and has been given in diabetes and diseases of increased excitement. Dose, gtt. vij to gtt. xx. **A. tart'ras**, ammonium tartrate, a salt composed of tartaric acid and ammonia. It is diaphoretic and diuretic, but not much used. **A. ur'as**, see *Urates*. **A. valeria'nas** (Ph. U. S.), *Valerianate of ammonium, V. of ammonia.* This salt is obtained by causing gaseous ammonia, disengaged from muriate of ammonia by lime, to pass into valerianic acid until the latter is neutralized, and cystallizing. Used, like valerian, valerianic acid, and the other valerianates, in neuropathic affections. Dose, gr. ij–viij.

Ammonion, am-mo'ne-on (*ammos*, sand). Ancient collyrium, said to remove sand from the eye.

Ammonium, am-mo'ne-um. Radical of ammonia, never yet isolated in a free state. **A. ace'ticum liq'uidum**, liquor ammonii acetatis. **A. arsen'icum** or **arsenic'icum**, ammonium arseniate. **A., ben'zoate of**, ammonii benzoas. **A. broma'tum**, ammonii bromidum. **A., bro'mide of**, ammonii bromidum. **A., carb'amate of**, ammoniacal salt formed by action of dry dioxide of carbon on dry gaseous ammonia. **A., car'bonate of**, ammonii carbonas. **A. carbo'nicum**, ammonii carbonas. **A. caus'ticum solu'tum**, water of ammonia. **A. chlora'tum**, ammonium chloride. **A., chlor'ide of**, ammoniæ murias. **A., chlor'ide of, purified**, see *Ammoniæ murias*. **A. cit'rate**, refrigerant and diuretic salt formed by neutralizing citric acid with ammonia-water. **A. for'miate**, employed in paralysis. **A. glycyrrhi'zate**, combination of sweet principle of licorice with ammonia, which masks the taste of quinine. **A. hydrochlora'tum**, ammonium chloride. **A. hydroio'dicum**, ammonium iodide. **A. ioda'tum**, ammonium iodide. **A., i'odide of**, ammonii iodidum, hydriodate of ammonia. This salt is formed by mixing iodide of potassium and sulphate of ammonium, adding boiling distilled water, and, after cooling, alcohol, mixing them well, passing them through a cold funnel, and pouring on the salt a mixture of alcohol and water, and evaporating. Internally, effects are similar to those of iodide of potassium. Dose, one to three grains. It is applied in the form of ointment in lepra, psoriasis, etc. **A. martia'tum** or **martia'le**, ferrum ammoniatum. **A. muriat'icum**, ammonium chloride. **A. muria'tum**, ammoniæ murias. **A. ni'trate**, ammonii nitras. **A. ni'tricum**, ammonii nitras. **A. phos'phate**, ammonii phosphas. **A. phosphor'icum**, ammonii phosphas. **A. pic'rate**, yellow salt, antiperiodic, prepared by evaporating solution of picric acid containing slight excess of ammonia. **A. sal'icylate**, salt having similar properties to salicylates, prepared by evaporation of neutralized solution of salicylic acid and ammonia. **A. salicyl'icum**, ammonium salicylate. **A. subcarbo'neum**, ammonii carbonas. **A. succ'inate**, salt formed by neutralizing solution of succinic

acid with pyroöleous ammonium carbonate. **A. succin'icum liq'uidum**, spiritus ammoniæ succinatus. **A. sulf'hydra'tum**, ammonii sulphuretum. **A. sul'phate**, ammonii sulphas. **A. sulphu'ricum**, ammonii sulphas. **A. u'rate**, white salt sometimes deposited in urine; used in ointment in chronic skin diseases. **A. u'ricum**, A. urate. **A. vale'rianate**, ammonii valerianas.

Ammonïuret, am-mo-ne'u-ret. Term applied to supposed compounds of ammonia with metallic oxide.

Ammotherapy, am-mo-ther'a-pe (*ammos*, sand, *therapeuo*, to cure). Treatment of disease by sand externally applied.

Amna alcalizata, am'nah al-kal-iz-at'ah. Water, mineral, saline.

Amnemonic, am-ne-mon'ik (*a*, *mnemonikos*, pertaining to memory). Attended with or producing loss of memory.

Amnemosyne, am-na-mos'in-a (*a*, *mnemosune*, memory). Amnesia.

Amnesia, am-na'zhe-ah (*a*, *mnesis*, memory). Loss of memory; symptom in many diseases. **A. acus'tica**, loss of memory of sounds; see *Mind-deafness*. **A. olfacto'ria**, loss of memory of smell. **A. op'tica**, loss of memory of things seen, due to cause seated in visual centres of brain. **A. seni'lis**, loss of memory of old people. **A. temulen'tia**, A. due to alcoholism. **A. traumat'ica**, A. from injury. **A., ver'bal**, loss of memory of words. **A., vis'ual**, mind-blindness.

Amnesic, am-ne'sik. Relating to or affected with amnesia. **A. apha'sia**, see *Aphasia*.

Amnestia, am-nes'te-a. Amnesia.

Amnestic, am-nes'tik. Causing or affected with amnesia.

Amnic, am'nik. Amniotic. **A. acid**, amniotic acid.

Amniitis, am-ne-e'tis. Amnitis.

Amnio-chorial, am'ne-o-ko're-al. Relating to amnion and chorion.

Amnioclepsis, am-ne-o-klep'sis (*amnion*, *klepto*, to steal). Premature escape of liquor amnii.

Amniomantia, am-ne-o-man-te'ah (*amnion*, *manteia*, divination). Divination based on examination of amnion and fœtus.

Am'nion. Innermost enveloping membrane of fœtus, first perhaps observed in sheep (*amnos*, sheep). It is thin and transparent; its inner layer is derived from the epiblast, outer layer from the mesoblast. Its external surface is united to the chorion by areolar and vascular filaments. Its polished inner surface is in contact with the fœtus and liquor amnii. **A., dropsy of**, hydramnion. **A., false**, outer layer of the cephalic fold in the embryo, lining internal surface of original vitelline membrane. Membrane in birds similar to the chorion in higher animals.

Amniorrhœa, am-ne-or-rhe'ah (*amnion*, *rheo*, to flow). Discharge of liquor amnii.

Amnios, am'ne-os. Amnion; liquor amnii.

Amnio'sis. Amnitis.

Amniota, am-ne-o'tah. Animals having an amnion, as birds and mammalia.

Amniotic, am-ne-ot'ik. Relating or appertaining to the amnion. **A. acid**, peculiar acid in liquor amnii of cow. **A. cav'ity**, space over back of embryo, containing a clear fluid, the liquor amnii. **A. fluid**, serous fluid between amnion and fœtus. **A. fold**, blastodermic fold around the embryo, associated with growth of amnion, and with after separation of amnion and chorion. **A. sac**, amnion.

Amnioti'tis. Inflammation of the amnion.

Amniotome, am'ne-o-tome (*amnion*, *tome*, incision). Instrument for puncturing the membranes in labor.

Amnitis, am-ne'tis. Inflammation of the amnion.

Amnium, am'ne-um. Amnion.

Amœba, am-e'bah. Small mass of structureless protoplasm, without distinct cell-wall; see *Amœboid*. **A. bucca'lis**, species of amœba found in deposit on the teeth or in cavity of the mouth. **A. co'li**, species seen in dysenteric injections. **A. denta'lis**, A. buccalis. **A. urogenita'lis**, species noticed in urinary and vaginal secretions.

Amœboid (am-e'boid), **Amœ'biform**, or **Amœ'bal** (*ameibo*, to change, *amœba*, micro-organism, gen. Protozoa, capable of rapidly undergoing changes of form, of active movements, and of absorbing nutrient materials from surrounding medium; *eidos*, resemblance). Term applied to similar spontaneous movements, with singular changes of shape, seen in pus-cells, white corpuscles, rudimentary cell-forms, etc.; hence called *amœboid* or *wandering cells*, *amœboid corpuscles*, etc. These movements explain some obscure changes in tissues in inflammation and suppuration, bioplasts or sarcophytes penetrating the walls of vessels and spontaneously emigrating into adjoining tissues. See *Bioplasm* and *Sarcophyte*.

Amœnomania, am-e-no-mah'ne-ah (*amœnus*, agreeable, *mania*). Amenomania.

Amomis, ah-mo'mis. Fruit of Amomum cardamomum.

Amomum, ah-mo'mum (*a*, *momos*, fault, faultless). Genus of plants, nat. order Scitamineæ. **A. alpin'ia**, species of Guiana and W. Indies; root is used externally for ulcers and cancers. **A. ama'rum**, Chinese species; aromatic. **A. aromat'icum**, source of Bengal cardamom. **A. cardamo'mum**, lesser, true, or officinal cardamom, ord. Zingiberaceæ. The fruit—cardamomum (Ph. U. S.)—of this plant of E. Indies, Java, and Sumatra has an agreeable aromatic odor and pungent, grateful taste. It is carminative and stomachic, but chiefly used to give warmth to other remedies. Dose, gr. v to ʒj. Cluster or round cardamom of Sumatra, Java, etc. yields round cardamom, cardamomum rotundum, of the shops. **A. c. Malabaren'se**, Amomum cardamomum. **A. compac'tum** or **Dioscor'idis**, Elettaria cardamomum. **A. curcu'ma**, Curcuma longa. **A. galan'ga**, Maranta galanga. **A. globo'sum**, Chinese variety, from which round Chinese cardamom is obtained; used for nausea, diarrhœa, and enteralgia. **A. gra'na paradi'si**, greater cardamom seeds, grains of paradise, resemble cardamomum in properties; they are extremely hot. **A., great-winged**, Amomum maximum. **A. hirsu'tum**, costus. **A. max'imum**, great-winged amomum, yields fruit known as Java or Nepal cardamoms, Bengal cardamoms, etc. **A. melegue'ta** or **meleguet'ta**, variety of W. Africa; seeds are known as meleguetta pepper. **A. monta'num**, see *Cassumuniar*. **A. pimen'ta**, see *Myrtus pimenta*. **A. racemo'sum**, cardamom seeds arranged in native clusters. **A. re'pens**, Elettaria cardamomum. **A. subula'tum** grows in India; source of winged Bengal cardamom. **A. sylves'tre**, see *Cassumuniar*. **A. ve'rum**, A. cardamomum. **A. villo'sum**, Chinese and E. Indian variety; stomachic. **A. xanthoi'des**, indigenous in Siam. Bastard cardamom is derived from it. **A. zedoa'ria**, Kæmpferia rotunda, Alpinia galanga. **A. zerumbet**, see *Cassumuniar*. **A. zin'giber**, ginger, black and white ginger, zingiber (Ph. U. S.), are rhizoma of same plant, Zingiber officinale, the difference depending upon mode of preparing them. Odor of ginger is aromatic; taste warm, aromatic, and acrid. It yields its virtues to alcohol, and in a great degree to water; it is carminative, stimulant, and sialagogue. Preserved ginger is a condiment with all the virtues of ginger.

Amoo. Litter for sick and injured used in New Zealand.

A'mor. Love. **A. insa'nus**, erotomania. **A. ven'eris**, clitoris, erotomania.

Amorosus musculus, am-o-ro'sus mus'ku-lus. Obliquus superior oculi.

Amorpha, ah-morf'ah (*a*, *morphe*, form). Eruption on skin having no definite appearance; macula; intertrigo. Diseases which have no definite pathological condition. **A. frutico'sa**, bastard indigo of southern coast of U. S.; root used for tooth-ache. **A. vulga'ris**, intertrigo.

Amorphia (ah-morf'e-ah) or **Amorphism**, ah-morf'ism (*a*, *morphe*, form). Deformity, shapelessness.

Amorphinism (ah-mor'fin-izm) or **Amor'phism** (*a*, *morphina*). Condition induced by deprivation of morphia to one addicted to use of the drug.

Amorpho-phal'lus. Genus of Araceæ, several species of which are used in medicine, chiefly in E. Indies.

Amorphopygagra, ah-morf-o-pig-ag'rah (*amorphos,* without form, *puge,* nates, *agra,* seizure). Irregular paroxysms of pain in nates or anus.

Amorphosteophyte, ah-morf-os'te-o-fite (*amorphos,* without form, *osteon,* bone, *phuton,* growth). Osteophyte without definite form.

Amorphous, ah-morf'us (*a, morphe,* form). Without form or crystalline condition. Without definite form, as a monstrosity. See *Anhistous* and *Anideus.* **A. phos'phorus,** see *Phosphorus.* **A. quinine,** see *Quinine.*

Amorphy, ah-morf'e. Amorphia.

Amotio, a-mo'she-o (*amoveo,* to separate). Separation or detachment, as **A. ret'inæ,** detachment of retina.

Am'pac. E. Indian tree, leaves of which are detergent. Odoriferous resin is obtained from it.

Amparthrosis, am-par-thro'sis. Amphiarthrosis.

Ampelocarpus, am-pel-o-kar'pus (*ampelos, karpos,* fruit). Gallium aparine.

Ampelodesmos (am-pel-o-des-mos) **te'nax.** This plant of Algeria, Sicily, and Italy yields a variety of ergot.

Ampeloleuce, am-pel-o-lu'sa (*ampelos, leukos,* white). Bryonia alba.

Ampelop'rason or **Ampeloprasum,** am-pa-lop'rasum (*ampelos, prason,* leek). Allium.

Ampelopsis, am-pel-op'sis (*ampelos, opsis,* appearance). Genus of plants, nat. ord. Vitaceæ. **A. bot'ryta,** diuretic root of S. African species. **A. quinquefo'lia,** *Virginia creeper, American ivy, Five-leaved ivy, Woody climber,* ord. Vitaceæ. Indigenous climbing plant; bark and twigs are used in dropsy. They are also expectorant.

Ampelos, am'pelos. Vine; Vitis vinifera. **A. ag'ria,** Bryonia alba. **A. ïdæ'a,** Vaccinium vitis idæa. **A. melæ'na,** Tamus communis. **A. oinoph'orus,** Vitus vinifera.

Ampelosag'ria (*ampelos,* vine, *agrios,* wild). Bryonia alba.

Ampelo-therapy, am'pe-lo-ther'a-pe (*ampelos,* vine, *therapeuo,* to cure). Grape-cure.

Ampère, om-pair' (French scientist). Unit of strength of electro-magnetic current shown by force of one volt through one ohm.

Ampère's law. See *Law.*

Amphamphoterodiopsia, amf-amf-o-ter-o-de-op'se-ah (*amphi, amphoteros,* on both sides, *diploos,* double, *ops,* sight). Double vision.

Amphamphoterodiplopia, amf-amf-o-ter-o-dip-lo'pe-ah (*amphi, amphoteros,* on both sides, *diplopia,* double vision). Condition of vision in which objects are seen double with each eye.

Ampharisteros, amf-ar-ist'er-os (*amphi, aristeros,* left). Left-handedness; opposed to ambidexter.

Amphemera, amf-em'er-ah (*amphi, hemera,* day). Quotidian fever.

Amphemer'ina. Quotidian, intermittent, or hectic fever. **A. arthrit'ica, A. bilio'sa, A. cardi'aca, A. dysenter'ica, A. lith'ica, A. paludo'sa, A. singultuo'sa,** etc. indicate the existence of joint symptoms, bilious complications, heart symptoms, dysentery, calculous affections, swamp fever, hiccough, etc., with the quotidian type of fever. **A. Hunga'rica,** fever resembling typhus seen in Hungary. **A. tussiculo'sa,** whooping cough.

Amphi, am'fe (both, around, on all sides), as a prefix, has these significations.

Amphiam, am'fe-am. Opium.

Amphiarthrodial, am-fe-ar-thro'de-al (*amphi, arthrosis,* articulation). Relating to or resembling amphiarthrosis.

Amphiarthrosis, am-fe-ar-thro'sis (same etymon). Mixed articulation, in which corresponding surfaces of bones are united in intimate manner by intermediate body, allowing slight motion; such as junction of bodies of vertebræ by means of intervertebral cartilages; also joint without fibrous tissue between the surfaces, ligaments regulating the motion.

Amphiaster, am-fe-as'tur (*amphi, aster,* star). Period during indirect division of cell or nucleus of developing ovum, when there occurs double star-like distribution of protoplasm around spindle of the nucleus.

Amphibia, am-fib'e-ah (*amphi, bios,* life). Animals capable of living on land and in water, as frogs. Such animals are said to be *Amphib'ious.*

Amphiblastic, am-fe-blas'tik (*amphi, blastos,* germ). Term applied to segmentation of ovum, cells of various sizes resulting.

Amphiblestritis, am-fe-bles-tre'tis. Amphiblestroiditis.

Amphibles'tro-carcino'ma. Cancer of retina.

Amphiblestrodapoplexia, am-fe-bles-tro-dap-o-pleks'e-ah. Apoplexy of retina or retinal hemorrhage.

Amphiblestrodatrophia, am-fe-bles-tro-dat-ro'fe-ah. Atrophy of the retina.

Amphiblestrodeophthisis, am-fe-bles-tro-de-o-te'sis. Atrophy or wasting of retina.

Amphiblestroid, am-fe-bles'troid. Like the retina. **A. mem'brane,** retina.

Amphiblestroï'des. Reticular. **A. membra'na,** retina.

Amphiblestroïdi'tis (*amphiblestron,* covering or net, *eidos,* resemblance, *itis*). Inflammation of the retina.

Amphiblestroïdomalacia (am-fe-bles-tro-id-o-mal-ah'she-ah) or **Amphiblestromala'cia,** am-fe-bles-tro-mal-ah'she-ah (*amphiblestroïdes,* membrane, retina, *malakia,* softening). Mollescence or softening of the retina.

Amphibolic, am-fe-bol'ik (*amphibolos,* doubtful). Hesitating or irregular, as applied to certain stages of fever. Doubtful, as *amphibolic period,* the critical period of a disease when prognosis is doubtful.

Amphibranchia (am-fe-brank'e-ah) or **Amphibronchia,** am-fe-bronk'e-ah (*amphi, branchiæ,* gills). Tonsils and pharynx.

Amphicaustis, am-fe-kaus'tis. Generative organs of female.

Amphicœlous, am-fe-se'lus (*amphi, koilos,* hollow). Concave on both sides, as a vertebra.

Amphicrania, am-fe-kran'e-ah (*amphi, cranium,* skull). Headache on both sides; antithesis to hemicrania.

Amphicreatin, am-fe-kre'at-in. Amphikreatin.

Amphicreatinin, am-fe-kre-at'in-in. Amphikreatinin.

Amphidesmous, am-fe-des'mus (*amphi, desmos,* ligament). Having a double ligament.

Amphideum, am-fid'e-um (*amphi, deo,* to bind). Outermost margin of cervix uteri; labium uteri.

Amphidexius, am-fe-deks'e-us (*amphi, dexios,* right). Ambidextrous.

Amphidiarthrosis, am-fe-de-ar-thro'sis (*amphi, diarthrosis,* movable joint). Articulation that partakes both of ginglymus and arthrodia, as the temporomaxillary articulation.

Amphidiplopia, am-fe-dip-lo'pe-ah. Double vision with each eye.

Amphiesma (am-fe-es'mah) **cor'dis** (covering of the heart). Pericardium.

Amphigony, am-fig'o-ne (*amphi, gone,* generation). Reproduction from two sexes.

Amphikreatin, am-fe-kre'at-in. $C_9H_{19}N_7O_4$. Leucomaïne of the creatinine group, and resembling creatine in properties.

Amphikreatinin, am-fe-kre-at'in-in (*amphi, kreas,* flesh). A leucomaïne from muscle, resembling kreatin. See *Leucomaïnes* (table).

Amphimerina, am-fe-mer'in-ah (*amphi, hemera,* day). Pertussis. **A. hec'tica,** hectic fever.

Amphimerinos, am-fe-mer'in-os. Quotidian.

Amphimer'inus. Quotidian.

Amphimetrion (am-fe-met're-on) or **Amphimetrium,** am-fe-met're-um (*amphi, metra,* uterus). Parts in proximity to uterus.

Amphimicrobia, am-fe-mik-ro'be-ah. Microbes that can be developed in medicine in which oxygen is present or absent.

Amphimor'ula. Collection of animal and vegetative cells, the two classes being at different poles.

Amphioxus, am-fe-oks'us (*amphi,* at both ends, *oxus,* sharp). Genus of fish, ord. Pharyngobranchii, devoid

LIBRARY

of brain and different from other vertebrate animals.

Amphiphagia, am-fe-fah'ge-ah (*amphi*, *phago*, to eat). Ability to eat various kinds of food.

Amphiplex, am'fe-pleks. Perinæum.

Amphipneuma, am-fe-nu'mah (*amphi*, *pneuma*, breath). Dyspnœa.

Amphisbænæ, am-fis-be'ne (*amphi*, *baino*, to proceed). Passing between, as A. venæ, veins of abdomen passing between the uterus and the mammæ.

Amphis'celous (*amphi*, *skelos*, leg). Capable of using both lower limbs.

Amphismela (am-fis-ma'lah) or **Amphismile**, am-fis-me'la (*amphi*, *smile*, knife). Double-edged knife.

Amphisphalsis, am-fi-sfal'sis (*amphi*, *sphallo*, to wander). Movement of circumduction used in reducing luxations.

Amphistoma hominis, am-fis'to-mah hom'in-is (*amphi*, *stoma*, mouth, double mouth). Entozoon in human intestines. Parasitic animals, ord. Hematoda, infesting intestinal tract of mammals.

Amphistomous, am-fis'to-mus. Possessing a cup at each end; term applied to amphistoma.

Amphitheatre, am'fe-the-a-tur. Circular room for lectures and operations in colleges or hospitals.

Amphodiplopia, am-fo-dip-lo'pe-ah (*amphi*, *diploos*, double, *ops*, sight). Double vision of both eyes.

Amphodonta, am-fo-don'tah (*amphi*, *odous*, tooth). Animals having teeth in both jaws.

Amphopeptone, am-fo-pep'tone. Final result of action of gastric acids and pepsin on albumen.

Amphora, am'fo-rah (*amphi*, *phero*, to bear). Ancient liquid measure containing above seven gallons.

Amphoric (am-for'ik) (*amphora*, a bottle) **res'onance**. See *Resonance*. **A. respira'tion**, in auscultation resembling sound made by blowing over surface of a bottle. In percussion, tympanitic or metallic. See *Cavernous respiration*.

Amphorosphonia, am-fo-ros-fo'ne-ah (*amphora*, *phone*, sound). Amphoric respiration.

Amphoteric, am-fo-ter'ik (*amphoteros*, both). Neither acid nor alkaline; glucose, for example.

Amphoterodiopsia (am-fo'ter-o-de-op'se-ah) or **Amphoterodiplopia**, am-fo'ter-o-dip-lo-pe-ah (*amphoteros*, on both sides). See *Diplopia*.

Amplexatio, am-pleks-ah'she-o (*am*, *plecto*, to interweave). Coition.

Amplexation, am-pleks-a'shun. Method used in surgery for treating a fractured clavicle by means of bandage or plaster.

Amplexus, am-pleks'us. Coition.

Amplia'tion (*amplus*, full). Enlargement by distension or dilatation.

Amplification, am-pli-fik-a'shun (*amplus*, large, *facio*, to make). Morbid extension or enlargement. In microscopy, enlargement of object or increase of power.

Ampliopia, am-ple-o'pe-ah. Partial loss or dimness of vision.

Amplitude, am'ple-tude. Fulness as of the pulse, of dimension, etc.

Amposis, am-po'sis. Absorption or disappearance of fluid in the body.

Ampulla, am-pul'lah (bottle). Membranous bag, shaped like a leathern bottle. Flask-like dilatation of a canal; blister; embryonic state of heart, brain, and liver. See *Cavitas elliptica*. In pharmacy a receiver. **A. canalic'uli lacryma'lis**, enlarged portion of lacrymal canals. **A. chylif'era** or **chy'li**, receptaculum chyli. **A. duc'tûs lactif'eri**, expansion of milk-duct near its termination in the nipple. **A. of Fallo'pian tube**, external half of that tube. **A. lactif'era**, A. ductus lactiferi. **A. Lieberkühn's**, blind extremity of lactiferous vessel in intestinal villus. **A. of mam'mary gland**, A. lactifera. **A. of op'tic nerve**, enlargement around anterior part of that nerve. **A. os'sea**, pyriform expansion at the end of each semicircular canal. **A. of rec'tum**, dilated portion of rectum near its termination. **A. of semicirc'ular canals**, see *Semicircular canals*. **A. of vagi'na**, upper part of that canal. **A. of vas def'erens**, expansion in vicinity of seminal vesicle before its termination in ejaculatory duct. **A. of Va'ter**, ampulla formed by orifice of pancreatic duct in the duodenum.

Ampullaceus, am-pul-lah'se-us. Dilated or swollen; having full abdomen; bullar.

Ampullæ, am-pul'le (same etymon), (pl. of **Ampulla**). Pouches or dilatations; phlyctænæ. **A. of o'viduct**, ampulla of Fallopian tube. **A. of rec'tum**, portion of that bowel usually closed, but capable of great expansion from accumulation of fæces. **A. of semicir'cular canals**, membranous labyrinth lining ampulla of semicircular canals or dilated portion of osseous canal. **A. of vagi'na**, upper dilatable part of that canal.

Ampull'ula (dim. of **Ampulla**). Lymphatic sac at end of intestinal villus.

Amputate, am'pu-tate (*amputo*, to cut off). To cut off a limb or portion of limb, or any prominent or important part, as breast, penis, uterus, uvula, etc.

Amputatio, am-pu-tah'she-o (same etymon). Amputation. **A. car'po-radia'lis**, amputation of wrist-joint. **A. incruen'ta**, amputation without loss of blood. **A. pannicula'ta**, flap amputation. **A. sponta'nea**, spontaneous amputation, as in fœtal life. **A. tib'io-tar'sea**, amputation at ankle-joint. **A. vo'cis**, aphonia.

Amputation, am-pu-ta'shun. Operation of separating, by means of cutting instrument, limb or part of limb or projecting part, as mamma, penis, etc., from rest of body, or of uterus or uvula. In case of a tumor, term excision, removal, or extirpation is more commonly used. **A., Alouette's**, A. at hip-joint by semicircular outer flap to trochanter major and internal flap from within outward. **A., Bau'dens's**, A. of knee by oval flaps, the knee-joint being disarticulated by elliptical incision. **A., Béc'lard's**, A. of hip by transfixion, posterior flap being made first. **A., Berger's**, best form of amputation by interscapulo-thoracic method, there being two flaps, one antero-inferior or pectoro-axillary, the other postero-superior or cervico-scapular. **A., blood'less**, A. with little or no loss of blood, as by use of rubber bandage. **A., Car'den's**, amputation including skin flap and circular division of muscle; combination, therefore, of circular and flap operations. **A., car'pal**, amputation of hand through carpus. **A., cen'tral**, A. leaving cicatrix in centre of stump. **A., Cho'part's**, operation called after Chopart, French surgeon, consisting in removing foot in cases of caries or injury of metatarsal, cuneiform, cuboid, and scaphoid bones, so as to leave merely the astragalus and calcaneum, principal flap being obtained from sole of foot. **A., cir'cular**, that in which integuments and muscles are divided circularly, without leaving separate flaps. In circular skin-flap amputation skin is divided by circular incision and dissected back to point at which circular division of soft parts is to be made. **A., coat-sleeve**, form of circular amputation having external covering long and puckered together with tape to avoid stitches. **A., congen'ital**, amputation which has occurred during fœtal life. **A., consec'utive**, A. performed even later than secondary A., as in cases of abscess. **A. in contigu'ity**, A. at an articulation. **A. in continu'ity**, A. at any other point. **A., cox'o-fem'oral**, A. at hip-joint. **A., cuta'neous**, A. in which flaps are made of cutaneous tissue; see *Circular A.* **A. diaclas'tic**, operation comprising forcible fracture of bone and amputation with écraseur. **A., double-flap**, A. with two flaps. **A., Dubrueil's**, external flap amputation at the wrist-joint, providing a substantial covering for the bones. **A., Du'puytren's**, a form of a. at shoulder-joint in which two rounded flaps are made from external and internal parts of arm; the former by transfixion with narrow-bladed knife at back part two inches behind acromion process; humerus being then disarticulated, inner flap is made by incision from within outward. **A., Duval's**, supramalleolar amputation by oblique elliptical incision. **A., eccen'tric**, A. leaving cicatrix out of central part of stump. **A., ellip'tical**, A. in

BOSTON MEDICAL

which flap and wound are both rounded, so as to have elliptical appearance. **A., Farabeuf's,** amputation at elbow-joint by anterior elliptical method; a. of great toe by internal plantar flap method; subastragaloid amputation by large internal and plantar flap; also amputation of the foot by same method; amputation of leg by large external flap. **A., Fer'gusson's,** Pirogoff's A., modified so as to retain the malleoli, calcaneum being brought between them. **A., flap,** A. leaving one or two flaps to cover stump when limb has been removed; when amount of soft parts is not enough to cover bone, and parts heal by granulation, operation is said to be flapless a. **A., Forbes's,** Chopart's A., modified by separating cuneiform bones from scaphoid and sawing through cuboid. **A., gal'vano-caus'tic,** slow a. of soft parts by galvano-cautery wire and sawing of bone. **A., Gritti's,** A. at knee-joint by bringing prepared surfaces of patella and femur into apposition, patella being at first retained in anterior flap. **A., Gue'rin's,** amputation at elbow-joint by single external flap. **A., Guth'rie's,** Béclard's hip-joint A., modified by cutting flap from without inward; operation by oval method for amputation at neck of humerus. **A., Guyon's,** supramalleolar amputation by oblique elliptical incision. **A., Han'cock's,** modification of subastragaloid, tuberosity of os calcis being saved and turned up to be united to lower surface of astragalus, from which slice of bone is taken. **A., Hey's,** amputation of leg by large posterior flap; see *A., Lisfranc's.* **A., imme'diate,** A. made within a few hours after injury. **A., interme'diary** or **interme'diate,** see *A., mediate.* **A., interscap'ulo-thoracic,** operation involving removal of the upper limb, together with the scapula and outer two-thirds of the clavicle, without disarticulation at the shoulder-joint; see *A., Berger's.* **A., intradeltoid'ean,** French operation, in which the bone is sawn through between the tuberosities of the humerus and the insertions of the pectoralis major and latissimus dorsi. **A., intra-uterine,** spontaneous amputation, congenital a., occurring during fœtal life from constriction of umbilical cord or other pressure. **A., joint,** A. when limb is removed at an articulation. **A., Jor'dan's,** amputation at hip-joint, the bone being first enucleated, and the limb cut through at any desired point. **A., Lane's,** amputation by disarticulation at the knee-joint. **A., Lang'enbeck's,** amputation by cutting double flaps from without inward. **A., Lar'rey's,** A. at shoulder-joint, incision being made downward from acromion process, and spiral incisions at front and back of arm, meeting on interior part. **A., Lee's,** Teale's A., modified by taking long flap from back part of leg. **A., Le Fort's,** Pirogoff's A., modified by dividing upper portion of os calcis from point of insertion of tendo Achillis, so as to give larger mass for the heel to rest upon. **A., Le'noir's,** modified circular supramalleolar amputation. **A., Lis'franc's,** amputation of foot by disarticulation of metatarsal bones from tarsal; Hey's amputation differs from this by saving as much of metatarsal bones as disease or injury will allow. Also amputation at shoulder-joint, flaps being made by transfixion, head of humerus disarticulated, and internal flap made from within outward. **A., Lis'ter's,** modification of Teale's double rectangular flap a., anterior flap not being as much longer than posterior as in that a. **A., Lowd'ham's,** method of amputation by single flap. **A., ma'jor,** amputation of large or important limbs or at important joints. **A., Malgaigne's,** A. of foot, leaving only astragalus; a form of oval a., having one longitudinal incision proceeding from spiral incisions below. Amputation of the arm by a single rounded flap, usually from the flexor surface. **A., me'diate,** A. performed between occurrence of inflammation and suppuration. **A., mi'nor,** A. not involving important structures, as a. at ends of fingers or toes. **A., mixed,** A., Carden's. **A., mul'tiple,** A. performed several times on one person. **A., nat'ural,** spontaneous a. **A. neuro'ma,** see *Neuroma.* **A., oblique** or **oval,** A. made in such way as to present oval appearance of wound, flap of one side being received into space of opposite sides by special incisions. **A., osteoplas'tic,** A. in which osseous surfaces are retained in apposition; see *A., Pirogoff's.* **A., Pan'coast's,** A. at knee-joint; anteriorly short oval flap in which patella is retained, and two flaps laterally and posteriorly, meeting about centre of popliteal space. **A., par'tial,** intra-uterine amputation; amputation of part of a limb or bone. **A., patholog'ical,** amputation performed on account of disease. **A., Per'rin's,** oval operation in subastragaloid amputation. **A., Pirogoff's,** mode of amputating at ankle proposed by Pirogoff of Russia, consisting in retaining portion of calcaneum to impart greater length and rotundity to stump. **A. at point of elec'tion,** A. performed at advantageous point. **A., Pol'lock's,** amputation at knee-joint, the latter being disarticulated by a long anterior flap. **A., pri'mary,** amputation performed almost immediately after injury, before inflammatory complications have appeared. *Secondary amputations* are those performed after suppuration has occurred. **A., racket,** A., oval. **A., Rav'aton's,** prototype of double-flap amputation (1739). **A., rectang'ular,** A., Teale's. **A., Roux's,** differs from Syme's in flap being made from inner and under side of heel. **A. Scoutetten's,** oval method. **A., sec'ondary,** see *A., primary.* **A., Sédillot's,** A. somewhat like that of Syme, except that flap is made from internal and solar surfaces of foot and ankle. **A., skin-flap,** A., tegumentary. **A., Stephen Smith's,** amputation at the knee-joint by disarticulation by lateral hooded flaps. **A., Soupart's,** elliptical method, as at the elbow-joint. **A., Spence's,** modification of Larrey's amputation, longitudinal incision being made on internal part of arm in amputation at the shoulder-joint. **A., sponta'neous,** intra-uterine amputation or a. from mortification. **A., Stokes's,** modification of Gritti's, so that medullary canal of bone is not exposed. **A., subastrag'alar** or **subastrag'aloid,** French operation, made by heel flap as in Syme's A. and dorsal flap as in Chopart's A., foot being removed by opening joints between scaphoid and astragalus, and disarticulating between latter and os calcis. **A., subperios'teal,** variety of a. in which periosteum is sawed in form of flaps, so that danger of necrosis may be averted. **A., supravagi'nal of u'terus,** amputation of body of uterus. **A., Syme's,** removal of foot at ankle-joint, taking off articular surfaces of bones of leg above basis of malleoli, covering for osseous surfaces being provided from integument of heel; modification of Carden's A., the flaps of skin being crescentic. **A., Tavignot's,** amputation of the leg by large posterior flap. **A., Teale's,** rectangular amputation; modification of flap operation, consisting of one long anterior skin and muscular flap and short posterior. **A., teg'mentary,** A. in which flaps are made of cutaneous tissues. **A., traumat'ic,** amputation performed on account of injury. **A., Tripier's,** modification of Chopart's amputation of the foot, making a wide horizontal section of the os calcis, providing an excellent flap, and giving a broad and level basis of support. **A., u'tero-vagi'nal,** hysterooöphorectomy. **A., Ver'male's,** double-flap amputation by transfixion; amputation of thigh by lateral flaps. **A., Verneuil's,** subastragaloid amputation by disarticulation of little toe with its metatarsal bone by oval or racket incision. **A., Whar'ton's,** modification of Teale's A., having only one flap and bone sawn across.

Amputatu'ra. Amputation.

Amulet, am'u-let (*amoliri,* to remove). Image or substance worn about the person to avert disease or danger.

Amurca (am-ur'kah) or **Amurga,** am-ur'gah (*amergo,* to press out). Grounds remaining after olives have been crushed and deprived of their oil; used as application to ulcers.

Amusa, am-u'sah. Musa paradisiaca.

Am'ussat, valve of. See *Gall-bladder.*

Amussat's opera'tion for artific'ial a'nus. See *Colotomy.*

Amussis, am-us'sis (workman's level). Part of posterior commissure of brain, formed by median fissure passing through it.

Amyasthenia, ah-me-as-then-e'ah (*a, mus,* muscle, *asthenia,* weakness). Muscular debility.

Amyasthenic, ah-me-as-then'ik. Tending to or affected with muscular debility.

Amycha (am'ik-ah) or **Amyx'is** (*amusso,* to scratch). Excoriation, scarification.

Amyctic, am-ik'tik (same etymon). Medicine which stimulates and vellicates the skin; caustic, corrosive.

Amydriasis, am-id-re'as-is. Mydriasis.

Amyelencephalia, ah-me-el-en-sef-al'e-ah (*a, muelos,* marrow, *enkephalos,* brain). Absence of spinal marrow and brain; such monstrosity is said to be *Amyelenceph'alous.*

Amyelia, ah-me-el'e-ah (*a, muelos,* marrow). Monstrous formation with absence of spinal marrow.

Amyelinic, ah-me-el-in'ik (*a, muelos,* marrow). Term applied to nerve-fibres devoid of medullary sheath, and to neuromata made up of such fibres. Affected with amyelia.

Amyelonervia (ah-me-el-o-nur've-ah) or **Amyloneuria,** ah-me-el-o-nu're-ah (*a, muelos,* marrow, *neuron,* nerve). Paralysis or deficient action of spinal marrow.

Amyelotrophy, ah-me-el-ot'ro-fe (*a, muelos,* marrow, *trophe,* nourishment). Atrophy of spinal marrow.

Amyelus, ah-me'el-us (*a, muelos,* marrow). Devoid of spinal marrow.

Amyencephalus, ah-me-en-sef'al-us (*a, muelos,* marrow, *kephale,* head). Monstrosity without spinal cord or brain.

Amygdala, am-ig'dal-ah. The almond, of which there are two kinds, Amygdala amara and A. dulcis, obtained from two varieties of Amygdalus communis or A. sativa, almond tree, native of Barbary, ord. Amygdaleæ. Taste of Amygdala dulcis, Jordan almond, is soft and sweet; that of A. amara, bitter; both yield, by expression, a sweet, bland oil. Bitter almonds contain prussic acid; they are chiefly used for forming emulsions. The tonsil. Amygdala is also the tonsil, lobule, or prominence of the cerebellum, *A. cerebelli,* from resemblance to enlarged tonsil. The amygdalæ are seated on either side of the uvula in the fourth ventricle. **A. ama'ra,** see *Amygdala.* **A. dul'cis,** see *Amygdala.* **A. Per'sica,** Amygdalus Persica.

Amyg'dalæ. Tonsils.

Amygdalatum, am-ig-dal-at'um. Almond emulsion; see *Emulsio amygdalæ.*

Amygdalia, am-ig-dal'e-ah. Tonsils.

Amygdalic acid, am-ig'dal-ik as'id. When amygdalin is partially decomposed by boiling with an alkali, this acid results.

Amygdalin (am-ig'dal-in) or **Amyg'daline.** Glucoside contained in bitter almonds, cherry-laurel leaves, seeds of peaches, plums, etc., with an albuminoid ferment called emulsin or synaptase, by which, in presence of heat and moisture, amygdalin is decomposed into hydrocyanic acid, oil of bitter almonds, and dextro-glucose.

Amygdalitis, am-ig-dal-e'tis. Inflammation of tonsils; quinsy; see *Cynanche tonsillaris.*

Amygdalo-glossus, am-ig'dal-o-glos'sus. Continuation of fibres of palato-glossus muscle, passing from tongue to tonsil; elevates base of tongue.

Amygdaloid fossa, am-ig'dal-oid fos'sah. Space between pillars of fauces in which tonsil is placed. **A. tu'bercle,** prominence at extremity of descending cornu of lateral ventricle.

Amygdaloncus, am-ig-dal-on'kus (*amygdala, onkos,* tumor). Swelling of tonsil.

Amygdalopathy, am-ig-dal-op'a-the. Disease of tonsil.

Amygdaloplethora, am-ig-dal-o-pleth-o'rah. Congestion of tonsil.

Amygdalotome, am-ig'dal-o-tome (*amygdala,* tonsil, *tome,* incision). Tonsillotome, or instrument for cutting off part or whole of tonsil.

Amygdalotomy, am-ig-dal-ot'o-me. Excision of tonsil or tonsils.

Amygdalum, am-ig'dal-um. Amygdalus.

Amyg'dalus. See *Amygdala.* **A. commu'nis,** see *Amygdala.* **A. Per'sica,** common peach tree. Leaves and flowers have been considered laxative; they are bitter and aromatic. The fruit, peach, is a pleasant and wholesome summer fruit when ripe; the kernels, *amygdalæ Persicæ,* as well as flowers, contain prussic acid. **A. sati'va,** see *Amygdala.*

Amygdaly'pertrophia. Hypertrophy of tonsil.

Amygmus, am-ig'mus (*amusso,* to scratch). Scarification.

Amykos, am'ik-os. Compound of boric acid and thymol, used in Northern and North-eastern Europe as disinfectant in gonorrhœa and catarrhal conditions.

Amyl, am'il. C_5H_{11}. Hypothetical radical of homologous series, which includes methyl, ethyl, propyl, etc. Several of its compounds have therapeutic value. See also *Amylum.* **A. ac'etate,** similar in its properties to nitrite and iodide, though to less degree. **A. alcohol,** amylic alcohol. **A. chlor'ide,** colorless fluid, employed as anæsthetic; too slow and profound in effects for ordinary practice. **A., hy'drated ox'ide of,** fusel oil. **A. hy'dride** or **hy'druret,** hydramyl, colorless volatile liquid, said to be lightest known, proposed as anæsthetic by Prof. J. Y. Simpson. Mixed with ether, it may be employed in the form of spray as local anæsthetic. For inhalation it is dangerous on account of insolubility in the blood. **A. i'odide** is said to resemble amylic alcohol in its effects. Animal under its influence moves for some time in a circle, whether spontaneously or under excitation. It does not produce insensibility to pain. **A. ni'trate,** liquid derived from amylic alcohol. **A. ni'trite,** $C_5H_{11}NO_2$, amyl nitris (Ph. U. S.), inflammable volatile ethereal fluid; has odor of over-ripe pears, and is antiseptic. It is readily absorbed by mucous membranes and areolar tissue, producing immediately violent action of the heart. It dilates the capillaries and reduces arterial pressure. Consciousness is not destroyed by it. It must be inhaled in very small doses, three to five drops at a time. Its efficacy in angina pectoris and respiratory neuroses seems to be well established. It is also employed to cut short epileptic attacks and paroxysms of intermittent fever. It is an antidote to chloral and chloroform.

Amyla, am'e-lah. Starches.

Amylacea, am-e-lah'se-ah. Starchy articles of diet.

Amylaceous, am-il-a'shus (*amylum,* starch). Having nature of, or containing, starch; starchy, starch-like. **A. bod'ies,** corpora amylacea.

Amylamine, am-il'a-meen. $C_5H_{13}N$. Colorless liquid resulting from action of potassa on cyanate of amyl. **A. hydrochlo'rate,** $C_5H_{13}NHCl$, soluble crystalline salt, employed as antiperiodic.

Amylen (am'e-len) or **Amylene,** am'il-een. Volatile liquid prepared by distilling amylic alcohol with concentrated solution of chloride of zinc, sp. gr. 0.655 at 10° C. Has been used as anæsthetic, but is more dangerous than chloroform. **A. hy'drate,** $C_5H_{12}O$, dimethylethyl carbinol; tertiary amyl alcohol; made by shaking together at 0° C., or under, 300 cc. of amyline and 600 cc. of sulphuric acid; clear, soluble, oily liquid, penetrating odor, sp. gr. 0.812; hypnotic. Dose, gtt. xx–xxx.

Amylenization, am-il-e-ni-za'shun. Producing anæsthesia by amylin.

Amyleon, am-il'e-on. Starch.

Amyli iodidum, am'il-e i-o'did-um. Starch, iodide of. **A. iodure'tum,** starch, iodide of.

Amylic, am-il'ik (amylum). Containing amyl. **A. acid,** $C_5H_{10}O_2$. When amylic alcohol is acted upon by oxidizing agents it loses 2H and gains O_5; properties identical with valerianic acid. **A. alco'hol,** $C_5H_{12}O$. Known also as fusel oil, amyl alcohol, amyl hydrate, grain-oil, etc.; heavy liquid, soluble in alcohol, but not in water, produced by continuance of fermentation of grain and potatoes; penetrating odor and taste after spirit proper has been obtained from it. Hypnotic,

especially in mental diseases. Has been used as adulterant of whiskey.

Amylin, am'il-in. Starch cellulose.

Amylion, am-il'e-on. Starch.

Amylium (am-il'e-um) **chlo'ride.** Amylamine chloride. **A. nitro'sum**, amyl nitrite.

Am'ylo-dex'trin. Erythrodextrin.

Amyloid, am'il-oid (*amylum*, and *eidos*, resemblance). Resembling starch; glycogen. **A. bod'ies**, see *Corpora amylacea*. **A. degenera'tion**, pathological condition in which a firm waxy substance is present in the tissues, not responding to chemical agents and resisting putrefaction. It usually occurs in the abdominal organs; see *Lardaceous*.

Amyloids, am'il-oids. Non-nitrogenous aliments—starch, sugar, and their allies.

Amylolysis, am-il-ol'is-is (*amylum*, *lusis*, separation). Transformation of starch into glucose by decomposition of the former; to such ferment as the saliva or pancreatic juice the term *Amylolyt'ic* is applied.

Amylon, am'il-on. Amylum, glycogen.

Amylo-nitrous ether, am'il-o-ni'trus e'thur. Amyl nitrite.

Amylopsin. Ferment from pancreatic juice, resembling ptyalin, converting starch into sugar.

Amyloses, am'il-o-zes. Materials like starch; group including starch, dextrin, glycogen, cellulose, etc.

Amyloxydum (am-il-oks'id-um) **nitro'sum.** Amyl nitrite.

Amylum, am'il-um (*a*, *mule*, mill, because made without a mill). Starch, starch of wheat, farina; fecula of seed of Triticum vulgare, inodorous and insipid, white and friable; insoluble in cold water and alcohol, but forming with boiling water strong, semitransparent jelly; demulcent. It is dusted on excoriated surfaces as absorbent of irritating secretions. Free iodine is a delicate test for starch, giving deep-blue color when added to it. Starch is met with abundantly in all cereal grains, in stalks of many palms, in some lichens, and in many tuberous roots, particularly in bulbs of the orchis. $C_6H_{10}O_5$. It is converted by dilute acids or diastase into dextrin and dextrose. **A. al'bum**, wheat starch. **A. America'num**, arrow-root. **A. can'næ** or **canna'ceum**, tous-les-mois. **A. cur'cumæ**, East Indian arrow-root. **A. ioda'tum**, starch, iodide of. **A. ma'idis**, corn starch. **A. manihot'icum**, tapioca. **A. maranta'ceum**, arrow-root. **A. nitro'sum**, amyl nitrite. **A. ory'zæ**, rice starch. **A. palma'ceum**, sago. **A. quer'neum**, racahout. **A. sa'gi**, sago. **A. sola'ni**, potato starch. **A. tritic'eum**, amylum. **A. trit'ici**, amylum.

Amyocardia, ah-me-o-kar'de-ah (*a*, *mus*, muscle, *kardia*, heart). Feeble muscular action of the heart.

Amyon, ah'me-on (*a*, *muon*, muscle). Without muscle; applied to limbs so extenuated that muscles cannot be distinguished.

Amyosthenia, ah-me-os-then-e'ah. Defect of power of muscular contraction Medicine capable of diminishing muscular power is an *Amyosthen'ic*.

Amyotroph'ia or **Amyot'rophy.** Atrophy of muscle or muscles. **A. spina'lis progressi'va**, progressive muscular atrophy.

Amyotroph'ic lat'eral sclero'sis. Progressive muscular atrophy, due to sclerosis of lateral columns of spinal cord. **A. paral'ysis**, paralysis due to muscular atrophy.

Amyous, ah'me-us (*a*, *mus*, muscle). Deficient in muscular development or power.

Am'yrin. Resinous constituent of elemi.

Amyris, am'ir-is (*a*, intensive, *muron*, odoriferous ointment). **A. balsamif'era**, *Rosewood, White candle-wood;* exudes resinous balsam. **A. Caran'na**, source of balsamic resin, Caranna or Manilla elemi. **A. elemif'era**, plant whence gum elemi is obtained; gum or resin is brought from Spanish East and West Indies; softish, transparent, whitish color, and strong, though not unpleasant, smell; used in ointment and plasters. **A. Gileaden'sis**, plant growing in Africa and Arabia, said to yield balm of Gilead. **A. opobal'samum**, plant from which is obtained balsam of Mecca, balsam or balm of Gilead, by incisions; juice of fruit is called carpobalsamum; that of wood and branches xylobalsamum; it has properties of milder terebinthinates. **A. Plumie'ri**, West Indian plant yielding elemi resin. **A. tomento'sa**, Fagara octandra.

Amyron, am'ir-on. Carthamus tinctorius.

Amytose, am'it-oze. Material like starch; one of group including starch, dextrin, glycogen, cellulose, etc.

Amyus, ah'me-us (*a*, *mus*, muscle). Amyous.

Amyxia, ah-miks'e-ah (*a*, *muxa*, mucus). Deficiency or absence of mucus.

Amyxis, ah-mix'is. Excoriation; scarification.

An, as prefix. See *A*, *Ad*, and *Am*.

A'na. Of each; used in prescriptions as well as *ā* and *āā*, its abbreviations; as prefix, it means in, through, upward, above, in opposition to *cata*—also, again, repetition, like the English *re*.

Anabasis, an-ab'as-is (*anabaino*, to ascend). First period of disease, or that of increase. **A. aphyl'la**, species of Chenopodiaceæ used in leprosy. **A. Tamariscifo'lia**, used in S. Europe as anthelmintic; source of chouan.

Anabexis, an-ah'beks-is (*ana*, *besso*, to cough). Expectoration; ptyalism.

Anabiosis, an-ah-be-o'sis (*ana*, *biosis*, life). Restoration of life or vital power; faculty possessed by certain organisms after being dried and heated and apparently devoid of vitality.

Anabiotic, an-ah-be-ot'ik (*ana*, *biosis*, life). Coming to life again; having faculty of being restored to vitality and vigor.

Anablepsis, an-ah-blep'sis (*ana*, *blepo*, to see). Restoration of sight.

Anabolæon, an-ah-bo-le'on (*anaballo*, to cast up). Ointment for extracting darts or other extraneous bodies.

Anabole, an-ab'o-la (same etymon). Evacuation upward; act of ejecting by the mouth; it includes expsuition, expectoration, regurgitation, and vomiting.

Anabolism, an-ab'o-lizm (*anaballo*, to cast up). Process of building up; opposite of katabolism; process of assimilation or of building up living matter.

Anabrochismus, an-ah-bro-kis'mus (*ana*, *bronchos*, running knot). Operation for removing eyelashes when they irritate the eye, by means of hair knotted around them; removal of tumor by ligation.

Anabrosis, an-ah-bro'sis (*ana*, *brosko*, to eat). Corrosion; erosion.

Anabrotic, an-ah-bro'tik. Corrosive.

Anacampseros, an-ah-kamp'se-ros. Sedum telephium.

Anacamptic, an-ah-kamp'tik (*ana*, *kampto*, to bend). Reflecting rays of sound or light.

Anacamptometer, an-a-kamp-tom'e-ter, (*anakampto*, to bend back). Instrument to measure amount of spasmodic movement of knee in knee clonus.

Anacardiaceæ, an-a-kar-de-ah'se-a. Order Terebinthaceæ: the sumacs.

Anacar'dium latifo'lium (*ana*, *kardia*, heart, from resemblance of fruit to dried heart). Semecarpus anacardium. **A. na'num**, properties like those of A. occidentale, vesicant. **A. occidenta'le**, cashew of W. Indies. Oil of cashew-nut is an active caustic, used especially for warts, etc. Gum resembling gum Arabic, cashew gum, exudes from the bark. The bark is used in syphilis; astringent oil from the nut in ophthalmia. **A. orienta'le**, Avicennia tomentosa.

Anacatharsis, an-ah-kath-ar'sis (*ana*, *kathaireo*, to purge). Vomiting; purgation upward; expectoration. **A. catarrha'lis sim'plex**, catarrh.

Anacathartic, an-ah-kath-ar'tik. Producing expectoration or vomiting. Expectorant, emetic, or sternutatory medicine.

Anacestos, an-ah-ces'tos (*an*, *akeomai*, to cure). Incurable.

Anachauite wood. Wood of Cordia Boissieri, Mexican plant; decoction is used in phthisis.

Anachesmus, an-ah-kes'mus (*ana*, *knesma*, itching). Itching.

Anachonchylism, an-ah-kon'kil-izm. Gargling.

Anachrempsis, an-ah-kremp'sis (*ana*, *chrempsis*, spitting). Exspuition; expectoration.

Anachremptum, an-ah-kremp'tum. Sputum.

Anachron, an'ak-ron. Soda.

Anacinema, an-ah-sin-a'mah (*ana*, *kineo*, to move). Evacuation upward, as by expectoration or vomiting. Exercise by upward movement of the arms. Exspuition.

Anacinesis, an-ah-sin-a'sis. Evacuation upward, as by expectoration or vomiting. Mental excitement.

Anaclasis (an-ak'las-is) or **Anaclasmus**, an-ak las'mus, (bending or breaking upward or backward). Flexion of joints; fracture; reflection or refraction. Repercussion.

Anaclas'tic. Relating to reflected light or sound.

Anaclas'tics. Dioptrics.

Anaclinterium (an-ah-klin-ta're-um) or **Anaclintrum**, an-ah-klin'trum (*anaklino*, to recline). Long chair or seat for reclining.

Anacollema, an-ah-kol-la'mah (*ana*, *kollao*, to glue). Healing medicine; frontal bandage.

Anacoluthia, an-ah-kol-u'the-ah (*an*, *akolouthos*, consequent). Incoherence.

Anacomide, an-ah-kom'id-a (*ana*, *komizo*, to bring). Restoration of health or strength.

Anaconchyliasm (an-ah-konk'il-e-asm) or **Anaconchylism** (*anakonchuliazo*, to gargle). Gargle or gargling.

Anacope, an-ak'o-pe. Nausea.

Anacrotic (an-a-krot'ik) or **Anacrotous**, an-ak'rotus (*ana*, *krotos*, clapping of hands). A term applied to oscillation in the ascent of the curve of the sphygmograph, *Anacrotism*, occurring usually in dilatation and hypertrophy of the left ventricle of the heart, or after ligation of an artery.

Anactesis, an-ak-ta'sis (*ana*, *ktaomai*, to acquire). Restoration of strength or health.

Anactir'ion. Artemisia.

Anacuphisma, an-ak-u-fiz'mah. Lifting up; suspension, light exercise; diminution of force of disease.

Anacycleon, an-ah-sik'le-on (*ana*, *kukleo*, to go in a circle). Charlatan.

Anacyclesis, an-ah-sik-la'sis. Circulation; circulation in cells.

Anacyclus (an-ah-sik'lus) **au'reus.** Plant, nat. ord. Compositæ, growing in Europe; stomachic. **A. officina'rum**, pellitory of the shops in Germany. **A. pyre'thrum**, Anthemis pyrethrum.

Anadesma, an-ah-des'mah (*ana*, *desmos*, bandage). Fascia, bandage.

Anadicrotic, an-ah-dik-rot'ik. Form of dicrotic pulse, or double beat, variations of which appear in the elevation of the sphygmograph. Condition is called *Anadicrotism*.

Anadidymus, an-ah-did'im-us (*ana*, *didumos*, twin). Double monstrosity from one germinal vesicle.

Anadiplosis, an-ah-dip-lo'sis (*ana*, *diploo*, to double). Redoubling occurring in paroxysm of intermittent, when its type is double.

Anadip'sia (*ana*, *dipsos*, thirst). Intense thirst.

Anadora, an-ad'o-rah. Excoriation; ulceration.

Anadosis (giving up), an-ad'o-sis. Purgation upward, as by vomiting. Congestion of blood toward upper parts of body; chylification; *diadosis* means capillary nutrition.

Anadrome, an-ad'ro-ma (*anadrome*, ascension). Transport of humor or pain from a lower to an upper part. Globus hystericus.

Anadromous, an-ad'ro-mus. Pertaining to pains which ascend from the lower to the upper part of the body.

Anædœus, an-e-de'us (*an*, *aidoia*, organs of generation). Monster devoid of sexual organs.

Anæma, an-e'mah (*an*, *haima*, blood). Bloodless animals, as intestinal worms.

Anæmasia (an-e-mah'ze-ah) or **Anæmasis**, an-e'mas-is. Fatal disease of mules, anæmia being main symptom; anæmia.

Anæmatopoesis, an-e-mat-o-po-e'sis (*an*, *haima*, blood, *poieo*, to make). Impeded or obstructed hæmatosis.

Anæmatosis, an-e-mat-o'sis (*an*, *haima*, blood). Defective hæmatosis; anæmia.

Anæmia (an-e'me-ah) or **Ane'mia** (*an*, *haima*, blood). Bloodlessness; privation of blood, opposite condition to plethora or hyperæmia. It is characterized by every sign of debility; diminished quantity of fluids in capillary vessels. The essential character of the blood in anæmia is diminution in ratio of red corpuscles, also of albumen. **A., cer'ebral**, deficiency of supply of blood to brain. **A., essen'tial**, progressive pernicious anæmia. **A., fe'cal**, A. associated with constipation. **A., glob'ular**, A. from deficiency of red corpuscles. **A., idiopath'ic**, progressive pernicious anæmia. **A., lymphatic**, lymphadenoma, Hodgkin's disease. **A., miner's**, A. due to ankylostoma duodenale in intestine. **A., palu'dal**, A. from malaria. **A., pas'sive**, A. from mechanical pressure.. **A., pernicious** or **progressive pernicious**, form of extreme anæmia, advancing steadily or with slight remissions to fatal result. **A., pri'mary**, chlorosis. **A., pul'monary**, A. of lungs, as in emphysema. **A., ret'inal**, A. affecting calibre of retinal arteries. **A., se'nile**, A. of old persons, with diminution of albumen and red corpuscles and increase of fibrin. **A., spi'nal**, A. of spinal cord, affecting sensation and motion. **A., splen'ic**, generalized lymphadenoma, Hodgkin's disease. **A., tuber'cular**, chlorosis.

Anæmiated, an-e'me-a-ted. Anæmic.

Anæmic, an'e-mik. Appertaining or relating to anæmia. Exanguious. **A., murmur**, gentle murmur in the anæmic heard on auscultation at base of heart over the large vessels. **A. protru'sion of eye'balls**, exophthalmic goitre.

Anæmochrous, an-e-mok'rus (*an*, *haima*, blood, *chroa*, color). Devoid of color; pale.

Anæmosis, an-e-mo'sis. Anæmia.

Anæmotrophy, an-e-mot'ro-fe (*an*, *haima*, blood, *trophe*, nourishment). Deficiency of sanguineous nourishment.

Anæmydria, an-e-mid're-ah (*an*, *haima*, blood, *hudor*, water). Condition of blood in which there is diminished quantity of serum.

Anæretic, an-e-ret'ik (*anaireo*, to destroy). Any agent corrosive or destructive to tissues.

Anaërobia, an-ah-er-o'be-ah, pl. of **Anaërobion** (*an*, *aër*, air, *bios*, life). Micro-organisms which do not require oxygen for their existence, or whose life is destroyed by it. Such bodies are said to be *Anaëro'bic*; they live through medium of fermentation they cause. It is called *facultative* when the organism accustomed to oxygen becomes anaërobic.

Anaërobic, an-ah-er-o'bik (same etymon). See *Anaërobia*.

Anaërobiosis, an-ah-er-o-be-o'sis (same etymon). Life in an oxygenless medium.

Anaëromicrobion, an-ah-er-o-mik-ro'be-on. Anaërobic micro-organism.

Anaëroplasty, an-ah'er-o-plas-te (*an*, *aër*, air, *plasso*, to form). Treatment of wounds under water, not exposed to air.

Anæsthecine'sis (*an*, *aisthesis*, sensation, *kinesis*, motion). Loss of sensibility and motion.

Anæsthesia, an-es-the'ze-ah (*an*,*aisthanomai*, to feel). Privation of sensation, and especially of that of touch, according to some; paralysis of sensibility. It may be general or partial, and is almost always symptomatic, or it may be the result of application of a general or local anæsthetic. **A. acus'tica**, deafness. **A. angeiospas'tica**, A. from spasm of blood-vessels, as in writer's cramp. **A., bul'bar**, A. from injury of pons Varolii or medulla oblongata. **A., cen'tral**, A. from disease or injury of central nervous system. **A., cere'bral**, A. from disease or injury of brain. **A., crossed**, A. of one side, due to injury of other side of spinal cord. **A. doloro'sa**, loss of sensibility of part, with pain from other causes. **A., gen'eral**, A. of whole of the body. **A., gir'dle**, A. in zone around the body. **A. gustato'ria** or **lin'guæ**, loss of sense of taste. **A., lo'cal**, A. of a circumscribed part or region. **A., musc'ular**, loss of muscular sense, as in locomotor ataxia. **A. nascen'tium**, as-

phyxia of new-born. **A. olfacto'ria,** anosmia. **A., optic,** amaurosis. **A., periph'eral,** A. from influences affecting end-organs of muscles. **A. sexua'lis,** absence of sexual passion. **A. by sugges'tion,** hypnotism. **A., sur'gical,** complete and profound A. from action of anæsthetic, as during operation. **A. unilatera'lis,** hemianæsthesia.

Anæsthesimeter, an-es-thes-im'e-tur (*anæsthesia, metron,* measure). Instrument for measuring quantity of anæsthetic employed or degree of anæsthesia.

Anæsthesis, an-es-the'zis. Anæsthesia; production of anæsthesia.

Anæsthetic, an-es-thet'ik. Relating to privation of feeling; agent that prevents feeling, or that produces such effect by being received into the lungs in form of vapor or gas, and passing with the blood to the nervous centres on which its action is exerted. The intellectual faculties first feel the influence, intoxication supervening, with imperfect power of regulating movements; the sensory ganglia become afterward or simultaneously affected, sensation and motion are suspended, and ultimately, if the quantity inhaled be sufficient, the medulla oblongata has its actions suspended or destroyed, respiration ceases, and death results. Some anæsthetics, when applied to a part, deaden the sensibility or benumb it, and thus act as *local anæsthetics;* cold, as by ether, cocaine, carbolic acid, and iodoform are the chief of these. The chief general anæsthetics are ether, chloroform, nitrous oxide, bromoform, tetrachloride of carbon, trichlorhydrin, bichloride of methylene, paraldehyde, bichloride of ethidene, and ethyl bromide.

Anæsthetization, an-es-thet-iz-a'shun.. Condition of nervous system induced by anæsthetics. Employment of an agent for such purposes. To *anæsthetize* or *anesthetize* is to employ such agents.

Anæsthetolepra, an-es-thet-o-lep'rah. Lepra accompanied with anæsthesia; anæsthetic leprosy.

Anæsthetospasm, an-es-thet'o-spazm. Convulsive motion with unconsciousness.

Anæsthe'tus. Anæsthetic.

Anagallis, an-ag-al'lis (*ana, gala,* milk, from power of coagulating milk). *Red pimpernel, Scarlet pimpernel, Shepherd's sun-dial, Chickweed,* nat. ord. Primulaceæ. Common European plant; reputed antispasmodic and stomachic. **A. aquat'ica,** Veronica beccabunga. **A. arven'sis,** pimpernel; herb of W. United States, used in rheumatism. **A. cæru'lea** has similar properties.

Anagargalicton, an-ah-gar-gal-ik'ton (*anagargarizo,* to gargle). Gargling.

Anagargarism (an-a-gar'gar-izm) or **Anagargariston,** an-ah-gar-gar-is'ton. Gargling.

Anagennesis (an-ah-gen-na'sis) or **Anagenesis,** an-ah-jen'es-is (*ana, gennao,* to generate). Regeneration; growing again.

Anaglyphe, an-ag'lif-e (*ana, glupho,* to carve). Calamus scriptorius.

Anaglyptoscope, an-a-glip't'o-skope (*anaglyphe,* carving, *skopeo,* to see). Arrangement for reversing casts, to change appearance of the cut and relief portions.

Anagnate, an-ag'nate (*ana, gnathos,* jaw). Not having a jaw.

Anagnosis, an-ag-no'sis (*ana, gnosis,* knowledge). Profound knowledge of medicine.

Anagnostakis, an-ag-nos'tak-is (after the Greek physician who invented it). Ophthalmoscope.

Anago'ge (*ana, ago,* to lead). Expectoration, vomiting; rejection.

Anagraph, an'a-graf (*ana, grapho,* to write). Prescription.

Anagyris (an-ag'ir-is), **Anagyrus,** an-ag'ir-us, or **A. fœtida.** Stinking-bean trefoil. Ord. Leguminosæ. Native of Italy. Leaves are powerfully purgative; juice is diuretic; seeds are emetic.

Anaisthesia (an-ais-tha'ze-ah) or **Anaisthæsia.** Anæsthesia.

Anaixesis, an-ikes-e'sis (*anaisso,* to begin afresh). Return of a disease.

Anakainosis, an-ah-ki-no'sis (*ana, kainizo,* to renew). Renewal or restoration. **A., gen'ital,** restoration by operation of the vulvo-vaginal and uterine tract without interference with its functions.

Anakinesis, an-ah-kin-a'sis (*ana, kineo,* to move). Agitation. Fusion, as of germs.

Anaklasis, an-ak'las-is (bending upward or backward). Flexion of joints.

Anakroasia, an-ah-kro-ah'ze-a (*an,* deprivative, *akroasis,* lecture). Want of appreciation of meaning of spoken words, although sound is distinctly heard.

Anakrotia, an-ah-kro'she-a. Anachrotism.

Anakusia (an-ah-ku'ze-ah) or **Anaku'sis** (*an, akouo,* to hear). Loss of hearing.

A'nal. Relating or appertaining to the anus, as anal region, anal fascia. **A. re'flex,** see *Reflex.*

Analdia, an-al'de-ah (*an, aldo,* to grow). Defective nutrition.

Analectis (an-ah-lek'tis) or **Analectris,** an-ah-lek'tris. Cushion to hide a deformed part.

Analectrotonous. Anelectrotonous.

Analemsia (an-ah-lem'she-ah) or **Analentia,** an-ah-len'she-ah. Analepsia.

Analepsia (an-ah-lep'she-ah) or **Analepsis,** an-ah-lep'sis (*ana, lambano,* to take). Convalescence; restoration to strength after disease. Sympathetic epilepsy from gastric disorder. Support given to fractured extremity, as by suspension.

Analeptic, an-a-lep'tik. Restorative, as medicine or food adapted to recruit strength during disease or convalescence.

Analges, an-al'jes (*an, algos,* pain). Not sensitive or subject to pain, as in mortification.

Analgesia (an-al-ge'ze-ah) or **Analgia,** an-al'je-ah (*an, algos,* pain). Stupor; insensibility; insensibility to pain, but not to tactile and other impressions.

Analgesic, an-al-je'sik. Anæsthetic; relieving pain, as anodyne.

Anal'gia. Analgesia.

Analgic, an-al'jik. Analgesic; free from pain.

Analogism, an-al'o-jizm. The process of judging diseases by analogy.

Anal'ogous. Resembling or conforming to other part or organ. **A. tis'sues,** diseased tissues resembling normal elementary tissues.

Analogue, an'a-log (*ana, logos,* proportion). Part in one organized being having same function as part in another organized being.

Analosis, an-al'o-sis (wasting). Atrophy.

Analthes, an-al'thes. Incurable.

Analthetic, an-al-thet'ik. Incurable.

Analysis, an-al'is-is (*ana, luo,* to loose). Resolution of anything into its component parts. It is *qualitative* when employed to discover the ingredients of a compound; *quantitative* when made with the view of determining the quantity of each. **A., gasomet'ric,** eudiometry, gasometry; chemical analysis for estimating the volume of gases in different specimens of atmosphere. **A., gravimet'ric,** quantitative analysis obtained by weighing analyzed bodies or their products. **A., organ'ic,** analysis of organic substances. **A., prismat'ic,** spectrum analysis. **A., prox'imate,** analysis to determine the proximate principles of a body. **A., qual'itative,** A. of number and character of elements composing a body. **A., quan'titative,** A. of proportionate number of elements composing a body. **A., spectroscop'ic** or **spec'trum,** see *Spectrum.* **A., ult'imate,** analysis to ascertain the ultimate constituents of a compound. **A., volumet'ric,** quantitative analysis by determining the components by volume.

Analyt'ical. Relating to analysis, as analytical chemistry.

Analyzer, an'al-i-zur. Polariscope.

Anamintin, an-am-in'tin. Principle derived from picrotoxin.

Anamirta, an-am-ir'tah. Genus of Menispermaceæ. **A. coc'culus,** Menispermum cocculus. **A. paniccula'ta,** Menispermum cocculus.

Anamnesia (an-am-na'ze-a) or **Anamnesis,** an-am-na'zis (*ana, mnesis,* remembrance). Tracing of earlier history of a disease.

Anamnestic, an-am-nes'tik (*ana, mnesis,* remem-

brance). Relating to earlier history of a disease. Medicine for improving memory.

Anamniota, an-am-ne-o'ta (*an, amnion*). Amphibious or other animals without amnion.

Anamorphosis, an-a-mor'fo-sis (*ana, morphe*, shape). Term used in optics to denote the means by which a distorted image is returned to its original shape.

Ananas, an-an'as. Bromelia ananas. **A. aculea'ta**, Bromelia ananas. **A. America'na**, Bromelia pinguin. **A. ova'ta**, Bromelia ananas. **A., wild, broad-leaved**, Bromelia pinguin.

Anance, an-an'se. Rough or severe surgical treatment, as in fractures and dislocations.

Anandria, an-an-dre'ah (*an, aner*, a man). Want of manliness; impotence (male); emasculation. The individual is *Anan'der*.

Ananeosis, an-an-e-o'sis (*ana, neos*, new, and *osis*). Renovation or renewal, as of blood by chyliferous vessels and lymphatics.

Anankophagia, an-an-ko-fah'je-ah (*ananke*, restraint, *phago*, to eat). Restricted diet, as during a course of training.

Anapalindrom'esis (*anapalin*, opposite, *dromos*, a race). Recurrence of disease on opposite sides.

Anapausis, an-ah-pau'sis (rest). Rest, restoration, remission.

Anapeiratic, an-ah-pi-rat'ik (*anapeirasthai*, to repeat an exercise). Due to continuous muscular exercise; writer's cramp, for instance, a form of spasm of coordination of muscles so engaged, and therefore an anapeiratic disease.

Anaperia, an-ap-er'e-ah (*anaperos*, crippled). Lameness; mutilation or injury, as of limb.

Anapetia, an-ah-pet-e'ah (*anapates*, expanded). Expansion of vessels; state opposite to that of closure.

Anaphalakrosis, an-ah-fal-ak-ro'sis (*anaphalakros*, bald-headed). Baldness, especially of front of head.

Anaphalantiasis (an-ah-fal-an-te'as-is) or **Anaphalantoma**, an-ah-fal-an-to'mah (*ana, phalanthos*, bald). Loss of hair of the eyebrows; baldness in general.

Anaphe (an'af-a) or **Anaphia**, an-af'e-ah (*an, haphe*, touch). Diminution or privation of sense of touch; exaggeration of sense of touch.

Anaphlasis (an-af'las-is) or **Anaphlasmus**, an-af-las'mus (*anaphlao*, to produce erection). Masturbation.

Anaphonesis, an-af-o-na'sis (*ana, phone*, voice). Exercise of voice; vociferation; act of crying out.

Anaphora, an-af'o-rah (*ana, phero*, to carry). Anabole.

Anaphrodisia, an-af-ro-diz'e-ah (*an, Aphrodite*, Venus). Absence of venereal appetite.

Anaphrodisiac, an-af-ro-diz'e-ak. Without sexual desire; also medicine which diminishes sexual desire. The chief articles of this class are ice, cold baths, local and general, bromides of potassium and ammonium, iodide of potassium, conium, camphor, digitalis, purgatives, nauseants, bleeding.

Anaphrodite, an-af'ro-dite. One who is anaphrodisiac.

Anaphroditic, an-af-ro-dit'ik. Reproducing without intercourse of sexes.

Anaphroditism, an-af'ro-dit-izm. Anaphrodisia.

Anaphroditous, an-af-rod'it-us. Without sexual desire.

Anaphromeli, an-af-rom'el-e (*an, aphros*, froth, *meli*, honey). Clarified honey.

Anaphthia, an-af'the-ah. Anaudia.

Anaphysis, an-af'is-is (*ana, phuo*, to produce). Anagennesis.

Anaphytopyra, an-af-it-op'ir-ah (*anaphusis*, renewed growth, *pur*, fever). Fever supposed to occur about time of puberty or at certain periods of growth.

Anaplasis (an-ap'las-is) or **Anaplasmus**, an-ap-las'mus (*anaplasso*, to restore). Restoration; union or consolidation of a fractured bone.

Anaplastic (an-a-plas'tik) or **Anaplasmatic**, an-a-plas-mat'ik. Epithet applied to art of restoring lost parts or normal shape, as anaplastic surgery, *An'aplasty*. Agent increasing amount of plastic matter in the blood.

Anaplasty, an'a-plas-te. See *Anaplastic*.

Anaplerosis, an-ah-pler-o'sis (*ana, pleroo*, to fill). Repletion; surgical therapeutics supplying parts that are wanting or lost substance; cicatrization.

Anaplerotic, an-a-pler-ot'ik. Tending or relating to repletion, or supply of lost parts; promoting regeneration of flesh.

Anapleusis, an-ah-plu'sis (*ana, pleo*, to swim). Looseness of exfoliated bone or of carious or other tooth.

Anaplosis, an-ah-plo'sis (*ana, aploo*, to unfold, and *osis*). Growth.

Anapneusis, an-ap-nu'sis (*ana, pneo*, to breathe). Respiration; cessation of pain.

Anapnoe, an-ap'no-a. Respiration.

Anapnoenu'si (*anapnoe, nousos*, disease). Diseases of the respiratory organs.

Anapnograph, an-ap'no-graf (*anapnoe, grapho*, to describe). Apparatus on principle of sphygmograph to register speed, pressure, and quantity of aërial currents in respiratory tracts.

Anapnoic, an-ap'no-ik (*an, apnoia*, want of power of breathing). Restoring power of breathing; relating to respiration, the movements of inspiration and expiration, etc.

Anapnometer, an-ap-nom'e-tur (*anapnoe, metron*, measure). Spirometer, anapnograph.

Anapnoonusi, an-ap-no-on-u'se (*anapnoe*, respiration, *nousos*, disease). Respiratory diseases.

Anapodisis (an-ah-pod'is-is) or **Anapodismus**, an-ah-po-dis'mus (*anapodizo*, to go back). Retroversion. **A. u'teri**, retroversion of the uterus.

Anapodophyllum Canadense, an-ah-po-do-fil'lum kan-ad-en'sa. Podophyllum peltatum.

Anapophysis, an-ah-pof'is-is (*ana, apophysis*, outgrowth). Inferior posterior tubercle or apophysis on the lumbar vertebræ.

Anaposis, an-ap'o-sis (*ana, posis*, drink). Recession of humors from circumference to centre of body.

Anapsyctica, an-ap-sik'te-kah (*anapsucho*, to refresh). Restoratives.

Anaptosis, an-ap-to'sis (*ana, ptosis*, falling). Relapse.

Anaptysis (an-ap'tis-is) or **Anaptysmus**, an-ap-tis'mus (*ana, ptuo*, to spit). Expectoration.

Anaptyxis, an-ap-tiks'is (*anaptuxis*, unfolding). Growth.

Anarcotina, ah-nar-ko-te'nah. Narcotine.

Anarina, ah-nar-e'nah (*a, nares*, nostrils). Absence or loss of nostrils.

Anarrhaphe, an-ar'raf-e (sewing up). Operation for entropion by suture.

Anarrhegnumina, an-ar-rheg-nu'min-ah (*anarrhegnumi*, to break out again). Disuniting of fractures or ulcers.

Anarrhesis (an-ar-rha'sis) or **Anarrhexis**, an-ar-rheks'is (same deriv.). Disunion of united fracture; refracture; hemorrhage.

Anarrhinon, an-ar'rhin-on (*ana, rhis*, nose). That which returns by the nose; sternutatory; that which issues by the skin (*ana, rinos*, skin).

Anarrhinum, an-ar'rhin-um. Sternutatory.

Anarrhoe (an-ar-rho'a) or **Anarrhœa**, an-ar-rhe'ah (*ana, rheo*, to flow). Afflux of fluid toward upper or inner part of the body; reversed peristalsis.

Anarrhophe (an-ar'rho-fa) or **Anarrhophesis**, an-ar-rhof-a'sis (*anarrhophao*, to suck in). Absorption.

Anarrhophonusi, an-ar-rho-fon-u'se (*anarrhophao, nousos*, disease). Diseases of absorbents.

Anarrhopia, an-ar-hop'e-ah (*ana, rhepo*, to incline). Anarrhœa.

Anarthria, an-arth're-ah (*an, arthron*, articulation). Absence of limbs or joints; defect in articulate speech. **A. litera'lis**, defective articulation of letters; stammering. **A. syllaba'ris**, defective articulation or pronunciation of syllables.

Anarthrus, an-arth'rus (*an, arthron*, joint). Without joint; inarticulate; one so fat that his joints are scarcely perceptible.

Anasarca, an-ah-sar'kah (*an*, through, *sarx*, flesh).

General dropsy, dropsy of cellular membrane; commonly it manifests itself by swelling around the ankles; is characterized by tumefaction of limbs and soft parts covering abdomen, thorax, and even face, with paleness and dryness of skin, and pitting (especially the ankles) when pressed upon. It may be active or passive, and its treatment must be regulated by rules applicable to dropsy. At times symptoms are acute and the effusion sudden, constituting dermatochysis, hydrops anasarca acutus, œdema calidum, œ. acutum, œ. febrile of some. See *Hydrops*. **A. America'na**, sleeping sickness of South America, with distension of abdomen. **A., essen'tial**, A. dependent on disorder of nutrition. **A. gravida'rum**, œdema of pregnant women. **A. hyster'icum**, anathymiasis. **A., prim'itive**, A., essential. **A. pulmo'num**, hydropneumonia, œdema of lungs. **A. sero'sa**, phlegmasia dolens. **A., symptomat'ic**, A. due to other disease, as of the heart.

Anaseisis (an-as-ei'sis) or **Anasismus**, an-as-is'mus (*ana, seio*, to shake). Concussion.

Anasomia, an-ah-so'me-ah (*ana, soma*, body). Adhesion between body and limbs.

Anaspadia, an-ah-spad'e-ah. Anaspasis.

Anaspadiæus, an-ah-spad-e-e'us. One affected with anaspadias.

Anaspadias, an-ah-spad'e-as (*ana, spao*, to draw). Condition in which urethra opens on upper surface of penis.

Anaspadisis (an-ah-spad'is-is) or **Anaspadismus**, an-ah-spad-is'mus. Anaspasis.

Anaspasis (an-as'pas-is) or **Anaspasmus**, an-ah-spaz'mus (*ana, spao*, to draw). Contraction, especially of the bowels; revulsion.

Anassa, an-as'sah. Brōmelia ananas.

Anastaltic, an-a-stal'tik (*ana, stello*, to contract). Ascending (referring to nervous current); styptic.

Anastasis, an-as-tas'is (*anistemi*, to rise up). Afflux of blood toward upper part of body; restoration from sickness; convalescence; resuscitation.

Anastatic, an-as-tat'ik. Relating to recovery or restoration.

Anastœcheiosis (an-ah-ste-ki-o'sis) or **Anastoichiosis**, an-ah-stoi-ke-o'sis (*ana, stoicheion*, element). Resolution of body or parts into their elements.

Anastole, an-as'to-le (*ana, stello*, to draw back). Retraction, as of edges of wound.

Anastomose, an-as'to-moze. To cause anastomosis.

Anastomosis, an-as-to-mo'sis (*ana, stoma*, mouth). Inosculation; communication between two vessels. Communication of nerves has been called anastomosis. **A. aneurismat'ica**, telangiectasia. **A., intes'tinal**, process of resection of the intestine, in which the resected ends are closed by invagination and suture, and perforated decalcified bone plates used for approximation. **A., Ja'cobson's**, see *Petrosal ganglion*.

Anastomotic, an-as-to-mot'ik. Belonging or relating to anastomosis. **A. arch**, arch formed by union of two vessels. **A. ar'tery**, branch from brachial around the elbow; branch of obturator on inner side of crural ring; branch from femoral around knee-joint; branch of peroneal; branch of spinal accessory. **A. vein**, anastomotica magna vein, forming communication between veins and sinuses in the brain.

Anastomotica magna, an-as-to-mot'ik-ah mag'nah. Branch of brachial artery, coming off a little above the elbow, and bestowing branches to brachialis internus, to under edge of triceps, and to muscles, ligaments, etc. about the elbow-joint.

Anastomotics, an-as-to-mot'iks. Medicines were so called, as if capable of opening mouths of vessels, as aperients, diuretics, etc.

Anastrophe, an-as'tro-fe (*ana, strepho*, to turn). Inversion. **A. u'teri**, inversion of uterus.

Anatasis, an-at'as-is (*ana, teino*, to stretch). Extension.

Anathema, an-ath-e'mah (*ana, tithemi*, to put). Votive tablet put up in ancient temples by the sick.

Anatherapeusis, an-ah-ther-ap-u'sis (*ana, therapeusis*, cure). Treatment by progressively increased doses.

Anatherum muricatum, an-ath-a'rum mu-rik-at'um. Andropogon muricatus.

Anathomia, an-ah-thom'e-ah. Anatomy.

Anathrepsis, an-ah-threps'is (*ana, trepho*, to nourish). Renewal of nutrition, as in restoration to health.

Anathymiama (an-ah-thim-e-am'ah) or **Anathymiasis**, an-ah-thim-e'as-is (*ana, thuma*, fumigation). Uncertain and transient swelling or inflation, observed at times in nervous and hysterical persons; exhalation; fumigation; hypochondriasis; phantom tumor; vapor-bath.

Anathymionusi, an-ah-thim-e-o-nu'si (*anathumia*, vapor, *nousos*, discase). Disorders of perspiratory apparatus.

Anatole, an-at'o-le (*anatole*, coming forth). Growth; lunula of the nail.

Anatome, a-nat'o-ma (*ana, tome*, cutting). Anatomy. **A. anima'ta**, physiology

Anatomia, an-ah-tom'e-ah. Anatomy. **A. anima'lis**, zootomy. **A. chirur'gica**, surgical anatomy. **A. compara'ta** or **comparati'va**, comparative anatomy; zootomy. **A. jurid'ica**, forensic anatomy. **A. picto'rum**, artistic anatomy. **A. sculpto'rum**, artistic anatomy. **A. vi'va**, physiology.

Anatomical, an-a-tom'ik-al. Relating or appertaining to anatomy; structural.

Anatomism, an-at'o-mism. Study of arrangement of parts, to explain phenomena of the organism.

Anatomist, an-at'o-mist. One who occupies himself with anatomy or dissection; one versed in anatomy. **A.'s snuff-box**, depression at root of thumb between extensor tendons.

Anatomography, an-at-o-mog'ra-fe (*anatomy, grapho*, to write). Treatise on anatomy.

Anatomy, an-at'o-me (*ana, tome*, incision). Dissection; study and knowledge of all the apparent properties of organized bodies. It is the science of organization, and includes, according to some, every mechanical decomposition, even of inorganic bodies; thus, crystallography is anatomy of crystallized minerals. Anatomy has also been called morphology, somatology, somatotomy, organology, etc. It assumes different names, according as the study is confined to one organized being or to a species or class of beings. Thus, *androtomy* or *anthropotomy* or *anthropography* or *anthroposomatology* is anatomy of man; *zoötomy*, that of other species of the animal kingdom; *veterinary anatomy*, anatomy of domestic animals; but when the word is used abstractly, it means *human anatomy*, particularly study of organs in healthy state. Anatomy of fœtal development has been called *anatomy of the fœtus* or *of evolution*. *Physiological anatomy* investigates structure with special view to function.

The anatomy of the diseased human body is *pathological* or *morbid anatomy*; when applied to medical jurisprudence, *forensic anatomy*. Several organs possessing similarity of structure and formed of same tissues have been grouped into systems or genera of organs; study of such systems is *general anatomy, histology*, or *morphotomy*, whilst study of each organ in particular is *descriptive* or *special anatomy—anthropomorphology*. Histology is, however, more frequently applied to *anatomy of the tissues*, called also *textural* and *microscopic anatomy, micranotomia*. See *Histology*. Descriptive anatomy has been divided into *skeletology*, comprising *osteology* and *syndesmology*; and *sarcology*, subdivided into *myology, neurology, angiology, adenology, splanchnology*, and *dermology*.

Surgical anatomy, medico-chirurgical anatomy, topographical anatomy, regional anatomy, is the particular and relative study of bones, muscles, nerves, vessels, etc., with which it is indispensable to be acquainted before performing operations.

Comparative or *analogical anatomy* is the comparative study of each organ in different animals or in different classes of animals. *Homological anatomy* examines the relations to each other of different parts of the same individual. *Transcendental* or *philosophical anatomy* inquires into the mode, plan, or model upon which the animal frame or organs are formed. *Artificial anatomy* is the art of modelling and representing, in wax or other substance, different organs or dif-

ferent parts of the human body in sound or diseased state. *Artistic* or *plastic anatomy* is the study of anatomy from an artistic point of view. *Phytotomy* or *phytanatomy* is anatomy of vegetables. *Pictorial anatomy* is anatomy artistically illustrated. *Clastic anatomy* (*klao*, to break) is the formation of models in such sort that they can be broken or separated in pieces.

Anat'omy. See *Skeleton.* **A., analog'ical,** see *Anatomy.* **A., artifi'cial,** see *Anatomy.* **A., artis'tic,** see *Anatomy.* **A., clas'tic,** see *Anatomy.* **A., compar'ative,** see *Anatomy, Zoötomy.* **A., descrip'tive,** see *Anatomy.* **A., foren'sic,** see *Anatomy.* **A., gen'eral,** see *Anatomy.* **A., homolog'ical,** see *Anatomy.* **A., hu'man,** see *Anatomy.* **A. of man,** see *Anatomy.* **A., me'dico-chirur'gical,** see *Anatomy.* **A., microscop'ic** or **minute,** see *Anatomy.* **A., mor'bid,** see *Anatomy.* **A., patholog'ical,** see *Anatomy.* **A., p., microscop'ic,** see *Histology.* **A., philosoph'ical,** see *Anatomy.* **A., physiolog'ical,** see *Anatomy.* **A., picto'rial,** see *Anatomy.* **A., plas'tic,** see *Anatomy.* **A., prac'tical,** see *Dissection.* **A., re'gional,** see *Anatomy.* **A., spec'ial,** see *Anatomy.* **A., sur'gical,** see *Anatomy.* **A., tex'tural,** see *Anatomy.* **A., topograph'ical,** see *Anatomy.* **A., transcenden'tal,** see *Anatomy.* **A., vet'erinary,** see *Anatomy.*

Anatresia, an-at-ra'ze-ah (*ana, treo,* to bore). Having open calibre; opposite to atresia, as of the vagina.

Anatresis, an-at-ra'sis (*ana, treo,* to bore). Perforation, trepanning.

Anatribe, an-at're-ba (*ana, tribo,* to rub). Friction.

Anatripsology, an-a-trip-sol'o-je (*anatripsis,* friction, *logos,* discourse). Treatise on, or description of, friction.

Anatriptic, an-a-trip'tik. Remedy used by inunction.

Anatriptologia, an-ah-trip-to-loj'e-ah. Anatripsology.

Anatrope, an-ah'tro-pa (*ana, trepo,* to turn). Subversion; inverted action of stomach, characterized by nausea, vomiting, etc.

Anaudia, an-awd'e-ah (*an, aude,* speech). Dumbness; catalepsy.

Anaxyris, an-aks'ir-is. Rumex acetosa.

Anazesis, an-az'a-sis (*ana, zeo,* to boil). Ebullition.

Anazotic, an-a-zo'tik (*an, azote,* nitrogen). Devoid or deprived of nitrogen.

Anazoturia, an-ah-zo-tu're-ah (*an, azotum, ouron,* urine). Deficiency of urea in urine.

Anberry, an'ber-re. Warts with a pedicle, seen on horses.

Anchieta salutaris, an-ke-a'tah sal-u-tar'is. Vegetable mercury, nat. ord. Violaceæ. Climbing plant from Brazil, emetic and cathartic; alterative in syphilis.

Anchilops, an'kil-ops (*anchi,* near, *ops,* eye). Inflammation of lacrymal sac. See *Ægilops.*

Anchone, an'ko-na (*ancho,* to strangle). Globus hystericus.

Anchonidroa, an-kon-id'ro-ah. Miliaria anginosa.

Anchorage, an'kor-age. Fixation of a part or organ, as uterus, floating kidney, etc.

Anchoralis processus, an-ko-rah'lis pro-ces'sus (*anchora,* an anchor). Coracoid process.

Anchusa angustifolia, an-ku'sah an-gus-te-fo'le-ah. A. officinalis. **A. incarna'ta,** A. officinalis. **A. lycopsoïdes,** A. officinalis. **A. officina'lis,** officinal or garden alkanet or bugloss. *Buglossa.* **A. tincto'ria,** *Dyer's bugloss, Dyer's alkanet, Orchanet,* European plant, used to give red color to ointments.

Anchusic acid, an-ku'sic as'id. Alkanin.

Anchusin, ank'u-sin. Alkanin.

Anchyloglossia, ank-il-o-glos'se-ah (*ankule,* stiffness, *glossa,* tongue). Tongue-tie.

Anchylomerisma, an-kil-o-mer-is'mah (*ankule,* stiffness, *merisma,* part). Firm attachment of two parts.

Anchylops, ank'il-ops. Ægilops; form of inflammation of lacrymal sac.

Anchylo'sis. Ankylosis.

Anchylostomiasis, an-kil-o-sto-me'as-is (*ankule,* stiffness, *stoma,* mouth). Form of anæmia produced by parasite drawing blood from the duodenal walls.

Anchylostomum duodenale, an-kil-os'to-mum du-o-den-al'a. Ankylostomum duodenale.

Ancistron, an-cis'tron. Hook; hamulus.

Ancle, an'kl (*ankulos,* crooked). Astragalus, malleolus; ankle.

Ancler (ank'lur), **Anc'let.** Malleolus.

Ancon, an'kon. Elbow, olecranon process.

Anconad, an'ko-nad. See *Anconal aspect.*

Anconæus, an-ko-ne'us. Anconeus.

Anconagra, an-kon'ag-rah (*ancon, agra,* a seizure). Pain in the elbow; gout of the elbow.

Anconal, an-ko'nal. Relating or appertaining to elbow or olecranon. **A. as'pect,** aspect toward side on which ancon or elbow is situated. *Anconad* is used, adverbially, to signify toward the anconal aspect.

Anconeal, an-ko-ne'al. Anconal.

Anconeus, an-ko-ne'us. Term once applied to every muscle attached to olecranon, and called great external, internal, and small anconei muscles. The first three are portions of the same muscle, *triceps brachialis;* the last has alone retained the name. It is the *Anconeus minor, Anconeus* or *Cubitalis Riolani, Epicondylo-cubitalis, Brevis cubiti,* of different authors, and is situate at the upper and back part of the forearm. It arises from the external condyle of the os humeri, and is inserted into the posterior edge of the upper third of the ulna. It aids in extension of the forearm. **A. bre'vis,** inner head of triceps; outer head, according to others. **A. epitrochlea'ris,** muscle passing from internal condyle of humerus to olecranon. **A. exter'nus,** see *Triceps extensor cubiti.* **A. inter'nus,** see *Triceps extensor cubiti.* **A. lon'gus,** long head of triceps extensor cubiti. **A. mag'nus,** outer head of triceps. **A. ma'jor,** see *Triceps extensor cubiti.* **A. min'imus,** A. epitrochlearis. **A. mi'nor,** anconeus. **A. par'vus,** anconeus. **A. profun'dus,** inner head of triceps. **A. quar'tus,** anconeus. **A. quin'tus,** fascia between tendon of long head of triceps and latissimus dorsi muscles. **A. sex'tus,** A. epitrochlearis. **A. ter'tius,** A. epitrochlearis.

Anconocace, an-ko-nok'as-e. Pain or gout in the elbow.

Anconoid, an'ko-noid (*ankon,* elbow, *eidos,* shape). Shaped like an elbow.

Ancos, an'kos. Elbow; hook.

Ancteres, ank-ta'res (*ankter,* clasp). Fibulæ or clasps by which lips of wounds were formerly kept together.

Ancteriasmus, ank-ta-re-as'mus. Infibulation; use of ancteres.

Ancubitus, an-ku'bit-us. Affection of the eye, in which there is a sensation as if sand was in it.

Ancunulenta, an-ku-nu-len'tah. Menstruating woman.

Ancus, an'kus (*ankon,* elbow). One who cannot extend his arms completely. Deformity from luxation of humerus or forearm.

Ancylo, an'ki-lo (*ankule,* curve). In composition, curved condition; growing together.

(For words beginning with *Ancylo* see synonymous words under *Ankylo.*)

Ancyra, an'sir-ah. Hook.

Ancyroid cavity, an'sir-oid kav'it-e (*ancyra, eidos,* shape). Digital cavity. **A. pro'cess,** coracoid.

An'da As'su. Laxative expressed oil from seed of a Chilian plant. **A. Gome'sii,** native tree of Brazil, ord. Euphorbiaceæ. Cathartic oil, oil of anda, is obtained from seeds by pressure. Fruit is oval nut, containing two seeds having taste of chestnut, but cathartic and emetic. Shell is astringent in diarrhœa, etc.

Ande. Breath.

Ander'joa powder. Powdered bark of Wrightia antidysenterica.

Andersch, ganglion of, an'dursch, gan'gle-on. Petrous ganglion.

Andira anthelmintica, an-de'rah an-thel-mint'ik-ah. Brazilian tree, ord. Leguminosæ, seeds of which are anthelmintic. **A. araro'ba,** Goa powder is obtained from this Brazilian tree. **A. excel'sa,** bark, wood, and fruit are all employed; the bark in intermittent

fever. **A. ibai**, Geoffræa verimifuga. **A. iner'mis**, cabbage tree of West Indies; Geoffræa inermis. **A. racemo'sa**, Geoffræa inermis. **A. retu'sa**, Surinam cabbage tree; anthelmintic. **A. Surinamen'sis**, Geoffræa Surinamensis.

Andi'rin. Bitter extractive from Andira anthelmintica.

Andiro'ba, an-de-ro'bah. Carapa Guianensis.

Andol-andol. Large Chinese fly; tincture used in China and Java as a powerful vesicant.

Andrachne, an-drak'na. Arbutus unedo, portulaca.

Andrædœa, an-dre-de'ah (*aner*, man, *ædœa*, genital organs). Male genital organs.

Andrædœoblennorrhœa, an-dre-de-o-blen-or-rhe'-ah. Blennorrhœa or mucous discharge from the male genitals.

Andralogomelia, an-dral-o-go-ma'le-ah (*aner*, man, *alogos*, brute, *melos*, limb). Monstrosity combining body of a man with limbs of a brute.

Andranatomy (an-dran-at'o-me) or **Andratome**, an-drat'o-me (*andro*, *tome*, cutting). Anthropotomy; anatomy or dissection of the human body.

Andreia (an-dri'ah) or **Andria**, an-dre'ah. Adult age; manhood. **A. mu'lier**, female hermaphrodite.

An'dro (*aner*, man). In composition, man.

Androarium, an-dro-ar'e-um (*andro*, *oarion*, seed-vessel). Testicle.

Androgalactozemia, an-dro-gal-ak-to-za'mia (*andro*, *gala*, milk, *zemia*, loss). Secretion or discharge of milk in the male.

Androgenei'a or **Androgenia**, an-dro-jen-e'ah (*andro*, *genesis*, generation). Procreation of males.

Andrographides (an-dro-graf'id-ees) **herb.** Andrographis.

Andrographis paniculata, an-drog'raf-is pan-ik-u-lat'ah. Kariyal andrographides; Indian root, stalk and root of which are tonic and stomachic, especially in dyspepsia with constipation.

Androgyna, an-droj'in-ah (*andro*, *gune*, woman). Female hermaphrodite.

Androgynal, an-droj'in-al. Hermaphroditic.

Androgynia (an-dro-jin'e-ah) or **Androgynism**, an-droj'in-ism. Hermaphrodism.

Androgynoarion, an-dro-jin-o-ar'e-on (*andro*, *gune*, woman, *oarion*, small egg). Embryonic sexual organs before sex is determined.

Androgynus, an-droj'in-us (*andro*, *gune*, woman). Male hermaphrodite; effeminate person.

Androlepsia, an-dro-lep'se-ah (*andro*, *lambano*, to lay hold of). Conception in woman.

Androma, an-dro'ma. Form of elephantiasis of scrotum, endemic in Southern Asia.

Andromania, an-dro-man'e-ah. Nymphomania.

Andromeda arborea, an-drom'ed-ah ar-bo're-ah. *Sorrel tree, Sour tree, Sour wood, Elk tree, Elk wood, Sorrel wood, Sour leaf.* Small indigenous tree, ord. Ericaceæ, found as far as southern limits of Georgia and Alabama; seldom north of Virginia. Sour leaves are refrigerant and astringent, and make a kind of lemonade, given in fevers. **A. Japon'ica**, native of China and Japan, of toxicological interest only; contains a poisonous glucoside, asebotoxin. **A. maria'na**, *Broad-leaved moorwort, Kill-lamb, Lamb-killer, Stagger-bush.* Decoction of this indigenous plant has been employed as a wash in affection of negroes of Southern United States, called toe itch or ground itch. **A. nit'ida**, *Sour wood, Sorrel tree*, indigenous; properties like those of A. arborea. **A. polyfo'lia**, wild rosemary of America, Europe, and Asia; leaves are acro-narcotic.

Andromedotox'in. White crystallized poison from andromeda; has inhibitory action on centres of respiration.

Androphobia, an-dro-fo'be-ah (*andro*, *phobos*, fear). Insane fear of men.

Androphonici (an-dro-fon'is-e) **morbi** (*andro*, *phonos*, murder). Homicidal lesions.

Androphonomania, an-dro-fo-no-man'e-ah (*andro*, *phonos*, murder, *mania*). Homicidal insanity.

Andropogon bicornis, an-dro-po'gon be-corn'is (*andro*, *pogon*, beard). Junctus odoratus. **A. cal'amus aromat'icus**, see *Oleum graminis indici*. **A. citra'tus**, Junctus odoratus. **A. citriodo'rus**, Junctus odoratus, Nardus Indica. **A. Marti'ni**, ginger-grass, Indian species, yielding rubefacient volatile oil. **A. murica'tus**, root of this plant, from Bombay, is aromatic and bitterish; used as perfume and to drive away insects; also excitant and diaphoretic. **A. nar'dus**, Calamus Alexandrinus, Nardus Indica. **A. pachno'des**, variety of A. Schœnanthus, Indian plant, both yielding oil of ginger-grass. **A. Schœnan'thus**, Junctus odoratus. **A. squarro'sus**, A. muricatus.

Androsace, an-dros'as-a (*andro*, *sakos*, buckler, from appearance of leaf). Umbilicus marinus. **A. Matthi'oli**, Umbilicus marinus.

Androsæmum, an-dro-se'mum (*andro*, *haima*, blood). European undershrub, whose leaves were esteemed as vulnerary.

Androsymphysia (an-dro-sim-fiz'e-ah) or **Androsymphysis**, an-dro-sim'fis-is. Monstrosity from fusion of male fœtuses or male genital apparatus.

Androtomy, an-drot'o-me. Andranotomy.

Andrum, an'drum. Androma.

Anebium, an-a'be-um. Anchusa tinctoria.

Anebus, an-a'bus (*an*, *hebe*, puberty). One who has not reached puberty.

Anecrisis, an-ek'ris-is (*an*, *ekkrisis*, secretion). Absence or suppression of secretion.

Anectasia (an-ek-tah'ze-ah) or **Anectasis**, an-ek'tas-is (*an*, *ektasis*, distension). Diminution in size of any part or organ.

Anecypetus, an-a-sip-a'tus (*an*, *pueo*, to promote suppuration). Not suppurating; without tendency to suppuration.

Anegertica, an-a-jur'tik-ah (*ana*, *egeiro*, to awaken). Art of resuscitating the apparently dead.

Aneilema (an-i-la'mah) or **Aneilesis**, an-i-la'sis (*ana*, *eileo*, to roll up). Motion of air in intestines, and tormina accompanying it; colic, flatulence.

Anelectric, an-e-lek'trik. Not electrifiable; parting easily with electricity; opposite of dielectric.

Anelec'trode. Positive pole of galvanic battery.

Anelectroton'ic. Relating to anelectrotonus.

Anelectrotonus, an-e-lek-trot'o-nus. Lessened excitability of nerve at positive pole when traversed by constant current of electricity.

Anel's operation, an-els' op-e-ra'shun. Operation of ligation of aneurism on proximal side of aneurismal sac. **A. probe** or **sound**, probe for insertion into lacrymal puncta. **A. syr'inge**, delicate syringe for injection of fluids.

Anemia, an-e'me-ah (*anemos*, wind). Anæmia; flatulence.

Anemic, an-e'mik. Anæmic.

Anemometer, an-e-mom'e-tur (*anemos*, wind, *metron*, measure). Instrument for measurement of direction and velocity of currents of atmospheric air.

Anemometry, an-e-mom'et-re (*anemos*, wind, *metron*, measure). Science of measuring force and velocity of air with an instrument called an anemometer.

Anemone, an-em-o'na (*anemos*, wind). Wind-flower. **A. cer'nua** has similar properties to A. pulsatilla. **A. colli'na**, A. pulsatilla. **A. corona'ria**, European plant; root is purgative, and applied in diseases of the eye; herb in ulcers and skin diseases. **A. Grönlan'dica**, coptis. **A. hepat'ica**, Hepatica triloba. **A. interme'dia**, A. pulsatilla. **A. Ludovicia'na**, A. patens. **A. nemoro'sa**, wood anemony. Herb and flowers are poisonous, acrid, corrosive, and rubefacient. **A. pa'tens**, indigenous; possesses similar properties. **A. praten'sis**, meadow anemony; this European plant has similar properties. **A. pulsatil'la**, pasque flower, possesses like properties. **A. ru'bra**, A. pratensis. **A., rue-leaved**, Thalictum anemonoides. **A. sylves'tris**, A. pratensis.

Anemonin, an-em'o-nin. Principle from Anemone pulsatilla, resembling aconitin, $C_{15}H_{12}O_6$; used in asthma, bronchitis, etc.

Anemonol, an-em'o-nol. Oil of anemone, powerful volatile oil from various anemones, causing vesication of the skin.

Anemony, an-em'o-ne. Anemone hepatica. **A.,**

meadow, Anemone pratensis. **A., wood**, Anemone nemorosa.

Anemopathy, an-em-op'a-the (*anemos*, air, *pathos*, disease). Treatment of disease by inhalation.

Anemopsis (an-em-op'sis) **Califor'nica.** Yerba mansa. Leaves of this herb of Western United States and Mexico are stimulant and astringent, and applied externally to venereal sores.

Anencephalæmia (an-en-sef-al-e'me-ah) or **Anencephalohæmia**, an-en-sef-al-o-he'me-ah (*an*, *enkephalos*, encephalon, *haima*, blood). Deficiency of blood in the brain. Syncope.

Anencephalia, an-en-sef-al'e-ah. See *Anencephalus*.

Anencephalic, an-en-sef-al'ik. Anencephalous.

Anencephalism, an-en-sef'al-izm. See *Anencephalus*.

Anencephaloneuria (an-en-sef-al-o-nu're-ah) or **Anencephaloner'via** (*an*, *enkephalos*, encephalon, and *neuron*, nerve). Defective nervous action in the encephalon.

Anencephalotrophy, an-en-sef-al-ot'ro-fe (*an*, *enkephalos*, encephalon, *trophe*, nourishment). Atrophy of the brain.

Anencephalous, an-en-sef'al-us (*an*, *enkephalos*, brain). Devoid of brain; monstrosity in which there is entire absence of brain. Condition has been called *anencephalia* or *anencephalism*. One that has part only of the brain, *paracephalus*. Weak, silly person.

Anenergasia (an-en-ur-gaz'e-ah) or **Anenergia**, an-en-er-je'ah (*an*, *ergon*, work). Debility.

Anenius, an-en'e-us (without pain). Painlessness.

Anen'tera (*an*, *enteron*, intestine). Infusoria devoid of intestines.

Anenteræmia, an-en-ter-e'me-ah (*an*, *enteron*, intestine, *haima*, blood). Anæmia of the intestines.

Anenterata, an-en-ter-at'ah (*an*, *enteron*, intestine). Without intestines; see *Anenterelmintha*.

Anen'terate. Without intestines, as A. worms, *Anenterata*.

Anenterelmintha, an-en-ter-el-min'thah (*an*, *enteron*, intestine, and *helmins*, worm). Worms unprovided with intestinal canal.

Anenteronervia (an-en-ter-o-nur've-ah) or **Anenteroneuria**, an-en-ter-o-nu're-ah (*an*, *enteron*, *neuron*, nerve). Atony of the intestines. **A. saturnina** is due to lead-poisoning.

Anenterotrophy, an-en-ter-ot'ro-fe (*an*, *enteron*, and *trophe*, nourishment). Defective nutrition of the intestines.

Anenterous, an-en'ter-us. Possessing no intestinal canal; anenterate.

Anepia, an-ep'e-ah (*anepes*, without speech). Defect or loss of speech.

Anepicritus, an-ep-ik'ri-tus (*an*, *epikrisis*, judgment). Of deficient mental power.

Anepiploic, an-e-pip-lo'ik (*a*, priv., *epiploon*, omentum). Devoid of omentum.

Anepischesis, an-ep-is'ke-sis (*an*, *epischesis*, retention). Incontinence of urine.

Anepithymia, an-ep-e-thim'e-ah (*an*, *epithumia*, desire). Loss of appetite, as hunger, thirst, venery, etc. **A. chloro'sis**, chlorosis.

Aner, an'ur. Man.

Anerethisia, an-er-a-thiz'e-ah (*an*, *erethizo*, to irritate). Defect of irritability, as of muscle or nerve.

Anergia, an-er'je-ah. Want of energy.

Anerobia, an-er-o'be-ah. Anaërobia.

Anerobic, an-er-o'bik. Anaërobic.

Aneroid, an'er-oid (*a*, *neros*, moist). Free from moisture. See *Barometer*.

Anerotomy, an-er-ot'o-me. Anarotomy.

Anervia, ah-nur've-ah. Paralysis; defect of nervous power.

Anerythroblepsia, an-er-ith-ro-blep'she-ah (*an*, *eruthros*, red, *blepo*, to see). Color-blindness as to red.

Anerythropsia (an-er-ith-rop'se-ah) or **Anerythroblepsia**, an-er-ith-ro-blep'se-ah (*an*, *eruthros*, red, *opsis*, vision). Defective vision, consisting in incapability of distinguishing red; also achromatopsia or color-blindness.

Anesia (an-a'ze-ah) or **Anesis**, an-e'sis (*aniemi*, to relax). Remission, as of fevers.

Anesthesia (an-es-tha'ze-ah) or **Anesthesis**, an-es-tha'sis. Anæsthesia.

Anesthetic, an-es-thet'ik. Anæsthetic.

Anesum, an-a'sum. Pimpinella anisum.

Anethi fructus, an-a'the fruk'tus. See *Anethum graveolens*.

Anethol, an-e'thol. $C_{10}H_{12}O$. Principal component of oils of fennel and anise.

Anethum, an-a'thum (*ana*, *theo*, to run, from its quick growth). *Fennel* or *Finckle*, *Anet*, *Sweet fennel*. Ord. Umbelliferæ. The fruit, fœniculum, has aromatic odor and warm, sweetish taste; it is carminative. Oil—oleum fœniculi, oil of fennel—is officinal; root is pectoral and diuretic. **A. fœnic'ulum**, anethum. **A. grave'olens**, dill, native of south of Europe; seeds, anethi fructus, are stimulant and carminative. Distilled water, aqua anethi, dill-water, and oil, oleum anethi, oil of dill, are officinal in other pharmacopœias. **A. pastina'ca**, Pastinaca sativa. **A. piperi'tum**, anethum. **A. seg'etum**, anethum.

Anetic, an-et'ik. Anodyne, remitting.

Aneton, an-a'ton. Anethum.

Anetus, an-a'tus. Intermittent fever. **A. quarta'nus**, quartan. **A. quotidia'nus**, quotidian. **A. tertia'nus**, tertian fever.

Aneuralgicon, ah-nu-ral'jik-on (*a*, *neuron*, nerve, *algos*, pain). Instrument to allay pain in the nerves; fumigating apparatus, in which dried narcotic and other herbs are burnt, heated vapor being directed to the affected part.

Aneuria, ah-nu're-ah (*a*, *neuron*, nerve). Paralysis; defect of nervous power.

Aneurism, an'u-rizm (*ana*, *euruno*, to dilate). Tumor produced by rupture or dilatation of the coats of an artery; the term has been extended to lesions of arteries and also to dilatation of the heart. There are various kinds of aneurism; the following are the chief:

I. When the blood which forms the tumor is enclosed within the dilated coats of the artery. This is the *True aneurism*, *Aneurysma verum*, *Hernia arteriarum*.

II. When the blood has escaped from the opened artery, it is called *Spurious* or *false aneurism*, *aneurisma spurium*, *Ruptura arteriæ*, *Arteriorrhexis*, *Arteriodialysis*, *Ecchymoma arteriosum*. The latter is divided into three varieties:—1. *Diffused false aneurism*, which occurs immediately after division or rupture of an artery, and consists of extravasation of blood into the areolar texture. 2. *Circumscribed false aneurism*, in which the blood issues from the vessel some time after receipt of the wound, and forms itself a sac in the neighboring areolar tissue. 3. *Aneurism by anastomosis*, *Varicose*, *Racemose*, or *Cirsoid aneurism*, *Arteriovenous aneurism*, *Phlebarteriodialysis*, *Aneurysma venoso-arteriosum*, *A. varicosum racemosum* or *cirsoides*, *Angioma arteriale racemosum*, which may arise from simultaneous wounding of an artery and vein, the arterial blood passing into the vein and producing a varicose state of it, or by increase of arterial tissue and dilatation and elongation of arteries. The term *cirsoid* is employed when a number of vessels are dilated and elongated, usually from paralysis of the vaso-motor nerves from injury; and *aneurism by anastomosis* when the smaller vessels and capillaries are affected.

III. *Mixed aneurism* is that arising from dilatation of one or two of the coats, with division or rupture of the other. Some authors have made two varieties of this:—1. *Mixed external aneurism*, where the internal and middle coats are ruptured and the areolar is dilated. 2. *Mixed internal aneurism*, in which the internal coat is dilated and protrudes, like a hernial sac, through the ruptured middle and outer coats. This variety has been called *Aneurysma herniam arteriæ sistens*.

A *Sacciform* or *sacculated aneurism*, *aneurysma sacculatum*, consists of a distinct sac or bag, having a comparatively narrow channel of communication with the artery. A *Fusiform*, *cylindroid*, *tubular*, or *tubulated aneurism*, *aneurysma fusiforme*, is one formed by dila-

tation of all the coats of the vessel and elongation of the affected part of the artery.

Aneurisms have been termed *traumatic, aneurysma ex vulnere*, or *exogenous* and *spontaneous*, according as they may have been caused by a wound, or have originated spontaneously. The latter, when originating from lesions of the inner coats of arteries, have been termed *endogenous*. They also receive the name of the vessel implicated, as *carotid aneurism, aortic aneurism*, etc.

Aneurisms have also been divided into *internal* and *external*. The internal aneurisms are situate in the great splanchnic cavities, and occur in the heart and great vessels of the chest, abdomen, etc. Their diagnosis is difficult, and they are often inaccessible to surgical treatment. External aneurisms are situate at the exterior of the head, neck, and limbs, and are distinctly pulsatory.

Aneurisms may be caused by earthy and atheromatous or other degenerations of the artery, embolism, syphilis, overaction of the heart, external injury, wounds, fractures, and dislocations, etc., predisposition being established by age, sex, occupation, etc. Sometimes a number of arteries are affected, constituting an *aneurismal diathesis*.

Aneurisms are generally of slow growth and chronic existence, being governed in this by the duration of the exciting cause, the force of the circulation, condition of the aneurismal sac, etc.

Aneurisms, especially the internal, may be combated by rest and debilitant treatment, on the plan of Valsalva, consisting in repeated bloodletting, with food enough merely to support life. The local treatment of aneurism consists in use of digital or mechanical compression, ligation of the artery, manipulation, injection of the sac, etc.

An'eurism by anastomo'sis. See *Aneurism.* **A., arte'rio-ve'nous,** see *Aneurism.* **A., ax'illary,** aneurism of the axillary artery. **A., brach'ial,** aneurism of the brachial artery. **A. of bone,** osteo-aneurism. **A., Brasdor's operation for,** see *Brasdor.* **A., carot'id,** aneurism of carotid artery. **A., cir'cumscribed,** see *Aneurism.* **A., cir'soid,** see *Aneurism.* **A., cylin'droid,** see *Aneurism.* **A., cys'tic,** sacculated form of aneurism. **A., cystogen'ic,** A. from bursting of cyst into artery. **A., diffused,** see *Aneurism.* **A., dissect'ing,** *Aneurysma dissecans*, is one in which, owing to rupture of the inner and middle coats of an artery, the blood makes itself a channel between these coats and the outer coat. In many cases the lesion appears to consist in separation of the laminæ of the middle coat, between which the blood forms itself a channel. It occurs in old persous, particularly in women. **A., embol'ic,** A. of small artery from presence of foreign body. **A., encys'ted,** circumscribed a. **A., endo'genous,** see *Aneurism* and *Endogenous.* **A. by ero'sion,** aneurismal varix. **A., exo'genous,** see *Aneurism* and *Exogenous.* **A., exter'nal,** see *Aneurism.* **A., false,** see *Aneurism.* **A., false, cir'cumscribed,** see *Aneurism.* **A., false, diffused,** see *Aneurism.* **A., fem'oral,** aneurism of the femoral artery. **A., fu'siform,** see *Aneurism.* **A. of the heart,** *Cardionchus, Cardieurysma, Cardianeurysma*, has been divided into active and passive. The active forms are scarcely aneurisms, as they commonly consist of increased thickness of the parietes of the heart, diminishing its cavity instead of increasing it. The term *hypertrophy of the heart* better indicates their character. *Passive aneurism, Cardiectasis*, on the contrary, is attended with extenuation of the parietes of the organ and enlargement of the cavities. The impulse is feebler than usual. Both sounds are widely transmitted over the thorax, and are not much fainter at a distance from their point of origin. *Partial* or *true aneurism of the heart, Cardiectasis partialis, Aneurysma consecutivum cordis*, is sometimes, but rarely, seen. The name *aneurism of the valves of the heart* has been given to pouch-like projections of the valves into the auricles. **A., her'nial,** form of aneurism in which inner coat of artery protrudes through ruptured outer coat. **A., il'iac,** aneurism of the iliac artery. **A., inter'nal,** see *Aneurism.* **A., intracra'nial,** aneurism of the basilar, anterior cerebral, internal carotid, and other arteries within the cranium. **A., mil'iary,** pathogenic lesion observed in old persons who are victims of cerebral hemorrhage, consisting of alteration of the arterial system in the brain, with production of aneurisms in the smaller arteries; hemorrhage resulting from rupture of these aneurisms. **A., mixed,** see *Aneurism.* **A. needle,** flat needle or probe having eyelet for ligation of artery in aneurism. **A., Park's,** arterio-venous a., arterial blood being diffused into two neighboring veins. **A., poplite'al,** aneurism of the popliteal artery. **A., Pott's,** aneurismal varix. **A., ra'cemose,** see *Aneurism.* **A., sac'ciform** or **sac'culated,** see *Aneurism.* **A., sponta'neous,** see *Aneurism.* **A., spu'rious,** see *Aneurism.* **A., subcla'vian,** aneurism of the subclavian artery. **A., traumat'ic,** see *Aneurism.* **A., true,** see *Aneurism.* **A., tu'bular** or **tu'bulated,** see *Aneurism.* **A., Valsal'va's treatment of,** see *Aneurism.* **A., val'vular,** A. affecting valves of the heart. **A., var'icose,** see *Aneurism.*

Aneurisma, an-u-riz'mah. Aneurism.

Aneurismal, Aneurysmal (an-u-riz'mal), or **Aneurismat'ic.** That which belongs to aneurism. **A. can'cer,** teleangiectatic cancer. **A. sac** or **cyst,** sort of pouch formed by dilatation of the coats of an artery, in which the blood forming the aneurismal tumor is contained. **A. tu'mor,** aneurism. **A. va'rix,** arterio-venous aneurism, without intervening sac.

Aneurismatic, an-u-riz-mat'ik. Aneurismal.

Aneurysm, an'u-rizm. Aneurism.

Aneurysma, an-u-riz'mah. Aneurism. **A. ex anastomo'si** or **anastomot'icum,** aneurism by anastomosis. **A. cirsoï'des,** aneurism by anastomosis. **A. cor'dis actí'vum,** heart, hypertrophy of the. **A. cylin'dricum,** cylindroid aneurism. **A. dis'secans,** aneurism, dissecting. **A. fusifor'me,** see *Aneurism.* **A. her'niam arte'riæ sis'tens,** see *Aneurism.* **A. osteoï'des,** osteo-aneurism. **A. racemo'sum,** see *Aneurism.* **A. saccula'tum,** see *Aneurism.* **A. spongio'sum,** angioma. **A. spu'rium,** see *Aneurism.* **A. varico'sum** or **veno'so-arterio'sum,** see *Aneurism.* **A. ve'rum,** see *Aneurism.* **A. ex vul'nere,** see *Aneurism.*

Aneurysmal (an-u-riz'mal) or **Aneurysmatic,** an-u-riz-mat'ik. Relating to aneurism.

Aneurysmus, an-u-riz'mus. Aneurism; dilatation.

Aneuthanasia, an-u-than-aze'e-ah (*an, euthanasia*, easy death). Painful death.

Anevria, ah-nev're-ah (*a, neuron*, nerve). Aneuria.

Anfractuosity, an-frak-tu-os'it-e (*an*, around, *frango*, to break). Groove or furrow; sinuous depression or sulcus, of greater or less depth, like those separating convolutions of brain from each other. **A., cer'ebral,** these are narrow, and deeper at upper surface of brain than at base, and are lined by prolongation of pia mater. Ethmoidal cells are sometimes called ethmoidal anfractuosities.

Anfractuous, an-frak'tu-us. Sinuous, tortuous.

Anfractus, an-frak'tus. Anfractuosity. **A. cer'ebri,** see *Anfractuosity, cerebral.*

Angat'ra. Disease of Madagascar, with zonular pain of head and abdomen, terminating in wasting.

Angectasia, an-gek-taz'e-ah. Angiectasis.

Angeia, an-gi'ah. Vessels. **A. pneumat'ica,** see *Artery.*

Angeiæmia, an-gi-e'me-ah (*angeion, haima*, blood). Plethora.

Angeiaëraphrosia, an-gi-ah-er-af-ro'ze-ah (*angeion, aër*, air, *aphros*, froth). Asphyxia by frothy mucus in bronchial tubes, as in capillary bronchitis.

Angeial, an-ji'al. Vascular.

Angeid, an'je-id. Vascular.

Angeidiectasia, an-gi-de-ek-taz'e-ah (*angeion, ektasis*, dilatation). Dilatation of capillaries.

Angeiectasia (an-gi-ek-taz'e-ah), **Angeiectasis** (an-gi-ek'taz-is), or **Angeiectoma,** an-gi-ek-to'mah. Dilatation of vessels. **A. capilla'ris,** vascular nævus.

Angeiectopia, an-gi-ek-to'pe-ah (*angeion, ektopos,*

out of place). Displacement or unnatural location of blood-vessel.

Angeielcosis, an-gi-el-ko'sis (*angeion, helkos*, ulcer). Ulceration of a blood-vessel.

Angeiemphraxis, an-gi-em-fraks'is (*angeion, emphraxis*, obstruction). Obstruction of vessels.

Angeienchyma, an-gi-en'kim-ah (*angeion, enchuma*, effusion). Vascular tissue.

Angeieurysma, an-gi-u-riz'mah (*angeion, eurusma*, dilatation). Angeiectasia.

Angeiitis, an-ji-i'tis. Inflammation of a blood-vessel.

Angeioasthenia, an-gi-o-as-then-e'ah. Weakness of blood-vessels.

Angeiocarditis, an-gi-o-kar-de'tis. Angiocarditis.

Angeiocaverno'sus. Vascular nævoid nodular tumor of the subcutaneous cellular tissue.

Angeiochalasis, an-gi-o-kal'as-is (*angeion, chalasis*, relaxation). Dilatation of vessels.

Angeiocholitis, an-gi-o-kol-e'tis (*angeion, chole*, bile). Inflammation of bile-ducts.

Angeiocinesis, an-gi-o-sin-a'sis (*angeion, kinesis*, motion). Motion excited in blood-vessels.

Angeiodiastasis, an-gi-o-de-as'tas-is (*angeion, diastasis*, separation). Separation of divided ends of a vessel; dilatation or unnatural position of a vessel.

Angeioelephantiasis, an-gi-o-el-e-fan-ti'as-is. Elephantiasis teleangeiectodes; elephantiasis of connective-tissue layer of skin, extending thence to the surface.

Angeiogeny (an-gi-oj'en-e) or **Angiog'eny** (*angeion, gennao*, to generate). Formation or generation of vessels.

Angeioglioma, an-gi-o-gle-o'mah (*angeion, glia*, glue). Vascular glioma of spinal cord.

Angeiograph, an-gi'o-graf. A modified sphygmograph.

Angeiography (an-gi-og'ra-fe) or **Angiog'raphy** (*angeion, graphe*, description). Description of vessels; use of angeiograph.

Angeiohæmia, an-gi-o-he'me-ah (*angeion, haima*, blood). Plethora.

Angeiohelco'sis (*angeion, helkos*, ulcer). Ulceration of a blood-vessel.

Angeiohydrography (an-gi-o-hi-drog'ra-fe) or **Angiohydrog'raphy** (*angeion, hudor*, water, *grapho*, to describe). Description of lymphatics.

Angeiohydrology (an-gi-o-hi-drol'o-je) or **Angiohydrol'ogy** (*angeion, hudor*, water, *logos*, description). Treatise on vessels; description of lymphatics.

Angeiohydrotomy (an-gi-o-hi-drot'o-me) or **Angiohydrot'omy** (*angeion, hudor*, water, *tome*, incision). Dissection of lymphatics.

Angeioitis, an-gi-o-e'tis. Inflammation of a blood-vessel.

Angeiokinesis, an-gi-o-kin-a'sis. Angeiocinesis.

Angeioleucitis (an-gi-o-lu-se'tis) or **Angioleuci'tis** (*angeion, leukos*, white). Inflammation of lymphatics; see *Lymphangeitis*.

Angeioleucography, an-gi-o-lu-kog'raf-e. Angeioleucology.

Angeioleucology, an-gi-o-lu-kol'o-je (*angeion, leukos*, white, *logos*, description). Treatise on or description of lymphatics. One who makes them a study is an *Angeiol'ogist*.

Angeiology (an-gi-ol'o-je) or **Angiol'ogy** (*angeion, logos*, a discourse). Treatise on the vessels; anatomy of vessels; it includes arteriology, phlebology, and angeiohydrology.

Angeiolymphitis, an-gi-o-lim-fe'tis. Angeioleucitis.

Angeiolymphoma, an-gi-o-lim-fo'mah. Lymphangeioma.

Angeioma, an-gi-o'mah. Vascular tumor, tumor composed mainly of newly-formed blood-vessels, or of blood-vessels with newly-formed elements in their walls. **A., arte'rial**, aneurism by anastomosis. **A., cap'illary**, nævus. **A., cav'ernous**, erectile tumor of large vessels with cavernous spaces. **A., congen'ital**, nævus. **A., lipog'enous**, subcutaneous form of a. resembling lipoma. **A., lymphat'ic**, lymphangeioma. **A., plex'iform**, common form of a. of skin, in which capillaries are dilated and tortuous. **A., ra'cemose**, cirsoid aneurism. **A., tu'berose**, lipogenous form of a. **A., var'icose**, A., cavernous. **A., ve'nous**, A., cavernous.

Angeiomalacia (an-gi-o-mal-ah'se-ah) or **Angiomala'cia** (*angeion, malakia*, softening). Mollescence or softening of vessels.

Angeiomyces, an-gi-om'is-es (*angeion, mukes*, fungus). Spongy dilatation of capillaries; hæmatodes fungus.

Angeion, an-gi'on. Vessel.

Angeioneurosis, an-gi-o-nu-ro'sis. Angioneurosis.

Angeionoma, an-gi-on-o'mah. Angionoma.

Angeionosus (an-gi-on'o-sus) or **Angeionusus**, an-gi-o-nu'sus (*nousos*, disease). Angeiopathia.

Angeiopàralysis, an-gi-o-par-al'is-is. Vaso-motor paralysis.

Angeioparesis, an-gi-o-par'a-sis. Partial vaso-motor paralysis.

Angeioparetic, an-gi-o-par-et'ik. Relating to vaso-motor paralysis.

Angeiopathia (an-gi-o-path-e'ah) or **Angiopathi'a** (*angeion, pathos*, disease). Disease of vessels.

Angeioplania (an-gi-o-plan'e-ah) or **Angioplan'ia** (*angeion*, vessel, *plane*, error). Anomaly in structure and distribution of vessels.

Angeioplastic, an-gi-o-plas'tik. Relating to vessel-forming tissues.

Angeioplerosis, an-gi-o-pler-o'sis (*angeion, pleroo*, to fill up). Plethora; engorgement of vessels.

Angeioploce, an-gi-op'lo-se (*angeion, ploke*, plaiting). Operation for arresting hemorrhage from cut vessel by passing divided end through hole made in vessel.

Angeiopyra, an-gi-op'ir-ah (*angeion, pur*, fire, fever). Fever with inflammation.

Angeiorhexis, an-gi-o-reks'is. Rupture of blood-vessel.

Angeiorrhagia, an-gi-or-rhaj'e-ah (*angeion, rhage*, rupture). Active hemorrhage.

Angeiorrhœa (an-gi-or-rhe'ah) or **Angiorrhœ'a** (*angeion, rheo*, to flow). Passive hemorrhage.

Angeiosarcoma, an-gi-o-sar-ko'mah. Angiosarcoma.

Angeioscope, an-gi'o-skope (*angeion, skopeo*, to see). Instrument for examining smaller blood-vessels.

Angeioscopy, Examination by the angeioscope.

Angeiosialitis, an-gi-o-se-al-e'tis (*angeion, sialon*, saliva). Inflammation of salivary ducts.

Angeiosis, an-gi-o'sis. Angiosis.

Angeiospasm, an-gi'o-spazm. Vaso-motor spasm.

Angeiospastic, an-gi-o-spas'tik (*angeion, spao*, to produce spasms). Relating to spasm of blood-vessels.

Angeiosperm, an-gi'o-spurm. Sperm-vessel; male generative apparatus.

Angeiospermia, an-gi-o-spur'me-ah. Diseases of the male genital organs.

Angeiostegnosis, an-gi-o-steg-no'sis (*angeion, stegnoo*, to constrict). Constriction of vessels.

Angeiostenosis, an-gi-o-sten-o'sis (*angeion, stenos*, narrow). Narrowness or contraction of vessels.

Angeiostenotic, an-gi-o-sten-ot'ik (*angeion, stenos*, narrow). Agents which act as astringents on blood-vessels.

Angeiosteogeny (an-gi-os-te-oj'en-e) or **Angeiosteosis**, an-gi-os-ta-o'sis (*angeion, osteon*, bone, *genesis*, formation). Calcification or ossification of vessels.

Angeiostosis (an-gi-o-sto'sis) or **Angiosto'sis** (*angeion, osteosis*, ossification). Ossification of vessels.

Angeiostrophe, an-gi-os'tro-fe (*angeion, strepho*, to turn). Torsion of vessels.

Angeiosymphysis, an-gi-o-sim'fis-is (*angeion, sumphusis*, growing together). Adhesion of blood-vessels or their walls.

Angeiosynizesis, an-gi-o-sin-iz-a'sis (*sunizesis*, collapse). Collapse of walls of vessel.

Angeiotasis, an-gi-ot'a-sis (*tasis*, tension). Distension of blood-vessels.

Angeiotelectasia, an-gi-o-te-lek-tah'ze-ah (*angeion, telos*, end, *ektasis*, dilatation). Telangiectasia.

Angeioteria, an-gi-o-ta're-ah (*teras*, monstrosity). Malformation of blood-vessels.

Angeiothlipsis, an-gi-o-thlip'sis (*thlipsis,* friction). Abrasion of vessels.

Angeiotitis, an-gi-o-te'tis (*ous,* ear). Inflammation of blood-vessels of ear.

Angeiotomy (an-gi-ot'o-me) or **Angiot'omy** (*angeion, tome,* incision). Dissection or anatomy of vessels.

Angeïtis (an-gi-e'tis) or **Angiï'tis.** Inflammation of vessels in general.

Angelic acid, an-jel'ik as'id. Crystalline acid from angelica-root, croton oil, etc. **A. root,** Angelica lucida.

Angelica, an-jel'ik-ah Ord. Umbelliferæ, native of Lapland; root, stalk, leaves, and seed are aromatic and carminative; sweetmeat is made of the root; see *Acidum valerianicum.* **A. archangel'ica,** angelica. **A. atropurpu'rea,** *Masterwort.* Indigenous species, virtues same as those of angelica of Europe. **A. levist'icum,** Ligusticum levisticum. **A. lu'cida,** *Angelic root, Bellyache root, Nendo, White root.* Indigenous plant, root of which is aromatic, stomachic, and tonic. Also Ligusticum actæifolium. **A. nen'do,** Ligusticum actæifolium. **A. officina'lis,** imperatoria. **A. paludapifo'lia,** Ligusticum levisticum. **A. root,** root of angelica and imperatoria. **A. sati'va,** angelica, A. sylvestris. **A. sylves'tris,** *Wild angelica,* possesses similar properties to the last, but in an inferior degree; the seeds, powdered and put into the hair, are used to destroy lice; see *Ligusticum podagraria.* **A. tree,** Aralia spinosa. **A. triquina'ta,** Archangelica atropurpurea.

Angelinæ cortex, an-jel-e'ne kor'teks. Bark of Grenada tree: anthelmintic and cathartic.

Angelocacos, an-jel-ok'ak-os. Myrobalanus.

Angemphraxis, an-jem-fraks'is. Angiemphraxis.

Angiaëraphrosia, an-je-ah-er-af-roze'e-ah (*aër,* air, *aphros,* foam). Secretion of frothy mucus in the air-tubes.

Angidiectasia, an-je-de-ek-taz'e-ah. Telangiectasia.

Angidiospongus, an-je-de-o-spon'gus (*angeion,* small vessel, *spongos,* fungus). Hæmatodes fungus.

Angiectasia (an-je-ek-taz'e-ah) **veno'sa.** Varix.

Angiectasis, an-je-ek'tas-is (*angeion, ektasis,* dilatation). Dilatation of vessels; see *Telangiectasis.*

Angiectoma, an-je-ek-to'mah. Swelling caused by dilatation of vessels.

Angiectopia, an-je-ek-top'e-ah (*angeion, ek,* out of, *topos,* place). Condition in which vessels are out of their natural situation.

Angielcosis, an-je-el-ko'sis (*angeion, helkos,* ulcer). Ulceration of blood-vessels.

Angiemphraxis, an-je-em-fraks'is (*angeion, emphraxis,* obstruction). Obstruction of vessels.

Angienchyma, an-je-en'kim-ah (*angeion, chuma,* liquid). Vascular membrane or tissue.

Angieurysma, an-je-u-riz'mah (*angeion, eurusma,* dilatation). Dilatation of vessels; angiectasis.

Angiïtis, an-je-e'tis. Inflammation of vessels.

Angina, an-ji'nah (*ancho,* to choke). Sense of suffocation. Inflammation of supradiaphragmatic portion of the alimentary canal and of the air-passages. Latin writers applied the term to every disease in which deglutition or respiration was affected, provided such affection was above the stomach and lungs. Angina of the moribund was dysphagia or difficult deglutition preceding death. See *Cynanche.* **A. accesso'ria,** retro-pharyngeal abscess. **A. angino'sa,** scarlatina anginosa. **A. aphtho'sa,** aphthæ. **A. aquo'sa,** œdema of the glottis. **A. bronchia'lis,** bronchitis. **A. cani'na,** croup. **A. cantato'rum,** sore throat of vocalists. **A. carbuncula'ris,** carbuncle of the throat. **A. cardi'aca,** A. pectoris. **A. catarrha'lis,** catarrhal inflammation of mucous membrane of pharynx, soft palate, uvula, and tonsils. **A. clerico'rum,** clergymen's sore throat. **A. cor'dis,** A. pectoris. **A. diphther'ica** or **diphtherit'ica,** diphtheritic inflammation of fauces and palate; see *Pharyngitis, diphtheritic.* **A. epidem'ica,** cynanche maligna. **A. epiglottide'a,** epiglottitis. **A. erysipelato'sa,** erythematous or erysipelatous sore throat. **A. exsudato'ria,** cynanche trachealis. **A. exter'na,** cynanche parotidæa. **A. fau'cium,** isthmitis. **A. faucium exsudati'va,** pharyngitis, diphtheritic. **A. fau'cium malig'na,** cynanche maligna. **A., fi'brinous,** diphtheroid sore throat. **A. folliculo'sa of pharynx,** pharyngitis, follicular. **A. gangræno'sa,** cynanche maligna. **A. glandulo'sa** or **granulo'sa,** pharyngitis, follicular. **A., hogskin,** pharyngitis diphtheritica. **A. hu'mida,** cynanche trachealis. **A. infan'tum,** croup. **A. inflammato'ria,** cynanche, cynanche trachealis. **A. inter'na,** croup. **A. lacuna'ris,** inflammation of lacunæ of tonsil. **A. laryngæ'a,** laryngitis. **A. laryngæ'a œdemato'sa,** œdema of glottis. **A. lingua'ria,** glossitis. **A. Ludov'ici** (after Ludwig of Stuttgard, who first fully described it), phlegmonous inflammation of floor of mouth and intermuscular and subcutaneous connective tissue of submaxillary region, sometimes terminating in diffuse gangrene and sloughing. **A. malig'na,** angina pellicularis, cynanche maligna; pharyngitis, diphtheritic. **A. maxilla'ris,** cynanche parotidæa. **A. membrana'cea** or **membrano'sa,** cynanche trachealis. **A. mi'tis,** isthmitis. **A. morbillo'sa,** catarrhal condition accompanying measles. **A. nasa'lis,** inflammation of posterior portion of Schneiderian membrane lining the nose; coryza. **A. œdemato'sa,** œdema of glottis, effect of chronic cynanche laryngæa. **A. palati'na,** inflammation of velum palati. **A. paralyt'ica,** paralysis of the pharynx. **A. parotidæ'a exter'na,** cynanche parotidæa, mumps. **A. pec'toris,** *Diaphragmatic gout, Suffocative breast-pang, Cardiac apnœa, Neuralgia of the heart,* disease, principal symptoms of which are violent pain about the sternum, extending toward the arms, anxiety, great dyspnœa, and sense of suffocation, diminished frequency of pulse, alteration of volume and rhythm, pallor, cold sweat, and sense of approaching death. It is an affection of great danger, often connected with valvular disease, embolism, ossification, or other morbid condition of the heart. Name also of an acutely painful intermittent affection of the heart, seeming to differ from angina pectoris more in regard to small number of parts drawn into morbid consent with the affected cardiac nerves than to its nature or appropriate treatment. The most powerful stimulating and narcotic antispasmodics are required during the paroxysm of angina pectoris; friction and hot applications externally; nitrite of amyl by inhalation or nitro-glycerine internally. **A. pellicula'ris,** pharyngitis, diphtheritic. **A. pernicio'sa,** cynanche trachealis. **A. pestilentia'lis,** pharyngitis, diphtheritic. **A. phlegmono'sa,** acute inflammation of throat with tendency to suppuration. **A. plas'tica,** diphtheria. **A. polypo'sa,** cynanche trachealis. **A. pseudo-membrano'sa,** pharyngitis, diphtheritic. **A. pulpo'sa,** cynanche trachealis. **A., pulta'ceous,** inflammation with white or grayish patches. **A. sanguin'ea,** cynanche tonsillaris. **A. sero'sa,** catarrhal a.; œdema of glottis. **A. sic'ca,** chronic inflammation of pharynx, with distressing sense of dryness and heat, in chronic diseases of the stomach and lungs; see *Pædanchone.* **A. sim'plex,** isthmitis. **A. spasmod'ica** or **spast'ica,** asthma thymicum, laryngismus stridulus. **A. squirro'sa,** difficulty of deglutition from scirrhous disorganization of pharynx or œsophagus, or from enlarged tonsils. **A. strangulato'ria,** cynanche trachealis. **A. strepito'sa,** cynanche trachealis. **A. strid'ula,** laryngismus stridulus, membranous croup. **A. suffocato'ria,** cynanche trachealis. **A. synocha'lis,** cynanche tonsillaris. **A. syphilit'ica,** syphilis affecting the throat. **A. thy'mica,** laryngismus stridulus, asthma. **A. thyreoi'dea,** inflammation of thyroid gland. **A. tonsilla'ris,** cynanche tonsillaris. **A., tox'ic,** angina dependent on poisoning or blood-poisoning. **A. trachea'lis,** cynanche trachealis. **A. cum tumo're,** cynanche tonsillaris. **A. ulcero'sa,** cynanche maligna. **A. uvula'ris,** staphylœdema, uvulitis. **A. ve'ra et legit'ima,** cynanche tonsillaris.

Anginose (an'jin-ose), **Anginous** (an'jin-us), or **An'ginoid.** Relating or appertaining to angina, as anginose scarlatina.

Angio. See *Angeio* for words not given under *Angio.*

Angiocarditis (an-je-o-kar-de'tis) or **Angeiocardi'tis** (*angeion,* and *carditis*). Inflammation of the heart and great vessels.

Angiocaverno'sus. Vascular nævoid nodular tumor of the subcutaneous cellular tissue.

Angiocholitis, an-je-o-kol-e'tis (*angeion, chole,* bile). Inflammation of the bile-ducts.

Angioderma pigmentosum, an-je-o-dur'mah pig-men-to'sum. Atrophoderma pigmentosum.

Angiodes, an-je-o'des. Full of vessels.

Angiodesmoses, an-je-o-des-mo'zes (*angeion, desme,* band). Trophic diseases of corium and subcutaneous connective tissue, due to derangement of cutaneous blood-vessels or lymphatics.

Angiodiastasis, an-je-o-de-as'tas-is (*angeion, diastasis,* separation). Angiectasis.

Angioelephantiasis, an-je-o-el-e-fant-e'as-is. Elephantiasis of connective-tissue layer of skin, extending thence to the surface; elephantiasis teleangiectasis.

Angioepidermidoses, an-je-o-ep-e-dur-mid-o'ses (*angeion, epi,* upon, *derma,* skin). Affections of skin characterized by trophic changes in the epidermis, with derangement of superficial blood-vessels.

Angiogeny, an-je-oj'en-e. Angeiogeny.

Angioglio'ma. Vascular glioma of spinal cord.

Angiograph, an'je-o-graf. Sphygmograph.

Angiography, an-je-og'raf-e. Angeiography.

Angiohydrography, an-je-o-hi-drog'raf-e. Angeiohydrography.

Angiohydrology, an-je-o-hi-drol'o-je. Angeiohydrology.

Angiohydrotomy, an-je-o-hi-drot'o-me. Angeiohydrotomy.

Angioïtis, an-je-o-e'tis. Angeitis.

Angiokeratoma, an-je-o-ker-at-o'mah. Rare cutaneous affection, commencing with red specks, which become prominent and hard and watery; being due to dilatation or neoplasm of a blood-vessel.

Angioleucitis, an-je-o-lu-se'tis. Angeioleucitis.

Angioleucology, an-je-o-lu-kol'o-je. Angeioleucology.

Angiolith, an'je-o-lith (*angeion, lithos,* stone). Phlebolith.

Angiology, an-ge-ol'o-je. Angeiology.

Angiolymphitis, an-je-o-lim-fe'tis. Angeioleucitis.

Angioma, an-je-o'mah. See *Angeioma.* **A. arteria'le racemo'sum,** see *Aneurism* (cirsoid). **A. capilla're,** nævus, teleangiectasis. **A. caverno'sum,** form of angioma in which there are communicating cavities. **A. elephanti'acum,** angioelephantiasis. **A. lipomato'des,** angioelephantiasis. **A. lymphat'icum,** lymphangioma. **A. neurot'icum,** angioelephantiasis. **A. pigmento'sum,** nævus pigmentosus. **A. racemo'sum,** cirsoid aneurism. **A. varico'sum,** teleangiectasis venosum. **A. veno'sum,** A. cavernosum. **A. verruco'sum,** nævus verrucosus.

Angiomalacia, an-je-o-mal-ah'se-ah. Angeiomalacia.

Angiomyces, an-je-om'e-ces (*angeion, mukes,* fungus). Hæmatodes fungus.

Angiomyoma, an-je-o-me-o'mah. A vascular erectile muscular tumor.

Angioneoplasma, an-je-o-ne-o-plas'mah. Angioma; new vascular growth.

Angioneurosin, an-je-o-nu-ro'sin. Nitroglycerine.

Angioneurosis, an-je-o-nu-ro'sis (*angeion,* vessel, *neurosis*). Neurosis connected with blood-vessels of a part, as of skin, spinal cord, cortex of brain, etc. Herpes zoster is a vaso-motor neurosis in superficial cutaneous layers, an exanthematous angeioneurosis.

Angioneurotic, an-je-o-nu-rot'ik. Relating to angioneurosis. **A. œde'ma,** œdema due to angioneurosis.

Angionoma (an-je-o-no'mah) or **Angeiono'ma.** Vascular growth; applied also, generically, to aneurism, erectile tumors, and varix.

Angionosus (an-je-on'o-sus), **Angionusus** (an-je-o-nu'sus), or **Angiopathia,** an-je-o-path-e'ah (*angeion, nosos,* disease). Angeiopathia.

Angioparalysis, an-je-o-par-al'is-is. Paralysis of vaso-motor nerves.

Angioplania, an-je-o-plan'e-ah. Anomaly in structure and distribution of vessels.

Angioplastic, an-je-o-plas'tik (*plasso,* to flow). Forming new vessels.

Angioplerosis, an-je-o-ple-ro'sis (*angeion, pleroo,* to fill). Plethora.

Angiopyra, an-je-op'ir-ah (*angeion, pur,* fire). Continued fever; see *Synocha.*

Angiorrhagia, an-je-or-rhaj'e-ah (*angeion,* and *rhage,* rupture). Active hemorrhage.

Angiorrhœa, an-je-or-rhe'ah. Passive hemorrhage.

Angiosarcoma, an-je-o-sar-ko'mah. Vascular sarcoma.

Angiosis, an-je-o'sis. Disease or morbid condition of vessels.

Angiostegnosis, an-je-o-steg-no'sis (*stegnosis,* constriction). Constriction of vessels. Medicines which produce constriction of vessels are called *Angiostegnot'ics.*

Angiostenosis, an-je-o-sten-o'sis (*stenosis,* contraction). Angeiostenosis.

Angiostosis, an-je-os-to'sis. Ossification of vessels.

Angiostrophe, an-je-os'tro-fe (*strepho,* to turn). See *Torsion.*

Angiosymphysis, an-je-o-sim'fis-is. Union or close apposition of vessels.

Angiosynezesis, an-je-o-sin-ez-a'sis (*angeion, sunizesis,* falling together). Collapse of blood-vessels.

Angiotasis, an-je-ot'as-is (*angeion, tasis,* tension). Tension of vessels.

Angiotatic, an-je-o-tat'ik. Relating to tension of vessels.

Angiotelectasia, an-je-o-tel-ek-taz'e-ah (*angeion, telos,* end, *ektasis,* extension, dilatation). Dilatation of capillary vessels; see *Telangiectasia..*

Angiotenic (an-je-o-ten'ik) or **Angeioten'ic** (*angeion, teino,* to stretch). Epithet given to inflammatory or continued fever, whose action seems to be chiefly exerted on the vascular system.

Angiotomy, an-ji-ot'o-me. Dissection or anatomy of vessels.

An'gle. Space between two lines which meet in a point. In anatomy it signifies union of two lines or borders meeting from different directions. Craniometrical angles imply angle formed by two lines or planes in measurements of the skull. **A. of aberra'tion,** A. of deviation. **A., acro'mial,** angle formed by clavicle and head of radius. **A., al'pha,** angle formed by line of vision and optic axis. **A., alve'olar,** A. formed by horizontal line of head, intersecting line from point beneath nasal spine to alveolar point. **A., auric'ular,** any angle formed by lines meeting at auricular point, which is middle of external auditory meatus. The terms *Auriculo-cranial angle, A.-facial angle, A.-frontal angle, A.-occipital angle, A.-parietal angle,* are applied to auricular angles whose lines pass through the cranium, face, frontal and occipital regions respectively. **A., basifa'cial,** A. formed by line from basion to middle of anterior edge of inner surface of the sphenoid, and line drawn from latter to alveolar point. **A., bas'ilar,** angle whose apex is basion, and sides pass to nasion and opisthion. **A., bior'bital,** A. produced by meeting of orbital axes. **A. of Camper,** A., facial. **A., cephal'ic,** see *Angle, facial,* and *A., cranial.* **A., con'dylar,** A. made by plane of occipital foramen with plane of basilar groove. **A., coro'no-fa'cial,** A. between facial line and plane passing through coronal suture. **A., cra'nial,** angles whose lines meet at the front edge of the occipital foramen. **A. of Daubenton,** A., occipital. **A. of devia'tion,** angle formed by line of refracted ray with line of ray if not refracted. **A. of eye,** angle at corners of eye formed with the lids. **A., fa'cial,** or **A. of Camper,** is formed by union of two lines, one drawn from most prominent part of forehead to alveolar edge of upper jaw opposite incisor teeth, *facial line;* the other from meatus auditorius externus to the same point of the jaw. According to the size of the angle it has been attempted to appreciate respective proportions of cranium and face, and the degree of intelligence of individuals and

of animals. In the white varieties of the species it is generally 80°; in the negro not more than 70°, sometimes only 65°. As we descend the scale of animals it becomes less and less, until, in fishes, it nearly or entirely disappears. Intelligence is ascribed to those in which the angle is largely developed, as the elephant and owl; but the large facial angle is caused by size of the frontal sinuses, and not by size of the brain. Several other facial angles formed by lines have been proposed from other points. **A., fa'cial, or'phyro-spi'nal,** A., orphyro-spinal. **A., fron'tal,** A. made by lines meeting at auricular point projected from bregma and glabella. **A. of in'cidence,** angle made by ray of light or wave of sounds, with perpendicular to reflecting or refracting surface. **A., in'io-fa'cial,** A. of lines meeting at inion from glabella and symphysis of chin. **A. of Lavat'er,** angle between top of nose and outer canthus of eye, and line from first point to angle of mouth in front of first molar tooth. **A. of lips,** angle formed between corners of mouth and lips. **A., Louis's,** A. sometimes seen in tuberculosis between upper part of sternum and its body. **A. of Mülder,** A. formed by crossing of facial line of Camper with line from basi-occipital bone to nasion. **A., na'sal,** several are described: one formed by horizontal line of skull, with one passing from centre of naso-frontal suture to centre of alveolar border; another by lines passing from subnasal spine to naso-frontal suture and basion respectively. **A., occip'ital, of Daubenton,** is formed by line drawn from posterior margin of foramen magnum to inferior margin of orbit, and another drawn from top of the head to space between occipital condyles. In man these condyles, as well as the foramen magnum, are so situate that a line drawn perpendicular to them would be the continuation of the spine; but in animals they are placed more or less obliquely, and the angle is rendered more acute. **A., olfac'tory,** that formed by basicranial axis with plane of cribriform plate. **A., op'tic,** angle formed by two lines shaving the extremities of an object and meeting at centre of pupil. **A., or'phyro-spi'nal fa'cial,** A. formed by lines meeting at nasal spine from orphyron and auricular point. **A., pari'etal,** angle between lines from bregma and lambda to auricular point. **A., pre-max'illary,** A., basifacial. **A. of prognath'ion,** angle expressing amount of prominence of face. **A. of re-flec'tion,** angle made by ray of light or wave of sound with perpendicular to reflecting surface at point of reflection. **A. of refrac'tion,** A. made by refracted ray with extension of perpendicular falling on surface of refraction. **A., sincip'ital,** A. of Mülder. **A., sphenoid'al,** A. made by lines from nasion and basion to middle of transverse groove of optic commissure. **A., suboccip'ital,** A. made by lines passing to auricular point from external occipital protuberance and posterior edge of foramen occipitale; A. made by lines from same point to lambda and external occipital protuberance is called *supraoccipital.* **A., vestib'ular,** angle made between back and middle walls of vestibule of ear. **A. of vision,** A., optic. **A., vis'ual,** A., optic. **A. of Vogt,** angle formed by lines projected respectively from nasion to basion and alveolar point. **A. of Wal'ther,** A. formed by line from protuberance of occipital bone to crista galli of ethmoid, and line from glabella to nasion.

Ang'licus su'dor. See *Sudor.*

Ang'nail. Hangnail.

Ango'la-seed. Jequirity.

Angona, an'go-na, properly **An'chona** (*ancho,* to choke). Nervous quinsy; feeling of strangulation, with dread of suffocation, common in hysterical females, and accompanied with sensation as if a ball arose from the abdomen to the throat, *globus hystericus.* Angina.

Angophrasia, an-go-fraz'e-ah (*ancho,* to choke, *phrasis,* speech). Defective speech, in which certain sounds are drawled or dwelt upon at greater length than others; occurs in paralytic dementia.

An'gor. Extreme anxiety accompanied with painful constriction at the epigastrium, often with palpitation and oppression; see *Angina pectoris, Agony, Orthopnœa.* **A. fau'cium,** isthmitis. **A. pec'toris,** angina pectoris.

An'gos. Uterus; blood-vessel.

Angourion, an-goor'e-on (*angos,* hollow vessel). Cucumis sativus.

Angræcum (an-gre'kum) **carina'tum.** Juice of this E. Indian plant is purgative and anthelmintic. **A. fra'grans,** plant indigenous to Isle of Bourbon and Mauritius, whose leaves, under the name of *faham,* have been used as substitute for Chinese tea.

Angry. Inflamed.

Anguillula, an-gwil'u-lah. Genus of worms, Anguillidæ. **A. intestina'lis,** form of intestinal worm. **A. ster'coralis,** worm found in the intestines in some forms of diarrhœa.

Anguish, an'gwish. Angor. **A., feb'rile,** combination of weariness, pain, weakness, etc., affecting the head and neck, generally observed at commencement of fever.

Angular, an'gu-lar (*angulus,* angle). Relating to an angle. **A. ap'erture,** angle formed by the rays of light at focal point of a microscope. **A. artery and vein,** termination of facial artery and vein, because they pass by the greater angle of the eye; facial artery and vein, because they pass under the angle of the jaws; see *Facial.* **A. convolu'tion** or **gy'rus,** cerebral convolution connecting superitemporal and meditemporal gyri. **A. nerve,** filament furnished by inferior maxillary, passing near greater angle of eye. **A. processes** of frontal bone are seated near the angles of the eyes; see *Orbitar.*

Angularis (an-gu-lar'is) **scap'ulæ.** Levator scapulæ.

Anguli-labialis, an'gu-le lab-e-al'is. Depressor anguli oris.

Angulus, an'gu-lus. Angle. **A. costæ,** angle of rib. **A. eth'mo-lacryma'lis,** ethmo-lacrymal angle. **A. fronta'lis,** anterior superior angle of parietal bone. **A. Ludov'ici,** angle of Louis. **A. ocula'ris,** canthus of eye. **A. oc'uli,** corner or canthus of the eye. **A. op'ticus,** angle, optic, or angle of vision. **A. o'ris,** angle of mouth. **A. præcordia'lis,** subcostal angle. **A. pu'bis,** angle of the pubes. **A. scap'ulæ,** angle of scapula. **A. veno'sus,** angle of junction of internal jugular and subclavian veins. **A. viso'-rius,** angle, optic. **A. visua'lis** or **viso'rius,** angle of vision.

Anguria, an-gu're-ah (*angos,* hollow vessel). Cucurbita citrullus.

Angus. Uterus; blood-vessel.

Angustatio, an-gus-tah'she-o (*angustus,* narrow). Angustia, arctatio, stenosis, stricture. **A. cor'dis,** systole. **A. intesti'ni a'ni** or **rec'ti,** stricture of the rectum.

Angustia, an-gus'te-ah. Anxiety, narrowness, strait, constriction; narrow portion of lacrymal canal. **A. abdomina'lis,** pelvis, brim of pelvis. **A. abdomina'lis pel'vis,** brim of pelvis. **A. perinæa'lis,** outlet of pelvis; inferior pelvic strait. **A. præcordio'rum,** asthma. **A. tym'pani,** isthmus of the tympanum. **A. uri'næ,** strangury.

Angustura, an-gus-tu'rah. Cusparia febrifuga galipea. **A., false,** Brucia antidysenterica, Strychnos nux vomica. **A. spu'ria,** Brucia antidysenterica, Strychnos nux vomica. **A. trifolia'ta,** galipea.

Angustu'rin. Brucine; bitter alkaloid of cusparia.

Anhæmato'sia or **Anhæmatosis,** an-he-mat-o'sis (*an, hæmatosis*). Asphyxia, anæmatosis, anæmia.

Anhæmia, an-he'me-ah. Anæmia.

Anhalonium Lewinii, an-hal-o'ne-um lew-in'e-e. Active principle of cactus of same name; poison like strychnia.

Anhaphia, an-haf'e-ah. Anaphia.

Anhelatio, an-hel-ash'e-o (*anhelo,* to pant). Panting, gasping, anhelation, short and rapid breathing. See *Dyspnœa.* Term sometimes employed synonymously with asthma. Such respiration is said to be *anhelous.*

Anhela'tion. See *Anhelatio* and *Anhelitus.*

Anhelitus, an-hel'it-us. Anhelation, difficult respiration, asthma.

Anhidrosis, an-hid-ro'sis. Anidrosis.

Anhidrotic, an-hid-rot'ik. Antihydrotic.

Anhistous (an-hist'us) or **Anhist'ic** (*an, histos,* organic texture). Anorganic, amorphous; without definite shape or structure. Tunica decidua uteri is termed an anhistous membrane.

Anhydræmia, an-hid-re'me-ah (*an, hudor,* water, *haima,* blood). Condition of blood in which there is diminished quantity of serum.

Anhydride, an-hi'drid (*a,* priv., *hudor,* water). Name given to chemical combinations which are devoid of water.

Anhydromyelia, an-hid-ro-me-el'e-ah (*an, hudor,* water, *muelos,* marrow). Deficiency or absence in spinal cavity of cephalo-spinal fluid.

Anhydrous, an-hi'drus (*an, hudor,* water). Devoid of water, as A. alcohol, absolute alcohol, etc.

Anhyste'ria (*an, hustera,* uterus). Absence of uterus; ametria.

Anicetum, an-is-a'tum (*an, nike,* victory, invincible). Anise; also, plaster formed of litharge, cerusse, thus, alum, turpentine, white pepper, and oil.

Anideus, an-id'a-us (*an, eidos,* shape). Amorphous; devoid of shape, as a monster.

Ani'dous (*an, eidos,* form). Shapeless, amorphous, as in case of some monstrosities.

Anidremia, an-id-ra'me-ah. Anhydræmia.

Anidrosis, an-id-ro'sis (*an, hidros,* sweat). Absence of sweat; deficiency of perspiration, local or general.

Anidrotic, an-id-rot'ik (same etymon). Relating to anidrosis; checking perspiration.

Anilema (an-il-a'mah) or **Anilesis,** an-il-a'sis (*ana, eileo,* to twist). Borborygmus, tormina.

Anilic acid, an-il'ik as'id. Indigotic acid, formed by treating indigo with nitric acid.

Aniline, an'il-een. C_6H_7N, amidobenzine; an artificial alkaloid, named from *anil, Indigofera anil,* which furnishes indigo; an oily liquid prepared from coal-tar, sp. gr. 1.036. It distils over when finely-pulverized indigo is decomposed by concentrated solution of potassa in a retort. Its chief value is due to beautiful coloring matters derived from it. Inhalation of it by workmen has sometimes produced symptoms of poisoning, such as neuralgia, giddiness, insensibility, etc., and contact of aniline colors with the skin occasionally produces a peculiar eruption. When given internally or by inhalation it acts upon the central nervous system, producing muscular excitation. **A. blue,** deep-blue aniline dye, useful for staining. **A. cam'phorate,** a soluble antipyretic salt. **A. red,** magenta. **A. sul'phate,** sulphate of aniline, has been prescribed in nervous disorders, as chorea and epilepsy. Dose, gr. j three times a day, gradually increased. See *Aniline.*

Anilism, an'il-izm. Constitutional effect of continuous exposure to vapors of aniline preparations, as vomiting, loss of consciousness, blueness of skin, etc. See *Aniline.*

Anilitas, an-il'it-as (*anus,* old woman). Dementia senilis, senility.

Anima, an'im-ah (*anemos,* wind or breath). Mind, breath, etc. Principle of intellectual and moral manifestations; principle of life, that of plants being termed anima vegetativa; that of man, anima sensitiva; consciousness. Anima of Stahl was a fancied intelligent principle, supposed to preside over the phenomena of life. See *Animist.* Anima also meant active principle of a drug. **A., al'oës,** Aloes succotorina. **A. articulo'rum,** hermodactylus. **A. hep'atis,** ferri sulphas. **A. pulmo'num,** crocus. **A. rhe'i,** infusum rhei. **A. of Stahl,** see *Anima.* **A. vegetati'va,** plastic force.

Animal, an'im-al An animated being. Most animals have power of locomotion; some merely execute partial movements, such as contraction and dilatation. It is often difficult to determine what is an animal characteristic. The study of animals is called zoölogy. See *Animal kingdom.* As an adjective, that which concerns or belongs to an animal. **A. ac'id,** acid contained in bodies of animals. **A. al'kaloid,** see *Alkaloid.* **A. char'coal,** bone-black; product of calcination of bones. **A. chem'istry,** chemistry of animal bodies. **A. econ'omy,** see *Economy.* **A. food,** this kind of food is rich in albuminous or nitrogenous substances, and contains also fat; it is more digestible than vegetable food. Fresh beef contains, according to Moleschott:

Water	73.4 parts.
Nitrogenous substances:	
Soluble albumen and gelatin	2.25 "
Insoluble albumen and gelatin	15.2 "
Gelatinous substances:	3.3 "
Extractives	1.38 "
Kreatin	0.068 "
Mineral matter or ash	1.6 "

A. heat, caloric constantly formed by body of living animal, by which it preserves nearly same temperature whatever may be that of the medium in which it is placed. It takes place over the whole body, in production of carbonic acid, and in other oxidizing processes, and in changes in nutrition. **A. king'dom** comprises all animated beings; they may be classified as follows (according to Claüs):

Vertebrata.	Pisces, Amphibia, Reptilia, Aves, Mammalia.
Invertebrata.	Protozoa, Cœlenterata, Echinodermata, Vermes, Arthropods, Mollusca, Molluscoidea, Tunicata.

A. lay'er, serous layer of blastodermic vesicle. **A. mag'netism,** mesmerism, hypnotism, etc.; see *Magnetism.* **A. mus'cles,** voluntary muscles. **A. oil,** fetid oil obtained by decomposition of immediate principles of animals, which, when purified, is used as stimulant. Fat contained in fat-vesicles.

Animalcula (pl. of **Animalculum**) **seminalia,** an-im-al'ku-lah sem-in-al'e-ah. Spermatozoa. **A. spermat'ica,** spermatozoa.

Animalcule, an-im-al'kule (dim. of **Animal**). Small animal, well seen only by the microscope. **A., seminal,** spermatozoon. **A., spermat'ic,** spermatozoon.

Animalculism, an-im-al'ku-lizm. Spermatism.

Animalculist, an-im-al'ku-list. One who explains physiological or pathological phenomena by means of animalcules. One who believes the embryo to be formed from so-called spermatic animalcules. Spermatist, seminist.

Animalculovism, an-im-al'ku-lo-vizm (*animalculum, ovum*). Doctrine which maintains that new being is formed by concourse of spermatic animalcule or spermatozoid with the ovum.

Animalculum, an-im-al'ku-lum. Animalcule.

Animalist, an'im-al-ist. Animalculist.

Animality, an-im-al'it-e. Aggregate of qualities distinguishing that which is animated; that which constitutes the animal.

Animalization, an-im-al-i-za'shun. Transformation of nutritive parts of food into living substance of body to be nourished; assimilation.

Animate, an'im-ate (*animo,* to give life). To excite or render active, as to animate a blister, that is, to excite it; to suppurate.

Animatio, an-im-ah'she-o. Animation. **A. fœ'tûs,** quickening.

Animation, an-im-a'shun. Act of animating; state of being alive or enlivened; quickening; acute mania. **A., suspend'ed,** asphyxia.

Anime, an'im-e. Resin obtained from trunk of Hymenæa courbaril. **A. cour'baril,** South American tree, ord. Fabaceæ, used as cephalic and uterine remedy; a constituent of some plasters.

Animellæ, an-im-el'le. Parotid glands.

Animi agitatio, an'im-e adj-e-tah'she-o. Agitation.

A. ca'sus sub'itus ("sudden loss of mind"), syncope. **A. deliq'uium**, syncope. **A. pathe'mata**, passions.

An'imism. See *Animist.*

Animist, an'im-ist. One who refers phenomena of the animal economy and disordered conditions to the soul, *animism*, under the view that it is endeavoring to expel the deranging cause.

Animus, an'im-us. Anima, breath.

Anion, an'e-on (*ana*, upward, *ion*, going). Electronegative element, because appearing at anode when set free by electrolysis.

Aniridia (an-ir-id'e-ah) or **Aniridismus**, an-ir-id-iz'mus (*an*, *iris*). Absence of iris.

Anisatus, an-is-at'us. Anisated; that is, containing anise.

Aniscalptor, an-e-skalp'tor (*anus*, *scalpo*, to scratch). Latissimus dorsi muscle.

Anischuria, an-is-ku're-ah (*an*, *ischouria*, suppression of urine). Incontinence of urine.

Anise, an'is. Pimpinella anisum. **A., star**, Illicium anisatum, I. Floridanum. **A. tree of Florida**, Illicium Floridanum. **A. tree, yellow-flowered**, Illicium anisatum. **A. water**, see *Pimpinella anisum.*

Aniseed, an'e-seed. See *Pimpinella anisum.*

Ani'si sem'ina. See *Pimpinella anisum.*

Anisic (an-is'ik) **acid.** Result of oxidation of anethol; antiseptic and antipyretic, used internally in the anisate of sodium.

Anisocoria, an-is-o-ko're-ah (*anisos*, unequal, *kore*, pupil). Unequal size of pupils of the two eyes.

Anisodac'tylus (*anisos*, unequal, *daktulos*, finger). Having fingers unequal in length.

Anisodontous, an-is-o-don'tus (*anisos*, unequal, *odous*, tooth). Having teeth of unequal length.

Anisodus luridus, an-is-o'dus lu'rid-us (*anisos*, unequal, *odous*, tooth, from unequal divisions of calyx). Plant of Nepal, narcotic, and resembling belladonna and tobacco; dilating the pupil.

Anisometrope, an-is-o'me-trope (*anisos*, unequal, *metron*, measure, *ops*, eye). One affected with anisometropia.

Anisometropia, an-is-o-met-ro'pe-ah. Inequality in refraction in the two eyes. One so affected is *Anisometrop'ic.*

Anisophyllum ipecacuanha, an-is-o-fil'lum ip-e-kak-u-an'ah (*anisos*, unequal, *phullon*, leaf). Euphorbia ipecacuanha.

Anisosthenes, an-is-os'the-nes (*anisos*, unequal, *sthenos*, strength). Unequal in strength; epithet applied to muscular contractility which is sometimes augmented in certain muscles only, flexors, for example.

Anisosthenic, an-is-os-then'ik (*anisos*, unequal, *sthenos*, strength). Inequality of strength.

Anisotachys, an-is-ot'ak-is (*anisos*, unequal, *tachus*, quick). Epithet for pulse when quick and unequal.

Anisotropic (an-is-o-trop'ik) or **Anisotropous**, an-is-ot'rop-us (*anisos*, unequal, *trepo*, to turn). Having the power of causing double refraction of ray of light.

Anisum, an-e'sum. See *Pimpinella anisum.* **A. Africa'num frutes'cens**, Bubon galbanum. **A. frutico'sum galbanif'erum**, Bubon galbanum. **A. officina'le**, Pimpinella anisum. **A. Sinen'se**, Illicium anisatum. **A. stella'tum**, Illicium anisatum. **A. vulga're**, Pimpinella anisum.

Anisuric (an-is-u'rik) **acid.** $C_{10}H_{11}NO_2$. Acid analogous to hippuric acid excreted in the urine after use of anise.

Anitersor, an-e-tur'sor (*anus*, *tergo*, to wipe). Latissimus dorsi.

Ankle, an'kl. Portion of lower extremity included between the leg and foot. See *Astragalus* and *Malleolus.* **A. clo'nus** (*klonos*, tumultuous movement), series of uniform spasmodic contractions of ankle-joint when extensors of that joint are put continuously on the stretch; more marked in hysteria and lateral sclerosis. **A.-joint**, articulation between tibia and fibula above and on the sides, and astragalus below; regulated by three ligaments.

Ank'let. Bandage or leather bands to surround the ankle.

An'kola. Bark of roots of Alangium Lamarckii, emetic; also used in skin diseases.

Ankuroid, ank'u-roid (*ankura*, anchor, *eidos*, form). Like an anchor, as ankuroid cavity, descending corner of lateral ventricle.

An'kus. Ancus.

Ankylenteria, an-kil-en-ter'e-ah (*ankylo*, *enteron*, intestine). Adhesion or growing together of the intestines.

An'kylo. Crooked. See *Ancylo.*

Ankylobleph'aron or **Ancyloblepharon**, an-ke-lo-blef'ar-on (*ankylo*, *blepharon*, eyelid). Preternatural union between free edges of eyelids. Union between eyelids and globe of eye. **A. adna'tum**, congenital a.

Ankylocheilia (an-kil-o-keil'e-ah) or **Ancylochei'lia** (*ankylo*, *cheilos*, lip). Adhesion or union of the lips.

Ankylocolpus, an-kil-o-kol'pus (*ankylo*, *kolpos*, vagina). Atresia of vagina or vulva.

Ankylocore, an-kil-o-ko'ra (*ankylo*, *kore*, pupil). Adhesion and occlusion of pupil.

Ankylodere (an-kil-od'er-a) or **Ankylod'eris** (*ankylo*, *dere*, neck). Wry neck.

Ankylodontia, an-kil-o-don'she-ah (*ankylo*, *odous*, tooth). Irregular position of teeth in jaws. Adhesion of teeth.

Ankyloglossia (an-kil-o-glos'se-ah) or **Ancyloglos'sia** (*ankylo*, *glossa*, tongue), impeded motion of tongue from adhesion between it and the gums, or shortness of frænum. Latter affection constitutes *Tongue-tie*, *Lingua frænata*, *Olophonia linguæ frenata*, merely requiring the frænum to be divided with scissors.

Ankyloglossotome, an-kil-o-glos'so-tome (*ankyloglossia*, tongue-tie, *tome*, incision). Instrument used in operation for tongue-tie.

Ankylomele (an-kil-o-me'le) or **Ancylome'le** (*ankylo*, *mele*, probe). Curved probe; adhesion of limbs (*melos*, limb).

Ankylomerismus (an-kil-o-mer-is'mus) or **Ancylomeris'mus** (*ankylo*, *meros*, a part). Morbid adhesion between parts.

Ankylopodia, an-kil-o-pod'e-ah (*ankylo*, *pous*, foot). Ankylosis of foot at ankle-joint.

Ankyloproctia (an-kil-o-prok'she-ah) or **Ankyloprocton**, an-kil-o-prok'ton (*ankylo*, *proctos*, anus). Stricture of anus or rectum.

Ankylops, an'kil-ops (*anchi*, near, *ops*, eye). Ægilops.

Ankylorrhinia (an-kil-or-rhin'e-ah) or **Ancylorrhin'ia** (*ankylo*, *rhis*, nose). Morbid union of parietes of nose.

Ankylosed, an'kil-ozed. See *Ankylosis.*

Ankylosis (an-kil-o'sis), **Ancylo'sis**, or **Anchylo'sis** (*ankylo*, *osis*). Stiff joint. An affection in which there is great difficulty or even impossibility of moving a diarthrodial articulation. Morbid adhesion of articulating surfaces. It is so called because the limb commonly remains constantly flexed. Joint thus affected is *Ankylosed.* Ankylosis is complete or true when there is intimate adhesion between synovial surfaces, with union of articular extremities of bones. In incomplete or false ankylosis there is obscure motion, but fibrous parts around the joint are more or less stiff and thickened. In this last state the joint must be gently and gradually exercised, and oily relaxing applications assiduously employed. **A., Bar'ton's opera'tion for**, see *Barton.* **A., cap'sular**, stiffness of joint from morbid change in capsular ligament. **A., false**, see *Ankylosis.* **A., mus'cular**, stiffness due to contracted muscles. **A. spu'ria**, rigidity of the joints.

Ankylostomiasis, an-kil-o-stom-e'as-is (*ankylo*, *stoma*, mouth). Morbid condition from presence of ankylostomum duodenale, observed in miners—hence called *miner's anæmia*—and workers in tunnels, attended with morbid heart-sounds, dropsy, and deficiency of white corpuscles in the blood.

Ankylostomo-anæmia, an-kil-os'to-mo-an-e'me-ah. Ankylostomiasis.

Ankylostomum duodenale, an-kil-os'to-mum du-o-den-al'e. Parasitic worm in upper portions of human intestine, causing fatal anæmia.

Ankylotia (an-kil-o'she-ah) or **Ancylo'tia** (*ankylo*, *ous*, the ear). Morbid union of parietes of the ear.

Ankylotic, an-kil-ot'ik. Causing ankylosis.

Ankylotome, ank'il-o-tome. Instrument for dividing adhesions in ankylosis of various kinds.

Ankylotomus (an-kil-ot'o-mus) or **Ancylot'omus** (*ankylo, tome,* incision). Any kind of curved knife; instrument for dividing frænum linguæ.

Ankylurethria, an-kil-u-ra'thre-ah. Stricture or atresia of urethra.

Ankyra, an'kir-ah (*anchura,* hook). Hook for surgical or anatomical uses.

Ankyrism, an'kir-izm. Operation of hooking bones together by suture; articulation of bones by hooking together, as palatine process and upper jaw.

Ankyroid, an'kir-oid (*anchura,* hook, *eidos,* shape). Posterior prolongation or horn of lateral ventricle.

Annectant (connecting) (an-nek'tant) **convolu'tions.** Small cerebral convolutions acting as bridges between larger ones.

Anneslea grandiflora, an-nes-le'ah grand-e-flo'rah. Mucilaginous and astringent shrub of Mexico, used in diarrhœa and dysentery and bronchial affections.

Annexa, an-neks'ah (*annecto,* to annex). Appendages.

Anni (an'ne) **climacter'ici.** See *Climacteric.* **A. crit'ici,** or **decreto'rii,** or **fata'les,** or **genethli'aci,** or **grada'rii,** or **hebdomad'ici,** or **hero'ici,** or **natalit'ii,** or **scala'res,** or **scan'siles,** climacteric years.

Annidalin, an-nid'al-in. Aristol.

Annihilation, an-ni-hil-a'shun (*ad, nihil,* nothing). Extinction of strength; excessive fatigue, debility, or syncope.

Annotatio, an-no-tah'she-o. Preludes to attack of intermittent fever, as yawning, stretching, somnolency, chilliness, etc.

Annotto, an-not'to. See *Terra orleana.*

An'nual diseases. Diseases recurring every year about the same period. *Febris annua* is a fancied intermittent of this type.

Annuens, an'nu-ens (nodding). Rectus capitis internus minor muscle.

Annuitio, an-nu-ish'e-o (*an, nutus,* nod). Nodding; gesture denoting assent in most countries. State of somnolency in which power of volition over the extensor muscles of the head is lost, and the head drops forward.

Annular, an'nu-lar (*annulus,* ring). Relating to a ring or having shape or functions of a ring. **A. bone,** scroll-shaped bone, affording attachment to membrana tympani, part of temporal bone in adult. **A. car'tilage,** cricoid cartilage. **A. constric'tion,** nodes of Ranvier, being constriction in course of medullated nerve-fibres. **A. fing'er,** ring finger; fourth finger, so called from wedding-ring being worn thereon; see *Digitus.* Of old it was believed that there is a vein of direct communication between the ring finger and the heart. **A. gan'glion,** see *Ciliary ganglion.* **A. lig'ament,** transverse ligament, crucial ligament; strong ligamentous band, arching across area of ring of atlas from rough tubercle upon inner surface of one articular process to similar tubercle on the other. It retains odontoid process of axis in connection with anterior arch of atlas. **A. lig'ament of ra'dius,** strong fibro-cartilaginous band, forming, with lesser sigmoid cavity of cubitus, a kind of ring, in which head of radius turns with facility. **A. lig'ament of sta'pes,** ligament uniting stapes to edge of fenestra ovalis. **A. lig'aments of the car'pus** are two in number. One, *anterior,* is a broad, fibrous quadrilateral band, extending transversely before the carpus, and forming gutter, made by the wrist into a canal; it keeps tendons of flexor muscles, median nerve, etc. applied against the carpus. The *posterior* ligament is situate transversely behind the joint of the hand, and covers the sheaths of tendons passing to the back of the hand. Its fibres are white and shining, and are attached externally to inferior and outer part of radius, internally to ulna and os pisiforme. **A. lig'aments of the tar'sus** are two in number. *Anterior* is quadrilateral, and extends transversely above the instep, and embraces the tendons of the extensor muscles of the toes, the tibialis anticus and peroneus anticus. The *internal* is broader than the last, descends from the malleolus internus to the posterior and inner part of the os calcis, with which it forms a kind of canal, enclosing sheaths of tendons of the tibialis posticus, flexor longus digitorum pedis, and f. longus pollicis pedis, as well as plantar vessels and nerves. **A. mus'cle of Mül'ler,** name given to bundles of circular fibres on anterior side and anterior and internal angles of ciliary muscle. **A. myeli'tis,** inflammation of whole circumference of spinal cord. **A. pro'cess** or **protu'berance,** pons Varolii. **A. vein** is situate between the annular finger and the little finger. Older physicians recommended it to be opened in diseases of the spleen.

Annularis, an-nu-lar'is. Annular; ring finger; cricoid. **A. a'ni,** sphincter ani.

Annuli cartilaginei, an'nu-le kar-til-aj-in'a-e. Rings of trachea and bronchial tubes. **A. cartilagino'si trache'æ,** rings of trachea. **A. fibro-cartilagin'ei,** fibro-cartilaginous or festooned rings; tough tendinous tracts in the heart, two of which, anterior, are situate on right and left of aortal opening; and one posterior, which runs backward from aorta to border of auriculo-ventricular septum, where it splits into two slender crura. **A. of Böttcher,** edge of lamina reticularis around head-plates of rods of Corti in internal ear

Annulus, an'nu-lus. Ring. See *Dactylius, Vulva.* **A. abdomina'lis exte'rior,** inguinal ring. **A. abdomina'lis inte'rior,** see *Inguinal canal.* **A. abdom'inis,** inguinal ring. **A. al'bidus,** ciliary muscle. **A. arthrit'icus,** infiltration of conjunctival border in elderly persons **A. cartilagin'eus,** fibrous ring connecting membrana tympani with tympanic plate. **A. cellulo'sus,** ciliary ligament. **A. cilia'ris,** ciliary ligament. **A. conjuncti'væ,** slight circular swelling formed by sclerotic conjunctiva at edge of cornea, especially in old people; extending a little over the cornea, particularly at its upper margin. **A. crura'lis,** crural ring. **A. crura'lis exter'nus,** saphenous opening. **A. er'rans,** A. migrans. **A. fibro'sus,** fibrous portion of intervertebral cartilage; ring around auriculo-ventricular valves; ring of fibrous membrane connecting membrana tympani with tympanic plate. **A. fos'sæ ova'lis,** see *Ovalis fossa.* **A. ganglifor'mis,** ciliary ligament. **A. inguina'lis profun'dus,** internal abdominal ring. **A. inguina'lis superfi'cia'lis,** external abdominal ring. **A. interauricula'ris,** ring between the auricles. **A. i'ridis,** ring of iris. **A. ligamento'sus,** ligaments of pubes. **A. membra'næ tym'pani,** tympanic plate. **A. mi'grans,** eruptive disease of tongue, like trichophytosis. **A. os'seus,** tympanic plate. **A. ova'lis,** margin of fossa ovalis, in right auricle. **A. proces'sus,** pons Varolii. **A. re'pens,** herpes circinatus, trichophytosis. **A. seni'lis,** arcus senilis. **A. tendino'sus,** A. cartilagineus. **A. tympan'icus,** tympanic plate. **A. umbilica'lis,** umbilical ring. **A. valvulo'sus,** ring made by union of bases of tricuspid valves of heart. **A. ventric'uli,** pylorus. **A. Vieusse'nii,** A. ovalis.

A'no (*ano*). A prefix denoting above, up; also anus; see *Ano-spinal, Ano-vesical,* etc.

Anocavernosus, an-o-kav-er-no'sus. Accelerator urinæ.

Anocheilon, a-no-keil'on (*ano, cheilos,* lip). Upper lip. One who has large upper lip.

Anocheiloschisis, an-o-kiel-os'kis-is (*ano, cheilos,* upper lip, *schisis,* cleaving). Fissure of upper lip, as in hare-lip or operation for its relief.

Anochilus, an-o-ke'los. Anocheilon.

Ano-coccygeal, an-o-kok-se-je'al. Relating to anus and coccyx, as ano-coccygeal nerve, from coccygeal plexus. **A.-c. raphe,** fibrous septum from anus to coccyx, etc.

Anocœlia, an-o-se'le-ah (*ano, koilia,* belly). Stomach.

Anocœliadel'phus. Cœliadelphus.

Anodal, an'o-dal. Relating to anode.

Anode, an'ode (*ano, hodos,* way). Positive electrode, point at which electrical current leaves the battery.

Anodia, an-o'de-ah (*an, ode,* song). Unconnected, dissonant mode of speech.

Anodic, an-od'ik. Relating to anode. Tending up-

ward. Epithet applied to ascending course of nervous action.

Anodinia, an-o-din'e-ah (*an, odin*, labor-pain). Absence of labor-pains.

Anodmia, an-od'me-ah (*an, odme*, smell). Anosmia.

Anodontia, an-o-don'she-ah (*an, odous*, tooth). Absence of teeth.

Anodus, an'o-dus (same etymon). Without teeth.

Anodyne, an'o-dine (*an, odune*, pain). Medicine which relieves pain, as opium, belladonna, etc.; acting by blunting the sensibility of the encephalon. The following anodynes are used; they are either local or general (Brunton):

Local Anodynes.	General Anodynes.
Cold—	Anæsthetics in small doses.
Cold water.	Atropine.
Ice-bags.	Belladonna.
Warmth—	Butyl-chloral.
Poultices.	Chloral.
Fomentations.	Conium.
Aconite.	Coniïne.
Acupuncture.	Gelsemium.
Atropine.	Hyoscyamus.
Belladonna.	Hyoscyamine.
Blood-letting—	Lupulus.
Leeches.	Lupulin.
Cupping.	Morphine.
Carbolic acid.	Opium.
Carbonic acid.	Stramonium.
Cocaine.	
Conium.	
Creasote.	
Gelsemium.	
Hydrocyanic acid.	
Morphine.	
Opium.	
Veratrine.	

A., Hoffman's, spiritus ætheris compositus.

Anodynia, an-o-din'e-ah (same etymon). Cessation or absence of pain.

Anodynum, an-od'in-um. Anodyne. **A. hypnot'icum**, hypnotic.

Anœa, an-e'ah (*a, noos*, mind). Delirium, imbecility. See *Dementia* and *Idiotism*.

Anoësia (an-o-a'se-ah) or **Anœ'tia**. Dementia. **A. adstric'ta**, melancholy.

Anoia, ah-noi'ah. Anœa.

Anoma'lia. Anomaly. **A. nervo'rum**, nervous diathesis.

Anomalocephalous, an-om-a-lo-sef'a-lus. Having irregularly shaped head.

Anomalologia, an-om-al-o-loj'e-ah (*anomalos*, irregular, *logos*, description). Description of anomalies.

Anomalot'rophies (*anomalos*, irregular, *trophe*, nourishment). Class of diseases consisting in modifications of nutrition of organs.

Anomalous, an-om'a-lus (same etymon as *Anomaly*). Irregular; contrary to rule. Affections are called anomalous which cannot be referred to any known species. See *Irregular*. **A. glands**, glands not having any outlet. **A. mus'cle**, slender muscle lying upon the superior maxillary bone beneath the levator labii superioris alæque nasi.

Anomaly, an-om'al-e (*a*, priv., *nomos*, rule). Abnormality, abnormity, anomaly, irregularity. Exception to usual rule; deviation from specific type. Something unusual in symptoms or in morbid appearances proper to disease.

Anommatus, an-om'mat-us (*an, omma*, eye). Anophthalmus.

Anomocephalus, ah-no-mo-sef'al-us (*a, nomos*, rule, *kephale*, head). One whose head is deformed.

Anomous, an-o'mus (*an, omos*, shoulder). Devoid of shoulders.

Anomphalous, an-om'fal-us (*an, omphalos*, navel). One devoid of navel. Writers have endeavored to show that Adam and Eve must have been anomphalous, as they could not have had umbilical vessels.

Anona (an'o-nah) **cherimo'lia**. Cherimoya; grows in Peru and Mexico; seeds used as emetic and cathartic. **A. murica'ta**, tree growing in tropical countries, whose unripe fruit is used as astringent in diarrhœa, dysentery, etc. **A. reticula'ta**, custard-apple; indigenous in West Indies; astringent. **A. squamo'sa**, sweet-sop tree; grows in Malay Islands and tropical America; astringent. **A. tril'oba**, see *Carica popaya*. **A. tripet'ala**, tree of family Anonaceæ, of South America, bearing delicious fruit called *cherimoya*.

Anonis, an-o'nis. Ononis.

Anonychia, an-o-nik'e-a (*an, onux*, nail). Absence of nails, a rare congenital defect.

Anonymous, an-on'im-us (*an, onoma*, name). Having no name. Applied to many parts, as anonymous bone, os innominatum, foramen innominatum, etc.

Anoöpsia, an-o-op'se-ah (*ano*, upward, *ops*, eye). Strabismus in upward direction.

Anophthalmia, an-of-thal'me-ah. See *Anophthalmos*. **A. cyclop'ica**, condition of a cyclocephalus in which there is very imperfect development of the socket of the eye and a rudimentary or entirely absent orbit.

Anophthalmus, an-of-thal'mus (*an, ophthalmos*, eye). One devoid of eyes. Condition is *Anophthal'mia*.

Anopia (an-o'pe-ah) (*an, opsis*, vision). Monstrosity in which eye and orbit are wanting. Blindness.

Anopsia, an-op'se-ah (*an, ops*, eye). Loss of sight; temporary disuse of eye from abnormal condition of physical apparatus, media, etc. Anopia.

Anopsy, an-op'se. Anopsia.

Anorchi (an-or'ke) or **Anorchides**, an-or'kid-es (pl. of **Anorchis**) (*an, orchis*, testicle). Those who are without testicles. Condition is called *Anorchism, Anorchidiosis, Anorchismus, Anorchia*. Person so affected is *Anor'chous*.

Anorchism, an-or'kizm. See *Anorchi*. **A., unilat'eral**, absence of one testicle; monorchia.

Anorchous or **Anorchus**, an-ork'us (*an, orchis*, testicle). Devoid of testes, or one in whom cryptorchidism exists.

Anorectus, an-o-rek'tus (*an, orexis*, appetite). Not having an appetite.

Anorexia, an-o-reks'e-ah (*an, orexis*, appetite). Anorexy; defect or absence of appetite, symptomatic of most diseases; indigestion, dyspepsia. **A. exhausto'rum**, frigidity of stomach. **A. mirab'ilis**, fasting.

An'orexy. Anorexia.

Anorganic, an-or-gan'ik. Devoid of organs or organization; see *Anhistous* and *Inorganic*.

Anormal, a-nor'mal. Abnormous.

Anorophous, an-o'rof-us (*an, orophe*, roof). Devoid of brain.

Anorrhorrhœa, an-or-rhor-rhe'ah (*a, orros*, serum, *rhoia*, flow). Defective secretion of serum.

Anorthic, an-or'thik (*an, orthos*, straight). Not straight; crooked.

Anorthopia, an-or-tho'pe-ah (*an, orthos*, upright, *opsis*, vision). Vision in which persons are unable to judge when objects are not parallel or symmetrical.

Anorthosis, an-or-tho'sis (*an, orthos*, upright). Absence of erectile power or erectility.

Anosia, ah-nos'e-ah (*a*, and *nosos*, disease) Freedom from disease.

Anosmia, an-oz'me-ah (*an, osme*, odor). Loss of smell; perversion of smell.

Anosmosia, an-oz-mo'ze-ah. Anosmia.

Anosphrasia (an-os-frah'zhe-ah) or **Anosphre'sia** (*an, osphrasia*, smell). Anosmia.

A'no-spi'nal. Relating to anus and spine. **A.-s. cen'tre**, nervous centre regulating process of defecation, situated in lumbar region.

Anostomous, an-os'to-mus (*ano*, upward, *stoma*, mouth). Having the mouth above the nose.

Anosto'sis (*an, osteon*, bone). Deficiency in bony matter or in bone structure; defective development of bone. **A. interstitia'lis**, atrophy of bone of old persons.

Anotus, an-o'tus (*an, ous*, ear). Monster having no ears.

A'no-ves'ical. Belonging to the anus and bladder.

Anoxæmia (an-oks-e'me-ah) or **Anoxyhæmia**, an-oks-e-he'me-ah (*an, oxus*, acid). Deficiency of oxygen in the blood.

Ansa. Anse. Handle of certain vessels; by analogy applied to that which is curved in form of handle. **A. atlan'tis,** loop formed by branches of first and second cervical nerves. **A. cap'itis,** zygomatic process. **A. centrifuga'lis** and **A. centripeta'lis,** terms given to fibres of root of spinal nerve according to direction they take to or from centre. **A. cervica'lis,** loop formed by branches of cervical nerves. **A. coccyge'a,** A. sacralis. **A. hæmosta'tica,** loop used for acupressure. **A. Halleri,** communicating nerve between facial and glosso-pharyngeal. **A. Henlii,** portion of uriniferous tubule. **A. hypoglos'si,** communication between hypoglossal nerve and second and third cervical nerves. **A. intergenicula'ris,** band of fibres connecting geniculate bodies. **A. intestina'lis,** loop or portion of intestine supported by mesentery and describing curved line. *Ansa.* **A. lenticula'ris** or **lentifor'mis,** loop of fibres passing outward beneath the thalamus and entering the lenticular nucleus. **A. lumba'lis,** loop formed by branches of lumbar nerves. **A. peduncula'ris,** substantia innominata. **A. Reil'ei,** lemniscus. **A. sacra'lis,** loop between sacral nerves. **A. subclavia'lis,** see *Ansæ Vieussenii.* **A. Wrisber'gii,** loop of communication between right sympathetic and pneumogastric; loop between phrenic and descendens noni branch of hypoglossal.

Ansæ Vieussenii, an'se ve-u-sen'e-e. Nervous branches passing from lower cervical ganglion of great sympathetic to first dorsal ganglion in front of subclavian artery, forming loops around the vessel called after Vieussens, and supplying it with offsets.

Ansatus, an-sat'us. Looped like nervous fibres; pediculated.

Anse. Ansa.

Anserina, an-sur-e'nah (*anser,* goose). Potentilla anserina; chenopodium.

Anserine (an'ser-ene) **disease.** Condition in which there exists emaciation of the extremities, with marked projection of the tendons.

Ant acid. Formic acid.

Antacids (ant-as'ids) or **Antiäc'ids.** Remedies which diminish or counteract acidity in the stomach, intestines, or urine; they are chemical agents, and act by neutralizing the acid. Those acting directly on the stomach, diminishing acidity in that organ, are liquor potassæ, potassium carbonate and bicarbonate, liquor sodæ, sodium carbonate and bicarbonate, lithium carbonate and bicarbonate, magnesia, magnesium carbonate and bicarbonate, lime-water, saccharated solution of lime, chalk, ammonium carbonate, and aromatic spirit of ammonia. Those acting remotely on the urine, diminishing its acidity, are potassium acetate, citrate, tartrate, and bitartrate, sodium acetate and citrate, tartarated soda, and lithium citrate.

Antacrid, ant'ak-rid. Opposed to acridity.

Antagonism, an-tag'o-nizm (*anti, agonizomai,* to strive). Action in opposite direction, as of muscles acting in contrary directions. There is antagonism between action of different remedial agents. For example: opium contracts the pupil, belladonna dilates it; one drug will frequently be an antidote to the poisonous effects of its antagonist. The alkaloids of tea, coffee, and allied substances, as theine, caffeine, cocaine, and guaranine, are antagonistic to morphine; chloral and strychine are mutually antagonistic. The idea of such antagonism was known in the Middle Ages, but has been elaborated by recent experimentation. In addition to facts already stated, the antagonistic action of drugs upon the heart has been carefully studied. Atropine is found to antagonize those drugs which inhibit the heart and slow its action, as pilocarpine, muscarine, physostigma, etc. This antagonism is well shown by observation of other drugs, for when the action of the heart is checked by digitalis, aconite and muscarine will restore its pulsations. The antagonism of drugs does not seem to rest on any explanation of chemical reaction, but rather on opposing physiological actions or opposites. The following list exhibits the most striking illustrations of antagonism (Brunton):

Drug.	Antagonist.
Aconitine	Atropine, Digitalin, Strychnine.
Alcohol	Strychnine.
Ammonium chloride	Chloral.
Atropine	Aconitine, Bromal hydrate, Chloral hydrate, Hydrocyanic acid, Jaborandi, Muscarine, Morphine, Physostigmine, Phytolacca, Pilocarpine, Quinine.
Barium	Sodium sulphate, Potassium salts.
Bromal hydrate	Atropine.
Brucine, Calabarine, Carbolic acid	Chloral.
Chloral	Ammonium chloride, Atropine, Brucine, Calabarine, Carbolic acid, Codeine, Physostigma, Picrotoxine, Strychnine, Thebaine.
Chloroform	Amyl nitrite.
Cocaine	Morphine.
Codeine	Chloral.
Digitalin	Aconitine, Muscarine, Saponin.
Gelsemium	Opium, Atropine.
Morphine	Atropine, Caffeine, Chloroform, Cocaine, Daturine, Hyoscyamine, Nicotine, Physostigma.
Muscarine	Atropine.
Opium	Atropine, Gelsemium, Veratrum viride.
Physostigma	Atropine, Chloral, Morphine.
Saponin	Digitalin.
Strychnine	Alcohol, Chloral, Hydrocyanic acid, Nicotine, Nitrite of amyl.
Thebaine	Chloral.

Antagonist, an-tag'o-nist. Muscle whose action produces effect contrary to that of another muscle, as flexors and extensors; every muscle has its antagonist. Some drugs are antagonists to others.

Antalgic, ant-al'jik (*anti, algos,* pain). Anodyne.

Antalkaline, ant-al'kal-ine. Neutralizing alkalies, as acids.

Antanacathartic, ant-an-ah-kath-art'ik (*anti, anacatharsis,* expectoration). Agents that check expectoration.

Antanaclastic, ant-an-ah-klas'tik (*antanaklasis,* reflection). Reflecting light.

Antaphrodisiac (ant-af-ro-diz'e-ak), **Antaphrodit'ic,** or **Anaphrodis'iac** (*anti, aphrodisiakos,* aphrodisiac). Substance blunting the venereal appetite.

Antapodosis, ant-ah-pod'o-sis (*antapodidomi,* to return in exchange). Succession and return of febrile periods.

Antapoplectic, ant-ap-o-plek'tik. Relieving apoplexy.

Antarthritic, ant-ar-thrit'ik. Relieving arthritis or gout.

Antasthenic, ant-as-then'ik (*anti, asthenia,* debility). Tonic.

Antasthmatic, ant-asth-mat'ik. Relieving asthma.

Antatrophic, ant-ah-trof'ik (*anti, atrophia,* atrophy). Remedy opposed to atrophy or consumption.

Ante, an'te (L.). Before; as a prefix, before, fore.

Ante par'tum. Before delivery, as ante-partum hemorrhage.

Antebrachial, an-te-brak'e-al (*ante,* before, *brachium,* arm). Relating to the forearm.

Antebrachium, an-te-brak'e-um. Forearm.

Antecedents, an-te-se'dents (*ante, cedo,* to go). Precursory or warning symptoms or history of disease.

Antecurv'ature. Curving forward, as in anteflexion.

Anteflexion (an-te-fleks'shun) or **Anteflexure,** an-te-fleks'ure (*ante, flecto,* to bend). Bending forward, as of the uterus. **A. of the uterus,** bending of that organ so that the fundus, the cervix, or both, are bent more or less sharply forward. The cervix may be normal in position and the body of the uterus flexed, or the body normal and the cervix flexed, or both cervix and body flexed forward. See *Anteversion.*

Antehe'lix. Anthelix.

Antelabia, an-te-lab'e-ah (*ante,* before, *labia,* lips). Extremity of the lips. See *Procheilon* and *Prolabia.*

Antelmintic, an-tel-min'tik. Anthelmintic.

Antelope, an'te-lope. Antilopus.

Antemballomenum, ant-em-bal-lom'en-um (*antemballo,* to substitute). Remedy that is used to substitute another.

Antembasis, an-tem'bas-is (*anti, embaino,* to enter). Mutual reception of bones.

Antemetic, ant-e-met'ik. Antiemetic.

Antendeixis (ant-en-dyks'is) or **Antendixis,** ant-en-diks'is (*anti, endeixis,* indication). Counterindication.

Anteneasmus, ant-en-e-as'mus (*anti, teino,* to extend or stretch). One furious against himself. Suicidal mania.

Antennaria dioica, an-ten-nah're-ah de-oi'kah. Genus of *Diœcia, Everlasting, Catsfoot,* ord. Compositæ; common European plant used in hemorrhage, cough, diarrhœa, etc. **A. margarita'cea,** Gnaphalium, margaritaceum. **A. plantaginifo'lia,** *Plantain, Life everlasting, Cudweed,* has similar properties to A. dioica.

Antephialtic, ant-ef-i-al'tik (*anti, ephialtes,* nightmare). Remedy for nightmare.

Antepileptic, ant-ep-e-lep'tik. Antiepileptic.

Anteponens, an-te-po'nens (*ante, pono,* to place). Anticipating.

Anteprostatic, an-te-pros-tat'ik. In front of the prostate, as anteprostatic gland, an accessory gland occupying position stated.

Antereisis, ant-er-eis'is (*anti, ereido,* to support). Resistance or solidity of bones.

Anterethic, an-ter-eth'ik (*anti,* against, *eretho,* to irritate). Soothing or calming.

Anterior, an-te're-or (*ante,* before). Situate before. Generally, anterior is applied to parts situate before the median line, body being in erect posture, with face and palms of hands turned forward, and feet applied longitudinally together. (The term *anterior* is applied to numerous arteries, veins, muscles, nerves, regions, etc., all of which will be found under the appropriate alphabetical head.) **A. aur'is** (muscle) or **auric'ulæ,** small muscle passing from posterior part of zygoma to helix, which draws the ear forward and upward. **A. chamber of eye,** see *Eye.* **A. elas'tic lam'ina,** Bowman's layer of the cornea. **A. fon'tanelle,** space in skull of fœtus between frontal and parietal bones. **A. mal'let,** laxator tympani. **A. na'si,** pyramidalis nasi. **A. poliomyeli'tis,** inflammation of anterior cornua of spinal cord.

An'tero-lat'eral col'umns. See *Spinal cord.*

An'tero-pari'etal a'rea. See *Area.*

Anterotic, an-te-rot'ik (*anti, eros,* love). Antaphrodisiac.

Antesternum, an-te-stur'num. First segment of the sternum, the manubrium.

Anteuphorbium, an-tu-forb'e-um. Cacalia anteuphorbium.

Ante-uterine, an'te-u'ter-in. In front of uterus.

Anteversion, an-te-ver'shun (*ante, verto,* to turn). Displacement or turning forward. In *anteversion of the uterus* the fundus is turned toward the symphysis pubis, while the orifice is toward the sacrum.

Anthæmoptyicus, ant-he-mop-te'ik-us (*anti, hæmoptysis*). Against spitting of blood; remedy for spitting of blood.

Anthæmorrhagic, ant-hem-or-rhaj'ik. Antihemorrhagic.

Anthectic, ant-hek'tik. Antihectic.

Anthelitragus (ant-hel-it'rag-us) or **Anthelitragicus,** ant-hel-it-raj'ik-us. Antitragicus muscle, one of the proper muscles of pavilion of ear.

Anthelix, ant'he-liks. Eminence on cartilage of ear, in front of helix, and extending from concha to groove of helix, where it bifurcates. Antitragicus muscle.

Anthelmia, an-thel'me-ah (*anti, helmins,* worm). Spigelia Marylandica, so called from its action on worms.

Anthelmintic, an-thel-min'tik (*anti, helmins,* worm). Vermifuge; remedy which destroys or expels worms, or prevents their formation and development. Anthelmintics are *mechanical* and *true.* To the former belong emetics, cathartics, mucuna, etc.; to the latter, oleum terebinthinæ, Chenopodium anthelminticum, spigelia, filix mas, etc. The great object is to prevent generation of the worms by nutritious diet, fresh air, tonics, etc. An anthelmintic that destroys worms is properly a *vermicide;* one that expels them, dead or alive, a *vermifuge.*

The principal vermicides are:

1. For thread-worms:
   local injections of alum, tannic acid,
   iron, catechu,
   quassia, kino,
   lime-water, rhatany,
   eucalyptol, hæmatoxylon.
   sodium chloride,
2. For round-worms:
   santonin, santonica.
3. For tape-worms:
   areca-nut, pomegranate,
   filix mas, pelletierine,
   kamala, turpentine,
   kousso, chloroform.

The chief vermifuges are castor-oil, scammony, rhubarb, with ammonium chloride, bitter tonics, etc. as adjuncts in the treatment. See *Worms* and *Parasites.*

Anthema, an-the'mah. Exanthem. **A. arbo'rea,** species of malvaceous plants, flowers and leaves of which are demulcent.

Anthemidis flores, an-them'i-dis flo'res. Flowers of Anthemis nobilis.

Anthemis, an'them-is (*antheo,* to flower). Anthemis nobilis. **A. Arven'sis,** sometimes used to adulterate more important varieties of Anthemia. **A. cot'ula,** *Mayflower, Mayweed, Stinking chamomile, Wild chamomile, Dog's fennel, Dilly, Dilweed, Field-weed, Pissweed,* ord. Compositæ. This plant, cotula, of very disagreeable smell and taste, has been used in hysterical affections. **A. fœt'ida,** A. cotula. **A. no'bilis,** *Chamomile.* Leaves and flowers have strong smell, and bitter, nauseous taste. Flowers are chiefly used; they possess tonic and stomachic properties, and are a pleasant and cheap bitter. A simple infusion is taken to produce, or assist, vomiting. Externally, they are used in fomentations. *Oil of chamomile, Oleum anthemidis,* possesses the aromatic but not the bitter and tonic properties of the plant. **A. noveboracen'sis,** A. cotula. **A. odora'ta,** A. cotula. **A. pyr'ethrum,** *Spanish chamomile, Pellitory of Spain.* The root, pyrethrum, hot and acrid, is used as masticatory in toothache, rheumatism of face, paralysis of tongue, etc., and as a sialagogue. Pellitory of the shops in Germany is derived from Anacyclus officinarum, cultivated in Thuringia for medicinal purposes. Flowers of Pyrethrum carneum and P. roseum, growing on the Caucasian mountains, form Caucasian or Persian insect powder, fatal to insects. **A. tincto'ria,** *Dyer's chamomile,* European plant, of bitter and astringent taste; stomachic. **A. vulga'ris,** Matricaria chamomilla; A. nobilis.

Anthera, an-tha'rah (*antheros,* florid). Remedy

compounded of several substances—myrrh, sandarac, alum, saffron, etc.—used as liniment, collyrium, etc.

Anthereon, an-tha'ra-on. Chin.

Anthiarin, an-the'a-rin. Antiarin.

Anthiaris toxicaria, an-the'a-ris tok-se-kar'e-ah. Upas tree.

Anthidrotic, ant-hid-rot'ik (*anti, hidrosis,* sweat). Diminishing or checking secretion of sweat; see *Antihydrotic.*

Anthocoma, an-tho-ko'mah. Anthrax.

Antholce, an-thol'se (*anthelko,* to pull in opposite direction). Act of drawing a body or organ to one side or out of place, as after paralysis.

Anthomyia canicularis, an-tho-me'yah kan-ik-u-lar'is. See *Parasites.*

An'thony's fire. Erysipelas.

Anthora, an'tho-rah. Aconitum anthora. **A. vulga'ris,** Aconitum anthora.

Anthorisma, an-tho-riz'mah (*anti, horisma,* boundary). Tumor without defined margin.

Anthos, an'thos (flower). See *Rosmarinus.* **A. sylves'tris,** Ledum sylvestre.

Anthoxanthin, an-thoks-an'thin. Yellow coloring-matter found in yellow flowers and several fruits.

Anthoxanthum odoratum, an-thoks-an'thum o-dor-at'um. Sweet vernal grass, used in hay fever.

Anthracene, an'thrah-seen. Result of distillation of coal-tar; used in pruritus.

Anthracia, an-thrah'she-ah (*anthrax,* coal). Carbuncular exanthem. Eruption of tumors imperfectly suppurating, with indurated edges and sordid and sanious core. Dark menstrual blood. Anthracosis. **A. pes'tis,** plague. **A. ru'bula,** frambœsia.

Anthraciform, an-thrah'se-form. Anthracoid.

Anthracina, an-thrah-se'nah. Melanotic cancer.

Anthracine, anth'rah-seen. Poisonous alkaloid obtained by culture of anthrax bacillus in alkaline albuminate from blood-serum.

Anthracœmia, an-thrah-ce'me-ah. Wool-sorter's disease, due to existence in blood of Bacillus anthracis.

Anthracoid, an'thrah-koid (*anthrax,* coal, *eidos,* resemblance). Black as coal. Accompanied by, or resembling, anthrax.

Anthracokali, an-thrah-kok'al-e. Anthrakokali.

Anthracolœmus, an-thrah-ko-le'mus (*anthrax, loimos,* plague). Contagious form of anthrax.

Anthracoma, an-thrah-ko'mah. Anthrax, carbuncle.

Anthracometer, an-thra-kom'e-tur (*anthrax,* carbon, *metron,* measure). Instrument for measuring the amount of carbonic acid in the atmosphere and in the breath. The process is *Anthracom'etry.*

Anthraconecrosis, an-thrah-ko-ne-kro'sis (*nekros,* corpse). Transformation into carbonaceous mass, as in gangrene of old people. See *Sphacelus.*

Anthracophlyctis, an-thrah-ko-flik'tis (*phluctis,* phlyctæna). Malignant pustule; anthrax.

Anthracosia, an-thrah-ko'ze-ah. Anthrax.

Anthracosis, an-thrah-ko'sis. Species of carbuncle attacking eyelids and globe of eye. Carbuncle of any kind. Also, black lung of coal-miners, induced by carbonaceous accumulation in the lungs; pseudomelanotic formation. When ulceration results from it, black phthisis, coal-miner's phthisis, exists. See *Melanosis.* **A. pulmo'num,** see *Melanosis.*

Anthracotyphus, an-thrah-ko-ty'fus (*anthrax, typhus*). Plague. Typhus complicated with carbuncles.

Anthrakokali, an-thrah-kok'al-e (*anthrax,* coal, *kali,* potassa). Remedy for cutaneous diseases, formed by dissolving potassium carbonate in boiling water and adding slaked lime; filtered liquor is then evaporated, and levigated coal added, and mixture stirred until a black homogeneous powder results.

Anthrakosis, an-thrah-ko'sis. Anthracosis.

Anthrarobin, an-thrah-ro'bin. Desoxyalizarin. Phenol derivative; product of reduction of alizarin and purpurin, receiving name from similarity of composition to chrysarobin; yellowish-white powder, insoluble in water. Anthrarobin has been used in psoriasis, pityriasis, herpes and other skin diseases.

Anthrax, an'thraks (coal). Carbuncle. Inflammation, essentially gangrenous, of cellular membrane and skin, attended with sloughing, in animals, especially sheep and cattle, and occasionally in man, usually from absorption of the virus. It sometimes prevails epidemically, when it has received the names *Contagious* or *Malignant anthrax, Cacanthrax, Anthracion, Vesicula gangrænescens, Anthracophlyctis, Pustula maligna, Malignant vesicle,* and is characterized at the outset by vesication or bleb filled with sero-sanguinolent fluid, under which small induration is formed, surrounded by areolar inflammation, which becomes gangrenous. It is caused by the presence in the blood of a distinct specific bacillus, *Bacillus anthracis,* similar in appearance to Bacillus subtilis found in hay infusions and that found in butyric fermentation. The spores of anthrax bacilli resist in an extraordinary way the action of certain substances which usually are fatal to life, as hydrochloric acid (2 per cent.), salicylic acid (1 per cent.), concentrated solutions of chloride of sodium, chloride of calcium, metallic solutions, borax, boric acid, chloride of potassium, benzoic acid, benzoate of sodium, cinnamic acid, and quinine (Brunton). In experiments on the development and growth of bacilli a difference was found between anthrax bacilli and other microzymes. A dilution of carbolic acid, 1 in 1250 and 1 in 850, sufficed to prevent the growth of anthrax bacilli, while a strength of 1 in 500 was required to prevent the growth of others. Other species are therefore more resistant than anthrax bacilli to the action of carbolic acid. See *Bacillus anthracis.*

The following table shows the strength of various disinfectants required to hinder or entirely prevent the development of anthrax bacilli (Brunton):

Solution.	Hinders.	Prevents.
Iodine	1 to 5,000	——
Bromine	1 to 1,500	——
Chlorine	1 to 1,500	——
Osmic acid	1 to 1,500	——
Permanganate of potassium	1 to 3,000	——
Corrosive sublimate	1 to 1,000,000	1 to 300,000
Allyl alcohol	1 to 167,000	——
Oil of mustard	1 to 330,000	1 to 33,000
Thymol	1 to 80,000	——
Peppermint-oil	1 to 33,000	——
Oil of turpentine	1 to 75,000	——
Oil of cloves	1 to 5,000	——
Arsenite of potassium	1 to 100,000	1 to 10,000
Chromic acid	1 to 10,000	1 to 5,000
Picric acid	1 to 10,000	——
Hydrocyanic acid	1 to 40,000	1 to 8,000

The following are of about the same strength as carbolic acid for the same purposes:

Fluid.	Hinders.	Prevents.
Boric acid	1 to 1,250	1 to 800
Borax	1 to 2,000	1 to 700
Hydrochloric acid	1 to 2,500	1 to 1,700
Salicylic acid	1 to 3,300	1 to 1,500
Benzoic acid	1 to 2,000	——
Camphor	1 to 2,500	——
Eucalyptol	1 to 2,500	——
Soft soap	1 to 500	1 to 5,000
Quinine	1 to 830	1 to 625
Hydrate of chloral	1 to 1,000	——
Chlorate of potassium	1 to 250	——
Acetic acid	1 to 250	——
Benzoate of sodium	1 to 200	——
Alcohol	1 to 100	1 to 12.5
Acetone	1 to 50 no action.	——
Chloride of sodium	1 to 64	——

In the internal or intestinal form of the disease the infection is through the stomach and intestines from eating the flesh or drinking the milk of diseased animals. See *Mycosis intestinalis.* Malignant anthrax is characterized by hemorrhages, dyspnœa, opisthotonos, prostration, etc., and has received different names, many of them from places where it has prevailed: *Carbunculus Gallicus, Hungaricus, Polonicus,* etc.

Anthrax al'bumoses. Alkaline albumoses from culture of anthrax bacillus in alkaline albuminate from blood-serum. **A., apoplec'tic,** splenic apoplexy of domestic animals. **A. carbun'culus,** carbuncle. **A. c. benig'nus,** affection between carbuncle and boil in its characteristics. **A., conta'gious,** see *Anthrax.* **A., furunc'ular,** circumscribed a. with boils. **A. intestina'lis,** carbuncular inflammation of intestines caused by

eating flesh similarly affected. **A., malig'nant**, see *Anthrax*. **A. œde'ma**, diffused œdematous or erysipelatous form. **A. pulmo'num**, necropneumonia. **A., symptomat'ic**, see *Purpura*.

Anthriscus, an-thris'kus. Cerefolium, Scandix cerefolium. **A. hu'milis**, Chærophyllum sylvestre. **A. proc'erus**, Chærophyllum sylvestre. **A. sylves'tris**, wild chervil. **A. vulga'ris**, narcotic poison; plant grows in Europe.

Anthrope, an-thro'pa. Skin (human).

Anthropepiphyte, an-thro-pep'if-ite (*anthropos*, man, *epiphuton*, growth). Growth on the skin; exanthem.

Anthropiatrica medicina, an-thro-pe-at'rik-ah med-e-se'nah (*anthropo*, *iatreia*, medicine). Medicine applied to man in contradistinction to other animals.

Anthropo, an-thro'po (*anthropos*, man). In composition, man.

Anthropochemia, an-thro-po-kem'e-ah. Chemistry of man.

Anthropocholic acid, an-thro-po-kol'ik as'id. Acid derived from human bile.

Anthropochymy, an-thro-pok'im-e. Chemistry of man.

Anthropoctomy, an-thro-pok'to-me (*anthropo*, *kteino*, to kill). Homicide.

Anthropogenesis (an-thro-po-jen'e-sis) or **Anthropogenia**, an-thro-po-jen'e-ah. Anthropogeny.

Anthropogeny, an-thro-poj'e-ne (*anthropo*, *genesis*, generation). *Geneanthropy*. Knowledge, or study, or phenomena of human generation; embryology.

Anthropography, an-thro-pog'ra-fe (*anthropo*, *graphe*, description). Anthropology; description of human body.

Anthropohistography, an-thro-po-his-tog'ra-fe (*anthropo*, *histos*, texture, *grapho*, to write). Description of various tissues of the body.

Anthropoid, an'thro-poid (*anthropo*, *eidos*, resemblance). Resembling man, as the ape.

Anthropolite (an-thro'pol-ite) or **Anthro'polith** (*anthropo*, *lithos*, stone). Petrification of the human body or its parts; morbid concretions in the human body.

Anthropological, an-thro-po-loj'ik-al. Relating or appertaining to anthropology.

Anthropology, an-thro-pol'o-je (*anthropo*, *logos*, discourse). Treatise on man; science of structure and functions of human body; frequently employed synonymously with natural history and physiology of man.

Anthropomagnetism, an-thro-po-mag'ne-tizm. See *Magnetism, animal*.

Anthropomancy, an-thro'po-man-se (*anthropo*, *manteia*, divination). Divination by inspecting entrails of a dead man.

Anthropometry, an-thro-pom'e-tre (*anthropo*, *metron*, measure). Measurement of weight, dimensions, etc. of different parts of the human body.

Anthropomorphography, an-thro-po-mor-fog'ra-fe (*anthropo*, *morphe*, shape, *grapho*, to write). Description of form of various organs of human body.

Anthropomorphology, an-thro-po-mor-fol'o-ge (*anthropo*, *morphe*, form, *logos*, discourse). Anatomy (descriptive). Treatise on human anatomy or on laws regulating the form of organs.

Anthropomorphus, an-thro-po-mor'fus (*anthropo*, *morphe*, shape). Resembling man in shape. Atropa mandragora.

Anthroponomy, an-thro-pon'o-me (*anthropo*, *nomos*, law). Knowledge of special laws presiding over functions of the human body; human physiology.

Anthroponosology, an-thro-po-no-zol'o-je (*anthropo*, *nosos*, disease, *logos*, description). Study or description of diseases of man.

Anthropophagus, an-thro-pof'ag-us (*anthropo*, *phago*, to eat). One who eats those of his own species; a cannibal.

Anthropophagy, an-thro-pof'a-je (same etymon). The custom of eating human flesh; cannibalism. A disease in which there is great desire to eat it.

Anthropophobia, an-thro-po-fo'be-ah (*anthropo*, *phobos*, fear). Dread of human society; love of solitude. It may imply existence of mental disease.

Anthropos, an-thro'pos. Man. See *Homo*.

Anthroposcopy, an-thro-pos'ko-pe. Physiognomy.

Anthroposomatology, an-thro-po-so-ma-tol'o-je (*anthropo*, *soma*, body, *logos*, discourse). Account or description of human body.

Anthropother'apy (*anthropo*, *therapeia*, treatment). Treatment of diseases of man.

Anthropotomy, an-thro-pot'o-me. Dissection of the human body. The dissector is called an *Anthropot'omist*.

Anthydrop'ic. Preventing or relieving dropsy.

Anthypnotic, ant-hip-not'ik (*anti*, *hupnos*, sleep). *Antihypnotic*, *Agrypnotic*. Remedy for stupor; anything that prevents sleep.

Anthypochondriac, ant-hip-o-kond're-ak. Remedy for hypochondriasis.

Anthysteric, ant-his-ter'ik. *Antihysteric*. Remedy for hysteria.

Anti, an'te (against). As prefix, generally means opposition.

Antiades, an-te'a-des. Tonsils.

Antiaditis, an-te-ad-e'tis (*antiades*, *itis*). Cynanche tonsillaris.

Antiadoncus, an-te-ad-on'kus (*anti*, *onkos*, tumor). Swelling of tonsils. **A. inflammato'rius**, cynanche tonsillaris.

Antiagra, an-te'ag-rah. Antiadoncus.

Antialbumate, an-te-al'bu-mate. Result of action of dilute muriatic acid on albumin; continued digestion converts it into *antialbumide*.

Antialbumide, an-te-al'bu-mide. Considered to form, with hemialbumin, albumin. It is itself formed when a weak acid, such as muriatic acid, is used in digesting albumin.

Antialbumin, an-te-al-bu'min. There exists in proteid molecule two substances preformed, *antialbumin* and *hemialbumin*. These are converted by the gastric juice into *antialbumose* and *hemialbumose*, as intermediate step to conversion into antipeptone and hemipeptone.

Antialgic, an-te-al'jik (*anti*, *algos*, pain). Relieving pain.

Antiaphrodisiac, an-te-af-ro-diz'e-ak. Anaphrodisiac.

Antiapoplectic, an-te-ap-o-plek'tik. A remedy for apoplexy.

Antiarin, an-te-ar'in. $C_{14}H_{20}O_5$. Crystallizable poisonous principle derived from Upas antior, East Indian and Javanese arrow poison. Antiarin paralyzes cardiac muscle and stimulates vaso-motor centres.

Antiaris toxicaria, an-te-ar'is toks-e-kah're-ah. Upas-tree; juice is powerful poison, used in skin diseases.

Antiarthritic (an-te-ar-thrit'ik) or **Antarthrit'ic** (*anti*, *arthritis*, gout). Remedy for gout.

An'tias. Tonsil.

Antiasthenic, an-te-as-then'ik (*anti*, *asthenia*, debility). Remedy for debility.

Antiasthmatic, an-te-asth-mat'ik (*anti*, *asthma*). Remedy for asthma.

Antiatrophic, an-te-a-trof'ik. Antatrophic.

Antibacterian, an-te-bak-te're-an. Anything that acts in opposition to formation or development of bacteria.

Antiballomenum, an-te-bal-lom'en-um (*antiballo*, to put in place of another). Succedaneum; one drug substituted for another.

Antibdella, an-ti-del'lah (*anti*, *bdella*, a leech). Antlia sanguisuga; artificial leech.

Antibechicus, an-te-bek'ik-us (*anti*, *bex*, cough). Expectorant checking cough.

Antibilious, an-te-bil'e-us. Checking secretion of bile; relieving biliousness.

Antibiotic, an-te-be-ot'ik (*anti*, *bios*, life). Destroying life.

Antibrachial, an-te-brak'e-al. Concerning the forearm; more properly written *antebrachial* (*ante*, before, *brachium*, arm), as *antebrachial region*, etc. **A. aponeuro'sis**, portion of aponeurotic sheath enveloping whole of upper limb. It covers muscles of fore-

arm, adheres to them, and sends between them fibrous septa, serving for points of insertion.

Antibrachium, an-te-brak'e-um. Forearm.

Antibromic, an-te-bro'mik (*anti, bromos,* fetor). Deodorizer or deodorant; agent that destroys offensive odors.

Anticachectic, an-te-kak-ek'tik. Remedy against cachexy or morbid constitutional tendency.

Anticacochymic, an-te-kak-o-kim'ik (*anti, kakos,* bad, *chumos,* juice). Anticachectic.

Anticalculous, an-te-kal'ku-lus. Antilithic.

Anticancerous, an-te-kan'se-rus. Anticarcinomatous, antiscirrhous. Opposed to cancer.

Anticancrosus, an-te-kan-kro'sus. Anticancerous.

Anticarcinomatous, an-te-kar-sin-om'at-us (*anti, karkinoma,* cancer). Opposed to cancer.

Anticardia (an-te-kar'de-ah) or **Anticardium,** an-te-kar'de-um (*anti, kardia,* heart). Pit of stomach, scrobiculus cordis.

Anticatarrhal, an-te-kat-ar'rhal. Remedy for catarrh.

Anticausodic (an-te-kaw-sod'ik) or **Anticausotic,** an-te-kaw-sot'ik (*anti, kausos,* burning fever). Remedy for inflammatory fever.

Anticaustic, an-te-kaws'tik. Destroying or relieving action of caustic.

Anticephalalgic, an-te-sef-al-al'jik (*anti, kephalalgia,* headache). Remedy against headache.

Anticheir, an'te-kire (*anti, cheir,* hand). Thumb.

Anticheirospasmus, an-te-ki-ro-spas'mus (*anticheir,* thumb, *spasmos,* spasm). Spasm of thumb.

Anticheirotetanus, an-te-ki-ro-tet'an-us). Spasmodic contraction of thumb, seen during epileptic attacks.

Antichir, an'te-ker. Thumb.

Antichlorotic, an-te-klo-rot'ik. Preventing or relieving chlorosis.

Antichœradic, an-te-ke-rad'ic (*anti, choiras,* scrofula). Antiscrofulous.

Anticholeric, an-te-kol'er-ik. Remedy against cholera or choleric disposition.

Anticholerica, an-te-kol-er'ik-ah. Sophora heptaphylla.

Anticipating, an-tis'ip-a-ting (*ante,* before, *capio,* to take). Epithet for periodical phenomenon recurring at progressively shorter intervals, as anticipating intermittent.

Anticlinal vertebra, an-te-kli'nal vur'te-bra. Vertebra, in mammalia, which exhibits transition from vertebræ with spinal processes directed downward to those with spinal processes directed upward; tenth dorsal human vertebra.

Anticnemium, an-tik-na'me-um (*anti, kneme,* leg). Shin.

Anticnesmatic, ant-e-nes-mat'ik (*anti, knesma,* itching). Anything that relieves itching.

Anticolic, an-te-kol'ik. That which is opposed to or relieves colic.

Anticomma, an-te-kom'mah (*anti, komma,* a blow). Contre-coup; resonance; reaction.

Anticontagionist, an-te-kon-ta'jun-ist. One who disbelieves in contagion.

Anticope, an-tik'o-pa. Contre-coup.

Anticopometer, an-te-ko-pom'e-tur. Pleximeter.

Anticoposcope, an-te-ko'po-skope. Pleximeter.

Anticoptoscope, an-te-kop'to-skope (*anti, kopto,* to strike, *skopeo,* to inspect). Pleximeter.

Anticor. Carbuncle of chest in domestic animals.

Anticrusis (an-te-kru'sis) or **Anticrusma,** an-te-krus'mah. Contrafissure.

Anticteric, an-tik'ter-ik (*anti, ikteros,* jaundice). Remedy for jaundice.

Anticus, an-te'kus (*ante,* before). Anterior.

Antideixis, an-te-dikes'is (*anti, deixis,* indication). Counterindication.

Antidiarrhœic, an-te-di-ar-rhe'ik. Remedy for diarrhœa; opposed to diarrhœa.

Antidiastole, an-te-de-as'to-le (*antidiastello,* to distinguish). Differential diagnosis.

Antidinic, an-tid-in'ik (*anti, dinos,* vertigo). Opposed to vertigo.

Antidotal, an-tid'o-tal. Relating to an antidote; possessed of powers of an antidote.

Antidotarium, an-te-do-tah're-um. Dispensatory, pharmacopœia, or formulary. Collection of drugs. Antidotary was used formerly in sense of antidote.

Antidotary, an-tid'o-ta-re. Antidote.

Antidote, an'te-dote (*anti, didomi,* to give). Originally, internal remedy; now synonymous with counter-poison, and signifying any remedy capable of combating effects of poison. See *Poisons.* **A., Bibron's,** antidote for snake-bites, composed of corrosive sublimate, iodide of potassium, and bromine, administered early and continued for sufficient length of time.

Antidotism, an-tid'o-tizm. Quality of antidote; antagonism of drugs.

Antidotum, an-tid'o-tum. Antidote.

Antidynamic, an-te-di-nam'ik (*anti, dunamis,* force). Debilitant.

Antidynous, an-tid'in-us (*anti, odune,* pain). Anodyne.

Antidyscratic, an-te-dis-krat'ik. Anything that relieves dyscrasiæ or morbid conditions.

Antidysenteric, an-te-dis-en-ter'ik. Opposed to dysentery; relieving dysentery.

Antidysuric, an-te-dis-u'rik. Counteracting strangury.

Antiëmetic (an-te-e-met'ik) or **Antemet'ic.** Remedy for vomiting. **A. root,** adrue, the root of Cyperus articulatus.

Antiephialtic or **Antephialtic,** ant-ef-e-al'tik (*anti, ephialtes,* nightmare). Remedy for nightmare.

Antiepileptic (an-te-ep-i-lep'tik) or **Antepilep'tic.** Remedy for epilepsy.

Antifebrile, an-te-feb'ril (*anti, febris,* fever). Reducing fever; febrifuge; antipyretic.

Antifebrine, an-te-feb'rin. C_8H_9NO. Acetanilid.

Antifermen'tative. Opposed to fermentation.

Antigalactagogue, an-te-gal-ak'ta-gog (*anti, gala,* milk, *agoge,* bringing). Diminishing secretion of milk.

Antigalactic, an-te-gal-ak'tik (*anti, gala,* milk). Opposed to secretion of milk or to diseases caused by milk.

Antihæmoptyicus, an-te-he-mop-te'ik-us. Against spitting of blood; remedy for spitting of blood.

Antihectic, an-te-hek'tik (*anti, hexis,* habit of body). Anything relieving hectic fever.

Antihelix, an-te'he-liks. Anthelix.

Antihelmintic, an-te-hel-min'tik. Anthelmintic.

Antihemorrhagic, an-te-hem-or-raj'ik. That which checks or arrests hemorrhage; styptic.

Antihemorrhoidal, an-te-hem-or-roid'al. Remedy for hemorrhoids.

Antiherpetic, an-te-her-pet'ik. Remedy for herpes.

Antihidrotic, an-te-hi-drot'ik (*anti, hidrosis,* sweat). Checking or diminishing secretion of sweat.

Antihydrophobic, an-te-hi-dro-fo'bik. Remedy for hydrophobia.

Antihydropic, an-te-hi-drop'ik (*anti, hudrops,* dropsy). Remedy for dropsy.

Antihydropin, an-te-hi'drop-in. Principle derived from cockroach, used in dropsy.

Antihydrot'ic. Agent diminishing secretion of sweat, acting directly on the cells or nerves of the sweat-glands themselves, on the sweat-centres, or on the circulation. The substances classed under the head of antihydrotics are acids, atropine, belladonna, agaricus albus, amanita muscaria, muscarine, hyoscyamus, jaborandi, pilocarpine, nux vomica, strychnia, quinine, picrotoxine, Dover's powder, salts of zinc.

Antihypnotic, an-te-hip-not'ik. Anthypnotic.

Antihysteric, an-te-his-ter'ik. Anthysteric.

Antiïcteric, an-te-ik-ter'ik (*anti, ikteros,* jaundice) Remedy for jaundice.

Antilabium, an-te-lab'e-um. Prolabium; see *Antelabia.*

Antilactescent (an-te-lak-tes'sent) or **Antilac'tic** (*anti, lac,* milk). Antigalactic.

Antilepsis, an-te-lep'sis (*anti, lambano,* to take hold of). Mode of securing bandages, etc. from slipping; treatment by revulsion or derivation; attack of sickness.

Antilethargic, an-te-leth-ar'jik. Remedy for lethargy.

Antilithic, an-te-lith'ik (*anti*, *lithos*, stone). Substance that prevents formation of calculi in the urinary organs, or that dissolves them when formed.

Antilobium, an-te-lo'be-um (*anti*, *lobion*, lobe of ear). Antitragus, tragus.

Antiloimic (an-te-loi'mik) or **Antilœmic** (*anti*, *loimos*, plague). Remedy for plague or for pestilence.

Antilopus, an-ti-lo'pus. Antelope. African animal, whose hoofs and horns were formerly given in hysteria and epilepsy.

Antilyssic, an-te-lis'sik (*anti*, against, *lussa*, rabies). Antihydrophobic.

Antilyssus, an-te-lis'sus (*anti*, *lussa*, rabies). Antihydrophobic.

Antimelancholic, an-te-mel-an-kol'ic. Remedy for melancholy.

Antimephitic, an-te-mef-it'ik. Remedy against mephitic or deleterious gases or exhalations.

Antimetropia, an-te-me-tro'pe-ah (*anti*, *metron*, measure, *ops*, eye). Opposite conditions of ametropia in the two eyes, one being myopic, the other hypermetropic.

Antimiasmatic, an-te-mi-as-mat'ic. Remedy against miasmatic affections, quinia, for instance.

Antimonial, an-te-mo'ne-al. Composition into which antimony enters. Preparation of antimony. **A. oint'ment**, unguentum antimonii. **A. plas'ter**, emplastrum antimonii. **A. powder**, peroxide of antimony combined with phosphate of calcium; pulvis antimonialis. A preparation long esteemed as a febrifuge, but uncertain in its action. Dose, 6 or 8 grains. **A. wine**, vinum antimonii.

Antimoniale causticum, an-te-mo-ne-al'a kaus'ti-kum. Antimonium muriatum.

Antimoniate, an-te-mo' ne-ate. Salt formed by combination of antimonic acid with base.

Antimoniatum, an-te-mo-ne-at'um. Sulphur; antimonii sulphuretum præcipitatum. **A. tartar**, antimonium tartarizatum.

Antimonic acid, an-te-mo'nik as'id. Metantimonic acid.

Antimonii arsenias, an-te-mo'ne-e ar-se'ne-as. Arseniate of antimony. **A. butyrum**, but-ir'um, antimonium muriatum. **A. calx**, antimonium diaphoreticum. **A. cerus'sa**, antimonium diaphoreticum. **A. chlo'ridum**, antimonium muriatum. **A. io'didum**, iodide of antimony. **A. mu'rias**, antimonium muriatum. **A. ni'grum purifica'tum** (Ph. Br.), purified black antimony, is the native sulphate of antimony, purified from siliceous matter by fusion and reduced to fine powder; it is used in pharmacy, not in medicine. **A. o'leum**, antimonium muriatum. **A. oxid'ulum hydrosulphura'tum auranti'acum**, antimonii sulphuretum præcipitatum. **A. ox'idum**, see *Algaroth*. **A. ox'idum aura'tum**, antimonii sulphuratum præcipitatum. **A. ox'idum nitro-muriat'icum**, algaroth. **A. ox'idum cum sul'phure vitrifac'tum**, antimonii vitrum. **A. ox'idum sulphure'tum vitrifac'tum**, antimonii vitrum. **A. oxychlo'ridum**, antimony, oxychloride of. **A. oxysulphure'tum**, see *A. sulphuretum rubrum*. **A. pentasul'phidum**, antimony pentasulphide. **A. et potas'sii tar'tras**, antimonium tartarizatum. **A. potas'sio-tar'tras**, antimonium tartarizatum. **A. reg'ulus**, antimonium. **A. reg'ulus medicina'lis**, antimonium medicinale. **A. sal**, antimonium tartarizatum, **A. sul'phidum**, antimony sulphide or sulphuret; antimonii sulphidum (Ph. U. S. Sb_2S_3) is native sulphide of antimony purified by fusion. Diaphoretic and alterative in scrofula, glandular obstructions; used in veterinary practice almost entirely. When prepared for medicinal use by trituration and levigation, it forms antimonii sulphidum purificatum (Ph. U. S.). **A. sul'phur aura'tum**, antimonii sulphuretum præcipitatum. **A. sul'phur præcipita'tum**, antimonii sulphuretum præcipitatum. **A. sulphura'tum**, antimonii sulphuretum præcipitatum. **A. sulphure'tum**, antimonium; A. sulphidum. **A. sulphure'tum au'reum**, antimonium sulphuratum. **A. sulphure'tum præcipita'tum**, *Antimonium sulphuratum* (Ph. U. S., Br.), *Golden sulphur*, or *Golden sulphuret of antimony*, is alterative, diaphoretic, and emetic; like kermes mineral, but much weaker. **A. sulphure'tum ru'brum**, *Red sulphuret of antimony*, *Kermes* or *Cermes*; not much used medicinally; resembles antimonium sulphide in action, but is stronger. *Antimonii oxysulphuretum*, powder of purplish-brown color; emetic, diaphoretic, and cathartic; used in chronic rheumatism and skin diseases. **A. tar'tras**, antimonium tartarizatum. **A. vit'rum**, *Glass of antimony*, semivitreous oxide of antimony, has been used for preparing tartarized antimony and antimonial wine. **A. vit'rum hyacin'thinum**, A. vitrum.

Antimonious acid, an-te-mo'ne-us as'id. Antimonium diaphoreticum. **A. chlo'ride**, antimonium muriatum. **A. oxychlo'ride**, algaroth.

Antimonium, an-te-mo'ne-um. Metallic antimony, sometimes called regulus of antimony, is not officinal in Ph. U. S. or Br. Exists in nature uncombined, or as oxide, or united with sulphur. Common or crude antimony or sulphuret of antimony. Sulphuret of antimony is the ore from which all the preparations of antimony are formed. When prepared for use it forms *Antimonii sulphidum* (which see). **A. al'bum**, bismuth. **A. calcina'tum**, antimonium diaphoreticum. **A. chlora'tum solu'tum**, antimonium muriatum. **A. cru'dum**, antimonium. **A. diaphoret'icum**, *Diaphoretic antimony*, *Antimonious acid*, *Mineral bezoard*, *Mineral diaphoretic*, *Peroxide of antimony*, *Deutoxide of antimony*; made by action of common antimony and purified nitre. Not used in medicine, being too uncertain. **A. emet'icum**, A. tartarizatum. **A. medicina'le**, *Medicinal regulus of antimony*; made by action of subcarbonate of potash and chloride of sodium or antimonium sulphuratum, and conceived to be more active than common antimony. **A. muria'tum**, *Butter of antimony*, *Muriate of antimony*, *Antimonious chloride*; *Chloride* or *Chloruret*, *Sesquichloride* or *Terchloride of antimony*; a caustic, but not much used as such; dissolved in hydrochloric acid, it forms *Liquor antimonii chloridi*, *Solution of chloride of antimony*, of a previous Ph. Br., from which oxide of antimony was prepared. **A. ni'grum**, see *Antimonium*. **A. sal'itum**, antimonium muriatum. **A. sulphura'tum**, see *Antimonii sulphuretum præcipitatum*. **A. sulphura'tum auranti'acum**, antimonii sulphuretum præcipitatum. **A. sulphura'tum ni'grum**, sulphuret of antimony; see *Antimonium*. **A. sulphura'tum ru'brum**, antimonii sulphuretum rubrum. **A. tartara'tum**, A. tartarizatum. **A. tartariza'tum**, oxytartrate of antimony and potassium, *Tartarized antimony*, *Tartrate of antimony and potassium*, *Potassiotartrate of antimony*, *Emetic tartar*, *Tartar emetic*, improperly called *Tartar antimonii et potassii tartras* (Ph. U. S., Br.), $2KSbOC_4H_4O_6,H_2O$ (made by boiling oxide of antimony and powdered acid tartrate of potassium in distilled water; filtering and crystallizing, Ph. Br.). Tartarized antimony is emetic, sometimes cathartic and diaphoretic; externally rubefacient, and in form of ointment more especially—*Unguentum antimonii*—used to cause pustulation. Dose as emetic, gr. j to gr. iv in solution; as diaphoretic, gr. $\frac{1}{16}$ to $\frac{1}{4}$. **A. vitrifac'tum**, antimonii vitrum.

Antimony, an'te-mo-ne. Antimonium. **A. arse'niate**, made by adding alkaline arseniate to terchloride of antimony; given in heart affections and nervous diseases in doses of gr. $\frac{1}{100}$ to $\frac{1}{60}$. **A. ar'senite**, formed by digesting antimony in concentrated solution of arsenious acid. **A., but'ter of**, antimonium muriatum. **A., chlo'ride of**, antimonium muriatum. **A., chlo'ruret of**, antimonium muriatum. **A., com'mon**, antimonium. **A., crude**, antimonium. **A., deutox'ide of**, antimonium diaphoreticum. **A., flow'ers of**, algaroth. **A., glass of**, antimonii vitrum. **A., gol'den sul'phur of**, antimonii sulphuretum præcipitatum. **A. i'odide**, made by heating together antimony and iodine; alterative. **A., medic'inal reg'ulus of**, antimonium medicinale. **A., mu'riate of**, antimonium muriatum. **A., o'leate of**, see *Oleates*. **A., ox'ide of**, see *Algaroth*. **A., oxychlo'ride of**, see *Algaroth*. **A., perox'ide of**, antimonium diaphoreticum.

A. and potas'sa or **potas'sium, tar'trate of,** antimonium tartarizatum. **A., potas'sio-tart'rate of,** antimonium tartarizatum. **A., sesquichlo'ride of,** antimonium muriatum. **A., sul'phide,** antimonii sulphidum. **A., sul'phuret of, red,** antimonii sulphuretum rubrum. **A., tar'tarized,** antimonium tartarizatum. **A., terchlo'ride of,** see *Algaroth.* **A., terox'ide of,** antimonium muriatum. **A., veg'etable,** Eupatorium perfoliatum

Antimycetic, an-te-mi-se'tik (*anti, mukes,* fungus). Destroying or preventing formation of fungi.

Antimydriatic, an-te-mid-ri-at'ik (*anti, mudriasis,* imperfect vision from dilatation of pupil). Having opposite action to dilatation of pupil.

Antinarcot'ic. Opposed to action of narcotics.

Antinephritic (an-te-nef-rit'ik) or **Antinephret'ic.** Remedy for nephritis or inflammation of the kidney.

Antineuropathic (an-te-nu-ro-path'ik), or **Antineurotic,** an-te-nu-rot'ik. Remedy against nervous disorders.

Antiniad, an-tin'e-ad. See *Antinial.*

Antinial, an-tin'e-al (*anti, inion,* ridge of occiput). Epithet for aspect toward side opposite inion or ridge of occiput. *Antin'iad* is used adverbially to signify "toward the antinial aspect."

Antinion, an-tin'e-on. Anterior pole of the skull, opposite the occipital ridge; point farthest from the inion.

Antiodontalgic (an-te-o-don-tal'jik) or **Antodontalgic,** an-to-don-tal'jik (*anti, odontalgia,* toothache). Remedy for toothache.

Antiorgastic, an-te-or-gas'tik (*anti, orgao,* to desire vehemently). Remedy for orgasm or irritation, especially venereal.

Antiotomia, an-te-o-tom'e-ah (*antias,* tonsil, *tome,* incision). Excision of the tonsil.

Antiparalytic, an-te-par-al-it'ik. Opposed to palsy.

Antiparasitic, an-te-par-as-it'ik (*anti, parasitos,* parasite). Parasiticide; agent that destroys parasites, as those which infest the body.

Antiparastatitis, an-te-par-as-ta-te'tis (*ante, parastates,* epididymis or prostate). Inflammation of Cowper's glands.

Antipathic, an-te-path'ik (*anti, pathos,* affection). Opposite, contrary; relating to antipathy; palliative.

Antipathy, an-tip'a-the (*anti, pathos,* affection). Aversion. Natural repugnance to any person or thing; antagonism, as of drugs; palliation. Allopathy.

Antipediculous, an-te-pe-dik'u-lus. Having property of destroying lice; antiphtheiriac.

Antipeptone, an-te-pep'tone. Final result of action of pancreatic juice on proteids, or formed from antialbumose by continuing the process of digestion after the latter is obtained from albumin.

Antiperiodic, an-te-pe-re-od'ik. Remedy which possesses power of arresting or diminishing the severity of morbid periodical movements; the sulphate of quinia, for instance, in intermittents. The chief antiperiodics are cinchona-bark and its alkaloids (quinine, cinchonine, quinidine, cinchonidine), arsenic, salicylic acid, salicylates, salicin, bebeeru-bark and its alkaloid bebeerine, and eucalyptol.

Antiperistalsis, an-te-per-e-stal'sis. Inverted action of intestinal tube.

Antiperistaltic, an-te-per-e-stal'tik (*anti, peristello,* to contract). Antivermicular. Relating to antiperistalsis.

Antiperistasis, an-te-per-is'tas-is (*anti, peristasis,* reunion, aggregation). Union of opposite circumstances; action of two contrary qualities, one augmenting force of the other.

Antipernius, an-te-pur'ne-us (*anti, pernio,* chilblain). Remedy against chilblain.

Antipertussis, an-te-per-tus'sis (*anti, pertussis,* whooping cough). Remedy against whooping cough.

Antipestilential, an-te-pes-til-en'she-al. Antiloimic.

Antipharmac, an-te-far'mak. Alexipharmic.

Antipharmacum, an-te-far'mah-cum (*anti, pharmakon,* poison). Antidote.

Antipharmic, an-te-far'mik. Antidote.

Antiphlogistic, an-te-flo-jis'tik (*anti, phlego,* to burn). Opposed to or checking inflammation, as antiphlogistic remedies, A. regimen, etc.

Antiphtheiriac, an-te-thi're-ak (*anti, phtheiriao,* to be lousy). Remedy to destroy lice.

Antiphthisical (an-te-tiz'ik-al) or **Antiphthis'ic** (*anti, phthisis,* consumption). Opposed to phthisis.

Antiphysaic (an-te-fiz-a'ik) or **Antiphysetic,** an-te-fiz-et'ik (*anti, phusao,* to puff up). Remedy for flatulence; expeller of wind.

Antiplastic, an-te-plas'tik (*anti, plastikos,* formative). Antiformative; not favorable to healing; agent that diminishes quantity of plastic matter in the blood.

Antipleuritic (an-te-pleu-rit'ik) or **Antipleuretic,** an-te-pleu-ret'ik. Opposed to pleurisy; a remedy for pleurisy.

Antipneumonic, an-te-nu-mon'ik. Remedy for disease or inflammation of the lungs.

Antipneumotox'in (*anti, pneumon,* lung, *toxikos,* poisonous). The pneumococcus produces a poisonous albumen, which causes subsequently the production in the organism of a substance called antipneumotoxin, which has power to neutralize the toxic albumen formed by the bacterium.

Antipodagric, an-te-po-dag'rik (*anti, podagra,* gout). Remedy for gout.

Antiprax'ia, Antipraxis (an-te-praks'is), or **An'tipraxy** (*anti, prasso,* to act). Contrary symptoms or functions in the same patient; contrary action of drugs according to dose.

Antiprostatic (an-te-pros-tat'ik) **gland.** Anteprostatic gland; glands of Littré and Cowper.

Antipruritic, an-te-pru-rit'ik. Opposed to or relieving itching.

Antipsoric, an-te-so'rik (*anti, psora,* itch). Opposed to or relating to itch.

Antiputrid (an-te-pu'trid) or **Antiputrescent,** an-te-pu-tres'sent. Antiseptic.

Antipyic, an-te-pi'ik (*anti, puon,* pus). Opposed to suppuration; interfering with formation of pus.

Antipyre'sis (*anti, pur,* fire, fever). Treatment by antipyretics or to counteract fever.

Antipyretic, an-te-pi-ret'ik (*anti, puretos,* fever). Febrifuge capable of diminishing the temperature of the body, and thus reducing fever. Such remedies act either by lessening the production of heat or by increasing the loss of heat. A *vascular antipyretic* is one which acts through the circulation, as aconite and digitalis. Antipyretics are employed to lower abnormal temperature from exposure to external heat, from fevers, such as typhoid or typhus, scarlet fever, acute rheumatism, etc. Cold bathing in some forms of fever is regarded by many as the most speedy and efficient means of applying antipyretic medication.

The table on opposite page shows the modes of action of all the important antipyretics (Brunton).

Antipyrine, an-ti-pi'reen. $C_{11}H_{12}N_2O$. Variously called, chemically, dimethylphenylpyrazolon, dehydrodimethylphenylpyrazine, phenazone, methozine, and dimethyloxychinizin. Grayish-white soluble crystalline powder, one of products of destructive distillation of coal-tar. Dose, gr. v–x. Active antipyretic and antineuralgic; externally, antiseptic. It is a heart-depressant, and should be prescribed with caution. It is incompatible with a number of other substances. Benzoate, citrate, picrate, and salicylate of antipyrine have also been employed, the latter under the name of salipyrin; see *Salipyrin.* With chloral antipyrine forms hypnol; with phenol, phenopyrin. See *Antipyretics* (table on opposite page).

Antipyri'num, an-te-pi-re'num. Antipyrine.

Antipyrotic, an-te-pi-rot'ik (*anti, pur,* fire). Opposed to burns or to pyrosis.

Antiquartanarium (an-te-kwar-tan-ah're-um) or **Antiquar'tium.** Remedy for quartan fever.

Antiquus, an-te'kwus (old). Chronic.

Antirabic, an-te-rab'ik. Against rabies, as a medicine presumed to be effective in treatment of such conditions.

TABLE OF ANTIPYRETICS.

- Antipyretics
  - Lessen production of heat
    - Acting on tissue-change
      - Quinine.
      - Cinchonine.
      - Quinidine.
      - Cinchonidine.
      - Berberin.
      - Benzoic acid.
      - Carbolic acid.
      - Picric acid.
      - Salicylic acid.
      - Salicylate of sodium.
      - " quinine.
      - " methyl (oil of wintergreen).
      - Salicin.
      - Kairin.
      - Camphor.
      - Eucalyptol.
      - Thymol.
      - Other essential oils.
      - Alcohol.
    - Acting on the circulation
      - Generally
        - Antimony salts.
        - Aconite.
        - Digitalis.
        - Veratrine.
        - Colchicum.
        - Thallin.
      - Locally
        - Wet cupping.
        - Leeches.
        - Dry cupping.
        - Blisters.
        - Poultices.
  - Increase loss of heat
    - By dilating the cutaneous vessels and increasing radiation
      - Alcohol.
      - Nitrous ether.
      - Antipyrine, thallin.
    - By increasing the loss of heat due to evaporation of perspiration — Sudorifics
      - Antimonial preparations.
      - Opium and ipecacuanha.
      - Nitrous ether.
    - By abstracting heat from the body
      - Cold bath.
      - Cold affusion.
      - Cold sponging.
      - Wet pack.
      - Ice to the surface.
      - Ice-bags to the neck.
      - Cold drinks.
      - Cold enemata.
  - Mode of action uncertain
    - Purgatives.
    - Venesection.

Antirhachitic, an-te-rhak-it'ik. Opposed to rhachitis or rickets.

Antirheumatic, an-te-rhu-mat'ik. Remedy for rheumatism.

Antirhinum, an-tir'in-um (*anti*, for or resembling, *rhis*, nose). *Acutangulum*. A. linaria. **A. auricula'tum**, A. elatine. **A. elati'ne**, *Fluellen* or *Female speedwell*, was formerly used against scurvy and old ulcerations. **A. hedera'ceum**, A. linaria. **A. hederæfo'lium**, A. linaria. **A. lina'ria**, *Common toad-flax*, ord. Scrophulariaceæ. Leaves have bitterish taste, and are diuretic and cathartic; an ointment is made from them for hemorrhoids.

Antirrheoscope, an-tir-rhe'o-scope (*antirrheo*, to go contrary to, *skopeo*, to see). Instrument for artificially producing vertigo of vision by motion of spirals on revolving cylinders started by turning a disk.

Antiscabious, an-te-skab'e-us. Antipsoric.

Antiscirrhous, an-te-skir'rus. Anticancerous.

Antiscoletic (an-te-sko-let'ik) or **Antiscolic**, an-te-sko'lik (*anti*, *skolex*, worm). Anthelmintic.

Antiscorbutic, an-te-skor-bu'tik. Opposed to or preventing or relieving scorbutus or scurvy.

Antiscrofulous (an-te-skrof'u-lus) or **Antiscroph'ulous**. Opposed to scrofula.

Antisepsis, an-te-sep'sis (*anti*, *septos*, putrid). Prevention of decay and putrefaction by the employment of antiseptics, which arrest the development of micro-organisms, on which decay and putrefaction depend, or completely destroy them. The condition resulting from the use of antiseptics is called *Antisepticity*. See *Antiseptic* and *Asepsis*.

Antiseptic, an-te-sep'tik (*anti*, *septos*, putrid). Antiputrid; opposed to putrefaction. Any substance having power to prevent or destroy putrefaction, accomplishing this by the prevention or destruction of the bacteria causing such putrefaction. For the chief antiseptics employed see *Antiseptic treatment*. **A. adhe'sive plas'ter**, see *Plaster, antiseptic*. **A. ce'recloth**, see *Cerecloth*. **A. collo'dion**, see *Collodion*. **A. dressings**, dressings for wounds that prevent formation or introduction of septic materials. **A. gauze**, very sheer cotton cloth infiltrated with carbolic acid, paraffin, etc.; see *Gauze, muslin*. **A. lac plas'ter**, see *Plaster, antiseptic*. **A. lig'ature**, ligature made of catgut or other material which has been made aseptic by saturation with antiseptic solutions or mixtures; see *Ligature, antiseptic*. **A. treatment**, treatment to prevent septic infection and consequent septicæmia or septic blood-poisoning. It had been generally taught that this was to be effected by prevention of the formation or accumulation of organic matter, whether in the form of blood, serum, or pus, and by precluding the admission or counteracting the influence of air. These were the two cardinal principles of the antiputrefactive or antiseptic treatment of wounds. The plan of antiseptic treatment advocated by Sir Joseph Lister included many of the more recent methods, and among other items the use of gauze and a disinfectant spray, which is now virtually abandoned, although the principles of cleanliness advocated by him are fully recognized.

More modern views regard as the chief sources of disinfection the hands of the surgeon and his assistants, and the instruments, sponges, and dressings employed by them. The cleanliness of those thus engaged is the first consideration. The details of surgical antiseptic treatment may be concisely stated as follows (J. B. Roberts, *Modern Surgery*): Heat is the most perfect destroyer of vegetable fungi; therefore instruments, sponges, and dressings which have been sufficiently treated are free from germs or aseptic. The antiseptic solution most often used for washing the patient's skin and for scrubbing his

hands is water containing corrosive sublimate in the proportion of 1:1000 or 1:2000; a solution, however, too strong to be used for irrigating cavities, as there is great danger of corrosive-sublimate poisoning from any of the acid remaining in them. Betanaphthol, 1:2500, is preferable for washing out such cavities, because it is non-poisonous, but it is not as powerful a parasiticide as corrosive sublimate. Boiled water, or steam which has been condensed in clean receptacles, should be used for abdominal operations. The sublimate should never be used to sterilize instruments, because it tarnishes the steel and dulls their edges. For such purposes a betanaphthol solution, or a solution of carbolic acid, 1:40, should be employed. If the surgeon prefers, he may boil his instruments and let them stand in the water until it is sufficiently cooled to allow him to put his hands in it or until he is ready for their use. The vessel should be protected from atmospheric dust by covers. Betanaphthol solution does not irritate the skin of the surgeon's hands, as do corrosive sublimate and carbolic acid, and it is safer than boiled water, as it is antiseptic, instead of merely aseptic.

When an operation is to be performed the instruments required should previously be put in trays containing sterilized water or antiseptic solution. All sponges, sutures, and dressings must be sterile. The patient's skin must be made aseptic by thorough cleansing; the surgeon's finger-nails cleaned and his hands and arms scrubbed with soap and made free from possible pathogenic germs; his clothing covered with a clean operating apron, and his sleeves rolled up to the elbow. Just before operating, his hands should be dipped in a sublimate solution, 1:1000, for a couple of minutes, and the patient's skin washed with a similar solution. The assistants whose hands are to touch sponges, instruments, and the wound must be as aseptic as the surgeon. No one else should be allowed to handle anything. Nothing unless it is germ-free is permitted to come into contact with the incised tissues. An instrument which has dropped upon the floor or touched the bed-clothes must be rejected until again sterilized. The surgeon must touch nothing that is not sterile, unless he sterilizes his hands again with an antiseptic solution or washes them in sterilized water before approaching the wound. He dare not put his hands into his pocket or scratch his head or face without endangering the patient's life by the possible conveyance of a single bacterium into the wound. It is therefore well to surround the seat of operation with sterilized towels laid over the clothing or bed-coverings. These may be baked towels, or towels soaked in sublimate solution and dried.

To the statement above quoted may be added a brief sketch of the chief germicidal or other substances employed in aseptic or antiseptic surgery, as mercury bichloride, carbolic acid, chloride of zinc, iodoform, betanaphthol, peroxide of hydrogen, boric acid, potassium permanganate, aristol, creolin, methyl-violet or pyoktanin, double cyanide of mercury and zinc. They may be employed as follows:

Aristol, non-toxic germicide, used as substitute for iodoform, and similarly employed for chronic and syphilitic and scrofulous ulcers.

Betanaphthol, in solution, 1:2500, for irrigating cavities, cleansing instruments and the surgeon's hands.

Boric acid, as a detergent, in 5 to 25 per cent. solution to mucous surfaces and extensive cavities; to superficial wounds, in ointment, 1 part of boric acid to 5 parts of vaseline or cosmoline; a lotion of salicylic acid 2 parts and boric acid 12 parts, to hot water 1000 parts, may be used as a safe application in the bladder or cavity of the peritoneum.

Carbolic acid, in solution, 1:20 or 1:40, for sterilizing instruments, the latter also for irrigation of wounds and washing sponges, with careful attention to possibilities of carbolic-acid poisoning, and to susceptibility of children to its effects in even moderate strength of solution.

Chloride of zinc, in solution (gr. xxx or xl to f℥j of water), in infected, poisoned, or dissecting wounds.

Corrosive sublimate, in solution in water, 1:500 to 1:1000, for irrigation and disinfection of the hands and skin; 1:2000 is the strength usually employed; 1:4000 in children; 1:5000 or 1:10,000 when used in large cavities. Symptoms of poisoning must be guarded against.

Creolin, used like carbolic acid, but non-poisonous and unirritating to the skin, in emulsion with water (2 to 5 per cent.), in which it is not soluble.

Double cyanide of mercury and zinc, used for infiltrating gauze, according to the method of Lister. Oiv of bichloride solution to 100 grains of the double salt. See *Listerian treatment*.

Iodoform, in powder as a dressing to wounds and ulcers; in iodoform gauze, iodoform collodion (gr. xlviii to ℥j of collodion), in ethereal solution, in glycerin (℥j to ℥x of glycerin), etc.

Methyl-violet or pyoktanin, in solution, 1:1000 or 1:2000, for suppurating wounds and ulcers; it is not toxic; for sterilizing instruments, 1:10,000.

Peroxide of hydrogen, in 15-volume solution, undiluted, or diluted to about 10 per cent., for sterilizing sinuses and suppurating cavities, into which it may be injected by a syringe or a form of spray.

Potassium permanganate, in solution, about ℥j or more to f℥j of water; f℥j of this solution in Oj of water, making a solution 1:1000; used in disinfecting foul wounds and ulcers, for surgeon's hands, washing sponges, etc.

Sulphocarbolate of zinc may be used like chloride of zinc, for the same purposes and in the same strength.

Antisep'ticism. Principles of antisepsis and antiseptic treatment. **A., Liste'rian**, see *Listerian*.

Antiseptic'ity. See *Antisepsis*.

Antisialic (an-te-si-al'ik) or **Antisialagogue**, an-te-si-al'ag-og (*anti*, *sialon*, saliva, *ago*, to expel). Remedy against ptalyism, or excessive salivation.

Antispasis, ant-is'pas-is (*anti*, *spao*, to draw). Derivation, revulsion.

Antispasmodic, an-te-spas-mod'ik (*anti*, *spao*, to draw). Opposed to spasm; tending to prevent or check spasm. The operation of antispasmodics is revulsive in such affections as hysteria, epilepsy, chorea, spasmodic asthma, and spasm of the blood-vessels. Antispasmodics belong to several classes of medicines, as tonics, sedatives, etc., as may be illustrated in the following table exhibiting their action on the higher nerve-centres in hysteria (Brunton):

I. Sedatives.	Alkaline bromides.	
II. Tonics.	Zinc salts.	
III. Stimulants, which have a powerful odor, and probably act on the higher centres through the olfactory organs, either by direct application or during their elimination.	Musk, Castor.	Derived from the genital organs of animals.
	Sumbul, Valerian.	Similar in the nature of their odor to the above, though derived from plants.
	Asafœtida, Ammoniacum, Galbanum.	Containing sulphur oils.

Antispastic, an-te-spas'tik (*anti*, *spao*, to draw). Antispasmodic, derivative, revulsive.

Antisquamic, an-te-squaw'mik (*anti*, *squama*, a scale). Medicine checking or relieving cutaneous affections, especially of a scaly form.

Antistasis, an-tis'tas-is (*antistasis*, opposition). Antagonism.

Antisternum, an-te-stur'num (*anti*, *sternon*, sternum). Back; part of spinal column opposite sternum.

Antisterygma, an-te-stur-ig'mah (*anti*, *sterigma*, support). Fulcrum, support, crutch.

Antisthetic, an-tis-thet'ik (*antithesis*, contrast). Opposite; applied to a condition or function which is antithetic to another.

Antistrumous, an-te-stroo'mus (*anti*, *struma*, scrofula). Antiscrofulous.

Antisudoral (an-te-su'do-ral) or **Antisudorific**, an-te-su-do-rif'ik (*anti, sudor*, sweat). Remedy that diminishes sweat.

Antisyphilitic, an-te-sif-il-it'ik. Opposed to venereal disease; relieving or curing syphilis.

Antitasis, an-tit'as-is (*anti, teino*, to extend). Counter-extension.

Antithenar, an-tith'en-ar (*anti, thenar*, palm of hand or sole of foot). Opponens pollicis and adductor pollicis manûs or pedis muscles. **A. em'inence**, inner border of palm of hand.

Antitherma, an-te-thur'mah (*anti, therme*, heat). Refrigerant.

Antithermic, an-te-thur'mik. Cooling, antipyretic.

Antithermin, an-te-ther'min. An antipyretic, $C_2H_5N_2H$, phenylhydrazin-levulinic acid, colorless crystals, soluble in boiling water or alcohol; made by action of acetic acid solution of phenylhydrazin with watery solution of levulinic acid.

Antithora, an-tith'or-ah. Aconitum anthora.

Antitoxic, an-te-toks'ik (*anti, toxicon*, a poison). Antidote to a poison.

Antitox'ines. Agents that destroy or counteract toxines, or poisonous principles in the system.

Antitragicus (an-te-traj'ik-us) or **Antitrageus**, an-te-traj'e-us. Belonging to the antitragus; small muscle, existence of which is not constant, occupying space between antitragus and anthelix.

Antitragus, an-tit'rag-us (*anti, tragos*, tragus). Conical eminence on pavilion of ear opposite tragus.

Antitrismus, an-te-triz-mus (*anti, trismos*, inarticulate sound). Tonic spasmodic action of muscles of the mouth, preventing its closure.

Antitypical, an-te-tip'ik-al. Antiperiodic, not regular.

Antivaccina'tionist. One opposed to practice of vaccination.

Antivenereal, an-te-ve-ne're-al (*anti, Venus*). Antisyphilitic, antaphrodisiac.

Antivermicular, an-te-ver-mik'u-lar. Antiperistaltic.

Antiverminous, an-te-ver'min-us (*anti, vermis*, worm). Anthelmintic.

Antizymotic (an-te-zi-mot'ik) or **Antizymic**, an-te-zi'mik. Opposed to zymosis; checking or preventing fermentation.

Antlia, ant'le-ah (*antleo*, to pump out). Syringe; a pump. Hence *A. lactea* or *mammaria, Lactisugium*, breast-pump; *A. sanguisuga, Antibdella, Hirudo artificialis, Artificial leech*, exhausting syringe used in cupping. **A. gas'trica**, stomach-pump.

Antodontalgic, an-to-don-tal'jik. Relieving toothache.

Antodyn, ant'o-din (*anti, odune*, pain). Anodyne.

Antorgastic, an-tor-gas'tik. Checking or relieving orgasm, especially the venereal.

Antosis (an-to'sis), or **Antothesis** (an-to'the-sis), or **Antothismus**, an-to-thiz'mus (*anti, otheo*, to push). Endosmose.

Antozone, ant'o-zone (*anti, ozone*). Hydrogen peroxide.

Antozostomatic, an-to-zos-to-mat'ik (*anti, ozostomos*, bad breath). Capable of correcting bad breath or disagreeable taste.

An'tral. Relating to the antrum, as of Highmore.

Antrax, an'traks. Anthrax.

Antritis, an-tre'tis. Inflammation of a cavity, particularly antrum of Highmore.

Antrophlogosis, an-tro-flo-go'sis (*antrum, phlogosis*, inflammation). Antritis.

Antrophore, an'tro-fore (*antrum*, cavity, *phoros*, conveying). Soluble medicated gelatin bougie.

Antrorrhonchus, an-tror-rhon'kus. Cavernous rhonchus.

Antrotympanitis, an-tro-tim-pan-e'tis (*antrum*, cavity). Inflammation of cavity of tympanum.

Antroversio, an-tro-ver'se-o (*antro*, for *ante*, forward, *verto*, to turn). Anteversion.

An'trum (*antron*, a cavern). Name given to certain cavities, as in bones, etc., entrance to which is usually smaller than the bottom. **A. au'ris**, tympanum. **A. buccino'sum**, cochlea, labyrinth. **A., car'diac**, dilatation of the œsophagus above the diaphragm. **A. denta'le**, pulp-cavity of tooth. **A. duodena'le**, upper dilated portion of duodenum. **A. ethmoïda'le**, ethmoid cells. **A. fronta'le**, frontal sinus. **A. ge'næ**, A. of Highmore. **A. of High'more**, *Maxillary sinus*, deep cavity in substance of superior maxillary bone communicating with middle meatus of nose; lined by prolongation of Schneiderian membrane. **A. of Malacarne**, posterior perforated space of cerebrum. **A. mastoï'deum**, mastoid cells. **A. maxil'læ** or **maxilla're**, antrum of Highmore. **A. olfacti'vum**, ethmoid cells. **A. petro'sum**, meatus auditorius internus. **A. pylo'ricum** or **pylo'ri**, pyloric portion of stomach. **A. sphenoida'le**, sphenoidal sinus. **A. tu'bæ**, sacciform enlargement of oviduct.

Ants'jar. Upas.

Antyllus (an-til'lus), **opera'tion of.** Treatment of aneurism by opening it, removing clots, and ligating artery above and below the sac.

Anularis, an-u-lar'is. Annular.

Anulus, an'u-lus (dim. of **Anus**). See *Anus, Fossette.*

Anuresis (an-u-ra'sis) or **Anu'ria**, an-u're-ah (*an, oureo*, to pass urine) Absence or deficiency of urine; retention of urine.

Anus (circle), ah'nus. Circular opening at inferior extremity of the rectum, by which excrement is expelled; fundament; body; seat. Anterior orifice of aqueduct of Sylvius, called also foramen commune posterius, supposed to form communication between back part of third ventricle and lateral ventricles. **A., abnor'mal** or **artific'ial**, *Fecal fistula*, opening made artificially to supply place of natural anus; see *Anus, preternatural.* **A. cer'ebri**, see *Anus.* **A., de'vious**, anus, preternatural. **A., fis'sure of**, see *Fissura.* **A., fis'tula of**, see *Fistula.* **A., imper'forate**, malformation in which there is no natural anus. See *Atresia ani.* **A., infundib'uliform**, condition of anus in which natural folds are obliterated, perhaps from impure connection. **A. no'thus**, anus, artificial. **A., preternat'ural**, accidental opening giving issue to feces; may be owing to wound or to gangrene of intestine in hernial sac. This term, as well as *devious anus*, is also employed where the anus, instead of being in a natural situation, is in some neighboring cavity, as bladder, vagina, etc.; see *A., abnormal.* **A., prolapse of**, see *Prolapsus ani.* **A. of Rusco'ni**, minute opening in blastoderm of ova of amphibious animals.

An'vil. Incus.

Anxietas, anks-e'et-as. Anxiety. **A. præcordio'rum**, see *Anxiety.* **A. tibia'rum**, restlessness of lower extremities, noticed in some nervous affections.

Anxiety, anks-i'et-e (*ancho*, to strangle, to suffocate). *Anxietude.* State of restlessness and agitation, with general indisposition, and distressing sense of oppression at the epigastrium, anxietas præcordiorum.

Anxis, anks'is. Constriction.

Anydræmia, an-e-dre'me-ah (*an, hudor*). Watery condition of the blood.

Anypnia, an-ip'ne-ah (*an*, and *hupnos*, sleep). Insomnia.

Ansyteria, an-is-te're-ah (*an, hustera*, uterus). Absence of uterus.

Aochlesia, ah-ok-la'ze-ah (*a, ochlos*, disturbance). Tranquillity; calmness; catalepsy.

Aorta, a-or'ta. *Hemal axis.* Name given by Aristotle to chief artery of body (*aorteomai*, to be suspended, as if suspended from the heart). Probably Hippocrates meant by *aortai* (*aër*, air, *tereo*, to keep) bronchia and their ramifications. The aorta is the common trunk of the arteries of the body; arises from left ventricle of heart, about opposite to fifth dorsal vertebra, passes upward (*ascending aorta*), forms great arch or cross, and descends across left of spine (*descending aorta*), until it reaches middle of fourth or fifth lumbar vertebra, where it bifurcates, to give origin to the common iliacs. The aorta is sometimes divided into *Thoracic* or *Pectoral* and *Abdominal.* **A., abdom'inal**, see *Aorta.* **A., ascend'ing**, see *Aorta.* **A., car'diac**, part of embryonic vascular apparatus, giving rise to aortic arches. **A., com'mon**, portion of aorta in lower

animals, included between heart and division into anterior and posterior a. **A., descend'ing,** see *Aorta.* **A., dor'sal,** embryonic aorta from union of primitive aortæ. **A., infe'rior,** abdominal a. **A., pec'toral,** thoracic aorta. **A., pericar'diac,** ascending a. **A., poste'rior,** posterior branch of common a. **A., prim'itive,** part of a. between origin and point of departure of first branch. *P. aortæ* of the embryo are inferior vertebral arterior branches from cardiac aorta, joining to form the dorsal aorta. **A., primor'dial,** dorsal a. **A., right,** embryonic portion of bulb of a., afterward forming pulmonary artery. **A., root of,** origin of a. from heart. **A., si'nus of,** sinuses of Valsalva. **A., subver'tebral,** dorsal a. **A., supe'rior,** thoracic a. **A., system'ic,** left aorta; in embryo, arrangement of vessels which afterward form aorta. **A., thora'cic,** see *Aorta.*

Aortarctia, ah-or-tark'te-ah (*arcto,* to constrict). Narrowness or constriction of aorta.

Aortectasia (ah-or-tek-tah'ze-ah) or **Aortectasis,** ah-or-tek'tas-is (*aorta, ektasis,* dilatation). Dilatation of aorta.

Aorteurysma, ah-or-tu-riz'mah (*aorta, eurus,* dilated). Aneurism of the aorta. By carefully auscultating over the dorsal vertebræ a bellows' sound, with deep and not always perceptible impulse, may be detected.

Aortic, a-or'tik. Relating to aorta. **A. arches,** embryonic arches developing into large vessels. **A. car'tilage,** second costal cartilage over valves of aorta. **A. curve,** arch of aorta. **A. fora'men,** elliptical opening in the middle line posteriorly behind the diaphragm, through which aorta passes with vena azygos major and thoracic duct. **A. insuffi'ciency,** imperfect closure of aortic valves. **A. notch,** mark in sphygmographic tracing indicating closure of aortic valves. **A. or'ifice,** orifice between left ventricle and aorta. **A. plex'us,** plexus of sympathetic nervous matter around abdominal aorta. **A. seg'ment,** anterior portion of mitral valve. **A. sin'uses,** sinuses of Valsalva. **A. valves,** semilunar valves at opening of left ventricle into the aorta. **A. ven'tricle,** left ventricle of the heart. **A. ves'tibule,** part of left ventricle of heart, in vicinity of aortic opening.

Aortitis, ah-or-te'tis. Inflammation of aorta.

Aortron, ah-or'tron. Lobe of the lungs.

Aosmic, ah-os'mik (*a, osme,* smell). Devoid of odor.

Aotus, ah-o'tus (*a, ous,* ear). Monster devoid of ears.

Ap, as prefix in composition, see *Ad* and *Apo.*

Apagma, ap-ag'mah (*apo, ago,* to remove). Separation, abduction. Separation of fractured bone; superficial fracture.

Apagoge, ap-ag-o'ge (*apo, ago,* to lead). Defecation, abduction.

Apalachine, ap-al-ak'in-a. Ilex vomitoria. **A. Gal'lis,** Ilex vomitoria.

Apallage (ap-al'laj-a) or **Apallaxis,** ap-al-lax'is (*apallatto,* to get rid of). Mutation, change; generally, change from disease to health.

Apalotica, ap-al-ot'ik-ah (*apalotes,* softness, tenderness). Fortuitous lesions or deformities affecting soft parts.

Apanastema, ap-an-as-ta'mah (elevation). Small wart-like growth on conjunctiva.

Apanthesis (ap-an-tha'sis) or **Apanthismus,** ap-anthis'mus (*apo, antheo,* to flower). Obliteration of parts previously inservient to useful purposes, as of ductus venosus and ductus arteriosus of fœtal existence. Stuprum.

Apanthropia, ap-an-thro'pe-ah (*apo, anthropos,* man). Detestation of man; desire for solitude; may be a symptom of mental disease.

Apaphrismus, ap-af-ris'mus (*apo, aphros,* froth). Despumation.

Aparine, ap-ah-re'na. Galium aparine. **A. hispida,** Galium aparine.

Aparthrosis, ap-ar-thro'sis (*ap, arthroo,* to articulate). Diarthrosis.

Apathy, ap'a-the (*a, pathos,* affection). Accidental suspension of moral feelings, taking place in severe or malignant diseases.

Apatropine, ap-at'ro-peen. A substance resulting from the action of fuming nitric acid upon atropia.

Apechema, ap-ek-a'mah (*apo, echo,* sound). Action of reflecting sound; counter-fissure, counter-blow.

Apectocephalus, ah-pek-to-sef'al-us. Acephalothorus.

Apella, ah-pel'lah (*a, pellis,* skin). One whose prepuce does not cover the glans; retraction or smallness of any other soft appendage; one who is circumcised.

Apellous, ah-pel'lus (*a, pellis,* skin). Devoid of skin, circumcised.

Apelos, ap'a-los (same etymon). Unhealed.

Apepsia, ah-pep'se-ah (*a, pepto,* to digest). Dyspepsia.

Apeptic, a-pep'tik. Wanting in digestive power; not digesting.

Apereuxis, ap-er-euks'is (belching). Belching up of wind.

Aperiens (ap-a're-ens) or **Aperient,** a-pe're-ent (*aperio,* to bring forth). Laxative; medicine gently opening the bowels. Formerly a substance or a muscle supposed to have power of opening any of the passages.

Aperinous, ah-per'in-us (*a, perin,* scrotum). Devoid of scrotum.

Aperiodic, a-pe-re-od'ik. Not periodical.

Aperistalsis, ah-per-e-stal'sis. Absence of vermicular movement of intestines.

Aperistaton (ah-per-is'tat-on) or **Aperistatum,** ah-per-is'tat-um (*a, peristemi,* to surround). Ulcer not dangerous nor surrounded by inflammation.

Aperitive (ap-e'rit-iv) or **Apertive,** ap'ur-tiv. Aperient.

Aperitropal, ah-per-it'ro-pal (*a, peritrope,* turning about). Growing abnormally.

Apertor, ap-ur'tor (*aperio,* to open). Having power to open. **A. oc'uli,** levator palpebræ superioris.

Apertorium, ap-ur-to're-um. Instrument for dilating os uteri during labor; speculum.

Apertura, ap-er-tu'rah. Mouth. **A. ante'rior ventric'uli ter'tii cer'ebri,** vulva (cerebri). **A. aquæduc'tus coch'leæ,** opening of aqueduct of cochlea on temporal bone. **A. chor'dæ,** opening internally for canal of chorda tympani. **A. decli'vis,** anus. **A. exte'rior cana'lis inguina'lis,** inguinal ring. **A. inte'rior cana'lis inguina'lis,** see *Inguinal canal.* **A. na'rium,** see *Nares.* **A. pel'vis supe'rior,** see *Pelvis.* **A. spina'lis,** vertebral foramen. **A. thora'cis,** opening of thorax (upper or lower). **A. uteri'na,** see *Tube, Fallopian.*

Ap'erture. Opening. See *Opening, Foramen, Ring,* etc. **A., mas'toid,** opening between tympanic cavity and mastoid cells. **A., umbil'ical,** opening in embryonic alimentary canal at point of union of umbilical vesicle.

Apeuthysmenon, ap-u-this'men-on (*apeuthuno,* to straighten). Rectum.

Apex, a'peks. Point or extremity of a part, as of tongue, nose, etc. **A. beat,** see *Heart.* **A. cor'dis,** apex of heart. **A. lin'guæ,** proglossis. **A. mur'mur,** murmur heard over apex of heart. **A. prostat'icus,** anterior extremity of prostate. **A. pulmo'nis,** apex of lung.

Aph, af, as prefix, see *Apo.*

Aphacia, ah-fa'se-ah. Aphakia.

Aphæ'resis or **Aphære'sia.** Extirpation; hemorrhage.

Aphagia, ah-fah'je-ah (*a, phago,* to eat). Inability to swallow.

Aphakia, ah-fak'e-ah (*a, phakos,* lens). Anomalous refraction caused by absence of crystalline lens, as after operations for cataract; the remedy is in use of powerful convex lenses.

Aphalangiasis, ah-fal-an-je'as-is (*a, phalanx,* phalanx). Stage of Oriental leprosy, recognized chiefly by gangrenous condition of fingers.

Aphanisis (af-an'is-is) or **Aphanismus,** af-an-iz'mus (want of manifestation). Fainting, unconsciousness, marasmus.

Aphanocnidosis, af-an-ok-nid-o'sis (*aphanes,* ob-

scure, *knidosis*, stinging as if by nettles). Obscure or recurrent urticaria.

Aphasia, ah-fas'e-ah (*a*, *phemi*, to say). Speechlessness; term almost entirely restricted to partial or complete speechlessness of cerebral origin. It may result from passive congestion of the brain, from apoplexy or softening of the brain from embolism, or from pressure of foreign growth. It may occur alone or be accompanied by hemiplegia, usually on right side of body; it has been ascribed to lesion of third frontal convolution of cerebrum.

It has been proposed to assign more precise terminology for various forms of defective speech: thus, *alogia*, loss of speech from defective intellection; *amnesia*, *amnesic*, *amnestic*, or *amnemonic aphasia*, from defective memory of words; *aphemia*, from defect in special faculty of language, patient being able to think and write, but not to speak; *alalia*, from defective articulation; *aphasia* being restricted to those who can think, but cannot speak or write, while *agraphia* includes those who can think and speak, but cannot write. **A., amne'sic, amnes'tic,** or **amnemon'ic,** see *Aphasia*. **A., aneu'ral,** A., ataxic. **A. atac'tica,** A., ataxic. **A., atax'ic,** want of power to co-ordinate words in articulation; seat of the lesion is the left third frontal convolution. **A., Bro'ca's,** A., ataxic. **A., commissu'ral,** want of power to connect words with ideas, due to lesion of commissural fibres connecting brain-centres. **A., conduc'tive,** A., commissural. **A., func'tional,** A. not connected with actual lesion of brain. **A., in'sular,** A. from lesion of island of Reil. **A., mo'tor,** A., ataxic. **A., sen'sory,** A., amnesic; word-deafness.

Aphasic, af-a'sic. Relating to aphasia. One affected with aphasia.

Aphassomenos, af-as-som'en-os (*aphasso*, to touch or feel). Touching of parts of generation of female as means of diagnosis; see *Esaphe*.

Aphedra (af'ed-rah) or **Aphedron,** af'ed-ron (*apo*, *hedra*, a seat). Anus; close stool.

Aphedria, af-ed're-ah. Menses.

Aphedros, af'ed-ros. Hemorrhage; anus; close stool.

Aphelxia, af-elks'e-ah (*aphelko*, to abstract). Voluntary inactivity of the whole or part of the external senses to impressions of surrounding objects. Revery, absent-mindedness. **A. inten'ta,** abstraction of mind. **A. otio'sa,** brown study. **A. so'cors,** absence of mind.

Aphemia, ah-fe'me-ah (*a*, *phemi*, to say). Loss of speech; see *Aphasia*.

Aphe'mic. Relating to aphemia; one affected with aphemia.

Aphepsema (af-ep-se'mah) or **Aphepsis,** af-ep'sis (*aph*, *epso*, to boil). Decoction.

Apheresis (af-a'ra-sis) or **Aphæ'resis** (*aphaireo*, to take away). Operation by which any part of the body is separated from another. Condition of animal deprived both of faculties of mind and of mind itself. **A. san'guinis,** excessive hemorrhage.

Aphesis, af'a-sis (relaxation). Remission. Diminution or cessation of disease. Languor and debility of the lower extremities.

Aphilanthropy, ah-fil-an'thro-pe (*a*, *phileo*, to love, *anthropos*, man). Dislike to man; love of solitude; first degree of melancholy.

A'phis vasta'tor. Rhopalosiphum dianthi.

Aphistesis, af-is-ta'sis (*aph*, *istemi*, to place). Abscess.

Aphlegmantous, ah-fleg-man'tus (*a*, *phlegma*, inflammation, mucus). Devoid of inflammation or of mucus. Antiphlogistic.

Aphlogistic, a-flo-jis'tik (*a*, *phlox*, flame). Without inflammation.

Aphodeuma, af-o-du'mah. Excrement; defecation.

Aphodus, af'o-dus (*apo*, *hodos*, a way). Excrement. Death.

Aphonetus, af-o-na'tus. Relating to aphonia.

Aphonia, ah-fo'ne-ah (*a*, *phone*, voice). Aphony; privation of voice or of sounds that should be produced in the glottis. When it is part of a catarrh or a cold, it is commonly of little consequence; when produced by causes acting on the nervous system, as powerful emotion, or without appreciable lesion of the vocal apparatus, *laryngo-paralysis*, *aphonia paralytica*, it frequently resists all remedies. Catalepsy. **A. albumin'urica,** A. dependent on albuminuria. **A. catarrha'lis,** A. clericorum. **A., cen'tric,** A. from disease or injury of central nervous system. **A. clerico'rum,** clergymen's sore throat. **A. ebrio'rum,** A. of drunkards. **A., glot'tic** or **larynge'al,** A. from lesion of muscles of tongue or of vocal bands. **A. Hippocrat'ica,** coma. **A. paralyt'ica,** see *Aphonia*. **A., periph'eral,** A. from external causes, that is, not dependent on disease or injury of central nervous system. **A. spast'ica,** asthma thymicum, due to spasms of tensor muscles of larynx. **A. surdo'rum,** dumbness from deafness.

Aphonic, a-fo'nic. Without voice. **A. fever,** form of fever of which loss of voice is marked symptom.

Aphonus, ah-fo'nus. Aphonic; relating to aphonia.

Aph'ony. Aphonia.

Aphorama (af-o-rah'mah) or **Aphorema,** af-o-ra'mah (*aphorao*, to have in view). Projection or prominence of the eyes.

Aphoresis, af-o-ra'sis (*a*, *phoresis*, carrying). Separation or removal of part by amputation or excision.

Aphoria, af-or'e-ah (*a*, *phero*, to bear). Sterility in the female.

Aphoric, af-or'ik. Sterile.

Aphorme, af-or'ma (occasion). External and manifest cause. Occasional cause of disease.

Aphorous, af'o-rus. Sterile.

Aphrænous, ah-fre'nus (*a*, *phren*, mind). Insane.

Aphrasia, ah-frah'ze-ah (*a*, *phrazo*, to tell). Want of ability to form phrases or express one's self in connected sentence.

Aphrenia, ah-fren'e-ah (*a*, *phren*, mind). Dementia.

Aphrodæscin, af-ro-de'sin (*aphrodes*, frothy). Glucoside from Æsculus hippocastanum.

Aphrodes, af-ro'des (*aphros*, foam). Term applied to blood and excrement.

Aphrodisia, af-ro-diz'e-ah (*Aphrodite*, Venus). Venereal desire; pudenda, coition, puberty.

Aphrodisiac, af-ro-diz'e-ak. Medicine or food believed to be capable of exciting to pleasures of love.

Aphrodisiasmus, af-ro-diz-e-as'mus. Coition, erotomania, puberty.

Aphrodisiography, af-ro-diz-e-og'ra-fe (*grapho*, to describe). Description of pleasures of love or of venereal diseases.

Aphrodisius morbus, af-ro-diz'e-us mor'bus. Syphilis.

Aphrodite, af-ro-de'te (Venus). Venereal appetite.

Aphroditism, af'ro-dit-izm. Hermaphroditism.

Aphrogala, af-rog'al-ah (*aphros*, foam, *gala*, milk). Milk rendered frothy by agitation.

Aphronesis, ah-fro-na'sis (*a*, *phronesis*, thought). Madness; want of judgment.

Aphronia, ah-fro'ne-ah (*a*, *phren*, mind). Cerebral apoplexy.

Aphronitrum, af-ro-nit'rum (*aphros*, foam, *nitron*, nitre). Natrum, soda.

Aphrosyne, af-ros'in-a (*aphros*, foolish). Delirium, insanity.

Aphthæ, af'tha (*apto*, to inflame). *Thrush* or *sore mouth*, *White thrush*, *Milk thrush*, *Soor*. Roundish, pearl-colored vesicles, confined to lips, mouth, and intestinal canal, and generally terminating in curd-like sloughs. Condition is also called *Thrush fungus*, *Pultaceous inflammation of the mouth*, and generally receives two divisions, *Mild* or *Discreet*, and *Malignant* or *Black thrush*. Common thrush is of no consequence, requiring merely use of absorbent laxatives. The malignant variety is rare, of more serious character, and accompanied with typhoid symptoms, typhus aphthoïdeus. Aphthæ are due to a special microscopic vegetable parasitic formation, *Oïdium albicans*. Hence the disease was called Aphthophyton. **A. adulto'rum,** stomatitis, aphthous. **A. angino'sæ,** aphthæ of the throat. **A. epizoö'ticæ,** foot-and-mouth disease. **A. præpu'tii,** herpes præputii. **A. serpen'tes,** cancer aquaticus. **A. trop'icæ,** form of aphthous inflamma-

tion of mouth with catarrh of stomach and bowels, occurring in Dutch E. Indies and on coast of China. **A. vene're**æ, mucous patches.

Aphthaphyte, af'thah-fite (*aphthæ*, *phuton*, a vegetable). Oïdium albicans, parasitic vegetable growth observed in aphthæ.

Aphthenxia (af-thenks'e-ah) or **Aphthenxis**, af-thenks'is (*aphthenkto*, speechless). Central aphasia.

Aphthocacostomia, af-tho-kak-o-stom'e-ah (*aphtho*, *kakos*, bad, *stoma*, mouth). Aphthæ of mouth.

Aphthodes (af-tho-des) or **Aphthoïdes** (*aphthæ*, *odes*). Aphthous-like; belonging to aphthæ.

Aphthoid, af'thoid. Like aphthæ.

Aphthongia, af-thon'ge-ah (*a*, *phthongos*, sound). Spasmodic aphonia, due to contraction of muscles to which hypoglossal nerve is distributed.

Aphthophyton, af-thof'it-on. Aphthophyte.

Aphthous, af'thus. Belonging to aphthæ; complicated with aphthæ, as A. fever.

Aphyllon uniflorium, ah-fil'lon u-ne-flo're-um. Cancer root, square root; astringent.

Apiastrum, ap-e-as'trum (*apis*, bee). Melissa; wild parsley.

Apical, a'pik-al. Relating to the apex.

Apices (ap'es-es, pl. of **Apex**) **cor'porum cavernoso'rum pe'nis**. See *Cavernous bodies*. **A. cru'rum medul'læ oblonga'tæ**, corpora striata. **A. digito'rum pu'pulæ**, see *Apex*.

Apiin, a'pe-in. $C_{27}H_{22}O_{16}$. White powder from Petroselinum sativum, resembling pectic acid.

Apilepsia, ap-il-ep'se-ah (*apo*, *lepsis*, seizure). Cerebral apoplexy.

Apinoid cancer, a'pin-oid kan'sur (*apines*, free from dirt). See *Napiform*.

Apiol, a'pe-ol. *Parsley oil* (*apium*, parsley, *oleum*, oil). Yellowish oily liquid, $C_{12}H_{14}O$, obtained from Apium petroselinum, or parsley, which has been used as an antiperiodic in intermittent fever, amenorrhœa, and dysmenorrhœa, and in night-sweats of phthisis in doses of 5 to 10 drops. Camphoraceous principle from parsley, employed as substitute for quinine.

Apionia, ah-pe-o'ne-ah (*a*, *pion*, fat). Leanness.

Apionta, ap-e-on'tah (*apeimi*, to go away). Excretions, semen.

Apios, ah'pe-os. Apios tuberosa, Pyrus communis. **A. tubero'sa**, *Groundnut*, *Wild bean*, *Sagaban*. Root is used as food.

Apis, ah'pis. Powdered bee, once used as diuretic.

A'pisin. Poison of bee.

Apium, ap'e-um. A. graveolens. **A. am'mi**, ammi. **A. ani'sum**, Pimpinella anisum. **A. car'vi**, carum. **A. graveo'lens**, *Smallage*, ord. Umbelliferæ. Plants, roots, and seeds are aperient and carminative. *Celery* is a variety. **A. horten'se**, A. graveolens. **A. monta'num**, Athamanta aureoselinum. **A. officina'rum**, A. graveolens. **A. paluda'pium**, A. graveolens. **A. palus'tre**, A. graveolens. **A. petræ'um**, Bubon macedonicum. **A. petroseli'num**, *Common parsley*. Root, *petroselinum*, and seeds are diuretic and aperient. See *Apiol*. **A. sati'vum**, Petroselinum sativum. **A. silves'tre**, mint. **A. si'um**, Sium nodiflorum. **A. vulga're**, A. graveolens.

Aplacental, a-pla-sen'tal. Not having placenta.

Aplanasia, ah-plan-ah'ze-ah (*a*, *planao*, to wander). Absence of spherical aberration.

Aplanatic, a-plan-at'ik. Not having any spherical aberration. **A. lens**, rectilinear lens, corrected for aberration. **A. search'er**, lenses so arranged in a microscope as to correct aberration.

Aplanatism, a-plan'a-tizm. Absence of spherical aberration.

Aplasia, ah-plaz'e-ah (*a*, *plasis*, formation). Defective development or nutrition; congenital atrophy.

Aplastic, a-plas'tik (*a*, *plasso*, to form). Not capable of forming; not organizable; structureless. **A. el'ement**, one unsusceptible of further organization. **A. lymph**, material not coagulable or organizable, a product of disease or inflammation.

Apleuria, ah-plu're-ah. See *Apleuros*.

Apleuros, ah-plu'ros (*a*, *pleuron*, a rib). One without ribs or pleuræ. The condition is *Apleu'ria*.

Aplotomy, a-plot'om-e (*aploos*, simple, *tome*, incision). Simple incision.

Aplysia, ap-liz'e-ah. Want of cleanliness.

Apneology, ap-ne-ol'o-je. Apnæology.

Apneumatic, a-nu-mat'ik (*a*, *pneuma*, air). Without air.

Apneumatosis, ah-nu-ma-to'sis (*a*, *pneumatoo*, to distend with wind). Absence or deficiency of inflation of lungs; see *Atelectasis*.

Apneumia, ah-nu'me-ah (*a*, *pneumon*, lung). Monstrosity in which there is absence of lungs.

Apneumonervia (ah-nu-mo-ner've-ah) or **Apneumoneu'ria** (*a*, *pneumon*, lung, *neuron*, nerve). Want of nervous action in the lungs.

Apneustia, a-news'te-ah. Apnœa, asphyxia.

Apneustus, a-news'tus. Apnus.

Apnœa, ap-ne'ah (*a*, *pneo*, to respire). Absence of respiration or insensible respiration. Cessation of breathing from non-excitation of respiratory nerve-centre. Orthopnœa, asphyxia. **A., car'diac**, apnœa from heart disease, angina pectoris. **A. infan'tum**, asthma thymicum. **A. neonato'rum**, see *Asphyxia*.

Apnœasphyxia, ap-ne-as-fiks'e-a. Asphyxia.

Apnœic, ap-ne'ik. Apnus.

Ap'nus (*a*, *pneo*, to breathe). One devoid of respiration. Applied to cases in which respiration is so slight and slow that it seems suspended.

Apo, ap'o. *Apo* as a prefix denotes from, of, off, out, out of.

Apoacon'itine. Alkaloid derived from aconitine by dehydration. $C_{33}H_{41}NO_{11}$. It closely resembles aconitine.

Apoatropine, ap-o-at'ro-peen. Derived from atropine by action of nitric acid, ammonia, and chloroform.

Apobiosis, ap-o-be-o'sis (*apo*, *bios*, life). Death.

Apoblema, ap-o-bla'mah (*apo*, *ballo*, to cast off). Abortion; product of abortion.

Apobole, ap-ob'o-la (same etymon). Abortion.

Apobrasma, ap-o-bras'mah (*apo*, *brasso*, to winnow). Bran.

Apobrochismus, ap-o-bro-kiz'mus (*apo*, *brochizo*, to strangle). Ligation.

Apocapnismus, ap-o-kap-niz'mus (*apo*, *kapnos*, smoke). Fumigation.

Apocatastasis, ap-o-kat-as'tas-is (*apo*, *kathistemi*, to re-establish). Restoration; cessation; subsidence.

Apocatharsis, ap-o-kath-ar'sis (*apo*, *kathairo*, to purge). Catharsis.

Apocathartic, ap-o-kath-ar'tik. Cathartic.

Apocaulesis (ap-o-kaw-la'sis) or **Apocaulisis**, ap-o-kawl'is-is (breaking off). Transverse fracture; amputation, as of the penis.

Apocenosis, ap-o-sen-o'sis (*apo*, *kenosis*, evacuation). Morbid flux; partial evacuation or discharge. **A. diabe'tes melli'tus**, diabetes. **A. ptyalis'mus melli'tus**, see *Salivation*. **A. vom'itus pyro'sis**, pyrosis.

Apocenotic, ap-o-se-not'ik (*apo*, *kenoo*, to evacuate). Producing increased evacuation.

Apochore'ma (*apochoreo*, to pass off). Excretion.

Apochoreon, ap-o-ko're-on. Excrement.

Apochremma, ap-o-krem'mah (*apo*, *chremma*, spit). Sputum.

Apochrempsis, ap-o-kremp'sis. Exspuition.

Apochrœosis, ap-o-kre-o'sis (*apo*, *chroma*, color). Destruction of color; blanching.

Apochromatic, ap-o-kro-mat'ik (*apo*, *chroma*, color). Producing image devoid of color; as lens, so called, with high correction of aberrations.

Apochylismus (ap-o-ki-liz'mus) or **Apochylisma**, ap-o-ki-liz'mah (*apo*, *chulos*, juice). Expression of juices of vegetables.

Apoch'ysis. Cataract.

Apoclasma, ap-o-klas'mah (*apo*, *klao*, to break). Abduction; separation of fragments of bone.

Apocleisis, ap-o-kli'sis (*apokleio*, to shut out). Disgust; want of appetite.

Apocodeia, ap-o-ko-di'ah. See *Codeia*.

Apocope, ap-ok'o-pa (*apo*, *kope*, act of cutting). Abscission; wound with loss of substance; fracture with loss of part of bone; amputation.

Apocopus, ap-ok'o-pus (same etymon). Castrated.

Apocrisis, ap-ok'ris-is (*apokrino*, to separate). Contagion, excrement, secretion, or evacuation.

Apocroustic, ap-o-krous'tik (*apo*, *krouo*, to push). Astringent, repellent, refrigerant.

Apocrustic, ap-o-krus'tik. Apocroustic.

Apocyesis, ap-o-se-a'sis (*apo*, *kueo*, to be pregnant). Parturition.

Apocyn, ap'o-sin. See *Apocynum cannabinum*.

Apocynein, ap-o-sin'e-in. Glucoside from apocynum.

Apocynin, ap-os'in-in. Amorphous resinous substance derived from apocynum, like digitalin in its properties.

Apocynum androsæmifolium, ap-ok'sin-um an-dro-se-me-fo'le-um (Apocynum, Ph. U. S.) (*apo*, and *kuon*, a dog, because esteemed of old to be fatal to dogs). *Dog's bane, Bitter dog's bane, Milkweed, Bitter root, Honeybloom, Catchfly, Flytrap, American Ipecac*, ord. Apocynaceæ. Root of this American plant is emeto-cathartic, diuretic, and diaphoretic. **A. cannab'inum**, popularly called *Indian hemp, Canadian hemp*. Root of this American plant is emetic, cathartic, diaphoretic, and diuretic; given in dropsy. Two principles, *Apocynin* and *Apocynein*, have been extracted from it. **A. hypericefo'lium**, variety of A. cannabinum which, as well as A. androsæmifolium, abounds in milky juice, which, when applied to the skin, produces troublesome eruption resembling flea-bites. **A. no'væ Ang'liæ hirsu'tum**, Asclepias tuberosa. **A. orange**, Asclepias tuberosa. **A. scan'dens**, Allamanda. **A. Vene'tum**, plant of S. Europe; root is emeto-cathartic.

Apodacrytic, ap-o-dak-rit'ik (*apo*, *dakruo*, to weep). Occasioning flow of tears, and then arresting them.

Apodal, ah'pod-al (*a*, *pous*, foot). Without feet.

Apodemialgia, ap-o-dem-e-al'je-ah (*apodemia*, journey, *algos*, pain). Nostalgia or home-sickness, or the opposite desire to leave one's country.

Apodia, ap-od'e-ah (*a*, *pous*, a foot). Absence of feet; hence *A'pous* or *A'pus*, one who has no feet.

Apodicinchonine, ap-o-de-sink'o-neen. Alkaloid from cinchonine and cinchonidine.

Apodipo'sis. Steatosis.

Apodiquinidine, ap-o-di-quin'id-een. Diquinicine.

Apodosis, ap-od'o-sis (return). Passage from one part to another, as of the intestines.

Apodous, ap'o-dus (*a*, *pous*, foot). Devoid of feet.

Apodyterium, ap-o-dit-a're-um (*apoduo*, to strip off). Anteroom where bathers stripped themselves in ancient gymnasia.

Apogalactismus, ap-o-gal-ak-tiz'mus (*apo*, *gala*, milk). Weaning.

Apogalaktos, ap-o-gal-ak'tos. Child that has been weaned.

Apogeusis (ap-o-goo'sis) or **Apogeustia**, ap-o-goos'te-ah (*apo*, *geusis*, taste). Loss, absence, or defect in sense of taste.

Apoglauco'sis. Glaucosis.

Apogon, ap-o'gon (*a*, *pogon*, beard). Beardless.

Apogonum, ap-og'o-num (*apo*, *ginomai*, to exist). Living fœtus in utero.

Apohyal, ap-o-hi'al. Relating to the anterior cornua of the hyoid; earliest formation of styloid cornua of hyoid.

Apokenotic, ap-o-ken-ot'ik (*apo*, *kenoo*, to evacuate). Producing increased evacuation, whatever may be the means employed.

Ap'olar. Without pole or process. See *Neurine*.

Apolepisis (ap-o-lep'i-sis) or **Apolepis'mus** (*apo*, *lepis*, a scale). Desquamation.

Apolepsis (ap-o-lep'sis) or **Apolep'sia** (*apolambano*, to retain). Retention, cessation, suppression; asphyxia, aphonia, epilepsy.

Apolexis, ap-o-leks'is (*apolego*, to cease). Old age; decrepitude.

Apolino'sis, ap-ol-in-o'sis (*apo*, *linon*, flaxen thread). Mode of operating for fistula in ano by thread or ligature.

Apolipsis, ap-o-lip'sis. Apolepsis.

Apollinaris, ap-ol-lin-ah'ris. Agreeable effervescing water from mineral springs in Prussia. **A. alter'cum**, hyoscyamus.

Apolysia (ap-o-liz'e-ah) or **Apol'ysis** (*apoluo*, to loosen). Solution, relaxation. Debility of limbs. Looseness of bandages. Expulsion of fœtus and dependencies. Termination of disease.

Apomag'ma. Cathartic.

Apomathema (ap-o-math-a'mah) or **Apomathe'sis** (*apo*, *manthano*, to learn). Forgetfulness.

Apomeli, ap-om'a-le (*apo*, *meli*, honey). Oxymel or decoction made of honey.

Apomenia, ap-o-ma'ne-ah (*apo*, *menia*, menses). Vicarious menstruation.

Apomorphia (ap-o-mor'fe-ah) or **Apomorphine**, ap-o-mor'feen. $C_{17}H_{17}O_2N$. Alkaloid prepared by action of strong solution of hydrochloric acid, at high temperature, upon morphia, or by treating morphia with solution of chloride of zinc at 120° C. *Apomorphinæ hydrochloras* (Ph. U. S. and Br.), $C_{17}H_{17}NO_2,HCl$, chloride or hydrochlorate of apomorphia, the salt generally used, is a white, crystalline, soluble powder; direct emetic in dose of gr. $\frac{1}{10}$–$\frac{1}{5}$; expectorant in doses of gr. $\frac{1}{100}$–$\frac{1}{50}$. It is also administered hypodermically.

Apomorphinæ (ap-o-mor-fe'ne) **chlor'idum** or **mu'rias**. See *Apomorphia*.

Apomorphinum, ap-o-morf-e'num. Apomorphine.

A. hydrochlor'icum, apomorphine chloride.

Apomyeline, ap-o-mi'el-een (*apo*, *muelos*, brain). Organic principle, $C_{54}H_{109}N_2PO_9$, obtained from brain of man.

Apomylenas, ap-o-mil-e'nas (*apomullaino*, to make a wry mouth). One who pushes his lips forward, pressing them against each other; occasionally symptom of nervous fever.

Apomythosis (ap-o-mith-o'sis) or **Apomyttosis**, ap o-mit-to'sis (*apomusso*, to snore). Disease in which there is stertor.

Aponeurog'raphy (*aponeurosis*, *graphe*, description). Description of aponeuroses.

Aponeurology (ap-o-nu-rol'o-je) or **Aponeurosiol'ogy** (*aponeurosis*, *logos*, discourse). Anatomy of aponeuroses. Description of fasciæ.

Aponeurosis (ap-o-nu-ro'sis) or **Aponevro'sis** (*apo*, *neuron*, nerve). The ancients called every white part *neuron*, and regarded an aponeurosis as a nervous expansion. Aponeuroses are white, shining membranes, very resisting, and composed of fibres interlaced. Some are continuous with muscular fibres, and differ only from tendons by their flat form. They are called *Aponeuroses of insertion* when at extremity of muscles attaching them to bone; *Aponeuroses of intersection* if they interrupt continuity of muscle and are continuous on both sides with muscular fibres. Others, surrounding the muscle and preventing its displacement, are called *enveloping Aponeuroses*. *A. of investment* are such as belong to the distribution of fascia on a part or limb. *A. of origin* are septa between muscles from which fibres come off. **A., abdom'inal**, abdominal fascia. **A., an'al**, anal fascia. **A., antibrach'ial**, A. of arm continued on forearm. **A. bicip'itis**, fascia of biceps. **A., brach'ial**, A. surrounding muscles of arm. **A., cer'vical**, fascia of neck; cervical fascia. **A., coro'nal**, galea aponeurotica capitis. **A. cra'nii**, aponeurosis of skull. **A., cru'ral** or **cru'ris**, fascia lata. **A., del'toid**, continuation of brachial a. over deltoid muscle. **A. of di'aphragm**, central tendon of diaphragm. **A. dorsa'lis**, dorsal fascia or aponeurosis. **A., epicra'nial**, see *Galea aponeurotica capitis*. **A. of external oblique muscle**, fibrous expansion of this muscle, forming Poupart's and Gimbardt's ligaments. **A., femor'al**, fascia lata. **A. of fore'arm**, A., antibrachial. **A., il'iac**, iliac fascia. **A. of inter'nal oblique mus'cle**, fibrous expansion of this muscle. **A., interspi'nous**, see *Interspinous*. **A. of leg**, A. of calf of leg. **A. lumba'ris**, lumbar fascia. **A., occip'itofron'tal**, A., epicranial. **A. or'bito-ocula'ris**, fascia separating orbital fat from middle and posterior portions of eyeball. **A., pal'mar**, fascia of palm of hand. **A., pel'vic**, pelvic fascia. **A., perine'al**, perineal fascia. **A. of pharynx**, see *Pharyngeal aponeurosis*. **A., plan'tar**, plantar fascia. **A. tempora'lis**, temporal fascia. **A. of ver'tebræ**, see *Vertebral aponeurosis*. **A. vertebra'lis**, lumbar fascia. **A. vola'ris**, palmar fascia.

Aponeurositis, ap-on-u-ro-se'tis. Inflammation of aponeurosis.

Aponeurotic, ap-on-u-rot'ik. Relating to aponeurosis, as expansion.

Aponeurotome, ap-on-u'ro-tome (*aponeurosis, tome,* incision). Instrument, as bistoury, for dividing aponeurosis, as of the abdomen.

Aponeurotomy, ap-on-u-rot'o-me (*aponeurosis, tome,* incision). Anatomy or dissection or division of aponeurosis.

Aponevrosis, ap-o-nev-ro'sis. Aponeurosis.

Aponia, ap-on'e-ah (*a, ponos,* pain). Freedom from pain.

Aponipsis, ap-o-nip'sis (*apo, nipto,* to wash). Ablution.

Aponous, ap'on-us (*a, ponos,* pain). Free from pain; not causing pain.

Apopallesis (ap-o-pal-la'sis) or **Apopal'sis** (*apopallo,* to throw off). Expulsion; protrusion; abortion.

Apopartheneusis, ap-o-par-then-u'sis. Defloration.

Apopatema, ap-o-pat-a'mah (*apo, patos,* dirt). Excrement.

Apophlegmatic, ap-o-fleg-mat'ik (*apo, phlegma,* mucus). Producing discharge of phlegm.

Apophlegmatisant, ap-o-fleg-mat'iz-ant. Apophlegmatic; medicine facilitating upward expulsion of mucus from the digestive or air passages, as gargle, errhine, sialagogue, etc.

Apophlegmatism, ap-o-fleg'mat-izm. Action of apophlegmatisants.

Apophrades, ap-of'rah-des (*apophras,* unlucky). Epithet applied to days on which favorable change is not expected to occur in disease.

Apophraxis, ap-o-fraks'is (*apophrasso,* to obstruct). Amenorrhœa.

Apophtharma, ap-o-thar'mah (*apo, phtheiro,* to corrupt). Abortion; medicine to procure abortion; aborted fœtus.

Apophthora, ap-of'tho-rah. Miscarriage; abortion.

Apophthorus, ap-of'tho-rus. Abortifacient.

Apophyas, ap-of'e-as (*apo, phuo,* to spring). Ramification of vein or artery.

Apophysar (ap-of'is-ar) or **Apophyseal,** ap-of-iz'e-al. Relating or appertaining to apophysis.

Apophysis, ap-of'is-is (*apo, phuo,* to rise). Appendix, process of bone. When the apophysis is yet separated from body of bone by intervening cartilage, it is called *Epiphysis.* Apophyses or processes are at times distinguished by epithets expressive of their form, as coracoid, styloid, etc.; others are called trochanter, tuberosity, etc. **A., acro'mial,** acromion. **A., an'cyroid,** coracoid process. **A., artic'ular,** articular process. **A., bas'ilar,** basilar process. **A., cli'noid,** clinoid process. **A., cor'acoid,** coracoid process. **A., en'siform,** ensiform process. **A., false,** epiphyses. **A. gra'cilis,** processus gracilis of malleus. **A. of Ingras'sias,** lesser ala of sphenoid bone. **A. lenticula'ris,** orbicular process of incus. **A., mal'ar,** malar process. **A. mamilla'ris,** olfactory bulb. **A., mas'toid** or **maxilla'ris,** mastoid process. **A., odon'toid,** odontoid process. **A., pter'ygoid,** pterygoid process. **A. Ravia'na,** processus gracilis of malleus. **A., sphenoid'al,** sphenoidal process of nasal bone. **A., sty'loid,** styloid process. **A., trans'verse,** transverse process. **A., vagi'nal,** vaginal process. **A., zygomat'ic,** zygomatic process.

Apopiesma, ap-o-pe-ez'mah (*apopiezo,* to compress). Fancied expression of humors by application of bandages.

Apoplanesis (ap-o-plan-a'sis) or **Apoplan'ia** (*apo, planao,* to lead astray). Deviation of fluids into vessels or location not intended for them.

Apoplec'ta. Internal jugular vein.

Apoplectic, ap-o-plek'tik (*apoplektos,* thunderstruck). Relating to apoplexy; individual laboring under apoplexy; remedy in apoplexy. Term applied to constitution or temperament, *Architectura apoplectica, Habitus apoplecticus* or *quadratus* or *torosus,* predisposing to it or to symptoms characterizing apoplexy, as A. sleep or A. stroke. Jugular veins have been called *apoplectic veins, Venæ apoplecticæ.* **A. cell,** cavity remaining in encephalon after effusion of blood and subsequent absorption. **A. conges'tion of the brain,** usually a form of epilepsy, sudden in its attack, and with passing slight apoplectic symptoms. **A. cyst,** cyst around blood-clots after hemorrhage in the brain. **A. fo'cus,** point of greatest collection of blood in hemorrhage of internal organs.

Apoplectiform (ap-o-plek'te-form) or **Apoplectoid,** ap-o-plek'toid (*apoplexia, forma,* form). Resembling apoplexy. **A. deaf'ness,** Menière's disease.

Apoplectig'enous (*apoplexia, gennao,* to produce). Producing apoplexy.

Apoplexia, ap-o-pleks'e-ah. Apoplexy. **A. bilio'sa,** apoplexy from presence of bile in the brain. **A. capilla'ris,** capillary apoplexy. **A. catalep'sia** or **catalep'tica,** catalepsia. **A. cerebra'lis** or **cer'ebri,** see *Apoplexy.* **A. choroï'dea,** see *Choroid.* **A. cor'dis,** hæmocardiorrhagia. **A. epilep'tica,** apoplexy, epileptic. **A. for'tis,** sudden and violent apoplexy. **A. ful'minans,** apoplexy, fulminant. **A. hæmorrhag'ica,** apoplexy. **A. hepat'ica,** hepatorrhagia. **A. hydrocephal'ica,** hydrocephalus internus. **A. interarachnoidea'lis,** apoplexy, meningeal. **A. intermeningea'lis,** apoplexy, meningeal. **A. intestina'lis neonato'rum,** melæna neonatorum. **A. lac'tea,** apoplexy, milk. **A. medulla'ris** or **medul'læ spina'lis,** apoplexia myelitica. **A. meningæ'a** or **meningea'lis,** apoplexy, meningeal. **A. mephit'ica,** apoplexy, mephitic. **A. myelit'ica,** hemorrhage into spinal marrow; spinal apoplexy. **A. neonato'rum,** meningeal apoplexy of new-born; asphyxia neonatorum. **A. nervo'sa,** nervous apoplexy. **A. nervo'sa traumat'ica,** concussion of the brain. **A. oc'uli,** hæmophthalmia. **A. pituito'sa,** serous apoplexy. **A. placen'tæ,** apoplexy, placental. **A. puerpera'rum,** fever, vitular. **A. pulmona'lis** or **pulmo'num,** apoplexy, pulmonary; see *Hæmoptysis.* **A. rachia'lis,** A. myelitica. **A. rena'lis,** apoplexy, renal. **A. ret'inæ,** apoplexy, retinal. **A. sanguin'ea,** see *Apoplexy.* **A. sero'sa,** serous apoplexy. **A. sim'plex,** nervous apoplexy. **A. spasmod'ica,** nervous apoplexy. **A. spina'lis,** A. myelitica. **A. suspirio'sa,** apoplexy with sighing respiration. **A. temulen'ta,** see *Temulentia.* **A. tex'tus cellulo'si,** hemorrhage into connective tissue. **A. traumat'ica,** hemorrhage from injury. **A. tuba'rum,** hemorrhage of Fallopian tubes. **A. vaporo'sa,** apoplexy, hysterical. **A. venena'ta,** apoplexy from poisoning. **A. ve'ra,** apoplexy, sanguineous. **A. vermino'sa,** apoplexy from worms.

Apoplexy, ap'o-pleks-e (*apoplesso,* to strike with violence). Interstitial hemorrhage, effusion of blood occurring suddenly into substance of an organ or tissue, as the brain, lung, etc. Apoplexy and cerebral hemorrhage were formerly considered synonymous, under the names *Cerebral apoplexy* or *Hemorrhage,* and *Sanguineous apoplexy,* characterized by diminution or loss of sensation and mental manifestation, by cessation, more or less complete, of motion, and by comatose state, circulation and respiration continuing. It generally consists in pressure upon the brain, either from turgescence of vessels or extravasation of blood, *Hæmencephalus.* Cerebral apoplexy may occur, however, without intracranial extravasation, although there is usually disease of the cerebral blood-vessels; and cerebral hemorrhage may not be attended with apoplectiform phenomena. Apoplexy rather denotes a comatose condition resulting from pressure on the brain, from any cause tending to produce cerebral congestion, such as immoderate use of stimulants, degeneration of nervous and vascular structures, valvular disease of the heart, etc. Congestive apoplexy implies hyperæmia of the brain or its membranes. The general prognosis is unfavorable, especially when apoplexy occurs after the age of 35. When accompanied with hard, full pulse and flushed countenance, it is called *Sanguineous apoplexy;* when with feeble pulse and pale countenance and evidences of serous effusion, *Serous apoplexy.* Embolic apoplexy, apoplectiform cerebral embolism, results from plugging up of the cerebral vessels with embolia, an anemic condition of the brain resulting from insufficient blood-sup-

ply. In nervous apoplexy, simple apoplexy, no lesion whatever may be perceptible on dissection, although the patient may have died under characteristic phenomena of apoplexy.

Ap'oplexy, amphibles'troid, A., retinal. **A., arte'rial,** A. from rupture of an artery. **A., arthrit'ic,** A. from gout or rheumatism. **A., asthen'ic,** A. from debility. **A., bul'bar,** A. of medulla oblongata. **A., cap'illary,** rupture of capillary vessels, with effusion. **A., car'dial,** A. of heart, from extravasation of blood into the heart-cavities. **A., cer'ebral,** see *Apoplexy.* **A., cho'roid** or **choroid'al,** hemorrhage into the choroid coat of the eye. **A., conges'tive,** see *Apoplexy.* **A., consec'utive,** A. from suppression of usual hemorrhage or evacuation. **A., cuta'neous,** hemorrhage of the surface of the body, purpura hæmorrhagica. **A., embol'ic,** see *Apoplexy* and *Embolism.* **A., enton'ic,** apoplexia fortis. **A., epilep'tic,** coma and epileptiform phenomena from brain disease. **A., essen'tial,** see *Apoplexy.* **A., ful'minant,** A. occurring suddenly and of very violent character. **A., gout'y,** A., arthritic, A., cerebral. **A. of heart,** cardiohæmorrhagia. **A., heat,** sunstroke. **A., hemorrha'gic,** A., sanguineous; see *Apoplexy.* **A., hepat'ic,** hemorrhage into substance of liver. **A., hydrocephal'ic,** coma due to hydrocephalus. **A., idiopath'ic,** A. from effusion into the brain. **A., interlob'ular,** hemorrhage between lobes of the lung. **A., intrameninge'al,** see *Intrameningeal.* **A. of liv'er,** A., hepatic; see *Liver, apoplexy of.* **A., meninge'al,** hemorrhage from meninges of brain or spinal marrow, generally into great cavity of arachnoid, but not into substance of either. **A., mephit'ic,** A. from inhalation of noxious vapors. **A., metastat'ic,** A. from metastasis, as in gout or rheumatism. **A., milk,** A. due to metastasis of milk. **A., mus'cular,** hemorrhage into muscular tissue. **A., narcot'ic,** A. from narcotic poisoning. **A., ner'vous,** anæmia of the brain; see *Apoplexy.* **A., ova'rian,** see *Hæmatocele, pelvic.* **A., pancreat'ic,** hemorrhage into the pancreas or in pancreatic region. **A., partu'rient,** fever, vitular. **A., pas'sive,** A., asthenic. **A., pitu'itous,** A., serous; see *Apoplexy.* **A., placen'tal,** hemorrhage into the placenta. **A., puer'peral,** fever, vitular. **A., pul'monary,** hæmoptysis; hemorrhage from capillaries of the lungs into cells, tubes, tissues, etc. **A., re'nal,** effusion of blood into substance of kidney. **A., ret'inal,** retinitis apoplectica. **A., rheumat'ic,** rheumatism, cerebral. **A., sanguin'eous,** see *Apoplexy.* **A., se'rous,** see *Apoplexy.* **A., sim'ple,** A., nervous. **A., spi'nal,** apoplexia myelitica. **A., sple'nic,** hemorrhage of spleen; splenic fever; see *Anthrax.* **A., subconjuncti'val,** hemorrhage beneath conjunctiva. **A., thun'dering,** intense and rapidly fatal form of apoplexy. **A., tox'ic,** A., narcotic, A., mephitic. **A., traumat'ic,** A. from injury. **A., u'terine,** hemorrhage into structure of uterus. **A., ve'nous,** hemorrhage from venous congestion. **A., verm'inous,** A. due to presence of worms in intestines. **A., vit'ular,** fever, vitular.

Apopneusis, ap-o-nu'sis (*apo, pneo,* to breathe). Exhalation, expiration.

Apopnixis, ap-o-niks'is (*apo, pnigo,* to strangle). Suffocation.

Apopnoë (ap-o-no'e) or **Apopnœa,** ap-o-ne'ah (*apo, pneo,* to breathe). Expiration.

Apopsychia, ap-o-sik'e-ah (*apo, psuche,* breath of life). Syncope.

Apopsyxia (ap-o-siks'e-ah) or **Apopsyxis,** ap-o-siks'is. Exhalation, refrigeration; syncope, death.

Apoptosis, ap-op-to'sis (*apopipto,* to fall down). Relaxation of bandages or ligaments.

Apoquinamine, ap-o-kwi'nam-een. Amorphous alkaloid from boiling quinamine or quinamidine with hydrochloric acid; isomeric with homocinchonine.

Aporetin, ap-o-ret'in (*apo, rhetine,* resin). Resinous material obtained from rhubarb.

Aporia, ap-o're-ah (*aporos,* without exit). Malaise. Difficulty of diagnosis, prognosis, or treatment.

Aporrhinosis, ap-or-rhin'o-sis (*apo, rhis,* nose). Discharge from the nose.

Aporrhoë (ap-or'rho-a), **Aporrhœa** (ap-or-rhe'ah), or **Aporrhysis,** ap-or'rhis-is (*aporrheo,* to flow from). Emanation, effluvium, contagion. Falling off of hair; alopecia.

Aposcemma, apo-skem'mah (*aposkepto,* to lie down, to direct one's self forward). Afflux of fluids toward a part. Metastasis. Excrement.

Aposcenosis, ap-o-sen-o'sis. Apocenosis.

Aposceparnisis (ap-o-se-par'nis-is) or **Aposceparnismus,** ap-o-se-par-nis'mus (*apo, skeparnon,* hatchet). Wound of cranium by cutting instrument, in which a piece of bone has been cut out.

Aposcepsis, ap-o-sep'sis. Aposcemma.

Aposchasis (ap-os'kas-is) or **Aposchas'mus** (*aposchazo,* to scarify). Scarification; slight superficial incision; bloodletting.

Aposcythisis, ap-o-sith'is-is (*aposkuthizo,* to scalp). Removal of scalp.

Aposepedine, ap-o-sep'ed-een (*apo, sepedon,* putrefaction). Impure leucine, a result of putrefaction of protein substances.

Aposepsia (ap-o-sep'se-ah) or **Aposepsis,** ap-o-sep'sis (*apo, sepsis,* putrefaction). Putrefaction.

Aposia, ap-os'e-ah (*a, posis,* drink). Absence of desire for liquids.

Apositia, ap-o-sish'e-ah (*apos, sitos,* food). Aversion for food; loss of appetite.

Apositic, ap-o-sit'ik (same etymon). Destroying appetite or suspending hunger.

Apospasmus, ap-o-spaz'mus (*apospao,* to tear or lacerate). Solution of continuity, especially of ligaments.

Apospastic, ap-o-spas'tik. Derivative. Counter-irritant. Pulling apart.

Aposphacelisis (ap-o-sfas-el'is-is) or **Aposphacelismus,** ap-o-sfas-el-iz'mus (*apo, sphakelos,* mortification). Gangrene in wounds and fractures, owing to tight bandages.

Aposphinxis, ap-o-sfinks'is (constriction, compression). Action of tight bandage.

Apospongismus, ap-o-spon-jis'mus. Act of sponging.

Apostagma (ap-o-stag'mah) or **Apostalagma,** ap-o-stal-ag'mah (*apo, stalazo,* to drop). Saccharine liquor flowing from grapes when not yet pressed. Errant or wandering abscess.

Apostasia (ap-o-stah'ze-ah) or **Apostasis** (*apo, istemi,* to stop). Separation of fragments of bone. Removal of disease by abscess or secretion. Metastasis.

Apostaxis, ap-os-taks'is (*apostazo,* to distil from). Defluxion of any humor, as of blood from the nose.

Apostem (ap-os'tem) or **Apostema,** ap-os-ta'mah (*aphistemi,* to recede from). Affection in which parts, previously in contact, are separated by fluid collected between them; abscess; watery tumor; tumor in general. **A. cer'ebri,** suppuration of the brain. **A. empye'ma,** empyema. **A. paru'lis,** parulis. **A. phalan'gum,** small abscesses on the fingers of working-people. **A. psoat'icum,** lumbar abscess. **A. vento'sum,** subcutaneous emphysema.

Aposte'ma. Apostem.

Apostematic, ap-os-tem-at'ik. Relating to abscess; disposed to suppurate.

Apostemation (ap-os-te-ma'shun) or **Apostematium,** ap-os-te-mah'she-um. Small abscess; formation of abscess.

Apostematoid, ap-o-stem'at-oid (*apostema,* abscess, *eidos,* resemblance). Resembling an abscess.

Apostematophthisis, ap-o-stem-at-o-te'sis. Phthisis due to suppuration.

Apostematous, ap-o-stem'at-us. Apostematic.

Aposterigma, ap-o-ster-ig'mah (*aposterizo,* to support). Anything supporting a diseased part, as cushion, pillow, etc. Deep-seated and inveterate disease of the intestines.

Aposthia, ap-os'the-ah (*a, posthe,* prepuce). Want of prepuce.

Aposthume, ap-os'thewm. Abscess, apostema.

Apostoli's method. Treatment of uterine fibroids by electricity with one pole over the abdomen, the other over the uterus.

Apostrophe, ap-os'tro-fa (*apo, strepho*, to turn). Aversion or disgust for food; direction of humors toward other parts.

Apostume, ap-os'toom. Abscess.

Aposyringesis, ap-o-sir-in-ja'sis (*aposuringousthai*, to end in a fistula). Conversion into a fistula; labor.

Aposyringo'sis (*apo, surinx*, fistula). Formation of fistula.

Aposyrma, ap-o-sur'mah (*apo, suro*, to tear). Abrasion, desquamation.

Apotelesma, ap-o-tel-ez'mah (*apo, telesma*, completion). Result or termination of disease; amulet.

Apotexis, ap-o-teks'is. Wasting away; phthisis.

Apothanasia, ap-o-than-ah'ze-ah (*apo, thanatos*, death). Positive cessation of life.

Apotheca, ap-o-tha'kah (*apo, tithemi*, to place). Place where things are kept, and therefore a shop; hence, place or vessel wherein medicines are kept; apothecary shop.

Apoth'ecaries' weight. See *Weights and Measures.*

Apothecary, a-poth'e-ka-re. Pharmaceutist, pharmacist, druggist. In every country except Great Britain apothecary means one who sells drugs, makes up prescriptions, etc., a chemist; in addition to these offices, which, indeed, they rarely exercise, except in the case of their own patients, the apothecaries in England form a privileged class of practitioners—a kind of sub-physician. See *Surgeon-apothecary.*

Apotheme, ap'o-theme. A deposit which forms when an extract is redissolved in water, or when vegetable solutions are boiled with access of air.

Apotherapeia (ap-o-ther-ap-i'ah), **Apotherapia**, or **Apotherapeusis**, ap-o-ther-ah-pew'sis (*apo, therapeuo*, to cure). Perfect cure; in ancient gymnastics friction, inunction, and bathing to obviate fatigue or cure disease.

Apothesis, ap-oth'es-is (*apotithemi*, to put up). Giving proper position to fractured limb after reduction.

Apothlimma, ap-o-thlim'mah (*apo, thlibo*, to press from). Dregs or expressed juice of plants.

Apothrausis, ap-o-thrau'sis (*apothrauo*, to break). Fracture of bone, with spicula remaining; extraction of spiculum of bone; abscission.

Apothrausma, ap-o-thraus'mah. Fragment of bone.

Apothymia, ap-o-thim'e-ah (*apo, thumos*, desire). Aversion.

Apotilmus, ap-o-til'mus (*apo, tillo*, to pluck). Evulsion.

Apotocus, ap-ot'o-kus (*apo, tokao*, to bring forth). Abortive.

Apotome (ap-ot'o-ma) or **Apotomia**, ap-o-tom'e-ah (*apo, tome*, incision). Amputation.

Apotrepsis, ap-o-trep'sis (*apotrepo*, to turn back). Resolution of inflammation or swelling.

Apotrip'sis (*apo, tribo*, to rub off). Abrasion.

Apotropæum, ap-o-tro-pe'um (*apo, trepo*, to turn). Amulet.

Apotrope, ap-ot'ro-pa (*apo, trepo*, to turn). Deviation, as of a limb; aversion.

Apoxysis (ap-oks'is-is) or **Apoxysmus**, ap-oks-iz'mus (*apo, xuo*, to rasp). Abrasion.

Apozem (ap'o-zem), **Apozema** (ap-o-za'mah), or **Apozesis**, ap-oz-a'sis (*apo, zeo*, to boil), Decoction.

Apozeusis, ap-o-zu'sis (separation). Separation or detachment of diseased parts.

Apparatus, ap-par-at'us (*ap, paro*, to prepare). Collection of instruments, etc. for an operation; methodical arrangement of instruments and objects necessary for operation or dressing; case or drawers in which apparatus is arranged, *Capsa chirurgica.* Apparatus has likewise been applied to different modes of operating for stone; see *Lithotomy.* In physiology, apparatus is a collection of organs, all working toward the same end, as digestive apparatus. **A. al'tus**, high or suprapubic operation of lithotomy. **A., aud'itory**, organs and canals of external, middle, and internal ear. **A. chirur'gicus**, surgical appliances, instruments, etc. **A., diges'tive**, parts concerned in digestion. **A., Es'march's**, Esmarch's bandage. **A., exten'sion**, apparatus for extending a limb, as in fracture. **A., free'zing**, atomizer. **A., gen'erative** or **gen'ital**, genital organs, male or female. **A., gen'-ito-u'rinary**, combined genital and urinary organs. **A., gus'tatory**, nervous distribution to tongue, concerned in taste. **A. hypogas'tricus**, A. altus. **A., immo'bilizing**, dressing whose object is to render a part immovable. **A., immov'able**, *Immovable bandage, Permanent bandage, Bandage splint*, apparatus for fractures, generally formed by wetting the bandage in some substance, as starch, plaster of Paris, paraffin, etc., which becomes solid and retains parts *in situ.* **A., induc'tion**, A. intended for use of induced electricity. **A., irriga'tion**, irrigator. **A., lac'rymal**, parts concerned in secretion and passage of tears, as lacrymal glands, canaliculi, lacrymal sac, and nasal duct. **A. latera'lis**, see *Lithotomy.* **A. ligamento'sus col'li**, see *Occipito-axoid articulation.* **A., locomo'tor**, organs concerned in locomotion. **A. mag'nus** or **ma'jor**, see *Lithotomy.* **A., mi'nor**, see *Lithotomy.* **A., olfac'tory**, cavities of nose and olfactory nerves distributed to them. **A., res'piratory**, organs concerned in respiration, as larynx, trachea, bronchial tubes, and lungs. **A., secre'tory**, organs concerned in secretion. **A., segmen'tal**, embryonic structures associated with formation of urinary and genital organs. **A., sex'ual**, A., generative. **A., spray**, atomizer. **A., sudorip'arous**, sweat-glands. **A., suspen'sion**, mechanism for suspending any part of the body. **A., tac'tile**, nervous distribution connected with touch. **A., u'rinary**, organs and canals concerned in urination. **A., urogen'ital**, A., genito-urinary. **A., uropoiet'ic**, kidneys. **A., vis'ual**, organs of vision; the eye and its appendages. **A., vo'-cal**, larynx and parts associated with it.

Appendages, ap-pend'a-jes. Supplementary or accessory parts. **A., auricular**, see *Auricles of heart.* Round prominence on cartilage of ear. **A.., cæ'cal**, appendix vermiformis. **A., cau'dal**, tail. **A., epiplo'ic**, appendices epiploicæ. **A. of eye**, eyebrows, eyelids, and lacrymal apparatus. **A., fœ'tal**, placenta and chord, amnion and chorion. **A., il'eo-cæcal**, appendix vermiformis. **A. of o'vary**, parovarium. **A., pitu'itary**, pituitary body. **A. of skin**, nails, hair, glandular apparatus of skin. **A. of u'terus**, ovaries, Fallopian tubes, and ligaments. **A., vermic'ular**, appendix vermiformis.

Appendices (ap-pen'de-ces, pl. of **Appendix**) **co'li adipo'sæ.** Appendiculæ epiploicæ. **A. epiplo'icæ**, appendiculæ epiploicæ. **A. pinguedino'sæ**, appendiculæ epiploicæ.

Appendicitis, ap-pen-de-se'tis. Inflammation of the vermiform appendix of the cæcum, generally due to ulceration or entrance of foreign body.

Appendicula (ap-pen-dik'u-lah, dim. of **Appendix**) **cer'ebri.** Pituitary gland. **A. epiplo'ica**, see *Appendiculæ epiploicæ.* **A. vermifor'mis cæ'ci**, appendix vermiformis.

Appendiculæ (ap-pen-dik'u-la) **epiplo'icæ.** A. pinguedinosæ; epiploic appendages; prolongations of peritoneum beyond the surface of the great intestine, analogous in texture and arrangement to omenta.

Appendix, ap-pen'diks (*appendo*, to hang to or from). Any part adhering to an organ or continuous with it, as if added to it. Appendage. Apophysis. **A. auric'ulæ**, see *Appendage, auricular*, and *Auricles of heart.* **A. cæ'ci**, appendix vermiformis. **A. cer'e-bri**, pituitary gland. **A. ad cer'ebrum**, cerebellum. **A. cuta'nea sep'ti na'rium**, cutaneous appendage to septum narium. **A., en'siform**, xiphoid cartilage. **A. to epidid'ymis**, vasculum aberrans. **A. gland'ulæ pituita'riæ**, anterior lobule of pituitary body. **A. gland'ulæ thyreoi'deæ**, see *Thyroid gland.* **A. lobula'-ris**, flocculus. **A. suprasphenoida'lis**, pituitary body. **A. ventric'uli**, duodenum; pituitary body. **A. ver-micula'ris cæ'ci**, A. vermiformis. **A. vermifor'mis**, vermicular process, size of a goose-quill, hanging from intestine cæcum; functions unknown, but a relic of animal life, showing analogy of conformation. **A. vesi'cæ**, see *Bladder, sacculated.* **A., xi'phoid**, xiphoid cartilage.

Appercep'tion. Conscious appreciation of external sensations. Appreciative perception.

Appetence (ap'pe-tense) or **Appetency,** ap'pe-ten-se (*ap, peto,* to seek, to desire). Ardent desire for any object; appetite.

Appetite, ap'pe-tite (same etymon). Internal sensation, a warning for exercise of certain functions, especially digestion and generation (venereal appetite). Desire for food, caused by real want, is called hunger, for solid food; thirst, for liquid food. Hunger and appetite are not synonymous, although generally so considered. **A., canine',** cynorexia. **A., mor'bid,** see *Limosis.* **A., pervert'ed,** unnatural a., usually from disease. **A., sex'ual,** A., venereal. **A., vene'real,** venereal desire; instinctive feeling attracting the sexes toward each other to effect work of reproduction.

Appetitive, ap'pe-ti-tiv. Having or causing desire.

Appetitus, ap-pet-e'tus. Appetite. **A. cani'nus,** boulimia. **A. defic'iens,** dysorexia.

Applanatio (ap-plan-ah'she-o) **cor'neæ** (*planus,* flat, smooth). Flattening of the cornea.

Ap'ple. See *Malum, Pyrus malus.* **A., Adam's,** Pomum Adami. **A., bal'sam,** fruit of Momordica balsamina. **A., bit'ter,** Cucumis colocynthis. **A., Curasso'a,** Aurantium Curassaventium. **A., Dead Sea,** see *Quercus infectoria.* **A., dev'il's,** fruit of Mandragora. **A. eye,** exophthalmia; see *Melon.* **A. of the eye,** pupil. **A., mad,** see *Quercus infectoria.* **A., man'drake,** fruit of Mandragora. **A., May,** Podophyllum peltatum. **A. oil,** valerianate of amyl. **A. of Peru,** Datura stramonium. **A. root,** Euphorbia corollata. **A. of Sod'om,** see *Quercus infectoria.* **A. tea.** Slice two large not over-ripe apples, and pour over a pint of boiling water; after an hour pour off fluid and sweeten with sugar. **A. thorn,** Datura stramonium. **A. tree,** Pyrus malus. **A. water,** A. tea.

Ap'ples, ac'id of. Malic acid.

Applicata, ap-plik-at'ah (*applico,* to fold, to apply). Objects applied immediately to the surface of the body, as clothes, cosmetics, baths, dressings, etc.

Application, ap-plc-ka'shun. Attention; act of applying one thing to another, as apparatus, bandage, blister, etc., as well as thing applied.

Applicator, ap'ple-ka-tor. Instrument for applying remedies, as to the uterus or urethra.

Applica'tum. Anything applied to a part.

Appolito's suture, ap-pol'it-o's sute'ure. Suture for wounded intestine, with double thread passed through all the coats.

Apposition, ap-po-zish'un. Contact of parts, as edges of wound, fragments of bone, etc.; growth or addition to parts; prosthesis; anaplerosis.

Apprehensio, ap-pra-hen'se-o (*ap, prehendo,* to take). Catalepsy; bandage for securing a part; therapeutical indication.

Approximate (ap-proks'im-ate) or **Approximated,** ap-proks'im-a-ted. Placed close together, as the teeth, edges of a wound or fracture, etc.

Approximation, ap-proks-im-a'shun (*ap, proximus,* nearest). Pretended method of curing disease by making it pass from man into some animal or vegetable by immediate contact. See *Approximate.*

Apracta, ah-prak'tah (*a, prasso,* to act). Without action, as parts of generation when unfit for copulation or generation.

Apraxia, ah-praks'e-ah (*a, praxis,* action). Defective memory as to objects in general, their uses, and methods of action. See *Mind-blindness.*

Aprication, a-pre-ka'shun (*apricor,* to bask in the sun). Insolation, sun-bath.

A'pricot. Prunus Armeniaca.

Aproctia (ah-prok'te-ah) or **Aproctosis,** ah-prok-to'sis (*a, proktos,* anus). Imperforation of anus.

Aproctous, ah-prok'tus. Having an imperforate anus; person so affected.

A'pron. Omentum; fatty wall of abdomen. **A., Hot'tentot,** great elongation of the labia minora and prepuce of clitoris. **A., puden'dal,** A., Hottentot.

Apronia, ah-pro'ne-ah. Tamus communis.

Aprosexia, ah-pro-seks'e-ah (*a, prosecho,* to fix the attention). Want of power to fix attention upon any particular subject or line of thought; may be due to nervous exhaustion, nasal catarrh, or nasal obstruction.

Aprosopia, ah-pro-so'pe-ah (*a, prosopon,* face). Malformation consisting in the face being deficient; such monster is said to be *Aproso'pus.*

Apselaphesia (ap-sel-af-a'ze-ah) or **Apselaphesis,** ap-se-laf-a'sis (*a, pselaphao,* to feel). Privation of touch or sense of resistance, sense of pain still remaining; seen in degeneration of posterior columns of the cord.

Apsinthiatum, ap-sin-the-at'um (*apsinthion,* wormwood). Drink made of wormwood.

Apsinthites, ap-sin-the'tes. Absinthites.

Apsithuria, ah-sith-u're-ah (*a, psithuros,* whisper). Loss of power to whisper from spasm of larynx. **A., persist'ing,** xerostomia.

Apsychia (ah-sik'e-ah), **Apsychy** (ah'sik-e), or **Apsyxia,** ah-siks'e-ah (*a, psuche,* soul, breath). Syncope, loss of consciousness.

Aptyalia (ah-te-al'e-ah) or **Aptyalism,** a-ti'al-izm (*a, ptualon,* saliva). Want of saliva.

Aptystus, ah-tis'tus (*a, ptuo,* to spit). Devoid of expectoration; epithet given to pleurisies, for instance, in which there is no expectoration.

Apulosis, ap-u-lo'sis (*apo, oule,* cicatrix). Cicatrization.

Apulotic, ap-u-lot'ik. Agent promoting cicatrization.

Apus, ah'pus (*a, pous,* foot). One who has no feet; one whose lower extremity is entirely absent.

Apyetus, ah-pe'et-us (*a, puon,* pus). Not ending in suppuration; deficient in pus.

Apy'onin (*a, puon,* pus). Yellow pyoktanin. See *Pyoktanin.*

Apyrectic, ah-pi-rek'tik (*a, pur,* fever). Free from fever.

Apyrenæmata, ah-pir-en-e'mat-ah (*a, puren,* nucleus, *haima,* blood). Vertebrata with non-nucleated, colored blood-corpuscles, as mammalia.

Apyrenomele, ah-pir-en-om-a'la. Apyromele.

Apyretic (a-pir-et'ik) or **Apyrec'tic** (*a, pur,* fever). Without fever. Urticaria is sometimes called an apyretic exanthem.

Apyrexia, ap-ir-eks'e-ah. *Apyrexy.* Absence of fever. Condition of intermittent fever between the paroxysms. Sensation of febrile condition in acute diseases.

Apyromele, ah-pir-om-a'la (*a, puren,* a nut, *mele,* sound). Sound or probe without a button or nut.

Apyrous, ap'ir-us (*a,* priv., *pur,* fire). Refractory to heat.

Apyus, ah-pe'us. Apyetus.

Aqua, ah'kwah. Water; medicated water; cataract. **A. ac'idi carbol'ici,** see *Carbolic acid.* **A. ac'idi carbon'ici,** acidulous water, simple. **A. acid'ula hydrosulphura'ta,** Naples water (factitious). **A. acid'ula sim'plex,** acidulous water, simple. **A. acus'tica,** liquor Cotunnii. **A. aëra'ta,** acidulous water, simple; aërated water. **A. aë'ris fix'i,** acidulous water, simple. **A. alkali'na oxymuriat'ica,** eau de Javelle. **A. alu'minis compos'ita,** liquor aluminis compositus. **A. alumino'sa batea'na,** liquor aluminis compositus. **A. ammo'niæ,** liquor ammoniæ. **A. ammo'niæ** or **ammo'nii aceta'tis,** liquor ammonii acetatis. **A. ammo'niæ** or **ammo'nii carbona'tis,** liquor ammonii subcarbonatis. **A. ammo'niæ caus'tica,** liquor ammoniæ. **A. ammo'niæ for'tior,** see *Liquor ammoniæ.* **A. am'nii,** liquor amnii. **A. amyg'dalæ ama'ræ** or **amygdala'rum concentra'ta,** water of bitter almonds, made by bruising bitter almonds and adding spring-water and alcohol, and then distilling; used instead of aqua laurocerasi and hydrocyanic acid; given with caution. Aqua amygdalæ amaræ, bitter-almond water, is in Ph. U. S. (Ol. amygdal. amar. p. 1., Aquæ destillat., p. 999). Dose, f℥ij. **A. ane'thi,** see *Anethum graveolens.* **A. ani'si,** see *Pimpinella anisum.* **A. ani'si for'tis,** spiritus anisi. **A. aquisgranen'sis,** factitious Aix-la-Chapelle water. **A. audito'ria,** Cotunnius, liquor of. **A. auran'tii,** see *Citrus aurantium.* **A. auran'tii flo-**

rum or **flo'ris**, see *Citrus aurantium*. **A. azo'tica oxygena'ta**, aqua nitrogenii protoxidi. **A. balsam'ica arteria'lis**, aqua binellii. **A. Baregi-nen'sis**, Barèges water. **A. bary'tæ muria'tis**, see *Baryta, muriate of*. **A. Belliluca'na**, Balaruc waters. **A. benedic'ta**, liquor calcis. **A. benedic'ta compos'-ita**, liquor calcis compositus. **A. benedic'ta Rulan'di**, vinum antimonii tartarizati. **A. Binel'lii**, creasote-water; Binelli's styptic. **A. Borvonen'sis**, Bourbonne-les-Bains waters. **A. Bristolien'sis**, Bristol water. **A. Brocchie'rii**, Brocchieri or Brocchiari water, Brocchieri's styptic. A supposed styptic, which made much noise at Paris at one time, but devoid of efficacy. **A. bul'liens**, boiling water. **A. calca'riæ ustæ**, lime-water. **A. cal'cica**, lime-water. **A. cal'cis**, lime-water. **A. cal'cis compos'ita**, liquor calcis compositus. **A. cam'phoræ**, mistura camphoræ. **A. camphora'ta, Bates's**, see *Cupri sulphas*. **A. carbona'tis so'dæ acid'ula** or **carbon'ica**, acidulous water, simple. **A. Carmelita'na**, see *Melissa*. **A. car'ui**, see *Carum carui*. **A. cas'siæ**, see *Laurus cassiæ*. **A. catapulta'rum**, arquebusade water. Sort of vulnerary water distilled from farrago of aromatic plants. **A. chaly-bea'tæ**, ferruginous waters. **A. chlori'ni** or **chlo'ri** or **chlora'ta**, see *Chlorine*. **A. chlorofor'mi**, chloroform-water. **A. cinnamo'mi**, cinnamon-water. Distilled water of cinnamon-bark. **A. cinnamo'mi for'-tis**, spiritus cinnamomi. **A. cœru'lea**, solution of ammoniated copper. **A. Colognien'sis**, Cologne water. **A. colora'ta**, colored water, a prescription in which simple colored water is contained; used as a *placebo*. **A. creaso'ti**, see *Creasote*. **A. cu'pri ammonia'ti**, liquor cupri ammoniati. **A. cu'pri vitriola'ti compos'ita**, liquor cupri sulphatis composita. **A. depu-ra'ta**, purified water. **A. destilla'ta**, water, distilled. **A. fer'reæ** or **ferro'sæ**, chalybeate waters. **A. fer'-vens**, hot water. **A. flo'rum auran'tii**, see *Citrus aurantium*. **A. fluvia'lis** or **fluviat'ilis**, water, river. **A. fœnic'uli**, distilled water of fennel-seed. **A. fonta'na**, water, spring. **A. for'tis**, nitric acid. **A. frig'ida**, cold water. **A. Goular'di**, liquor plumbi subacetatis dilutus. **A. hæmostat'ica Paglia'ri**, hemostatic, Pagliari's. **A. hepat'ica**, hydrosulphuretted water. **A. hordea'ta**, decoctum hordei. **A. Hungar'-ica**, spiritus rosmarinus. **A. im'brium**, water, rain. **A. inferna'lis**, see *Toddy*. **A. inter'cus**, anasarca. **A. in'ter cu'tem**, anasarca. **A. Javellen'sis**, eau de Javelle. **A. junip'eri compos'ita**, spiritus juniperi compositus. **A. ka'li**, liquor potassæ subcarbonatis. **A. ka'li caus'tici**, liquor potassæ. **A. ka'li præpara'ti**, liquor potassæ subcarbonatis. **A. ka'li pu'ri**, liquor potassæ. **A. ka'li subcarbona'tis**, liquor potassæ subcarbonatis. **A. labyrin'thi**, Cotunnius, liquor of. **A. labyrin'thi membrana'cei**, fluid in membranous labyrinth of ear. **A. lac'tis**, serum lactis. **A. ex la'cû**, lake-water. **A. laurocer'asi**, see *Prunus laurocerasus*. **A. laxati'va Viennen'sis**, infusum sennæ compositum. **A. lithar'gyri aceta'ti compos'-ita**, liquor plumbi subacetatis dilutus. **A. lith'iæ efferves'cens**, liquor lithiæ effervescens. **A. lu'ciæ**, spiritus ammoniæ succinatus. **A. mari'na**, sea-water. **A. medica'ta**, water, mineral. **A. melis'sæ**, melissa-water. **A. mel'lis**, hydromel. **A. men'thæ piperi'-tæ**, peppermint-water, distilled water of peppermint. **A. men'thæ vir'idis**, spearmint-water, distilled water of spearmint. **A. men'thæ piperi'tidis spirituo'-sa**, spiritus menthæ piperitæ. **A. men'thæ pule'-gii**, see *Mentha pulegium*. **A. men'thæ vir'idis**, spear-mint-water; see *Aqua menthæ piperitæ*. **A. men'thæ vulga'ris spirituo'sa**, spiritus menthæ viridis. **A. mercuria'lis**, black mercurial lotion. **A. minera'lis**, water, mineral. **A. mirab'ilis**, spiritus pimentæ. **A. Montero'sis**, creasote-water. **A. Morgag'nii**, liquor Morgagnii; see *Aquula Morgagnii*. **A. mul'sa**, hydromeli. **A. na'phi**, orange-flower water. **A. na'tri oxymuriat'ici**, liquor sodæ chlorinatæ. **A. na'tro efferves'cens**, effervescing solution of soda; simple acidulous water. **A. Neapolita'na**, Naples water (factitious). **A. nephrit'ica**, spiritus myristicæ. **A. nicotia'na**, see *Nicotiana tabacum*. **A. ni'gra**, black mercurial lotion. **A. nitrogen'ii protox'idi**, *Protox-ide of nitrogen water, Oxygenous aërated water*, a solution of protoxide of nitrogen, said to contain five times its own bulk of gas; recommended as a nervine and excitant in nervous conditions, dyspepsia, etc.; also used in cholera and to counteract evil consequences of drunkenness. **A. niva'ta**, snow-water. **A. nu'cis moscha'tæ**, spiritus myristicæ. **A. ophthal'-mica**, any wash for the eyes; liquor zinci sulphatis cum camphorâ. **A. oxygena'ta**, water containing oxygen in solution. **A. oxymuriat'ica**, chlorine-water. **A. Paglia'rii**, hemostatic, Pagliari's. **A. paludo'sa**, water, marsh. **A. pe'dum**, urine. **A. pericar'dii**, see *Pericardium*. **A. phageden'ica**, see *Hydrargyri oxymurias*. **A. pi'cea**, see *Pinus sylvestris*. **A. pi'cis**, see *Pinus sylvestris*. **A. pimen'tæ**, see *Myrtus pimenta*. **A. pis'sæ**, tar-water. **A. plum'bi**, liquor plumbi subacetatis dilutus. **A. pluvia'lis**, rain-water. **A. potas'sæ**, liquor potassæ. **A. potas'sæ efferves'cens**, liquor potassæ effervescens. **A. pule'gii**, see *Mentha pulegium*. **A. pule'gii spirituo'sa**, spiritus pulegii. **A. pu'ra**, see *Water*. **A. putea'lis**, water, well. **A. ex pu'teo**, water, well. **A. Rabel'li**, elixir acidum Halleri. **A. rapha'ni compos'ita**, spiritus armoraciæ compositus. **A. rega'lis** or **re'gia**, nitro-muriatic acid. **A. regi'næ Hunga'riæ**, spiritus rosmarini. **A. ro'sæ**, rose-water, distilled from rose-leaves and water. **A. salu'bris**, water, mineral. **A. sambu'ci**, elder-flower water. **A. sapphari'na**, liquor cupri ammoniati. **A. satur'ni** or **saturni'na**, liquor plumbi subacetatis dilutus. **A. sclopeta'ria**, A. catapultarum. **A. sedati'va**, camphorated ammoniacal lotion. **A. Seid'litz**, artificial Seidlitz water. **A. sem'-inum ani'si compos'ita**, spiritus anisi. **A. sem'inum car'ui for'tis**, spiritus carui. **A. so'dæ**, effervescing solution of soda. **A. so'dæ efferves'cens**, acidulous water, simple. **A. sote'ria**, water, mineral. **A. sty'-gia**, nitromuriatic acid. **A. styp'tica**, liquor cupri sulphatis compositus. **A. sulphura'ta sim'plex**, hydrosulphuretted water. **A. sulphure'ti ammo'niæ**, liquor fumans Boylii. **A. thedi'ana**, A. catapultarum. **A. theriaca'lis bezoar'dica**, chylostagma diaphoreticum mindereri. **A. tiliæ**, tilia-water. **A. Tof'ani**, liquor arsenicalis. **A. tos'ti pa'nis**, toast-water. **A. trau-mat'ica Thede'nii**, A. catapultarum. **A. veg'eto-mine-ra'lis**, liquor plumbi subacetatis dilutus. **A. vicien'-sis**, Vichy water. **A. vi'tæ**, brandy. **A. vitriol'ica cœru'lea**, solutio sulphatis cupri composita. **A. vitriol'ica camphora'ta**, liquor zinci sulphatis cum camphorâ. **A. vulnera'ria**, A. catapultarum. **A. zin'ci vitriola'ti cum cam'phorâ**, liquor zinci sul-phatis cum camphorâ.

Aquæ acidulæ, ah'kwa as-id'u-la. Acidulous waters. **A. chalybea'tæ**, waters, mineral, chalybeate. **A. destilla'tæ**, distilled waters. These are made by putting vegetable substances, as roses, mint, penny-royal, etc., into a still with water, and drawing off as much as is found to possess aromatic properties of the plant. **A. ferro'sæ**, waters, mineral, chalybeate. **A. martia'les**, waters, mineral, chalybeate. **A. medica'-tæ**, preparations consisting of waters impregnated with some medicinal substance which are not arranged in any other class. **A. me'tus** (dread of water), hydrophobia. **A. minera'les acid'ulæ**, waters, mineral, gaseous. **A. minera'les ferrugino'sæ**, waters, mineral, chalybeate. **A. minera'les sulphu'-reæ**, waters, mineral, sulphureous. **A. stillati'tiæ**, distilled waters.

Aquæductus, ah-kwe-duk'tus (*aqua*, water, *duco*, to lead). Aqueduct. Properly, canal for conducting water. Anatomists have used the term to designate certain canals. **A. cer'ebri**, infundibulum of brain. **A. coch'leæ**, very narrow canal proceeding from tympanic scala of cochlea to posterior edge of pars petrosa. **A. communicatio'nis**, small passage at junction of mastoid and of petrous portions of temporal bone. **A. Cotun'nii**, see *Aquæductus vestibuli*. **A. endolym-phat'icus**, a small horizontal depression leading to the A. vestibuli. **A. Fallop'pii** or **Fallop'piæ**, aqueduct of Fallopius, canal in pars petrosa of temporal bone, extending from meatus auditorius internus to foramen stylo-mastoideum, and giving passage to facial nerve.

A. Syl'vii, canal forming communication between third and fourth ventricles of brain. **A. Syl'vii au'ris**, aquæductus vestibuli. **A. tempora'lis**, canal occasionally found in petrous portion of temporal bone. **A. vestib'uli**, canal of Cotunnius; this begins in the vestibule, near the common orifice of the two semicircular canals, and opens at posterior surface of pars petrosa.

Aqualiculus, ak-wah-lik'u-lus (dim. of **Aqualis**, water-pot). Part of the abdomen extending from umbilicus to pubes. Stomach or intestinal canal.

Aquapuncture, ah-kwa-punk'ture. Puncture of the skin by jets of water; used as means of revulsion in neuralgia, muscular rheumatism, etc.

Aqueduct, ak'we-dukt. See *Aquæductus*. **A. of coch'lea**, aquæductus cochleæ. **A. of Cotun'nius**, aquæductus vestibuli. **A. of Fallo'pius**, aquæductus Fallopii. **A. of Syl'vius**, aquæductus Sylvii. **A. of the ves'tibule**, aquæductus vestibuli.

Aqueous, a'kwe-us (*aqua*, water). Watery. **A. can'cer**, noma of mouth. **A. cham'bers**, see *A. humor of the eye*. **A. ex'tracts**, extracts of drugs made with water as a menstruum. **A. hu'mor of the eye**, albugineous humor. Limpid fluid filling the two chambers of the eye from cornea to crystalline, and, consequently, in contact with the two surfaces of the iris; s. g. 1.0003. It contains albumen, chloride of sodium, and phosphate of lime in small quantity, and is enveloped in a fine membrane—membrane of aqueous humor, posterior elastic lamina of Bowman, membrane of Demours or of Descemet; although these last terms are by some appropriated to the third layer of the cornea. It is small in quantity, about four or five grains.

Aquiducous, ah-kwe-du'kus (*aqua*, water, *duco*, to lead). Hydragogue.

Aquifolium, ah-kwe-fo'le-um. Ilex aquifolium. **A. fo'liis decid'uis**, Prinos.

Aquila, ak'wil-ah. Calomel, sulphur; excrement of eagle, used medicinally. **A. mercu'rii**, calomel.

Aquilæ venæ, ak'wil-e va'ne. Temporal veins.

Aquilaria agallocha, ah-kwe-lah're-ah ah-gal'lo-kah. Aloes-wood, East Indian tree. **A. Malaccen'sis**, Cochin Chinese tree, from which eagle-wood is derived.

Aquilegia, ah-kwe-la'je-ah (*aquila*, eagle, from fancied resemblance). *Common colombine* or *Columbine*, ord. Ranunculaceæ. Seeds, herb, and flowers were used in jaundice and cutaneous diseases. **A. alpi'na**, aquilegia. **A. Canaden'sis**, *Wild columbine*, indigenous; seeds are tonic, sudorific, diuretic, emmenagogue. **A. sylves'tris**, aquilegia. **A. vulga'ris**, aquilegia.

Aquilicia sambucina, ah-kwil-ish'e-ah sam-bu-se'nah (*aqua*, water, *elicio*, to attract). East Indian plant, decoction of whose root is used to allay heartburn.

Aquiparous, ak-wip'ar-us (*aqua*, water, *pario*, to bring forth). Epithet for glands like the parotid secreting much water, in contradistinction to submaxillary glands, which are muciparous or mucus-secreting. Bringing forth young in water.

Aquocapsulitis (ak-wo-kap-su-le'tis) or **Aquomembranitis**, ak-wo-mem-bran-e'tis. *Serous iritis*, *Dotted keratitis* or *ceratitis*. Term formerly used, but now inapplicable to inflammation of the anterior chamber of the eye; a badly compounded term, denoting inflammation of capsule or membrane of aqueous humor.

Aquosus, ak-wo'sus. Aqueous.

Aquula, ak-u'u-lah (dim. of **Aqua**, water). Ceratocele, hydatid, hydroa, bleb, crystalline lens. **A. acus'tica** or **auditu'ra**, Cotunnius, liquor of; perilymph. **A. labyrin'thi**, endolymph. **A. Morgagn'ii**, minute portion of water escaping when opening is made into capsule of crystalline. **A. vit'rea auditi'va**, vitreous humor of the ear.

Ar, in composition, see *Ad*.

Ara parva, ar'ah par'vah (small altar). Bandage representing corners of an altar.

Arabic acid, ar'a-bik as'id. See *Arabin*. When arabic acid is acted on by a dilute acid, *arabinose* results; a crystallizable saccharine matter. **A., gum**, see *Acacia*.

Arabides, ar'a-bides. Compounds formed by union of other acids with arabin.

Arabin, ar'ab-in. Pure gum; peculiar proximate principle of gum arabic, cherry gum, sugar-beet. Feeble acid, essential element of gum arabic, said to be, chemically, gummate of lime, calcium salt of arabic or gummic acid.

Arabis, ar'ab-is. One or two species of this plant, genus Arabideæ, have volatile principle having properties similar to oil of mustard. Erysimum barbarea.

Araca, ar-ak'ah. Weak alcoholic liquor prepared from kumyss.

Aracacha, ar-ak-ak'ah. Conium moschatum.

Arach, ar-ak'. Arack.

Arachidna hypogæa, a-rak-id'nah hip-o-ja'ah. Arachis hypogæa.

Arachis Africana (ar'ak-is af-re-kan'ah) or **America'na** (*a*, *rhachis*, branch). A. hypogæa. **A. hypogæ'a**, *Groundnut*, *Peanut*, *Earth-almond*, erroneously called *Pistachio-nut* in the South; *Pindars* of West Indies. Ord. Leguminosæ. Cultivated in Southern States. Seeds are oily and much eaten. Inferior chocolate may be made of them.

Arachnitis (ar-ak-ne'tis), properly **Arachnoïdi'tis** or **Arachnodei'tis**. Inflammation of the arachnoid membrane. **A., rhachid'ian** or **spi'nal**, spinal meningitis.

Arachnoid, ar-ak'noid (*arachne*, spider's web, *eidos*, form). Like spider's web; relating to arachnoid membrane. **A. apoph'yses**, name formerly given to nerve-filaments. **A. canal'**, formed by extension of arachnoid membrane over transverse and longitudinal fissures of brain. **A. cav'ity**, space between arachnoid and dura mater. **A., cer'ebral**, see *A. membrane*. **A. of eye**, lining membrane of cavity supposed to exist between sclerotic and choroid. **A., inter'nal**, ependyma. **A. mem'brane**, name of several thin membranes resembling spider-webs. Membrane of vitreous humor, *tunica hyaloidea*, was formerly so called. Membrane of brain between dura mater and pia mater; serous membrane composed of two layers: external layer, confounded, in greater part of its extent, with the dura mater, and, like it, lining the interior of the cranium and spinal canal; internal layer, extended over the brain, from which it is separated by pia mater, without passing into sinuosities between the convolutions, and penetrating into interior of brain by opening at its posterior part under the corpus callosum. It forms part of investing sheath of nerves passing from encephalic cavities. It envelops and protects the brain, and secretes fluid that keeps it in state best adapted for its functions. Arachnoid is arranged on spinal cord as on the brain, subarachnoid space being filled with its fluid to protect the cord. **A., pari'etal**, layer of A. membrane attached to dura mater. **A. sheath**, arachnoid sheath of cranial nerves. **A. space**, space beneath dura mater. **A., spi'nal**, part of A. membrane within the spinal canal. **A. vil'li**, Pacchioni, glands of. **A., vis'ceral**, inner layer of A. membrane.

Arachnoï'dea. Arachnoid. **A. cer'ebri** or **cerebra'lis**, see *A. membrane*. **A. medul'læ spina'lis**, spinal arachnoid membrane. **A. men'tis**, capsule of crystalline lens. **A. oc'uli**, arachnoid of the eye.

Arachnoïditis (ar-ak-no-id-e'tis) or **Arachnoitis**, ar-ak-no-e'tis. Arachnitis.

Arack (ar-ak'), **Arrack'**, or **Rack**. Spirituous liquor made in India, often from rice, sometimes from sugar, fermented along with juice of cocoanut; frequently from toddy, the juice flowing from the cocoanut tree by incision, and from other substances.

Aracus aromaticus, ar'ak-us ar-o-mat'ik-us. Vanilla.

Arados, ar'ad-os (*aradeo*, to disturb). Agitation excited in stomach by coction of aliments of different nature; cathartic action.

Aræa, ar-e'ah. Abdomen, small intestine.

Aræoma, ar-e-o'mah (*araios*, porous). Interstice.

Aræometer, ar-e-om'e-tur. Areometer.

Aræosarcous, ar-e-o-sar'kus (*araios*, thin, *sarx*, flesh). Having lean flesh.

Aræotica, ar-e-o'tik-ah (*araioo*, to rarefy). Medicines rarefying the humors.

Araka or **Araki.** Arack.

Aralia Canadensis, ar-al'e-ah kan-ad-en'sis. Panax quinquefolium. **A. edu'lis,** plant of China and Japan, used in chlorosis, menstrual derangement, and puerperal diseases. **A. his'pida,** *Dwarf elder,* diuretic, and used in decoction in dropsy. **A. nudicau'lis,** *Small spikenard, Wild liquorice, Sweet root, False* or *Wild sarsaparilla,* American plant, mild stimulant, diaphoretic, tonic, and alterative, and recommended as substitute for sarsaparilla. **A. palma'ta,** leaves and bark are used in gonorrhœa. **A. quinquefo'lia,** Panax quinquefolium. **A. racemo'sa,** *American spikenard,* has same properties as A. nudicaulis. **A. spino'sa,** *Angelica tree, Prickly ash, Toothache tree, Spikenard tree, Prickly elder, Shot bush, Pigeon tree;* berries and tincture have been employed in toothache; spirituous infusion has been used in colic; plant is diaphoretic, bark and leaves are emeto-cathartic.

Aran-Duchenne's disease. Progressive muscular atrophy.

Aranea, ar-an'a-ah. Araneæ tela. **A. taren'tula,** see *Tarentula.*

Araneæ (ar-an'a-e) **tela.** *Spider's web, Cobweb.* Formerly much employed externally as mechanical styptic, internally in intermittents. Arachnoid membrane.

Araneosa urina, ar-an-a-o'sah u-re'nah. Term applied to urine loaded with filaments like cobwebs.

Araneosus, ar-an-a-o'sus. Thread-like; term used to express extreme weakness of pulse; movement resembling that of delicate net raised by the wind.

Araneum, ar-an'a-um. Araneæ tela. **A. ul'cus,** old name for malignant, gangrenous ulcer of the legs.

Aran's disease. Progressive muscular atrophy.

Arantius (ar-an'she-us), **bod'y** or **nod'ule of.** Fibrous nodule on semilunar valves. **A., cav'ity of,** ventricle of Arantius. **A., ven'tricle of,** see *Ventricle.*

Ara'ra. Myrobalanus citrina.

Araroba, ar-ar-o'bah. Goa powder; pulverulent substance found in trunk of Andira araroba, angiar of Brazil; employed in cutaneous affections. See *Chrysarobin.*

Aratrum, ar-at'rum (plough). Vomer.

Ar'bor (tree) **Ben'ivi.** Benjamin. **A. camphorif'era,** camphor tree. **A. Dian'æ,** Diana or silver tree; aborescent amalgam of silver due to action of mercury on silver nitrate. **A. febrif'uga,** Cinchona officinalis. **A. In'dica,** Laurus cassia. **A. ma'ris,** coral. **A. medulla'ris,** A. vitæ. **A. satur'ni,** lead-tree; arborescent precipitate of lead, produced by mixing zinc with a solution of lead acetate. **A. thurif'era,** Juniperus lycia. **A. toxica'ria,** Antiaris toxicaria. **A. tulipif'era,** Liriodendron tulipifera. **A. u'teri viv'ificans,** arborescent striæ in cervix uteri. **A. vi'tæ** (tree of life), arborescent appearance seen on cutting the cerebellum longitudinally; resulting from particular arrangement of white substance with the cineritious. Folds in mucous membrane of cervix uteri. Thuya occidentalis. **A. vi'tæ, Amer'ican,** Thuya occidentalis. **A. vi'tæ of u'terus,** arborescent striæ in cervix uteri.

Arbores, ar'bor-es. Morbid alteration of skin preceding ulceration; a form of morphœa.

Arborization, ar-bor-iz-a'shun (*arbor,* tree). Figure or appearance of tree or plant; capillary vessels, when injected, as in inflammation, frequently have this appearance.

Arbuscula gummifera Braziliensis, ar-busk'u-lah gum-mif'er-ah braz-il-e-en'sis (dim. of **Arbor**). Hypericum bacciferum.

Arbutin, ar'bu-tin. Crystallizable glucoside derived from uva ursi and other plants, and having diuretic properties. $C_{24}H_{32}O_{14},N_2O$.

Arbutus, ar'bu-tus. A. unedo. **A., trail'ing,** A. uva ursi; Epigæa repens. **A. u'nedo,** *Strawberry-tree, Arbute tree,* nat. ord. Ericaceæ; grows along Mediterranean; all parts of plant used medicinally; decoction of leaves is astringent; used in diarrhœa; berries are antidyspeptic and narcotic, diuretic and laxative. **A. u'va ur'si,** *Trailing arbutus, Bear's whortleberry* or *Bearberry, Mountain-box, Red-berry, Upland cranberry, Foxberry, Checkerberry.* Leaves, *uva ursi* (Ph. U. S.), tonic and astringent, have been employed chiefly in diseases of urinary organs, and also as parturifacient; dose of powder, gr. xv–xxx.

Arc. Any part of the body resembling an arch in form, as arc or arch of the colon, transverse portion of that intestine; arc, or arch, or cross of the aorta, a turn which the aorta takes in the thorax. See *Arch.*

Arca arcanorum, ar'ka ar-kan-o'rum. Mercury. **A. cor'dis,** pericardium.

Arcanum, ar-kan'um (*arca,* chest). Secret; nostrum, quack, or empirical medicine; remedy whose composition is kept secret, but which is reputed to possess great efficacy. **A. coralli'num,** hydrargyri nitrico-oxidum. **A. duplica'tum,** potassii sulphas. **A. tar'tari,** potassii acetas.

Arcatura, ar-kat-u'rah (*arcus,* bow). Curving forward of fore legs of horses.

Arceion, ar-si'on. Arctium lappa.

Arcenthos (ar-sen'thos) or **Arceuthos,** ar-su'thos. Juniperis communis.

Arces'thida. Juniper-berries.

Arch. Arc. **A., alveo'lar,** alveolar process of jaws. **A., anostomot'ic,** union of two vessels anastomosing by curved line, as vessels of mesentery. **A. of aor'ta,** see *Arc* and *Aorta.* **A. of co'lon,** arch of transverse colon. **A. of Cor'ti,** arch of pillars of organ of Corti over membrana basilaris. **A., cor'tical,** portion between one cortical column of kidney and another. **A., cru'ral,** see *Crural.* **A., cu'bital,** arch of anterior carpal artery at knee in some animals. **A., den'tal,** alveolar a.; curved line of teeth. **A., epencephal'ic,** bones covering epencephalon, constituting occipital bone. **A. of Fallop'pius,** Poupart's ligament. **A., fem'oral,** see *Crural arch.* **A., fronto-hæ'mal,** tympano-maxillary a. **A., glu'teal,** see *Gluteal aponeurosis.* **A., hæ'mal,** see *Hæmal.* **A., hy'oid,** second of the early series of ridges from each side of front part of embryonic head, giving origin to lesser cornua of hyoid, styloid bone, and stapes; stylo-hyoid arch. **A., infe'rior max'illary,** upper ridge (see *A., hyoid*) forming back part of mouth in embryo. **A., infraver'tebral,** A., hæmal. **A., in'guinal,** see *Crural arch.* **A., ischiad'ic,** space between posterior portions of ischia in horse. **A., is'chio-sac'ral,** A., sitting. **A. of jaw,** A., inferior maxillary. **A., ju'gal,** zygomatic arch. **A., laryng'eal,** arch in embryo from which are developed parts of larynx and trachea. **A., lin'gual,** A., hyoid. **A., mandib'ular,** A., inferior maxillary. **A., max'illary,** A., inferior maxillary; A., palato-maxillary. **A., mesencephal'ic,** arch of bone from parts of sphenoid, parietal, and mastoid bones. **A., na'sal,** nasal arch. **A., na'so-hæ'mal,** hæmal a. of frontal vertebra in fishes. **A., neu'ral,** post-axial part of vertebra which encloses medullary canal. **A., neu'ro-fron'tal,** bony arch constituting neural a. of fronto-mandibular vertebra. **A., neu'ro-na'sal,** bony arch constituting neural a. of nasal vertebra. **A., neu'ro-occip'ital,** A., epencephalic. **A., neu'ro-pari'etal,** A., mesencephalic. **A., occip'ital,** cartilaginous arch forming lateral parietes of skull in some animals. **A., occip'ito-hæ'mal,** shoulder-girdle, formed by scapulæ and clavicles, constituting hæmal arch of occipital vertebra. **A., or'bital,** superior edge of orbit. **A., pal'atine,** see *Arches of palate* and *Palate bone.* **A., pal'ato-max'illary,** bony arch constituting hæmal arch of nasal vertebra. **A., pal'mar,** see *Palmar.* **A., pari'eto-hæmal,** bony arch constituting hæmal a. of parietal vertebra. **A., pec'toral,** A., occipito-hæmal. **A., pel'vic,** bony arch between portions of osseous pelvis; pelvic bones constituting hæmal arches of sacral vertebræ. **A., plan'tar,** see *Plantar artery.* **A., post-o'ral,** see *Arches.* **A., prosencephal'ic,** A., naso-frontal. **A. of pubes,** see *Pubic arch.* **A., rhinencephal'ic,** A., neuro-nasal. **A., scap'ular,** A., occipito-hæmal. **A., se'nile,** arcus senilis. **A., sit'ting,** A. of portions of pelvic bones on which persons sit. **A., stand'ing,** A. formed by sacrum and bones connected with the hip-joint. **A., sty'lo-hy'oid,** A., hyoid. **A., subor'bital,** zygomatic arch. **A., subpu'bic,** see *Subpubic.* **A., supercil'iary,** see *Superciliary.* **A.,**

supe'rior ver'tebral, A., neural. **A., supracar'pal**, analogue in animals of superficial palmar arch in man. **A., supraor'bital**, A., orbital. **A., supraver'tebral**, A., neural. **A., tem'poral**, zygomatic arch. **A., thy'reo-hy'oid**, third of post-oral arches, from which greater portion of hyoid bone is formed. **A., trabec'ular**, A. made by junction of middle trabeculæ of cranium, containing pituitary gland and infundibulum. **A., ver'tebral**, neural A., hæmal A.; see *Vertebræ*. **A., zygomat'ic**, see *Zygomatic*.

Archæus (ar-kay'us) or **Arche'us** (*arche*, commencement). Supposed internal principle of our motions and actions presiding over development of the body and all organic phenomena.

Archangelica, ark-an-jel'ik-ah. Lamium album. **A. atropurpu'rea**, grows in United States; tonic, stimulant, diaphoretic. **A. officina'lis**, angelica. **A. sati'va**, a source of angelica-root.

Arche, ar'kay (*arche*, beginning). First attack of disease. See *Acme*.

Archebiology, ark-e-be-ol'-o-je (*arche*, *bios*, life, *logos*, description). Description of primitive or embryonic forms of life.

Archebiosis, ark-a-be-o'sis (*arche*, beginning, *bios*, life). Production of living organisms from non-living materials; biogenesis, in contradistinction to heterogenesis, or production of living beings from pre-existing organisms, living or dead. Spontaneous generation.

Archecptoma, ark-ek-to'mah (*archo*, *ex*, out of, *ptoma*, fall). Prolapse of the anus.

Archegenesis, ark-a-jen'es-is (*arche*, *genesis*, formation). Spontaneous generation.

Archell, Canary, ar'kell, ka-na're. Lichen roccella.

Archeol'ogy (*arche*, beginning, *logos*, discourse). Treatise on fundamental principles—of medicine, for example.

Archencephala ark-en-sef'al-ah (*arche*, beginning, *enkephalos*, brain). Man, as having highest type of brain.

Archenda, ark-en'dah. Powder of leaves of ligustrum, used by Egyptians after bathing to obviate unpleasant odor of feet.

Archenteron, ark-en'ter-on (*arche*, beginning, *enteron*, intestine). Primitive embryonic intestinal tube.

Arches, aortic, ar'ches, a-or'tik. Five arteries in human embryonic life, connecting cardiac and dorsal aortæ. **A., ax'illary**, fibres of latissimus dorsi muscle in axilla. **A., bran'chial**, 3d, 4th, and 5th post-oral arches are so called, passing in early embryonic life from each side of front of head; osseous arches on which gills rest. **A., cephal'ic**, A., post-oral. **A., cer'vical**, A., aortic, 4th and 5th post-oral arches. **A. of Cor'ti**, see *Corti*. **A. of foot**, arches formed by bones of foot. **A., gill**, A., branchial. **A., lat'eral infe'rior**, osseous wall of oral and nasal cavities. **A., lat'eral supe'rior**, osseous covering of cerebrum, cerebellum, and medulla oblongata. **A., limb**, scapulæ and clavicles and pelvic bones. **A., osteoblas'tic**, arches which osteoblasts produce in the stage of osseous development. **A. of pal'ate**, two in number on each side of throat, one anterior, the other posterior. Anterior arch arises from middle of velum palati at side of uvula, and is fixed to edge of base of tongue. Posterior arch has its origin from side of uvula, and is inserted into side of pharynx. Tonsils lie between the arches. **A., pharynge'al**, fifth pair of branchial arches. **A., post-oral**, falciform ridges from each side of front part of head in early embryonic life of vertebrate animals. **A., subax'ial**, A., post-oral. **A., supercil'iary**, superciliary ridges. **A., vis'ceral**, A., post-oral.

Archespo'rium. Cell giving rise to spore mother-cells.

Archetype, ark'e-tipe (*arche*, beginning, *tupos*, type). Ideal type of structure or organ, as in anatomy, with which all others can be compared.

Arche'us. Archæus.

Archiater, ar-ke-ah'tur (*archos*, chief, *iatros*, physician). Physician to a prince or king; chief physician.

Archiblast, ark'e-blast (*arche*, *blastos*, germ). Tissue which was *ab initio* part of composition of embryo. Areola containing germinal vesicle. Epiblast.

Archiblas'tic. Relating to the archiblast.

Archigeni morbi, ar-kidg'a-ne mor'be (*arche*, beginning, *ginomai*, to be). Acute diseases, as holding first rank.

Archig'ony. Spontaneous generation.

Archil, ar'kil. Reddish-purple coloring matter from roccella and other lichens, used for staining animal tissues.

Archimagia, ar-ke-mah'je-ah (*archos*, a chief, *mageia*, magic). Chemistry.

Archineph'ric (*arche*, *nephros*, kidney). Relating to archinephron, or primitive kidney. **A. duct**, duct of archinephron.

Archinephron (same deriv.). First embryonic type of kidney, subsequently becoming divided into Wolffian body, pronephros in front of that body, and kidney proper.

Archistome, ar'ke-stome (*arche*, *stoma*, mouth). Opening through primitive streak, first perceptible indication of embryonic development into cavity of innermost germ-layer. Blastopore.

Architectura apoplectica, ar-ke-tek-tu'rah ap-o-plek'te-kah. Apoplectic build.

Architis, ar-ke'tis (*archos*, rectum). Inflammation of anus or rectum.

Archo, ar'ko (*archos*, rectum). In composition, anus or rectum.

Archocele, ar-ko-se'le (Eng. ar'ko-seel) (*archo*, *kele*, rupture). Prolapse of rectum; proctocele. **A., vagi'nal**, hernia of rectum into vagina.

Archocystocolposyrinx, ar-ko-sis-to-col-po-sir'inks (*archo*, *kustis*, bladder, *kolpos*, vagina, *surinx*, fistula). Recto-vesico-vaginal fistula.

Archocystosyrinx, ar-ko-sis-to-sir'inks (*archo*, *kustis*, bladder, *surinx*, fistula). Fistula of anus and urinary bladder.

Archometrum, ar-ko-met'rum (*archo*, *metron*, measure). Instrument for measuring rectum or anus or for dilating the anus.

Archoptoma, ar-kop-to'mah (*archo*, *ptoma*, a fall). Projected mass in prolapse of the rectum.

Archoptosis, ar-ko-to'sis (same etymon). Prolapse of rectum.

Archorrhagia, ar-kor-raj'e-ah (*archo*, *rhegnumi*, to break forth). Hemorrhage from the anus.

Archorrhœa, ar-kor-rhe'ah (*archo*, *rheo*, to flow). Discharge or passive hemorrhage from the rectum.

Archos, ar'kos. Anus, rectum.

Archostegnoma (ar-ko-steg-no'mah), **Archostegnosis** (ar-ko-steg-no'sis), or **Archosteno'sis** (*archo*, *stegnoo*, to constrict). Stricture of the rectum.

Archosyrinx, ar-ko-sir'inks (*archo*, *surinx*, a pipe). Fistula in ano; rectal syringe.

Arciform, ar'se-form (*arx*, top or ridge, *forma*, shape). Arcuate; curved like a bow. Epithet given to certain fibres, *fibræ arciformes*, of anterior pyramids of medulla oblongata, which take curved course around inferior extremity of each corpus olivare and ascend toward the cerebellum. **A. band of Solly**, arciform fibres passing across pyramid of medulla oblongata beneath corpus olivare.

Arcocele, ar-ko-se'le (Eng. ar'ko-seel). Archocele.

Arctation, ark-ta'shun (*arcto*, to make narrow). Contraction of natural opening or canal, especially vulva, orifice of uterus, or intestinal canal. Constipation. Reunion by suture or infibulation.

Arctitudo, ark-te-tu'do. Arctation.

Arctium, ark'te-um (*arktos*, bear, from rough, bristly fruit). A. lappa. **A. Barda'na**, A. lappa. **A. lap'pa**, *Burdock*. The root, lappa, is diuretic; seed, cathartic. It has been used in decoction in diseases of the skin and in syphilis. **A. ma'jus**, A. lappa. **A. mi'nus**, A. lappa. **A. tomento'sum**, A. lappa.

Arctopus echinatus, ark'to-pus ek-in-at'us (*arktos*, bear, *pous*, foot). S. African plant, ord. Umbelliferæ, demulcent and diuretic. Decoction of root is employed in syphilis, lepra, and chronic cutaneous affections.

Arctostaphylos (ark-to-staf'el-os) **glau'ca** (*arktos*, bear, *staphule*, a grape). Manzanita, California shrub, same properties as A. uva ursi. **A. u'va ur'si**, Arbu-

tus uva ursi. Several other species of Arctostaphylos grow in Mexico, A. discolor, A. pungens, A. tomentosa, with similar properties.

Arctura, ark-tu'rah (*arcto*, to press close). Effects of a nail grown into the flesh. Arctation. **A. un'guium**, growing in or inversion of the nails; see *Onychogryphosis*.

Arcualis, ark-u-a'lis. Arched; name given to corona arcualis and ossa arcualia.

Arcuate, ark'u-ate (arched) **em'inence.** Prominence of semicircular canal or temporal bone. **A. fascic'ulus**, bundle of fibres passing from frontal lobe through insula to occipital lobe. **A. fi'bres**, fibres in medulla oblongata, passing from anterior median fissure to olivary body and cerebellum, the deeper fibres constituting the *arcuate formation*. **A. lig'ament**, name given several ligaments from their shape, as those of diaphragm, pubes, and wrist. **A. nu'cleus**, small mass of gray matter on the surface of the anterior pyramid.

Arcuation, ark-u-a'shun (*arcus*, bow). Gibbosity or projection, as of sternum anteriorly. Curvature of bone.

Arcua'tus. Arcuate. **A. mor'bus**, jaundice.

Arcula, ark'u-lah (dim. of **Arca**, press or chest). Orbit. **A. cor'dis**, pericardium.

Arculæ, ark'u-la (pl. of **Arcula**). Orbitar fossæ.

Arculus, ark'u-lus (dim. of **Arcus**, arch). Small arch; cradle. Semicircular box or basket for preventing bed-clothes from coming in contact with affected parts.

Arcus, ark'us. Arc or arch. **A. aor'tæ**, arch of aorta. **A. arteria'rum**, arches of branches of renal artery in kidney. **A. arterio'sus ma'nûs**, palmar arch. **A. a. pal'pebræ**, palpebral arch along edge of eyelid. **A. a. pe'dis**, plantar arch. **A. atlan'tis**, arch of atlas. **A. axilla'ris**, arch of axillary artery. **A. brachia'lis**, arch of brachial artery. **A. car'pi dorsa'lis**, posterior carpal arch. **A. co'li intesti'ni**, transverse colon. **A. crura'lis**, Poupart's ligament. **A. c. profun'dus**, deep crural arch. **A. denta'lis**, dental arch. **A. fau'cium**, arch of palate. **A. glosso-palati'nus**, anterior column of fauces. **A. hi'licus**, branch of renal artery sending branches to the pelvis of kidney. **A. hypoglos'si**, arch of hypoglossal nerve. **A. juga'lis**, zygomatic arch. **A. lingua'lis**, A. glosso-palatinus. **A. ma'jor ventric'uli**, great curvature of stomach. **A. mala'ris**, A. jugalis. **A. medulla'ris**, fornix. **A. mi'nor ventric'uli**, lesser curvature of stomach. **A. palati'nus**, anterior and posterior columns of fauces, and mucous fold passing from soft palate to epiglottis. **A. palat'o-glos'sus**, A. glosso-palatinus. **A. palat'o-pharynge'us**, posterior column of fauces. **A. palma' ris**, palmar arch. **A. pharynge'us**, A. palato-pharyngeus. **A. pharyn'go-epiglot'ticus**, folds of mucous membrane from pharynx to epiglottis. **A. pharyn'go-palati'nus**, A. palato-pharyngeus. **A. planta'ris**, plantar arch. **A. poplite'us**, arcuate popliteal ligament. **A. pu'bis**, pubic arch. **A. seni'lis**, lunar-shaped opacity at edge of cornea in advanced life, symptom of fatty degeneration. Gerotoxon. **A. spira'lis**, arch of Corti. **A. subpu'bicus**, pubic arch. **A. supercilia'ris**, superciliary arch. **A. supercilia'ris vo'læ**, superficial palmar arch. **A. supraorbita'lis**, supraorbital arch. **A. tar'seus**, tarsal arch. **A. tar'si oc'uli**, A. arteriosus palpebræ. **A. thy'ro-cartilagin'eus**, arch formed by superior thyroid arteries over thyroid cartilage. **A. tonsilla'ris**, isthmus of fauces. **A. trachea'lis ante'rior**, arch formed by inferior thyroid arteries over trachea. **A. un'guium**, lunula; see *Nail*. **A. vasculo'si**, arches of branches of renal artery in kidney. **A. veno'sus**, arch connecting anterior jugular veins in neck; venous arch on palm of hand; venous arch over back of fingers. **A. vertebra'lis**, vertebral arch. **A. viscera'lis**, lower ring of typical vertebra, in which are enclosed viscera and important vessels. **A. vola'ris**, palmar arch. **A. zygomat'icus**, zygomatic arch.

Arda (ar'dah) or **Ardalos**, ar-dal'os. Excrement.

Ar'dent (*ardeo*, to burn). Hot, fiery, burning. **A. fe'ver**, intense fever; inflammatory fever. **A. spir'its**, see *Spirit*.

Ardisia humilis, ar-dis'e-ah hu'mil-us. Badulam.

Ar'dor, Heat; feeling of violent heat. **A. febri'lis**, hot period of fever. **A. stom'achi**, pyrosis. **A. uri'næ**, scalding sensation occasioned by urine passing over inflamed mucous membrane of urethra or over neck of bladder. **A. vene'reus**, venereal heat; sexual desire. **A. ventric'uli**, heartburn; cardialgia; pyrosis.

Area, a re-ah (void place, open surface). Space or surface; a form of alopecia in which hair changes color, but does not fall off; porrigo decalvans. **A., aud'itory**, area in second primary cerebral convolution of dog, supposed to be associated with audition. **A. Cel'si**, porrigo decalvans. **A. centra'lis**, retinal spot in animals, similar to yellow spot in man. **A., Cohn'heim's**, section of muscle-column seen on transverse section. **A. dif'fluens**, alopecia areata. **A. embryona'lis**, A. germinativa. **A., fœ'tal**, A. germinativa. **A. germinati'va**, germinal area or embryonic spot. **A. hypoglos'si**, inferior extremity of fasciculus teres, floor of fourth ventricle. **A., mo'tor**, motor centre. **A., non-nu'cleated**, spaces between vascular endothelial cells. **A. nummula'ta**, form of alopecia areata. **A. opa'ca, A., opaque**, opaque circle around area pellucida, deriving its color from the white yolk beneath the blastoderm; outer zone of the blastoderm, from which fœtal membranes are developed. **A. ophi'asis**, calvities; porrigo decalvans. **A. op'tica**, field of vision. **A. pellu'cida**, elliptical depression in ovum, filled with pellucid fluid, in centre of which is the germ. **A., sep'tal**, inner surface of laminæ of septum lucida. **A. ser'pens**, calvities; porrigo decalvans. **A. serpigino'sa**, spreading form of alopecia areata. **A., transpa'rent**, A. pellucida. **A. tyr'ia**, alopecia areata. **A. vagi**, triangular space on floor of fourth ventricle. **A. vasculo'sa**, see *Circulus venosus*. **A. vitelli'na**, part of blastodermic vesicle on outside of area vasculosa.

Areæ cribrosæ, ah'ra-e krib-ro'sa. Small orifices at bottom of internal auditory meatus, through which pass branches of auditory nerve.

Areas of medulla oblongata, a're-ahs, med-ul'lah ob-lon-gat'ah. Regions of that portion of the nervous system indicated by roots of nerves passing outward from the nuclei. **A. of skull**, regions of cranium indicating positions of convolutions of the brain.

Areca. Fruit—*Areca nut, Betel nut*—of Areca catechu, ord. Palmæ; astringent, anthelmintic, and tonic. It enters into composition of *Betel*, great Oriental masticatory; seed is astringent. **A. cat'echu**, areca. **A. fau'fel**, areca. **A. nut**, see *Areca*.

Arecin, ar'es-in. Base from cinchona-bark, isomeric with brucin ($C_{23}H_{26}N_2O$).

Are'coline. $C_8N_{13}NO_2$. Alkaloid from seeds of Areca catechu; a soluble liquid. Anthelmintic; poisonous, having action on the heart similar to muscarine. Dose, gr. $\frac{1}{2}$.

Arefaction, a-re-fak'shun (*areo*, to dry, *facio*, to make). Process of drying substances prior to pulverization.

Arekane, ar'e-kane. Alkaloid from areca-nut; sialagogue and purgative.

Arena, ar-a'nah (*areo*, to be dry). Sand; gravel.

Arenamen, ar-en-ah'men. Bole Armenian.

Arenaria rubra, ar-en-ah're-ah ru'brah. Plant, ord. Caryophylleæ, common near Algiers, growing in sandy soils, and hence called sabline; used in Sicily and Malta, in decoction, in vesical catarrh and gravel.

Arenation, ar-e-na'shun. Sand- or earth-bath; application of hot sand to the body. See *Bath, sand*.

Arenga saccharifera, ar-en'gah sak-kar-if'er-ah. By incision of this Indian tree juice is obtained, used under name of toddy; a kind of sago is obtained from the pith.

Arenosa urina, ah-ren-o'sah u-re'nah (*arena*, sand). Sandy urine; urine when it deposits sandy sediment.

Arenosus, ar-en-o'sus. Sabulous. One who passes sandy urine.

Arenula, ar-en'u-lah (dim. of **Arena**, sand). Gravel.

Areola, ar-e'o-lah (dim. of **Area**). Interstices between fibres composing organs, or those existing between laminæ or between vessels interlacing with each other. Also, colored circle surrounding the nipples, *areola mammæ* or *papillaris*, which becomes much darker during pregnancy. Circle surrounding certain vesicles, pustules, etc., as of small-pox, vaccine vesicle, etc. Nucleus of a cell. **A. of breast**, see *Areola*. **A. of Chaussier**, zone around malignant pustule. **A. embryona'lis**, area, embryonic. **A. mam'mæ**, A. of breast; see *Areola*. **A. of nipple**, see *Areola*. **A. papil'læ** or **papilla'ris**, A. of breast; see *Areola*. **A., tu'bercles of**, see *Mamma*. **A. umbilica'lis**, dark zone around the umbilicus, especially during pregnancy.

Areolar, ar-e'o-lar. Appertaining to an areola. **A. can'cer**, colloid cancer. **A. exhala'tions**, recrementitial secretions effected within the organs of sense, as aqueous, crystalline, and vitreous humors, etc., or in areolar tissue of parenchymatous and other structures. **A. spaces**, open places in spongy part of bones. **A. tis'sue**, cellular tissue.

Areolate, ar-e'o-late. Divided into areolæ.

Areometer, ar-e-om'e-tur (*araios*, light, *metron*, measure). Variously called aræometer, hydrometer, pycnometer, granimeter, alcöolometer, alcöometer, aërostatic balance. Instrument first employed to take specific gravity of fluids lighter than water; now used for liquids generally.

Areometry, a-re-om'e-try. Science or method of measuring specific gravity of fluids.

Areotica, ar-a-ot'ik-ah. Remedies which dilute the secretions and increase perspiration.

Arete, ar'a-ta (power). Mental or corporeal vigor.

Arethusa (ar-eth-u'zah) **bulbo'sa**. Indigenous. Bruised bulbs are used in toothache and as cataplasms to tumors.

Ar'gel. Cynanchum oleæfolium.

Argema, ar'ga-mah (*argos*, white). White spot or ulceration of eye; leucoma.

Argemone Mexicana, ar-ge-mo'na meks-ik-an'ah. *Thorn poppy, Prickly poppy, Yellow thistle.* Native of Mexico, but naturalized elsewhere. Ord. Papaveraceæ. Juice, resembling gamboge, is hydragogue. Seeds are used in the West Indies as a substitute for ipecacuanha. It has a cathartic oil—*Shealkanta oil, Karwah thistle oil*—yielded in large quantity by the seeds, like castor oil in action. Flowers are hypnotic.

Argentation, ar-jen-ta'shun. Mercurial injection of anatomical specimen; staining of microscopic preparation with nitrate of silver. Constitutional effects of that salt.

Argenteria, ar-jen-te'ri-a. Potentilla anserina.

Argenti chloridum, ar-jen'te klo'ri-dum. *Chloruret, chloride*, or *muriate of silver.* This preparation has been used in syphilis, and the following compounds of silver have been similarly employed: the cyanide or cyanuret; the iodide, *Argenti iodidum, Ioduret of silver;* the oxide, *Argenti oxidum*, and the chloride of ammonium and silver, *Argenti et ammoniæ chloridum, Chloruret of silver and ammonia, Ammonia-chloride of silver.* At first these preparations were administered iatraleptically on the gums; chloride, cyanide, and iodide in dose of $\frac{1}{12}$th of a grain; chloride of silver and ammonia $\frac{1}{24}$th of a grain, and oxide of silver and divided silver in dose of $\frac{1}{4}$th and $\frac{1}{2}$th of a grain, but somewhat larger doses are now prescribed internally. **A. cyan'idum** or **cyanure'tum**, *Cyanide* or *Cyanuret of silver*, is officinal in U. S. Ph., but is not given medicinally, its only use being in the manufacture of hydrocyanic acid. **A. cyanure'tum**, argenti cyanidum. **A. io'didum**, see *Argenti chloridum.* **A. iodure'tum**, see *Argenti chloridum.* **A. ni'tras**, *Nitrate of silver.* In crystals, or in fused state, this latter is admitted into most pharmacopœias, and referred to as *Argenti nitras, Argenti nitras fusus* or *fusa* or *fusum, Lunar caustic.* Nitrate of silver is prepared by action of nitric acid on silver. *Fused nitrate* is made by melting nitrate with 4 per cent. of hydrochloric acid. Dilute nitrate of silver, *argenti nitras dilutus* (Ph. U. S.), is fused nitrate, melted with equal weight of potassium nitrate, and is used in ophthalmic surgery. Nitrate of silver is tonic and astringent. It is given in chorea, epilepsy, etc.; locally, as astringent and escharotic. Dose, gr. $\frac{1}{8}$ to gr. $\frac{1}{4}$ in pill, three times a day. When silver is combined with iodine, it is said to have the same effect as the nitrate, and not to produce slate color of surface, *macula argentea*, which follows protracted use of the latter. **A. ox'idum**, *Oxide of silver*, is officinal in the U. S. Ph. and Br. Dose, gr. 1, as a tonic and astringent in many affections of the stomach and bowels, also in epilepsy and neuralgia; externally, in the form of ointment, to venereal sores. **A. et potas'sii ni'tras** (Ph. Br.), nitrate of silver and potassium; mitigated caustic; nitrates of silver and potassium fused together; used externally like fused nitrate of silver, but not so energetic.

Argentic, ar-jen'tik. Containing silver or one of its preparations; caused by silver, as argentic stomatitis.

Argentilla vulgaris, ar-jen-til'lah vul-gah'ris. Potentilla anserina.

Ar'gentine. Pertaining to silver, as argentine solution or solution of salt of silver. Potentilla anserina.

Argentum, ar-gen'tum (*argos*, white). Silver. Solid metal of a shining white appearance, crystallizable in triangular pyramids; fusible a little above a red heat, and volatizable; sp. gr. 10.4. Not used in medicine, unless as silver-leaf or silvering pills. **A. chlora'tum**, argenti chloridum. **A. cyanogena'tum**, argentic cyanidum. **A. divi'sum**, metallic silver, in very fine powder, recommended internally in syphilis. **A. folia'tum**, silver-leaf. **A. fugiti'vum**, hydrargyrum. **A. fu'sum**, hydrargyrum. **A. ioda'tum**, see *Argenti chloridum.* **A. liq'uidum**, hydrargyrum. **A. mo'bile**, hydrargyrum. **A. muriat'icum**, argenti chloridum. **A. muriat'icum ammonia'tum**, see *Argenti chloridum.* **A. oxyda'tum**, argenti oxidum. **A. purifica'tum** (Ph. Br.), refined silver; pure metallic silver. **A. vi'vum**, hydrargyrum.

Argil (ar'jil), **pure** (*argos*, white). Argilla pura.

Argilla, ar-jil'lah (*argos*, white). Argilla pura. **A. aceti'ca**, aluminæ acetas. **A. bo'lus fla'va**, terra Lemnia. **A. bo'lus ru'bra**, bole Armenian. **A. ferrugin'ea ru'bra**, bole Armenian. **A. hydra'ta**, A. pura. **A. incarna'ta**, bole Armenian. **A. ka'li sulphu'rica**, alumen. **A. ni'trica**, aluminium nitrate. **A. pal'lida**, bolus alba. **A. pu'ra**, prepared by drying alum and exposing it to red heat until sulphuric acid is driven off; used in indigestion as antacid, and in vomiting and diarrhœa with acidity. Burnt alum. **A. sulphu'rica alcalis'ta**, alumen. **A. sulphu'rica us'ta**, alumen exsiccatum. **A. vitriola'ta**, alumen.

Argillaceous (ar-jil-la'shus). Clayey. **A. earth**, alumina; has been used in indigestion as antacid.

Argillæ acetas, ar-jil'la as-a'tas. Aluminæ acetas. **A. sul'phas**, aluminii sulphas. **A. supersul'phas alcalisa'tum**, alumen.

Argol (ar'gol), **red.** Potassæ supertartras impurus. **A., white**, potassæ supertartras impurus.

Argumentum integritatis, ar-gu-men'tum in-tegre-tat'is. Hymen.

Argyll-Robertson (Ar'gyl-Rob'ert-son) **pu'pil** or **sign.** Small pupil which fails to contract under influence of light, but responds to efforts at accommodation; reflex iridoplegia; absence of pupil reflex.

Argyreia arborea, ar-jir-i'ah ar-bor'e-ah. Chinese tree, leaves and root of which are used for poultices. **A. Malabar'ica**, used in Malabar for abscesses and erysipelas. **A. specio'sa**, used in India for poultices.

Argyria (ar-jyr'e-ah), **Argyriasis** (ar-jyr-e'as-is), or **Argyrosis**, ar-jyr-o'sis (*arguros*, silver). Discoloration of skin occasioned by internal use of nitrate of silver; deposit of silver in internal organs.

Argyrochæta, ar-jyr-o-ke'tah (*arguros*, silver, *chaite*, hair). Matricaria.

Argyrotrophema, ar-jyr-o-trof-a'mah (*arguros*, silver, *trophe*, nourishment). Blanc mange.

Argyrus, ar'jyr-us. Argentum.

Arheumatic (ah-roo-mat'ik) or **Arrheumatic** (*a, rheuma,* fluxion or rheumatism). One without rheumatism.

Arhyth'mia. See *Arrythmia.*

Arhythmic (a-rith'mic) or **Arhyth'mos** (*a, rhuthmos,* rhythm). Not regular or rhythmic, as the pulse.

Ar'ia. Cratægus aria. **A. catti'va,** see *Miasma.*

Arica, ah-re'kah. Bark like other cinchonas, from Cinchona pubescens of Peru.

Aricina (ah-ris-e'nah), **Aric'ia, Ar'icine** (from Arica in S. America). Alkaloid in Cusco and cuprea barks similar in properties to cinchona.

Aricymon, ah-ris'e-mon (*ari,* an intensive particle, *kuo,* to conceive). Female who conceives readily.

Aridity, a-rid'it-e (*aridus,* dry). Dryness of any organ, as the skin or tongue; lanuginous appearance of hair, as if covered with dust.

Aridura, ar-id-u'rah (dryness). Wasting or emaciation; hectic fever; marasmus; atrophy. **A. cor'dis,** atrophy of the heart. **A. hep'atis,** atrophy of the liver.

Arika (ah-re'kah). See *Spirit.*

Aril'lus myris'ticæ. Mace.

Arisæma (ar-is-e'mah) **atroru'bens.** Arum triphyllum. **A. dracon'tium,** Arum dracontium. **A. Thunber'gii,** Arum dracontium. **A. triphyl'lum,** Arum triphyllum.

Aristalthæa, ar-is-tal-the'ah (*aristos,* best, *althæa*). Althæa.

Aristol, ar'is-tol. Dithymoldiiodide; annidalin. Red amorphous powder resulting from decomposition of solution of iodine in iodide of potassium by alcoholic solution of thymol. It was introduced as a substitute for iodoform, resembling it in therapeutic action when used externally in dermatology, gynecology, etc., and being without odor.

Aristolochia, ar-is-to-lok'e-ah (*aristos,* best, *locheia,* parturition, because supposed to aid parturition). *Birthwort,* ord. Aristolochiaceæ. **A. anguici'da,** juice of root said to paralyze or kill snakes, hence its name "snake-killer." **A. biloba'ta,** leaves used in W. Indies as remedy for itch; root is emmenagogue. **A. bractea'ta,** Indian variety; cathartic, emmenagogue, anthelmintic. **A. ca'va,** Fumaria bulbosa. **A. clemati'tis,** *Upright birthwort.* The root is stimulant and emmenagogue, and used in amenorrhœa, chlorosis, gout, and rheumatism. **A. contor'ta,** root is purgative and anthelmintic. **A. cret'ica,** A. clematitis. **A. faba'cea,** Fumaria bulbosa. **A. fragrantis'sima,** stems used in Mexico under name guaco in intermittent fevers and affections of abdomen. **A. grandiflo'ra,** leaves of this plant of Jamaica and Guatemala are used for baths, gout, and rheumatism; the plant in dropsy and dyspepsia. **A. hasta'ta,** see *A. serpentaria.* **A. hirsu'ta,** see *A. serpentaria.* **A. In'dica,** root of this Indian shrub is used in gout, intermittent fever, amenorrhœa, etc. **A. lon'ga,** *Long birthwort.* Virtues same as A. clematitis. **A. Mexica'na,** Mexican species, antispasmodic. **A. odoratis'sima,** Mexican species, tonic, stimulant, diaphoretic. **A. pal'lida,** grows in S. Europe; used in asthma, gout, amenorrhœa, etc. **A. pistolochi'a,** aromatic odor and acrid, bitter taste; properties same as A. clematitis. **A. reticula'ta,** see *A. serpentaria.* **A. rotun'da,** round birthwort; virtues same as A. clematitis. **A. sagitta'ta,** employed indiscriminately with A. serpentaria. **A. serpenta'ria,** *Serpentaria, Virginia snakeroot, Serpentary root, Snakeroot birthwort, Snakeweed, Snagrel.* Virtues of the root, Serpentaria (Ph. U. S.), tonic, stimulant, diuretic, and diaphoretic; employed in debility, intermittents, etc. Aristolochia hirsuta, A. hastata, and A. reticulata or Red River snakeroot, indigenous, are employed indiscriminately with A. serpentaria under name serpentaria or Virginia snakeroot; virtues appear to reside in bitter extractiform matter called *serpentarin.* **A. si'pho,** *Dutchman's pipe,* has virtues like those of A. serpentaria. **A. ten'uis,** A. clematitis. **A. tomento'sa,** indigenous, has virtues like those of A. serpentaria. **A. trif'ida,** A. trilobata. **A. triloba'ta,** plant of Surinam and Jamaica, possessing general virtues of Aristolochiaceæ. **A. vulga'ris rotun'da,** Fumaria bulbosa.

Aristolochic, ar-is-to-lok'ik. Remedy supposed to promote flow of lochia or to expel the placenta.

Aristolochin, ar-is-tol-ok'in. Bitter substance from roots of Aristolochia clematitis and A. serpentaria.

Aristotelia, ar-is-to-ta'le-ah (from Aristotle). Leaves of this Chilian plant are used for wash for ulcers, particularly those of the mouth; the plant is antipyretic.

Ar'istotle, experi'ment of. Sensation of presence of two substances when a single substance is placed under the crossed fingers.

Aristrocar'dia (*aristeros,* left, *kardia,* heart). Displacement or deviation of heart leftward.

Arithmomania, ar-ith-mo-man'e-ah. Morbid passion for arithmetical calculations or problems.

Arkeion, ark-i'on. Arctium lappa.

Arm. Part of the body between the shoulder and the wrist, or between the shoulder and the elbow only. **A. jerk,** produced by striking the tendon of the biceps at the elbow, or of the triceps muscle above the olecranon. See *Reflex.*

Ar'ma. Penis. **A. ven'tris,** penis; male generative apparatus.

Armamentarium (ar-mah-men-tah're-um) or **Armarium,** ar-mah're-um (*armo,* to equip). Arsenal. **A. chirur'gicum,** arsenal; collection of surgical instruments. **A. luci'næ,** collection of obstetrical instruments. **A. portab'ile,** portable case of instruments.

Ar'matory un'guent. Salve supposed to cure wounds by sympathy.

Armatura, ar-mah-tu'rah. Amnion.

Armature, arm'a-ture. The keeper of a magnet.

Arme, ar'ma (*aro,* to adapt). Physiological or mechanical junction or union of parts. Suture, as of the cranium.

Armed, armd. Fortified with some other substance, as an instrument armed with caustic. Having an armature.

Armeniaca epirotica, ar-men-e'ak-ah ep-ir-ot'ik-ah. Prunus Armeniaca. **A. ma'lus,** apricot; see *Prunus.* **A. vulga'ris,** Prunus Armeniaca.

Armenian (ar-me'ne-an) **bole.** See *Bole.*

Armeria vulgaris, arm-a're-ah vul-gah'ris. Sea pink; thrift; European species; leaves are astringent in diarrhœa and menorrhagia, and used as gargles.

Armillæ manûs membranosæ, ar-mil'le .ma'nus mem-bran-o'sa (*armilla,* bracelet). Annular ligaments of carpus. **A. ner'vi trigem'ini,** ganglion of Gasser.

Armoniacum, ar-mo-ne'ak-um. Ammoniac, gum.

Ar'mor. Condom.

Armoracia, ar-mo-rah'se-ah. Fresh root of Cochlearia armoracia. Armoraciæ radix (Ph. Br.), horseradish root. Internally, stimulant; externally, rubefacient; employed as condiment. **A. rustica'na,** Cochlearia armoracia. **A. sati'va,** Cochlearia armoracia.

Ar'mus. Humerus; arm; shoulder. **A. sum'mus,** acromion.

Ar'my itch. Itching skin diseases of soldiers, such as scabies, ptheiriasis (lousiness), etc.

Arn. Alnus glutinosa.

Arnaldia, ar-nal'de-ah. Disease once prevalent in England, accompanied with loss of hair; by some supposed to have been syphilis.

Arnica montana, ar'nik-ah mon-tan'ah. *Arnica, Leopard's bane, Mountain arnica, Accident plant.* Ord. Compositæ. Plant and flowers, *Arnicæ flores,* U. S. Ph., and root, *Arnicæ radix,* Ph. U. S. and Br., are narcotic, stimulant, emmenagogue, diaphoretic, diuretic, etc., and as such have been given in amaurosis, paralysis, all nervous affections, rheumatism, gout, chlorosis, etc. Dose, gr. v–x, in powder. In large doses it is poisonous. See *Extractum* and *Tinctura* and *Arnicin.* **A. mol'lis** and **A. nudicaul'is** are supposed to have medicinal virtues like the last. **A. plauen'sis,** Arnica montana. **A. spu'ria,** Inula dysenterica. **A. Sueden'sis,** Inula dysenterica.

Arnicæ flores, ar'ne-ka flo'res. See *Arnica montana.* **A. ra'dix,** see *Arnica montana.*

Ar'nicin. Glucoside derived from leaves and flowers of Arnica montana; not used medicinally. $C_{26}H_{30}O_4$.

Arnoglossum, ar-no-glos'sum (*arnos,* lamb, *glossa,* tongue, from shape of leaves). Plantago.

Ar'nold's fascic'ulus. Frontal tract of basal part of crura cerebri. **A.'s fold,** semilunar fold of mucous membrane in lacrymal sac. **A.'s gang'lion,** otic ganglion. **A.'s nerve,** auricular branch of pneumogastric nerve.

Arnotta (ar-not'tah) or **Arnot'to.** Terra Orleana.

Arnott's dilator, ar'not's dil-a'tor. See *Dilator, Arnott's.*

Arnut, ar'nut. Bunium bulbocastanum.

Arœi'ra. Schinus arœira.

Aroma, ar-o'mah. Odorous part of plants; emanation, frequently imponderable, from bodies acting on organ of smell and varying with body exhaling it; spice.

Aromadendron, ar-om-ah-den'dron. Species of magnoliaceous plant of Java; used as tonic and antihysteric.

Aromatic (ar-o-mat'ik) **acids.** Acids of benzine group of hydrocarbons. **A. bark,** bark of Canella alba, having a pleasant, fragrant smell. Any odoriferous substance from vegetable kingdom, containing much volatile oil or light and expansible resin. Aromatics are used in perfumes, in seasoning, and embalming; in medicine they are stimulants, as ginger, cinnamon, mint, etc. Term applied to several confections, spirits, powders, vinegars, wines, etc; see *Confection, Spiritus, Pulvis, Acetum, Vinum,* etc. **A. group,** series of hydrocarbons, $C_{10}H_{16}$ in composition. **A. spe'cies,** collection of a number of aromatic leaves or powders, used as fomentation, usually warmed, over a painful spot. **A. vin'egar,** aromatic oil dissolved in vinegar.

Aromatize, a-ro'mat-ize. To add to a mixture or potion some aromatic to mask taste or render it more agreeable.

Aromatopola, ar-o-mah-to-po'lah (*aroma, poleo,* to sell). Apothecary or druggist; one who sells spices.

Aromine, ar-o'meen. Alkaloid sometimes obtained from urine.

Ar'on. Arum.

Aroph, ar'of. Lithontriptic remedy, mandragora according to some; mixture of bread, saffron, and wine. **A. Paracel'si,** ferrum ammoniatum.

Aroyan. Cheken.

Arquatus (ar-kwah'tus, arched; jaundiced) **mor'bus.** Jaundice.

Arrack, ar-rack'. Arack. See *Spirit.*

Arraphon, ar'raf-on (*a, rhaphe,* suture). Cranium without sutures.

Arrectio, ar-rek'she-oh (*arrigo,* to set upright). Erection.

Arrector, ar-rek'tor. Erector.

Arrecto'res pilo'rum (erectors of hairs). Unstriped muscular fibres which act in producing goose-flesh by erecting the hair.

Arrenotocia, ar-ren-o-to'se-ah. Arrhenotocia.

Arreptio, ar-rep'she-o. Insanity.

Arrest. Action of checking or stopping, as *A. of development* in the evolution of a part or organ; *A. of fœtal head,* when latter is detained in the pelvic cavity in the act of parturition.

Arresta bovis, ar-res'tah bo'vis. Ononis spinosa.

Arrest'ed. Term applied in obstetrics to head of child when delayed in cavity of pelvis.

Arrhen, ar'ren. Male.

Arrhenocitia (ar-rhen-o-sish'e-ah) or **Arrhenocoë'tia** (*arrhen,* male, *coitus*). Pæderasty.

Arrhenotocia, ar-rhen-o-to'se-ah (*arrhen,* male, *tokos,* parturition). Production of males only.

Arrhenotocous, ar-rhen-ot'o-kus (same etymon). Giving birth to males only.

Arrhepis, ar'rhep-is (*arrhepes,* motionless). Eleventh dorsal vertebra.

Arrheumatic, ar-roo-mat'ik. Free from rheumatism.

Arrhinencephalia, ar-rin-en-sef-al'e-ah (*a, rhis,* nose, *enkephalos,* brain). Monstrosity with absent or defective nose and brain; sometimes it is unilateral.

Ar'rhinus (*a, rhis,* nose). Having the nose absent or defective.

Arrhœa, ar-rhe'ah (*a, rheo,* to flow). Suppression of any discharge; amenorrhœa.

Arrhostema (ar-rhos-ta'mah) or **Arrhostia,** ar-rhos'te-ah (*arrhosteo,* to lose strength). Disease; debility.

Arrhythmia, ar-rhith'me-ah. Want of rhythm. **A. cor'dis,** irregular action of the heart.

Arrhythmous, ar-rhith'mus (*a, rhuthmos,* rhythm). Irregular in rhythm.

Arrosion, ar-ro'zhun. Ulceration or erosion.

Arrow arum, ar'row ah'rum. Pellandra Virginica. **A. caus'tic,** see *Caustic.* **A. head** or **A. leaf,** Sagittaria variabilis. **A. poi'son.** Different kinds of arrow-poison have been used in different regions; thus in New Granada the skin of a batrachian has yielded *batrachine;* from the Erythrophlœum Guinense, *bourane,* used by natives of Africa; *curare, ourari,* or *woorara,* by those of South America; juice of African tulip, Hæmanthus toxicarius, and *ouabaio,* from *Carissa,* by the East coast Africans.

Arrow root (*araruta,* native name for it). Fecula of rhizoma of Maranta arundinacea, ord. Marantaceæ, which, like all feculæ, is emollient and nutritive, when prepared with water, milk, etc. *Florida arrow root, coonti* or *coontie,* is derived from Zamia integrifolia or Z. pumila, sugar pine, ord. Cycadaceæ; *Bermuda arrow root* being obtained from Maranta arundinacea; *Talcahuana arrow root* from Alstroemeria, fam. Amaryllidaceæ, of tropical America and extra-tropical Australia; *Brazilian* from Manihot utilissima. Excellent arrow root is prepared in East Indies from root of Maranta Indica, of Curcuma angustifolia and C. leucorrhiza, ord. Zingiberaceæ; *Tahiti arrow root* from Tacca Oceanica and T. pinnatifida. Used as bland and nutritious article of diet. **A. r., Af'rican,** that obtained from Southern Africa. **A. r., Bermu'da,** see *Arrow root.* **A. r., can'na,** canna starch. **A. r., cur'cuma,** variety from C. rubescens. **A. r., com'mon** or **Eng'lish,** that derived from Solanum tuberosum. **A. r., East In'dian,** A. r. from Madras and Ceylon, curcuma A. r. **A. r., maize,** corn-starch. **A. r., Mal'abar,** curcuma A. r. **A. r., Port'land,** that derived from Arum maculatum. **A. r., pota'to,** potato starch. **A. r., Sierra Leone,** A. r., African. **A. r., Tahi'ti,** *Tacca starch, Otaheite salep;* fecula of Tacca Oceanica. **A. r., Talcahuan'a,** see *Arrow root.*

Arrow weed. Colligraja, Sagittaria variabilis.

Arrow wood. Euonymus, Viburnum dentatum.

Arrow wounds. These belong to the class of penetrating and punctured wounds, with more or less laceration.

Arrythmia, ar-rith'me-ah. Irregularity; a term applied particularly to the pulse.

Ars. Art, occupation. **A. cabalis'tica,** cabal. **A. chemiat'rica,** medical application of electricity; chemical therapeutics. **A. clysmat'ica no'va,** infusion of medicines; transfusion of blood. **A. coquina'ria,** culinary art. **A. cosmet'ica,** cosmetics. **A. culina'ria,** culinary art. **A. empir'ica,** empiricism. **A. for'mulas med'icas concinnan'di,** art of writing prescriptions. **A. hermet'ica,** chemistry. **A. homœopath'ica,** homœopathy. **A. hydriat'rica,** hydrotherapeutics. **A. infuso'ria,** infusion of medicines. **A. machaon'ia,** medicine or medication. **A. maeu'tica** or **maieu'tica,** obstetrics. **A. majo'rum,** chemistry. **A. meden'di** or **med'ica,** medicine. **A. obstetrica'ria, obstet'ricans,** or **obstetri'cia,** obstetrics. **A. sanan'di,** healing art. **A. sanan'di cum expectatio'ne,** treatment by expectation. **A. separato'ria,** chemistry. **A. signa'ta,** cabal. **A. spagyr'ica,** chemistry. **A. sphyg'mica,** art of examining and determining the pulse. **A. veterina'ria,** veterinary art. **A. zoïat'rica,** veterinary art.

Arsacum (ar-sah'cum) or **Arsatum,** ar-sah'tum. Satyriasis; nymphomania.

Arsenal, ar'se-nal. Surgical arsenal or armamentarium; collection of surgical instruments; work con-

taining description of surgical instruments. *Obstetrical armamentarium* has the same significance in regard to obstetrics.

Arsenamine, ar-sen'a-meen. Arseniuretted hydrogen or arsenious hydride.

Ar'senate. Arseniate.

Arsenias, ar-se'ne-as. Arseniate. **A. ferro'so-fer'ricus**, arseniate of iron. **A. ferro'sus**, arseniate of iron. **A. ka'licus**, arseniate of potassium. **A. nat'ricus**, arseniate of sodium. **A. potas'sicus**, arseniate of potassium. **A. so'dicus**, arseniate of sodium.

Arseniasis, ar-sen-e'as-is. Poisoning by arsenic.

Arseniate, ar-se'ne-ate. Salt formed by combination of arsenic acid with salifiable base, as arseniate of ammonium, antimony, iron, or soda. **A. of ammo'nium**, $(NH_4)_2H,AsO_4$. This preparation has been employed in inveterate cutaneous diseases; a grain dissolved in an ounce of distilled water, and 20 to 25 drops commenced with as a dose. **A. of i'ron**, ferrous arseniate, *Ferri arsenias*. This preparation has been applied externally to cancerous ulcers. The arseniate has also been given internally in cancerous affections, in dose of $\frac{1}{12}$ of a grain, and in chronic cutaneous diseases. **A. of potas'sium**, arseniate of potassa. Properties same as those of arsenious acid; it is seldom used. **A. of qui'nia**, quiniæ arsenias. **A. of so'dium**, *Sodii arsenias* (Ph. U. S.), arseniate of sodium. Made by mixing powdered arsenious acid, nitrate of sodium, and dried carbonate of sodium, heating until effervescence ceases, and putting the fused salt when solidified into boiling water, filtering, and crystallizing. It is the basis of Pearson's solution, *Liquor arsenicalis Pearsonii*, formed of a grain of crystallized arseniate to a fluidounce of distilled water. Dose, gtt. xx. *Liquor sodæ arseniatis*, *Liquor sodii arseniatis* (Ph. U. S.), solution of arseniate of sodium, is much stronger.

Arsenic, ar'sen-ik (*arsen*, vigorous). *Arsenium*. Solid metal, s. g. 5.88; steel-gray color; granular texture; very brittle; volatilizing before melting; very combustible and acidifiable; not dangerous of itself, but by virtue of the facility with which it absorbs oxygen. Arsenic, popularly so called, generally signifies arsenious acid. **A. ac'id**, acidum arsenicum. **A. disul'phide**, realgar. **A. hydrochlo'ride, solution of**, liquor arsenici chloridi. **A., i'odide of**, arsenii iodidum (Ph. U. S.), formed by combination of arsenic and iodine; applied externally in tubercular cutaneous affections especially; internally in dose of tenth of a grain in similar affections. **A. and mer'cury, i'odide of**, *Double iodide of mercury and arsenic*, *Iodo-arsenite of mercury*. A compound proposed as more efficacious than either iodide of arsenic or iodide of mercury, and given in the form of liquor arsenii et hydrargyri iodidi (Donovan's solution, from its proposer). It is made by dissolving equal weights of teriodide of arsenic and mercuric or red iodidet in a measured quantity of distilled water. The dose is ♏v, x, or xv three times a day in water. It has been used successfully in many cutaneous diseases, such as psoriasis, impetigo, porrigo, lepra, pityriasis, and venereal skin diseases. **A., ox'ide of**, arsenicum album. **A., ox'ide of, white**, arsenicum album. **A., red sul'phuret of**, realgar. **A. trisul'phide**, orpiment. **A., white**, arsenicum album.

Arsenical, ar-sen'ik-al. Relating, or appertaining to, or containing, arsenic. **A. green**, aceto-arsenite of copper. **A. pow'der of Frère Côme** and of **Justamond**, see *Powder, arsenical*. **A. rash**, eczema arsenicale, produced by chronic use of arsenic. **A. solu'tion**, see *Arseniate of sodium* and *Liquor potassii arsenitis*.

Arsenicalism, ar-sen'ik-al-izm. Peculiar gastro-enteric symptoms, œdema, etc., characteristic of large doses of arsenical preparations, or of their chronic use.

Arsenici hydriodas, ar-sen'is-e hid-re'o-das. Arsenic, iodide of. **A. io'didum**, arsenic, iodide of. **A. iodure'tum**, arsenic, iodide of. **A. terio'didum**, arsenic, iodide of.

Arseniciasis (ar-sen-is-e'as-is) or **Arcenicism**, ar-sen'is-ism. Poisoning by arsenic.

Arsenicized, ar-sen'is-ized. Term applied to substances containing arsenic.

Arsenicophagy, ar-sen-ik-of'a-ge (*arsenic*, *phago*, to eat). Arsenic-eating is said to be practised in mountain regions of Austria and Austrian Italy under the idea that it favors nutrition and improves respiration.

Arsenicum, ar-sen'ik-um. Arsenic. **A. al'bum**, *White arsenic*, *Oxide of arsenic*, *Ratsbane*, *Acidum arseniosum* (Ph. U. S. and Br.), *Arsenious acid*, *White oxide of arsenic*. An acid met with in commerce in compact white masses; of vitreous aspect, opaque, acrid and nauseous taste; volatilizable by heat, and exhaling odor of garlic; soluble in water, alcohol, and oil. This is meant by the name arsenic, as commonly used. Purified by sublimation, it is employed in medicine; is tonic and escharotic, and is a most virulent mineral poison. It is used in intermittents, periodical headaches, neuroses, etc. Dose, gr. $\frac{1}{20}$ to $\frac{1}{10}$ in pill. Its officinal preparations (Ph. U. S.) are Liquor acidi arseniosi and Liquor potassii arsenitis. **A. fla'vum**, orpiment. **A. ioda'tum**, arsenic, iodide of. **A. ru'brum facti'tium**, realgar.

Arsenii iodidum, ar-sen'e-e i-o'did-um. Arsenic, iodide of.

Arseniophthisis, ar-sen-e-o-te'sis (*arsenic*, *phthisis*, wasting). Wasting away after continued use of arsenic; arsenicalism.

Arsenious acid, ar-sen'e-us as'id. Acidum arseniosum. **A. bro'mide**, $AsBr_3$, crystalline compound of the two elements named. **A. chlo'ride**, $AsCl_3$, liquid, from combination of the two elements named. **A. hy'dride**, AsH_3, arseniuretted hydrogen. **A. i'odide**, AsI_3, arsenic, iodide of.

Arsenis, ar'sen-is. Arsenite. **A. potas'sæ**, arsenite of potassium. **A. potas'sæ aquo'sus**, liquor arsenicalis. **A. potas'sæ liq'uidus**, liquor arsenicalis. **A. potas'sii**, arsenite of potassium. **A. quin'icus**, arsenite of quinine.

Arsenite, ar'sen-ite. Salt formed by combination of arsenious acid with salifiable base. **A. of cop'per**, a pigment used to give color to confectionery, under names *Paris green*, *Emerald green*, *French green*. Paris green, by some regarded as mixture of subcarbonate of copper and arsenite of copper, has been taken with fatal consequences. **A. of potas'sium** or **of potas'sa**, protoarsenite of potassium, uncrystallizable colorless salt, forming basis of liquor arsenicalis and liquor potassii arsenitis. **A. of qui'nia**, quiniæ arsenis.

Arsenium, ar-sen'e-um. Arsenic.

Arseniuretted hydrogen, ar-sen'e-u-ret-ted hi'drogen. See *Hydrogen, arseniuretted*.

Arsenization, ar-sen-i-za'shun. Medication with arsenic.

Arsenoblast, ar-sen'o-blast (*arsen*, male, *blastos*, a bud). Male element in generation.

Arsenovinic acid, ar-sen-o-vi'nik as'id. Acid produced by treating arsenic with alcohol.

Arse-smart, bi'ting. Polygonum hydropiper.

Art, heal'ing. Application of precepts of best physicians and of results of experience to treatment of disease. **A., vet'erinary**, see *Veterinary*.

Artabotrys suaveolens, ar-tab-ot'ris swav-a'o-lens. An infusion of the leaves is given in cholera.

Artanthe adunca, art-an'the ad-un'kah. Leaves of Piper aduncum of Southern America; stimulant. **A. elonga'ta**, matico. **A. lancæafo'lia**, matico from New Granada.

Artefact, art'e-fakt (*ars*, art, *facio*, to make). Artificial structure, not real, but a result of chemical or other examination.

Artemia, ar-tem'e-ah (soundness). Perfect physical health.

Artemisia, ar-tem-iz'e-ah. Ord. Compositæ. **A. abrot'anum**, *Southernwood*, *Oldman*, *Slovenwood*, grows in Europe and U. S., and has stimulant properties. *Oil of southernwood*, *Oleum abrotani*, possesses aromatic properties of the plant. **A. absin'thium**, *Common wormwood*, *Wormit*. The flowering tops and leaves are officinal in the Ph. U. S. under the name absinthium. It is a bitter tonic and anthelmintic and cardiac stimulant. *Oil of wormwood*, *Oleum absinthii* (Ph. U. S.),

contains aromatic virtues of the plant; dose, 1 to 3 drops. A bitter liqueur, absinthe, extensively used in France, is made from leaves infused in brandy, or from alcohol mixed with volatile oil of wormwood and other less active ingredients, especially oil of anise. It produces in overdose *absinthism*, consisting of hallucinations, peculiar contractions of muscles of lips and face, tremblings in the limbs, numbness, physical prostration, emaciation, giddiness, headache, delirium, dementia, and paralysis, frequently resulting in death. Bitter principle of absinthium, *absinthin*, $C_{16}H_{20}O_4$, is a narcotic poison. **A. A'fra**, S. African species, is tonic, antispasmodic, and anthelmintic; used externally, in strong infusion, as collyrium in weak eyes; the pounded leaves and stalks as discutients in œdema and suggillations. **A. al'ba**, A. santonica. **A. arbores'cens**, Mediterranean plant, tonic, emmenagogue, and stomachic. **A. arbus'cula**, dwarf sagebrush, anthelmintic; remedy for headaches. **A. Argonen'sis**, tonic, aperient, anthelmintic plant of Algeria. **A. balsami'ta**, A. pontica. **A. bien'nis**, *Biennial wormwood;* indigenous. **A. bo'trys**, Chenopodium ambrosioides. **A. cærules'cens**, plant with febrifuge properties, growing in S. Europe. **A. campes'tris**, *Field southernwood*, same properties as A. abrotanum. **A. Canaden'sis**, Canada wormwood. **A. cauda'ta**, indigenous. **A. chenopo'dium**, Chenopodium botrys. **A. Chinen'sis**, from this the Chinese form moxas. The plant is emmenagogue, tonic, and antispasmodic. **A. ci'na**, Artemisia maritima. **A. con'tra** grows in Persia, Asia Minor, and other parts of the East. **A. dracun'culus**, *Tarragon.* Flowering tops are antiscorbutic; leaves and oil are used to season food, especially in form of estragon vinegar. **A. filifo'lia**, southernwood of North America. **A. frig'ida**, Sierra salvia, anthelmintic; also substitute for quinine. **A. glacia'lis**, *Silky wormwood.* **A. In'dica**, A. Chinensis, A. santonica. **A. Juda'ica**, growing in Palestine, Arabia, China, Cochin China, and Northern Africa. **A. leptophyl'la**, A. pontica. **A. Ludovicia'na**, Western mugwort. **A. marit'ima**, *Sea wormwood, Maritime southernwood.* The unexpanded flower-heads are officinal under the name *santonica*, which is anthelmintic and stimulant; dose, gr. x to ʒj, in powder. Its active principle is santonin, *santoninum* (Ph. U. S.), dose of which is from two to five grains in the day for child six or eight years old. **A. mox'a**, A. Chinensis. **A. pon'tica**, *Roman wormwood, Lesser wormwood*, has like virtues to A. absinthium. **A. roma'na**, A. pontica. **A. ru'bra**, A. santonica. **A. rupes'tris**, *Creeping wormwood.* Aromatic virtues, used in intermittents and amenorrhœa. **A. santon'ica**, *Tartarian southernwood.* From this and other species of absinthium is obtained wormseed, Levant wormseed or santonica. **A. tenuifo'lia**, A. pontica. **A. tridenta'ta**, sagebrush; infusion is anthelmintic, and used for colds and headaches. **A. trif'ida**, dwarf sagebrush of North America. **A. vulga'ris** possesses general tonic virtues of artemisiæ; used also in epilepsy, chorea, and other nervous conditions.

Artemisilla amarga, ar-tem-is-il'lah am-ar'gah. Parthenia hysterophorum.

Artemisin, ar-tem'is-in. Bitter principle contained in Artemisia absinthium.

Artereurys'ma (*arteria, eurus*, dilated). Aneurism.

Arteria, ar-ta'ɪe-ah. Artery. **A. abdomina'lis**, deep circumflex iliac artery; superficial epigastric a. **A. acetab'uli**, branch of internal circumflex a. to hip-joint. **A. acromia'lis**, acromial a. **A. acro'mio-thora'cica**, acromio-thoracic a. **A. ala'ris**, lateral nasal a. **A. alveola'ris infe'rior**, inferior dental a. **A. alveola'ris supe'rior**, superior dental a.; alveolar branch of internal maxillary a. **A. anastomot'ica**, anastomotic a. of arm and thigh; plantar artery of foot; communicating peroneal artery. **A. angula'ris**, angular artery of nose. **A. anon'yma**, innominate artery. **A. ante'rior commu'nicans**, anterior communicating artery of brain. **A. aor'ta**, aorta. **A. apoplec'tica**, carotid artery. **A. appendica'lis** or **appendicula'ris**, small branch from ileo-colic artery to appendix. **A. articula'ris**, name given to number of articular branches, chiefly to knee-joint, tibio-fibular and radio-ulnar articulations. **A. as'pera**, trachea. **A. atrabilia'ria**, capsular artery. **A. auditi'va**, auditory artery. **A. auricula'ris**, auricular branches of occipital artery and transverse facial a.; branches of coronary artery to auricle of heart. **A. axilla'ris**, axillary artery. **A. az'ygos**, small artery in middle line of tongue. **A. brachia'lis**, brachial artery. **A. b. profun'da**, superior profunda artery. **A. brachiocephal'ica**, see *Innominata.* **A. bronchia'lis**, bronchial artery. **A. bucca'lis**, branch of inferior dental artery to mouth, **A. buccinato'ria**, buccal a. **A. bulbi'na, bul'bo-caverno'sa**, or **bulbo'sa**, artery of bulb of urethra. **A. bul'bo-urethra'lis**, urethral artery. **A. cæca'lis**, branch of ileo-colic artery to cæcum. **A. callo'sa**, anterior cerebral artery. **A. capita'lis**, carotid artery. **A. capsula'ris**, branch of A. centralis retinæ to lens. **A. cardi'aca**, coronary artery. **A. carot'ica** or **carot'ida**, carotid a. **A. carot'ica primiti'va**, primitive carotid artery. **A. car'pea dorsa'lis ulna'ris**, anterior carpal artery; posterior branch of ulnar artery to wrist. **A. cauda'lis**, middle sacral artery. **A. caverno'sa**, artery of the corpus cavernosum. **A. centra'lis modi'oli**, branch to modiolus from auditory a. **A. c. ret'inæ**, central artery of the retina. **A. cephal'ica**, carotid artery. **A. cerebel'li infe'rior**, inferior cerebellar artery. **A. cerebra'lis**, internal carotid artery. **A. cer'ebri**, anterior and middle posterior cerebral arteries. **A. cervica'lis**, branch from the occipital artery to the back of the neck; superficial and transverse cervical arteries. **A. cer'vico-scapula'ris**, see *Cervical arteries.* **A. choroid'ea**, branch of superior cerebellar artery. **A. circumflex'a**, circumflex iliac a.; external and internal circumflex arteries of thigh; dorsal branch of scapular a. **A. clitor'idis**, artery of clitoris, similar to a. of penis. **A. coccyge'a**, coccygeal artery. **A. coch'leæ**, cochlear artery. **A. cœli'aca**, cœliac artery. **A. col'ica**, ileo-colic a.; right, left, and middle colic arteries; sigmoid a.; superior hemorrhoidal a. **A. collatera'lis**, superior and inferior profunda arteries of arm; branch of former to triceps, to deltoid; anastomotic a. of arm; external superior articular a. of knee. **A. col'li transver'sa**, transverse cervical a. **A. co'mes ner'vi ischiad'ici**, branch of inferior gluteal a. to great sciatic nerve. **A. c. n. media'ni**, median a. **A. c. n. phren'ici**, superior phrenic a. **A. commu'nicans cer'ebri**, communicating a. of brain, anterior and posterior. **A. c. perone'i**, branch of communication between peroneal and posterior tibial a-s. **A. c. Willis'ii**, posterior communicating a. **A. concha'rum**, nasi-spheno-palatine a. **A. corona'ria**, coronary a. of heart or lip. **A. c. malleola'ris**, A. communicans peronei. **A. c. ventric'uli**, pyloric a., gastric a. **A. cor'poris callo'si**, anterior cerebral a. **A. c. caverno'si clitor'idis**, A. profunda of clitoris. **A. c. caverno'si ure'thræ**, A. of bulb of urethra. **A. costa'lis**, inferior and superior intercostal a-s. **A. cos'to-cervica'lis**, costo-cervical a. **A. c.-lumba'ris**, A. from aorta, regarded as intercostal a. or lumbar a. by different anatomists. **A. cras'sa**, aorta. **A. cremas'ter'ica**, external spermatic a. **A. cri'co-thyreoid'ea**, crico-thyreoid a. **A. cris'tæ pu'bis**, pubic a. **A. crura'lis**, femoral a. **A. c. ili'aca**, external iliac, deep circumflex iliac a. **A. c. profun'da**, deep femoral a. **A. c. superfic'ia'lis**, superficial femoral a. **A. cubita'lis**, ulnar a. **A. cu'biti exter'na**, radial a. **A. cuta'nea abdom'inis**, superficial epigastric a. **A. ad cu'tem abdom'inis**, see *Ad cutem abdominis.* **A. deferentia'lis**, A. of vas deferens. **A. deltoi'dea**, branch of acromio-thoracic a. to deltoid. **A. denta'lis**, inferior dental a; posterior dental a. **A. diaphragmat'ica**, phrenic a. **A. digita'lis**, A-s to fingers and toes are so called. **A. dorsa'lis clitor'idis**, dorsal a. of clitoris. **A. d. dig'iti min'imi pro'pria**, dorsal a. of little toe. **A. d. hallu'cis**, first dorsal interosseous a. of foot. **A. d. lin'guæ**, dorsal a. of tongue. **A. d. metacar'pi**, posterior radio-carpal a. **A. d. na'si**, nasal branch of ophthalmic a. **A. d. pe'dis**, dorsal a.

of foot. **A. d. pe'nis**, dorsal a. of penis. **A. d. pol'licis**, dorsal a. of thumb. **A. d. scap'ulæ**, dorsal a. of scapula. **A. d. s. infe'rior**, inferior branch of posterior scapular a. **A. dor'so-spina'lis**, branch of superior intercostal a. to posterior cervical muscles. **A. duodena'lis infe'rior**, inferior pancreatico-duodenal a. **A. du'ræ ma'tris me'dia max'ima**, middle meningeal a. **A. emul'gens**, renal a. **A. encephal'ica**, internal carotid a. **A. epigas'trica**, epigastric a. **A. e. infe'rior exter'na**, superficial circumflex iliac a. **A. e. i. inter'na**, deep epigastric a. **A. e. supe'rior**, superior epigastric a. **A. epiplo'ica sinis'tra**, branch of left gastro-epiploic a. to mesentery. **A. ethmoïda'lis**, ethmoidal a., anterior and posterior. **A. facia'lis**, facial a. **A. f. ante'rior**, angular a., facial a. **A. f. exter'na**, facial a. **A. f. poste'rior**, transverse facial a. **A. f. profun'da**, internal maxillary a. **A. f. transver'sa**, transverse facial a. **A. femora'lis**, femoral a. **A. f. commu'nis**, common femoral a. **A. f. or fem'oris profun'da**, deep femoral a. **A. f. superficia'lis**, femoral a. **A. ad fenes'tram ova'lem**, branch of stylo-mastoid a. to fenestra ovalis. **A. fibula'ris**, peroneal a. **A. f. supe'rior**, superior fibular a. **A. fos'sæ Syl'vii**, middle cerebral a. **A. fronta'lis**, frontal a. **A. f. exter'na**, supraorbital a. **A. f. inter'na**, frontal a., naso-frontal a. **A. funicula'ris** or **funic'uli spermat'ici**, cremasteric a., external spermatic a. **A. gas'trica dex'tra infe'rior**, right gastro-epiploic a. **A. g. infe'rior**, gastro-epiploic a. **A. g. ma'jor** or **supe'rior**, coronary a. of stomach, gastric a. **A. g. sinis'tra infe'rior**, left gastro-epiploic a. **A. g. supe'rior dex'tra**, right coronary artery of stomach, pyloric a. **A. g. s. sinis'tra**, coronary a. of stomach. **A. gastrocnem'ica**, branch of sural a. **A. gastroduodena'lis**, gastroduodenal a. **A. gas'tro-epiplo'ica**, gastro-epiploic a., right and left. **A. gas'tro-hepat'ica sinis'tra**, branch from gastric a. to liver. **A. genita'lis**, internal pudic a. **A. glandulo'sæ axilla'ris**, alar thoracic a. **A. glute'a**, gluteal a. **A. g. infe'rior**, inferior gluteal a., sciatic a. **A. g. supe'rior**, superior gluteal a. **A. guttura'lis**, thyroid a. **A. hemorrhoïda'lis infe'rior** or **exter'na**, inferior hemorrhoidal a. **A. h. inter'na**, superior hemorrhoidal a. **A. hepat'ica**, hepatic a. **A. h. commu'nis**, hepatic a. before its division. **A. h. pro'pria**, branch of hepatic a. supplying the liver. **A. humera'ria** or **humera'lis**, branch of acromio-thoracic a.; brachial a. **A. hyaloid'ea**, hyaloid a. **A. hyoid'ea**, hyoid a. **A. hypogas'trica**, internal iliac a. **A. il'eæ**, branch of ileocolic a. **A. il'eo-col'ica**, see *Colic arteries*. **A. ili'aca**, common iliac artery. **A. i. ante'rior** or **exter'na**, external iliac a. **A. i. commu'nis**, common iliac a. **A. i. crura'lis**, external iliac a. **A. i. exter'na**, external iliac a. **A. i. inter'na**, internal iliac a. **A. i. par'va**, ileo-lumbar a. **A. i. poste'rior**, gluteal a. **A. i. primiti'va**, common iliac a. **A. il'io-lumba'lis** or **il'io-lumba'ris**, ilio-lumbar a. **A. incisi'va**, branch from inferior dental to incisor teeth. **A. infe'rior lin'guæ**, ranine a. **A. infraorbita'lis**, infraorbital a. **A. infrascapula'ris**, infrascapular a., subscapular a. **A. innomina'ta**, innominate a. **A. intercosta'lis**, intercostal a. **A. intermetatar'sea dorsa'lis pri'ma**, first dorsal interosseous a. **A. interos'sea accesso'ria**, anterior interosseous a. in palm. **A. i. antebrach'ii ante'rior**, anterior interosseous a. **A. i. a. commu'nis**, interosseous a. of forearm. **A. i. a. poste'rior** or **exter'na**, posterior interosseous a. **A. i. ante'rior dorsa'lis**, anterior interosseous a. of forearm. **A. i. a. vola'ris**, branch from anterior interosseous a. of forearm. **A. i. hallu'cis**, first dorsal interosseous a. of foot. **A. i. inter'na** or **palma'ris**, anterior interosseous a. **A. i. per'forans**, posterior interosseous a. of forearm. **A. i. p. infe'rior**, anterior dorsal interosseous a. **A. i. primiti'va**, common interosseous a. of forearm. **A. i. recur'rens**, interosseous recurrent a. **A. i. superficia'lis**, median a. **A. i. vola'ris**, anterior interosseous a. **A. ischiad'ica**, ischiadic or sciatic a. **A. jugula'ris**, carotid a. **A. labia'lis**, labial a. **A. l. ante'rior**, distributed to vulva. **A. l. superficia'lis**, superficial portion of facial a. **A. lacryma'lis**, lacrymal a. **A. larynge'a ascen'dens** or **infe'rior**, crico-thyroid a. **A. l. inter'na**, internal laryngeal a. **A. latera'lis na'si**, lateral nasal a. **A. lethar'gica**, carotid a. **A. liena'lis**, splenic a. **A. lingua'lis**, lingual a. **A. l. profun'da**, ranine a. **A. lumba'lis** or **lumba'ris i'ma**, branch from middle sacral a. **A. macula'ris**, branch of A. centralis retinæ. **A. mag'na**, aorta. **A. m. pol'licis**, A. princeps pollicis. **A. malleola'ris**, see *Tibial a-s*. **A. mamma'ria exter'na**, external mammary a., long thoracic a. **A. m. inter'na**, internal mammary a. **A. m. i. latera'lis**, branch of internal mammary a. **A. mandibula'ris**, inferior dental a.; fœtal branch of internal carotid, supplying tissue near stapedius muscle. **A. manu'brii mal'lei**, branch of deep auricular a. to back of handle of malleus. **A. masseter'ica**, masseteric a. **A. mastoï'dea**, mastoid a. **A. maxilla'ris exter'na**, facial a. **A. m. infe'rior**, inferior dental a., internal maxillary a. **A. m. inter'na**, internal maxillary a. **A. max'ima**, aorta. **A. me'dia**, median a. **A. m. anastomot'ica**, middle colic a. **A. media'na** or **A. m. ret'inæ**, branch of A. centralis retinæ to middle of retina. **A. m. men'ti**, branch from coronary a. in middle line of chin. **A. me'di-cerebella'ris**, anterior inferior cerebellar a. **A. m.-cerebra'lis**, middle cerebral a. **A. medul'læ spina'lis**, spinal a., anterior and posterior. **A. meninge'a accesso'ria**, small meningeal a. **A. m. a. exter'na**, posterior meningeal a. **A. m. mag'na**, middle meningeal a. **A. m. me'dia**, middle meningeal a. **A. m. poste'rior infe'rior**, meningeal a., posterior internal a. **A. m. p. mastoï'dea**, posterior meningeal a. **A. menta'lis**, mental a. **A. mesera'ica**, mesenteric a., inferior, superior, middle. **A. mesoloba'ris** or **mesolob'ica**, anterior cerebral a. **A. metacar'pea**, metacarpal a. **A. m. dorsa'lis ulna'ris**, posterior ulno-carpal a. **A. m. vola'ris profun'da**, deep ulnar a. **A. m. v. radia'lis profun'da**, part of radial a., forming deep palmar arch. **A. m. v. ulna'ris profun'da**, deep ulnar a. **A. m. v. u. subli'mis**, part of ulnar a., forming superficial palmar arch. **A. metatar'sea**, metatarsal a. **A. m. dorsa'lis fibula'ris**, dorsal a. of little toe. **A. m. pri'ma**, first dorsal interosseous a. **A. min'ima**, arteriole. **A. muscula'ris femo'ris**, **A. m. profun'da**, deep femoral a. **A. m. mag'na superficia'lis** or **tricip'itis**, branch of common femoral to triceps. **A. mus'culo-articula'ris**, branch from anastomotica magna a. to vastus medius. **A. m.-phren'ica**, musculo-phrenic a. **A. my'lo-hyloï'dea**, mylo-hyoid a. **A. my'o-mastoï'dea**, branch from posterior auricular a. to sterno-mastoid muscle. **A. nasa'lis**, nasal a. **A. n. ante'rior**, anterior nasal a., nasal branch of ophthalmic a. **A. n. exter'na**, lateral nasal a., posterior lateral nasal a. **A. n. latera'lis**, lateral nasal a. **A. n. l. poste'rior**, posterior lateral nasal a., branch of spheno-palatine a. **A. n. me'dia**, middle nasal a. **A. n. poste'rior**, spheno-palatine a. **A. n. supe'rior**, branch of superior branch of A. centralis retinæ. **A. na'so-fronta'lis**, part of ophthalmic a. **A. n.-palati'na**, naso-palatine a. **A. ner'vi acus'tici**, auditory a. **A. obturato'ria**, obturator a. **A. occipita'lis**, occipital a. **A. ophthal'mica**, ophthalmic a. **A. palati'na ascen'dens**, inferior palatine a. **A. p. descen'dens**, superior palatine a. **A. p. ma'jor**, anterior palatine. **A. p. supe'rior**, superior palatine. **A. pala'to-labia'lis**, facial a. **A. palma'ris**, palmar a., anterior interosseous a. **A. palpebra'lis**, palpebral a., external and internal. **A. pancreat'ica mag'na** or **supre'ma**, branch of splenic a., following course of pancreatic duct. **A. pancreat'ico-duodena'lis**, pancreatico-duodenal a. **A. parotidæ'a**, branches of external carotid to parotid gland. **A. pediæ'a**, or **pedi'ca**, or **pe'dis**, dorsal a. of foot. **A. pel'vica**, internal iliac a. **A. pe'nis**, branch of internal pudic a. **A. per'forans antibrach'ii infe'rior**, inferior perforating interosseous a. **A. p. a. supe'rior**, posterior interosseous a. **A. p. stape'dia**, branch of internal carotid in fœtus to stapedius. **A. p. supe'rior**, posterior interosseous a. **A. pericardi'acophren'ica** or **pericardi'aca ascen'dens**, superior phrenic a. **A. pericephal'ica**, carotid external a. **A. perinæa'lis**, perineal a. **A. perone'a**, peroneal a.

A. p. supe'rior, superior fibular a. **A. petro'sa**, branch from internal maxillary a. to tensor tympani muscle. **A. pharynge'a ascen'dens** or **infe'rior**, ascending pharyngeal a. **A. p. descen'dens**, pterygopalatine a. **A. p. supre'ma**, superior pharyngeal a., pterygoid a. **A. pharyn'go-basila'ris** or **p.-meninge'a**, ascending pharyngeal a. **A. pharyn'go-palati'na**, inferior or ascending palatine a. **A. phren'ica**, diaphragmatic a. **A. phren'ico-costa'lis**, musculophrenic a. **A. phren'ico-pericardi'aca**, superior phrenic a. **A. planta'ris**, plantar a. **A. p. exter'na** or **latera'lis**, external plantar a. **A. p. media'lis**, internal plantar a. **A. p. profun'da**, communicating branch of dorsal a. of foot to plantar arch. **A. pol'licis mag'na**, large a. of thumb. **A. poplitæ'a**, popliteal a. **A. post-cerebella'ris**, anterior inferior cerebellar a. **A. post-cerebra'lis**, posterior cerebral a. **A. post-commu'nicans**, posterior communicating a. **A. præcerebella'ris**, superior cerebellar a. **A. præcerebra'lis**, anterior cerebral a. **A. præcommu'nicans**, anterior communicating a. **A. pri'ma**, inferior profunda a. of arm. **A. prin'ceps cervi'cis**, A. cervicalis princeps. **A. p. pol'licis**, branch of radial from back to front of thumb. **A. profun'da brach'ii**, superior profunda a. of arm. **A. p. b. infe'rior**, inferior profunda a. of arm. **A. p. cer'ebri**, posterior cerebral a. **A. p. clitor'idis**, cavernous a. of clitoris, branch of internal pudic a. in female. **A. p. fem'oris**, deep femoral a. **A. p. hu'meri**, superior profunda a. of arm. **A. p. lin'guæ**, ranine a. **A. p. pe'nis**, artery of corpus cavernosum. **A. p. vo'læ**, deep ulnar a., deep palmar arch. **A. profundis'sima il'ii**, branch to hip-joint from deep gluteal a. **A. prostat'ica**, vesico-prostatic a. **A. pterygoï'dea**, superior palatine a. **A. pter'ygo-meninge'a**, small meningeal a. **A. pter'ygo-palati'na**, superior pharyngeal a. **A. pu'bica**, branch of deep epigastric a. **A. puden'da**, pudic a. **A. p. accesso'ria**, accessory pudic a. **A. p. commu'nis**, internal pudic a. **A. p. exter'na**, external pudic a. **A. p. e. subaponeurot'ica**, external superior pudic a. **A. p. e. subcuta'nea**, external deep pudic a. **A. p. inter'na**, internal pudic a. **A. pudi'ca**, internal pudic a. **A. pulmona'lis**, pulmonary artery. **A. pylor'ica**, pyloric a. **A. radia'lis**, radial a. **A. r. in'dicis**, branch from radial a. to surface of index finger. **A. r. recur'rens**, radial recurrent a. **A. ra'dio-palma'ris**, superficial volar a. **A. ram'ulus duc'tus pterygoï'dei**, pterygoid a. **A. rani'na**, ranine a. **A. recur'rens inter'na**, superior fibular a. **A. r. radia'lis**, radial recurrent a. **A. r. tibia'lis**, tibial recurrent a. **A. r. ulna'ris**, ulnar recurrent a. **A. rena'lis**, renal a. **A. reno-capsula'ris**, capsular a. **A. ret'inæ centra'lis**, central retinal a. **A. retro-costa'lis**, internal lateral mammary artery. **A. sacra'lis latera'lis**, lateral sacral a. **A. s. me'dia**, middle sacral a. **A. saphe'na mag'na**, branch of femoral a. to ankle. **A. s. par'va**, branch of popliteal a. to middle of calf of leg. **A. scap'ulæ commu'nis**, subscapular a. **A. s. dorsa'lis**, posterior scapular a. **A. s. exter'na**, acromial a. **A. s. infe'rior**, subscapular a. **A. s. poste'rior**, posterior scapular a. **A. s. pro'pria**, dorsal branch of subscapular a. **A. s. supe'rior**, suprascapular a. **A. s. transver'sa**, suprascapular a. **A. scrotal'is**, scrotal a. **A. sep'ti na'rium**, A. of nasal septum. **A. s. n. poste'rior**, branch from spheno-palatine branch of internal maxillary; naso-palatine a. **A. s. scro'ti**, branch of internal pubic a. to septum of scrotum. **A. sigmoï'dea**, sigmoid a. **A. sperma't'ica differentia'lis**, A. of vas deferens. **A. s. exter'na**, cremasteric a. **A. s. inter'na**, internal spermatic a. **A. sphe'no-palati'na**, palatine a. **A. sphe'no-spino'sa**, middle meningeal a. **A. spina'lis ante'rior**, anterior spinal artery. **A. spino'sa**, middle meningeal a. **A. spira'lis**, superior profunda a. of arm. **A. splen'ica**, splenic a. **A. stape'dii**, branch from stylo-mastoid a. to stapedius. **A. sterna'lis**, internal mammary a. **A. sty'lo-mastoï'dea**, stylo-mastoid a. **A. subcla'via**, subclavian a. **A. subclavia'na dex'tra**, innominate artery. **A. subcosta'lis**, internal lateral mammary a. **A. subcuta'nea ma'læ**, branch from internal maxillary penetrating malar bone. **A. subscapula'ris**, inferior subscapular a., subscapular a. **A. superficia'lis abdom'inis**, ad cutem abdominis a. **A. s. pe'dis media'lis**, branch of internal plantar a. distributed to great toe. **A. supe'rior**, inferior profunda a. of arm. **A. supramaxilla'ris**, alveolar or posterior dental a. **A. supramet-atar'sea**, metatarsal a. **A. supraorbita'lis**, frontal a. **A. suprarena'lis**, capsular a., suprarenal a. **A. suprascapula'ris**, suprascapular a. **A. supraspina'ta**, supraspinosus a. **A. supratar'sea**, metatarsal a. **A. s. exter'na**, tarsal a. **A. s. inter'na**, branch from dorsal a. of foot to great toe. **A. supratrochlea'ris**, branch of ophthalmic a. to upper eyelid. **A. sylvia'na**, middle cerebral a. **A. tar'sea exter'na**, external tarsal a. **A. t. e. ante'rior** or **latera'lis**, metatarsal a. **A. t. inter'na**, internal tarsal a. **A. t. latera'lis poste'rior** or **exter'na**, tarsal a. **A. tempora'lis ante'rior** or **fronta'lis**, anterior temporal a. **A. t. exter'na** or **occipita'lis**, posterior temporal a. **A. testicula'ris**, internal spermatic a., cremasteric a. **A. tes'tis exter'na**, cremasteric a. **A. thorac'ica ala'ris** or **axilla'ris**, alar thoracic a. **A. t. humera'lis**, acromio-thoracic a. **A. t. infe'rior**, external mammary a. **A. t. inter'na**, internal mammary a. **A. t. lon'ga** or **ma'jor**, long thoracic a., internal mammary a. **A. t. mamma'ria**, internal mammary a. **A. t. me'dia**, acromio-thoracic a. **A. t. mi'nor**, superior thoracic a. **A. t. poste'rior**, descending branch of subscapular a. **A. t. pri'ma** or **supre'ma**, superior thoracic a. **A. t. secun'da**, acromio-thoracic a. **A. t. ter'tia**, long thoracic a. **A. thorac'ico-dorsa'lis**, descending branch of subscapular a. **A. thy'ro-cervica'lis**, thyroid axis. **A. thyroï'dea ascen'dens**, inferior thyroid a. **A. t. descen'dens**, superior thyroid a. **A. t. i'ma** or **Neubau'eri**, A. from innominate or right common carotid or aortic arch to thyroid gland. **A. tib'iæ nutrit'ia**, nutrient a. of tibia. **A. tibia'lis anti'ca**, anterior tibial a. **A. t. posti'ca**, posterior tibial a. **A. t. recur'rens**, tibial recurrent a. **A. tonsilla'ris**, tonsillar a. **A. transver'sa car'pi dorsa'lis**, posterior radial carpal a. **A. t. c. vola'ris**, anterior radial carpal a. **A. t. col'li**, transverse cervical a. **A. t. fa'ciei**, transverse facial a. **A. t. scap'ulæ**, suprascapular a. **A. transversa'lis cervi'cis**, transverse cervical a. **A. t. hu'meri**, superior scapular a. **A. trochanter'ica**, branch of internal circumflex a. to vicinity of great trochanter. **A. tuba'ria**, branch from uterine a. to Fallopian tube. **A. ulna'ris**, ulnar a. **A. umbilica'lis**, umbilical a. **A. urethra'lis**, branch of a. of penis to urethra. **A. ure'thro-bulba'ris**, transverse perineal a. **A. uteri'na hypogas'trica**, uterine a. **A. u'tero-ova'rica**, ovarian a. **A. vagina'lis**, see *Vaginal a.* **A. va'sis deferentia'lis**, A. of vas deferens. **A. vas'ta profun'da**, profunda femoris. **A. veno'sa**, pulmonary vein. **A. ves'ico-prostat'ica**, vesical a. **A. ves'ico-vagina'lis**, vaginal a. **A. vestibula'ris**, branch from internal pudic to vestibule. **A. vit'rea**, hyaloid a. **A. vola'ris commu'nicans**, deep ulnar a. **A. v. in'dicis radia'lis**, radialis indicis a. **A. v. ma'nûs ulna'ris**, anterior ulnar carpal a. **A. v. superficia'lis**, superficial volar a. **A. Willis'ii**, posterior communicating a. of brain. **A. zygomat'ico-orbita'lis**, orbital a., external supraorbital a.

Arteriæ, ar-ta're-e. Arteries. **A. adipo'sæ**, arteries from which secretion of fat about the kidneys takes place; ramifications of capsular, diaphragmatic, renal, and spermatic a-s. **A. apoplec'ticæ**, carotids. **A. articula'res ge'nu**, articular a-s of knee. **A. atrobilia'riæ**, middle suprarenal a-s. **A. auricula'res anterio'res**,, anterior auricular a-s. **A. a. cor'dis**, coronary a-s of heart. **A. bronchia'les**, bronchial a-s. **A. calca'neæ**, calcaneal a-s. **A. capita'les**, carotid a-s. **A. capsula'res**, capsular a-s. **A. carot'is commu'nes** or **primiti'væ**, common carotid a. **A. car'peæ radia'les**, radial carpal a. **A. c. ulna'res**, ulnar carpal a. **A. choroï'deæ**, choroid a-s. **A. cilia'res**, ciliary a-s. **A. circumflex'æ brach'ii**, circumflex a. of arm. **A. c. femo'ris**, circumflex a. of thigh. **A. c. mus'culi ster'no-clei'do-mastoï'dei**,

circumflex a. of sterno-mastoid. **A. collicula'res,** collicular a-s. **A. corona'riæ ventric'uli,** gastro-epiploic a-s. **A. cor'poris callo'si cer'ebri,** mesolobar a. **A. costa'les inferio'res,** branches of intercostal a. to ribs. **A. c. posterio'res,** aortic intercostal a. **A. c. superio'res,** collateral intercostal a. **A. denta'les superio'res anterio'res,** anterior dental a. **A. diaphragmat'icæ,** inferior phrenic a. **A. digita'les commu'nes,** interosseous a. of hand and foot. **A. d. commu'nes vola'res,** palmar interosseous a-s. **A. d. dorsa'les commu'nes,** intermetatarsal a. **A. d. ma'nûs vola'res,** palmar digital a. **A. fronta'les cer'ebri,** frontal a. of brain. **A. gas'tricæ bre'ves,** small branches from splenic a. to stomach. **A. gastrocne'miæ,** sural a. **A. helici'næ,** helicine a. **A. hepat'icæ me'diæ,** branches of hepatic a. **A. inguina'les,** branches of common femoral a. to groin. **A. intercosta'les anterio'res,** anterior intercostal a. **A. i. aor'ticæ,** aortic intercostal a. **A. intermetacar'peæ dorsa'les** or **interos'seæ metatar'si,** intermetatarsal a. **A. interos'seæ metacar'pi dorsa'les,** metacarpal a. **A. i. metatar'si dorsa'les,** intermetatarsal a. **A. i. volaris,** palmar interosseous a. **A. jejuna'les,** branches from superior mesenteric to jejunum. **A. jugala'res,** carotid a. **A. labia'les puden'di,** vessels supplying labia from external pudic and superficial perineal. **A. labio'rum corona'riæ,** coronary a. of lips. **A. lethar'gicæ,** carotid a-s. **A. macula'res,** branches of A. centralis retinæ to macula lutea. **A. masseter'icæ posterio'res,** branches from carotid a. to masseter muscle. **A. media'næ bul'bi,** median a. of medulla oblongata. **A. m. oc'uli,** branches from A. centralis retinæ to retina. **A. medul'læ spina'lis,** spinal a. **A. mesera'icæ,** mesenteric a. **A. mesolob'icæ,** mesolobar a. **A. metacar'peæ dorsa'les,** dorsal interosseous a. **A. muscula'res ge'nu inferio'res,** sural a. **A. nasa'les oc'uli,** branches from pupillary a. or from A. centralis retinæ to retina. **A. nucleo'rum,** median a. of medulla oblongata. **A. nutri'tiæ,** medullary a. **A. n. pel'vis,** branches from renal a. to pelvis of kidney. **A. palati'næ mino'res,** branches from pterygo-palatine a. to soft palate. **A. papilla'res,** papillary a-s. **A. phren'icæ mag'næ,** inferior phrenic a. **A. pinna'les,** branches from lateral nasal a. or superior coronary a. to alæ of nose. **A. pli'cæ cu'biti superficia'les,** muscular branch of radial a. to forearm. **A. præchoroï'deæ,** anteriod choroid a. **A. præparan'tes,** internal spermatic a. **A. pro'priæ rena'les,** branches of renal a. **A. prostat'icæ,** vesicoprostatic a. **A. radicula'res,** arteries accompanying roots of nerve into substance of cord. **A. receptac'uli,** numerous small branches from cavernous portion of internal carotid. **A. rec'tæ,** branches of renal a. supplying medullary pyramids. **A. recurren'tes tibia'les,** tibial recurrent a. **A. r. ulna'res,** ulnar recurrent a. **A. re'no-capsula'res,** middle suprarenal a. **A. semina'les,** spermatic a. **A. septa'les** or **sep'ti scroti,** a-s to the scrotum. **A. si'nus caverno'si,** small branches from internal carotid to cavernous sinus. **A. somnif'eræ** or **sopora'les** or **sopora'riæ,** carotid a. **A. spermat'icæ inter'næ,** spermatic a. **A. subcosta'les,** branches of intercostal a. to under part of ribs. **A. supracosta'les,** collateral intercostal a. **A. suprarena'les aor'ticæ,** middle suprarenal a. **A. s. inferio'res,** inferior suprarenal a. **A. s. me'diæ,** middle suprarenal a. **A. tar'seæ inter'næ,** small branches from dorsal a. of foot. **A. tempora'les cer'ebri,** temporal a. of brain. **A. t. oc'uli,** branches from papillary a. to temporal part of retina. **A. thalam'icæ,** optic a. **A. thym'icæ,** anterior mediastinal a. **A. ve'li pala'ti,** small branches from pterygopalatine a. to soft palate. **A. veno'sæ,** pulmonary veins. **A. ventric'uli bre'ves,** small branches from splenic a. to stomach. **A. vesi'cæ,** vesical a. **A. vola'res car'pi,** carpal branches of deep palmar arch.

Arteriagra, ar-ta-re'ag-rah (*arteria, agra,* seizure). Pain in an artery; gouty affection of an artery.

Arterial, ar-te're-al. Belonging to an artery. **A. blood,** red blood, so called because contained in arteries; the pulmonary veins also contain red blood, hence called arterial veins. **A. constitu'tion,** plethora arteriosa. **A. duct,** portion of pulmonary artery terminating in the aorta in the fœtus. When obliterated after birth, it is called arterial ligament, ligamentum arteriosum. **A. pyæ'mia,** see *Pyæmia.* **A. sys'tem** includes all arteries from origin in heart to termination in the organs; see *Vascular system.* **A. veins,** see *A. blood.*

Arterialization (ar-te-re-al-i-za'shun) **of the blood.** Transformation of venous into arterial blood. Hæmatosis.

Arteriarctia, ar-te-re-ark'she-a. Arteriostenosis.

Arteriasis, ar-ta-re'as-is. Degeneration of an artery.

Arteriectasis, ar-ta-re-ek'tas-is (*arteria, ektasis,* dilatation). Aneurism.

Arteriectopia, ar-ta-re-ek-top'e-ah (*arteria, ektopos,* out of place). Dislocation or unusual location of an artery.

Arterieurysma, ar-ta-re-u-riz'mah (*arteria, eurus,* dilated). Aneurism.

Arteritis, ar-ta-re-e'tis. Arteritis.

Arterio-capillary, ar-te're-o-kap'il-la-re. Relating to artery or arteries and capillary vessels, as arteriocapillary fibrosis, fibroid degeneration of these vessels, seen sometimes in Bright's disease.

Arteriochalasis, ar-ta-re-o-kal'as-is (*chalasis,* relaxation). Atonic condition of the arteries.

Arteriodialysis, ar-ta-re-o-de-al'is-is (*arteria, dialusis,* dissolution). See *Aneurism.*

Arteriodiastasis, ar-ta-re-o-de-as'tas-is (*diastasis,* separation). Retraction of ends of divided artery. Displacement of artery.

Arteriodiplopiesmus, ar-ta-re-o-dip-lo-pe-ez'mus (*diploos,* double, *piesmos,* pressure). Method of producing coagulation in an artery between two points on which pressure is made.

Arteriogram, ar-te're-o-gram. Sphygmographic tracing of an artery.

Arteriography, ar-te-re-og'ra-fe (*arteria, graphe,* a description). Description of arteries; study of pulse-curves.

Arterioid, ar-te're-oid. Resembling artery.

Arteriola (ar-ta-re-o'lah) (dim. of **Arteria**) or **Arte're'riole.** Small artery; smallest division of an artery; artery, walls of which are mainly composed of muscular tissue.

Arterio'læ. Small arteries. **A. rec'tæ,** minute blood-vessels in medullary pyramids of kidney.

Arteriology, ar-te-re-ol'o-je (*arteria, logos,* discourse). Treatise on arteries; description of arteries.

Arterio-malacia (ar-ta're-o-mal-ah'se-ah) or **Arterio-malacosis,** ar-ta're-o-mal-ah-ko'sis (*arteria, malakia,* softening). Softening of coats of an artery.

Arteriopathy, ar-te-re-op'a-the (*pathos,* disease). Disease of an artery.

Arterioperissia, ar-ta-re-o-per-is'se-ah (*perissos,* extraordinary). Excessive development of arteries or of arterial tissue.

Arteriophlebotomy, ar-te-re-o-fle-bot'o-me. Bloodletting practised on the skin or mucous membranes by means of leeches, lancet, or cupping.

Arteriopituitous, ar-te-re-o-pit-u'it-us. Term applied to vessels creeping along pituitous membrane of the nostrils.

Arterioplania, ar-ta-re-o-plan'e-ah (*arteria, planao,* to wander). Extension or unnatural location of an artery.

Arteriorrhagia, ar-ta-re-or-rhaj'e-ah. Hemorrhage from a ruptured artery.

Arteriorrhexis, ar-ta-re-or-rheks'is (*arteria, rhexis,* rupture). Rupture of an artery.

Arterio-sclero'sis. Increase of connective tissue, leading to thickening of walls of artery; induration of musculo-elastic coat of arteries.

Arterios'itas or **Arterios'ity.** Condition of the blood in which it preserves in the veins an arterial character; opposite to venositas; resemblance to arterial blood. **A. san'guinis,** predominance of arterial blood.

Arteriostenosis, ar-ta-re-os-ten-o'sis (*arteria, stenos,* contracted). Contraction or obliteration of an artery.

Arteriosteosis (ar-ta-re-os-ta-o'sis) or **Arteriostogenesis,** ar-ta-re-os-to-jen'e-sis (*arteria, osteon,* bone, *genesis,* formation). Early stage of ossification of an artery.

Arteriostrepsis, ar-ta-re-o-strep'sis (*arteria, strepsis,* twisting). Torsion of artery to obliterate its calibre.

Arteriosus, ar-ta-re-o'sus. Arterial.

Arteriothlim'ma (*thlipsis,* pressure or friction). Injury to an artery from pressure.

Arte'riotome (*arteria, tome,* incision). Knife for dissection or operation on arteries.

Arteriotomy, ar-te-re-ot'o-me. Dissection of an artery; opening an artery to draw blood from it, as in inflammatory affections of the head, from the temporal artery. See *Bloodletting.*

Arteriotrepsis, ar-ta-re-o-trep'sis. Arteriostrepsis.

Arterio-venous, ar-te're-o-ve'nus. Relating to an artery and vein, as arterio-venous aneurism, aneurism of an artery opening into a vein.

Arteriozetesis, ar-ta-re-o-zet-a'sis (*arteria, zeteo,* to explore). Direct examination of an artery by exposing it to view.

Arteritis (ar-ter-e'tis) or **Arterii'tis.** Inflammation of an artery. Inflammation of inner coat of an artery is termed *Endo-arteritis* or *Endonarteritis;* of the outer, *Exo-arteritis* or *Exarteritis.* **A. defor'mans,** inflammation of an artery due to atheromatous changes in its walls. **A. hyperplas'tica,** inflammation of an artery, with new deposit or formation of connective tissue. **A. oblit'erans,** inflammation of an artery, leading to obliteration of its calibre by increase of connective tissue.

Artery, ar'te-re (*aër,* air, *tereo,* to preserve, the ancients believing that it contained air. They first called the trachea *arteria tracheia,* becaused it is filled with air, and afterward used the same term and *angeia pneumatica* for arteries, properly so called, probably because commonly found empty in dead bodies. They also used the term *phlebes* to designate arteries, called by Latins *venæ micantes pulsatiles.*) Arteries with the moderns are vessels arising from the two ventricles of the heart, and having valves only at their origin. They are cylindrical, firm, and elastic canals; of yellowish-white color, little dilatable, easily lacerable. They have usually been described as formed of three coats: 1. External laminated or areolar membrane, *Tunica externa* or *adventitia* or *cellularis, Vagina cellularis,* of dense and close character; 2. Middle coat, *Tunica media* or *elastica,* composed of fibres of elastic tissue and of smooth muscular fibres, and eminently elastic; 3. Inner or endothelial coat, *Tunica intima* or *glabra,* thin, diaphanous, reddish, and polished, composed of pavement epithelium, delicate connective tissue, and elastic fibres, perforated so as to entitle it to the name of fenestrated membrane.

Arteries carry blood from the heart to all parts of the system; but they cannot all convey arterial blood. The pulmonary artery conveys venous blood to the lungs, there to be converted into arterial, whilst the pulmonary veins convey arterial blood back to the heart.

Table of the Principal Arteries of the Body.

All the arteries take their rise from the pulmonary artery, or the aorta, the names generally indicating parts to which they are distributed.

I. PULMONARY ARTERY.

The pulmonary artery arises from the right ventricle, and soon divides into right and left branch, one of which is distributed to each lung.

II. AORTA.

The aorta arises from the left ventricle; it is the common trunk of the arteries of the body, and may be divided into five portions, viz.: its origin, the arch, its thoracic portion, its abdominal portion, and its bifurcation.

(a) Arteries furnished by the Aorta at its Origin.

1. Cardiac or anterior coronary artery.
2. Cardiac or posterior coronary artery.

(b) Arteries furnished by the Aorta at its Arch.

The arch of the aorta gives off, to the left, two considerable trunks—the primitive carotid artery and the subclavian artery; and, to the right, a single trunk, which is larger—the innominate or brachiocephalic artery, dividing into the primitive carotid and subclavian. The right and left coronary arteries are also given off from the ascending portion.

I. Primitive Carotid Artery.
- Divides into External and internal carotid arteries.

1. External Carotid Artery.
- Furnishes, 1. *Superior thyroid artery.*
- 2. *Lingual artery,* giving off the dorsal lingual and sublingual arteries.
- 3. *Facial* or *external maxillary artery,* which furnishes the inferior palatine artery, submental artery, and superior and inferior coronary arteries.
- 4. *Occipital artery,* giving off the posterior mastoid artery.
- 5. *Posterior auricular artery,* which gives off the stylo-mastoid artery.
- 6. *Inferior pharyngeal artery.*
- The external carotid ultimately divides into the Temporal artery and Internal maxillary.

(a) *Temporal Artery.*
- Furnishes *Transverse facial, Anterior auricular,* and *Middle temporal arteries.*

(b) *Internal Maxillary Artery.*
- Furnishes 13 branches—viz., *Middle meningeal, Inferior dental, Deep posterior temporal, Masseteric, Pterygoid, Buccal, Deep anterior temporal, Alveolar, Suborbitar, Vidian, Pterygo-palatine* or *superior pharyngeal, Superior palatine,* and *Spheno-palatine* arteries.

2. Internal Carotid Artery.
- Furnishes, 1. *Ophthalmic,* which gives off Lacrymal, Central of retina, Supraorbitar or superciliary, Posterior ciliary, Long ciliary, Superior and inferior muscular, Posterior and anterior ethmoidal, Superior and inferior palpebral, Nasal, and Frontal arteries. 2. *Communicating of Willis.* 3. *Choroid.* 4. *Anterior cerebral.* 5. *Middle cerebral.*

II. Subclavian Artery.
- Furnishes, 1. *Vertebral,* which gives off Anterior and posterior spinal, Inferior cerebellar, and forms—by uniting itself with that of the opposite side—the Basilar, divided into Superior cerebellar and Posterior cerebral. 2. *Inferior thyroid,* which gives off *Ascending cervical.* 3. *Internal mammary,* which gives off the Anterior mediastinal and Superior diaphragmatic. 4. *Superior intercostal.* 5. *Transverse cervical.* 6. *Superior scapular.* 7. *Posterior* or *deep cervical.*
- Farther on the subclavian artery continues its progress under the name *Axillary artery.*

1. *Axillary Artery.*
- Furnishes, 1. *Acromial.* 2. *Superior thoracic.* 3. *Inferior, long,* or *external mammary.* 4. *Inferior* or *common scapular.* 5. *Posterior circumflex.* 6. *Anterior circumflex.* Farther on the axillary artery continues under the name *Brachial artery.*

2. *Brachial Artery.*
- Furnishes, 1. *Deep humeral* or *external collateral artery.* 2. *Internal collateral artery.* It afterward divides into the *radial* and *cubital* or *ulnar* arteries.

(a) *Radial Artery.*
- Gives off *Recurrent radial, Dorsal carpal, Dorsal metacarpal, Dorsal of the thumb,* and terminates in forming the *Deep palmar arch.*

(b) *Cubital* or *Ulnar Artery.*
- Gives off *Anterior* and *posterior recurrent cubital, Anterior* and *posterior interosseous,* which latter furnishes *Posterior recurrent radial.* It terminates in forming the *Superficial palmar arch,* which gives off *Collateral arteries* of the fingers.

(c) Arteries given off by the Aorta in the Thorax.

1. *Right and left bronchial.*
2. *Œsophageal* (to the number of four, five, or six).
3. *Posterior mediastinal.*
4. *Inferior* or *aortic intercostal* (to the number of eight, nine, or ten).

(*d*) *Arteries furnished by the Aorta in the Abdomen.*

1. *Diaphragmatic Artery.* — *Diaphragmatic* or *phrenic*, right and left.
2. *Cœliac Artery.* — Which divides into three branches: 1. *Coronary of the stomach.* 2. *Hepatic*, which gives off Pyloric, Right gastro-epiploic, and Cystic; and, 3. *Splenic*, which gives off the Left gastro-epiploic and Vasa brevia.
3. *Superior Mesenteric Artery.* — Which gives off at its concavity the *Right superior, middle,* and *inferior colic*, and at its convex part from 15 to 20 *Intestinal* branches.
4. *Inferior Mesenteric Artery.* — Which gives off *Superior, Middle,* and *Inferior colic*, and divides into superior hemorrhoidal.
5. *Middle Capsular* (to the number of two on each side).
6. *Renal* or *Emulgent.*
7. *Spermatic.*
8. *Lumbar* (to the number of four or five on each side).

(*e*) *Arteries resulting from the bifurcation of the Aorta.*

The aorta, a little above its bifurcation, gives off the *Middle sacral*, and divides into *Primitive iliac arteries.*

The Primitive iliac artery divides into *Internal* and *External iliac arteries.*

1. Internal Iliac Artery. — Furnishes, 1. *Ilio-lumbar.* 2. *Lateral sacral.* 3. *Gluteal or iliac posterior.* 4. *Umbilical.* 5. *Vesical.* 6. *Obturator.* 7. *Middle hemorrhoidal.* 8. *Uterine.* 9. *Vaginal.* 10. *Ischiatic.* 11. *Internal pudendal*, which gives off the *inferior hemorrhoidal arteries, A. of the septum, Transverse perineal, A. of the corpus cavernosum*, and *Dorsal of penis.*
2. External Iliac Artery. — Furnishes, 1. *Epigastric.* 2. *Anterior iliac* or *circumflex iliac*, and is continued afterward under the name of *Crural* or *femoral artery.*
3. Crural or Femoral Artery. — Furnishes, 1. *Subcutaneous abdominal.* 2. *Superficial and deep pudendal.* 3. *Superficial muscular.* 4. *Deep muscular*, which gives off the *external* and *internal circumflex* and the three *perforating arteries* distinguished into superior, middle, and inferior. Farther on, the crural artery continues under the name *Popliteal artery.*
4. Popliteal Artery. — Furnishes, 1. *Superior, internal, middle,* and *external articular.* 2. *Gemellar.* 3. *Inferior articular* (internal and external). 4. *Anterior tibial*, which, at the foot, takes the name *Dorsal of the tarsus*, and gives off the tarsal and metatarsal arteries. In the leg the popliteal artery divides into the peroneal and posterior tibial.
5. Peroneal Artery. — Divides into *Anterior peroneal* and *Posterior peroneal.*
6. Posterior Tibial Artery. — Divides into *Internal* and *external plantar.* The latter by anastomosing with the *Dorsal of the tarsus* forms the *Plantar arch*, whence arise the *Superior* or *posterior perforating branches, Inferior posterior* and *anterior branches*, which give off anterior perforating branches.

Artery, abdom'inal. Term applied to several arteries and branches to the abdomen. **A., aber'rant,** vas aberrans. **A., acces'sory pu'dic,** branch of internal iliac to organs of generation and vicinity. **A., acro'mial,** branch of acromio-thoracic a. **A., acro'mio-thora'cic,** branch of axillary a. distributed to arm and chest. **A., ad'ipose,** name given to capsular arteries, supplying capsule of kidneys; a. from thoracic aorta to fatty tissue of heart. **A., a'lar,** or **a. thora'cic,** branch of axillary a. to axilla. **A., allan'toic,** umbilical a. **A., alve'olar,** posterior dental a. **A., anastomot'ic,** artery forming communication between other arteries, as anastomotic a. of arm, branch of brachial a.; a. a. of thigh, branch of femoral a. **A., an'gular,** facial a. or its terminal branch. **A., artic'ular,** arteries chiefly distributed to elbow- and knee-joints. **A., ascend'ing cer'vical,** branch of inferior thyroid a. **A., a. front'al,** branch of middle cerebral a. **A., a. pal'atine,** inferior palatine a. **A., a. pari'etal,** branch of middle cerebral a. to parietal convolution and lobule. **A., a. pharynge'al,** branch of external carotid a., passing upward between internal carotid a. and pharynx. **A., a. thy'roid,** inferior thyroid a. **A., aster'nal,** branch of internal mammary a. to costal cartilages. **A., atrabil'iary,** capsular a. **A., aud'itory,** usually internal auditory a.; occasionally external auditory a. **A., auric'ular,** term applied to several arteries distributed chiefly to various parts of the ear. **A., ax'illary,** see *Axillary.* **A., az'ygos artic'ular,** middle articular a. of knee. **A., bas'ilar,** see *Basilar.* **A., brach'ial,** see *Brachial.* **A., brach'io-cepha'lic,** innominate artery. **A., bran'chial,** name given to arteries distributed to branchial arches in Branchiata. **A., bron'chial,** see *Bronchial.* **A., bron'cho-œsophage'al,** branch of posterior aorta, giving off branches to œsophagus, trachea, and vicinity. **A., buc'cal,** see *Buccal.* **A., bul'bar,** A. of bulb of urethra. **A. cæ'cal,** see *Cæcum.* **A., cap'sular,** branch of abdominal aorta to suprarenal capsule. **A., car'diac,** coronary a. of heart. **A., carot'id,** see *Carotid.* **A., cav'ernous,** branch of internal pudic to cavernous body of clitoris. **A., cen'tral, of ret'ina,** central a. of Zinn. Branch of ophthalmic a. piercing optic nerve and distributed to retina. **A., cerebel'lar,** branches of basilar a. to various parts of cerebellum are so called; as branches of internal carotid and basilar arteries to brain are called *cerebral.* **A., cer'ebro-spi'nal,** a terminal branch of occipital a. in the horse. **A., cer'vical,** term applied to various arteries distributed to region of neck. **A., cho'roid,** term applied to branches of internal carotid, middle, and posterior cerebral arteries distributed to choroid plexus; see *Choroid.* **A., cil'iary,** see *Ciliary.* **A., circ'ular,** anastomotic circle of arteries around uterus where body joins the neck. **A., cir'cumflex,** term applied respectively to branch of subscapular a. to infraspinous fossa of scapula; to deep circumflex iliac a. (sometimes to superficial c. i. artery). **A., clavic'ular,** branch of acromio-thoracic a. to subclavius. **A., coccyge'al,** branch of sciatic a. to region of coccyx; branch of sacral a. in lower animals to caudal vertebræ. **A., coch'lear,** a terminal branch of internal auditory a. to cochlea. **A., cœl'iac,** cœliac axis; see *Cœliac.* **A., col'ic,** see *Colic.* **A., co'mes ner'vi ischiad'ici,** branch of sciatic a. accompanying sciatic nerve. **A., c. n. phre'nici,** see *Comes.* **A., com'mon carot'id, c. fem'oral, c. il'iac,** etc., see *Carotid, Femoral, Iliac,* etc. **A., commu'nicating,** artery bringing other arteries into communication. **A., cor'onary, of heart,** cardiac a. **A., c., of lip,** see *Coronary.* **A., c., of stom'ach,** see *Coronary.* **A., cremas'teric,** external spermatic a. **A., cri'co-thy'roid,** branch of superior thyroid to crico-thyroid membrane. **A., cro'taphite,** temporal a. **A., cru'ral,** femoral a. **A., cu'bital,** ulnar a. **A., curl'ing,** tortuous branches of uterine branch of internal iliac in the substance of the uterus. **A., cys'tic,** branch of hepatic a. to gall-bladder and immediate vicinity. **A., deep auric'ular, d. cir'cumflex, d. epigas'tric, d. fem'oral,** etc., see *A., auricular, A., circumflex, A., epigastric, A., femoral,* etc. **A., den'tal,** branches of infraorbital and internal maxillary arteries distributed to teeth and mouth. **A., diaphragmat'ic,** branches of aorta to diaphragm. **A., dig'ital,** arteries so called are distributed to fingers and toes, branches of ulnar, plantar, and other arteries. **A., dor'sal, of clit'oris,** one of terminal branches of internal pudic distributed to the clitoris. **A., d., of foot,** anterior tibial a., continuation of anterior tibial a. **A., d., of great toe,** first dorsal interosseous a. of foot. **A., d., of in'dex fin'ger,** branch of radial a. to index finger. **A., d. interos'seous,** term applied to arteries distributed to dorsal interosseous muscles of hand and foot, *Dorso-interosseous a-s.* **A., d., of little toe,** branch of dorsal a. or of metatarsal a. to little toe. **A., d., of nose,** branch of internal maxillary a., or ophthalmic a. to back of nose. **A., d., of pe'nis,** branch of a. of penis to dorsum of that organ. **A., d., of tongue,** branch of lingual a. to dorsum of tongue, tonsils, etc. **A., duode'nal,** branch of gastro-epiploic a. to duodenum of other animals. **A., emul'gent,** renal a. **A., epicon'dyloid,** ulnar a. **A., epigast'ric,** term applied to several arteries—*deep epigastric,* from external a.; *superficial a.,* from superficial femoral a. to lower part of abdomen; and *superior a.,* a terminal branch of internal mammary a. to rectus abdominis muscle, anastomosing with superficial epigastric a. **A., ethmoid'al,** branch of ophthalmic a. to dura mater and nasal cavities; branch of same a. to posterior ethmoidal cells and upper part of nose. **A., exter'nal aud'itory, e. carot'id, e. cir'cumflex, e.**

hemorrhoid'al, etc., see *Auditory, Carotid, Circumflex, Hemorrhoidal*, etc. **A., fa'cial**, see *Facial*. **A., fem'oral**, see *Femoral*. **A., fem'oro-poplite'al**, branch of popliteal a. in some animals, to back of leg and thigh. **A., fib'ular**, peroneal a.; branch of anterior or posterior tibial or popliteal a.; calcaneal a. **A., fron'tal**, branch of ophthalmic a. distributed to the forehead. **A., gas'tric**, see *Gastric, Gastro-epiploic, Coronary*, etc. **A., gastro-duode'nal**, branch of hepatic a. arising near pyloric extremity of stomach. **A., gastro-epiploic**, see *Gastro-epiploic*. **A., gastro-hepat'ic**, coronary a. of stomach. **A., gas'tro-omen'tal**, A., gastro-epiploic. **A., gen'ital**, internal pudic a. **A., glute'al**, see *Gluteal*. **A., hel'icine**, see *Helicine*. **A., hemorrhoid'al**, see *Hemorrhoidal*. **A., hepat'ic**, see *Hepatic*. **A., hu'meral**, brachial a.; suprascapular a. **A., hy'aloid**, branch of central a. of retina in fœtus passing along hyaloid canal to posterior surface of crystalline lens. **A., hy'oid**, branch of external carotid to region of hyoid bone. **A., hypogas'tric**, see *Hypogastric*. **A., il'eo-col'ic**, lower branch of superior mesenteric a. **A., il'eo-lum'bar**, see *Ileo-lumbar*. **A., il'iac**, see *Iliac*. **A., il'io-lum'bar**, see *Ilio-lumbar*. **A., infe'rior cerebel'lar, i. cir'cumflex, i. cor'onary, i. den'tal, i. glu'teal**, etc., see *A., cerebellar, A., circumflex, A., coronary, A., dental, A., gluteal*, etc. **A., infraorb'ital**, branch of internal carotid a. emerging on face from infraorbital foramen. **A., infrascap'ular**, A., subscapular. **A., innom'inate**, see *Innominate*. **A., intercos'tal**, see *Intercostal*. **A., interlob'ular**, branches of arterial loops at base of pyramids of kidney, distributed to corpuscles of Malpighi and to vascular network surrounding the tubules. **A., inter'nal aud'itory, i. carot'id, i. hemorrhoid'al, i. il'iac, i. mam'mary**, etc., see *A., auditory, A., carotid, A., hemorrhoidal, A., iliac, A., mammary*, etc. **A., interpedun'cular**, branches of posterior cerebral a. to peduncles of brain and posterior perforated space. **A., ischiad'ic**, inferior gluteal a.; also branch of lateral sacral a. in some animals. **A., lac'rymal**, see *Lacrymal*. **A., larynge'al**, crico-thyroid a.; branch of superior thyroid a. to larynx. **A., lat'eral na'sal**, branch of facial a. to side of nose. **A., l. sac'ral**, branch of internal iliac a. to sacrum and vicinity. **A., l. spi'nal**, branches of vertebral to spinal canal. **A., lin'gual**, see *Lingual*. **A., lum'bar**, see *Lumbar*. **A., ma'lar**, branches of lacrymal a. to temporal fossa. **A., malle'olar**, see *Malleolar*. **A., mam'mary**, see *Mammary*. **A., masseter'ic**, see *Masseteric*. **A., mas'toid**, branch of occipital a. to dura mater and diploë; branch of posterior auricular a. **A., me'dian**, branch of anterior interosseous a. of arm, accompanying median merve. **A., medicerebel'lar**, anterior inferior cerebellar a. **A., medicer'ebral**, middle cerebral a. **A., me'dio-col'ic**, branch of superior mesenteric a. to colon. **A., medul'lary**, nutrient a. of bone; a. of medullary substance of brain. **A., meninge'al**, see *Meningeal*. **A., ment'al**, see *Mental*. **A., mesenter'ic**, see *Mesenteric*. **A., mesolo'bar**, anterior cerebral a. **A., metacar'pal**, see *Metacarpal*. **A., metatar'sal**, see *Metatarsal*. **A., mid'dle cer'ebral, m. coccyge'al**, etc., see *A., cerebral, A., coccygeal*, etc. **A., mus'culophren'ic**, one of terminal branches of internal mammary a. to diaphragm and abdominal muscles. **A., na'sal**, see *Nasal*. **A., naso-pal'atine**, branch of spheno-palatine a. **A., nu'trient**, term applied to various arteries distributed to bones. **A., ob'turator**, see *Obturator*. **A., occip'ital**, see *Occipital*. **A., œsophage'al**, branches of thoracic aorta to œsophagus, pleura, etc.; branches of coronary a. of stomach. **A., om'phalo-mesenter'ic**, see *Omphalo-mesenteric*. **A., ophthal'mic**, see *Ophthalmic*. **A., or'bital**, branch of temporal a. to orbicular muscle of eyelids and integument. **A., ova'rian**, branch of abdominal aorta in female, corresponding to internal spermatic a. in male. **A., pal'atine**, see *Palatine*. **A., pal'mar**, see *Palmar arches*. **A., pancreat'ic**, see *Pancreas*. **A., pancreat'ico-duode'nal**, branch of hepatic a. to pancreas and duodenum. **A., pari'etal**, branch of occipital a. to parietal bone. **A., pe'dal**, dorsal a. of foot. **A., per'forating**, see *Perforans*. **A., pericephal'ic**, external carotid a. **A., perine'al**, branch of internal pudic a. to back part of scrotum. **A., perone'al**, see *Peroneal*. **A. pharynge'al**, see *Pharyngeal*. **A., phren'ic**, branches of cœliac axis or abdominal aorta, and of internal mammary to diaphragm. **A., plan'tar**, see *Plantar*. **A., poplite'al**, see *Popliteal*. **A., postcerebel'lar**, branch of vertebral or basilar a. to posterior part of cerebellum. **A., postcer'ebral**, a terminal branch of basilar a. to posterior portion of cerebrum; branches of postcerebral a. sent to choroid plexus are called *postchoroid*. **A., poste'rior auric'ular, p. cho'roid, p. cil'iary, p. il'iac**, etc., see *Auricular, Choroid, Ciliary, Iliac*, etc. **A., precerebel'lar**, branch of basilar a. to upper part of cerebellum. **A., precer'ebral**, branch of internal carotid distributed to frontal lobe of brain. **A., precho'roid**, branches of internal carotid a. or middle cerebral a. to choroid plexus. **A., prehu'meral**, branch of brachial a. in some animals to shoulder and neighboring muscles. **A., preplan'tar**, a terminal branch of digital a. in some animals to heel and foot. **A., prepu'bic**, branch of external iliac or femoral a. passing through crural ring in some animals. **A., prever'tebral**, branch of occipital a. in some animals. **A., pri'mary** or **prim'itive il'iac**, common iliac a. **A., prim'itive carot'id**, common carotid a. **A., profun'da**, see *Profunda*. **A., pter'ygoid**, see *Pterygoid*. **A., pter'ygo-pal'atine**, branch of spheno-maxillary a. to Eustachian tube and pharynx. **A., pu'dic**, see *Pudic*. **A., pul'monary**, see *Pulmonary*. **A., pylo'ric**, see *Pyloric*. **A., ra'dial**, see *Radial*. **A., r. recur'rent**, see *Radial*. **A., radia'lis in'dicus**, branch of radial a. to index finger. **A., ra'nine**, see *Ranine*. **A., re'nal**, see *Renal*. **A., ret'inal**, see *A., central, of retina*. Retinal a. on side of optic nerve toward the nose. **A., rhachid'ian**, spinal artery. **A., sacral**, see *Sacral*. **A., saphe'na**, branch of femoral a. in some animals, accompanying saphenous vein. **A., scap'ular**, see *Scapular*. **A., sciat'ic**, one of terminal branches of internal iliac a. accompanying internal pudic a. and sciatic nerve. **A., scro'tal**, branch of inferior external pudic a. and of internal pudic a. **A., sig'moid**, branch of inferior mesenteric a. to sigmoid flexure of colon. **A., sphenoid'al**, branch of middle cerebral a. to sphenoidal lobe. **A. sphenopal'atine**, see *Spheno-palatine*. **A., spi'nal**, arteries of spinal cord. **A., spi'ral**, small arteries of pregnant uterus penetrating placenta, *utero-placental a.* **A., splen'ic**, see *Splenic*. **A., stylo-mas'toid**, see *Stylomastoid*. **A., subcerebel'lar**, branch of basilar a. to lower part of cerebellum. **A., subcla'vian**, see *Subclavian*. **A., sublin'gual**, see *Sublingual*. **A., submax'illary**, branch of facial a. to submaxillary gland. **A., submen'tal**, see *Submental*. **A., subor'bital**, A., infraorbital. **A. subscap'ular**, branch of axillary a. to subscapularis muscle. **A., superfi'cial fem'oral, s. glute'al**, etc., see *Femoral, Gluteal*, etc. **A., supe'rior glute'al, s. larynge'al**, etc., see *Gluteal, Laryngeal*, etc. **A., supramax'illary**, superior dental a. **A., supraor'bital**, see *Frontal*. **A., suprare'nal**, A., capsular; branch of inferior phrenic a. and of renal a. to suprarenal. **A., suprascap'ular**, branch of thyroid axis to upper border of scapula and supraspinous fossa. **A., supraspi'nous**, branch of transverse cervical a. to supraspinatus muscle. **A., supraster'nal**, branch of suprascapular a. to front of chest. **A., su'ral, deep**, branch of popliteal a. to calf of leg. **A., tar'sal, external** and **internal**, branch of dorsal a. of foot. **A., tem'poral**, see *Temporal*. **A., termat'ic**, A. proceeding to lamina terminalis and vicinity from junction of anterior cerebral arteries or from anterior communicating a. **A., testic'ular**, spermatic a. **A., thorac'ic**, see *Thoracic*. **A., thy'mic**, branches of internal mammary a. to mediastinum and thymus gland. **A., thy'reoid** or **thy'roid**, see *Thyroid*. **A., tib'ial**, see *Tibial*. **A., tonsil'lar**, branch of facial a. to tonsil and tongue. **A., transverse'**, branches of basilar a. to pons; see *Transverse*. **A., t. cer'vical**, branch of thyroid axis. **A., t. fa'cial**, branch of superficial temporal a. running across the face. **A., t. perine'al**, see *Transverse*. **A., tympan'ic**, branch of internal max-

illary or deep auricular a. to tympanum. **A., ul'nar,** see *Ulnar.* **A., umbil'ical** or **umbil'ico-fœ'tal,** see *Umbilical.* **A., ure'thral,** A. of bulb of urethra. **A., ure'thro-bul'bar,** A. of bulb of urethra; transverse perineal a. **A., u'terine,** see *Uterine.* **A., u'teroplacen'tal,** A., spiral. **A., vagi'nal,** see *Vaginal.* **A., ver'tebral,** see *Vertebral.* **A., ves'ical,** see *Vesical.* **A., vestib'ular,** branches of internal auditory a. to vestibule of ear. **A., Vid'ian,** see *Vidian.* **A. vit'elline,** larger branch of embryonic primitive aortæ, becoming afterward umbilical a. **A., vo'lar,** palmar digital a.

Artetiscus, ar-ta-tis'kus (*artus,* limb). One who has lost a limb.

Arthani'ta (*artos,* bread), *Cyclamen, Snowbread.* Formerly made into ointment, and rubbed on the abdomen as purgative. **A. cycla'men,** Arthanita, Cyclamen.

Arthanitin, ar-than'it-in. Cyclamin; white, poisonous glucoside from Cyclamen Europæum.

Arthræmia, ar-thre'me-ah (*arthro, haima,* blood). Increased flow of blood to a joint.

Arthrago'sis. Gouty affection.

Arthragra, arth'rah-grah (*arthro, agra,* seizure). Gout. **A. anom'ala,** gout, anomalous. **A. genui'na, legit'ima, norma'lis,** or **ve'ra,** gout, regular.

Arthralgia, ar-thral'je-ah (*arthro, algos,* pain), or **Arthral'gy.** Arthrodynia; gout.

Arthrapobrochismus, ar-thra-po-brok-iz'mus (*arthron,* limb, *apobrochizo,* to catch by a noose). Tight bandaging, even to strangulation.

Arthraposphinxis, ar-thrap-o-sfinks-is (*aposphinxis,* constriction). Tight bandaging.

Arthrapostema, ar-thrap-os-ta'mah (*apostema,* abscess). Abscess of a joint.

Arthrectasia (ar-threk-taz'e-ah) or **Arthrectasis,** ar-threk'tas-is (*arthro, ektasis,* dilatation). Dilatation or distension of joint.

Arthrectomy, ar-threk'to-me (*ektome,* excision). Excision of joint; operation to open joint and take away structures.

Arthrelcosis, ar-threl-ko'sis (*arthro, helkosis,* ulceration). Ulceration of a joint.

Arthrembolesis, ar-threm-bo-la'sis. Reduction of fracture or luxation.

Arthrembolus, ar-threm'bo-lus (*arthro, emballo,* to cast). Ancient instrument for reduction of dislocations.

Arthrempyema, ar-threm-pe-a'mah (*arthro, empyema*). Suppuration of a joint.

Arthrentasis, ar-thren'tas-is (*arthro, entasis,* distortion). Distortion of a joint.

Arthretica, ar-thret'ik-ah. Arthritis or remedies for it; Teucrium chamæpitys.

Arthric, ar'thrik. Appertaining or relating to joints.

Arthritic, ar-thrit'ik (*arthro*). Gouty; relating to arthritis or inflammation of joints in general, and especially to gout. **A. fe'ver,** acute form of gout. **A. ring,** sclerotic zone.

Arthriticus verus, ar-thrit'ik-us va'rus. Gout.

Arthritifugum, ar-thrit-if'u-gum (*arthritis, fugo,* to drive away). Remedy to drive away gout.

Arthritis, ar-thre'tis. Inflammation of a joint; occasionally extending to surrounding muscles. **A. aber'rans,** gout, wandering or metastatic. **A., acute,** gout, regular. **A., a. rheumat'ic,** acute articular rheumatism. **A. arthrodyn'ia,** rheumatism, chronic. **A. asthen'ica,** gout, atonic. **A., aton'ic,** gout, atonic. **A. blennorrhag'ica,** gonorrhœal inflammation of a joint. **A. catarrha'lis,** catarrhal inflammation of a joint; purulent a. **A. chi'ragra,** gout in the hands. **A. chron'ica,** chronic arthritis, to which other terms have been added, as *deformans,* chronic arthritis with deformity; *neurotica,* c. a. after disease of nervous system; *rheumatica,* affecting several joints successively; *senilis,* when attacking old people; *serosa,* when accompanied with serous effusion; *sicca* (dry), when not thus accompanied. **A. defor'mans,** chronic osteo-arthritis accompanied by swelling and deformity; rheumatoid arthritis. **A. diaphragmat'ica,** angina pectoris. **A., dry,** see *A. chronica.* **A. errat'ica,** gout, wandering. **A. fungo'sa** or **gelatino'sa,** A. characterized by fungous or gelatinous granulations. **A. gon'agra,** gout in the knees. **A. gonorrho'ica,** rheumatoid disease accompanying gonorrhœa; gonorrhœal rheumatism. **A. granulo'sa,** A. attended with granulations. **A. hiema'lis,** winter gout. **A. hydrar'thros,** swelling of the articulations. **A. inflammato'ria,** gout, regular. **A. inter'na,** gout of internal organs. **A. juveni'lis,** see *Rheumatism, acute.* **A. larva'ta,** masked gout. **A. maxilla'ris,** gouty or rheumatic affection of the joint of the lower jaw. **A. myelit'ica,** A. deformans. **A. neurot'ica,** see *A. chronica.* **A. nodo'sa,** gout with nodosities. **A. pau'perum,** arthritis, rheumatoid; chronic rheumatic gout. **A. planet'ica,** gout, wandering. **A. pod'agra,** gout in the feet. **A. retrogra'da,** gout, retrograde. **A., rheumat'ic,** rheumatoid a., acute rheumatism. **A., r., chron'ic,** see *Rheumatism.* **A. rheumatis'mus,** acute rheumatism. **A., rheum'atoid,** see *Rheumatism.* **A. sic'ca,** see *A. chronica.* **A. spu'ria,** undefined pain in any part of the body; swelling of joints, but not rheumatic in origin. **A. syphilit'ica,** rheumatism due to syphilis; gonorrhœal rheumatism. **A. tuberculo'sa,** tuberculous a. **A. urat'ica,** A. with excess of uric acid; see *Gout.* **A. urethri'tis,** A. as sequel of urethritis. **A. va'ga,** gout, wandering. **A. vene'rea,** A. syphilitica. **A. ve'ra,** gout, regular. **A. visce'ra'lis,** gout attacking an internal organ, the stomach, for example.

Arthritism, ar'thrit-ism. Arthritic diathesis, gouty or rheumatic.

Arthritolith, ar-thrit'o-lith (*arthro, lithos,* stone). Calcareous or other deposit in a joint.

Ar'thro (*arthron,* a joint). In composition, joint.

Arthrocace, ar-throk'as-e (*arthro, kakos,* bad). Disease of joints, especially caries of articular surfaces; spina ventosa. **A. coxa'rum,** hip-joint disease; see *Coxarum morbus.*

Arthrocacia, ar-thro-kash'e-ah, chronic disease of joints.

Arthrocacologia, ar-thro-ka-ko-loj'e-ah (*arthrocacia,* chronic disease of a joint, *logos,* description). Treatise on or description of chronic diseases of joints.

Arthrocarcinoma, ar-thro-kar-sin-o'mah (*arthro, karkinoma,* cancer). Cancer of a joint.

Arthrocele, arth-ro-se'le (Eng. ar'thro-seel) (*arthro, kele,* tumor). Tumor of a joint.

Arthrocephalus, ar-thro-sef'al-us (*arthro, kephale,* head). Having head distinct from the body.

Arthrochondritis, ar-thro-kon-dre'tis (*arthro, chondros,* cartilage). Inflammation of cartilages of joints.

Arthroclasia, ar-thro-klaz'e-ah (*arthron, klao,* to break). Breaking up of adhesions in cases of ankylosis.

Arthroclasis, ar-throk'las-is (*arthro, klasis,* breaking). Breaking up of adhesions of ankylosed joint.

Arthrodactylous, ar-thro-dak'til-us (*arthro, daktulos,* finger). Having fingers or toes articulated.

Arthrodexis, ar-thro-deks'is (*arthro, dexis,* biting). Operation of scraping a joint to remove foreign bodies, granulations, etc.

Arthrodia, ar-thro'de-ah. Movable joint, formed by head of bone applied to surface of shallow socket, so that it can execute movements in every direction.

Arthrodium, ar-thro'de-um (dim. of **Arthrodia**). Small joint.

Arthrodynia, ar-thro-din'e-ah (*arthro, odune,* pain). Pain in a joint; chronic rheumatism. **A. podag'rica,** gout.

Arthrœdema, ar-thre-da'mah. Hydrarthrus.

Arthroempyesis, ar-thro-em-pe-a'sis (*arthro, empuesis,* suppuration). Abscess in a joint.

Arthrography, ar-throg'ra-fe (*arthro, grapho,* to write). Description of joints.

Arthrogryposis, ar-thro-grip-o'sis (*arthro, grupoo,* to incurvate). Malposition of joints, especially of hands and feet.

Arthrohydrin, ar-thro-hid'rin (*arthro, hudor,* water). Synovin, coagulable part of synovia.

Arthrokleisis, ar-thro'kli-sis (*arthro, kleis,* lock). Ankylosis.

Arthrolepro'sis. Leprosy attended with ulceration and separation of fingers or toes.

Arthrolith, arth'ro-lith (*arthro, lithos,* stone). Cartilaginous free body in an articulation, in a calcareous condition.

Arthrology, ar-throl'o-je (*arthro, logos,* description). Description of joints; anatomy of joints.

Arthrombole, ar-throm'bo-le (*arthro, ballo,* to cast). Coaptation, reduction, as of luxated or fractured bone.

Arthromeningitis, ar-thro-men-in-je'tis (*arthro, meninx,* membrane). Synovitis. **A. croupo'sa,** synovitis with exudation. **A. gonorrho'ica,** gonorrhœal rheumatism. **A. prolif'era,** fungous arthritis. **A. sero'sa,** A. with effusion of serum. **A. tuberculo'sa,** tubercular synovitis.

Arthron (joint). Articulation of bones, with motion; opposite of symphysis, or articulation without motion.

Arthronalgia, ar-thron-al'je-ah (*arthro, algos,* pain). Arthrodynia.

Arthroncus, ar-thron'kus (*arthro, onkos,* swelling). Tumefaction of a joint.

Arthronempyesis, ar-thron-em-pe-a'sis (*arthro, en,* in, *puon,* pus). Suppuration of a joint.

Arthroneural'gia. Arthralgia.

Arthroparalysis, ar-thro-par-al'is-is. Paralysis of limb.

Arthropathia, ar-thro-path-e'ah (*arthro, pathos,* disease). Disease of joints; see *Arthropathy.* **A. progressi'va,** progressive affection of joints of fingers, with puffiness. **A. tabet'ica** or **tabido'rum,** Charcot's disease; see *Arthropathy, tabetic.*

Arthropathology, ar-thro-path-ol'o-je. Pathology of joints.

Arthropathy, ar-throp'a-the. Disease of a joint. **A., atax'ic,** Charcot's disease.

Arthroperisphinxis, ar-thro-per-e-sfinks'is (*sphinxis,* constriction). Tight bandaging.

Arthroperissia (*arthro, perissos,* extraordinary). Excess of limbs or joints.

Arthrophlogosis, ar-thro-flo-go'sis (*arthro, phlego,* to burn). Inflammation of a joint. **A. defor'mans,** chronic osteo-arthritis. **A. fibro'sa,** fungous arthritis. **A. synovia'lis,** synovitis. **A., tabet'ic,** joint disease; symptomatic of tabes dorsalis, with œdema and puffiness, followed by destruction of cartilages and ligaments, and erosion of end of bone; Charcot's disease.

Arthrophlysis, ar-throf'lis-is (*arthro, phlusis,* eruption). Cutaneous eruption accompanying gout. **A. cardi'aca,** eczema accompanying gouty or rheumatic heart disease.

Arthrophy'ma (*arthro, phuma,* growth, swelling of a joint). **A. adenochon'drium** (*aden,* gland, *chondros,* cartilage). Tumefaction of glands and cartilages of joints. **A. bursa'le,** enlargement of bursa.

Arthrophyte, ar'thro-fite (*arthro, phuton,* growth). Growth of any kind in a joint; floating cartilage.

Arthroplasty, arth'ro-plas-te (*arthro, plasso,* to form). Operation to form false joint in ankylosis.

Arthropoda, ar-throp'o-dah (*arthro, pous,* foot). Articulate animals.

Arthropyosis, ar-thro-pe-o'sis (*arthro, puon,* pus). Suppuration or abscess of a joint.

Arthrorheumatismus, ar-thro-roo-mat-iz'mus. Acute rheumatism.

Arthrorrhagia, ar-thror-rhah'je-ah (*arthro, rhegnumi,* to break forth). Hemorrhage into a joint.

Arthrosia, ar-thro'ze-ah. Inflammation of a joint; occasionally extending to surrounding muscles. **A. acu'ta,** acute rheumatism. **A. chron'ica,** rheumatism, chronic. **A. coxen'dicis,** sciatica. **A. hydrar'thrus,** white swelling; fungous arthritis. **A. lumbo'rum,** lumbago. **A. pod'agra,** gout. **A. p. complica'ta,** gout, retrograde. **A. p. larva'ta,** gout, atonic. **A. p. regula'ris,** gout, regular. **A. thora'cis,** pleurodynia.

Arthrosis, ar-thro'sis. Articulation.

Arthrospongosis (ar-thro-spon-go'sis) or **Arthrospongus,** ar-thro-spon'gus (*arthro, spongos,* sponge). White fungous tumor of joints.

Arthrospore, arth'ro-spore. Spore resulting from segmentation of parent cell.

Arthrosteitis. ar-thros-te-e'tis (*arthro, osteon,* bone). Inflammation of articular extremity of bones.

Arthrostenosis, ar-thro-ste-no'sis (*arthro, stenos,* narrow). Contraction in size of a joint.

Arthrosteophyma, ar-thros-te-o-fe'mah (*arthro, osteon,* bone, *phuma,* growth). Tumor of articular extremity of bone.

Arthrosteresis, ar-thros-ta-ra'sis (*arthro, steresis,* deficiency). Deficiency of limbs.

Arthrosti'tis. Arthrosteitis.

Arthrosym'physis (*arthro, sumphusis,* growing together). Ankylosis.

Arthrosyrinx, ar-thro-syr'inks (*arthro, surinx,* tube). Fistula communicating with a joint.

Ar'throtome (*arthro, tome,* cutting). Knife for operating on joints.

Arthrotomy, ar-throt'o-me. Use of knife in joint affection. Operation of opening a joint; arthrectomy.

Arthrotophus, ar-throt'o-fus. Gouty concretion in a joint.

Arthrotrauma, ar-thro-traw'mah (*arthro, trauma,* wound). Wound of a joint.

Arthrotropia, ar-thro-trop'e-ah (*arthro, trope,* turning). Twisting of a joint.

Arthrous, ar'thrus. Provided with joints.

Arthroxerosis, ar-thro-zer-o'sis (*arthro, xeros,* dry). Deformative arthritis; chronic osteo-arthritis.

Arthroxesis, ar-throks-a'sis (*arthro, xeo,* to scrape). Removal of fungosities from joints by scraping.

Artia, ar'te-ah (*aër,* air). Arteria trachea, trachea.

Artiad, ar'te-ad (*artios,* even). Name used in chemistry to denote an element possessing power of combining, expressed by an even number.

Artichoke, ar'te-choke. Cynara scolymus.

Ar'ticle. Joint. **A. of death,** articulo mortis.

Articocalus, ar-te-ko'kal-us. Cynara scolymus.

Articular, ar-tik'u-lar (*artus,* joint, *articulus,* small joint). Relating to the articulations, as articular capsules, etc. **A. ar'teries of arm,** circumflex arteries of arm. **A. ar'teries of knee** arise from popliteal artery and surround the tibio-femoral articulation. They are distinguished into superior and inferior. The superior articular arteries, popliteal articular arteries, are commonly three—internal, external, and middle, *Azygos articular.* The first, *Ramus anastomoticus magnus,* anastomoses by one branch with external circumflex, and by another with external superior articular; the second anastomoses with external circumflex, superior internal articular, and inferior external articular; the third is distributed within the joint. The inferior articular are two—internal and external. The former anastomoses with the internal superior articular and external inferior articular; latter anastomoses with recurrent branch of anterior tibial and external superior articular. **A. car'tilages,** see *Cartilages.* **A. em'inence,** prominence of zygomatic process. **A. erup'tive fever,** dengue. **A. facettes,** contiguous surfaces by which bones are articulated, **A. lamel'la,** tissue to which articular cartilage is attached. **A. pro'cess,** see *Vertebræ.* **A. rheum'atism,** see *Rheumatism.* **A. veins of knee** follow same course as the arteries.

Articularis, ar-tic-u-lar'is. Articular. **A. ge'nu of Sömmering,** subcrureus. **A. ve'na,** articular vein of arm.

Articulata, ar-tik-u-lat'ah. Arthropoda.

Articulate, ar-tik'u-late. Connected, as **A. speech,** connection of pronounced words.

Articulated, ar-tik'u-la-ted. Provided with, or united by, articulations, as articulated skeleton.

Articulatio, ar-tik-u-lah'she-o. Articulation or joint. **A. artificia'lis,** articulation, false. **A. Chopartii,** line of articulations followed in Chopart's amputation. **A. cox'æ,** hip-joint. **A. cu'biti,** elbow-joint. **A. fem'oris,** knee-joint. **A. ge'nu,** knee-joint. **A. hu'meri,** shoulder-joint. **A. Lisfranc'ii,** tarso-metatarsal articulations. **A. mandibula'ris** or **maxil'læ,** temporo-maxillary a. **A. mix'ta,** amphiarthrosis. **A. no'tha,** articulation, false. **A. pe'dis,**

ankle-joint. **A. pla'sia**, arthrodia. **A. sphæroï'dea**, enarthrosis. **A. ta'li**, ankle-joint. **A. ta'lo-crura'lis**, ankle-joint.

Articulation, ar-tik-u-la'shun. Joint; union of bones with each other, as well as kind of union. Putting bones of skeleton together. Division of body of animals into segments. Combination of letters constituting words; see *Voice*. The following classification of articulations or joints is usually made (Brockway and O'Malley, after Gray):

CLASSIFICATION OF ARTICULATIONS.

Synarthrodial, immovable.	Sutura	vera (true)	dentata—*e.g.* interparietal.
			serrata—*e. g.* interfrontal.
			limbosa—*e. g.* fronto-parietal.
	"	notha (false)	squamosa—*e. g.* squamo-parietal.
			harmonia—*e. g.* intermaxillary.
	Schindylesis—*e. g.* rostrum of sphenoid and vomer.		
	Gomphosis—*e. g.* tooth in alveolus.		
Amphiarthrodial, mixed.	Surfaces connected by fibro-cartilage, not separated by synovial membrane—*e. g.* bodies of vertebræ.		
	Surfaces covered by fibro-cartilage and partially lined by synovial membrane—*e. g.* pubic symphysis.		
Diarthrodial, mixed.	Arthrodia gliding (not referable to any axis)—*e. g.* some movements in temporo-maxillary articulation.		
	Enarthrosis, ball-and-socket—*e. g.* shoulder and hip.		
	Ginglymus, hinge—*e. g.* elbow, knee; no lateral motion.		
	Diarthrosis rotatoria, or lateral ginglymus, a pivot within a ring—*e. g.* atlo-axoid.		
	Condyloid, ovoid head in elliptical cavity—*e. g.* wrist.		
	Reciprocal reception, saddle-shaped—*e. g.* carpo-metacarpal joint of thumb.		

Articula'tion, amphiarthro'dial. Amphiarthrosis. **A., arthro'dial**, arthrodia. **A., ball-and-socket**, enarthrosis. **A., Chopart's**, medio-tarsal joint. **A., con'fluent**, cutting short of words or running them together, as in some forms of mental disease. **A., cup-and-ball**, enarthrosis. **A., diarthro'dial**, diarthrosis. **A., false**, false joint, formed between fragments of bone that have remained ununited, or between luxated bone and surrounding parts. **A., immov'able**, synarthrosis. **A., mixed**, amphiarthrosis. **A., mov'able**, diarthrosis. **A. posi'tions**, term applied to positions at which the sounds of certain consonants are produced. **A., syno'vial**, A. bathed with synovial fluid. **A., tro'choid**, A. admitting of rotation only.

Articuli, ar-tik'u-le. Joints, small members. Zones of lenticular nucleus of corpus striatum. **A. digito'rum ma'nûs**, phalanges of fingers. **A. digito'rum pe'dis**, phalanges of toes.

Articulo mortis, ar-tik'u-lo mor'tis (in the article of death). At the point of death. **A. spina'lis**, semi-spinalis colli.

Articulus, ar-tik'u-lus. Joint segment, limb. **A. no'vus** (new joint), pseudarthrosis. **A. preternatura'lis**, pseudarthrosis. **A. spu'rius**, pseudarthrosis.

Artificial, ar-te-fish'al (*ars*, art, *facio*, to make). Formed by art. **A. a'nus**, see *Anus*. **A. eyes** are usually enamel, glass, or celluloid hollow hemispheres applied beneath the eyelids, to replace a lost eye. **A. fecunda'tion**, impregnation with semen injected by artificial means into the vagina or uterus. **A. impregna'tion**, A. fecundation. **A. joint**, false joint; see *Joint*. **A. leech**, see *Leech*. **A. limbs**, apparatus by which loss of limbs can be greatly palliated. **A. pu'pil**, see *Pupil*. **A. respira'tion**, see *Respiration, artificial*, and *Resuscitation, methods of*. **A. teeth**, these substitutes for natural teeth are made of ivory, tooth of hippopotamus, porcelain, etc.

Ar'tisan's cramp. Spasmodic affection of the muscles caused by prolonged co-ordination of a certain set of the muscles employed in delicate manipulation.

Artiscoccus lævis, ar-tis-kok'kus le'vis. Cynara scolymus.

Artiscus, ar-tis'kus (dim. of **Artos**, bread). Trochlear tablet.

Artistomia, ar-tis-tom'e-ah (*arti*, exactly, *stoma*, mouth). Distinct articulation; correct size of opening in a cut from operation.

Artizoos, ar-te-zo'os (*arti*, exactly, *zoe*, life). Just alive, being newly born or nearly dead.

Artocarpus (ar-to-karp'us) **heterophyl'la** (*artos*, bread, *karpos*, fruit). Species having astringent root, used in diarrhœa, etc. **A. inci'sa**, bread-fruit tree, Polynesian tree, fruit of which, milky and juicy, supplies the place of bread. Ashes of leaves mixed with cocoanut oil are used externally in leprosy. The root is astringent. **A. integrifo'lia**, root, astringent, is used in dysentery.

Artocreas, ar-tok'ra-as (*artos*, bread, *kreas*, flesh). Nourishing food made of various aliments boiled together.

Artogala, ar-tog'al-ah (*artos*, bread, *gala*, milk). Alimentary preparation of bread and milk; poultice.

Artomeli, ar-tom'a-le (*artos*, bread, *meli*, honey). Cataplasm of bread and honey.

Artopœopsora, ar-to-pe-o-so'rah (*artopoios*, baker, *psora*, itch). Baker's itch, form of eczema.

Ar'tus. Articulation; limb.

Artyma, ar'tim-ah (*artuo*, to prepare). Aroma; condiment.

Ar'um America'num be'tæ fo'liis. Dracontium fœtidum. **A. dracon'tium**, green dragon; indigenous; same properties as A. triphyllum. **A. dracun'culus** resembles A. maculatum in properties. **A. esculen'tum**, used as food by people of Madeira, Polynesia, etc., and laboring population of West Indies. **A. macula'tum**, *Wake robin, Priest's pintle, Cuckow pint;* fresh root is stimulant and hydragogue cathartic internally; externally, very acrid. From the root starch is prepared, called *Portland Island sago, Portland arrow root, Gersa serpentariæ, Cerusa serpentariæ, Fecula ari maculati*. **A., three-leaved**, A. triphyllum. **A. triphyl'lum**, *Three-leaved A., Indian turnip, Dragon root, Dragon turnip, Pepper turnip*. This plant grows all over the United States. Recent root has been employed in asthma, croup, and whooping cough, and boiled in lard is used in tinea capitis, and in milk in consumption. **A. Virgin'icum**, Peltandra Virginica. **A. vulga're**, A. maculatum. **A., wa'ter**, Calla palustris.

Arun'do bam'bos. Bamboo splint or bandage. **A. brach'ii ma'jor**, ulna. **A. b. mi'nor**, radius. **A. do'nax**, from S. Europe; root is antigalactic. **A. ind'ica**, Sagittarium alexipharmacum. **A. ma'jor**, tibia. **A. mi'nor**, fibula. **A. phrag'mites**, European plant with depurative properties. **A. saccharif'era**, see *Saccharum*.

Arva, ar'vah. Ava. **A. mulie'bria**, female generative organs.

Arveloz, ar-ve-loz. Alveloz.

Ar'vum (field). Vulva. **A. natu'ræ**, uterus.

Ary-arytænoidæus, ah-re-ah-rit-e-noid-e'us. Arytænoid. **A.-cornicula'tus obli'quus**, muscular fasciculi on upper surface of ary-epiglotticus muscle. **A.-c. rec'tus**, muscular fibres passing from arytenoid cartilage to cornicula of larynx. **A.-epiglotticus, epiglottid'eus**, or **membrano'sus**, aryteno-epiglotticus muscle. **A.-Santorin'ian lig'aments**, ligaments between arytenoid cartilages and cornicula of larynx. **A.-Santorinia'nus**, arytenoid muscle. **A.-syndesmicus**, ah-re-sin-des'mik-us. Collection of muscular fibres from cricoid cartilage to arytenoid.

Arytænoëpiglotticus, ah-re-te-no-ep-e-glot'tik-us (*arutaina*, pitcher). Belonging to arytenoid cartilages and epiglottis. Small, fleshy fasciculi attached at one extremity to the arytenoid cartilages, and by the other to the free edge of the epiglottis, forming part of the arytenoid muscle.

Arytæno-epiglottidæus, ah-re-te'no-ep-e-glot-tid-e'us. See *Sacculus laryngis*.

Arytænoïdæus, ah-rit-e-no-id-e'us. Small muscle passing from one arytenoid cartilage to the other; by its contraction it brings them together and diminishes aperture of glottis. It has been divided into three portions: *Arytænoidæus transversus* or *Ary-arytenoidæus* and two *Arytænoidæi obliqui*. **A. ma'jor**, A. trans-

versus. **A. mi'nor** or **obli'quus**, oblique portion of arytænoideus. **A. rec'tus**, ary-corniculatus rectus. **A. transver'sus**, transverse portion of arytænoideus.

Arytæno-pharyngeus, ah-re-te'no-far-in-ja'us. Muscle in some animals from arytenoid cartilage to lower part of pharynx.

Arytenial, a-rit-e'ne-al. Arytenoid.

Aryte'no-epiglot'tic or **epiglottide'an.** Belonging to the arytenoid cartilage and epiglottis, as aryteno-epiglottic or aryteno-epiglottidean fold of mucous membrane, so situated; aryteno-epiglottic muscle, muscular fibres passing from one of the two cartilages to the other.

Arytenoid, a-rit'en-oid (*arytæna, eidos*, shape). Ladle-shaped. **A. car'tilages**, two cartilages of larynx, situated posteriorly above the cricoid, which, by approximation, diminish the aperture of the glottis. Their upper extremities or cornua are now and then found loose as appendices, considered by some as distinct cartilages, *Cuneiform* or *tuberculated cartilages, Cornicula laryngis.* **A. glands**, small, glandular, whitish bodies situate anterior to the A. cartilages. They pour out mucous fluid to lubricate the larynx. **A. mus'cle**, arytenoïdæus.

Arytenoidum (ah-rit-en-oi'dum) **capit'ulæ.** Cornicula of larynx. See *Arytenoid cartilages.*

Arythm, a-rithm (*a, rhuthmos*, rhythm). Irregularity; term applied chiefly to the pulse, *arythmic pulse.*

As, in composition, see *Ad.*

As. Pound.

A'sa. Asafœtida. See *Assa.* **A. dul'cis**, benjamin. **A. fœt'ida**, asafœtida.

Asafœtida (Ph. U. S.), as-a-fet'id-ah. Assafœtida, *Devil's dung, Food of the gods.* Gum-resin, concrete juice of *Ferula assafœtida, F. scorodosma, Narthex assafœtida*, ord. Umbelliferæ. In small whitish, reddish, and violet masses, adhering together. Taste bitter and subacrid; smell alliaceous. It has been used as a condiment. It is antispasmodic, carminative, stimulant, and anthelmintic. Dose, gr. v to xx in pill.

Asagraya (a-sa-gray'ah) **or Asagræ'a officina'lis** (after Dr. Asa Gray). Schœnocaulon officinale; source of veratria.

Asapes, ah'sap-es (*a, sepo*, to corrupt). Sputa or other matter evacuated, not in a state of decay.

Asaphia, ah-saf'e-ah (same etymon). Defective articulation, usually from diseased or defective palate.

Asarabacca, as-ar-ab-ak'kah. Asarum. **A., broad-leaved**, Asarum Canadense.

Asarcia (ah-sark'e-ah) or **Asark'ia** (*a, sarx*, flesh). Want of flesh; emaciation.

Asarcon, ah-sark'on (*a, sarx*, flesh). Devoid of flesh.

Asarin, as'ar-in. Principle from Asarum Canadense.

Asarites, as-ar-e'tes. Diuretic wine of which asarum was an ingredient.

As'arol. Camphoraceous alcoholic matter from Asarum Canadense.

Asarone, as'a-rone. Camphoraceous material from root of Asarum Europæum and A. Canadense.

As'arum Canaden'se. *Canada Snake-root, Wild ginger, Cold foot, Broadleaf asarabacca, Indian ginger, Heart snake-root.* Used as a substitute for ginger; a warm stimulant and diaphoretic. **A. cam'phor**, asarone. **A. Carolinia'num**, A. Canadense. **A. Europæ'um**, ord. Aristolochiaceæ; the leaves are emetic, cathartic, and errhine. **A. hypocistis**, Cytinus hypocistis. **A. officina'le**, Asarum Canadense.

Asbestos (as-bes'tos) **scall** (*asbestos*, inveterate). See *Eczema of hairy scalp.*

Asbolic, as-bol'ik (*asbole*, soot). Relating or appertaining to soot, as asbolic or chimney-sweeper's cancer.

Asbolin, as'bo-lin. Bitter principle from soot.

Ascamonia, as-kam-o'ne-ah. Scammony.

Ascardamyctus, as-kard-am-ik'tus (*a, skardamutto*, to twinkle the eyes). One who stares with fixed eyes, without moving the eyelids.

Ascari'asis. Ascaridiasis.

Ascaricida (as-kar-is-e'dah) **anthelmin'tica** (*ascaris, cædo*, to kill). Veronia anthelmintica.

Ascaricide, as-kar'is-ide. Agent destructive of ascarides.

Ascaridiasis, as-kar-id-e'as-is (state of having). Ascarides as an intestinal parasite. Phtheiriasis.

Ascaridocnesmus, as-kar-id-ok-nez'mus (*ascaris, knesma*, itching). Itching of anus or vicinity from ascarides.

Ascaris (as'kar-is), pl. **Ascarides**, as-kar'id-ees (*askarizo*, to leap). Genus of nematoid intestinal worms, characterized by long, cylindrical body, extenuated extremities, and mouth furnished with three tubercules. Formerly there were reckoned two varieties, *A. lumbricoïdes* or *gigas hominis, Lumbricus, L. teres hominis, Scolex*, or long round-worm; and *A. vermicularis*, Ascaris proper, thread-worm or maw-worm. The former is alone included under the genus, a new genus having been formed of *A. vermicularis*, under name *Oxyuris;* it is *Oxyuris* or *Fusaria vermicularis*, or spring-worm. See *Worms* and *Parasites.* **A. ala'ta**, A. mystax; see *Parasites.* **A. gi'gas hom'inis**, see *Ascaris.* **A. lumbricoï'des**, see *Ascaris.* **A. my'stax**, slender worm, like A. lumbricoides, but a smaller parasite. **A. rena'lis**, Strongylus gigas. **A. trichu'ria**, tricocephalus. **A. vermicula'ris**, Oxyuris vermicularis. **A. viscera'lis**, Strongylus gigas.

Asceles, as'sel-es (*a, skelos*, leg). One who has no legs or very thin ones.

Ascella, as-sel'lah. Axilla.

Ascendens, as-sen'dens (*ascendo*, to ascend). Part that arises in a region lower than that in which it terminates. *Aorta ascendens* is aorta from origin to arch; *Vena cava ascendens*, large vein carrying blood from inferior parts to the heart.

Ascending, as-send'ing. Passing from below upward. Ascendens. **A. co'lon**, see *Colon.* **A. cur'rent**, current passing between positive pole on surface of the body and negative pole placed in the central or more external region. **A. degenera'tion**, degeneration in spinal cord gradually extending upward to cerebral region. **A. neuri'tis**, inflammation of nerve travelling centripetally. **A. paral'ysis**, paralysis beginning at the feet and gradually extending to the cerebral nervous system. **A. pro'cess**, nasal process. **A. ra'mus**, portion of ramus of ischium between tuberosity and descending ramus of pubic bone.

Ascen'sion. Upward movement, as to treatment by altitude; augmented intensity of disease; upward tendency or motion of an organ, as the uterus.

Ascensional angle, as-sen'shun-al an'gl. Angle which measures rotation of the eye about its axis.

Ascensus (as-sen'sus) **mor'bi.** Increase of disease.

Ascesis, as'sa-sis. Exercise.

Aschersonian (ash-er-so'ne-an) **ves'icles.** See *Vesicles, Aschersonian.*

Aschistodactylus, as-kis-to-dak'til-us (*a, schistos*, cleft, *daktulos*, finger). Monster whose fingers are not separated from one another; *Syndactylism.*

Ascia, as'se-ah. Axe. Bandage in shape of an axe.

Ascilla, as-sil'lah. Axilla.

Ascites, as-se'tes (*askos*, large belly). *Dropsy of the lower belly, Dropsy of the peritoneum, Abdominal dropsy.* Collection of serous fluid in the abdomen. Ascites proper is dropsy of the peritoneum, characterized by increased size of abdomen, fluctuation, and general signs of dropsy. It is rarely a primary disease, usually owing to obstructed circulation in some of the viscera or excitement of vessels of the abdominal organs. Treatment is essentially same as that of other dropsies. Paracentesis, when had recourse to, is usually palliative. Dropsy may be saccated or in cysts, and occasionally fluid accumulates exterior to the peritoneum, *Hydrepigastrium.* When in cysts it is termed *Hydrocystis, Hydrops abdominis saccatus* or *cysticus*, and *Ascites saccatus.* **A. adipo'sus**, so called when dropsical fluid is white and oily. **A. arthrit'icus**, A. from gout. **A. chylo'sus**, chylous dropsy, in which fluid is milky, probably from some abnormal communication with the lacteal vessels. **A. cruen'tus**, hemorrhage into the peritoneum. **A. hepat'icus**, dropsy from disease of liver. **A. hep'ato-cyst'icus**, dropsy or turgescence of gall-bladder. **A. inter'cus**, dropsy between skin and

peritoneum. **A. intermuscula'ris,** dropsy between muscles of the abdomen. **A. oleo'sus,** A. adiposus. **A. ova'rii,** dropsy of ovary. **A., pas'sive,** dropsy from organic disease of the viscera. **A. purulen'tus,** collection of pus in peritoneum; pyocœlia. **A. sacca'tus,** encysted peritoneal dropsy; ovarian dropsy; see *Ascites, Hydroarion,* and *Hydrops ovarii.* **A. subcuta'neus,** dropsy of wall of abdomen. **A. urino'sus,** escape of urine into cavity of peritoneum. **A. uteri'nus,** hydrometra.

Ascitic, as-sit'ik. Relating to, or affected with, ascites.

Asclepiadæ (as-kle-pe'ad-e) or **Asklepi'adæ.** Priest-physicians who served in ancient temples of Æsculapius, taking their name from being his descendants.

Asclepiadin, as-kle-pe'ad-in. Emetic, purgative, expectorant principle from Cynanchum vincetoxicum.

Asclepias, as-kla'pe-as. A. tuberosa. **A. al'ba,** A. vincetoxicum. **A. apo'cynum,** A. Syriaca. **A. asthmat'ica,** Tylophora asthmatica. **A. cornu'ti,** A. Syriaca. **A. cris'pa,** Gomphocarpus crispus. **A. Curassav'ica,** *Bastard ipecacuanha, Redhead, Blood-weed.* Juice is emeto-cathartic and antiperiodic; leaves are cathartic, emetic, and hæmostatic; root is used in asthma. Indigenous in Mexico and S. America. **A. decum'bens,** root is escharotic, cathartic, sudorific, diuretic. **A., flesh'-colored,** A. incarnata. **A. gigante'a,** mudar. **A. incarna'ta,** *Flesh-colored* or *swamp asclepias* or *silk-weed, Swamp milk-weed.* Root of this plant, growing in all parts of the United States, has same virtues as A. Syriaca and A. tuberosa; rhizome is cathartic, emetic, and expectorant. **A. obova'ta,** A. Syriaca. **A. proc'era,** *Beidelossar, Beidelsar.* Egyptian plant, leaves of which, made into a plaster, are applied to indolent tumors; the milky juice is caustic. **A. pseudosar'sa,** Hemidesmus Indicus. **A. pubes'cens,** A. Syriaca. **A. pul'chra,** A. incarnata. **A. seto'sa,** Mexican plant; tonic, antiperiodic, and diaphoretic. **A. Sullivan'tii,** *Smooth milkweed, Silkweed;* indigenous; same virtues as A. tuberosa. **A. Syri'aca,** *Common silkweed, Milkweed;* cortical part of root is given in powder in asthma and pulmonic affections. **A. tomento'sa,** A. Syriaca. **A. tubero'sa,** Asclepias (Ph. U. S.), *Butterfly weed, Pleurisy root, Flux root, Wind root, Wind weed, White root, Orange swallow root, Silkweed, Canada root, Orange apocynum, Tuberous-rooted swallow-wort;* in Virginia and Carolinas root has long been used as a remedy in pneumonic affections. Sudorific and mild purgative; expectorant, diaphoretic, and febrifuge; given to relieve flatulency and indigestion. **A. verticilla'ta,** indigenous; anodyne and diaphoretic; decoction used for snake-bites; milky juice is violently purgative. **A. vincetox'icum,** *Swallow-wort, White swallow-wort;* root of Vincetoxicum officinale and Cynanchum vincetoxicum; stimulant, diuretic, and emmenagogue.

Asclepiasmus, as-kla-pe-az'mus. Hemorrhoids.

Asclepin, as-kle'pin. Gummy substance from decomposition of asclepiadin, itself a glucoside from asclepias and cynanchum. Diaphoretic, cathartic, and alterative.

Asclepion (as-kla'pe-on) or **Asclepiei'on.** Temple of Æsculapius, used, in antiquity, as place of worship, and frequented by the sick for medical advice. Also white principle from juice of Asclepias cornuti.

Ascococcus, as-ko-kok'kus (*askos,* bottle, *kokkos,* kernel or germ). Genus of schizomycetes, consisting of minute circular cells united by glairy intercellular substance. **A. Billroth'i,** found in putrefied meat.

Ascoïdium, as-ko-id'e-um (*askos,* pouch, *eidos,* shape). Genus of infusoria found in excreta and urine of typhoid-fever cases, drainage-water, etc.

Ascoma, as-ko'mah (*askos,* bottle). Eminence of pubes in females at period of puberty; mons veneris.

Ascomy'cetes. Family of fungi, including truffles, ergot of rye, etc.

Ascoph'ora muce'do. Minute fungus, as in mould of bread.

As'cos. Abdomen; cavity or sac.

As'cospore (*askos,* sac). Spore from a sac-shaped fungous cell.

Ascyphous, ah'siph-us (*a, skuphos,* cup). Without a head.

Ascyrum crux andreæ, as'sir-um cruks an'dre-e. Saint Andrew's cross; indigenous; discutient.

A'se. Anxiety, satiety.

Asebotoxin, ah-se-bo-toks'in. See *Andromeda japonica.*

Aselgotripsia, as-el-go-trip'se-ah (*aselges,* lustful, *tripsis,* rubbing). Copulation between two females.

Aselli, as-el'le (pl. of **Asel'lus**). Wood-lice or hoglice, once considered stimulant and diuretic, and useful in jaundice.

Aselline, as'el-leen (*asellus,* codfish). $C_{25}H_{32}N_4$. Ptomaïne from cod-liver oil. See *Ptomaïnes* (table).

Asellus, as-el'lus (dim. of **Asinus,** an ass). Oniscus.

Asema (ah-sa'mah) **cri'sis** (*a, sema,* a sign). Unexpected crisis, without ordinary precursory signs.

Asemasia, as-em-az'e-ah (*a, sema,* a sign) or **Ase'mia.** Inability to give or appreciate any sign of reflective power or to comprehend articulate language. **A. express'iva,** A. of expression, as aphasia, agraphia, etc. **A. graph'ica,** inability to make or appreciate written characters. **A. mim'ica,** inability to make or appreciate gestures. **A. percepti'va,** A. of perception, as alexia. **A. verba'lis,** inability to speak or appreciate spoken language.

Asepsis, ah-sep'sis (*a, sepo,* to corrupt). State of non-putrefaction; prevention of septic poisoning or its causes, such as pathogenic micro-organisms. See *Antisepsis* and *Antiseptic.*

Aseptic, a-sep'tik. Relating to asepsis: not putrefying; non-putrefactive. **A. opera'tion,** operation in which all the rules of aseptic and antiseptic surgery are observed. **A. sur'gery,** surgical treatment that aims at exclusion from wounds of all septic material, micro-organisms, etc., the operative procedure being germ free. **A. treat'ment,** see *Antiseptic.*

Asep'ticism. See *Antiseptic.*

Aseptol, a-sep'tol. Light yellowish liquid, soluble, result of admixture of equivalent quantities of carbolic acid and sulphuric acid; used as antiseptic.

Asepton, ah-sep'ton (*a, sepo,* to corrupt). Asapes.

Asexual, a-seks'u-al. Devoid of sexual organs or characteristics; term applied to reproduction without sexual intercourse.

Asexualization, a-seks-u-al-i-za'shun. Rendering asexual, as operation of castration or spaying.

Ash, Amer'ican. Fraxinus Americana. **A., bit'ter,** Bittera febrifuga, quassia. **A., blue,** Fraxinus quadrangulata. **A., moun'tain,** Sorbus acuparia. **A., m., Amer'ican,** Sorbus Americana. **A., prick'ly,** Aralia spinosa, Xanthoxylon clava Herculis. **A., p., shrub'by,** Xanthoxylon fraxineum. **A., stink'ing,** Ptelea trifoliata. **A., tree,** Fraxinus excelsior. **A., white,** Fraxinus Americana.

Ashan'tee pep'per. *African cubebs, W. African pepper, Guinea* or *African black pepper.* Derived from Piper Clusii.

Asialia, ah-se-al'e-ah. Deficiency or absence of saliva.

Asialoch'ia. Asialia.

Asialorrhœa, ah-se-al-or-rhe'ah (*a, sialon,* saliva, *rheo,* to flow). Diminution in flow of saliva.

Asiatic (a-ze-at'ik) **bal'sam.** Balsamum Gileadense. **A. chol'era,** see *Cholera.*

Asimina triloba, as-im'in-ah tril'o-bah. See *Carica papaya.*

Asiminin, as-im'in-in. Alkaloid from Asimina triloba; anæsthetic.

Asitia, ah-sish'e-ah (*a, sitos,* food). Abstinence from food; want of appetite; lack of food.

Askeles, as'ke-les. Asceles.

Askites, as-ke'tes. Ascites.

Asklepiadæ, as-kle-pe'ad-e. Asclepiadæ.

Asodes (as-o'des) or **Assodes,** as-so'des (*ase,* disgust, satiety). Accompanied with anxiety and nausea, as *Febris asodes,* fever so characterized.

Aspalasomus, as-pal-as-o'mus (*aspalax,* mole, *soma,* body). Monster with imperfect development of the eyes; also, malformation in which fissure and eventration extend chiefly upon lower part of the abdomen, the urinary apparatus, genitals, and rectum opening externally by three distinct orifices. See *Celosoma.*

Asparagin, as-par'a-jin. See *Asparagus.* **A., bil'iary,** taurine.

Asparagus, as-par'a-gus. *Common asparagus, Sparagus, Speragus, Sparagrass, Sparrowgrass, Grass,* ord. Asphodeleæ. Fresh roots are diuretic, perhaps owing to immediate crystallizable principle, *asparagin* ($C_4H_8N_2O_3$), found in it as well as in marshmallow, licoriceroot, lettuce, and several other plants; they are also sedative. Acted on by acids, *aspartic acid* or amidosuccinic acid results. Extract of the roots is used as a sedative in heart affections. **A. officina'lis,** asparagus.

Asparamide, as-par'am-ide. Asparagin.

Aspartic acid, as-par'tic as'id. See *Asparagus.*

Aspasia, as-paz'e-ah. Ball of wood soaked in infusion of galls, used for constringing the vagina.

As'pen, Amer'ican. Populus tremuloides. **A., Europe'an,** Populus tremula.

Aspera arteria, as'per-ah ar-ta're-ah. Trachea.

Aspergillus, as-per-jil'lus. Developmental form of fungus, found under different names in different parts of the body, as **A. auricula'ris,** in wax of human ear; **A. fumiga'tus,** A. nigrescens; **A. glau'cus,** in same locality and in lungs of animals; **A. mucorol'des,** in gangrenous or tuberculous portions of the lungs; **A. nigres'cens,** in the ear and in mycoses of the lungs and in the nose.

Asperitas (as-per'it-as) or **Asperitudo,** as-per-it-u'do. Asperity; hoarseness; acidity. **A. arte'riæ as'peræ,** hoarseness. **A. cu'tis,** roughness of skin from deficient secretion of sebaceous matter.

Asperitudo, as-per-it-u'do. Trachoma, asperitas.

Asperity, as-per'it-e. Inequality on surface of bone, serving for insertion of fibrous structures.

Asperm'al. Aspermous.

Asperma'sia or **Aspermatia,** ah-spur-mah'she-ah. Aspermatism.

Aspermatism, a-spurm'a-tism (*a, sperma,* sperm). Reflux of sperm from urethra into bladder during venereal orgasm; absence of, or inability to ejaculate, seminal secretion.

Asperm'atous. Aspermous.

Aspermia, a-spur'me-ah. Aspermatism.

Asperm'ous. Deficient in amount of semen. Affected with aspermatism.

Aspersion, as-pur'shun (*aspergo,* to sprinkle). Act of sprinkling or pouring liquid *guttatim* over a wound, ulcer, etc.; cataplasm; fomentation.

Asperula, as-per'u-lah (dim. of **Asper,** rough). Galium aparine. **A. odora'ta,** sweet-scented wood-roof; diuretic, tonic, astringent.

Asphalgesia, as-fal-ga'ze-ah. Tactile impression of a burn made by contact with metals; generally noticed in hypnotism.

Asphaltites, as-fal-te'tes (same etymon as **Asphaltum**). First lumbar vertebra.

Asphaltum, as-fal'tum (*asphalizo,* to strengthen). *Bitumen of Judæa, Jews' pitch.* Black resinous material, sometimes found pure, formed of C., O., H., N. It enters into composition of certain ointments and plasters.

Asphodelus, as-fod'al-us. *Day lily, Daffodil.* Bulbs of this Southern European plant (nat. ord. Liliaceæ) contain a fecula with which bread has been made, and have been considered diuretic. Also used as an application in scabies.

Asphyctic (as-fik'tik) or **Asphyctous,** as-fik'tus. Appertaining or relating to asphyxia; pulseless.

Asphyxia, as-fiks'e-ah (*a, sphuxis,* pulse). Formerly suspension of circulation or syncope; pulselessness; suspended animation, produced by non-conversion of venous blood of the lungs into arterial, from interrupted respiration. Owing to supply of air being cut off, unchanged venous blood of the pulmonary artery passes into minute radicles of the pulmonary veins; but as the latter require arterial blood to excite them, more or less stagnation takes place in the pulmonary capillaries. Death occurs from this cause and from want of arterial blood, and not owing to venous blood being distributed through the system and poisoning it. Apparent death, death trance, is characterized by suspension or diminution of respiration and circulation to such degree as to be scarcely, or not at all, perceptible. Several varieties of asphyxia have been designated: 1. *A. of the New-born,* often dependent upon feeble condition of the infant, or on torpor of medulla oblongata not permitting respiration to be established. 2. *A. by Inhalation of Gases,* some of which cause death by producing spasmodic closure of the glottis; others, by want of oxygen. 3. *A. from Mechanical Causes,* as by strangulation, or hanging, or suffocation. 4. *A. by Submersion,* A. by drowning, death occurring in this way in consequence of the medium being unfit for respiration. See *Submersion, Suffocation,* and *Resuscitation.* 5. *A. from Torpor of Medulla Oblongata.* 6. *A., Cutaneous,* condition resulting when animal, as rabbit, is shaved, and body coated over with varnish impenetrable to water and gases, death occurring from asphyxia; gangrene of the skin. For modes of resuscitation, see *Resuscitation.* **A. al'gida,** A. from exposure to cold. **A. cataph'ora,** A. with brief remissions. **A., chol'era,** Asiatic cholera. **A., cuta'neous,** see *Asphyxia.* **A. flatulen'ta,** apoplexia flatulenta. **A., heat,** sunstroke. **A. idiopath'ica,** fatal syncope owing to relaxation of the heart; see *Suffocation.* **A. immerso'rum,** A. by submersion. **A. by inhala'tion of gases,** see *Asphyxia.* **A. lethar'gica,** torpor with drowsiness. **A. liv'ida,** A. attended with cyanosis, vessels of skin being swollen with blood. **A., lo'cal,** see *Gangrene.* **A. from mechan'ical causes,** see *Asphyxia.* **A. neonato'rum** or **neophyto'rum,** A. of the new-born. **A. of new'-born,** see *Asphyxia.* **A. pal'lida,** A. attended with pallor of surface of body. **A. pestilen'ta,** see *Cholera.* **A., pestilen'tial,** see *Cholera.* **A., so'lar,** sunstroke. **A. spina'lis,** A. from extravasation of blood into spinal canal. **A. by submer'sion,** see *Asphyxia.* **A. suffocatio'nis,** A. from suffocation. **A. from tor'por of medul'la,** see *Asphyxia.* **A. traumat'ica,** A. from injury. **A. Valsalvia'na,** syncope from heart affection. **A. vi'gil,** coma accompanied with delirium; see *Coma vigil.*

Asphyxial (as-fiks'e-al) or **Asphyxic,** as-fiks'ik. Relating to asphyxia.

Asphyxiants, as-fiks'e-ants. Producing asphyxia. **A., tox'ic,** substances which produce poisonous asphyxial symptoms.

Asphyxiated (as-fiks'e-a-ted) or **Asphyxied,** as-fiks'eed. In a condition of asphyxia.

Asphyxy, as-fix'e. Asphyxia.

As'pic. Lavandula spica.

Aspiden, as'pid-en. Impure form of acid from male fern; filicic acid.

Aspidiopsoriasis, as-pid-e-o-so-ri'as-is (*aspidion,* small shield). Psoriasis attended with shield-shaped scales.

Aspidiscus, as-pid-is'kus (*aspidion,* small round shield). External sphincter ani.

Aspidium athamanticum, as-pid'e-um ath-am-an'tik-um (*aspidion,* small shield). South African fern, ord. Filices; anthelmintic; used in powder, infusion, or electuary, especially in tape-worm. **A. coria'ceum,** Calagualæ radix. **A. depas'tum,** Polypodium filix mas. **A. dis'color,** see *Calagualæ radix.* **A. ero'sum,** Polypodium filix mas. **A. ferrugin'eum,** see *Calagualæ radix.* **A. fi'lix fœm'ina,** Asplenium filix fœmina. **A. fi'lix mas,** Polypodium filix mas. **A. margina'le,** marginal shield-fern; rhizome has properties of A. filix mas. **A. rig'idum,** species of A. growing near Pacific coast of U. S., used in tape-worm.

Aspidol, as'pid-ol. $C_{20}H_{34}O$. Material derived from Aspidium filix mas, having same reactions as cholesterin.

Aspidosamine, as-pid-oz'am-een. Emetic alkaloid ($C_{22}H_{28}N_2O_2$) derived from quebracho bark.

Aspidosperma quebracho, as-pid-o-spur'mah quebrak'o. Evergreen tree growing in S. America, from which quebracho bark is obtained. The latter is used in diseases accompanied with dyspnœa, as emphysema, pleuritis, phthisis, etc., in doses of half a drachm; also tonic.

Aspidospermatine, as-pid-o-spur'mat-een. Alkaloid from quebracho, isomeric with aspidospermine; antipyretic.

Aspidospermine, as-pid-o-spur'meen. $C_{22}H_{30}N_2O_2$. Weak alkaloid from quebracho, used in asthma, emphysema, etc. Citrate, hydrochlorate, and sulphate are used.

Aspilia latifolia, as-pil'e-ah lat-e-fo'le-ah. Hemorrhage plant; grows in Africa; used as astringent in hemorrhage.

Aspiration, as-pir-a'shun (*aspiro*, to breathe). Inspiration; act of attracting or sucking; suction, as in cataract extraction; employment of aspirator; imbibition; pronunciation of vowel with full breath. See *Derivation.* **A., pneu'matic,** see *Aspirator.* **A., trache'al,** syringe to be placed over tracheotomy-tube to remove mucus, etc.

Aspirator, as'pir-a-tor. Pneumatic aspirator; explorative instrument for evacuation of fluid contents of tumors, effusions, collections of blood, pus, etc.

Asplenium (as-ple'ne-um) or **Asplenum,** as-ple'num (*splen*, spleen). *Spleenwort, Miltwaste.* **A. adian'tum ni'grum,** black maidenhair; rhizome is diuretic. **A. arbo'reum,** species of Jamaica and S. America; anthelmintic and expectorant. **A. au'reum,** A. ceterach. **A. cet'erach,** demulcent, anodyne; used in dropsy, asthma, and calculous affections. **A. esculen'tum,** species growing in India, China, etc.; antiperiodic, expectorant, laxative. **A. falca'tum,** species growing in Australia, India, etc.; rhizome is astringent in dysentery, etc.; herb is laxative. **A. fi'lix fœm'ina,** *Female fern, Spleenwort;* root resembles that of male fern, and possesses similar anthelmintic virtues. **A. hir'tum,** species growing in S. Sea islands, Java, Borneo, etc.; vermifuge and expectorant. **A. latifo'lium,** A. ceterach. **A. mura'le,** A. ruta. **A. obtu'sum,** A. ruta muraria. **A. ru'ta mura'ria,** *Wallrue, White maidenhair, Tentwort;* used in same cases as A. filix fœmina. **A. scolopen'drium,** *Hart's tongue, Spleenwort,* properties like A. filix fœmina; see *Calcifraga.* **A. serra'tum,** of W. Indies and S. America; used in hepatic affections and diarrhœa. **A. trichom'anes** or **trichomanoï'des,** *Common maidenhair, Dwarf spleenwort;* properties like the last.

Asplenum, as-ple'num. Asplenium; A. ceterach.

Aspredo, as-pra'do (*asper*, rough). Trachoma, urticaria. **A. milia'cea,** miliary fever.

Aspritudo, as-pre-tu'do (*asper*, rough). Trachoma.

Assa, as'sah (*assus*, dry). Tamarind; sun-bath; sudatorium; dry nurse.

Assacou, as-sa-koo. Hura Brasiliensis.

Assafetida or **Assafœtida,** as-sa-fet'id-ah. Asacœtida.

Assala, as-sal'ah. Nutmeg.

Assatio, as-sah'she-o (*asso*, to broil). Preparation of food or medicines in their own juice.

Assay, as-sa'. To analyze any substance, particularly to ascertain proportion of constituents. Process is called *As'say.*

Assella, as-sel'lah. Axilla.

Asser, as'sur. Splint.

Asserac, as'se-rak. Preparation of opium or other narcotic, used by the Turks.

Asserculum, as-serk'u-lum (dim. of **Asser**, board). Splint.

Asses' milk. See *Milk.*

Asses'trix (*assideo*, to sit by). Midwife.

Assidens, as'sid-ens (*as, sedeo*, to be seated). An accompanying, concomitant, or accessory symptom.

Assimilable, as-sim'il-a-bl (*as, similis*, like, *habilis*, able). Susceptible of assimilation.

Assimilate, as-sim'i-late. To effect assimilation.

Assimilating (as-sim'il-a-ting) or **Assimilatory,** as-sim'il-a-to-re. Effecting assimilation.

Assimilation, as-sim-il-a'shun. Act by which living bodies appropriate and transform into their own substance matters which may be placed in contact with it. The reverse action—separating and eliminating matters already assimilated in the act of nutrition—is termed *Destructive assimilation.* **A., pri'mary,** act by which food, after being converted into chyle, is taken up by the blood. **A., sec'ondary,** change following primary assimilation occurring in the capillaries.

As'sis. Asserac, opium.

Asso'ciated move'ments. Movements, as in a paralyzed part when corresponding unaffected part is moved. See *Instinctive.* **A. paral'ysis,** paralysis of associated muscles.

Asso'ciative fascic'uli. Cerebral fibres—*fibres of association*—bringing into association cortical areas of same side of brain.

Assodes, as-so'des. Accompanied with anxiety and nausea, as *Febris assodes,* fever accompanied with such symptoms.

Assuetude, as'swe-tewd (*as, suesco*, to accustom to anything). Habit, tolerance.

Assula, as'su-lah (dim. of **Assis**, board). Splint.

Assultus, as-sul'tus (*assilio*, to leap upon). Attack.

Assumption, as-sum'shun (*as* and *sumo*, to take). Prehension. Appropriation of oxygen or nutritive material by the blood.

As'surin. Substance in tissue of brain; properties not definitely known.

Astacolith, as-tak'o-lith (*astakos*, lobster, *lithos*, stone). Crab's eye. Concretion in stomach of crawfish having that appearance; used for gout, acid conditions, and hemorrhage.

Astakillos, as-tak-il'los. Malignant gangrenous ulcer of the legs.

Astasia, as-tah'ze-ah (*a, histemi*, to fix). Dissatisfaction; restlessness; tremor; suffering; indisposition. **A. aba'sia,** difficulty in standing and walking, without association with motor paralysis or disordered sensibility; a form of hysteria devoid of organic lesion.

Astatic, a-stat'ik. Restless; not restrained as to movement, as *astatic magnetic needle.*

Asteatodes, ah-sta-at-o'des (*a, stear*, suet). Having sebaceous secretion of the skin absent or defective.

Asteatosis, ah-sta-at-o'sis (*a, stear*, suet). Deficiency or absence of fat or sebaceous secretion. *Asteatoses* are diseases characterized by such absence or deficiency.

Aster (*aster*, a star). Dividing nucleus in which fibrils are arranged in open loops and around a common centre, radiated like a star. See *Karyokinesis.* **A. amellus,** am-el'lus, grows in Europe and Asia; used in bubo and hernia. **A. at'ticus,** bubonium. **A. cordifo'lius,** *Heart-leaved aster,* A. puniceus, *Rough-stemmed aster,* and other indigenous species, ord. Compositæ, possess aromatic properties; antispasmodic, diaphoretic, and nervine. **A. dysenter'icus,** Inula dysenterica. **A., heart-leaved,** A. cordifolius. **A. hele'nium,** Inula helenium. **A. inguina'lis,** Eryngium campestre. **A. officina'lis,** Inula helenium. **A. punic'eus,** see *A. cordifolius.* **A. tortifo'lius,** Sericocarpus tortifolius. **A. undula'tus,** Inula dysenterica.

Asteracantha (as-ter-ak-an'thah) **longifo'lia.** Hygraphila spinosa.

Asterias lutea, as-ta're-as lu'te-ah. Gentiana lutea.

Asterion, as-te're-on. Point of junction of lambdoid, parieto-mastoid, and occipito-mastoid suture in skull; used in craniometry.

Asternal, a-stur'nal. Not connected with sternum.

Asternia, ah-stur'ne-ah (*a, sternon*, sternum). Monstrosity in which there is absence of sternum.

Asterocephalus succisa, as-te-ro-sef'al-us suk-se'-zah (*aster*, a star, *kephale*, head). Scabiosa succisa.

Asthene'ma. Asthenia.

Asthenes, as'then-es. Infirm.

Asthenia, as-then-e'ah (*a, sthenos*, strength). Want of strength, debility; infirmity. **A. deglutitio'nis,** paralysis of the pharynx. **A. dolorif'ica,** angina pectoris. **A. infan'tum,** marasmus. **A. mus'cular,** weakness of muscular movements; paralysis; contraction; wry-neck. **A., ner'vous,** neurasthenia. **A. pectora'lis,** angina pectoris.

Asthenic, as-then'ik. Relating or belonging to asthenia; weak, feeble, as asthenic diseases.

Asthenicopyra (as-then-ik-op'ir-ah) or **Asthenicopyretus,** as-then-ik-o-pir'et-us (*asthenes*, weak, *pur*, fever). Fever, adynamic.

Asthenopia, as-then-o'pe-ah (*asthenes*, weak, *ops*, eye). Weakness of sight; weak-sightedness with fatigue, strain, indistinctness, dread of light, etc. *True* or *accommodative a.* is observed in hypermetropia and astigmatism, and is curable by convex

glasses. *Apparent a.* occurs in myopia, and occasionally in hyperæmia of optic disk and retina. *Binocular* or *muscular a.*, sometimes mistaken for accommodative asthenopia, may arise from weakness or insufficiency of the internal recti muscles or of the ciliary muscles. *Nervous a.* may be produced by some affection of the nervous centres; it may be dependent on an over-sensitive and irritable retina, *retinal a.* **A., true,** accommodative asthenopia.

Asthenopyra (as-then-op'ir-ah) or **Asthenopyretus,** as-then-o-pir'et-us (*asthenes,* weak, *pur,* fever). Adynamic fever, typhus.

Asthma, asth'mah (laborious breathing). *Broken-windedness, Nervous asthma.* Great difficulty of breathing, recurring at intervals, accompanied with wheezing sound and sense of constriction in the chest; cough and expectoration; chronic disease, not readily curable. It is frequently hereditary. In some cases respiration is universally puerile during the attack. In spasmodic form respiratory murmur is very feeble or absent, and in all forms percussion elicits clear pulmonary sound. The disease generally consists in some source of irritation, occasionally, perhaps, in paralysis of the pneumogastric nerves, *Broncho-paralysis, Paralysis nervi vagi in parte thoracica,* more frequently the former, the phenomena all indicating constriction of smaller bronchial ramifications. Treatment is one that relieves spasmodic action—anæsthetics, narcotics, counter-irritants, change of air, etc. **A. acu'tum of Mil'lar,** spasm of glottis, laryngismus stridulus. **A. aër'ium,** pneumothorax. **A. aër'ium ab emphysem'ate pulmo'num,** emphysema of the lungs. **A. arthrit'icum,** angina pectoris. **A. bilio'sum,** A. due to dyspepsia. **A., bron'chial,** asthma. **A., bronchit'ic,** catarrhal or humid a. **A., car'diac,** dyspnœa dependent upon disease of heart. **A., catar'rhal,** A. with augmented secretion from bronchial tubes; A., humid. **A., cen'tral,** A. from lesion of central nervous system. **A., convul'sive,** dry a.; spasm of glottis, angina pectoris. **A. crys'tals,** colorless crystalline bodies said to be found in sputa of asthmatic patients. **A. cultrario'rum,** asthma, grinder's. **A. diaphragmat'icum** or **dolorif'icum,** angina pectoris. **A., dyspep'tic,** A. dependent upon irritation of the stomach. **A. emphysem'atous,** pneumothorax. **A. fullo'rum,** weaver's asthma. **A., grind'er's,** grinder's disease or rot; aggregate of functional phenomena, induced by inhalation of particles thrown off during operation of grinding metallic instruments, etc.; structural changes are enlargement of bronchial tubes, expansion of pulmonary tissue, and phthisis. **A. gyp'seum,** A. pulverulentum. **A., hay,** see *Fever, hay.* **A., Heb'erden's,** angina pectoris. **A. herpet'icum,** asthma associated with herpes. **A., hu'mid** or **hu'moral,** *Common* or *Spitting asthma,* is when the disease is accompanied with expectoration; pulmonary œdema. **A. infan'tum,** cynanche trachealis. **A. infan'tum spasmod'icum,** A. thymicum. **A., intermit'tent, of chil'dren,** A. thymicum. **A., intrin'sic,** A. due to irritation of lungs. **A., Kop'pian,** A. thymicum. **A., laryngе'al,** laryngismus stridulus. **A. laryngе'um infan'tum,** A. thymicum. **A., mar'iner's,** beriberi. **A. metallario'rum,** miner's asthma. **A. Mil'lari acu'tum,** A. acutum. **A., mi'ner's,** miner's asthma. **A., moist,** A., humid; A. with purulent expectoration. **A. monta'num,** A. pulverulentum. **A. nephrit'icum,** A. associated with Bright's disease. **A., ner'vous,** asthma. **A. noctur'num,** incubus. **A., organ'ic,** A., cardiac. **A., pitu'itous,** A., catarrhal or humid. **A., pneumobul'bar,** A. from irritation of pneumogastric nerve. **A., pot'ter's,** see *Pneumokoniosis.* **A. pulverulen'tum,** variety to which millers, bakers, and grinders are subject. **A., re'nal,** uræmic a. **A. seni'le** or **senio'rum,** A. of old persons. **A. sic'cum.** Paroxysm is sudden, violent, and of short duration; cough slight and expectoration scanty, with spasmodic constriction. **A. spasmod'icum** or **spas'ticum,** convulsive a. **A. spas'tico-arthrit'icum incon'stans,** angina pectoris. **A. spas'ticum infan'tum,** A. thymicum. **A., spit'ting,** A., moist. **A. syncop'ticum,** angina pectoris. **A. thy'micum,** *Laryngeal asthma, Stridulous* or *spasmodic laryngitis, Suffocative* or *internal convulsion, Intermittent asthma of children, Crowing inspiration, Vocal asynergy, Spasmodic, nervous,* or *hysterical cough, Laryngeal chorea* or *vertigo, Koppian asthma, Thymic asthma, Laryngismus stridulus, Spasm of the larynx* or *glottis, Croup-like inspiration of infants, Child-crowing, Spasmodic croup, Pseudo-croup, Spurious* or *cerebral croup, Phrenoglottism, Suffocating nervous catarrh.* Disease of infants, characterized by suspension of respiration at intervals; great difficulty of breathing, with crowing inspiration, especially on waking, swallowing, or crying; ending often in fit of suffocation with convulsions. These symptoms are often accompanied by rigidity of fingers and toes; thumb being frequently drawn forcibly into palm of clenched hand, whence name *Carpo-pedal spasm,* so called by Kopp. **A. typ'icum,** asthma characterized by periodicity. **A., uræ'mic,** difficulty of breathing accompanying Bright's disease. **A. u'teri,** hysteria. **A. weed,** Lobelia inflata.

Asthmatic, asth-mat'ik. Broken-winded; affected with asthma; relating to asthma. **A. drop'sy,** beriberi.

Asthmatophthisis, asth-mat-o-te'sis. Phthisis with asthma.

Asthmatorthopnœa (asth-mat-or-thop-ne'ah) or **Asthmorthopnœa,** asth-mor-thop-ne'ah. Orthopnœa due to asthma.

Astigmatic, a-stig-mat'ik (*a, stigma,* point). Affected with or relating to astigmatism. **A. lens** is one used for ascertaining amount of astigmatism.

Astigmatism, a-stig'ma-tizm (*a, stigma,* point). State of irregular refraction in the eye, in which rays are not brought to one focus, but converge at different distances. It may be remedied by use of cylindrical glasses, directions for which, as well as descriptions of ophthalmoscopic appearances, etc., may be found in works on the eye. *Regular astigmatism* is a term applied to involvement of the whole cornea; *irregular a.,* when only portion of cornea is affected. Various forms are described: *abnormal irregular a.,* in which there is defective curvature of cornea or abnormal structure or location of the lens; *normal irregular a.,* due to changes in structure and density of lens, with polyopia; *acquired a.,* due to flattened cornea or displacement of lens; *corneal a.,* where cause exists in cornea; *hypermetropic a.,* in which there is hypermetropia in the two chief meridians, with additional degree of hypermetropia in one of them; *compound h. a.,* or a. with emmetropia in one of these meridians and hypermetropia in the other, *simple h. a.; myopic a.,* with emmetropia in one of these meridians and myopia in the other; *simple myopic a.,* or myopia in both such meridians, with additional degree of myopia in one of them, *compound myopic a.; lenticular a.,* in which cause exists in the lens; *mixed a.,* having myopia in one meridian and hypermetropia in the other; *regular a.,* due to corneal curvature, and having different focal distance of the two meridians.

Astigmatoscope, a-stig-mat'o-skope (*a, stigma,* point, *skopeo,* to see). Instrument for discovering amount of reflection from the cornea.

Astigmometer, a-stig-mom'e-tur. Instrument for determining degree of astigmatism through difference in refraction between meridians of the cornea.

Ast'ley Coop'er's her'nia. Crural hernia with multilobar sac.

Astomia, as-to'me-ah (*a, stoma,* mouth). Absence of mouth. Animal so affected is *As'tomous* or *Astom'atous.*

Astrag'alo-calca'neal. Relating to astragalus and calcaneum, as A.-c. articulation and A.-c. ligaments.

Astragaloid, as-trag'al-oid (*astragalus, eidos,* form). Resembling the astragalus.

Astragaloï'des syphilit'ica. Astragalus exscapus.

Astragalo-scaphoid, as-trag'a-lo-scaf'oid. Relating to astragalus and scaphoid, as A.-s. articulation.

Astragalotomy, as-trag-al-ot'o-me (*tome,* cutting). Excision of the astragalus.

Astrag'alus. Short bone situated at the superior and middle part of the tarsus, where it is articulated

with the tibia; huckle-bone, sling-bone, or first bone of foot; atlas or first vertebra of neck. Ancient measure used by medical men. **A. adscen'dens,** species growing in Persia, from which tragacanth is obtained. **A. brachyca'lyx,** also source of tragacanth. **A. Cre'ticus,** species from Crete and Greece yielding tragacanth. **A. ex'scapus,** *Stemless milkvetch.* Nat. ord. Leguminosæ. Diuretic, diaphoretic, antisyphilitic. **A. glycyphyl'lus,** herb of Europe and Asia; leaves are aperient and used in retention of urine, strangury, etc. **A. gum'mifer,** from Persia, is also a source of tragacanth. **A. mollis'simus,** locoweed, plant of W. United States, of toxicological interest only; active principle is narcotic, powerful sialagogue, and tetanic. **A. pote'rium** grows in Granada; root is tonic and nervine. **A. tragacan'thus,** see *Tragacantha.* **A. ve'rus,** *Goatshorn, Milkvetch.* Plant affording gum tragacanth; see *Tragacantha.* Tragacanth is also credited to other species of Astragalus, such as A. parnassii, etc.

Astrantia, as-tran'she-ah. Imperatoria. **A. diapen'sia,** sanicula. **A. ma'jor,** *Black sanicle, B. masterwort,* of Central Europe; rhizome is purgative.

Astrapaphobia, as-trap-ah-fo'be-ah (*astrape,* lightning, *phobos,* fear). Morbid dread of lightning, with nausea, vomiting, etc.

Astriction, as-trik'shun (*astringo,* to constringe). Action of astringents; constriction; tightness of a bandage. Constipation.

Astrictoria, as-trik-to're-ah. Astringents.

Astringent principle, as-trin'jent prin'se-pl. Vegetable principle existing in bark of numerous plants possessing constringing properties. **A. root,** Comptonia asplenifolia.

Astringents, as-trin'jents (same etymon as **Astriction**). Medicines which constringe organic textures and diminish secretion from mucous membranes, check hemorrhage, etc. They act locally on the part to which they are applied, or remotely on internal organs after absorption into the blood. The following list includes all the important astringents (Brunton):

- Acids.
- Alcohol.
- Alum.
- Chalk and lime.
- Salts of the heavier metals:
  - Bismuth salts.
  - Cadmium sulphate.
  - Copper sulphate.
  - Ferric chloride.
  - Lead acetate.
  - Silver nitrate.
  - Zinc sulphate.
- Gallic acid.
- Tannic acid.
- Vegetable substances containing gallic and tannic acids:
  - Catechu.
  - Galls.
  - Kino.
  - Oak-bark.
  - Uva ursi.
  - Arbutin.

Astringents which arrest hemorrhage from surfaces or vessels are called *styptics.* They do this by causing rapid formation of a clot or by contracting the vessels. The chief styptics are:

Acids.	Collodion.	Acting mechanically.
Actual cautery.	Matico.	
Alum.	Spider's web.	
Ferric chloride.	Cold (ice).	By contracting the small vessels.
Gallic acid.	Digitalis.	
Tannic acid.	Ergot.	
Lead acetate.		

Astrios, as'tre-os. Acteria gemma.

Astrion (as'tre-on) or **Astris,** as'tris. Astragalus.

As'tro (*astron,* star). In composition, star.

Astrobles, as'tro-bles (*astro, ballo,* to strike). One struck by the stars, *sideratus;* that is, in an apoplectic state.

Astrobolesia (as-tro-bol-ah-ze'ah) or **Astrobolia,** as-tro-bol'e-ah. Apoplexy.

Astrobolism, as-trob'o-lizm. Apoplexy. Sunstroke. Gangrene.

Astrobolus (as-trob'o-lus) or **Astroïtis,** as-tro-e'tis (*aster,* star). Asteria gemma.

Astrology, as-trol'o-je (*astro, logos,* discourse). Art of divining by inspecting the stars, *Astromantia;* formerly considered part of medicine.

Astromantia, as-tro-man-te'ah. Astrology.

Astroneum graveolens, as-tro'ne-um grav-e'o-lens. Species of New Granada, having astringent fruit.

Astruthium, as-trew'the-um. Imperatoria.

Astuchium, as-tu'ke-um. Part of inferior cornu of lateral ventricle of brain.

Asturian rose, as-tu're-an rose. Endemic cutaneous affection of Asturia.

Astylis, as-til'is. Variety of lettuce; antaphrodisiac.

Astyphia (ah-stif'e-ah) or **Astysia,** ah-stis-e-ah (*a, stuo,* to make erect). Impotence; want of erectile power.

Asulci, ah-sul'se. Lapis lazuli.

Asyllabia, ah-sil-lab'e-ah. Want of power to express words syllabically.

Asylum, as-i'lum. Usually place of refuge, care, or treatment for those affected with diseases of organs of sense or of the senses. **A. ear,** morbid condition of external ear sometimes noticed in patients of asylums for the insane. See *Hæmatoma auris.*

Asymbolia, ah-sim-bol'e-ah (*a, sumballo,* to connect). Aphasia. Want of ability to express one's self by signs.

Asymmetrical, a-sim-met'ri-cal. Not symmetrical.

Asymmetry, (*a, sum,* together, *metron,* measure). Absence of usual similarity in appearance, shape, etc. of surfaces or organs characterizing opposite sides of the body. **A., merid'ional,** regular astigmatism.

Asynclitism, ah-sin'klit-izm (*a, sun,* together, *klitos,* inclined). Want of parallelism of planes of fœtal head to those of pelvis.

Asynechia, ah-sin-ek'e-ah (*sunecheia,* connection). Absence of continuity.

Asynergy, a-sin'er-je (*a, sun,* together, *ergon,* work). Want of correlation between organs. **A., locomo'tor progres'sive,** progressive locomotor ataxy. **A., ver'bal,** aphasia. **A., vo'cal,** asthma thymicum; want of co-ordination of laryngeal muscles, as in chorea.

Asynesia, ah-sin-a'ze-ah (*a, suniemi,* to comprehend). Dementia.

Asynodia, ah-sin-od'e-ah (*a, sunodia,* copulation). Impotence; suspension of or lack of sexual intercourse.

Asynovia, ah-sin-o've-ah. Deficiency or lack of synovial fluid.

Asyntrophy, ah-sin'tro-fe (*a, sun,* together, *trophe,* nourishment). Absence of symmetrical nourishment or growth.

Asystolia (ah-sis-tol'e-ah) or **Asystole,** ah-sis'tol-e (*sustole,* systole). Incomplete systole or ventricular contraction, so that the ventricles are not freed of blood; met with in degeneration of cardiac muscles.

Asystolic, a-sis-tol'ik. Relating to asystolia or incomplete systole.

Asystolism, a-sis'to-lism. Asystolia.

At, in composition, same as *Ad.*

Atactic, a-tak'tik (*a, taxis,* order). Erratic, irregular, ataxic. **A. apoph'yses,** term given to minute ramifications of veins.

Atactically aphasic, at-ak'te-kal-le af-a'zik. One who can recall the proper name for words, but who cannot arrange them in any other way.

Atalantia monophylla, at-a-lan'te-a mon-o-fil'lah. Malabar shrub, bark of which is bitter and antispasmodic, and oil is used as external application in rheumatism and paralysis.

Ataraxia, ah-tar-aks'e-ah (*ataraxia,* peace of mind). Moral tranquillity; devoid of emotion.

Atavism, at'a-vizm (*atavus,* ancestor, forefather). Case in which anomaly or disease in a family is lost in one generation, reappearing in a following. Tendency in offspring of living beings to inherit characters of their progenitors.

Ataxaphasia, ah-taks-af-az'e-ah. An ataxic or disordered condition of aphasia, as shown in inability to speak sentences correctly.

Ataxia, ah-taks'e-ah (*a, taxis,* order). Ataxy; disorder, irregularity, as of pulse; disorder of nervous system, especially that form characterizing nervous

fevers and nervous condition; want of co-ordination of muscular movements. **A., abort'ive locomo'tor,** neuralgic form of affection, severe and long-continued pains being the chief characteristic. **A., alcohol'ic,** form met with in alcohol-drinkers, due to neuritis. **A., bul'bar,** locomotor a., from disease or injury of pons Varolii or medulla oblongata. **A., cerebel'lar,** staggering form of a., from lesion of cerebellum, as **A., cer'ebral,** is due to lesion of cerebrum. **A., chore'ic,** want of muscular co-ordination, seen in chorea. **A., drunk'ard's,** A., alcoholic. **A., fam'ily,** or **A., Fried'rich's,** or **A., gener'ic,** sometimes called hereditary a. or Friedrich's disease; incurable; disease resembling locomotor a., occurring in families of children, in which there is a. of the limbs and want of control of musles regulating speech; ending is paralysis or atrophy. **A., hered'itary,** A., family. **A., locomo'tor** or **progres'sive locomo'tor** or **moto'rial,** *Posterior spinal sclerosis, Tabes dorsalis, Tabes* or *consumption of spinal cord, Duchenne's paralysis* or *disease, Cerebral paraplegia, Progressive locomotor asynergy, Spinal atrophy.* Chronic morbid condition described by Duchenne of Boulogne, prominent symptom of which is loss of power to co-ordinate voluntary movements, with lightning-like pains in the back and along the nerves to the lower extremities. Tendon reflexes are lessened or obliterated, and disturbances and irregularities of sensory manifestations occur. Inflammation or sclerosis of the posterior root-zones of the spinal cord is the pathogenetic cause. **A. men'suum** or **men'strual,** vicarious irregularity of menses. **A., mo'tor** or **mo'tus,** A., progressive locomotor. **A., mus'cular,** want of co-ordination of muscles. **A., progres'sive locomo'tor,** A., locomotor. **A., spi'nal,** A., locomotor. **A. spir'ituum,** nervous diathesis.

Ataxic, a-taks'ik. Having characters of ataxia; affected with ataxy. **A. paraple'gia,** combination of paraplegia and ataxy, dependent on disease of spinal cord.

Ataxo-adynamic (ah-taks'o-ad-in-am'ik) **fe'ver.** Fever having ataxic and adynamic characteristics.

Ataxophemia, ah-taks-o-fa'me-ah (*ataxia, phemi,* to speak). Inability to combine words properly in speaking; want of co-ordination of speech.

Ataxy, a'taks-e. Ataxia. **A., hered'itary,** ataxia, family. **A., locomo'tor** or **progres'sive locomo'tor,** ataxia, locomotor.

Atecnia, ah-tek'ne-ah (*a, teknon,* a child). Sterility.

Atelectasis, at-el-ek'tas-is (*ateles,* imperfect, *ektasis,* dilatation). Imperfect expansion or dilatation, as in **A. pulmo'num,** imperfect expansion of the lungs at birth. A similar condition is observed in lungs which have received air, dependent, in many instances, on catarrhal condition of bronchial tubes, and variously called pulmonary collapse or collapse of the lung, *Collapsus pulmonis, Apneumatosis.*

Atelencephalia, at-el-en-sef-al'e-ah (*atelo, kephale,* head). Impefect development of cranium or its contents.

Ateleopous, at-el-e'o-pus (*atelo, pous,* foot). Wanting a foot, finger, or toe.

Ateleplasia, at-el-a-plaz'e-ah (*atelo, plasso,* to form). Imperfect development.

Atelia, at-el-e'ah (*ateleia,* imperfection). Monstrosity in which there is want of some member.

Atelo, at'el-o (*ateles,* imperfect). In composition, defective.

Atelocardia, at-el-o-kar'de-ah (*atelo, kardia,* heart). Imperfect formation of heart.

Atelocheil'ia (*atelo, cheilos,* lip), Malformation consisting in imperfect development of the lip.

Ateloencephalia, at-el-o-en-sef-al'e-ah. Atelencephalia.

Ateloglossia, at-el-o-glos'se-ah (*atelo, glossa,* tongue). Malformation consisting in imperfect development of the tongue.

Atelognathia, at-el-o-nath'e-ah (*atelo, gnathos,* jaw). Malformation consisting in imperfect development of the jaw.

Atelomyelia, at-el-o-me-el'e-ah (*atelo, muelos,* marrow). Imperfect development of spinal marrow.

Ateloprosopia, at-el-o-pros-o'pe-ah (*atelo, prosopon,* face). Malformation consisting in imperfect development of face.

Atelorhachidia, at-el-o-rak-id'e-ah (*atelo, rhachis,* spine). Hydrorachis.

Atelostomia, at-el-o-stom'e-ah (*atelo, stoma,* mouth). Imperfect development of the mouth.

Ater succus, at'ur suk'kus (black juice). Atrabilis.

Athamanta, ath-am-an'tah. A genus of plants. **A. an'nua,** A. Cretensis. **A. aureoseli'num,** *Black mountain parsley,* ord. Umbelliferæ. Plant, seed, and roots are aromatic, deobstruent, and lithontriptic. Distilled oil has been used in toothache. **A. Creten'sis** or **Cre'tica,** *Candy carrot;* seeds are acrid and aromatic, carminative, diuretic, and emmenagogue. **A. Macedon'ica,** Bubon Macedonicum. **A. me'um,** Æthusa meum. **A. oreoseli'num,** black mountain parsley; aromatic purgative; from roots and seeds of this plant athamantin, bitter glucoside, is derived.

Athamantin, ath-a-man'tin. See *Athamanta oreoselinum.*

Athanasia, ath-an-az'e-ah (*a, thanatos,* death). Tansy. Also antidote for diseases of liver, jaundice, gravel, etc., consisting of saffron, cinnamon, lavender, cassia, myrrh, honey, etc.

Athara, ath-ar'ah. Athera.

Athelasmus, ath-el-az'mus (*a, thele,* breast or nipple). Impracticability of giving suck.

Atheles, ath-a'les (*a, thele,* nipple, breast). Without a breast; weaned; devoid of nipple; one that has not sucked or given suck.

Athelia, ath-a'le-ah (*a, thele,* nipple). Absence of nipple.

Athelus, ath-a'lus. Atheles.

Athelxis, ath-elks'is (pressing out). Act of giving suck or squeezing out milk.

Athera (ath-a'ra) or **Athara,** ath-ah'rah (*ather,* ear of corn). Kind of pap for children; kind of liniment.

Atherapeusia, ah-ther-ap-u'ze-ah (*a, therapeusis,* treatment). Absence of treatment; want of care of patient.

Atherapeutus, ah-ther-ap-u'tus (*a, therapeuo,* to treat or cure). Incurable; not cared for,

Atherma'sia or **Athermosia,** ah-ther-mo'ze-ah (*a, thermasia,* heat). Absence of heat.

Athermosystaltic, ah-ther-mo-sis-tal'tik (*a, therme,* heat, *sustaltikos,* contractile). Not contracting under influence of heat or cold, as a muscle.

Atheroma, ath-er-o'mah (*athara,* pap or pulp). Wen or sebaceous cyst; also condition of larger arteries of trunk and limbs and at base of the brain (arterial atheroma), in which there are yellowish patches covered by normal endothelium, infiltration taking place at first between the laminæ of the innermost coat of the vessel, followed by fibrous deposit, fatty degeneration, and calcification, or perhaps softening. Latter results in atheromatous abscess; or ulceration—atheromatous ulcer—may occur.

Atheromasia, ath-er-o-ma'ze-ah. Change to atheroma.

Atheromatous, ath-er-om'a-tus. Having nature of atheroma. **A. ab'scess,** see *Atheroma.* **A. degenera'tion,** see *Atheroma.* **A. pulp,** bran-like pulp; the appearance presented by metamorphosis of products of fatty degeneration enclosed in a cavity whose walls are in a state of inflammatory irritation. **A. ul'cer,** see *Atheroma.*

Atherosis, ath-er-o'sis. Atheromasia.

Atherosperma moschata, ath-er-o-spur'mah mos-kat'ah. *Australian sassafras.* Bark is diaphoretic, diuretic, and sedative to the heart's action.

Atherospermine, ath-er-o-spur'meen. Bitter alkaloid ($C_{30}H_{40}N_2O_5$) derived from Atherosperma moschata.

Ath'etoid. Relating to athetosis. **A. move'ments** or **spasms,** movements characteristic of athetosis.

Athetosis, ath-e-to'sis (*athetos,* without fixed position). Hammond's disease. Affection characterized by inability to retain the fingers and toes in any position in which they are placed, and by their continual

motion, preceded by cerebral symptoms, impairment of intellect, epileptic attacks, etc.

Athletæ, ath-la'te (*athlos*, combat). Men who exercised themselves in combats at public festivals; hence *athletic*, strong in muscular powers.

Athoracoceph'alus, ah-thor-ak-o-sef'al-us (*a*, *thorax*, *kephale*, head). Acephalogaster.

Athrepsia, ah-threp'se-ah (*a*, *threpsis*, nourishment). Parrot's disease, after its describer. Imperfect nutrition, of infants particularly, from faulty development, emaciation, vomiting, liquid passages, etc.

Athrix, ah'thriks (*a*, *thrix*, hair). One who has lost his hair. **A. dep'ilis**, alopecia.

Athroisæmia, ah-throi-se'me-ah (*athroizo*, to gather together, *haima*, blood). Accumulation of blood, causing congestion.

Athymia, ah-thym'e-ah (*a*, *thumos*, courage). Despondency; prostration of spirits; melancholy; groundless fear. **A. pleonec'tica**, insanity with desire for money; see *Pleonectica*.

Athyrion, ah-thir'e-on. Asplenium ceterach.

Athyrium filix fœmina, ah-thir'e-um fe'liks fem'-in-ah. Asplenium filix fœmina. **A. fi'lix mas**, Polypodium filix mas. **A. mol'le, ova'tum**, or **trif'idum**, Asplenium filix fœmina.

Atis, ah'tis. Root of Aconitum heterophyllum. Tonic, antiperiodic. Alkaloid from it is called *Atisine*, $O_{46}H_{74}N_2O_5$.

Atlantad, at-lant'ad. See *Atlantal aspect*.

Atlantal, at-lant'al. Relating to the atlas. **A. as'pect**, aspect toward the region of the atlas. *Atlantad* signifies toward the atlantal aspect. **A. extrem'ities**, upper limbs.

Atlantico-basilaris internus, at-lan'ti-co-baz-e-lah'ris in-tur'nus. Muscle passing between atlas and basilar process of os occipitis.

Atlan'tico-mastoï'deus. Muscle from atlas to mastoid process of temporal bone.

Atlanti-obliquus, at-lan'te-ob-leek'wus. Obliquus superior capitis muscle.

Atlantion, at-lant'e-on. Atlas.

Atlanti-rectus, at-lan'te-rek'tus. Rectus capitis posticus minor muscle.

Atlanto-axial (at-lan'to-aks'e-al) or **Ax'oid**. Relating to atlas and axis, as atlanto-axial articulation, atlanto-axial ligaments, etc.

Atlanto-occipital, at-lan'to-ok-sip'it-al. Relating to atlas and occipital bone, as A.-o. articulation.

Atlanto-odontoid, at-lan'to-o-don'toid. Relating to atlas and odontoid process of axis.

At'las (*a*, euph., *tlao*, to sustain). First cervical vertebra, supporting weight of the head, as Atlas is said to have supported the globe on his shoulders. By older anatomists, the last cervical vertebra.

Atlo-axoid, at'lo-aks'oid. Atloido-axoid.

Atlodymus (at-lod'im-us) or **Atlodidymus**, at-lo-did'im-us (*atlas*, *didumos*, twin). Monster single below and double above. One having single body, with two distinct heads supported on one neck.

Atloïdo, at-lo'id-o, in composition, *Atlas*.

Atloïdo-axoid, at-lo'id-o-aks'oid. Relating to atlas and axis, as **A. articula'tion**, articulation between first two cervical vertebræ; **A. lig'aments**, two in number, passing between those vertebræ.

Atloïdo-mastoïdeus, at-lo'id-o-mas-to-i'de-us. Obliquus superior capitis muscle.

Atloïdo-muscularis, at-lo'id-o-mus-ku-lar'is. Superior branch of occipital artery.

Atloïdo-occipital, at-lo'id-o-ok-sip'it-al. Relating to atlas and occiput. **A. mus'cle**, rectus capitis posticus minor.

Atloïdo-odontoid, at-lo'id-o-o-don'toid. Relating to atlas and odontoid process.

Atlo'ïdo-suboccipita'lis. Rectus capitis lateralis.

Atmiatria (at-me-at-re'ah), **Atmidiatria** (at-mid-e-at-re'ah), or **Atmidiat'ric** (*atmos*, vapor, *iatreia*, treatment). Treatment by fumigation or inhalation.

Atmia'try. See *Atmiatria*.

Atmic, at'mik. Relating to vapor.

Atmidiatria, at-mid-e-at-re'ah. Admiatria.

Atmidiatrics, at-mid-e-at'ricks. Admiatria.

Atmidom'eter. Atmometer.

Atmistirion, at-mis-te're-on. Vaporarium.

Atmograph, at'mo-graf (*atmos*, vapor, *grapho*, to describe). Spirograph; instrument for marking respiratory movement, as sphygmograph does movements of the pulse; the process is called *Atmog'raphy*.

Atmolutron, at-mo-lu'tron (*atmos*, vapor, *loutron*, bath). Vaporarium.

Atmolysis, at-mol'is-is (*atmos*, *lusis*, separation. Analysis of gas, vapor, or atmospheric air.

Atmometer (at-mom'e-tur, *atmos*, vapor, *metron*, measure) or **Atmidometer**, at-mid-om'e-tur. Apparatus for determining amount of humidity in the air.

At'mos. Breath.

Atmosphere, at'mos-feer (*atmos*, vapor, *sphaira*, sphere; *sphere of vapors*). Spherical mass of air surrounding the earth in every part, height of which is estimated at 15 or 16 leagues; on the surface of the earth it sensibly affects organized bodies. See *Air*. **A., compressed**, *Condensed atmosphere* or *air*. Air at a high elevation or compressed by a pneumatic apparatus; resorted to in various conditions of organic disease involving dyspnœa, as chronic bronchitis, emphysema, cardiac affections, etc. It increases amount of air entering the chest, the vital capacity, size of the chest, and force of respiration, and diminishes vascular supply to the lungs and increases arterial pressure. High altitudes have a similar effect.

Atmospher'ic. Relating to the atmosphere.

Atmospherization, at-mos-fer-i-za'shun. Conversion of venous into arterial blood by introduction of oxygen.

Atocia, ah-to'ke-ah (*a*, *tokos*, a child). Sterility. Medicines that check conception.

Atocous (at'o-kus) or **At'okous**. Sterile; without children.

Atom, ah'tum. Smallest division of an element, or smallest part capable of entering into chemical combination. **A., compo'nent**, atom which by uniting with another atom of different character forms a compound atom. **A., com'pound**, molecule. **A. elemen'tary**, atom of an elementary body; primary atom.

Atom'ic. Relating to an atom, as *A. weight*, weight of atom of one substance compared with the weight of an atom of another, taken as a standard. Hydrogen is usually accepted as such standard, its atomic weight being considered as 1; see *Elements*. **A. heat**, specific heat of atoms. **A. the'ory**, see *Theory*.

Atomicity, at-um-is'it-e. Quantivalence.

Atomization, at-um-i-za'shun. Act of reducing to minute particles, as of liquid into spray; pulverization.

Atomized, at'um-ized. See *Pulverization*.

Atomizer, at'um-i-zur. That which reduces to atoms or minute particles; apparatus for producing and throwing jet of water in fine spray, for application of medicated liquids to the surface of the throat or other parts, for disinfection, etc. See *Pulverization*.

Atomy, at'o-me. Skeleton.

Atonia, ah-ton'e-ah. Atony. **A. nutriti'va**, atrophy. **A. ventric'uli**, debility of the stomach.

Atonic, a-ton'ik. Wanting tone. Medicine capable of allaying organic excitement or irritation.

Atony, at'o-ne (*a*, *tonos*, tone). Languor; want of tone; weakness of organs, particularly those that are contractile. **A., nu'tritive**, atrophy.

Atopomenorrhœ'a (*atopos*, out of place). Vicarious menstruation.

Atox'ic (*a*, *toxicon*, poison). Not poisonous.

Atrabiliary (at-ra-bil'e-a-re) or **Atrabilious**, at-ra-bil'e-us (*ater*, black, *bilis*, bile). Melancholic and hypochondriac. **A. ar'teries, cap'sules**, and **veins**, suprarenal arteries, capsules, and veins; formation of black bile having been formerly attributed to them.

Atrabilis, at-ra-be'lis. *Black bile*, *Melancholy*. Imaginary thick, black, acrid humor, secreted by the pancreas or suprarenal capsules, causing hypochondriasis, melancholy, and mania.

Atrachelia, ah-trak-a'le-ah (*a*, *trachelos*, neck). Deficiency or malformation of the neck.

Atrachelocephalus, ah-trak-el-o-sef'a lus (*a*, *trachelos*, neck, *kephale*, head). Monster whose neck is partially or wholly deficient.

Atrachelous, ah-trak-e'lus (*a, trachelos,* neck). Devoid of neck; short-necked.

Atractenchyma, ah-trak-ten'kim-ah (*atraktos,* spindle, *chuma,* plastic material). Tissue made up of spindle-shaped cells.

Atractylis gummifera, ah-trak'til-is gum-mif'er-ah. *Gummy-rooted atractylis, Pine thistle,* ord. Compositæ, from the Mediterranean. Root, when wounded, yields milky, viscid juice, concreting into tenacious masses, chewed for same purposes as mastich. **A. lan'cea,** species from Japan and China; tea from root is tonic and stomachic. **A. ova'ta,** used in China and Japan as tonic, stimulant, diuretic, and diaphoretic.

Atragene, at-rah-ja'na. Clematis vitalba.

Atramental, at-ra-men'tal (*atramentum,* ink). Inky.

Atramentum, at-ra-men'tum (*ater,* black). Ink made of galls and sulphate of iron; astringent, and used as external application in herpetic affections. **A. suto'rium,** ferri sulphas.

Atremia, ah-tra'me-ah (immobility). Continuance in bed without sufficient sickness to warrant it. Inability to walk, stand, or sit, without loss of voluntary motion or defective mental power.

Atreselyt'ria (*atretos,* imperforate, *elutron,* vagina). Atresia of the vagina.

Atresenteria, at-ra-sen-ta're-ah (*atretos,* imperforate, *enteron,* intestine). Imperforate condition existing in any part of the intestinal canal.

Atresia, ah-tra'ze-ah (*atretos,* without aperture). Imperforation of natural opening or canal; see *Monster.* **A. a'ni** or **a'no-rec'tal,** imperforate anus; aproctia. **A. a'ni adna'ta,** imperforation of anus; congenital imperforation of intestinal canal. **A. au'ris,** adhesion of auricle to side of head, or of walls of external auditory meatus to each other. **A. i'ridis,** imperforation of iris. **A. pupil'læ,** imperforation of iris, closing the pupil. **A. vagi'næ,** imperforation of vagina; colpatresia. **A. vul'væ,** imperforation of vulva.

Atresoblepharia, at-rez-o-blef-ar'e-ah (*atretos,* imperforate, *blepharon,* eyelid). Adherence of the eyelids; symblepharon.

Atresocys'ia or **Atretocysia,** at-ret-o-sis'e-ah (*atreto, kusos,* anus). Atresia ani.

Atresometria, at-res-o-met're-ah. Imperforation of the uterus.

Atreta, at-ra'tah. Woman with atresia vaginæ.

Atretelytria, at-ret-el-it're-ah (*atreto, elutron,* vagina). Imperforation of vagina.

Atretenteria, at-ret-en-ter'e-ah (*atreto, enteron,* intestine). Imperforation of intestine.

Atretismus, at-ret-iz'mus. Atresia.

Atreto, at-ra'to (*a, treo,* to perforate). In composition, imperforate.

Atretoblepharia, at-ret-o-blef-ar'e-ah (*atreto, blepharon,* eyelid). Atresoblepharia.

Atretocephalus, at-ret-o-sef'al-us (*atreto, kephale,* head). Monster lacking natural apertures of the head.

Atretocormus, at-ret-o-kor'mus (*atreto, kormos,* trunk). Monster lacking natural apertures of the trunk.

Atretocystia (at-ret-o-sis'te-ah) or **Atretocystis** (*atreto, kustis,* bladder). Atresia of bladder.

Atretogastria, at-ret-o-gas'tre-ah (*atreto, gaster,* stomach). Atresia of either extremity of the stomach.

Atretolæmia, at-ret-o-le'me-ah (*atreto, laimos,* œsophagus). Atresia of pharynx or œsophagus.

Atretometria, at-ret-o-met're-ah (*atreto, metra,* uterus). Imperforation of uterus.

Atretopsia, at-ret-op'se-ah (*atreto, ops,* eye). Atresia of pupil.

Atretorrhinia, at-ret-or-rhin'e-ah (*atreto, rhis,* nose). Atresia of the nose.

Atretostomia, at-ret-o-stom'e-ah (*atreto, stoma,* mouth). Imperforation of the mouth.

Atreturethria, at-ret-u-re'thre-ah. Imperforation of the urethra.

Atretus, at-ra'tus. Imperforate; one whose anus or parts of generation are imperforate.

Atria, at're-ah (pl. of **Atrium,** hall of a house). Auricles of heart. **A. mor'tis,** see *Death.*

Atrices, at're-sez. Condylomata of anus.

Atrichia (ah-trik'e-ah) or **Atrichi'asis** (*a, thrix,* hair). Absence of hair; alopecia. **A. adna'ta,** see *Alopecia.* **A. seni'lis,** see *Alopecia.*

Atrichiasis, ah-trik-e'as-is. Atrichia.

Atrichosis, ah-trik-o'sis (*a, thrix,* hair). Disease attended with loss or deficiency of hair.

Atrichus, at'rik-us. One who has lost his hair.

Atrici, at'ris-e (*atrium,* an entry). Small sinuses in vicinity of anus, not penetrating rectum.

A'trio-ventric'ular. Auriculo-ventricular, as A.-v. ganglion, valves, etc.

Atriplex (at're-pleks) **fœ'tida.** Chenopodium vulvaria. **A. horten'sis,** ord. Chenopodiaceæ. Herb and seed are antiscorbutic. *A. alimus, A. portulacoides,* and *A. patula* have similar properties. **A. lacinia'ta,** A. patula. **A. Mexica'na,** Chenopodium ambrosioides. **A. odora'ta,** Chenopodium botrys. **A. ol'ida,** Chenopodium vulvaria. **A. pat'ula,** *Spreading orache;* indigenous; expressed juice is cathartic; used like gamboge in dropsy and asthma. **A. Purshia'na,** A. patula.

Atrium, ah'tre-um (a hall). Ampulla; sinus; auricle of heart; lower part of cavity of tympanum; sinus venosus. **A. bur'sæ omenta'lis,** contracted cavity of peritoneum in vicinity of foramen of Winslow. **A. cor'dis dex'trum,** right auricle of heart. **A. c. sinis'trum,** left auricle of heart. **A. laryn'gis,** portion of larynx above superior vocal cords. **A. poste'rius,** left auricle of heart. **A. pulmona'lis,** left auricle of heart. **A. tympan'icum,** part of cavity of tympanum directly opposite opening of external meatus. **A. vagi'næ,** vestibulum. **A. vena'rum cava'rum,** right auricle.

Atropa, at'ro-pah (*atropos,* immutable; goddess of destiny, from its fatal effects). **A. belladon'na,** *Belladonna, Deadly nightshade, Common dwale;* perennial plant, indigenous in Europe and Asia, ord. Solanaceæ. Leaves, *Belladonnæ folia* (Ph. U. S. and Br.), and root, *B. radix* (Ph. U. S. and Br.), are powerfully narcotic and anodyne, also antispasmodic, diaphoretic, diuretic, and mydriatic. Employed in nervous and spasmodic diseases; externally, antigalactic; in neuralgia, cardiac pains, painful uterine affections, etc., in plaster or extract. Belladonna is usually given in form of extract or of atropine. Dose, gr. ½ to gr. ij of the powdered leaves. Atropine is the active principle; see *Atropine.* **A. mandrag'ora,** *Mandrake,* growing in Europe; narcotic; used as poultice to indolent swellings.

Atrophia, at-rof'e-ah. Atrophy, tabes. **A. ablactato'rum,** weaning brash, cholera infantum. **A. an'glica,** A. nervosa. **A. cer'ebri,** atrophy of the brain. **A. cor'dis,** heart, atrophy of. **A. den'tis,** atrophy of the teeth. **A. glandula'ris,** tabes mesenterica. **A. hep'atis,** atrophy of liver. **A. infant'um,** atrophy of children; tabes mesenterica. **A. intestino'rum,** intestinal atrophy. **A. lactan'tium,** atrophy of nursing women. **A. lie'nis,** atrophy of spleen. **A. mesenter'ica,** tabes mesenterica. **A. musculo'rum lipomato'sa,** pseudo-muscular hypertrophy. **A. nervo'sa,** loss of flesh, appetite, etc., without positive disease. **A. spina'lis,** ataxia, progressive locomotor. **A. testic'uli,** atrophy of testicle. **A. un'guium,** atrophy of nails.

Atrophic, at-rof'ik. Relating to atrophy, as **A. na'sal catarrh,** offensive odorous discharge from nose, with atrophy of mucous lining and turbinated bones. **A. spi'nal paral'ysis,** inflammation of gray matter of anterior part of spinal cord.

Atrophici (at-rof'is-e) **mor'bi.** Diseases of nutrition, characterized by atrophy and debility

Atrophoderma, at-ro-fo-dur'mah (*atrophia, derma,* skin). Atrophy of the skin; atrophia cutis.

Atrophy, at'rof-e (*a, trophe,* nourishment). Defective nutrition; progressive morbid diminution in bulk of whole body or part. **A., acute yel'low, of liv'er,** disease of nervous system marked by delirium, coma, etc., following jaundice, with general glandular degeneration, and with atrophy of liver, usually fatal. **A., amphibles'troid,** A. of retina. **A., brown,** A.

of liver or spleen of old people. **A., concen'tric,** A. of organ containing cavities, as heart, diminishing calibre of such cavities. **A., Cruveil'hier's,** atrophy, progressive muscular. **A., cyanot'ic,** A. of liver from obstructed circulation through it. **A., degen'erative,** A. with degeneration and absorption of material. **A., fat'ty,** A. with fatty degeneration. **A., fat'ty mus'cular,** pseudo-hypertrophic spinal paralysis. **A., gran'ular,** A. from chronic interstitial inflammation of an organ, with excess of granular matter. **A., gray,** degeneration of optic disk, which becomes grayish; resulting from retinitis or organic disease of central nervous system. **A., hered'itary mus'cular,** variety of pseudo-hypertrophic spinal paralysis. **A., in'fantile,** tabes mesenterica. **A., lin'ear,** form of morphœa, occurring in bands or lines, chiefly about forehead, arms, and legs. **A., lipo'matous mus'cular,** paralysis, pseudo-hypertrophic. **A. mesenter'ica,** tabes mesenterica. **A., mus'cular** or **myopath'ic,** muscular dystrophy; atrophy of the muscles occurring in early life, and not connected with any lesion of the nervous system. **A., necrobiot'ic,** A., numerical. **A. of nerve, A., neu'ral,** A. of nerve, from thickening or inflammation. **A., neurot'ic,** A. from affection of trophic nerves of a part. **A., numer'ical,** advanced stage of simple atrophy, some elements actually perishing. **A. of op'tic nerve,** see *Optic nerve.* **A., passive,** A. from pressure, lack of nutrition, exhausting visceral diseases, etc. **A., pig'mentary,** form of a. in which there is deposit of yellow pigment in the fat-cells. **A., pres'sure,** atrophy from direct pressure on a part. **A., progres'sive fa'cial,** partial or unilateral a. of face. A. of one side of face, generally the left, with discoloration, loss or waste of fatty, bony, or cartilaginous parts; perhaps due to lesion of cervical portion of sympathetic system. **A., progres'sive mus'cular,** *Cruveilhier's atrophy* or *paralysis* or *disease, Creeping palsy, Peripheric paralysis, Lead palsy without lead, Wasting palsy.* Rare malady, in which muscles become so greatly atrophied that they cannot perform their functions, consisting in granular degeneration of voluntary muscles, dependent on lesion of anterior roots of spinal nerves or atrophy of cells of gray matter of anterior horns of spinal cord. **A., progres'sive ner'vous,** A. of roots of spinal nerves from compression of arachnoid membrane by fibrous bands. **A., qual'itative,** degeneration. **A., quan'titative,** A., simple. **A., red,** A., cyanotic; acute cirrhosis of liver. **A. of ret'ina,** see *Optic nerve.* **A., rheumat'ic,** muscular atrophy consequent on rheumatism, involving whole muscular mass, without transformation. **A., rig'id,** rigid contraction of muscles atrophied from exhaustion, after long-continued spasm, from inflammation or rheumatism. **A., se'nile,** A. of old persons. **A., se'rous,** A. in which there is transudation of serum, the fat having disappeared. **A., sim'ple,** A. not dependent on pathological changes or conditions. **A., spi'nal,** ataxia, locomotor. **A. trophoneurot'ic,** A. from defective nervous supply or distribution, as in muscular atrophy from lesion of a nerve. **A., unilat'eral fa'cial,** A., progressive facial. **A., va'ricose,** A., cyanotic. **A., yellow, of liver,** A., acute yellow.

Atropia, at-ro'pe-ah. Atropine. **A. o'leate,** made by dissolving atropine in oleic acid and olive oil; used in preparation of suppositories instead of extract of belladonna. **A. sal'icylate,** atropiæ salicylas. **A. san'toninate,** used as substitute for atropia sulphate. **A. sul'phate,** see *Atropine.* **A. vale'rianate,** see *Atropine.*

Atro'piæ sal'icylas. Salicylate of atropia; mydriatic. **A. santoni'nas,** atropia santoninate. **A. sul'phas,** see *Atropine.* **A. valerian'as,** atropia valerianate.

Atropina, at-ro-pe'nah. Atropine.

Atropi'næ sul'phas. See *Atropine.*

Atropine, at'ro-peen, *Atropia, Atropina* (Ph. U. S. and Br.), *Atropium, Atropinum.* Active principle of Atropa belladonna, $C_{17}H_{23}NO_3$; white, bitter alkaloid, intensely poisonous, soluble in 600 parts of water at 15° C. or 59.35° F.; in 35 parts of boiling water; very soluble in alcohol. It may also be obtained from stramonium. It dilates the pupil, and its therapeutic effects are the same as those of belladonna; prescribed also hypodermically in dose of gr. $\frac{1}{100}$. Dose, internally, gr. $\frac{1}{75}$. Sulphate of atropine is officinal, *atropinæ sulphas* (Ph. U. S. and Br.), $(C_{17}H_{23}NO_3)_2H_2SO_4$. More soluble than atropine, but medicinal effects analogous. Valerianate of atropine, *atropiæ valerianas,* has also been used. **A. o'leate,** see *Atropia* and *Oleate.*

Atropinization, at-ro-pin-iz-a'shun. Process of inducing full effects of atropia.

Atropi'num. Atropine. **A. sulphu'ricum,** atropia sulphate. **A. valerian'icum,** atropia valerianate.

Atropism, at'ro-pizm. Constitutional effects of belladonna or atropine.

Atro-sanguineous, at-ro-san-gwin'e-us (*ater,* black, *sanguis,* blood). Color of dark-red blood.

Atrosine, at'ro-seen. Red coloring matter in atropa belladonna.

Attack, at-tak'. Access; sudden invasion or onset of disease; seizure.

At'tar of roses. See *Rosa centifolia.*

Attenuants, at-ten'u-ants (*tenuis,* thin). Medicines which augment fluidity or diminish action of other remedies.

Attenuation, at-ten-u-a'shun. Thinness, emaciation, system of diet or medication to reduce corpulency. Term used by homœopaths in sense of dilution or division of remedies into infinitesimal doses. Process of weakening the activity of a micro-organism by cultivation, etc.

At'tic. Pyramidal cavity in tympanum opening into antrum, partially filled by malleus and incus. **A., tympa'nic,** attic.

Attitude, at'te-tude. Situation, position of body, posture, often enabling physician to pronounce at once upon character of disease, degree of nervous or cerebral power, etc. **A., crucifix'ion,** shape of body sometimes assumed by limbs and trunk in hystero-epilepsy.

Attollens aurem (at-tol'lens aw'rem) or **Auric'ulæ** (*at, tollo,* to raise). Muscle of ear, arising thin, broad, and tendinous from tendon of occipito-frontalis, and inserted into upper part of ear opposite antihelix; it raises the ear. **A. glan'dulæ thyroi'deæ,** portion of inferior constrictor muscle of pharynx passing to thyroid gland. **A. hu'meri** or **hu'merum,** deltoid. **A. lin'guæ,** myloglossus. **A. maxil'lam tempora'lis,** temporalis. **A. max'imus,** temporo-auricularis externus. **A. oc'uli** or **oc'ulum,** rectus superior oculi. **A. os'sis hyoï'dei,** genio-hyoideus. **A. scap'ulam,** levator anguli scapulæ. **A. se'dem,** levator ani. **A. superio'rem pal'pebram,** levator palpebræ superioris.

Attonitus, at-ton'it-us (*attono,* to stun). Stupefied; stricken with apoplexy. **A. mor'bus,** apoplexy.

Attraction (at-trak'shun), **capil'lary.** Attraction which a solid body exerts upon fluids. **A. of cohe'sion,** cohesion. **A., elec'tive,** chemical affinity. **A., elec'trical,** attraction shown by substances for one another when charged with an opposite variety of electricity. **A. of gravita'tion,** see *Gravity.*

Attractivus (at-trak-te'vus) or **Attractorius,** at-trak-to're-us. Attrahent.

Attrahens, at'tra-hens. Attrahent. **A. al'æ na'si,** compressor naris. **A. au'rem, auric'ulæ,** or **au'ris,** anterior auris.

Attrahent, at'tra-hent. Attracting or drawing toward, as remedies attracting fluids to parts to which they are applied; blisters and rubefacients, for example,

Attrita, at-tre'tah (*at, tero,* to rub) or **Attri'tus.** Chafing.

Attrition, at-trish'un. Friction or bruising; chafing; cardialgia accompanied with panting; violent contusion.

Atypic (a-tip'ik) or **Atyp'ical** (*a, tupos,* type). Not having or being a type; irregular, as atypic or irregular intermittent.

Atypos, at'ip-os. Erratic; typic; crippled.

Au, as a prefix, see *A.*

Auansis, aw-an'sis (desiccation). Morbid dryness.

Auchen, aw'ken (neck). In composition, neck; neck of any organ, as uterus. See *Collum*.

Aucheniatria, aw-ken-e-at-re'ah (*auchen*, *iatreia*, treatment). Treatment of diseases of the throat.

Auchenister, aw-ken-is'ter (*auchenizo*, to decapitate). Instrument for fœtal decapitation.

Auchen'ium. Part of neck below the nucha.

Auchenomelus, aw-ken-o-me'lus (*auchen*, *melos*, member). Monster having parts abnormally united to the neck.

Auchenorrheuma, awk-en-or-rhu'mah (*auchen*, *rheuma*, rheumatism). Rheumatism of neck; torticollis.

Auchenoschisis, aw-ken-os'kis-is (*auchen*, *schisis*, fissure). Fissure of the neck or of cervical vertebræ.

Auchenosphinxis, aw-ken-o-sfinks'is (*auchen*, *sphinxis*, constriction). Strangulation.

Auchenozoster, aw-ken-o-zos'ter (*auchen*, *zoster*, girth). Herpes zoster of neck.

Auchenydrocele, aw-ken-id-ro-se'le (Eng., aw-ken-id'ro-seel). Hydrocele of the neck or cystic goitre.

Aucheticus, aw-ket'ik-us (*auchen*, neck). One affected with stiff neck.

Au'da Brasilien'sis. Plant of S. America, whose seeds are purgative.

Aud'e. Voice; sound.

Audimeter (aw-dim'et-ur) or **Audiometer** (*audio*, to hear, *metron*, measure). Instrument to test degree of hearing.

Audiphone, aw'de-fone (*audio*, to hear, *phone*, sound). Instrument by means of which sounds are made to pass through cranial walls to auditory nerve.

Audition, aw-dish'un (*audio*, to hear). Hearing; act of hearing; sensation arising from impression made on auditory nerves by vibrations of air produced by sonorous body. Audition may be active or passive; hence difference between listening and simply hearing. Auscultation.

Auditory, aud'it-o-re. Relating to audition or the ear. **A. a'rea**, centre in the cerebrum in which sense of hearing is presumed to be located; not positively known. **A. ar'teries** and **veins**, vessels entering the auditory canals; they are the external auditory artery, given off by the styloid, a branch of external carotid; internal auditory artery, branch of basilary artery accompanying auditory nerve, and distributed to it. The auditory veins empty into internal and external jugulars. **A. au'ra**, auditory impression preceding epileptic attack. **A. bulb**, membranous labyrinth of ear. **A. canal, external**, canal commencing at bottom of concha, at foramen auditivum, passing inward, forward, and downward, and terminating at membrana tympani; is partly cartilaginous, partly osseous, partly fibrous. **A. canal, inter'nal**, situate on posterior surface of pars petrosa of temporal bone. From foramen auditivum internum, where it commences, it passes forward and outward, and terminates by a *cul-de-sac*, perforated by many holes, *maculæ cribrosæ*, one of which is orifice of aquæductus Fallopii; the others communicate with the labyrinth. **A. cells**, cells in delicate structure of internal ear, having upon them hair-like prolongation of epithelial cells, A. hairs or cirri. **A. cen'tre**, A. area. **A. hairs**, see *A. cells*. **A. mea'tus**, see *Meatus*. **A. nerve**, portio mollis of seventh pair, arises from corpus restiforme, from floor of fourth ventricle, and by means of white striæ from sides of calamus scriptorius. As it leaves the encephalon it forms a flattened cord, and proceeds with the facial nerve through the foramen auditivum internum, and as far as the bottom of the meatus, where it separates from the facial, dividing into two branches, one going to the cochlea, *cochlear nerve*, the other to the vestibule and semicircular canals, *vestibular nerve*. **A. nu'clei**, nuclei of origin of auditory nerve. **A. os'sicles**, small bones in the middle ear. **A. plate**, roof of external meatus of ear, extending from beneath squamous process inward to tympanum. **A. pro'cess**, rough lip of bone at entrance of external meatus, for attachment of auricle. **A. roots**, roots of auditory nerve. **A. sac**, depression in epiblast on each side of the after-brain in the embryo. **A. teeth**, teeth-like processes in cochlea of the ear. **A. veins**, see *A. arteries*. **A. ver'tigo**, Menière's disease. **A. ves'icles**, minute sacs in lower animals substituting more complicated apparatus of hearing in higher animals and man. Part of external germ-layer of fœtus, afterward to be developed into the internal ear.

Auditus, aw-de'tus. Hearing.

Au'erbach, gan'glion or **plex'us of**. See *Ganglion of Auerbach*.

Auge, aw'ge. Reservoir into which liquids flow in interrupted manner, such as the ventricles and auricles of the heart.

Aug'iar. See *Araroba*.

Augmentation, awg-men-ta'shun (*augeo*, to increase). Accretion; stage of disease in which symptoms go on increasing.

Augnathus, awg-nath'us (*au*, again, *gnathos*, jaw). Monster with double or supplementary lower jaw.

Aula, aw'lah. Y-shaped canal between third and lateral ventricles.

Aulacomele, aw-lak-o-me'le (*aulax*, furrow, *mele*, probe). Grooved probe.

Auliscus, aw-lis'kus (dim. of **Aulus**). Canula; fistula of small size.

Aulix, aw'lix. Shallow furrow on side of third ventricle of brain; fissure of Monro.

Aulus, aw'lus (*aulos*, fistula or pipe). Canula; fistula; foramen; external orifice of vagina.

Aura, aw'rah. Vapor or emanation from a body, surrounding it like an atmosphere. Sensation of a light vapor in some diseases, appearing to set out from the trunk or limbs, and rise toward the head. It precedes attacks of epilepsy and hysteria; *A. epileptica*, *A. hysterica*. **A., elec'tric**, aural sensation of part subjected to discharge of static electricity. **A. epilep'tica**, see *Aura*. **A. hyster'ica**, see *Aura*. **A., mo'tor**, convulsive phenomena preceding at times an epileptic fit. **A. podag'rica**, sensation experienced preceding an attack of gout. **A. san'guinis**, odor exhaled by blood newly drawn. **A. sem'inis**, volatile principle fancied to exist in sperm, and to be the fecundating agent; emanation from semen supposed by some to be capable of effecting fecundation. **A., sen'sory**, aura associated with sensations of cold or heat, pricking, pain or numbness, headache, etc. **A., vasomo'tor**, A. with local pallor, numbness, heat, etc. **A. vertigino'sa**, vertigo preceding epileptic attack. **A. vita'lis**, vital principle.

Au'ral (*auris*, ear). Relating or appertaining to the ear or to an aura. **A. med'icine** and **sur'gery**, medical and surgical treatment of diseases of the ear. **A. ver'tigo**, Menière's disease.

Aurantia Curassaventia, aw-ran'she-ah ku-ras-saven'she-ah (Curassoa apples or oranges). Immature oranges, checked in their growth; grateful, aromatic, bitter, devoid of acidity, especially when infused in wine or brandy; also used for issue peas. See *Citrus aurantium*.

Aurantii amari cortex, aw-ran'she-e am-ah're kor'teks. See *Citrus aurantium*. **A. cor'tex**, see *Citrus aurantium*. **A. flo'res**, see *Citrus aurantium*. **A. flo'ris a'qua**, see *Citrus aurantium*. **A. fruc'tus**, bitter orange; ripe fruit of Citrus vulgaris; tonic and stomachic.

Aurantium, aw-ran'she-um. Citrus aurantium.

Aureliana Canadensis, aw-ra'le-an-ah kan-ad-en'sis. Aralia quinquefolia, Panax quinquefolium.

Aureola, aw-re'o-lah. Areola.

Auri (gen. of **Aurum**) **et ammo'nii chlor'idum**. See *Gold*. **A. bro'midum**, gold, bromide of. **A. chlore'tum**, gold, muriate of. **A. chloretum cum chloreto natrii**, aw're klor-a'tum kum klor-a'to nat're-e, see *Gold*. **A. chlo'ridum**, gold, muriate of. **A. cyan'idum**, see *Gold*. **A. cyanure'tum**, see *Gold*. **A. io'didum**, see *Gold*. **A. iodure'tum**, see *Gold*. **A. monocyan'idum**, gold, monocyanide of. **A. mu'rias**, gold, muriate of. **A. et na'tri chlorure'tum**, see *Gold*. **A. nitromu'rias**, see *Gold*. **A. ox'idum**, see *Gold*. **A. et so'dii chlo'ridum**, gold and sodium, chloride of. **A. terchlo'ridum**, see *Gold*. **A. tercyan'idum** or **tricyan'idum**, see *Gold*. **A. terox'idum**, see *Gold*.

Auric acid, aw'rik as'id (*aurum*, gold). Gold trihydroxide; also, gold trioxide.

Auricle, awr'ik'l (dim. of **Auris**). Pavilion of the ear.

Aur'icles of the heart. Two cavities, one right, the other left, each communicating with the ventricle of its side. They receive the blood from every part of the body. Into the right auricle two venæ cavæ and coronary vein open; into the left, four pulmonary veins. The right auricle has been called *sinus of venæ cavæ, sinus dexter cordis;* the left, *sinus of pulmonary veins, sinus sinister cordis.* Foliated or dog's-ear portion of each auricle is called *appendix auriculæ.*

Auricula, aw-rik'u-lah. Auricle. **A. cor'dis**, auricle of heart; appendix of auricle. **A. in'fima**, lobule of ear. **A. Ju'dæ**, Peziza auricula. **A. mu'ris**, Hieracium pilosella. **A. mu'ris ma'jor**, Hieracium murorum.

Auricular, aw-rik'u-lar. Belonging to or resembling the ear or the auricle of the heart. **A. ang'les**, angles formed by meeting of lines from external meatus of ear to special points on skull. **A. appen'dage** or **appen'dix**, see *Auricles of heart.* **A. arcs**, arcs indicating extent of space between two lines forming auricular angles. **A. ar'teries** and **veins** are anterior and posterior. The former arise from temporal artery, and are distributed to meatus auditorius externus and pavilion of ear. The posterior auricular artery is given off by the external carotid, from which it separates in the parotid gland. Anterior and posterior auricular veins open into temporal and external jugular. **A. diam'eter**, inferior parietal diameter of skull. **A. fin'ger**, little finger, so called because readily introduced into the meatus auditorius. **A. fis'sure**, fissure between the tympanic bone and mastoid process. **A. fora'men**, external opening of meatus auditorius externus. **A. glands**, lymphatic glands behind and beneath the ear. **A. height**, distance from upper edge of outer opening of external auditory meatus to apex of cranium. **A. in'dex**, measurement of auricle of ear, taken from proportionate breadth to height. **A. mus'cles**, muscles attached to the external ear. **A. nerves** are: 1. Auricular branch, zygomato-auricular, an ascending branch of cervical plexus; ramifies and spreads over the two surfaces of the pavilion. 2. Auricular or superficial temporal, given off from inferior maxillary; ascends between condyle of jaw and meatus auditorius externus; sends numerous filaments to meatus and pavilion, and divides into two twigs accompanying branches of temporal artery and distributed to integuments of head. There is also a posterior auricular furnished by the facial. **A. point**, middle of opening of external meatus; or, in case of measurement of auricular height, middle of upper or lower edge of the meatus. **A. ra'dii**, lines projected from middle of external meatus to certain points on the skull. **A. sep'tum**, partition between the two auricles of the heart. **A. si'nus**, cavity in right auricle of heart, between the two venæ cavæ, principal cavity of left auricle. **A. sul'cus**, groove or sulcus in the jugular fossa for auricular nerves from vagus. **A. sur'face**, ear-shaped surfaces on sacrum and ilium. **A. veins**, see *A. Arteries.*

Auricularia sambuci, aw-rik-u-lar'e-ah sam-bu'se. Peziza auricula.

Auricularis, aw-rik-u-lar'is. Auricular. **A. ante'rior**, anterior auris. **A. a. profun'dus**, small muscle from temporal bone to tragus. **A. mag'nus**, auricular nerve. **A. poste'rior**, retrahens aurem. **A. supe'rior**, attollens aurem.

Auriculo-bregmatic, aw-rik'u-lo-breg-mat'ik. Relating to auricle of ear and point of junction of coronal and sagittal sutures, as *Auriculo-bregmatic diameter* or *radii.*

Auriculo-cranial (aw-rik'u-lo-kra'ne-al), **Auriculo-facial** (aw-rik'u-lo-fa'she-al), **Auriculo-frontal** (aw-rik'u-lo-fron'tal), **Auriculo-occipital** (aw-rik'u-lo-ok-sip'it-al), and **Auriculo-parietal** (aw-rik'u-lo-par-i'et-al) **angles** are angles, taking the centre of the external meatus as the constant point, measuring respectively the cranium, face, forehead, occiput, and junctions of lambdoid and sagittal sutures and of sagittal and coronal sutures.

Auriculo-glossus, aw-rik'u-lo-glos'sus. Styloglossus, arising from external meatus.

Auriculo-infraorbital plane, aw-rik'u-lo-in-frah-or'bit-al plane. Cranial plane formed by projecting lines from top of auricular foramen to inferior edge of orbit.

Auriculo-metallic, aw-rik'u-lo-me-tal'lik. Term applied to metallic sound heard on auscultation of heart.

Auriculo-occipital (aw-rik'u-lo-ok-sip'it-al) **angle.** See *Auriculo-cranial.*

Auriculo-parietal (aw-rik'u-lo-par-i'et-al) **angle.** See *Auriculo-cranial.*

Auriculo-spinal (aw-rik'u-lo-spi'nal) **plane.** Plane so projected as to pass through two auricular points and spinal or subnasal points.

Auriculo-temporal (aw-rik'u-lo-tem'por-al) **muscle.** Attrahens aurem and attollens aurem muscles viewed as one muscular mass. **A.-t. nerve**, branch of inferior maxillary to auricle and temporal bone.

Auriculo-ventricular, aw-rik'u-lo-ven-trik'u-lar. Belonging to auricles and ventricles of heart. Tricuspid and mitral valves are auriculo-ventricular valves.

Auriculo-zygomatic, aw-rik'u-lo-zig-o-mat'ik. Relating to external ear and zygoma.

Auriga, aw-re'gah. Lobus Spigelii. Bandage for the ribs.

Aurigenous (aw-rij'en-us) **disease.** Jaundice.

Aurigo, aw-re'go (*aurum*, gold). Icterus. **A. neophyto'rum**, icterus infantum. **A. typho'des**, yellow fever.

Aurilave, aw're-lave (*auris*, ear, *lavo*, to wash). Instrument for cleansing external ear.

Auripigmentum, aw-re-pig-men'tum (*aurum*, gold, *pigmentum*, paint.) Orpiment. **A. ru'brum**, realgar.

Auripunc'ture. Puncture of membrane of tympanum.

Au'ris. Ear.

Auriscalpium, aw-re-skal'pe-um (*auris*, *scalpo*, to scrape). Ear-pick.

Auriscope (aw're-skope) or **Au'roscope** (*auris*, *skopeo*, to view). Instrument for exploring the ear; otoscope.

Aurist, aw'rist. Ear-doctor, ear-surgeon; one who occupies himself with diseases of the ear and their treatment.

Aurium fluctuatio, aw're-um fluk-tu-ah'she-o. Bombus. **A. marmora'ta**, cerumen. **A. sib'ilus**, bombus. **A. son'itus**, ringing or buzzing in the ears. **A. sor'des**, cerumen. **A. susur'rus**, ringing or buzzing in the ears.

Auro-natrium chloratum, aw'ro-nat're-um klor-at'um. Chloride of gold and sodium.

Auroscope, aw'ro-skope. Auriscope.

Aurugo, aw-ru'go (*aurum*, gold). Icterus.

Aurum, aw'rum. Gold. **A. chlora'tum**, gold, muriate of. **A. chlora'tum natrona'tum**, see *Gold.* **A. folia'tum**, gold-leaf. **A. lepro'sum**, antimonium. **A. in libel'lis**, gold-leaf. **A. lima'tum**, see *Gold.* **A. muriat'icum**, see *Gold.* **A. muriat'icum natrona'tum**, see *Gold.* **A. musi'vum**, sulphuret of tin, deutosulphuret or persulphuret of tin; used in some empirical preparations. **A. ni'tro-muriat'icum**, see *Gold.* **A. oxyda'tum**, see *Gold.* **A. oxydula'tum muriat'icum**, gold, muriate of. **A. sal'itum**, gold, muriate of.

Auscultate, aws'kul-tate (*ausculto*, to listen). To practise auscultation. To auscult is used with same signification.

Auscultation, aws-kul-ta'shun. Act of listening, to appreciate different sounds heard in the chest or elsewhere. Used in diagnosis of diseases of heart, lungs, etc., either by aid of a stethoscope (*Mediate auscultation*) or by direct application of ear to chest (*Immediate auscultation*). **A., cepha'lic** or **cer'ebral**, A. practised to detect unusual sounds in the circulation through the brain. **A., imme'diate**, see *Auscultation.* **A., me'diate**, see *Auscultation.* **A., obstet'ric**, A. of pregnant uterus, or of abdomen, to recognize fœtal

or other sounds. **A. tube,** stethoscope. **A., vo'cal,** A. of vocal sounds heard in auscultating the chest.

Auscultator, aws'kul-ta-tor. One who practises auscultation or has skill in its practice.

Auscultatory (aws-kul'ta-to-re) or **Aus'cultory.** Relating to auscultation. **A. percus'sion,** see *Acouophonia.*

Australian (aws-tra'le-an) **fe'ver tree.** Alstonia constricta. **A. gum,** variety of Acacia from Australia. **A. ki'no,** juice from Eucalyptus tree of Australia. **A. pep'per,** Piper novæ Hollandiæ. **A. sas'safras,** Atherosperma moschata.

Autalgia, awt-al'je-ah (*auto, algos,* pain). Localized pain. **A. doloro'sa,** facial neuralgia; pleurodynia. **A. prurigino'sa,** itching. **A. ver'tigo,** vertigo.

Autechoscope, awt-ek'o-skope (*autos,* self, *eche,* sound, *skopeo,* to examine). Instrument for self-auscultation.

Autemesia (awt-em-a'ze-ah) or **Auteme'sis** (*auto, emesis,* vomiting). Spontaneous idiopathic vomiting.

Autempresmus, awt-em-prez'mus (*auto, empresmos,* burning). Spontaneous combustion.

Auteunuchus, awt-u'nu-kus. One who has practised self-castration.

Authemeron, aw-them'er-on (*auto, hemera,* day). Medicine curing at once, in a day.

Authygiansis, aw-thij-e-an'sis (*auto, hugiazo,* to heal). Healing power of nature.

Auto, awt'o (*autos,* self). As a prefix, self.

Autocheir or **Autochir,** awt'o-kir (*auto, cheir,* hand). A self-murderer; a suicide.

Autocheiria or **Autochiria,** awt-o-kir'e-ah. Suicide.

Autochthonous, awt-ok'thon-us (*auto, chthon,* land). Indigenous. Formed at point where found, as a clot. See *Thrombosis.* **A. clot,** thrombosis.

Autocinesis, awt-o-sin-a'sis (*auto, kinesis,* motion). Voluntary motion; motion without muscular or contractile fibres, as of spermatozoa, white corpuscles, etc.

Autoclave, awt'o-klave (*auto, clavis,* key). Self-closing, as erection closing channels of egress of the blood.

Autocrasy, awt-ok'ra-se (*auto, kratos,* strength). Independent force; action of vital principle or of instinctive powers.

Autocratia (aw-to-krat-e'ah) or **Autocratoria,** aw-to-krat-o're-ah. Autocrasy; vis medicatrix naturæ.

Autoctonia, awt-ok-ton'e-ah (*auto, ktonos,* murder). Suicide.

Autodigestion, awt-o-di-jest'yun. Self-digestion, as of the stomach after death.

Autogenesis (awt-o-jen'e-sis) or **Autogen'ia** (*auto, genesis,* generation). Spontaneous generation; self-reparation, as after division of a nerve.

Autogenetic, awt-o-jen-et'ik. Relating to autogenesis or spontaneous generation.

Autogenous, awt-oj'en-us (same etymon). Relating to spontaneous generation, or to parts or elements developed from distinct and independent centres. Epiphyses that are outgrowths are *exogenous;* those produced from epiphyses are *autogenous.* **A. diseases,** diseases due to pathological condition of some cell or cells of the body, and not to any cause from without.

Autographism, aut'o-graf-ism (*auto, grapho,* to write). Condition of skin sometimes confounded with urticaria, hence called artificial urticaria, in which lines or designs can be traced on the reddened surface.

Auto-infection, awt'o-in-fek'shun. Self-infection from poison generated in one's own body.

Auto-inoculation, awt'o-in-ok-u-la'shun. Self-inoculation.

Auto-intoxication, aw'to-in-toks-e-ka'shun. Self-intoxication, or poisoning from causes within one's self.

Autolabis, awt-ol'ab-is (*auto, labis,* forceps). Self-closing forceps.

Autolaryngoscopy, awt-o-lar-in-gos'ko-pe. Self-inspection of the larynx by aid of a laryngoscope.

Autolith'otome (*auto, lithos,* stone, *tome,* incision). Automatic instrument for lithotomy.

Autolithotomy, awt-o-lith-ot'o-me (*auto, lithos,* stone, *tome,* incision). One who operates on himself for stone.

Automatic, awt-o-mat'ik (*automatos,* spontaneous). That which acts of itself. Automatic movements are those executed without volition.

Automatism, awt-om'at-izm. Condition of brain or nervous system in which involuntary actions are performed, as during revery. Automatic action or movement.

Autonomy, awt-on'o-me (*auto, nomos,* law). Mechanism of an organized body governed by its own laws.

Autonyctobatia (awt-o-nik-to-bat'e-ah) or **Autonyctobate'sis** (*auto, nux,* night, *baino,* to go). Somnambulism.

Auto-ophthalmoscopy, awt-o-of-thal'mos-ko-pe (*auto, ophthalmos,* eye, *skopeo,* to see). Self-examination of the eye with an ophthalmoscope.

Autopath'ic. Relating to disease arising from causes within the body.

Autopepsia, awt-o-pep'se-ah (*auto, pepto,* to concoct). Self-digestion, as of the stomach after death.

Autophagism (awt-of'a-jism) or **Autoph'agy** (*auto, phago,* to eat). Feeding on one's self, as when deprived of due amount of food.

Autophia, awt-of'e-ah. Autopsy.

Autophonia, awt-o-fo'ne-ah (*auto, phonos,* murder). Autophony; suicide.

Autophonici (mor'bi), awt-o-fon'e-se. Suicidal lesions.

Autophonomania, awt-o-fo-no-man'e-ah. Suicidal insanity.

Autophony, awt-of'o-ne (*auto, phone,* voice). Auscultatory sign, consisting in noting character of observer's own voice while speaking with head placed close to patient's chest; a diagnostic method called *Heautophon'ics.* Morbid state of hearing, in which speaker's own voice is over-distinctly heard by him.

Autophthalmoscopy, awt-of-thal'mos-ko-pe. Autoophthalmoscopy, as by an *Autophthal'moscope,* arranged for self-inspection.

Autophysiotherapeia (awt-o-fiz-e-o-ther-ap-e'ah) or **Autophysiotherapi'a** (*auto, phusis,* nature, *therapeia,* treatment). Cure by vital powers or powers of nature.

Autoplastic, awt-o-plas'tik (*auto, plastikos,* formative). Relating to autoplasty or plastic surgery.

Autoplastice (awt-o-plas'te-se) or **Autoplasty,** awt'o-plas-te. Restoration of lost parts, as by transplantation from another part.

Autopsia (awt-op'se-ah) or **Au'topsy** (*auto, opsis,* vision). Self-inspection. Usually applied to **A. cadaver'ica,** attentive examination after death; examination post-mortem, *Necroscopy, Necropsy,* to investigate causes of death. **A. cadaver'ica lega'lis,** post-mortem examination for medico-legal purposes.

Autopsy, awt'op-se. See *Autopsia.* **A. wounds,** see *Dissecting wound.*

Autorrhinoscopy, awt-or-rin-os'ko-pe (*auto, rhis,* nose, *skopeo,* to see). Self-examination of the nose, or with a rhinoscope.

Autoscopy, awt-os'ko-pe (*auto, skopeo,* to view). Self-inspection; autopsy.

Autosite, awt'o-site (*auto, sitos,* food). Single monster, capable of deriving nourishment from its own organs. Organism on which there is parasitic growth.

Autos'padon (*auto, spadon,* eunuch). Self-castrator.

Autospeculum, awt-o-spek'u-lum (*auto, speculum*). Vaginal speculum which patient may insert herself.

Autostethoscope, awt-o-steth'o-skope. Instrument for self-auscultation.

Autostylic, awt-o-sti'lik (*auto, stulos,* support). Articulated with the skull without the hyoid arch.

Autosuggestion, awt-o-suj-jest'yun. Psychological suggestion based on reviving previous impressions.

Autotherapia, awt-o-ther-ap-e'ah (*auto, therapeuo,* to cure). Spontaneous cure; vis medicatrix naturæ.

Autotomy, awt-ot'o-me (*auto, tome,* incision). Self-mutilation.

Autotoxæmia, awt-o-toks-e'me-ah (*auto, toxicum,* poison, *haima,* blood). Self-poisoning from sources within one's own body.

Autotransfusion, awt-o-trans-fu'zhun. Process of

using tight bandages to lower limbs in active hemorrhages or operations.

Autumnal, aw-tum'nal. Relating to autumn; name given to malarial fevers.

Auxesis, awks-a'zis. Augmentation, increase.

Auxiliary, awks-il'i-a-re (*auxilium*, aid). Assisting; adjuvant. **A. lig'aments** and **mus'cles** are those concurring in the same movement. **A. med'icine** assists the principal medicine or basis.

Auxilium, awks-il'e-um (aid). Adjuvant; medicament.

Auxis, awks'is. Augmentation, increase.

Auxocardia, awks-o-kar'de-ah (*auxe*, increase, *kardia*, heart). Hypertrophy of the heart; enlargement in volume of the heart.

A'va. Intoxicating narcotic drink, made by chewing Piper methysticum. Root contains neutral principle, *kavalin* or *methysticin;* diuretic and blennostatic. See *Kava-kava*.

Avaism, av'a-ism. Excitement of nervous system produced by ava.

Avalanche theory, av'al-anch the'o-re. Theory that impression from a nervous centre grows in intensity as it passes along an efferent nerve, causing more energetic muscular contraction.

Aveling's curve, av'el-ing's kurv. Curve of handles of obstetric forceps.

Avellana, av-el-lan'ah. Corylus avellana. **A. cathar'tica**, Jatropha curcas, A. multifida. **A. In'dica**, Balanus myrepsica. Seeds of Moringa pterygosperma. **A. Mexica'na**, Cacoa. **A. nux sylves'tris**, Corylus avellana. **A. purga'trix**, A. cathartica.

Aveloz. See *Euphorbia heterodoxa*.

Avena, av-e'nah. Oats. Seeds of *Avena sativa*, ord. Gramineæ. Food for man, particularly in North of England and Scotland. When formed of husks, A. texcorticata, they form *groats*. Reduced to meal —*avenæ farina, oatmeal*—they are applied as cataplasms to promote suppuration. Dry meal is sprinkled over erysipelatous parts. Internally oatmeal is used in habitual constipation. *Oatmeal gruel* or *water gruel* is a good demulcent article of food; used also as a vehicle for clysters. **A. excortica'ta**, groats. See *Avena*.

Avenæ farina, av-e'ne far-e'nah. Oatmeal. See *Avena*. **A. sati'va**, see *Avena*. **A. sem'ina**, see *Avena*.

Avenin, av'en-in. Nitrogenous principle like legumin, derived from oats.

Avens (a'vens), **com'mon**. Geum urbanum. **A., pur'ple**, Geum rivale. **A., wa'ter**, Geum rivale. **A., white**, Geum Virginianum. **A., yel'low**, Geum urbanum.

Averrhoa (av-er-rho'ah) **bilim'bi**. Blimbing tree; Indian tree, fruit of which is used as a condiment and in syrup as refrigerant. **A. caram'bola**, carambola or blimbing-bula tree; Indian tree, whose fruits are agreeably acid, and used as refrigerant in bilious fever and dysentery.

Aversion, a-vur'shun (*averto*, to turn from). Extreme repugnance, nausea; version, as of the uterus; change in disease by metastasis. Action of medicines which turn the afflux of fluids from one organ and direct them to others; counter-irritation, revulsion, derivation.

Avertebrate, a-vurt'e-brate. Without a vertebral column.

Avicennia (av-is-en'ne-ah) **officina'lis** or **resinif'era** (after Avicenna). Species of evergreen trees growing in India, Java, China, and Africa, resinous exudate from which is used as food. **A. tomento'sa**, plant which affords *Malacca bean* or *Anacardium orientale, Semecarpus anacardium*. Oil from bark of fruit is corrosive and vesicatory; resinous gum from the trunk is used as food; root is aphrodisiac; seeds are used in poultices.

Avicula Cypria, av-ik'u-lah sip're-ah. Pastil.

Avi'la. Fruit of Feuillea cordifolia of W. Indies, emetic and cathartic; oil has same properties.

Avi'tus (*avus*, ancestor). Hereditary.

Avoca'do pear. Persea gratissima.

Avoirdupois weight. See *Weights and Measures*.

Avornin, av-or'nin. Glucoside from bark of Rhamnus frangula (buckthorn), $C_{16}H_{18}O_8$.

Avornus, av-or'nus. Rhamnus frangula.

Avulsion, a-vul'shun (*a, vello*, to pluck). Evulsion; extraction by force or tearing away.

Awakener, a-wa'ken-er. See *Baunscheidtism*.

Axea commissura, aks'e-ah kom-mis-su'rah. Pivot joint. See *Trochoid*.

Axes, aks'es. Intermittent paroxysm. See *Axis*. **A. of pel'vis**, see *Pelvis*.

Ax'i. Capsicum annuum.

Ax'ial. Relating to axis. **A. cur'rent**, central current of blood in the capillaries, in which the red corpuscles flow. **A. fi'bres**, see *Nerve-fibres*. **A. plane of eye**, equatorial plane of eye.

Axile, aks'il. Axial. **A. bod'ies**, see *Corpuscula tactûs*.

Axil'la (dim. of **Ala**). The armpit, space beneath junction of arm with shoulder; bounded anteriorly by portion of pectoralis major, posteriorly by latissimus dorsi.

Axillary, aks'il-la-re. Belonging to the armpit. **A. arch**, arch of axillary fascia. **A. ar'tery**, continuation of subclavian, extending from passage of latter between scaleni muscles as far as insertion of pectoralis major, when it takes the name of brachial artery. **A. fas'cia**, fascia of armpit. **A. glands**, lymphatic glands seated in the armpit, into which lymphatic glands of upper extremity open. **A. nerve**, *Circumflex nerve, Articular nerve;* arises from posterior part of brachial plexus, particularly from last two cervical pairs and first dorsal; chiefly distributed to posterior margin of deltoid. **A. plex'us**, brachial plexus. **A. space**, axilla. **A. vein** corresponds with A. artery, anterior to which it is situate; is continuation of brachial veins; at its termination it assumes the name of subclavian vein.

Axine, aks-e'ne. See *Ascia*.

Axi-obliquus, aks'e-ob-le'kwus. Obliquus capitis inferior muscle.

Axi-rectus, aks'e-rek'tus. Rectus capitis posticus major muscle.

Axis, aks'is (axle). Right line passing through the centre of a body. Second vertebra of neck, so called because it forms a kind of axis on which the head moves. **A., an'tero-poste'rior, of eye**, see *Axis of eye*. **A. band**, A. cylinder. **A., ba'si-cra'nial**, line from centre of anterior edge of foramen magnum to centre of anterior edge of cerebral surface of sphenoid, *axis-cylinder*. **A., ba'si-fa'cial**, basi-cranial a., extended forward to anterior point of alveolar edge of superior maxilla. **A., biauric'ular**, imaginary line from one auricular point to the other. **A., brain**, isthmus of the encephalon. **A., cen'tral**, A. cylinder. **A., cer'ebro-spi'nal**, central nervous system, brain and spinal cord; see *Encephalon*. **A. of coch'lea**, modiolus. **A., cœ'liac**, cœliac artery. **A. cord**, spot at which commingling occurs of ectoderm and mesoderm. **A. cor'puscle**, corpuscle of touch. **A., cra'nio-fa'cial**, bones constituting floor of cavity of skull in higher animals. **A., cra'nio-spi'nal**, cerebro-spinal axis; see *Encephalon*. **A. cyl'inder**, central part of nerve-fibre; see *Nerve-fibre*. **A. c., intermus'cular**, cylinder of nerve after passing into sarcolemma of muscle. **A. c. pro'cess**, process passing from nerve-cell of anterior cornu of gray matter in central nervous system to become axis-cylinder of a nerve-fibre. **A. of eye**, visual axis, optic axis; right line falling perpendicularly on eye, and passing through centre of pupil. **A., he'mal**, aorta. **A., horizon'tal**, line projected in horizontal plane, perpendicular to antero-posterior and vertical axes of eyeball. **A. of lens**, see *Lens*. **A., neu'ral**, cerebro-spinal axis; see *Encephalon*. **A., notochor'dal**, notochord. **A., op'tic**, A. of eye. **A. of pel'vis**, see *Pelvis*. **A., spi'nal**, notochord. **A., thora'cic**, common trunk of superior thoracic and acromio-thoracic arteries. **A., thy'reoid** or **thy'roid**, thyroid axis; see *Thyroid*. **A. trac'tion**, traction of obstetric forceps on child in direction of curve of axis of pelvis. **A. trac'tor**, obstetric instrument devised to facilitate axis-

traction. **A. tube,** A. cylinder. **A. u'teri,** long diameter of the uterus; also, transverse line supposed to pass through uterus, on which it turns in anteversion or retroversion. **A., vis'ual,** line projected from point of direct vision on the retina to the fixation-point.

Ax'le teeth. Molar teeth.

Ax'oid. Relating to axis vertebra.

Axoïdeo (aks-o-id'e-o) or **Axoïdo.** In composition, axis (vertebra).

Axoïdo-atloid (aks-o'id-o-at'loid) or **Axido-atloïdeus,** aks'id-o-at-lo-e'de-us. Relating to axis and atlas; obliquus capitis inferior muscle.

Axoïdo-basilare, aks-o'id-o-bas-e-la're. Muscular fibres from axis to basilar process of occipital bone.

Axoïdo-mastoïdeus, aks-o'id-o-mas-to-e'de-us. Obliquus capitis inferior muscle.

Axoïdo-occipitalis, aks-o'id-o-ok-sip-it-a'lis. Rectus capitis posticus major muscle.

Axolemma, aks-o-lem'mah (*axis, lemma,* sheath). Sheath of axis-cylinder.

Axon, aks'on. Axis.

Axunge, aks-un-je' (*axis,* axle, *ungo,* to grease). Adeps præparatus.

Axungia, aks-un'je-ah. Adeps præparatus; pinguedo. **A. articula'ris,** synovia. **A. balsam'ica,** benzoinated lard. **A. benzoa'ta** or **benzoina'ta,** benzoinated lard. **A. cura'ta,** lard. **A. ga'di,** oleum jecoris aselli. **A. hom'inis,** human fat. **A. de mu'miâ,** marrow. **A. pe'dum tau'ri,** neat's-foot oil. **A. pisci'na mari'na,** cod-liver oil. **A. porci'na,** or **præpara'ta,** or **suil'la,** adeps præparatus.

Aya-pana or **Aya-pano.** Eupatorium aya-pana; Brazilian plant; leaves are tonic.

Aydendron, a-e-den'dron. Oily seeds of this Brazilian plant (Cujumary beans) are stimulant and stomachic.

Aypnia, ah-ip'ne-ah (*a, hupnos,* sleep). Insomnia.

Aypnos, ah-ip'nos (same etymon). Sleepless.

Azadarine, az-ad'ar-een. Bitter principle from Azadirachta Indica, like quinine in action.

Azadirachta Indica, az-ad-ir-ak'tah in'dik-ah. See *Melia azedarach.*

Azalea procumbens, az-a'le-ah pro-cum'bens (*azaleos,* arid). Loiseleuria procumbens.

Azarum, az'ar-um. Asarum.

Azedarach, az-ed'ar-ak. Melia azedarach.

Azedaracha amœna, az-ed-ar-ak'ah am-e'nah). Melia azedarach.

Azima tetracantha, az'im-ah tet-rah-kan'thah. E. Indian shrub, used in chest affections.

Azodirachta, az-o-dir-ak'tah. Azadirachta.

Azödynamia, (*a, zoe,* life, *dunamis,* strength). Privation or diminution of vital powers.

Azoic, a-zo'ik (same etymon as **Azote**). Devoid of life. *Azoic period* of geologist is that before living beings appeared.

Azoögeny, ah-zo-oj'en-e (*a,* priv., *zoe,* life, *genesis,* origin). Generation of defective beings.

Azoöspermia (ah-zo-o-spur'me-ah) or **Azoösperm'ism** (*a, zoe,* life, *sperma*). Privation or diminution of vitality in spermatozoa; sterility in the male.

Azoöspermorrhagia, ah-zo-o-spur-mor-rha'je-ah (*a, zoe,* life, *sperma,* sperm, *rhegnumi,* to break forth). Discharge of unproductive semen.

Azorella glebaria, az-o-rel'lah gle-bah're-ah. Species of umbelliferous plants from Straits of Magellan, furnishing gum-resin, *bolax gum,* used in chronic discharges from the urethra.

Azotas, az-o'tas. Nitrate. **A. ammo'nicus,** ammonium nitrate. **A. argen'ticus,** silver nitrate. **A. fer'ricus,** ferric nitrate. **A. hydrargyri'cus liq'uidus,** hydrargyri nitras. **A. hydrargyro'so-ammo'nicus,** see *Hydrargyri oxidum cinereum.* **A. hydrargyro'sus,** hydrargyri nitras. **A. ka'licus,** potassium nitrate. **A. potas'sicus,** potassium nitrate.

Azote, az'ote (*a, zoe,* life). Nitrogen. A gas unfit for respiration; not positively deleterious, but proving fatal, owing to want of oxygen; one of the constituents of atmospheric air, and a distinguishing principle of animals; also called phlogistic air, vitiated air, etc. **A., protox'ide of,** nitrogen, gaseous oxide of.

Azoted (az'o-ted) or **Azotized,** az'o-tized. Nitrogenized.

Azotic, az-o'tik. Relating to nitrogen. **A. ac'id,** nitric acid.

Az'otized. Nitrogenized.

Azotous acid, az-o'tus as'id. Nitrous acid.

Azotum, az-o'tum. Azote; nitrogen.

Azotu'ria (*azote, ouron,* urine). Condition in which there is increase of urea and urates in the urine.

Azulmic acid, az-ul'mik as'id. Black substance deposited from solutions of prussic acid.

Azyges, az'ig-es (*a, zugos,* yoke; not paired). Sphenoid bone, because it has no fellow; processus azyges, projecting from under middle and fore part of that bone.

Azygos, az'ig-os (*a, zugos,* yoke). Azyges. **A. glan'dulæ thyreoï'deæ,** levator glandulæ thyreoideæ. **A. lin'guæ,** accessory slip of genio-glossus muscle. **A. Morgagn'i,** A. uvulæ. **A. pharyn'gis,** middle constrictor muscle of pharynx; also occasional muscle from pharyngeal spine of occipital bone to middle rhaphe of pharynx. **A. pro'cess,** azyges. **A. u'vulæ,** azygous muscle of uvula. **A. vein,** azygous vein.

Azygous, az'ig-us. See *Azyges, Azygos.* **A. ar'tery,** branch of popliteal artery to knee-joint; artery on vaginal wall. **A. artic'ular art'ery,** see *Articular arteries of knee.* **A. gan'glion,** coccygeal ganglion; see *Trisplanchnic nerve.* **A. mus'cle of thy'roid gland,** levator glandulæ thyreoideæ. **A. mus'cle of u'vula,** small muscle occupying substance of uvula. The name is inappropriate, as there are two distinct fasciculi alongside each other, forming palato-staphylini, staphylini, epistaphylini, or staphylini medii muscles. They raise and shorten the uvula. **A. pro'cess of sphe'noid,** see *Azyges.* **A. vein** forms communication between vena cava inferior and vena cava superior, permitting blood to pass freely between the two. On the left side the *semiazygos,* left bronchial or left superior intercostal vein, has much the same distribution as vena azygos.

Azymia, ah-zim'e-ah (*a, zume,* leaven), or **A. humo'rum.** Crudity of the humors.

Azymic, ah-zim'ik. Preventing fermentation.

Azymous, az'im-us (*a, zume,* leaven). Unfermented or unleavened, as bread.

Az'zle teeth. Molar teeth.

B.

Bab'lah. Fruit of Acacia Nilotica.

Ba'bul bark. Bark of Acacia Arabica; tonic and astringent, and externally applied to ulcers. **B. gum,** *Babool gum,* derived from Cassia Arabica; expectorant and a diabetic food.

Babuzica'rius. Incubus; nightmare.

Ba'by (*babazo,* to speak inarticulately). Infant. **B. farm,** name given to establishment in which infants are received and cared for, for pecuniary consideration, or allowed to die of neglect.

Bac'cæ (pl. of **Bacca,** berry) **Bermuden'ses.** Sapindus saponaria. **B. cube'bæ,** cubebs. **B. domes'ticæ,** fruit of Rhamnus cathartica. **B.** or **gran'a ac'tes,** see *Sambucus ebulus.* **B. ju'jubæ,** jujube. **B. junip'eri,** juniper berries. **B. myrtillo'rum,** see *Vaccinium myrtillus.* **B. Norlan'dicæ,** Rubus arcticus. **B. phytolac'cæ,** poke berry. **B. pi'peris gla'bri,** see *Piper cubeba.* **B. piscato'riæ,** see *Menispermum cocculus.* **B. ziz'yphi,** see *Jujube.*

Bac'car. A root and ointment formerly employed in uterine diseases; probably Asarum Europæum.

Baccharin, bak'kar-in. Alkaloid from Baccharis cordifolia.

Bac'charis Alema'ni. B. glutinosa; diaphoretic. **B. confer'ta,** Mexican shrub; diaphoretic, also used in dysuria. **B. cordifo'lia,** plant of northern part of S. America; diaphoretic. **B. genistelloï'des,** S. American shrub; antiperiodic. **B. glutino'sa** grows in S. America and United States; diaphoretic; used in catarrhs, bronchial and renal. **B. halimifo'lia,** *Groundsel tree;* indigenous; demulcent. **B. heterophyl'la,** Mexican shrub; same properties as B. glutinosa. **B. prostra'ta,** shrub of Peru; used in dysuria. **B. trimera,** Brazilian species; tonic and diaphoretic. **B. vene'ta,** Apoploppus discoideus.

Bacchia, bak-ke'ah (*Bacchus*). Red or pimpled face of a drunkard. See *Gutta rosea.*

Bac'chica (sacred to Bacchus). Hedera helix.

Baccillus, bas-sil'lus. Bacillus.

Baccina, bak-se'nah. Henbane.

Bacciv'orous (*bacca,* berry, *voro,* to devour). Eating berries; living on berries as a food.

Bace'las or **Bace'lus** (castrated). One who has been castrated.

Bach'elor's but'tons. See *Strychnos nux vomica.*

Bacillar (bas'il-lar) or **Bacillary,** bas'il-la-re. Like a rod. **B. lay'er of ret'ina,** tunica Jacobi.

Bacil'li (pl. of **Bacillus**). See *Bacillus.* **B. acus'tici,** rods of Corti. **B. ret'inæ,** rods of the retina.

Bacillicide, bas-il'li-side (*bacillus, cædo,* to kill). Agents destructive of bacilli.

Bacilliform, bas-il'li-form. Having shape of a rod; like a bacillus.

Bacilliparous, bas-il-lip'ar-us (*bacillus, pario,* to beget). Producing bacilli.

Bacil'lo-tuberculo'sis. Tuberculosis has been so called, under the view that it is caused by bacilli.

Bacil'lum (stick or staff). Expectorant; troche having shape of a stick; suppository. **B. escharot'icum,** caustic rod or pencil, as of silver nitrate.

Bacillus (bas-il'lus, dim. of **Baculus,** a rod). Genus of Schizomycetes, ord. Bacteriaceæ; micro-organisms, consisting of cylindrical or oval cells, which connect and form rods or cells; they always develop from a rod-shaped organism. The bacilli multiply by transverse division or by binary division and formation of endogenous spores; many of them are pathogenic, and some of them have been definitely ascertained to be the special causes of diseases. A brief mention is alone necessary of those bacilli, pathogenic and non-pathogenic, which have been thus far distinctively recognized. A table, to be minute and exact in all the known details of morphology, biological characteristics, pathogenesis, etc., would necessarily be very voluminous and gratify the bacteriologist only; while, if brief, it can present but an unsatisfactory amount of comparative information for either the bacteriologist or the general reader. As bacteriology is in a transition state of investigation and development, some of the numerous bacilli mentioned will probably hereafter be found to be at least similar, if not identical. For information as to pathogenesis of bacilli, their cultivation, nutrient materials employed, etc., see *Bacteria.* **Bacil'lus ace'ti** (Kutz), acetic or vinegar ferment; see *Mycoderma aceti.* **B. ac'idi lac'tici,** B. causing fermentation of lactic acid (Hueppe); produces lactic acid in milk, precipitates the casein, and carbonic acid is formed; found in sour milk. **B. acidifor'mans,** obtained by Sternberg (1888) from a piece of yellow-fever liver, and also from two post-mortems which were not cases of yellow fever; injected into abdominal cavity of rabbits and guinea-pigs, the bacilli are pathogenic; they are met with in the blood. **B. of ac'ne contagio'sa,** obtained from pus and scales from pustules of acne contagiosa of the horse. The discoverers (Dieckerhoff and Granitz, 1885) state that culture of this bacillus brought into thorough contact with the skin of horses, calves, sheep, and dogs gives rise to typical acne pustules. **B. actinobac'ter** (Duclaux), from milk exposed to air. **B. aërog'enes** (Miller), small bacillus found in normal contents of the intestines. **B. a. capsula'tus,** discovered by Welch in blood-vessels in a case of thoracic aneurism; injections made with culture of this bacillus into blood-vessels of rabbits did not produce any visible effect. **B. aëroph'ilus** (Liborius), found as an accidental contamination in bacterial cultivations; non-pathogenic. **B. of Afanassiew** (1887), found in expectoration and purulent matter from patients affected with whooping cough; injections of pure cultures into the air-passages or parenchyma of the lungs in animals give rise to symptoms similar to those of whooping cough; at the post-mortem very numerous bacilli are found in the bronchial and nasal mucus. **B. a'gilis cit'reus** (Menge), obtained from an infusion of peas. **B. al'bus** (Eisenberg), discovered in water; non-pathogenic. **B. a. anaërobies'cens** (Vaughan), found in water; non-pathogenic. **B. a. cadav'eris** (Strassman and Stricker, 1888), found in blood of two cadavers soon after death; a small quantity of a culture of this bacillus in a liquefied state injected subcutaneously caused death in mice in six hours; also fatal to guinea-pigs. **B. a. pu'tidus** (De Bary), found in water; when cultivated on gelatin this bacillus emits an offensive odor resembling that of manure; non-pathogenic. **B. of allanti'asis,** from tainted sausages; produces putrefactive decomposition of blood-serum. **B. allantoï'des** (L. Klein), found as an accidental contamination in culture of B. megatherium; non-pathogenic. **B. al'lii** (Griffiths) occurs superficially on putrefying onions; the cultures form sulphuretted hydrogen; non-pathogenic. **B. al'vei,** B. of foul-brood of bees (Cheshire, Watson-Cheyne, 1885); introduction of pure cultures of this bacillus into hives of bees gives rise to foul-brood; bees fed with food containing this bacillus also become infected. **B. amylobac'ter,** see *B. butyricus.* **B. amylozy'ma** (Perdrix, 1891), found in hydrant-water of Paris. **B. anaëro'bicus liquefa'ciens** (Sternberg), found in cultures from contents of intestine of yellow-fever cadaver; non-pathogenic. **B. anth'racis** (Pollender, 1849; Davaine, 1850), B. of splenic fever; found in blood of animals suffering from charbon, and in those who have died from charbon; pathogenic for miçe, guinea-pigs, cattle, horses, sheep, and rabbits; see *Anthrax.* **B. aquat'ilis** (Frankland), discovered in water from a well at Kent, England; non-pathogenic. **B. a. sulca'tus** (Weichselbaum), five varieties of bacilli discovered in drinking water supplied to city of Vienna,

Austria. **B. arbores'cens** (Frankland), discovered in the drinking water supplied to the city of London; non-pathogenic. **B. argente'o-phosphores'cens, No. 1** (Katz), found in sea-water at New South Wales; cultures on bouillon of this bacillus are phosphorescent; non-pathogenic. **No. 2**, from phosphorescent fish; non-pathogenic. **No. 3**, from cuttlefish; non-pathogenic. **B. a.-p. liquefa'ciens** (Katz), found in sea-water at New South Wales; non-pathogenic. **B. auranti'acus** (Frankland), discovered in well-water. **B. au'reus** (Adametz), discovered in water; also in eczema seborrhœicum, superficially on the body. **B. of Babes and Oprescu**, found in hemorrhagic septicæmia, resembling typhus exanthematicus. **B. of Belfan'ti and Pascarola** (1888), from suppurating wounds after tetanus; pathogenic for rabbits, guinea-pigs, mice, etc. **B. beriber'icus** (Lacerda), from blood, spinal cord, etc. of those affected with beriberi; resembles B. anthracis. **B. Berolinen'sis In'dicus**, discovered by Clässen in the water of the river Spree; non-pathogenic. **B. of blue milk**, B. cyanogenus. **B. of Book'er**, B. *a* of Booker, pathogenic for mice and guinea-pigs. According to Booker, there are seven varieties of bacteria found in the excrement of children affected with cholera infantum, which he has classified into Bacilli of Booker, *d*, *e*, *f*, *g*, *h*, *k*, and *n*; all these bacilli (*d*–*n*) bear a strong resemblance to bacterium coli commune. **B. of Bo'vet** (1891), found in the intestine of a patient who had succumbed to an attack of enteritis with symptoms resembling cholera; injections into the peritoneum in guinea-pigs were followed by peritonitis, and proved fatal. **B. bras'sicæ** (Pommer), from an infusion of cabbage-leaves; non-pathogenic. **B., Brie'ger's**, B. cavicida. **B. brun'neus** (Adametz), found in water. **B. bucca'lis fortu'itus** (Vignal), found in the secretions of healthy salivary glands in man; non-pathogenic. **B. b. max'imus** (Miller), found in the human mouth; non-pathogenic. **B. b. minu'tus** (Vignal), bacillus *g* of Vignal, found in the secretions of healthy salivary glands in man; non-pathogenic. **B. butyl'icus**, bacillus butyricus. **B. butyr'icus** (Prazmowski), B. causing butyric-acid fermentation; found in decomposing vegetable infusions, old cheese, etc.; non-pathogenic. **B. b. of Bot'kin**, found in cultures from which the air was excluded, from milk, hydrant- and well-water, earth, and dust; non-pathogenic; resembles butyric-acid ferment of Perdrix. **B. b. of Hueppe**, B. found in imperfectly sterilized milk; non-pathogenic. **B. cadav'eris**, found by Sternberg (1889) in sections of liver and kidneys from yellow-fever cadavers; subcutaneous injections from the liver, in which these bacilli are contained, are followed by marked oedema, and are very pathogenic for guinea-pigs. **B. canal'is capsula'tus** (Mori, 1888), found in sewer-water. **B. c. par'vus** (Mori, 1888) found in sewer-water. **B. can'dicans** (Frankland), found in the soil; non-pathogenic. **B. of Canestrini**, non-pathogenic; found in Italy in larvæ and bees from hives which were infected. It has been demonstrated that pure cultures of this bacillus cause a disease of bees of an infectious character in localities in Italy. **B. of Canon and Pielicke**, found by these two observers in the blood of a number of patients suffering from measles. The bacilli were also present in the nasal and conjunctival secretions of patients with the measles. **B. capsula'tus** (Pfeiffer, 1889), from the blood of a guinea-pig; inoculations prove fatal to white mice and house-mice in a few days; bacilli are present in the blood and all the organs. **B. c. muco'sus** (Fasching), found in secretions from the nose in influenza. **B. c. pneumon'icus** (Banti), in exudation from lungs of a person dying of peritonitis. **B. cap'sule of Smith** (Theobald Smith), three kinds, similar to bacillus of Friedländer, have been procured from intestines of swine. **B. carabifor'mis** (Kaczynsky), found in the stomach of dogs fed on meat alone for several days; non-pathogenic. **B. carota'rum** (A. Koch), found in cooked carrots and sugar-beets. These bacilli cause blood-serum to liquefy; non-pathogenic. **B. Caucas'icus** (Kern), from the ferment of Kefir. **B. cav'iæ fortu'itus** (Sternberg), found in a guinea-pig which had been inoculated with the liver of a yellow-fever cadaver; non-pathogenic. **B. cavici'da**, Brieger's bacillus; found in feces and artificial products of decomposition. Subcutaneous injections are very fatal to guinea-pigs (mice and rabbits frequently possess immunity); bacilli are found in the blood; they resemble bacterium coli commune. **B. c. Havanien'sis**, found by Sternberg (1889), in the intestinal contents of a yellow-fever cadaver, by inoculation of guinea-pigs. **B. of Cazal and Vaillard**, found in cheesy nodules situated on the peritoneum and pancreas. **B. Chauvæ'i**, B. of sympathetic anthrax. **B. of chol'era**, spirillum choleræ Asiaticæ. **B. of chol'era in ducks** (Cornil and Toupet, 1888), from blood of ducks in Paris which had died of choleraic disease. **B. chol'eræ gallina'rum**, B. of fowl-cholera (Pasteur, 1881). Pathogenic micro-organism found in chickens and other animals suffering from infectious diseases, in putrefying flesh, etc.; inoculation of fowls produces a stupefied and somnolent condition. At the post-mortem hemorrhagic enteritis of the duodenum is found; bacilli are present in great numbers in the blood and organs. **B. chro'mo-aromat'icus**, found by Galtier in a pig which had died from an infectious malady, in which broncho-pneumonia, pleurisy, enteritis, and swollen lymphatics coexisted. **B. cir'culans** (Jordan), found to be present sometimes in the water from the Merrimac River. These bacilli possess the power of gradually reducing nitrates into nitrites. **B. cit'reus cadav'eris** (Strassmann), discovered in venous blood in a cadaver after accidental death; non-pathogenic. **B. clo'acæ** (Jordan), very frequently found in sewage; reduces nitrates; non-pathogenic. **B. cœru'leus** (Smith), in water of Schuylkill River; non-pathogenic. **B. co'li commu'nis** (Escherich), supposed to be identical with Brieger's bacillus (B. cavicida); Emmerick's bacillus; from the blood and juice of various organs and the alvine discharges of cholera cadavers and cholera patients at Naples; introduced into the animal organism of guinea-pigs, cats, and a man. **B. c. sim'ilis** (Sternberg), in human liver; non-pathogenic. **B. of Colomiatti**, in xerotic masses in an infant and in some conjunctival affections; non-pathogenic. **B., co'lon**, B. coli communis. **B., com'ma**, spirillum choleræ Asiaticæ. **B. of conjunctivi'tis** (Weeks), very small bacillus, shorter than that of tuberculosis; produces acute conjunctivitis by inoculation. **B. constric'tus**, found in water; non-pathogenic. **B. copro'genes fœt'idus** (Schottelius, 1885), found in the intestine of swine suffering from hog-cholera. **B. c. par'vus** (Bienstock), in human feces. **B. cras'sus sputig'enus** (Kreibohm, 1886), in sputum and on the tongue; resembles bacillus pneumoniæ; pathogenic. **B. cuniculici'da** (Koch), see *Bacillus septicæmiæ hæmorrhagicæ*. **B. c. Havanien'sis** (Sternberg, 1889), found in the intestinal contents of patients who had died from yellow fever. **B. cuticula'ris** (Fils), found in water; forms in milk a superficial yellow membrane, and an odor of sulphuretted hydrogen is emitted; non-pathogenic. **B. cyan'eo-phosphores'cens** (Katz), from sea-water, New South Wales; closely allied to bacillus phosphorescens of Fischer. **B. cy'ano-fus'cus** (Beyerinck), found in glue and size and Edam cheese. **B. cyano'genus** (Hueppe), B. of blue milk, found in milk; non-pathogenic; produces a blue pigment. **B. cystifor'mis** (Clado), found in the urine in a case of cystitis; non-pathogenic. **B. of Dan'tec** (1891), non-pathogenic bacillus found in salted codfish; it gives to codfish a red color. **B. delicat'ulus** (Gerdan), in the water supplied to the city of Lawrence, Massachusetts; reduces nitrates to nitrites; non-pathogenic. **B. of Dem'me** (1888), contained in tumors and pustules, and also in the blood of individuals affected with erythema nodosum. **B. deni'trificans** (Giltay and Aberson), found in sewage, soil, and air; possesses power of decomposing nitrates. **B. denta'lis vir'idans**, in carious dentine (Miller). **B. devo'rans** (Zimmer-

mann), found in well-water; non-pathogenic. **B. diffu'sus** (Frankland), in the soil; non-pathogenic. **B. diphthe'riæ** or **diphtherit'icus** (Klebs, 1883; Loeffler, 1884), bacillus found in diphtheritic membranes. Brought into contact with the trachea of chickens, pigeons, and rabbits, it produces false membranes. Subcutaneous inoculations prove fatal to guinea-pigs and small birds in a few days; hemorrhagic infiltrations of the subcutaneous tissue and pleural cavities are present. **B. d. columba'rum** (Loeffler, 1884), in diphtheritic false membranes in pigeons which had succumbed to diphtheria existing in certain localities in Germany among pigeons, and also among chickens. **B. d. vitulo'rum** (Loeffler, 1884), long bacillus obtained from exudation of false membrane in the oral cavity of calves having infectious diphtheria; pathogenic for mice, but not for rabbits or guinea-pigs. **B. dyso'des** (Zopf), in bread, giving it a strong smell. **B., Em'merich's**, B. coli communis. **B. endocardi'tidis capsula'tus** (Weichselbaum, 1888), from spleen of case of endocarditis. **B. e. gris'eus** (Weichselbaum, 1888), from a case of ulcerative endocarditis; pathogenic for white mice and guinea-pigs. **B. enterit'idis** (Gärtner, 1888), from a cow dead from mucous diarrhœa, and from spleen of a man who died from eating its flesh. **B. epiderm'idis** (Brizzozero), *Leptothrix epidermidis;* non-pathogenic; found in epidermis of the interdigital spaces of the foot. **B. erysipel'atos su'is** (Loeffler, Schütz, 1885), B. of hog-erysipelas, with which B. of mouse septicæmia (Koch, 1878) is identical; found in the blood and organs of swine, victims to hog-erysipelas in Germany; pathogenic for swine, rabbits, pigeons, sparrows, etc. **B. erythros'porus** (Eidam), non-pathogenic bacillus found in water, in decomposing alkaloids, as putrefying flesh, etc. **B. fig'urans** (Vaughan), from water; non-pathogenic. Also name of one described by Crookshank, identical with B. mesentericus vulgatus; also by Flügge, in garden earth. **B. filifor'mis** (Tils), non-pathogenic; found in water. **B. f. Havanien'sis** (Sternberg), non-pathogenic bacillus from yellow-fever liver. **B. of Fiocca,** found in saliva of cats and dogs. **B. Fitzia'nus** (Zopf), found in hay infusion; probably identical with B. subtilis. **B. flaves'cens** (Pohl, 1892), from swamp-water; its importance is not yet determined. **B. flavocoria'ceus** (Eisenberg), small sulphur-yellow bacillus of Adametz; non-pathogenic. **B., flesh'-colored** (Tils), non-pathogenic, forming flesh-colored pigment. **B. floc'cus** (Warington), from garden soil. **B. fluores'cens** (Becker, Schröter), from water and pus; forms pigment pyocyamin. **B. f. au'reus** (Zimmermann), short, non-pathogenic bacillus found in water. **B. f. liquefa'ciens,** frequently found in water and in putrefying infusions. **B. f. l. minutis'simus** (Unna and Tommasoli), non-pathogenous, found in eczema seborrhœicum. **B. f. lon'gus** (Zimmermann), non-pathogenic bacillus found in water. **B. f. niva'lis** (Schmolck), non-pathogenic bacillus found in water and snow of Norway. **B. f. non-liquefa'ciens,** non-pathogenic bacillus found in water. **B. f. pu'tidus** (Flügge), non-pathogenic bacillus found in water, in putrefying flesh, etc. **B. f. ten'uis** (Zimmermann), non-pathogenic bacillus found in water. **B. fœt'idus,** from exudation of profuse sweating of feet; cultivations have that odor. **B. f. ozæ'næ,** bacillus from nasal discharges of ozæna; pathogenic for mice. **B. of foul-brood,** bacillus alvei. **B. of fowl-chol'era,** B. cholera gallinarum. **B. of Fried'länder** or **B. pneumo'niæ,** pneumococcus obtained from the exudation poured into the alveoli of the lungs in croupous pneumonia. It is, however, present in only a small proportion of cases; pathogenic for mice and guinea-pigs. **B. of Fulles,** two have been described, both aërobic and non-liquefying; found in the soil. **B. ful'vus** (Zimmermann), non-pathogenic bacillus found in water. **B. fus'cus** (Zimmermann), non-pathogenic bacillus found in water. **B. f. limba'tus** (Scheibenzuber), non-pathogenic bacillus from rotten eggs. **B. gallina'rum** (Klein, 1889), B. from disease similar to fowl-cholera. **B. gasofor'mans** (Eisenberg), small bacillus found in water; non-pathogenic. **B. genicula'tus** (DeBary), found in the stomach. **B. of Gess'ner,** found in normal contents of human intestine; it is similar to the bacillus lactis aërogenes. **B. gingi'væ pyo'genes** (Miller), found in alveolar abscess and secretions of a foul mouth. **B. of Giovanni'ni,** see *B. of purpura hæmorrhagica of Tizzoni.* **B. of glan'ders,** bacillus mallei. **B. glau'cus** (Maschek), non-pathogenic bacillus, forming a gray pigment; found in water. **B. glyceri'næ,** bacillus Fitzianus. **B. gra'cilis** (Zimmermann), found in water; non-pathogenic. **B. g. anaërobies'cens** (Vaughan), from water; non-pathogenic. **B. g. cadav'eris** (Sternberg, 1889), from a section of human liver. **B. granulo'sus** (Russell, 1891), from mud in Gulf of Naples. **B. grave'olens** (Bordoni-Uffreduzzi), found in the epidermis between human toes; non-pathogenic. **B. of green pus,** B. pyocyanus. **B. of grouse disease** (Klein, 1889), from epidemic disease in the grouse. **B. of Guillebeau,** three forms were obtained by him from milk of cows suffering from inflamed breasts. **B. gutta'tus** (Zimmermann), found in water; non-pathogenic. **B. haloph'ilus** (Russell, 1891), from water and mud of Gulf of Naples. **B. Havaniensis** (Sternberg), short oval bacillus; aërobic and chromogenic. **B. H. liquefa'ciens** (Sternberg), from external surface of patients at Charity Hospital at New Orleans. **B. hel'volus** (Zimmermann), non-pathogenic bacillus found in water. **B. heminecrobioph'ilus** (Arloing, 1889), B. found in caseation of a lymphatic gland in a guinea-pig. **B. hepat'icus fortu'itus** (Sternberg), similar to bacillus coli communis in shape, etc.; non-pathogenic; from liver of patient dead from yellow fever. **B. Hes'sii** (Guillebeau), from milk of a cow. **B. of hog-cholera** (Klein, 1884; Salmon and Smith, 1885), found in the blood and tissues and in the intestinal contents of hogs affected with cholera; lasting for months without drying up; pathogenic for swine, rabbits, mice, guinea-pigs, and pigeons. **B. hyacin'thi sep'ticus** (Heinz), non-pathogenic bacillus found in decaying hyacinths. **B. hyali'nus** (Jordan), non-pathogenic. **B. hydoph'ilus fus'cus** (Sanarelli, 1891), from infectious disease of hogs. **B. ianthi'nus,** B. janthinus. **B. implex'us** (Zimmermann), found in water; non-pathogenic. **B. inca'nus** (Pohl), from swamp-water; its importance is not yet established. **B. In'dicus** or **I. ru'ber** (Koch), non-pathogenic bacillus found in intestinal contents of a monkey. **B. indigo'genus** (Alvarez, 1887), B. from leaves of indigo; pathogenic to guinea-pigs. **B. infla'tus** (A. Koch), non-pathogenic bacillus found as an impurity in the air. **B. of influen'za** (Pfeiffer and Canon, 1892), thought to be the specific cause of influenza. It was discovered in the purulent secretion from the bronchi in epidemic influenza, and in the blood of those attacked with the latter. **B. of intes'tinal diphthe'ria in rab'bits** (Ribbert, 1887), bacillus from diphtheritic inflammation of the intestines. Produces in rabbits and guinea-pigs diphtheritic ulceration of small intestine, the bacillus being found in the blood, liver, and spleen. **B. intesti'ni** (Klein), from large intestine of a diarrhœic rabbit. **B. intesti'nus mo'tilis** (Sternberg), non-pathogenic; from intestines of those dead from yellow fever. **B. inunc'tus** (Pohl), from swamp-water; its importance is not determined. **B. invisib'ilis** (Vaughan), from water; non-pathogenic. **B. i'ris** (Frick), small non-pathogenic bacillus. **B. janthi'nus** (Zopf), violet bacillus, non-pathogenic, found in water and sewage. **B. of Jef'fries,** similar to B. coli communis and B. lactis aërogenes; from fecal discharges of summer diarrhœa. **B., jequir'ity** (Sattler), from infusion of jequirity. **B. of Kartulis** (Koch, 1883, Kartulis), similar to B. murisepticus; from secretions of infectious catarrhal conjunctivitis. **B. Kaukas'icus,** B. Caucasicus. **B. of Koubasoff** (1889), procured from affected part in a case of cancer of the stomach. **B. lateric'eus** (Eisenberg), non-pathogenic; found in water. **B. lac'ticus,** B. acidi lactici. **B. lac'tis aëro'genes** (Escherich, 1886), from intestines and feces of children and cows fed upon milk. **B. l. al'bus** (Loeffler), found in milk; non-pathogenic. **B. l. erythro'genes** (Hueppe), B. of

red milk; non-pathogenic; found in red milk and in the feces. **B. l. pituito'si,** non-pathogenic bacillus found in milk. **B. of La'ser** (1892), from epidemic disease of mice; pathogenic for guinea-pigs, rabbits, pigeons, etc. **B. leioder'mos,** B. liodermos. **B. lep'oris letha'lis** (Gibier, 1888), so named by Sternberg; from fecal matter of yellow-fever cases. **B. lep'ræ** (Hansen, 1879), B. of leprosy. It was found in various organs in leprous conditions, especially in the cells. It resembles the bacillus tuberculosis. **B. of lep'rosy,** B. lepræ. **B. leptospo'rus** (L. Klein), similar to B. subtilis, found accidentally in the air; non-malignant. **B. of Lesage** (1887), from discharges of green diarrhœa. **B. of Letzerich** (1887), from urine in primary interstitial nephritis. **B. limba'tus ac'idi lac'tici** (Marpmann), non-pathogenic bacillus found in fresh milk. **B. limo'sus** (Russell, 1891), found in mud of Gulf of Naples. **B. lioder'mos** (Loeffler), found in milk; similar to B. mesentericus vulgatus; non-pathogenic. **B. liquefa'ciens** (Eisenberg), found in water; non-pathogenic. **B. l. commu'nis** (Sternberg), from feces of yellow-fever patients; non-pathogenic. **B. l. mag'nus** (Luderitz), bacilli in garden soil; non-pathogenic. **B. l. par'vus** (Luderitz), bacilli in garden soil; non-pathogenic. **B. liq'uidus** (Frankland), non-pathogenic bacillus found in Thames River water; powerful reducing power over aqueous solution of nitrate. **B. litora'lis** (Russell, 1891), found in mud of Gulf of Naples. **B. liv'idus** (Plagge and Proskauer), non-pathogenic; found in water of Berlin. **B. of Loeb,** somewhat similar to B. capsulatus of Pfeiffer, from case of keratomalacia infantum; pathogenic for mice and guinea-pigs. **B. of Lucet** (1891), similar to, and perhaps identical with, B. gallinarum (Klein); found in the epizootic dysentery of chickens and turkeys; pathogenic to chickens and turkeys only. **B. of Lum'nitzer** (1888), found in sputa of putrid bronchitis; pathogenic to rabbits. **B. of Lust'garten,** B. of syphilis. **B. lu'tens su'is** (Salmon Smith), from fluids of pericardial or peritoneal cavities of swine. **B. ma'idis** (Cuboni), non-pathogenic; found in corn soaked in water, and in the feces of pellagric patients, but not proved to be the cause of pellagra. **B. mala'riæ** (Klebs and Tommasi-Crudeli, 1879), micro-oganism discovered near Rome, Italy, by them, but proven by later investigations not to be an etiological factor in the production of malarial fevers. **B. of malig'nant œde'ma,** B. œdematis maligni. **B. mal'lei** (Loeffler and Schütz, 1882), B. of glanders, found in the discharges and blood of animals so infected; resembles B. tuberculosis in appearance; genuine glanders is produced in animals by the injection of pure cultures of this bacillus. **B. mari'nus** (Russell), spirillum marinum. **B. Marti'nez** (Sternberg), found in liver of a patient dead from yellow fever. **B. may'dis,** B. maïdis. **B. of meas'les,** see *Bacillus of Canon and Pielicke.* **B. megathe'rium** (DeBary), non-pathogenic; found on boiled cabbage-leaves. **B. melittoph'thorus,** B. alvei. **B. membrana'ceus amethys'tinus,** non-pathogenic, forming a violet pigment; found in well-water. **B. meningit'idis purulen'tæ** (Neumann and Schäffer, 1887), pathogenic; found in a case of purulent meningitis; produced purulent inflammation when injected in guinea-pigs, white mice, rabbits, etc. **B. mesenter'icus fus'cus** (Flügge); non-pathogenic; found in atmospheric air, water, potassa, etc. **B. m. ru'ber,** non-pathogenic, forming yellowish or pink pigment; found on potatoes. **B. m. vulga'tus,** potato bacillus; non-pathogenic; found on potatoes, in milk, in water, and in the alimentary canal. **B. mirab'ilis,** proteus mirabilis. **B. of mouse septicæ'mia,** identical with B. erysipelatos suis (which see). **B. multipedic'ulus** (Flügge), found in the atmosphere and in water. **B. murisep'ticus** (Koch), in putrefying fluids; produces fatal septicæmia in mice and sparrows; see *Bacillus erysipelatos suis.* **B. m. pleomor'phus,** see *Proteus of Karlinski.* **B. muscoï'des** (Liborius), non-pathogenic; found in soil, old cheese, and feces of cattle, and sometimes with bacillus œdematis maligni. **B. mycoï'des** (Flügge), non-pathogenic; found in the soil and in water; see *Bacillus figurans.* **B. m. ro'seus** (Scholl), non-pathogenic, forming a red pigment; found in the soil. **B. Neapolita'nus,** B. coli communis. **B. necroph'orus** (Loeffler, 1884), found in rabbits inoculated with condyloma; pathogenic for rabbits and white mice. **B., ni'trifying** (Winogradsky), small bacillus obtained from the soil; its characteristics are not fully determined. **B. of No'card** (1888), aërobic bacillus first discovered in pus of abscesses in cattle consequent upon a chronic infectious disease—farcinia; when injected into some animals, as the guinea-pig, symptoms occur almost similar to those of miliary tuberculosis. **B. nodo'sus par'vus** (Lustgarten), non-pathogenic; found in the normal urethra. **B. nu'bilus** (Frankland), non-pathogenic; found in water. **B. ochra'ceus** (Zimmermann), non-pathogenic, producing a yellow pigment; found in water. **B. œdem'atis aëro'bicus** (Klein), B. found in malignant œdema; pathogenic for guinea-pigs, rabbits, and white mice. **B. œ. malig'ni** (Pasteur, 1877), B. of malignant œdema; found in soil, in foul water, putrefactive matters, etc.; pathogenic for man and other animals, producing progressive emphysematous gangrene. **B. of Oka'da** (1891), found in floor-dust; pathogenic to guinea-pigs and rabbits. **B. of Oprescu,** see *B. of Babes.* **B. ova'tus minutis'simus** (Unna), non-pathogenic; found in cases of eczema seborrhœicum. **B. oxyto'cus pernicio'sus** (Wyssokowitsch), from stale milk; pathogenic to rabbits in large doses, producing fatal enteritis. **B. par'vus ova'tus** (Loeffler), B. of swine plague. **B. of Pascoro'la,** B. of Belfanti. **B. of Pasteur** or **Pasteuria'nus,** *Urobacillus Pasteuri;* see *B. aceti.* **B. pes'tifer** (Frankland), non-pathogenic; found in the atmosphere. **B. phosphores'cens gel'idus** (Forster), non-pathogenic; found in phosphorescent fish. **B. p. In'dicus** (Fischer), non-pathogenic; found in sea-water in West Indies. **B. p. indig'enus** (Fischer), non-pathogenic; found in sea-water. **B. of Pielicke,** see *B. of Canon.* **B. plica'tus** (Zimmermann), non-pathogenic, producing a yellow pigment; found in water. **B. pneumo'niæ,** B. of Friedländer. **B. pneumon'icus a'gilis** (Schon), produces pneumonia in rabbits. **B. pneumosep'ticus** (Babes, 1889), found in a case of septic pneumonia; pathogenic and fatal to rabbits, guinea-pigs, and mice. **B. polypifor'mis** (Liborius), non-pathogenic; obtained from soil by inoculation, and from excrement of cattle; often accompanies B. œdematis maligni. **B. of pota'to-rot,** (Kramer, 1891), from potatoes affected with wet rot. **B. prodigio'sus,** non-pathogenic, producing a red pigment. **B., pseu'do-diphtherit'ic,** non-pathogenic bacillus resembling B. diphtheriæ; found in non-diphtheritic affections of the throat. **B. pseudo-pneumon'icus,** in abscesses in man; resembles B. of Friedländer. **B. pseudo-tuberculo'sis** (Pfeiffer, 1889), from tissues of horse with supposed symptoms of glanders. **B. pul'pæ pyo'genes,** from gangrenous pulp of a tooth. **B. puncta'tus** (Zimmermann), non-pathogenic; found in water. **B. of pur'pura hæmorrha'gica of Babes** (1890), found in case of that disease with septicæmia; pathogenic for mice. **B. of p. h. of Kolb** (1891), found in cases of purpura and fever; pathogenic for rabbits and mice. **B. of p. h.** (Lizzoni and Giovannini, 1889), found in some cases of purpura hæmorrhagica; pathogenic for dogs, rabbits, and guinea-pigs. **B. putrif'icus co'li** (Bienstock), non-pathogenic; found in human feces. **B. pyocy'anus** (Gessard, 1882), B. of green pus; found in that fluid in purulent discharges from wounds, etc.; pathogenic for guinea-pigs and rabbits. **B. pyocy'anus** β (Ernst), non-pathogenic, forming green pigment; found in pus. **B. pyo'genes fœt'idus** (Passet, 1885), derived from fetid anal abscess. **B. p. so'li,** derived from garden soil by inoculation in a rat. **B. radia'tus** (Lüderitz), non-pathogenic; obtained from garden soil by inoculation of mice, etc. **B. r. aquat'ilis** (Zimmermann), non-pathogenic; found in water. **B. ramo'sus,** Wurtzel bacillus; non-pathogenic; found in the soil and in water. **B. of Rausch'brand,** B. of sympathetic anthrax. **B. reticula'ris** (Jordan), non-pathogenic; found in water. **B. of rhinosclero'ma** (Von Frisch, 1882), found in the fresh formations of this disease, in the lym-

phatics and in the tissues affected by it. **B. rosa'ceum metalloï'des** (Dowdeswell), aërobic bacillus, producing a red pigment. **B. of Roth** (1890), several bacilli were discovered by him; one, similar to B. coli communis, pathogenic for rabbits and guinea-pigs; the other from old rags, pathogenic for the same animals. **B. rubefa'ciens** (Zimmermann), non-pathogenic; producing a light-pink pigment. **B. rubel'lus** (Okada, 1892), non-pathogenic; from dust, by inoculation in guinea-pigs. **B. ru'ber In'dicus**, see *Bacillus Indicus ruber*. **B. rubes'cens** (Jordan), non-pathogenic; producing a light-pink pigment; found in sewage. **B. ru'bidus** (Eisenberg), non-pathogenic; producing a reddish-brown pigment; found in water. **B. saliva'rius sep'ticus** (Biondi), micrococcus pneumoniæ crouposæ. **B. san'guinis ty'phi** (Brannan and Cheeseman, 1892), B. of the blood of typhus fever. **B. sapro'genes** (Rosenbach, 1884), found in secretion of badly-sweating feet and other foul secretions; pathogenic to rabbits. **B. scarlati'næ** (Edington), in blood of scarlatina. **B. Schafferi** (Freudenreich), found in cheese and potato in a state of fermentation. **B. of Scheurlen**, non-pathogenic; found in cancer, on healthy skin and mammæ, etc. **B. of Schimmelbusch** (1889), found in necrosed portion of cancrum oris; caused abscesses when injected into rabbits. **B. of Schon** (1885), found in rabbits in pneumonia, occurring after section of vagus nerve, and in normal secretions of the mouth of the same class of animals; pathogenic to rabbits. **B. of Schützenberg**, urobacillus Schützenbergii. **B. septicæ'miæ hæmorrha'gicæ**, B. choleræ gallinarum. **B. of septicæ'mia of mice**, B. murisepticus. **B. sep'ticus acumina'tus** (Babes, 1889), found in an infant a few days old, dead from septicæmia; pathogenic for rabbits and guinea-pigs. **B. s. agrig'enus** (Nicolaier), found in fertilized soil; is similar to B. of fowl-cholera and that of rabbit septicæmia; pathogenic to rabbits. **B. s. keratomala'ciæ** (Babes, 1889), found in case of septicæmia after keratomalacia; pathogenic for rabbits and mice. **B. s. sputig'enus** (Fränkel), micrococcus pneumoniæ crouposæ. **B. s. ul'ceris gangræno'si** (Babes, 1889), found in a fatal case of septicæmia; pathogenic for mice and guinea-pigs. **B. s. vesi'cæ** (Clado, 1887), found in the urine in cystitis; pathogenic for mice, rabbits, and guinea-pigs. **B. ses'silis** (L. Klein), non-pathogenic; found in blood of a cow dead, probably, from anthrax. **B. smaragdi'no-phosphores'cens** (Katz), non-pathogenic; found in a herring. **B. smaragdi'nus fœt'idus** (Reimann, 1887), B. from discharges from the nose in ozæna; pathogenic and fatal to rabbits. **B. of Smith**, see *B. capsule of Smith*. **B. sol'idus** (Lüderitz), non-pathogenic; obtained from garden soil by inoculation. **B. spinif'erus** (Unna), non-pathogenic; producing yellow pigment; found in cases of eczema seborrhœicum. **B. spino'sus** (Lüderitz), non-pathogenic; from garden soil by inoculation of mice, etc. **B. of sponta'neous rab'bit septicæ'mia** (Eberth), form of B. proven to be identical with B. of swine-plague of Marseilles (which see). **B. stolona'tus** (Adametz), non-pathogenic; found in water. **B. stolonif'erus** (Pohl, 1892), from water of swamps. **B. stria'tus al'bus** (Von Besser), non-pathogenic; found in normal mucus from the nose. **B. s. fla'vus** (Von Besser), non-pathogenic; producing a yellow pigment; found in mucus of the nose. **B. subfla'vus** (Zimmermann), non-pathogenic; producing a yellow pigment; found in water. **B. sub'tilis** (Ehrenberg), hay bacillus, in infusions of dried grasses; non-pathogenic; found in water, the soil, hay, etc. **B. s. sim'ilis** (Sternberg), non-pathogenic; found in cultures from liver of yellow-fever patient. **B. s. sim'ulans** (Bienstock), two bacilli are described under this name, both found in human feces and non-pathogenic. **B. sulfu'reum** (Holschewnikoff), non-pathogenic; producing reddish-brown pigment. **B. sulfu'reus** (Lindenborn), non-pathogenic; found in water. **B. superficia'lis** (Jordan), non-pathogenic; found in sewage. **B. of swine-plague** (Klein, 1884), B. of hog-cholera. **B. of s. p. of Marseilles** (Rietsch and Jobert), B. of ferret disease; B. of spontaneous rabbit septicæmia; these have been proven to be identical. **B. of symptomat'ic an'thrax** (Bollinger and Feser, 1878), found in the tissues of cattle suffering from this disease; pathogenic to cattle and guinea-pigs; resembles B. œdematis maligni. **B. of syph'ilis** (Lustgarten, 1884), found in various lesions of syphilis and discharges from syphilitic ulcers, but not yet established definitely as pathogenic of that disease. **B. syxan'thus**, in yellow milk. **B. tardecres'cens** (Warington), from solution of nitrified ammonium carbonate. **B. ten'uis sputig'enus** (Pansini, 1890), derived from sputa; pathogenic for rabbits and white rats. **B. ter'mo** (Vignal), non-pathogenic; found in normal saliva; see *Bacterium termo*. **B. tet'ani**, B. of tetanus; in garden earth; produced tetanus in mice and rabbits by subcutaneous injection of street soil. Toxic substance, called *tetanin*, was obtained by Brieger in 1886, fatal, with tetanic symptoms, when injected into small animals. B. tetani is undoubtedly the cause of the infection of tetanus. **B. thalassoph'ilus** (Russell, 1891), found in deep mud of Gulf of Naples. **B. thermoph'ilis** (Miguel), non-pathogenic; found in sausage, the soil, and in the alimentary canal. **B. of Tizzo'ni**, see *B. of purpura hæmorrhagica*. **B. of Tommaso'li** (1889), found in the hair in a case of sycosis. **B. torulifor'mis** (Warington), from garden soil. **B. tremelloï'des** (Schottelius), non-pathogenic, producing a yellow pigment; found in water. **B. of Trico'mi** (1886), found in a case of senile gangrene; pathogenic to rabbits and guinea-pigs. **B. tuberculo'sis**, discovered by Koch of Berlin in 1882, in sputa of patients with pulmonary or laryngeal tuberculosis, in tuberculous cavities, joints, and bones, and glands in lupus; it is in form of a rod with rounded extremities. It grows at a temperature of about 98° F.; it is strictly a parasite. Koch, its discoverer, found in cultures of this bacillus a toxine to which the name *tuberculin* was given, which is soluble in water and glycerin, and which, injected into tuberculous animals, has been supposed to give a possible immunity against tuberculosis; its importance, when used in cases of tubercular disease in man, except as a means of diagnosis, has not yet been determined. Tuberculosis usually results in man from inhalation of air in which the bacillus tuberculosis is present by one susceptible to its influence, as in the dried sputum of that disease, in which sputum its pathogenic properties may be lying dormant for weeks or months. **B. t. gallina'rum** (Maffucci, 1889), B. of tuberculosis in chickens, very similar to that of tuberculosis in man, but entirely distinct. **B. tumes'cens** (Zopf), non-pathogenic; found on beets. **B. tus'sis convulsi'va** (Afanasjeff), in sputa in whooping cough. **B. ty'phi abdomina'lis**, B. of typhoid fever, discovered by Eberth in 1880; it produces death when injected into the rabbit and the mouse, but not the characteristic symptoms of typhoid fever. It also has been found in alvine dejecta and in the spleen, liver, mesenteric and other intestinal glands, and kidneys in fatal cases, but only in rare cases in the blood of typhoid-fever patients. It is the only micro-organism found in the internal organs in such cases; it is not putrefactive. **B. t. mu'rium** (Loeffler, 1889), found in mice which had died from epidemic disease. **B. typho'sus**, B. typhi abdominalis. **B. ty'phus**, B. typhi abdominalis. **B. ubiq'uitus** (Jordan), found in sewage. **B. ul'na** (Cohn), non-pathogenic; found in solution of egg-albumin. **B. u. of Vig'nal**, non-pathogenic; found in normal saliva. **B. ure'æ** (Leube), in stale urine. **B. of Utpadel** (1887), found in contents of small intestine; produces inflammation and œdema and death in mice, cats, and guinea-pigs. **B. vacuolo'sis** (Sternberg, 1888), noticed in cultures from the digestive canal of yellow-fever patients. **B. varico'sus conjuncti'væ** (Gombert, 1889), found in normal conjunctival sac. **B. veneno'sus** (Vaughan), from water. **B. v. bre'vis** (Vaughan), from water. **B. v. invisib'ilis** (Vaughan), from water. **B. v. liquefa'ciens** (Vaughan), from water. **B. ventric'uli** (Raczynssky), non-pathogenic; found in stomach of dog fed on meat.

B. vermicula'ris (Frankland), non-pathogenic; found in river-water. **B. vermiculo'sus** (Zimmermann), non-pathogenic; found in water. **B. of Vig'nal,** *β*, non-pathogenic; found in normal secretions of the mouth. **B. of Vig'nal,** *f*, non-pathogenic; found in normal saliva. **B. of Vil'lard,** see *Bacillus of Cazal.* **B. viola'ceus** (Frankland), non-pathogenic; forming a violet pigment; found in river-water; powerful reducer of nitrates to nitrites. **B. v. Lauren'tius** (Jordan), non-pathogenic; forming a violet pigment. **B., vi'olet,** B. janthinus. **B. vires'cens** (Frick), non-pathogenic; found in sputum; forms a green pigment. **B. virg'ula,** B. of cholera. **B. vir'idis palles'cens** (Frick), non-pathogenic; produces a light-blue pigment. **B. visco'sus** (Frankland), non-pathogenic; forms a green pigment; found in river-water. **B. vulga'ris,** proteus vulgaris. **B. of Wildseuche** (Loeffler), probably identical with bacillus cuniculicidus. **B. of Winograd'sky,** B., nitrifying. **B. Wurt'zel,** B. ramosus. **B. Zenk'eri,** proteus Zenkeri.

Back. Dorsum; posterior portion of an organ, bone, etc. **B. draught,** whoop of whooping cough. **B. friend,** hangnail. **B. sprent,** vertebral column. **B. stroke of heart,** diastolic impulse.

Back'ache root. Liatris.

Back'bone. Vertebral column.

Back'set. Relapse.

Ba'cony disease. See *Lardaceous.*

Ba'core. Musa sapientum.

Baco'pa. Species of scrophulariaceous plants of Brazil, used in external application to burns.

Bacte'ria (pl. of **Bacte'rium,** *bakterion,* small stick). Genus of Schizomycetes, embracing microscopic organisms formerly classed among the infusoria, but now regarded as belonging to the vegetable kingdom. According to Cohn, the characters of this genus were: cells cylindrical or elliptical, free or united in pairs during their division, rarely in fours, never in chains, sometimes in zoöglœa (Sternberg). This genus has now been almost entirely abandoned, and rod-forms are now generally included under bacillus.

The germ theory is not of recent study by any means, but originated almost 250 years ago. In modern times the researches of such eminent bacteriologists as Koch, Pasteur, Lister, etc. have given a great impetus to the study of bacteriology and have demonstrated the great etiological importance of these micro-organisms, leading to radical changes in the field of surgery. Previous to the introduction of antiseptic surgery by Lister the mortality in European hospitals after operations was of an exceedingly high rate, the slightest operations being followed by hospital gangrene, pyæmia, etc. Since the evolution of surgery the death-rate has been greatly reduced.

The proper division of bacteria into genera and species is still in an unsettled condition, and attended with great difficulty up to the present time. According to Nägeli, a German botanist, the bacteria should be classed among fungi. He divides the bacteria which produce the decomposition of organic substances into—

1. Mucorini, or mould fungi;
2. Saccharomycetes, budding fungi or yeasts;
3. Schizomycetes, or fission fungi.

Another division, by Zopf, divides the bacteria or schizomycetes into groups, as follows:

	Genera.
1. Coccaceæ. Up to the present time only known in the form of cocci.	Streptococcus (chain cocci), Merismopedia (plate cocci), Sarcina (packet cocci), Micrococcus (mass cocci), Ascococcus (pellicle cocci).
2. Bacteriaceæ. Have for the most part spherical, rod-like, and filamentous forms; the first (cocci) may be wanting; the last are not different at the two extremities; filaments straight or spiral.	Bacterium, Spirillum, Vibrio, Leuconostoc, Bacillus, Clostridium.
3. Leptotricheæ. Spherical, rod-shaped, and filamentous forms; the last show a difference between the two extremities; filaments straight or spiral; spore formation not known.	Crenothrix. Threads articulated; cells sulphurless; habitat water. Beggiatoa. Threads inarticulated; cells with sulphur granules; habitat water. Phragmidiothrix. Threads jointless; successive subdivision of cells is continuous; cells sulphurless; habitat water. Leptothrix. Threads articulated or unarticulated; successive subdivisions of cells not continuous; cells sulphurless.
4. Cladotricheæ. Spherical, rod-shaped, filamentous, and spiral forms; the filamentous form presents pseudo-branches; spore formation not known.	Cladothrix.

Baumgarten's classification divides the bacteria into two groups:

Group I. Monomorphic, which includes the following genera: Micrococci, Bacilli, Spirilla.
Group II. Pleomorphic, which includes the following genera: Spirulina, Leptothrix, Cladothrix.

The cocci, in Baumgarten's classification, constitute a single genus, with the following five subgenera:

1. Diplococcus;
2. Streptococcus;
3. Merismopedia (Zopf), Merista (Hueppe);
4. Sarcina (Goodsir);
5. Micrococcus (staphylococcus).

The classification usually adopted is that of Cohn:

Schizomycetes or Bacteria,	Sphærobacteria (globular cells),	Micrococcus. Sarcina.
	Microbacteria or Bacteria proper (small, rod-like cells),	Bacterium.
	Desmobacteria or Filobacteria (larger rod-like or thread-like cells),	Bacillus (straight).
	Spirobacteria (twisted or spiral cells),	Vibrio (wavy). Spirochæta (long, flexible, close-wound spirals). Spirillum (short, stiff, open spirals).

Bacteria may be grouped together according to the changes produced in the media in which they grow. We may thus have pigment-forming or chromogenic, fermentative, putrefactive, and pathogenic bacteria. *Chromogenic bacteria* form, while growing, definite color stuffs. *Fermentative* or *zymogenic bacteria* produce their changes in non-nitrogenized media. *Putrefactive* or *saprogenic bacteria* produce changes allied to fermentation in complex organic substances. *Pathogenic bacteria* are believed to cause infectious diseases in human beings. Bacteria may be considered as being present everywhere.

To establish the pathogenic character of bacteria, according to Koch, it is necessary that (1) the micro-organism must be found in the blood, lymph, or diseased tissue of man or animal suffering from or dead of the disease; (2) the micro-organisms must be isolated from the blood, lymph, or tissues, and cultivated in suitable media, *i. e.* outside the animal body; these pure cultivations must be carried on through successive generations of the organism; (3) a pure cultivation, thus obtained, must, when introduced into the body of a healthy animal, produce the disease in question; (4) in the inoculated animal the same micro-organism must again be found.

For the *culture* of bacteria, it is essential that they be supplied with nutrient material free from pre-existing organisms. Hitherto various kinds of such nutrient liquids have been employed, and in many cases they still continue to be used with advantage, but as a general rule they have been in a great measure supplanted by the methods of cultivation in sterile solid media (Crookshank), as nutrient gelatin, nutrient agar-agar, nutrient jelly in test-tube and

plate-cultivations, sterilized potatoes, potato-paste, bread-paste, vegetables, fruit, white of egg, and solid blood-serum. The liquid media are sterilized bouillon, liquid blood-serum, urine, milk, vegetable infusions, and artificial nourishing fluids. See *Bacterium*.

Bacteria'ceæ. Group of micro-organisms including micrococci, bacilli, and straight or spiral thread-like forms. In Zopf's arrangement it includes the genera Bacterium, Spirillum, Vibrio, Leuconostoc, Bacillus, Clostridium. Also schizomycetes.

Bacteriæ'mia. Condition in which bacteria are present in the blood.

Bacte'rial, Bacte'rian, or **Bacter'ic.** Relating to bacteria.

Bacte'ricide (*bacteria, cædo,* to kill). Destruction of bacteria; antibacterian; germicide.

Bacterid'ium. Formerly considered a genus of vibriones, but now included under bacillus and micrococcus. **B. auranti'acum,** micrococcus aurantiacus. **B. prodigio'sum,** bacillus prodigiosus.

Bacte'riform or **Bacte'rioid.** Resembling bacteria.

Bacterinu'ria or **Bacteru'ria** (*bacteria, ouron,* urine). Condition or emission of urine charged with bacteria.

Bacte'rioid. Having shape like a rod.

Bacterioidom'onas (*bacteria, eidos,* form, *monas,* unit). Genus of micro-organisms intermediate between schizomycetes and protozoa.

Bacteriol'ogist (*bacteria, logos,* study). One who interests himself in the study of bacteria.

Bacteriol'ogy. Description of, or treatise on, or science of, bacteria.

Bacteriophyto'ma (*bacteria, phuton,* growth). Cell composed of bacterial growths.

Bacte'rio-pur'purin. Purplish coloring matter in protoplasm of some of the chromogenic bacteria.

Bacterios'copy. Study or examination of bacteria.

Bacteriother'apy. Treatment of disease by bacteria, as of phthisis by inhaling cultures of bacteria.

Bacterium (bak-te're-um). See *Bacteria.* **B. acti'noclad'othrix** (Afanasjeff). Actinomyces. **B., aëro'bic,** see *Aërobic.* **B. aëro'genes** (Miller), from normal alimentary canal; non-pathogenic; bacillus aërogenes. **B. aërugino'sum,** bacillus aërogenes. **B., anaëro'bic,** see *Anaërobic.* **B., chromogen'ic,** see *Bacteria.* **B. co'li commu'ne,** bacillus coli communis. **B. cyano'genum,** bacillus cyanogenus. **B., ectog'enous,** B. having its origin outside the organism. **B., endog'enous,** B. supposed to have its origin within the body. **B., ferment'ative,** see *Bacteria.* **B. gliscro'genum** (Malerba), found in viscid acid urine; non-pathogenic. **B. Hes'sii,** bacillus Hessii. **B. ianthi'num,** bacillus ianthinus. **B. lac'tis,** bacillus lacticus. **B. l. aëro'genes,** bacillus lactis aërogenes. **B. lu'teum** (List), found in water; non-pathogenic. **B., metabiot'ic,** bacteria which depend for vitality on presence of other bacteria. **B., pathogen'ic,** see *Bacteria.* **B. phosphores'cens,** bacillus phosphorescens. **B., putrefac'tive,** see *Bacteria.* **B., pyogen'ic,** pus-producing bacterium. **B., saprogen'ic** or **saprophyt'ic,** see *Bacteria.* **B., symbiot'ic,** bacteria which exist together in a locality. **B. ter'mo** (Vignal), found in normal saliva; non-pathogenic. **B. tholoï'deum,** bacillus of Gessner. **B. ure'æ,** from ammoniacal urine. **B. Zop'fii** (Kurth), from intestines of chickens; non-pathogenic. **B. Zürnia'num** (List), in water; non-pathogenic. **B., zymogen'ic,** see *Bacteria.*

Bacteriu'ria. Bactinuria.

Bac'teroid. Having shape of a rod.

Bactris (bak'tris) (*baktron,* stick) **min'ima** or **mi'nor.** Pulp of this plant of W. Indies and S. America is used in bronchial catarrh.

Bactyrilobium, bak-tir-il-o'be-um (dim. of **Bakterion,** cane, *lobion,* pod). Cassia fistula. **B. fis'tula,** Cassia fistula.

Bac'uliform. Rod-shaped.

Bac'ulus. Bacillus.

Bad. Sick. **B. disease,** syphilis. **B. sick'ness** (of Ceylon), beriberi.

Badal's opera'tion. Treatment of glaucoma by stretching or rupture of infratrochlear branch of nasal nerve.

Badia'ga. Russian sponge, powder of which takes away livid marks from blows and bruises.

Badiera diversifolia, bad-e-a'rah div-ur-se-fo'le-ah. Bastard lignum vitæ of W. Indies; properties similar to guaiacum.

Badisis (bad'is-is) or **Badis'mus.** Walking.

Baduk'ka. Capparis badukka.

Badula mecrantha, bad'u-lah me-kran'thah. Plant of Mauritius; diuretic.

Badulam. Ardisia humilis of Ceylon, whose fruit, made into syrup, is used as a cooling drink.

Bæckea Chinensis (be'ke-ah chi-nen'sis) or **frutes'cens.** Species of Asiatic myrtaceous plants; diuretic and abortifacient.

Bael. Covolam.

Bæobotrys picta, be-ob'ot-res pik'tah (*baios,* small, *botrus,* grape). Saoria.

Bæomyces (*baios,* small, *mukes,* fungus) **cocciferus,** be-om'is-es cok-sif'er-us. Species of European lichens used in intermittent fevers.

Baer's ves'icle. Ovum in Graafian follicle.

Bag. Scrotum; mamma. **B., dust'ing,** see *Dusting-bag.* **B., hon'eycomb,** reticulum of ruminant animals. **B., ice,** arrangement, usually of rubber, to hold ice for application to the spine or other part. **B. of wa'ters,** see *Liquor amnii.*

Bagnio, ban'yo. Bath-house; baptisterium.

Ba'hel. Plant of Malabar, whose bruised leaves are applied as cataplasms. **B. Schulli,** Genista spinosa Indica.

Bahia arachnoïdea, bah-he'ah ar-ak-no-id'e-ah. Butterfly plant of California; tonic and stomachic, especially in convalescence. **B. pow'der,** Goa powder.

Baibula. Plantago major.

Bain-Marie (F.). Apparatus for immersion of solutions, bacteria, at a certain fixed temperature, in water or other prepared liquid.

Ba'ker's itch. Psoriasis; lichen; eczema, noticed on hands of bakers. **B.'s salt,** ammonii carbonas.

Balæna mysticetus, bal-e'nah mis-tis'e-tus. Greenland whale, from which whale oil and whalebone are derived.

Balam-pul'li. Tamarindus.

Balan'da. Fagus sylvatica.

Balaneum, bal-an-e'um. Bath.

Balanism, bal'an-izm (*balanos,* suppository). Application of suppository or pessary.

Balanitis, bal-an-e'tis (*balanos,* glans penis). Gonorrhœa spuria. **B. blennorrho'ïca,** gonorrhœa spuria. **B. diabet'ica,** B. caused by contact with saccharine urine. **B., gonorrhœ'al,** gonorrhœa involving glans penis.

Balano, bal'an-o. In composition, balanus, or glans penis.

Balanoblennorrhœa, bal-an-o-blen-nor-rhe'ah. Gonorrhœa spuria.

Balanocastanum, bal-an-o-kast'an-um (*balanos,* acorn, *kastanon,* chestnut). Bunium bulbocastanum.

Balanoplasty, bal'an-o-plas-te (*balano, plasso,* to form). Plastic operation on glans penis.

Balanoposthitis, bal-an-o-pos-the'tis (*balano, posthe,* prepuce). Gonorrhœa spuria; inflammation of glans and penis.

Bal'ano-prepu'tial. Relating to glans penis and prepuce.

Balanorrhagia, bal-an-or-raj'e-ah (*balano, rhegnumi,* to burst forth). See *Gonorrhœa.*

Balanorrhi'num. Secretion occurring in balanitis.

Balanorrhœa, bal-an-or-rhe'ah (*balano, rheo,* to flow). Gonorrhœa spuria; purulent balanitis.

Balanos, bal'an-os. Suppository; glans penis. **B. phœ'nicos,** date.

Balantidium (bal-an-tid'e-um) **co'li.** Infusory animalcule in alvine discharges of chronic diarrhœa, dysentery, etc.

Balantion, bal-an'te-on. Scrotum.

Balantiophthalmus, bal-an-te-of-thal'mus (*balantion,* bag, *ophthalmos,* eye). Bag-like appearance of the eyelids.

Balanus, bal'an-us (glans). Glans penis, glans clitoridis. Hence, *Balanoblennorrhœa,* blennorrhœa

of glans; *Balanitis*, inflammation of glans. Suppositories and pessaries were formerly called *Balani*. **B. myrep'sica**, Guilandina meringa.

Balasan. Tree of Mecca furnishing balsamia opobalsamum.

Balatro, bal-at'ro. Bambalio.

Balaustine (bal-aws'tin) or **Balaus'tium flow'ers.** See *Punica granatum.*

Balbiani's nucleus, bal-be-an'e's nu'kle-us. Nucleus of yolk of ovum.

Bal'bis (foundation). Oblong cavity. Olecranon cavity of humerus.

Balbul. Acacia Arabica.

Bal'bus. Stammering or lisping; stammerer.

Balbuties, bal-bu'she-es. *St. Vitus's dance of the voice.* Stuttering, stammering. Vicious and incomplete pronunciation, consonants being usually replaced by *b* and *l*—*Traulismus.*

Bald. Without hair on the head. See *Alopecia* and *Calvities.*

Baldmoney, bald'mun-e. Æthusa meum.

Bald'ness. Alopecia, calvities. **B., lim'ited** or **par'tial**, porrigo decalvans.

Balenas, bal-e'nas (*balæna*, whale). Leviathan penis.

Balimbago, bal-im-bah'go. Hibiscus populeus.

Ball. Round part of great toe or thumb. Bolus, pila. **B. of eye**, globe of eye. **B.-and-socket joint**, see *Enarthrosis.* **B. soda**, British barilla, consisting of sodium carbonate and calcium oxysulphide.

Ballast fever. Fever contracted on shipboard from ballast.

Ballismus, bal-liz'mus (dancing). Chorea, disordered muscular movement.

Ballista, bal-lis'tah. Astragalus.

Ballistic galvanometer, bal-lis'tik gal-van-om'et-ur. Instrument for estimating force of brief galvanic currents.

Ballock-grass, bal'lok. Orchis mascula.

Balloon, bal-loon'. Receiver used in chemistry. **B. vine**, Cardiospermum heliocacabum.

Ballooning, bal-loon'ing. Tympanistic distension of the abdomen. Distending a cavity or canal, as the vagina or rectum, with air or water in air-bags or water-bags.

Ballota fœtida, bal-lo'tah fet'id-ah. *Black horehound, Stinking h.*, ord. Labiatæ. Antispasmodic, resolvent, and detersive. **B. lana'ta**, a plant growing in Siberia. Whole plant, except root, recommended in dropsy, rheumatism, and gout as diuretic, in decoction. **B. ni'gra** grows in Europe; antispasmodic. **B. suave'olens**, plant of Antilles and India; nervine, sedative, diuretic, and laxative.

Ballottement (F.), bal-lot'mong. Agitation, succussion, repercussion. Motion impressed on fœtus in utero by alternately pressing the uterus with the index finger of one hand introduced into the vagina, the other hand being applied on the abdomen. **B., re'nal**, palpation so practised over abdomen and lumbar region as to cause kidney to strike anterior wall of abdomen. **B., vagi'nal**, see *Ballottement.*

Balm (contracted from **Balsam**). Melissa; healing ointment; anodyne medicine. See *Balsam.* **B. ap'ple**, Momordica balsamina. **B., bas'tard**, Melitis melissophyllum. **B. of Gil'ead**, Amyris opobobalsamum. **B. of Gil'ead pop'lar**, Populus candicans. **B. of Gil'ead, Sol'omon's**, see *Tinctura cardamomi.* **B. of Gil'ead tree**, Dracocephalum Canariense. **B., In'dian**, Trillium latifolium. **B., mount'ain**, Monarda coccinea. **B., pop'lar**, Populus balsamifera. **B., red**, Monarda coccinea. **B., scar'let rose**, Monarda coccinea. **B., stink'ing**, hedeoma. **B. tea**, infusion of melissa.

Balmony, bal'mo-ne. Chelone glabra.

Balneæ, bal'ne-a. Baths.

Balnearium, bal-ne-ah're-um (*balneum*, bath). See *Hypocaustum.*

Balnearius (bal-ne-ah're-us) or **Balneator**, bal-ne-ah'tor. Bather or attendant on bather. *Balneatrix* is such female attendant.

Balneation, bal-ne-a'shun. Bathing; balneotherapy.

Balneatory, bal'ne-a-to-re. Relating to bathing.

Balneography, bal-ne-og'ra-fe (*balneum, graphe*, description). Description of baths.

Balneology, bal-ne-ol'o-je (*balneum, logos*, description). Treatise on baths; science of bathing.

Balneophysiology, bal-ne-o-fis-e-ol'o-je. Physiology of bathing.

Balneotherapeutics (bal-ne-o-ther-a-pu'tiks) or **Balneotherapy**, bal-ne-o-ther'a-pe (*balneum, therapeia*, treatment). Treatment of disease by baths.

Balneum, bal'ne-um. Bath. **B. ac'idum**, acid bath. **B. aë'reum**, air bath. **B. æroph'orum**, effervescing bath. **B. alkali'num**, alkaline bath. **B. am'yli**, starch bath. **B. anima'le**, animal bath. **B. antipso'ricum**, bath, antipsoric. **B. antisyphilit'icum**, bath, antisyphilitic. **B. aq'uæ**, water bath. **B. are'næ**, bath, sand. **B. calid'ulum**, warm bath. **B. cal'idum**, hot bath. **B. chlorina'tum**, bath to which some form of chlorine has been added, as antiseptic, disinfectant, etc. **B, cœno'sum**, mud bath. **B. frig'idum**, cold bath. **B. fur'furis**, bran bath. **B. gelatino'sum**, bath, gelatinous. **B. mari'æ**, bath, water. **B. mari'num**, bath, sea. **B. ma'ris**, bath, water. **B. medica'tum**, bath, medicated. **B. nu'triens** or **nutri'tium**, nutritive bath. **B. pen'sile**, shower bath. **B. Rus'sicum**, Russian bath. **B. sic'cum**, dry bath. **B. sola're**, sun bath. **B. sudato'rium**, sweat bath. **B. sulphurat'um** or **sulphu'reum** or **sul'phuris**, bath, sulphur. **B. tep'idum**, see *Bath, hot.* **B. terres'tre**, earth bath. **B. therma'le**, warm bath. **B. Tur'cicum**, Turkish bath. **B. va'poris**, see *Bath, hot*, and *Vaporarium.*

Balsam, ball'sam. Natural vegetable substance, concrete or liquid, very odorous, bitter, and piquant; composed of resin, benzoic or cinnamic acid, and sometimes essential oil, which allow benzoic acid to be disengaged by action of heat; readily dissolved in volatile oil, alcohol, and ether; when treated with alkalies, affords soluble benzoate and throws down resin. Many pharmaceutical preparations and resinous substances, possessed of balsamic smell, are called balsams. **B., acous'tic**, mixture of oils, sulphur, and tinctures of fetid gums; dropped into the ear in atonic deafness. **B., Amer'ican**, see *Myroxylon Peruiferum.* **B., apoplec'tic**, medicine composed of several balsams, properly so called, resins, and volatile oils, worn about the person and smelled at in headaches, etc. **B. ap'ple**, Momordica balsami. **B. of Arcæ'us**, unguentum elemi compositum. **B., Can'ada**, see *Pinus balsamea.* **B. capi'vi**, copaiba. **B., Carpa'thia**, *Hungarian turpentine.* Resin of Pinus cembra, growing in Switzerland and Hungary. **B., chalyb'eate**, mixture of nitrate of iron, alcohol, and oil, formerly employed in friction in pains of joints. **B., comman'der's**, tinctura benzoini composita. **B. of copai'va**, copaiba. **B. for cuts**, tinctura benzoini composita. **B. of Fioravan'ti, spir'ituous**, or **of Fioraven'ti**, product of distillation of resinous and balsamic articles and aromatic substances previously macerated in alcohol, used in friction in chronic rheumatism. The *spirituous balsam* is the first product of distillation from a sand bath; entirely alcoholic. *Oily balsam of Fioraventi* is obtained by removing the residue and distilling in an iron vessel at white heat. *Black balsam of Fioraventi* is black oil obtained at temperature sufficient to carbonize the substances in a cucurbit. **B. of fir**, see *Pinus balsamea.* **B., fri'ar's**, tinctura benzoini composita. **B. of Gil'ead**, Amyrus opobalsamum. **B., Gurgi'na**, see *Dipterocarpus.* **B., Gur'jun**, see *Dipterocarpus.* **B. herb**, Justicia comata, Dianthera repens. **B. of hon'ey**, cough mixture of benzoin, balsam of Tolu, honey, and alcohol. **B. of hore'hound**, tincture of horehound, licorice-root, camphor, opium, benzoin, dried squills, oil of aniseed, and honey. **B., Hunga'rian**, see *Pinus mughos.* **B., hypnot'ic**, preparation containing opium, hyoscyamus, camphor, and other sedative substances, used externally in friction to provoke sleep. **B., hyster'ic**, preparation of opium, aloes, asafœtida, castor, distilled oils of rue, amber, etc., held to the nose, applied to navel, or rubbed on hypogastrium in hysterical

cases. **B., In'dian,** see *Myroxylon Peruiferum.* **B., iod'uretted,** used by friction, in goitre, in Switzerland; composed of animal soap, iodide of potassium, alcohol, essence of lemon. **B. of life,** decoctum aloes compositum. **B. of life of Hoffman,** tincture composed of essential oils and ambergris, employed internally and externally as stimulant. Mixture of essential oils without alcohol constitutes Saxon balsam, Balsamum apoplecticum, B. aromaticum, B. cephalicum, B. Saxonicum, B. nervinum, B. Scherzeri, B. stomachicum. **B. of life, Tur'lington's,** see *Tinctura benzoini composita.* **B. of liquidam'bar,** solid balsam obtained from Liquidambar styraciflua. **B. of Mec'ca,** see *Amyris opobalsamum.* **B., Mex'ican,** see *Myroxylon Peruiferum.* **B., nat'ural,** see *Myroxylon Peruiferum.* **B., nephrit'ic,** medicine composed of oils, resins, and balsams, which have experienced incipient state of carbonization from concentrated sulphuric acid; given in certain affections of the kidneys. **B., ner'vous,** ointment of fatty bodies, volatile oils, balsam of Peru, camphor, etc.; employed in friction in sprains and rheumatic pains. **B. parei'ra bra'va,** soft mixture of balsam, resin, muriate of ammonia, and powder of root of Pareira brava, given internally to excite urinary secretion. **B. of Peru, red,** see *Toluifera balsamum.* **B. of Peru, white,** see *Myroxylon Peruiferum.* **B., Peru'vian,** see *Myroxylon Peruiferum.* **B., pine,** Abies Menziesii. **B., pop'lar,** Populus balsamifera. **B. of the Samar'itan,** liniment prepared by boiling together, at gentle heat, equal parts of wine and oil. **B., Sax'on,** balsam of life of Hoffman. **B., spruce,** Abies balsamea. **B. of sto'rax,** derived from Liquidambar Orientale. **B. of sul'phur,** *Balsamum sulphuris,* solution of sulphur in oil. **B. of sulphur, an'isated,** in essential oil of aniseed; carminative; **B. of sulphur, suc'cinated,** in oil of amber; **B. of sulphur, terebin'thinated,** *Common Dutch drops,* in essential oil of turpentine; diuretic. **B. of sym'pathy,** balsam used in days when sympathetic influence was strongly believed in, composed of raspings of human skull, blood, and human fat, and applied to instrument which had inflicted the wound. **B. of Tolu',** see *Toluifera balsamum.* **B., tran'quil,** liquid medicine employed externally by friction; prepared by macerating and boiling in olive oil narcotic and poisonous plants, belladonna, mandragora, hyoscyamus, etc., and afterward infusing aromatic plants; anodyne. **B., Tur'key,** Dracocephalum Canariense. **B., Tur'lington's,** see *Tinctura benzoini composita.* **B. of tur'pentine,** Dutch drops; obtained by distilling oil of turpentine in glass retort until red balsam is left. **B., vul'nerary, of Mindere'rus,** liniment of turpentine, resin elemi, oil of St. John's wort, and wax; employed in friction and as dressing to wounds. **B. weed,** Impatiens fulva. **B., white, of Peru,** Myroxylon Peruiferum. **B., wound,** tinctura benzoini composita.

Balsamaceæ (bal-sam-ah'se-e) or **Balsamifluæ,** balsam-if'lu-e. Natural order of plants, including one genus, liquidambar.

Balsamadendron (bal-sam-ah-den'dron) **Africa'num** (*balsam, dendron,* tree). Shrub of W. Africa, source of gum resin called African bdellium. **B. Ehrenbergia'num,** B. opobalsamum. **B. Gileaden'se,** Amyris Gileadensis. **B. mukul,** plant of India, from which East Indian bdellium is derived. **B. myr'rha,** tree of E. Africa and Arabia, a source of myrrh; see *Myrrha.* **B. opobal'samum,** African tree, from which balm of Gilead is procured. **B. Roxburg'hii,** indigenous in India; a source of E. Indian bdellium.

Balsama'ria inophyl'lum. See *Fagara octandra.*

Balsamation, bal-sam-a'shun. Embalming.

Balsamelæon, bal-sam-el-e'on (*balsam, elaion,* oil). Myroxylon Peruiferum, Amyris opobalsamum.

Balsamic, bal-sam'ik. Possessing qualities of balsams, as balsamic odor.

Balsamina, bal-sam'in-ah. Momordica.

Balsamita (bal-sam-e'tah) **fœm'ina.** Achillea ageratum. **B. major,** Tanacetum balsamita. **B. ma'ris,** B. odorata. **B. mas,** Tanacetum balsamita. **B. mi'nor,** Achillea ageratum. **B. odora'ta** or **suave'olens,** plant common in south of France, used for same purposes as tansy, as a stimulant, vermifuge, etc. See *Tanacetum balsamita.*

Balsamito, bal-sam-e'to. Alcoholic extract of fruit of Myroxylon pereiræ. Stimulant, diuretic, anthelmintic.

Balsamoden'dron. Balsamadendron.

Balsamosaccharum, bal-sam-o-sak'ar-um. Sugar rubbed up with balsam. Elæosaccharum.

Balsamum, bal'sam-um. Balsam, Amyris opobalsamum. **B. Ægyp'ticum,** see *Amyris opobalsamum.* **B. al'bum,** see *Myroxylon Peruiferum.* **B. alpi'ni,** Dracocephalum Canariense; see *Amyris opobalsamum.* **B. anod'ynum,** linimentum saponis et opii. **B. apoplec'ticum,** balsam of life of Hoffmann. **B. arcæ'i,** unguentum elemi compositum. **B. aromat'icum,** balsam of life of Hoffmann. **B. Asiat'icum,** see *Amyris opobalsamum.* **B. Brazilien'se,** copaiba. **B. cal'aba,** E. India tacamahac; see *Fagara octandra.* **B. Canaden'se,** see *Pinus balsamea.* **B. Carpath'icum,** Carpathian balsam. **B. cathol'icum,** tinctura benzoini composita. **B. cephal'icum,** balsam of life of Hoffmann. **B. commendato'ris,** tinctura benzoini composita. **B. co'pahu,** copaiba. **B. copai'bæ,** copaiba. **B. c. sic'cum,** resin of copaiba. **B. dipterocar'pi,** Gurjun balsam. **B. Fioravan'ti,** balsam of Fioravanti. **B. genui'num antiquo'rum,** see *Amyris opobalsamum.* **B. Gileaden'se,** balm of Gilead. **B. gur'junæ,** wood oil; gurjun balsam. **B. Hunga'ricum,** Hungarian turpentine. **B. hyper'ici sim'plex,** see *Hypericum perforatum.* **B. In'dicum,** see *Myroxylon Peruiferum.* **B. iodure'tum,** balsam, ioduretted. **B. Juda'icum,** see *Amyris opobalsamum.* **B. Lib'ani,** see *Pinus cembra.* **B. Locatel'li,** balsam of Locatelli. **B. mari'æ,** E. India tacamahac; see *Fagara octandra.* **B. e. Mec'câ,** see *Amyris opobalsamum.* **B. mercuria'le,** unguentum hydrargyri nitratis. **B. nervi'num,** balsam of life of Hoffmann. **B. nucis'tæ,** see *Myristica.* **B. ophthal'micum ru'brum,** unguentum hydrargyri nitrico-oxidi. **B. opodel'doc,** linimentum saponis camphoratum. **B. Parisien'se,** resin of copaiba. **B. Per'sicum,** tinctura benzoini composita. **B. Peruvia'num,** see *Myroxylon Peruiferum.* **B. P. ni'grum,** balsamum Peruvianum. **B. saturni'num,** unguentum plumbi superacetatis. **B. Scherz'eri,** balsam of life of Hoffmann. **B. stomach'icum,** balsam of life of Hoffmann. **B. stora'cis,** storax. **B. styra'cis,** styrax. **B. s. benzo'ini,** benjamin. **B. suc'cini,** see *Succinum.* **B. sul'phuris Barbaden'se,** petroleum sulphuratum. **B. s. Rulan'di, B. s. terebinthina'tum,** sulphurated oil of turpentine. **B. s. sim'plex,** oleum sulphuratum. **B. Syri'acum,** see *Amyris opobalsamum.* **B. terebin'thinæ larici'na,** Venice turpentine. **B. Toluta'num,** see *Toluifera balsamum.* **B. tran'quillans** or **tran'quillum,** balsam, tranquil. **B. traumat'icum,** tinctura benzoini composita. **B. universa'le,** unguentum plumbi superacetatis. **B. ve'rum,** balm of Gilead. **B. vir'ide,** E. India Tacamahac; see *Fagara octandra.* **B. vi'tæ Hoffman'ni,** Hoffmann's balsam of life.

Balsamus, bal'sam-us. Balsam. See *Balsamum.* **B. palus'tris,** Mentha aquatica.

Balsem, bal'sem. Amyris opobalsamum.

Bambaceia (bam-ba-se'ah), **Bambacent'ria,** or **Bamba'cia,** Pharmacy, particularly as concerns toxicology.

Bambalia, bam-bal'e-ah. Balbuties.

Bambalio, bam-bah'le-o (*bambaino,* to speak inarticulately). One who stammers or lisps, or utters inarticulate sounds, as if he had pap in his mouth or his tongue were paralyzed.

Bamboo, bam-boo'. Young shoots of Bambos arundinacea and B. verticillata, plants of India, containing saccharine pith, sometimes made into pickle; juice of the green leaves is emmenagogue and parturifacient. **B. brier,** Smilax sarsaparilla.

Bambos (bam'bos) **arundina'cea.** Bamboo. **B. verticilla'ta,** bamboo.

Bambusa arundinacea, bam-bu'sah ar-un-din-ah'se-ah. E. Indian species of gramineous plants, astringent, antispasmodic, and anthelmintic; bamboo.

Bamia moschata, bam'e-ah mos-kat'ah. Hibiscus abelmoschus.

Bamma, bam'mah (*bapto,* to plunge). Liquid in which bodies are plunged to moisten or soften them; tea, for instance, into which bread is dipped.

Banana, ban-an'ah. Musa sapientum. The root is alterative.

Banaus'ia (quackery). Charlatanry.

Bancksia Abyssinica, bank'se-ah ab-is-sin'ik-ah. Hagenia Abyssinica.

Bancoul' oil. Oil obtained from Alemites triloba.

Band. Ligament; strip; cord. **B., amniot'ic,** band of false membrane on inner part of amnion, sometimes constricting the fœtus. **B., a'no-gen'ital,** rudimentary state of perineum. **B., ax'is,** primitive streak; axis-cylinder. **B., den'tate,** fascia dentata. **B., epithe'lial,** band of cells in embryo from which teeth are formed. **B., flat'tened,** axis-cylinder; see *Nerve-fibre.* **B., fœ'to-amniot'ic,** B., amniotic. **B., front'al,** circular head bandage. **B., fur'rowed,** B. of gray matter between uvulæ of cerebellum and amygdalæ. **B., head,** B., frontal. **B., hippocam'pal,** tæni hippocampi. **B., mesoblas'tic,** mesoblastic cells running full length of embryo. **B., mod'erator,** columnæ carneæ of ventricles of heart. **B., perine'al,** bandage passing over perineum in fractures. **B., prim'itive,** axis-cylinder. **B. of Reil,** triangular space on each side of crus cerebri. **B. of Remak',** axis-cylinder; see *Nerve-fibre.* **B., vo'cal,** vocal cords.

Bandage, ban'daj. A binder; methodical application of rollers, compresses, etc., or bandaging, to fix apparatus on any part; result of such application, or bandage itself. If the turns are very oblique and separated, it is the *spiral bandage;* if folded upon each other, the *reversed.* By uniting various kinds of bandaging, we have *compound bandages,* which receive various names expressive of their figure or of parts to which they are applied, as *capistrum, spica,* etc. Bandages are divided also, as regards their uses by the surgeon into *uniting, dividing, retaining, expelling, compressing,* etc. A bandage or roller may be made of linen, flannel, or other stuff capable of offering a certain amount of resistance. If rolled at both extremities, it is called a *double-headed roller* or *bandage.* **B., a'pron,** folded cloth applied to chest by strips. **B., Bar'ton's,** B. for fracture of head and jaw, forming three circles. **B., Bayn'ton's,** B. of adhesive strips for treatment of ulcers of leg. **B., bel'ly,** body b. for compression of abdomen, especially for dropsy. **B., bod'y,** band used for fixing dressings, etc. to the trunk; is formed of towel, napkin, or large compress folded three or four times, the ends being fastened by pins. This is again fixed by a scapulary b., which is an ordinary b. stitched to anterior and middle part of napkin, passing over the clavicles and behind the head, to be attached to back part of napkin. **B., breast,** B. for support of breast or breasts. **B., cap'eline,** bonnet of Hippocrates, for compressing head or retaining dressings. **B., capis'trum,** B. for lower jaw, somewhat like Barton's b. **B., chalk,** form of immovable b., composed of chalk and gum arabic. **B., chirothe'ca,** complete spiral reverse b. of hand and fingers. **B., cir'cular,** B. with one or two simple turns around a part. **B., com'pound,** see *Bandage.* **B., compress'ing** or **compress'ive,** roller head employed in ulcers, varices, etc. of limbs, or wherever compression may be required. **B., contain'ing,** retention b. **B., contin'uous,** spiral b. **B., cru'cial,** T-bandage. **B., Desault's,** B. employed in fractured clavicle, comprising head for axilla, two single-headed rollers, and some compresses. **B., dex'trin,** immovable b., made of dextrin, alcohol, and water. **B., divi'ding,** see *Bandage;* B. intended to keep parts separated. **B., double-head'ed,** see *Bandage.* **B., eight'een-tailed,** made of longitudinal portion of common roller, with sufficient number of transverse pieces or tails to cover as much of the part as is requisite; can be undone without disturbing the part. **B., elas'tic** or **Es'march's,** rubber b. tightly applied to limb before amputation, to remove blood from it and to act as tourniquet. **B., expel'ling,** compression b. to produce expulsion of pus, etc.; see *Bandage.* **B., fig'ure-of-8,** see *Figure-of-8.* **B., Ga'len's,** B. for the poor; kind of cucullus or hood, divided into three parts on each side, to retain applications to the head; see *Cancer Galeni.* **B. of Gen'ga,** B. of Theden. **A., Gib'son's,** B. for lower jaw. **B., glass,** B., silicate. **B., glue,** immovable b., made of ordinary roller, cotton batting, glue, and alcohol. **B., gum,** immovable b., gum arabic being material employed. **B., gyp'sum,** B., plaster of Paris. **B., hal'ter,** B., capistrum. **B., Ham'ilton's,** compound b. for lower jaw, consisting of leather strap and webbing. **B., hand'kerchief,** loose b. made of handkerchiefs; various bandages may be so made. **B., hard'ening,** B., immovable. **B., her'nial,** see *Truss.* **B., immov'able,** apparatus, immovable. **B., in'guinal,** B. for keeping dressings applied to the groin; cincture, to which is attached triangular compress adapted for covering the groin. To its lower extremity one or two bandages are attached, passing under the thigh and fixed to posterior part of cincture. **B., invag'inated,** see *Invaginated.* **B., jaw,** see *B., Barton's, B., Gibson's,* etc. **B., Lar'rey's,** B. with several tails made adhesive. **B., Lieb'rich's,** form of eye b. made of tapes. **B., many-tailed,** B. of separate strips. **B., nap'kin,** B., handkerchief. **B., par'affin,** immovable b., in which paraffin is the stiffening agent. **B., perine'al,** B. for support of perineum or merely traversing that space. **B., per'manent,** apparatus, immovable. **B., plas'ter of Par'is,** immovable b. in which that article is the stiffening material used. **B. of the poor,** see *B., Galen's,* and *Cancer Galeni.* **B., recur'rent,** roller b. applied in radiating turns over round surface, as end of stump, backward and forward. **B., retain'ing,** B. applied to keep dressing, etc. *in situ.* **B., reversed,** B. in which spiral turns are folded obliquely on themselves. **B., Rib'bail's,** spica b. for foot. **B., roll'er,** see *Bandage* and *B., compressing.* **B., ro'tatory,** B., Winslow's. **B., rub'ber,** B., elastic. **B., sagit'tal,** T-bandage for head, having turns around the head and over the forehead, with a median turn from front to back of head. **B., Sayre's,** B. made of adhesive strips for fracture of clavicle. **B., scalp,** B., capeline. **B., scap'ulary,** B. for application to shoulder. **B., scarf,** B., handkerchief. **B. of Sculte'tus** or **B. of sep'arate strips,** formed of linen strips, each capable of surrounding once and a half the part to which they have to be applied, and placed upon each other so as to cover successively one-third of their width. Used chiefly for fractures requiring frequent dressing. **B., Seu'tin's,** starch b. **B., sil'icate,** immovable b., roller b. being coated with solution of silicate of potassium and sodium and whiting. **B., sim'ple,** see *Bandage.* **B., six-tailed,** B., Galen's. **B., spi'ca,** see *Spica.* **B., spi'ral,** roller b. applied in spiral turns; see *Spiral.* **B., splint,** see *Apparatus, immovable.* **B., starch,** see *Apparatus, immovable.* **B., Star'tin's,** see *Splint.* **B., ste'arin,** immovable a., having stearin as main agent. **B., suspen'sory,** B. applied for suspension of part or organ, as testicles, breast, etc. **B., T.,** B. of two strips attached to each other in shape of letter T, usually applied to keep dressings in place. **B., tailed,** B. partly divided into two or more strips. **B., The'den's,** roller b. sometimes applied in brachial aneurism or hemorrhage, commencing at fingers and ending at axilla. **B., Thil'laye's,** B. with pads and tapes, used for bringing together lips of wound in hare-lip operations. **B., uni'ting,** B. and strips used to bring together edges of wounds, fractured bones, etc. **B., Velpeau's,** B. for fracture of clavicle, with pad in each axilla. **B., Wins'low's,** roller b. rotated around foot, as in talipes; b. suggested by W. for wry-neck, having circular turns of roller b. around head and passed down over shoulder of opposite side, where it is secured.

(Other bandages may be found described under their various names.)

Bandaging, ban'daj-ing. See *Bandage.* **B., doc'trine of,** see *Desmaturgia.*

Bandagist, ban'daj-ist. One who makes bandages or trusses.

Bandl, ring of. Constricting ring above internal os uteri.

Bands of Goll. Columns of Goll.

Ban'duc seeds. See *Cæsalpina.*

Bandura, ban-du'rah. Nepentha destillatoria.

Bandy-legged, ban'de-legd. Having crooked legs. See *Cnemoscoliosis.*

Baneberry, bane'ber-re. Root of Actæa spicata; purgative.

Bane'wort. Atropa belladonna, Ranunculus flammula.

Ban'ghie. Intoxicating drink prepared from Indian hemp.

Bangue, Bhang, Bang, Bangi, or **Beng.** Indian hemp. See *Cannabis.*

Banilas (ban-il'as), **Banilla** (ban-il'lah), or **Banilloes,** ban-il'loze. Vanilla.

Banisteria angulosa, ban-is-te're-ah an-gu-lo'sah. (after Rev. John Banister, botanist). Grows in Brazil and Antilles; powerful sudorific and antidote to poison of serpents. **B. Prag'ua,** species from Brazil, root of which is laxative and emetic.

Banks'ia Abyssin'ica (after Sir Joseph Banks, F.R.S.). Hagenia Abyssinica. **B. marces'cens,** Australian shrub; root is emetic. **B. specio'sa,** costus.

Bankul' oil. Fixed oil from kernel of seeds of Aleurites triloba; cathartic.

Bantingism (ban'ting-izm) or **Ban'ting cure.** Mode of treating corpulence dietetically, practised by non-professional man named Banting, according to rules laid down for him by a medical practitioner of London, consisting mainly in regulating quantity of animal food and diminishing amount of amylaceous and saccharine.

Ba'obab. *Adansonia digitata* of Africa, nat. ord. Bombaceæ. Its fruit is called monkey bread; refreshing drink is made from the pulp, which is used in fevers; bark has been given as substitute for cinchona.

Bap'tin. Glucoside from Baptisia tinctoria; weak cathartic.

Baptisia leucantha, bap-tiz'e-ah lu-kan'thah (*bapto,* to dye). See *Sophora tinctoria.* **B. tincto'ria,** Sophora tinctoria.

Baptisin, bap'tis-in. Resinous extractive matter from Baptisia tinctoria; laxative. Alkaloid is called *Baptisine.* Another alkaloid, very poisonous, from same plant, is called *Baptitoxine;* tonic in small doses.

Baptisterium, bap-tis-te're-um (*baptizo,* to immerse). Swimming-bath; bathing tub; vessel or place for bathing. See *Scaphium.*

Baptitox'ine. See *Baptisin.*

Baptorrhœa, bap-tor-rhe'ah (*bapto,* to infect, *rheo,* to flow). Infectious mucous discharge; gonorrhœa impura.

Baptothecorrhœ'a (*bapto,* to infect, *theke,* sheath, *rheo,* to flow). Gonorrhœa in women.

Bapturethrorrhœa, bap-tu-re-thror-re'ah (*bapto,* to infect, *urethra, rheo,* to flow). Urethral gonorrhœa in men.

Bar. Arch; projection inward of symphysis pubis.

Baræsthesiometer, bar-es-the-se-om'et-ur (*barus,* heavy, *aisthesis,* sensation, *metron,* measure). Instrument devised by Eulenberg for estimating sense of pressure; that is, to ascertain least difference which can be felt at a given spot.

Barb. Fold on sides of frænum linguæ in horse.

Barba, bar'bah. Beard. **B. Aaro'nis,** Arum maculatum. **B. cap'ræ,** Spiræa ulmaria. **B. hir'ci,** tragopogon. **B. jo'vis,** Sempervivum tectorum.

Barbadoes (bar-ba'does) **aloes.** See *Aloes.* **B. leg.** elephantiasis arabum. **B. nut,** Jatropha curcas. **B. tar,** petroleum.

Barbaloïn, bar-bal'o-in. Neutral crystallizable principle from Barbadoes aloes, $C_{34}H_{36}O_{14} + H_2O$.

Barbarea, bar-bar'e-ah. Erysimum barbarea. **B. stric'ta,** Erysimum barbarea.

Barba'ria. Rhubarb.

Barbary (bar'ba-re) **gum.** Variety of gum acacia. **B. worm'seed,** variety of artemisia.

Barbas'co. Plant of Mexico and Venezuela; stalk is medicinal, used in ophthalmic diseases.

Barbatimao, bar-bah-tim-ah'o. Cortex adstringens Brasiliensis.

Bar'ben cholera. Choleraic affection from use of barbed sturgeon as food in some parts of Europe, as Russia.

Barber-chirurgeons, bar'bur-ki-rur'jons. Corporation of London, instituted by King Edward IV. Barbers were separated from surgeons by 18 Geo. II., c. 15; latter were erected into Royal College of Surgeons at commencement of present century. Barber's pole, of present day, is relic of old staff that was grasped, and colored strip passing spirally around it of fillet or tape employed in operation of bleeding.

Bar'berine. Berberine.

Barberry, bar-ber're. Oxyacantha Galeni. **B., Amer'ican,** see *Oxyacantha Galeni.* **B. bark,** bark of root of Berberis vulgaris. **B. juice,** juice of fruit of Berberis vulgaris.

Barber's itch. Tinea barbæ or tinea trichophytina. **B.'s pole,** see *Barber-chirurgeons.*

Bar'biers. Variety of paralysis chiefly prevalent in India.

Barbitium, bar-bish'e-um (*barba,* beard). Beard.

Bar'bone. Pubic bone.

Barbotine, bar'bo-teen. Santonica; tansy.

Barbula (dim. of **Barba**) **caprina,** barb'u-lah kapre'nah. Spiræa ulmaria. **B. hir'ci** or **tra'gi,** see *Tragus.*

Barcelona fever, bar-se-lo'nah fe'ver. Yellow fever.

Barclay, (bar'kla), **an'gle of.** Angle between facial line and plane drawn through line indicating masticating surface of teeth of upper jaw. **B., plane of,** plane at tangent to masticating surfaces of teeth of upper jaw.

Bardana, bar-dan'ah. Arctium lappa. **B., ma'jor,** lappa major. **B., mi'nor,** xanthium.

Bar'egine. Micro-organism—Beggiatoa—noticed on surface of sulphur-spring water.

Barga'da. Convolvulus pes capræ.

Bariglia, bar-il'e-ah. Soda.

Barii (bah're-e) **bro'midum.** Barium bromide. **B. carbo'nas,** barium, carbonate of. **B. chlo'ridum,** barium chloride. **B. io'didum,** barium iodide.

Barilla, bar-il'lah. Soda. **B. al'icant,** soda. **B. Carthage'na,** soda. **B., Tur'key,** soda.

Barium, bah're-um (*barus,* heavy). Metallic base of baryta, so called from great density of its compounds. **B. bro'mide,** colorless, crystalline, soluble salt, poisonous; not used medically. **B. car'bonate** is only used officinally to obtain the muriate. **B. chlora'tum,** barium chloride. **B. chlo'ride** is combination of baryta chiefly used; made by action of muriatic acid on carbonate of barium; given in form of liquor barii chloridi in scrofulous cases, worms, and cutaneous diseases; dose, gtt. v, two or three times a day; used externally in fungous ulcers and specks on the cornea. **B. ioda'tum,** barium iodide. **B. i'odide** has been given in scrofulous and similar morbid conditions, and recently in aneurism as substitute for iodide of potassium; internally in dose of one-eighth of a grain three or four times a day, and applied externally to scrofulous swellings, in form of ointment (gr. iv to ℥j of lard). **B. protox'ide,** baryta. **B. sul'phate** is used in pharmacy, like the carbonate, to obtain chloride of barium.

Bark. Cinchona; see *Cortex.* **B., Ar'ica,** see *Cinchonæ cordifoliæ cortex.* **B., ash,** see *Cinchona.* **B., Angustu'ra,** Galipea cusparia. **B., ba'bul,** bark of several acacias. **B., bebee'ru,** see *Nectandra.* **B., bit'ter,** Pinckneya pubens. **B., Bogota',** see *Cinchona.* **B., Boliv'ian,** variety of Cinchona calisaya. **B., calisa'ya,** Cinchonæ cordifoliæ cortex. **B., calisa'ya, spurious,** see *Cinchonæ cordifoliæ cortex.* **B., canel'la,** see *Canella.* **B., Carabay'a,** see *Cinchonæ cordifoliæ cortex.* **B., Caribbæ'an,** Cinchonæ Caribbææ cortex. **B., Carthage'na,** see *Cinchona.* **B., cascaril'la,** B. of Croton cascarilla and C. pseudo-china. **B. of cas'sia,** B. of Cinnamomum cassia. **B., cher'ry, wild,** Prunus virginiana. **B., chit'tem,** B. of Rhamnus pur-

shiana. **B., cincho'na**, see *Cinchona*. **B., cinnamon**, see *Cinnamon*. **B., Colom'bian**, B. of Cinchona lancifolia and C. cordifolia. **B., Conduran'go**, see *Condurango*. **B., cones'si**, B. of Wrightia antidysenterica. **B., copal'chi**, aromatic bitter tonic bark from Mexico. **B., coquet'ta**, see *Cinchona*. **B., cot'ton-root**, see *Gossypium*. **B., crown**, Cinchona officinalis, best qualities of bark. **B., cu'prea**, B., hard. **B., Cus'co**, see *Cinchonæ cordifoliæ cortex*. **B., di'ta**, aletonia bark. **B., dogwood**, see *Cornus Florida*. **B., doom**, sassy bark. **B., eleuthe'ra**, eleutheric or cascarilla bark. **B., elk**, Magnolia glauca. **B., elm**, see *Ulmus*. **B., essen'tial salt of**, see *Cinchona*. **B., euonymus**, see *Euonymus*. **B., false angustu'ra**, B. of Strychnos nux vomica. **B., false lox'a**, B. of Cinchona Humboldtiana. **B., fib'rous Carthage'na**, B. of Cinchona lancifolia. **B., Flor'ida** or **Geor'gia**, Pinckneya pubens. **B., fran'gula**, see *Frangula*. **B., fugagas'uga**, see *Cinchona*. **B., gerem'ma**, astringent Brazilian bark, from Acacia jurema. **B., gray**, Cinchona pallida; see *Cinchona*. **B., hard**, cinchona bark from species of Remijia. **B., Huamilies**, B. of Cinchona purpurea; see *Cinchona*. **B., Huanuco**, see *Cinchona*. **B., In'dian**, Magnolia glauca. **B., i'ron**, B. of Eucalyptus resinifera; see *Kino*. **B., jack'et**, see *Cinchona*. **B., Jaen**, B. of Cinchona Humboldtiana; see *Cinchona*. **B., Jamai'ca**, B. of Exostema caribbæum. **B., Jes'uit's**, cinchona. **B., jure'ma**, B., geremma. **B., juribali**, astringent bark of Demarara; laxative, diaphoretic, antipyretic. **B., lace**, Lagetta lintearia. **B., Lima**, Huanuco bark; b. of Cinchona micrantha; see *Cinchona*. **B., Lox'a**, Cinchonæ lancifoliæ cortex. **B., Malam'bo**, B. like that of Angustura, from Drimys Granatensis, Croton malambo, etc., given in rheumatism, tetanus, diseases of stomach and bowels, etc. **B., Maracai'bo**, B. of Cinchona tucujensis; see *Cinchona*. **B., Massoy** or **Missoy**, E. Indian bark, a variety of cinnamom. **B., neem**, Melia azedarach. **B., negril'la**, B. of Cinchona heterophylla. **B., oak, white**, Quercus alba. **B., or'ange**, B. of Cinchona lancifolia. **B., orde'al**, sassy bark. **B., pale**, Cinchona pallida; see *Cinchona;* Cinchona lancifoliæ cortex. **B., Peru'vian**, cinchona. **B., Philadel'phia**, Quercus tinctoria. **B., Pitaya** or **Pitayo**, B. of Cinchona pitayensis; Cinchona Caribbææ cortex; see *Cinchona*. **B., quercit'ron**, B. of Quercus tinctoria. **B., red**, Cinchonæ oblongifoliæ cortex; see *Cinchona*. **B., roy'al**, Cinchonæ cordifoliæ cortex. **B., sacred**, B. of Rhamnus purshiana. **B. of Saint Ann**, see *Cinchonæ cordifoliæ cortex;* B. of Cinchonæ scrobiculata. **B., Saint Lucia**, Cinchonæ Caribbææ cortex; B. of Exostema floribundum. **B., San'ta Mar'tha**, see *Cinchona*. **B., sas'sy**, sassy bark. **B., sev'en**, Hydrangea arborescens. **B., sil'ver**, gray or pale cinchona bark; see *Cinchona*. **B., soap**, Quillajo bark. **B., string'y**, Eucalyptus b. **B., sweet-wood**, cascarilla b. **B., W. Indies**, B. of Exostema Caribbæum. **B., white**, B. of cascarilla macrocarpa and several cinchonas. **B., white wood**, Canella alba. **B., wild cher'ry**, Prunus Virginiana. **B., Winter's**, B. of Drimys Winteri and other undetermined sources, reasonably cinnamon. **B., worm**, Andira inermis. **B., yel'low**, Cinchona flava; Cinchonæ cordifoliæ cortex.

Bark'ing disease. Epidemic hysteroidal affection in Germany in 15th century.

Barleria buxifolia, bar-le're-ah buks-e-fo'le-ah. Dicranacanthus buxifolia; root is aperient. **B. mysosen'sis** of Ceylon has same properties. **B. prioni'tis** or **pubiflo'ra**, juice of this E. Indian plant is used in aphthæ and fevers.

Barley, bar'le. Hordeum. **B. bree**, cerevisia. **B., caus'tic**, seeds of Veratrum sabadilla. **B. corn**, cerevisia. **B. flour** or **meal**, see *Hordeum*. **B. malt**, see *Hordeum*. **B. mole**, acarus hordei. **B., pearl**, see *Hordeum*. **B., Scotch**, hordeum. **B. water**, decoctum hordei.

Barnes's cer'vical zone. Part of cavity of uterus above cervix. **B.'s curve**, segment of a circle taking promontory of sacrum as its centre.

Baromacrometer, bar-o-mak-rom'et-ur (*baros*, weight, *makros*, long, *metron*, measure). Instrument to indicate length and weight of the new-born.

Barometer (bar-om'et-ur) or **Ba'roscope** (*baros*, weight, *metron*, measure). Instrument to measure weight or pressure of the atmosphere. Certain degree of density is necessary for health. **B., an'eroid**, barometer with thin metallic box, previously exhausted of air, and furnished with an index to denote the changes of atmospheric pressure.

Barometrograph, bar-o-met'ro-graf (*baros*, weight, *metron*, measure, *grapho*, to write), or **Bar'ograph**. Instrument which records the different barometric changes on paper.

Baros, bah'ros (weight). Feeling of lassitude.

Barosaneme, bar-os'an-em (*baros*, weight, *anemos*, wind). Instrument for indicating force of the wind.

Baroscope, bar'o-scop. Barometer.

Barosma betulina (bar-oz'ma bet-u-le'nah), **B. crena'ta** or **crenula'ta**, and **B. serratifo'lia** (*barus*, heavy, *osme*, odor) furnish the long buchu leaves. Diosma crenata.

Barred pelvis, bard pel'vis. Projection or prolongation of symphysis pubis inward, rendering delivery difficult. **B. teeth**, molar teeth when roots are spread or tortuous, so that they cannot be extracted without being broken or without portion of alveolar arch being removed.

Bar'rel chest. Condition of chest after chronic hypertrophic pulmonary emphysema, in which lateral motion is impeded. **B. of ear**, tympanum.

Bar'ren. Sterile.

Barrenness, bar'ren-ness. Sterility.

Barringto'nia acutan'gula. Bengalese plant; root is laxative and tonic; seeds are carminative. **B. racemo'sa**, tree of E. Indies; fruit is errhine, and applied externally in throat affections.

Bar'rows' grease. Adeps præparatus.

Barsa'ti. Atropic carcinoma, a disease of horses, especially of India.

Bartholinitis, bar-tho-lin-e'tis (from derivation, inflammation of Bartholin). Inflammation of Bartholin's or vulvo-vaginal glands.

Bartholinus (bar-tho-le'nus), **duct of.** See *Duct of Bartholinus*. **B., glands of**, Cowper's gland in the female.

Bar'ton's ban'dage. See *Figure of 8*. **B.'s frac'ture**, see *Fracture of Radius, Barton's*. **B.'s opera'tion for ankylo'sis**, cutting out V-shaped portion of bone, first devised and executed by Dr. John Rhea Barton of Philadelphia, in 1826.

Bart'sia odonti'tes. Plant of Asia and Europe, used in menorrhagia and odontalgia,

Baruria, bar-u're-ah (*bary*, *ouron*, urine). Urine having high specific gravity.

Bar'wood. Pterocarpus angolensis.

Bar'y (*barus*, heavy). In composition, heavy, oppressive.

Barycoccalon, bar-e-kok'kal-on (*bary*, *kokkalos*, a nut). Datura stramonium; D. metel.

Barycoi'a, Baryecœ'a, or **Baryëcoia**, bar-e-ek-oi'ah (*akoe*, hearing). Hardness of hearing; incomplete deafness. See *Cophosis* and *Deafness*.

Baryencephalia, bar-e-en-sef-al'e-ah (*bary*, *enkephalos*, brain). Dulness of comprehension or of intellect.

Baryglossia (bar-e-glos'se-ah) or **Baryglot'tia** (*bary*, *glossa*, tongue). Balbuties; baryphonia.

Baryglottic (*bary*, *glossa*, tongue). Having difficulty in expressing one's self in words, or with thickening of speech.

Baryi hydras iodati, bar'e-e he'dras i-o-dat'e. Baryta, hydriodate of.

Barylalia, bar-e-lal'e-ah (*bary*, *lalia*, speech). Baryglossia; baryphonia.

Barymas'tus (*bary*, *mastos*, breast). Having large breasts.

Barymazia (bar-e-maz'e-ah) or **Baryma'sia** (*bary*, *mazos*, breast). Condition of one who has heavy or large breasts.

Baryod'mia (*bary*, *odme*, odor). Strong oppressive odor; sense of offensive smell.

Baryodyne, bar-e-od'in-e (*bary, odune,* pain). Dull, heavy pain.

Baryœcœa, bar-e-e-se'ah. Barycoia.

Baryphonia, bar-e-fo'ne-ah (*bary, phone,* voice). Difficulty or harshness of voice or speech; hoarseness.

Barypicron, bar-e-pik'ron (*bary, pikros,* bitter). Artemisia abrotanum.

Barysomatia (bar-e-so-mah'she-ah) or **Barysomia** (*bary, soma,* body). Polysarcia adiposa; obesity.

Baryta, bar-i'tah (*barus,* heavy). Protoxide of barium, *Heavy earth, Ponderous earth.* This earth and its soluble salts are corrosive poisons, never employed in medicine in pure state; externally applied, it is caustic, like potassa and soda. **B., car'bonate of,** barium carbonate. **B., hydri'odate of,** barium iodide. **B. hydrio'dica,** barium iodide. **B., hydrochlo'rate** or **mu'riate of,** barium chloride. **B. muriat'ica,** barium chloride. **B., sul'phate of,** barium sulphate. **B. wa'ter,** solution of barium hydrate in water.

Bary'tæ carbo'nas. Barium carbonate. **B. hydri'odas,** barium chloride. **B. mu'rias,** barium chloride. **B. sul'phas,** barium sulphate.

Barythymia, bar-e-thim'e-ah (*bary, thumos,* mind). Melancholy.

Barytium (bar-ish'e-um) or **Baryum,** bar'e-um. Barium.

Ba'sad. Toward basal aspect.

Ba'sal. Relating to the base, as base of brain; basi-sphenoid. **B. gan'glia,** optic thalami and corpora striata. **B. mem'brane,** basement membrane.

Basalia, bas-al'e-ah. Metacarpal bones.

Basanastragala, bas-an-as-trag'al-ah (*basanos,* torture, *astragalus*). Pain in ankle-joint; gout in foot.

Basculation, bas-ku-la'shun. Treatment of uterine retroversion by drawing cervix downward and thrusting fundus upward; movement of fœtus, like a balance.

Bascule (bas'kule) **move'ment.** Peculiar recoil of the heart which occurs during systole.

Base. Foundation or support; principal matter in mixture or combination. In anatomy in former sense, as base of cranium, base of brain, base line (line connecting rotary centres of the eyes), etc. In dentistry, a plate used as support for artificial teeth. In prescribing, the base is the chief substance entering into a compound formula. In chemistry, body capable of combining with an acid. **B. line,** see *Base.* **B., organ'ic,** organic alkaloid.

Baseball pitcher's arm. Condition as naturally expected from the occupation, attended with myalgia and muscular debility, and subsequently with affections of the bones.

Baseborn'. Illegitimate.

Base'dow, disease of (after Von Basedow, who described it). Exophthalmic goitre.

Basella alba, bas-el'lah al'bah. Plant of E. Indies; leaves are emollient and used as cataplasms. **B. ru'bra,** Malabar nightshade; Indian plant, juice of which is used in infantile catarrh.

Base'ment mem'brane. See *Membrane.*

Baseo-hyo-epiglotticus, bas'e-o-hi'o-ep-e-glot'tikus. Occasional muscle from hyoid bone to base of epiglottis.

Ba'ses, organ'ic. In chemistry, organic nitrogenous compounds which act on bases. See *Base.*

Bas-fond, bah-fon (F.). Base of bladder.

Ba'sham's mix'ture. Mixture of tincture of chloride of iron, diluted acetic acid, solution of acetate of ammonium, elixir of orange syrup, and water; officinal in Ph. U. S. under name *Mistura ferri et ammonii acetatis;* dose, f℥ss-j.

Ba'sial. Basal; body of vertebra.

Basi-alveolar, ba'se-al-ve'o-lar. Relating to basion and alveolus. **B.-a. length,** distance between basion (point of anterior surface of occipital foramen lying in median line) and alveolar point (centre of anterior edge of upper alveolar arch).

Basiarachni'tis. Inflammation of arachnoid at base of skull.

Basia'tio, bas-e-ah'she-o (*basio,* to kiss). Kissing; coition.

Basiator, bas-e-ah'tor (same etymon). Orbicularis oris.

Ba'sic. Relating to a base.

Basic'ity, ba-sis'it-e. Term signifying the number of atoms of replaceable hydrogen in an acid.

Basi-cranial, ba'se-kra'ne-al. Relating to base of cranium. **B.-c. ax'is,** line drawn within cavity of skull, from central point between condyles of occipital bone to point of union of ethmoid and anterior part of body of sphenoid.

Ba'si-fa'cial. Relating to face and base of skull, as *B. angle,* angle made by intersection of basi-facial and basi-cranial axes; *B.-f. ax'is,* line from centre of superior part of sphenoid bone to that of alveolar process of upper maxillary bone.

Basifier, ba'se-fi-ur. In chemistry, a substance which converts a body into a base.

Basigenic, ba-se-jen'ik (*basis,* base, *gennao,* to produce). In chemistry, bodies which do not neutralize metals, but form with them electro-negative compounds.

Basi-hyal (ba'se-hi'al) or **Ba'si-hy'oid.** Base of hyoid bone; separate bone in some animals.

Bas'il bush. Ocymum caryophyllatum. **B. cit'ron,** Ocymum basilicum. **B., com'mon,** Ocymum basilicum. **B., small,** Ocymum caryophyllatum. **B., wild,** Chenopodium vulgare, Cunila mariana, and Pycnanthemum incanum.

Basilad, bas'il-ad. Toward the basilar aspect.

Basilar (bas'il-ar), **Ba'sal,** or **Bas'ilary.** Belonging to the base, especially base of skull. A name given to several parts seeming to serve as basis to others, as sacrum and sphenoid. See *Basio-occipital.* **B. an'gle,** angle included between radii from anterior edge of foramen magnum to prominent parts of cranium. **B. angle of jaw,** angle formed by lines from outer side of angle of each lower jaw to symphysis. **B. apoph'ysis,** B. process. **B. ar'tery,** union of two vertebral arteries; ascends along middle groove on inferior surface of tuber, terminates in posterior cerebral arteries. **B. as'pect,** aspect toward base of the head. **B. bone,** see *Basilar* and *Basio-occipital.* **B. cell,** nucleated matter at base of Corti's rod in internal ear. **B. diam'eters,** diameters of basilar region of cranium. **B. fi'bres,** fibres of basilar membrane of cochlea. **B. fos'sa,** upper surface of basilary process; groove for basilar artery on pons Varolii. **B. groove,** B. fossa. **B. mem'brane,** see *Corti* and *Membrana basilaris.* **B. meningi'tis,** inflammation of meninges at base of brain. **B. plex'us,** transverse sinus. **B. pro'cess,** *Cuneiform process,* bony projection formed by inferior angle of os occipitis, which is articulated with sphenoid; lower extremity of outer hair-cells of organ of Corti. **B. ra'dii,** lines projected from median point of anterior border of occipital foramen to selected points on skull. **B. si'nus,** sinus transversus. **B. sur'face,** inferior surface of b. process, covered by mucous membrane of pharynx. **B. su'ture,** suture between basilar process of occipital bone and sphenoid. **B. vein,** vein from base of brain emptying into vein of Galen. **B. ver'tebra,** last vertebra of loins, fifth lumbar.

Basilem'ma. Basement membrane.

Basilic, bas-il'ik (*basilikos,* royal). Name given by the ancients to parts which they conceived to be important in the animal economy. **B. vein,** one on which bloodletting is performed, situate at internal part of fold of humeral artery, and formed by interior and posterior cubital veins and median basilic; terminates in axillary vein. It was formerly thought basilic of right arm had some connection with liver, hence it was called hepatic; vein of the left arm, for similar reason, was called splenic. Median basilic vein is a branch of preceding, joins median cephalic by transverse branch, and receives branches of deep radial and cubital veins and subcutaneous vein—common median.

Basil'icon (*basilikos,* royal). Ointment of yellow wax, black pitch, resin, and olive oil; hence called *Unguentum tetrapharmacum* (four drugs). In most pharmacopœias it is represented by *Unguentum* or *Ceratum resinæ;* used as stimulating ointment.

Basil'icum. Basilicon, Ocymum basilicum. **B. citra'tum,** Ocymum basilicum. **B. ma'jus,** Ocymum basilicum.

Basilis'cus. Syphilis; corrosive sublimate.

Bas'ilo-bregmat'ic. Belonging to basilar process and bregma, as basilo-bregmatic diameter.

Basilo-mental, bas'il-o-men'tal. Relating to basilar process and chin, as basilo-mental radius, line from basion to anterior point of chin.

Basilysis, bas-il'is-is (*basis, lusis,* dissolution). Destruction of fœtal skull by force, as in cranioclasty, or by perforation, the instrument being called *Basilyst.*

Ba'sin. Pelvis.

Basi-nasal (ba'se-na'sal) **length.** Distance between basion and middle point of naso-frontal suture.

Ba'sio (*basis,* base). In composition, base.

Basio-alveolar, ba'se-o-al-ve'ol-ar. Relating to basion and centre of upper edge of alveolar arch.

Basi-occipital, ba'se-ok-sip'it-al (*basis,* base, *occipitalis,* occipital bone). Basilar process of occipital bone. Relating to base of brain and occipital region. See *Basio-occipital.*

Basio-ceratochondroglos'sus (*basio, keras,* cornu, *chondros,* cartilage, *glossa,* tongue). Hyoglossus.

Ba'sio-ceratoglos'sus (*basio, keras,* cornu, *glossa,* tongue). Part of hyoglossus, inserted into cornu of os hyoides and base of tongue.

Basio-ces'trum (*basio, kestra,* a dart). Instrument for opening head of fœtus in utero.

Basio-deltoïdeus, bas-e-o-del-to-i'de-us. Part of deltoid inserted on spinal part of scapula.

Basio-glos'sus (*basio, glossa,* tongue). Portion of hyoglossus inserted into base of os hyoides. See *Lingual muscles.*

Basio-humeralis, bas-e-o-hu-mer-al'is. Levator claviculæ muscle.

Basio-keratochondroglossus (bas-e-o-ker-a-to-kon-dro-glos'sus) or **Basio-keratoglossus,** bas-e-o-ker-at-o-glos'sus. Hyoglossus muscle.

Basion, bas'e-on. Middle point of anterior margin of occipital foramen.

Basio-occipital, ba'se-o-ok-sip'it-al. Relating to base of brain and occipital region; basilar process. The latter is called basilar bone when separate, as in some fishes.

Basio-pharyngæ'us, bas-e-o-far-in-ge'us. Fibres of constrictor pharyngis medius.

Basioticum, bas-e-ot'ik-um. Small fœtal bone between basi-occipital and basi-sphenoid bones.

Basiotribe, bas'e-o-tribe (*basio, tribo,* to destroy). Instrument for crushing base of skull of fœtus. Operation is called *Basiotripsy.*

Basiotripsy, bas-e-o-trip'se. See *Basiotribe.*

Ba'sis. Base. See *Prescription.* **B. cer'ebri,** base of the brain. **B. cor'dis,** radix cordis. **B. cor'poris,** sole. **B. cra'nii,** base of skull. **B. infundib'uli,** tuber cinereum. **B. mandib'ulæ** or **maxil'læ inferio'ris,** horizontal ramus of lower jaw. **B. na'si,** base of outer part of nose. **B. occip'itis,** basilar process. **B. of pe'duncle,** see *Peduncles of the brain.* **B. pleu'ræ,** part of sac of pleura below the lung. **B. scap'ulæ,** spinal edge of scapula. **B. ver'tebræ,** body of vertebra. **B. vesi'cæ,** base of bladder.

Basi-sphenoid, ba'se-sfe'noid. Back part of body of sphenoid bone; separate bone in fœtus and in some animals.

Basi-tem'poral, ba-se-tem'por-al. Small tongue-like process on upper surface of sphenoid.

Bass or **Bast.** Linden tree; also its inner bark.

Bass-deaf'ness. Inability to distinguish low notes.

Bassia butyracea, bas'se-ah bu-te-rah'se-ah. Genus Sapotaceæ; Indian butter tree. Expressed oil from it is used in rheumatism. **B. latifo'lia** and **B. longifo'lia** of E. Indies yield expressed oil, *doli oil.*

Basso'ra gum. Gum originally from neighborhood of Bassora. Insoluble portion is peculiar principle, *bassorin,* $C_6H_{10}O_5$. The gum is not used in medicine, but to adulterate tragacanth.

Bas'sorin. See *Bassora gum.*

Bass'wood. Tilia Americana.

Bas'tard (Celt. *bas* or *boas,* fornication, *tardd,* source). Illegitimate, hybrid, spurious. **B. car'damom,** seed of Amomum xanthoides. **B. dit'tany,** Dictamnus albus. **B. ipecacuan'ha,** root of Asclepias curassavica of W. Indies. **B. mea'sles,** rubella. **B. pel'litory,** Achillea ptarmica. **B. saf'fron,** florets of Carthamus tinctorius.

Bas'tardy. Illegitimacy.

Bas-ventre (F.). Inferior part of abdomen.

Basyl, ba'sil. Electro-positive or metallic ingredient of a salt.

Basylous, bas'il-us. Referring to basyl.

Bata, bah'tah. Musa paradisiaca.

Batata (bah-tah'tah) **jalap'a.** Mexican root; drastic. **B. de pur'ga,** purgative, feculent, gum-resinous roots of two plants of Convolvulaceæ of Brazil, one called *Jeticucu, Mechoacan, Convolvulus Mechoacanna, Piptostegia pisonis;* the other, *Convolvulus operculatus, Ipomœa,* or *Piptostegia operculata.*

Batatas, bah-tah'tas. Several tuberous roots of Peru, especially *Convolvulus batatas* or *Sweet potato.* The word potato comes from this. See *Solanum tuberosum.* **B. edu'lis,** Convolvulus batatas.

Bate'man's drops. Pectoral drops.

Bath. Immersion or stay, for longer or shorter duration, of the whole or a part of the body in some medium, as water. The vessel in which water is put for bathing; public or private establishment for bathing. Baths may be local or general, that is, applied to a part or to the whole of the body; they may be classified as follows (Brunton):

CLASSIFICATION OF BATHS.

- I. Water bath.
  - A. Simple,
    - Cold,
      - Ordinary full bath.
      - Affusions.
      - Spray.
      - Sitz-bath.
      - Foot-bath.
      - Cold pack.
      - Compresses.
      - Douches.
    - Hot,
      - Tepid bath.
      - Warm bath.
      - Hot bath.
      - Hot foot-bath.
      - Hot sitz-bath.
  - B. Medicated,
    - Sea-bathing.
    - Common saline bath. Artificial sea-water, made by dissolving bay-salt in water (1 lb. of salt in 30 gals. of water).
    - Carbonic acid and saline.
    - Acid bath.
    - Alkaline bath.
    - Sulphurated bath.
    - Mustard bath.
    - Pine bath (Fichtennadelbad).
- II. Vapor bath.
  - A. Aqueous,
    - Simple,
      - Russian.
      - Simple vapor.
    - Medicated, Vinegar.
  - B. Volatilized drugs—*e. g.* calomel.
- III. Air bath. Turkish bath.

In Pharmacy, vessel placed over the fire, and filled with any substance, into which another vessel is placed containing matters for digestion, evaporation, or distillation.

Bath, ac'id. (Acid. muriat. ℥ij, aquæ cong. lxvi; one-half, one-third, or one-fourth the quantity of acid is more frequently employed). A bath of dilute aqua regia is used in India as a remedy in hepatic diseases; a pint of aqua regia (nitromuriatic acid) is mixed with equal quantity of water. Acid bath consists of three ounces of this dilute acid to every gallon of water. **B., air,** B. in which body is exposed to air. **B., a., hot,** see *Bath, hot.* **B., a., warm,** see *Bath, hot.* **B., al'kaline,** made of half pound or pound of pearl-ash or carbonate of sodium to sixty-six gallons of water. **B., an'imal,** consists in wrapping an animal, recently killed, or its skin, around the body or some

part of it. **B., antipso'ric,** recommended in cases of itch and other cutaneous diseases (potass. sulphuret. ℥iv, aquæ cong. lx). **B., antisyphilit'ic,** mercurial bath; made by dissolving from two drachms to an ounce of corrosive chloride of mercury in sixty gallons of water. **B., arm,** bath for the arm. **B., artific'ial sea-water,** 1 part common salt to 30 parts of water. **B., astrin'gent,** B. containing tannic acid, oak bark, etc., used for ulcerations and cutaneous diseases. **B., balsam'ic,** B. made of balsamic materials or turpentines, used in diseases of the head. **B., blood,** B. containing freshly-drawn blood. **B., bran,** B. containing bran, used in eczema and burns. **B., brine,** B. of salt water, used in scrofula, rheumatism, and to act on kidneys. **B., cam'phor,** camphor on hot plate, vapor being inhaled. **B., chalyb'eate,** B. containing soluble preparation of iron; presumably tonic. **B., chem'ical,** B. consisting of a medium, as sand, water, etc., surrounding the substance to be heated. **B., chlor'inated,** chlorine-vapor bath made antiseptic or antiparasitic with chlorine or chlorinated lime or soda. **B., cold** or **cool,** see *Bath, hot;* employed as tonic and stimulant, and to reduce bodily temperature in fevers, etc. **B., douche,** see *Douche.* **B., dry,** one made of ashes, salt, sand, etc.; ancients used these for therapeutical purposes. **B., earth,** B. in which earth is used as medium; arenatic. **B., East'ern,** stove. Turkish bath; Egyptian bath. **B., Egyp'tian,** form of Turkish bath, in which temperature is raised to highest point and gradually lowered to starting-point again. **B., elec'tric,** consists in placing person upon insulated stool, communicating, by metallic wire, with principal conductor of electrical machine in action, or in such position as to include him in galvanic circuit; bath in which current of electricity is produced by decomposition of components of the bath. It produces general excitement of all functions, especially of circulation and secretion. **B., emol'lient,** starch oil, bran, malt, or other bath used in burns and some skin diseases as emollient to inflamed surfaces. **B., ferru'ginous,** B., chalybeate. **B. fe'ver,** see *Fever, bath.* **B., Fin'nish,** Russian b. carried to more elevated temperature. **B., fir-needle,** B. from some preparation of needles of fir; stimulant and slightly irritating to the surface. **B., foot,** B. for foot, or hot-water b., mustard b., etc. **B., galvan'ic,** B., electric. **B., gas,** air baths, hot-air baths, vapor baths; Turkish baths are included under this head, as well as baths of hydrogen sulphide gas, etc. **B., gelat'inous,** made by dissolving gelatin or glue in a gallon of water; used to reduce irritability of the skin. **B., gelat'ino-sul'phurous,** may be made by adding gelatin or glue, previously dissolved in water, to sulphur bath. **B., gen'eral,** one in which whole body is plunged, except head; in contradistinction to a partial bath. **B., gly'cerin,** vapor bath containing glycerin. **B., grape-lees,** B. of fermenting grape-lees; tonic, and used in rheumatism. **B., half,** one adapted for half the body, as hips or extremities; *Sitz bath* is tub of cold water in which patient sits for variable period; see *B., hip.* **B., hand,** bath for the hands. **B., head,** bath for the head; douche or shower bath. **B., hip,** one in which lower part of trunk and upper part of thighs are immersed; *Sitz bath.* **B., hot,** bath, temperature of which is 98° and upward; *Warm bath,* from 92° to 98°; *Tepid bath,* from 85° to 92°; *Temperate bath,* from 75° to 85°; *Cool bath,* from 60° to 75°; *Cold bath,* from 30° to 60°; and *Vapor bath,* from 100°to 130° and upward; see *Vaporarium. Warm-air bath* or *Hot-air bath* consists of air temperature of which is raised; see *Stove.* **B., Ind'ian,** Turkish bath combined with massage. **B., i'odine,** one containing iodine with iodide of potassium dissolved in water in wooden bath-tub; usually produces only slight rubefacient effect, though it sometimes causes the epidermis to peel off. **B., i'ron,** B., chalybeate. **B., malt,** B., emollient. **B., med'icated** or **medic'inal,** bath formed of decoctions or infusions of vegetable substances, or of any ingredient introduced into water for therapeutical purposes; *M. air* or *M. vapor baths* are B. of air or vapor charged with medicated matters. **B., mercu'rial,** B., antisyphilitic. **B., mud,** bath, as of mineral springs, impregnated with mud; used in rheumatism, gout, paralysis, etc. **B., must,** B., grape-lees. **B., mus'tard,** foot-bath to which mustard is added to produce rubefaction or stimulation. **B., narcot'ic,** water bath containing narcotic ingredients. **B., nitromuriat'ic acid,** see *Bath, acid.* **B., oil,** emollient bath of oil; see *B., emollient.* **B., Orien'tal,** Turkish b., Egyptian b., etc. **B., ox'ygen,** gaseous bath of oxygen for inhalation in asphyxia and conditions attended with defective aëration of blood; locally to ulcers. **B., pack,** bath in which the body is enveloped in cloths. **B., par'tial,** B. for use to part of body only, including hand baths, sitz baths, douches, etc. **B., peat,** B. containing peat, acting similarly to mud bath. **B., pine** or **pine-nee'dle,** B. similar to fir-needle b. **B., plunge,** plunging into a liquid for bathing purposes. **B., Ro'man,** form of hot-air bath given in series of rooms. **B., Rus'sian,** see *Vaporarium;* powerful sudorific agent, inapplicable in many cases of disturbed conditions of heart and lungs, fevers, etc. **B., saline',** common salt is added to water. **B., sand,** arenation; B. of sand heated to about 120° to 130° F., or of sandy mineral springs; diaphoretic effect. **B., sea,** sea-water bath, having stimulant action of cold salt bath. **B., sheet,** B. in which the body is enveloped in cloths. **B., show'er,** one in which water is made to fall like a shower on the body; tonic, and by its shock revulsive, as in opium-poisoning; see *Douche,* etc. **B., sitz,** see *Bath, half,* and *B., hip;* used for local action on herniæ, intestinal spasm or congestion, etc. **B., sol'id,** this form of bath includes mud b., sand b., earth b., and similar baths into which solids enter as important ingredients. **B., sponge,** thorough application of water to surface with sponge. **B., starch,** emollient b. **B., steam,** B. made by introducing steam into properly closed vessel in place of water, as in water bath. **B., succes'sion,** transition bath, or one in which there is rapid succession or transition from cold to warm or hot bath, or conversely. **B., sul'phur,** sulphuretted bath; one much used in psora and other chronic cutaneous affections; composed of diluted sulphuric acid, and sulphuret of potassium or of sodium, added to each bath, or simply of sulphuret of potassium. **B., sul'phur-va'por,** vapor bath of gaseous sulphurous acid; see *Sulphurous acid.* **B., sun,** form of air bath in which naked body is exposed to bright sunshine. **B., sweat'ing,** bath employed for sudorific effect, as Turkish or Russian bath; achicolum. **B., tan,** astringent bath, prepared by boiling ground oak-bark —as used by tanners—in water and then adding decoction to water of bath. **B., tem'perate,** see *Bath, hot.* **B., tep'id,** see *Bath, hot.* **B., transi'tion,** bath, succession. **B., Turk'ish,** combination of hot and vapor baths with cold douche and plunge. **B., va'por,** see *Bath, hot,* and *Vaporarium.* **B., warm,** see *Bath, hot.* **B., water,** in Chemistry, vessel filled with boiling water or salt water, in which vessel is placed containing substance to be evaporated.

Bathing, bath'ing. See *Bath.*

Bath'mis (base, support). Cavity of bone receiving eminence of another; especially two fossettes at inferior extremity of humerus, into which processes of ulna are received during flexion and extension of forearm; also force as basis of growth.

Bath'rion, Bath'rum, or **Bath'ron** (bench). Instrument for extension of limb in cases of fracture or luxation.

Bathycentesis, bath-e-sen-ta'sis (*bathus,* deep, *kentesis,* piercing). Puncturing deeply; acupuncturation.

Bathymetrical, bath-im-et'rik-al. Relating to bathymetry.

Bathymetry, bath-im'e-tre (*bathus,* deep, *metron,* measure). Measurement of any cavity of the body.

Bathymorphia, bath-e-mor'fe-ah (*bathus,* deep, *morphe,* shape). Myopia.

Bathystixis, bath-e-stiks'is (*bathus,* deep, *stixis,* puncture). Bathycentesis.

Batopho'bia (*batos,* accessible, high, *phobos,* fear). Morbid dread of heights.

Ba'tos. Rubus idæus.

Batrachoplasty, bat-rak'o-plas-ty. See *Batrachus.*

Batrachus, bat'rak-us (frog). Ranula; plastic operation for its relief is called *Batrachoplasty.*

Batracine, bat'ra-seen. Active principle from skin of a batrachian, used as arrow-poison.

Battalismus (bat-tal-iz'mus) or **Battaris'mus** (*battarizo,* to stammer). Balbuties. Stammering with incapacity to pronounce *r.*

Bat'talus or **Bat'tarus** (stammerer). Stutterer.

Battata Virginiana, bat-tah'tah vur-jin-e-an'ah. Solanum tuberosum; see *Batatas.*

Battery, electric, bat'ter-e e-lek'trik. Apparatus for generating electricity by means of Leyden jars. **B., con'stant,** so called, applied to two-cell batteries, because the currents do not weaken as speedily as currents from single-cell batteries, and the metals remain all the time in the solution. Term now applied to the Voltaic current in contradistinction to the induced or faradic current. **B., galvan'ic** or **Voltaic,** battery for generating galvanic electricity; see *Cautery, Electricity,* etc.

Battey's opera'tion. Normal ovariotomy or oöphorectomy; removal of one ovary or both ovaries to produce the menopause, for relief of otherwise incurable disease.

Battisegola, bat-tis-a-go'la. Centaurea cyanus, or blue-bottle; Euphrasia officinalis, or eyebright.

Battledore placenta, bat'tl-dor plas-en'tah. Placenta with the cord attached near the rim.

Bat'weed. Lappa major.

Bauchee. Seeds of Psoralia corylifolia, of E. Indies; used for leprosy.

Bauhin (bo'han), **valve of.** *V. of Tulpius, of Fallopius,* or *of Varolius.* Ileocæcal or ileocolic valve; valve situate transversely where ileum opens into cæcum, which Bauhin claims to have discovered in 1759. It had, however, been previously described. See *Frænum.*

Bauhinia acuminata, bo-hin'e-ah ak-u-min-at'ah. Leguminous plant of E. and W. Indies and China, used as laxative, anthelmintic, and carminative. **B. angui'na,** plant of E. Indies, etc., root of which is antipyretic. **B. articula'ta,** tree of tropical Africa; bark is astringent. **B. tomento'sa,** *St. Thomas's tree,* of Africa and Asia; leaves are used in dysentery; root-bark is anthelmintic, and used in affections of the liver. **B. variega'ta,** bark of this E. Indian and Chinese plant is tonic, alterative, and astringent.

Baun'scheidtism. Kind of acupuncturation proposed by person named Baunscheidt, consisting in impelling on the skin, by means of a spring, a brush of wires, but not so as to draw blood, and then rubbing into the part a stimulating fluid having for its base mustard and black pepper or irritant oil. The instrument has been called the Awakener on account of its energetic revellent action.

Bay cas'tor. Magnolia glauca. **B. rose,** Rhododendron chrysanthemum. **B. rose, Amer'ican,** Rhododendron maximum. **B. rum,** spiritus myrciæ. **B. salt,** chloride of sodium. **B. sore,** disease endemic in Honduras. **B., sweet,** laurus. **B. tree,** Laurus nobilis, Magnolia glauca. **B., white,** Magnolia glauca and M. macrophylla.

Bayberry (ba'ber-e) **bark.** Bark of Myrica cerifera, wax plant, candleberry myrtle. Tonic, stimulant, and astringent, used in dysentery. **B. tal'low,** wax obtained from fruit of Myrica cerifera. **B. tree,** Myrcia acris, see *Spiritus myrciæ.*

Baycu'ru. Plant growing on shores of Rio Grande and in S. America, Statica Braziliensis, root of which is a powerful astringent.

Bayle, gray granulations of. Nodes in the lungs, tubercular in character, which have undergone fibroid degeneration.

Bazin's disease. Psoriasis of the mouth.

Bdalsis, dal'sis. Sucking.

Bdel'la, del'lah. Leech; varicose vein.

Bdellatomy, del-lat'o-me (*bdella, tome,* incision). Leeching. Incision in side of leech to empty animal of blood while it continues to suck.

Bdellepithesis, del-lep-ith'es-is (*bdella,* leech, *epithesis,* application). Application of leeches.

Bdellium, del'le-um. Gum-resin from Levant and India, from several species of Balsamodendron.

Bdellometer, del-lom'et-ur (*bdella,* leech, *metron,* measure). Instrument proposed as substitute for leech, consisting of cupping-glass to which scarificator and exhausting syringe are attached.

Bdellus, del'lus (*bdellusso,* to produce an offensive stench), **Bdelygmia** (del-ig'me-ah), **Bdelygmus** (del-ig'mus), or **Bdolus** (do'lus). Passage of wind from the rectum. Morbid loathing of food.

Bdesma, dez'mah. Flatulence, bdellus.

Bead tree. Melia azedarach.

Beaded ribs. Nodules distinct to the touch in rickets at junction of the ribs with the cartilages.

Beads, jum'ble or **prayer.** See *Abrus precatorius* and *Jequirity.*

Beak of enceph'alon. Extension forward of frontal lobe of cerebrum in lower animals. **B. of cal'amus scripto'rius** is its lower extremity. **B. of cor'pus callo'sum** is its posterior extremity, also B. of encephalon. **B. of sphe'noid bone,** rostrum.

Beaker, be'kur. Small glass vessel used in chemical investigations.

Beal. Phlegmon, suppuration.

Bealing, be'ling. Pregnant; suppurating.

Bean. Seed of various Leguminosæ, particularly the Faba vulgaris. **B., bush,** phaseolus. **B., Cal'abar,** ordeal nut. **B., Carthage'na,** habilla de Carthagena. **B., castor,** see *Ricinus communis.* **B., Egyp'tian,** Nymphæa nelumbo. **B., French,** Phaseolus vulgaris. **B., gar'den,** common Vicia faba. **B., In'dian,** catalpa. **B., kid'ney,** Phaseolus vulgaris. **B., Malacca,** Avicennia tomentosa. **B., orde'al,** see *Ordeal.* **B., pichu'rim,** nectandra. **B., pon'tic,** Nymphæa nelumbo. **B., red,** Abrus precatorius. **B., sa'cred,** Nelumbium luteum. **B., St. Igna'tius's,** Ignatia amara. **B., snap,** phaseolus. **B., string,** phaseolus. **B., ton'ka,** Dipterix odorata. **B. tree,** Catalpa bignonioides, Cratægus aria. **B. tref'oil,** Cytisus laburnum. **B., vanil'la,** see *Vanilla.* **B., wild,** Apios tuberosa.

Bear'berry. Arbutus uva ursi.

Beard. Hair covering part of cheek, lips, and chin of male sex at puberty. **B., first,** genetias.

Bear'ing down. Compression of abdomen, as in defecation and parturition. **B.-d. pains,** pains caused by parturient efforts of uterus.

Bear's bed. Polytrichum juniperinum. **B.'s breech,** Acanthus mollis. **B.'s foot,** Helleborus fœtidus, Polymnia uvedalia. **B.'s fright,** Heptallon graveolens. **B.'s grapes,** fruit of Arbutus uva ursi. **B.'s grass,** Yucca filamentosa. **B.'s weed,** Eriodictyon Californicum, Veratrum viride. **B.'s whort'leberry,** Arbutus uva ursi.

Beastings. Colostrum.

Beat. Pulsation, as of the heart or an artery; see *Heart.* **B., a'pex,** beating of heart against chest-wall. **B., pulse,** pulsation of artery. See *Pulse.*

Beating of the heart. See *Heart.*

Beaumont (bo'mont) **root.** Gillenia trifoliata.

Beaver, be'vur. Castor fiber. **B. poi'son,** Cicuta maculata. **B. tree,** Magnolia glauca, M. macrophylla. **B. wood,** Celtis occidentalis, Magnolia glauca.

Bebeeria (beb-e're-ah), **Bebeer'ina, Bebe'ria,** or **Bebeerine,** beb-e'reen. See *Bebeeru.*

Bebee'ru. Tree of British Guiana, bark of which yields two alkalies, *Bebeerine,* $C_{19}H_{21}NO_3$ (*Bebeerina, Beberia, Nectandria,* or *Biberine*), and *Sipeerine.* In its properties it resembles cinchonas; referred to Nectandra rodiei or rodiæi, bark of which is nectandra, or greenheart bark, ord. Laurineæ. Sulphate of bebeeria, *beberinæ sulphas,* is employed in same cases as sulphate of quinia, but is not so reliable. Muriate or hydrochlorate of b. has also been employed.

Beberia, beb-e're-ah. See *Bebeeru.* **B., sul'phate of,** see *Bebeeru.*

Bebiru, beb-e'ru. Bebeeru.

Becabunga (bek-ah-bun'gah) or **Beccabunga,** bek-kah-bun'gah. Veronica beccabunga.

Becca'ria's test. Test for pregnant condition, consisting in painful pulsation in back of head.

Beccica (bek'kik-ah) or **Becha.** Bechic.

Bechæsthesis, bek-ees-tha'sis (*bex,* cough, *aisthesis,* sensation). Excitement or desire to cough.

Bechia (be'ke-ah) or **Bechias,** be'ke-as. Cough; hoarseness.

Bechic, be'kik (*bex,* cough). Medicine to allay cough; relating to, or caused by, cough.

Be'chica or **Bechita,** be'kit-ah. Bechic.

Be'chion or **Bechium,** be'ke-um. Tussilago.

Bechorthopnœa, bek-or-thop-ne'ah (*bex,* cough, *orthos,* upright, *pneo,* to breathe). Whooping cough; orthopnœa.

Bechous, be'kus. Bechic.

Bech'terew's nu'cleus. Lateral nucleus of anterior root of auditory nerve.

Béclard's (ba'klar's) **hernia.** Hernia occurring opposite the saphenous orifice. **B.'s suture,** form of suture used in wounds of intestines, by white and colored thread.

Becquerel's pills. See *Pill, Becquerel's.*

Becuiba, bek-u-e'bah. Ibicuiba.

Bed, air. Mattress of rubber or leather that can be filled with air. **B. case,** form of hysteria in which the patient lives in bed, under impression that he or she is suffering from serious symptoms. **B., fracture,** bed arranged for proper rest and treatment of a fractured part. **B., hydrostat'ic,** water-bed. **B. pan,** pan for use of a patient in bed for purposes of urination or defecation. **B., water, Arnott's,** see *Water-bed.*

Bedegar (bed'e-gar) or **Bed'eguar.** Excrescence on different species of wild roses, produced by puncture of a small insect, cynips rosæ, formerly employed as lithontriptic, as a remedy for dysuria, and as vermifuge.

Bed'lam (from Bethlehem lunatic hospital in London). Hospital for the insane.

Bedlamite, bed'lam-ite. Insane.

Bedouin (bed'win) **itch.** Form of lichen tropicus.

Bedridden, bed'rid-den. Remaining in bed from chronic ailment.

Bed-sore. Soreness or excoriation from prolonged pressure on one spot, as in fevers, chronic disease, etc.

Bed'straw. Galium verum. **B., la'dies', great'er,** Galium mollugo, Galium verum. **B., la'dies', rough,** Galium asprellum.

Bee. Formerly used, dried and powdered, as diuretic. **B. in the bon'net,** insane.

Bee'bread. See *Propolis.* **B., honey,** apis mellifica.

Beech. Fagus sylvatica. **B., Al'bany,** Pterospora andromedea. **B. drop,** Orobanche Virginiana, Epiphegus Virginiana. **B. drops, false,** Hypopitys lanuginosa. **B. mast,** see *Fagus sylvatica.* **B. nut,** see *Fagus sylvatica.* **B. oil,** oil expressed from Fagus sylvatica. **B. tar,** procured by destructive distillation from Fagus sylvatica; creasote is obtained from it.

Beef. Flesh of domestic cattle, as ox or cow. See *Food, animal.* **B. es'sence.** See *Beef tea.* **B., ex'tract of,** see *Extract of beef.* **B. juice,** see *Beef tea.* **B. meal,** beef dried and powdered, for use as an article of diet by the sick. **B. tea,** infusion of beef, used in debilitating maladies and in convalescence; may be made as follows: Take two pounds and a half of lean beef, cut in small pieces, into three parts of water in an earthen pipkin; let this simmer, but never boil, until the liquor is consumed to a pint and a half; then strain carefully. It ought to be entirely free from fat or grease. *Essence of beef* may be made by putting a pound of good beef, freed from fat and cut into small pieces, into a porter-bottle, corking lightly. The bottle is put into boiling water, and kept there until water has been boiling at least half an hour; as boiling goes on, the cork may be inserted a little more tightly to retain contents of bottle; juices of beef are thus separated, and constitute the essence, which may be seasoned to taste.

Been. Centaurea behen.

Beer. Cerevisia. **B., black,** a vulnerary beer; see *Falltranck.* **B., chow'der,** see *Chowder.* **B., Jews',** see *Pinus sylvestris.* **B., pipsis'sewa,** see *Pyrola umbellata.* **B., spruce,** beer prepared by fermentation of mixture of essence of spruce, pimento, bruised, ginger, bruised, hops, water, yeast, and molasses; agreeable drink in summer. **B., tar,** see *Pinus sylvestris.*

Beer's knife. Triangular-shaped knife used in operations for cataract for section of the cornea. **B.'s opera'tion for cat'aract,** operation in which cataract is extracted by corneal flap without excision of iris.

Beest or **Beest'ings.** Colostrum.

Bees'wax. See *Cera.*

Beet. Beta. **B. su'gar,** cane-sugar manufactured from the beet.

Beet'leweed. Galax aphylla.

Beg'bie's disease. Exophthalmic goitre.

Beggar's bas'ket. Pulmonaria officinalis. **B.'s blank'et,** Verbascum thapsus. **B.'s but'tons,** flowerheads of Arctium lappa. **B.'s lice,** Cynoglossum Morisoni. **B.'s ticks,** Bidens connata, B. frondosa, Cynoglossum Morisoni. **B.'s weed,** Polygonum aviculare.

Beggiatoa, bej-je-ah-to'ah. Genus of Schizomycetes. See *Bacteria.* **B. al'ba,** sewage fungus, common in stagnant and sulphurous water, as are also *B. arachnoidea* and *B. leptomitiformis.* **B. mirab'ilis,** found in sea-water. **B. ni'vea,** found in sulphurous waters. **B. roseopersici'na,** found in water of rivers and of the ocean, from which bacteriopurpurine is obtained.

Beggiatoa'ceæ. Family of Bacteria. See *Bacteria.*

Begma, beg'mah (*bex,* cough). Coughing; sputum or expectorated matter.

Begonia, be-go'ne-ah (after M. Begon, French botanist in St. Domingo). Begonia grandiflora and B. tomentosa have astringent roots; used in Peru in hemorrhage, scurvy, low fevers, etc. **B. ac'ida** is from Brazil; **B. acutifo'lia,** from Jamaica; **B. gra'cilis,** from Mexico; emetic and cathartic.

Behen abiad, be'hen a'be-ad. Centaurea behen. **B. al'bum,** Centaurea behen. **B. officina'rum,** Cucubalus behen. **B. oil,** ben oil. **B. vulga'ris,** Cucubalus behen.

Beiahala'len. Sempervivum tectorum.

Beidel'sar. Asclepias procera.

Bei'gel's dis'ease. Fragility of hair of head, with bulbous tumefaction of hair-shafts.

Beist'ings. Colostrum.

Beju'o. Carthagena bean, used as antidote for serpent-bites.

Bel's eye. Belloculus.

Bela, be'lah. Covolam.

Be'læ fruc'tus. Bael fruit, covolam.

Belch'ing. Eructation.

Belemnoid, bel'em-noid. Belenoid. **B. pro'cess,** styloid process.

Belenoid (bel'en-oid), **Belonoid** (bel'on-oid), **Belemnoid** (bel'em-noid), or **Beloid,** bel'oid (*belos,* arrow, *eidos,* shape). Arrow-shaped; name given to styloid processes in general, *Processus belenoïdes.*

Bel'gram oil. Candelwort oil.

Be'li. Bael. **B. oc'ulus,** belloculus.

Bell, an'gles of. Angles formed by meeting of vertical line of Bell (axis of vertical line through centre of foramen magnum) with Cowper's profile line, and with line projected from middle point of anterior border of occipital foramen to point of crossing of supraorbital and median lines. **B., Cant'erbury,** Campanula trachelium. **B., law of,** rule that anterior roots of nerves are motor; of posterior roots, sensory. **B. pep'per,** Capsicum annuum. **B. sound,** physical sign heard in pneumothorax. **B., vert'ical line of,** see *Bell, angles of.*

Bell's disease or **ma'nia.** Acute delirium, followed by exhaustion and death. **B.'s paral'ysis** or **pal'sy,** paralysis of facial nerve. **B.'s spasm,** convulsive tic douloureux.

Belladonna, bel-lah-don'nah (beautiful lady). See *Atropa belladonna.* **B. baccif'era,** Atropa belladonna. **B., Japanese,** Scopolea japonica. **B. juice,** juice of Atropa belladonna. **B. laccif'era,** Atropa belladonna. **B. leaves,** Atropa belladonna. **B. trichot'oma,** Atropa belladonna.

Belladonnæ folia (bel-la-don'ne fo'le-ah) or **fo'lium.** Atropa belladonna. **B. ra'dix,** see *Atropa belladonna.*

Belladonnin, bel-lah-don'nin. Resinous alkaloid from Atropa belladonna root; not important medicinally; atropine is sometimes so called.

Bellegu or **Belleregi.** Myrobalanus.

Bellflower, bel'flow-ur. Narcissus pseudo-narcissus.

Bellidoïdes, bel-le-do-e'des (*bellis, eidos,* resemblance). Chrysanthemum leucanthemum.

Bellini (bel-le'ne), **tubes of.** See *Uriniferous tubes.*

Bellis (bel'lis) or **Bel'lus** (pretty). *Bruisewort, Common daisy, Day's eye;* ord. Compositæ. Leaves and flowers are acrid, and were at one time considered to cure wounds; root is used in scurvy and in pulmonary diseases. See *Osmitopsis asteriscoides.* **B. Horten'sis,** bellis. **B. ma'jor,** Chrysanthemum leucanthemum. **B. mi'nor,** bellis. **B. peren'nis,** bellis. **B. praten'sis,** Chrysanthemum leucanthemum.

Bellocq's can'ula or **sound.** Instrument used for plugging posterior nares in cases of hemorrhage from nose.

Belloculus, bel-lok'u-lus. Gem which the Assyrians considered efficacious in cure of diseases. They imagined the figure of an eye could be seen in it; hence its name, *Bel's eye,* from god Bel.

Bel'lotas. Ilex major.

Bel'lows mur'mur or **sound.** Blowing sound like that of bellows heard occasionally by ear applied to chest during contraction of ventricles, auricles, or large arteries. It coexists with affections of the heart, but is heard also without disease of that organ, as when an artery is compressed. **B. sound, encephal'ic,** this is heard on applying ear to occiput or top of head, and is considered to indicate turgescence of vessels or inflammation, compression from turgescence giving rise to the sound in question. **B. s., fu'nic,** single murmur of bellows kind, synchronous with first sound of heart, due to diminished calibre of umbilical arteries, either by pressure or stretching of funis, or both. **B. s., placent'al,** utero-placental murmur, uterine murmur or rush; sound heard on auscultating over site of placenta in pregnant female. It appears to be owing to uterine tumor pressing upon large vessels of the mother.

Bellwort (bel'wurt), **small'er.** Uvularia perfoliata.

Belly, bel'le. Abdomen; formerly all splanchnic cavities were called bellies, the lower belly or venter infimus being the abdomen; middle belly, venter medius, thorax; upper belly, venter supremus, head. Also the womb. See *Abdomen, Uterus, Venter.* Fleshy part of a muscle. **B. bound,** constipated. **B. god,** glutton. **B. pot,** physconia.

Bellyache, bel'le-ake. Colic. **B., dry,** colica metallica. **B. root,** Angelica lucida.

Bellyband, bel'le-band. Belt, Russian.

Belmos'chus or **Belmuschus,** bel-mus'kus. Hibiscus abelmoschus.

Bel'nileg. Myrobalanus.

Beloid, be'loid (*belos,* arrow, *eidos,* shape). Belenoid. **B. pro'cess,** styloid process.

Belone, bel'o-ne. Needle.

Belonephobia, bel-o-ne-fo'be-ah (*belone,* needle, *phobos,* fear). Morbid dread of pins and needles.

Belonoid, bel'on-oid (*belone,* needle, *eidos,* shape). Belenoid.

Belt. Girdle or band around the waist. **B., abdom'inal,** B., Russian. **B., mercu'rial,** cingulum mercuriale. **B., Rus'sian,** vulgarly, *Bellyband, Abdominal supporter.* Broad bandage applied to abdomen to support and make methodical pressure, as obstetric binders, utero-abdominal supporters, etc.

Belulcum, bel-ul'kum (*belos,* dart, *helko,* to draw out). Instrument for extracting darts or arrows.

Belzoe (bel'zo-e), or **Belzoim** (bel'zo-im), or **Belzoinum,** bel-zo'in-um. Benzoin.

Ben. Guilandina moringa, Moringa pterygosperma. **B. of Judæ'a,** benjamin. **B. nut,** Guilandina moringa, Moringa pterygosperma. **B. oil,** behen oil.

Bends. Caisson disease.

Benedicta sylvestris, ben-e-dik'tah sil-ves'tris. Geum rivale.

Benedictum laxativum, ben-e-dik'tum laks-ah-te'vum (blessed laxative). Confectio sennæ.

Beneficium (ben-e-fis'e-um) **al'vi.** *Alvi profluvium.* Spontaneous diarrhœa, acting favorably in prevention or cure of disease. **B. natu'ræ** (benefit of nature), vis medicatrix naturæ. Case in which disease gets well without medical treatment.

Beneolens, ben-e'o-lens (*bene,* well, *oleo,* to smell). Sweet-scented medicine.

Beng. Cannabis.

Bengal (ben-gal') **car'damom.** Seed of Amomum sublatum. **B. el'emi,** resin from Canarium commune. **B. ipecacuan'ha,** root of Tylophora asthmatica. **B. ki'no,** juice of Butea frondosa. **B. quince,** see *Covolam.* **B. root,** cassumuniar.

Bengale Indorum, ben'ga-le in-do'rum. Cassumuniar.

Bengi, ben'ge. Hyoscyamus; bangue.

Benign, be-nine' (*bonus,* good). Mild, non-malignant; term applied to a tumor or disease of mild character, or to a medicine whose action is not violent.

Benignant, be-nig'nant. Benign.

Benincasa cerifera, ben-in-kas'ah se-rif'er-ah. E. Indian plant, used for fevers, chest affections, dysuria, etc.

Ben'jamin. Benzoin. **B. bush,** Laurus benzoin. **B., flow'ers of,** benzoic acid.

Benjoinum (ben-jo-e'num) or **Ben'jui.** Benzoin.

Ben'ne. Sesamum orientale. **B. oil,** see *Sesamum orientale.*

Bennet herb. Geum urbanum, G. Virginianum.

Benzalcohol, benz-al'ko-hol. Benzyl alcohol.

Benzaldehyde, benz-al'de-hide. Benzoic aldehyd; identical with oil of bitter almonds; may be prepared from toluol.

Benzanilide, ben-zan'il-eed. White powder, like acetanilide; having same relation to benzoic acid that acetanilide has to acetic acid; antipyretic.

Ben'zen or **Benzene'.** Benzol.

Ben'zidam. Aniline.

Ben'zin (ben-zeen'), **Benzinum.** Mixture of various hydrocarbons obtained in distillation of coal-gas, tar, and petroleum.

Benzoas, ben'zo-as. Benzoate; salt of benzoic acid. **B. ammoni'acus,** ammonium benzoate. **B. cal'cicus,** calcium benzoate. **B. lith'icus,** lithium benzoate. **B. na'tricus,** sodium benzoate. **B. sod'icus,** sodium benzoate.

Benzoate, ben'zo-ate. Compound of benzoic acid and a base, as *B. of ammonia,* ammonii benzoas. **B. of beta-naph'thol,** benzo-naphthol. **B. of guai'acol,** benzosol. **B. of men'thol,** used in local treatment of toothache, neuralgia, and migraine. **B. of mer'cury,** soluble crystalline substance, employed in treatment of syphilis.

Benzoated, ben'zo-a-ted. Benzoinated.

Benzoe, ben'zo-e. Benzoin.

Benzoenil, ben-zo'en-il. Vanilla.

Benzo'ic acid. Flowers of benjamin. This acid, $C_7H_6O_2$, exists in all balsams, but chiefly in benzoin, from which it is obtained by sublimation. It is in vanilla, canella, urine of infants and of herbivorous animals; its odor is aromatic and fragrant; taste hot, slightly acidulous, and agreeable; it is soluble in 200 parts of cold water, and 24 of hot water; it is expectorant and diuretic. See *Benzoin.* **B. al'dehyd,** benzaldehyd.

Benzoin, ben'zo-in. Benjamin; resinous, dry, brittle substance, concrete juice of Styrax benzoin, Arbor benivi, Laurus benzoin, of Sumatra; odor is extremely fragrant, taste slightly aromatic; principle used for preparation of benzoic acid, employed in some vulnerary tinctures, and as an expectorant; also given in inhalation. Benzoic acid, acidum benzoicum (Ph. U. S. and Br.), is obtained from it by sublimation; it is an ingredient in tinctura opii camphorata or paregoric. Purest benjamin is in amygdaloid masses. **B. bush,** Laurus benzoin. **B., flow'ers of,** benzoic acid. **B. odorif'erum,** Laurus benzoin.

Benzoinated (ben'zo-in-a-ted) or **Ben'zoated.** Incorporation of benzoic acid with other ingredients in ointment, etc., to give pleasant odor.

Benzoinum, ben-zo'in-um (Ph. U. S. and Br.). Benzoin.

Ben'zol, or **Benzen'**, or **Benzene'**, or **Ben'zole.** *Hydruret* or *hydride of phenyl, hydrophenyl*, C_6H_6. Constituent of coal-gas tar, obtained by distilling coal naphtha. Colorless oleaginous liquid of agreeable odor; sp. gr. 0.85. Vapor, when inhaled, acts as anæsthetic, and may be diffused through the room in whooping cough. It has also been given internally for destruction of trichinæ, and mixed with lard externally in itch and parasitic skin diseases, and in rheumatic and neuralgic cases.

Benzo-naph'thol (ben'zo-naf'thol), **β-naph'thol ben'zoate.** White, tasteless, odorless substance, analgous to β-naphthol salicylate or betol; diuretic; depresses the temperature and action of heart and lungs.

Benzophe'noneid or **Benzophe'noid.** Compound obtained by decomposition of an aniline dye; germicide and antiseptic; used in ulcers and inflammation of cornea and purulent keratitis.

Ben'zosol. Substitution compound of guaiacol, colorless, odorless, tasteless powder; used in tuberculosis instead of guaiacol, as being more agreeable to the stomach.

Benzoyl, ben'zoil. Radicle of benzoic acid. **B. ac'onin**, japaconitine. **B. an'ilide**, benzanilide. **B. ec'gonin**, a product of decomposition of cocaine; action like caffeine, not paralysant. **B. eu'genel**, derivative of eugenol, colorless, odorless crystals, supposed to be useful in tuberculosis. **B. gly'cocin**, hippuric acid. **B. guai'acol**, benzosol. **B. methylec'gonin**, B. ecgonin. **B. sal'icin**, populin. **B., sulphon'ic i'mide**, saccharin. **B. tro'pin**, substance formed by union of tropin molecule from atropin with benzoic acid; anæsthetic and mydriatic.

Ben'zyl. When the oily matter in balsam of Peru undergoes fractional distillation in an atmosphere of carbonic-acid gas, and under diminished pressure, it furnishes *benzyl hydrate* or *benzylic alcohol, benzoate of benzyl*, and *cinnamate of benzyl*.

Bé'raud (ba'ro), **lig'ament of**, suspensory ligament of pericardium. **B., valve of**, fold of mucous membrane at bottom of lacrymal sac.

Ber'baris. Berberis.

Berberin, bur'ber-in. See *Oxyacantha Galeni, Cœlocline polycarpa*, and *Calumba*. **B., hydrochlo'rate of**, see *Oxyacantha Galeni*. **B. phos'phate**, employed in malaria and in vomiting of pregnancy.

Berberi'na or **Berbi'na.** See *Oxyacantha Galeni*.

Ber'beris. Oxyacantha Galeni. **B. aquifo'lium**, mountain grape, Oregon grape; grows in Western N. America; tonic and alterative. **B. arista'ta, B. Asiatica**, from E. Indies; tonic and antiperiodic. **B. Canaden'sis**, see *Oxyacantha Galeni*. **B. Chinen'sis**, Chinese species, used for headache, weak eyes, etc. **B. frutico'sa**, Jamaica shrub; antisyphilitic. **B. Ly'cium**, similar source and properties to B. Canadensis; used as local application in diseases of the eyes. **B. vulga'ris**, common barberry of Europe and U. States; root, leaves, and fruit are all used medicinally; tonic, astringent, and antiscorbutic.

Ber'berry. Barberry.

Berenicium, ber-en-is'e-um. Nitrate of potash.

Bergamot, burg'am-ot. Small orange of very agreeable taste and peculiar odor; from its rind an oil, *oleum bergamii* (Ph. U. S.), oil of bergamot, is obtained, much employed as a perfume, and sometimes in medicine. **B. cam'phor**, solid greasy compound derived from bergamot oil.

Bergaptene, burg-ap'ten. Oil of bergamot.

Bergeron's (bare'jer-on's) **disease.** Localized rhythmic chorea.

Beriberi, ber'i-ber-i. *Beri-beri* (*beri*, Singhalese for weakness, *beriberi*, great weakness). Disease of E. Indies, little known in Europe, bad sickness of Ceylon, acute anæmic dropsy, consisting in debility and tremors of limbs or of whole body, painful numbness of affected parts, etc., patient walking doubled, anæmia, etc.; form of cachexia, in which there is great muscular debility and feebleness of reparatory powers. It is almost always incurable, frequently fatal; treated by exercise, stimulant friction, sudorifics, etc. It seems to attack principally natives of Japan. Sometimes called *Barbiers*, although many consider this a different disease. Aden or Yemen ulcer is said to occur in conditions of system like that in beriberi. It affects the leg, frequently sloughing. Cochin China ulcer closely resembles yemen. **B., drop'sical**, ankylostomiasis.

Bernard', duct of. Accessory duct of pancreas.

Bernardin, ber-nar'din. Glycogen, named from Bernard, the French biologist.

Ber'ries, In'dian. See *Menispermum cocculus*. **B., Turk'ey, yel'low**, see *Piper cubeba*.

Bertin, bones of, or **spongy bodies of** (after Bertin, French anatomist). Sphenoidal cornua. **B., columns of**, processes of cortical substance of kidney, extending between pyramids of Malpighi as far as hilus. **B., lig'ament of**, ilio-femoral ligament.

Bertrand's su'ture. Continued suture resorted to in wounds of the intestines.

Berula (ber'u-lah) or **B. angustifo'lia.** Sium.

Beryl'lium. Glucinum.

Besenna, bes-en'nah. Bark of Albizzia anthelmintica.

Beta, be'tah. The beet, ord. Chenopodiaceæ. Genus of plants, of which following are chief varieties: **B. ci'cla** or **cy'cla**, grows in S. Europe; used as substitute for spinach; leaves, emollient, are applied to raw surfaces, wounds, etc. **B. hy'brida**, root of scarcity; nutritive, yielding sugar. **B. vulga'ris al'ba**, white beet; root yields sugar; leaves are eaten as substitute for spinach. **B. v. ru'bra**, red beet; root red and nutritive; yields large quantity of sugar; was used in diseases of liver and spleen and in phthisis.

Betaine, be'tane. $C_5H_{13}NO_3$. Ptomaïne from cotton seed, Beta vulgaris; from human urine, etc.; it is not poisonous. See *Ptomaïnes* (table).

Beta-naphthol, be'tah-naf'thol. Hydronaphthol; form of naphthol isomeric with α-naphthol ($C_{20}H_8O_2$), obtained from naphthalin; in white flakes, odorless, slightly soluble in water, more soluble in alcohol and ether. It is an intestinal antiseptic and a bactericide; used in typhoid fever and chronic diarrhœa; externally, in ointment, in prurigo, strength of 5 per cent. with lard or lanolin; internally, dose, gr. iss–iv. Has been used in chronic disease of the middle ear. **B., ben'zoate of**, antiseptic and diuretic; used in phthisis; benzo-naphtol.

Beta-nitrophenyl-piperazine. Derivative of piperazin; is therapeutic; value undetermined.

Beta-quinine, be'tah-kwi'nine. Quinidine.

Betayne, be'tane. Betonica officinalis.

Be'tel. Species of pepper cultivated in India; leaves are chewed with lime and areca; tonic and astringent.

Beth'root or **B., broad'leaf.** Trillium latifolium.

Be'tol. *Naphtalol, Naphtosalol, Salinaphtol, Salicylate of naphtol ether, Salicylate of beta-naphtol;* white, odorless, tasteless powder, soluble in oil and alcohol; obtained by reaction between beta-naphthol and salicylic acid in presence of a dehydrating agent, such as oxychloride of phosphorus. It is antiseptic, antipyretic; used in cystitis, catarrh of bladder, and articular rheumatism, and externally in bougies in gonorrhœa; dose, gr. iv–viij.

Betonica (be-ton'ik-ah) **al'ba.** B. officinalis. **B. aquat'ica**, Scrophularia aquatica. **B. monta'na**, Arnica montana. **B. officina'lis**, *Betony, Wood betony*, ord. Labiatæ; formerly employed, in flowers and leaves, in decoction, in gout, sciatica, cephalalgia, etc.; the leaves are aperient, the root emetic. **B. Paul'i**, veronica. **B. vulga'ris**, B. officinalis.

Betony, bet'o-ne. Betonica officinalis. **B., Paul's**, Lycopus sinuatus, Lycopus Virginicus, veronica. **B. wa'ter**, Scrophularia aquatica. **B. wood**, Betonica officinalis.

Betula alba, bet'u-lah al'bah. Birch, order Betulaceæ; young leaves are astringent and bitter; applied to wounds and ulcers; they are antiscorbutic, diapho-

retic, and anthelmintic. The saccharine juice or sap is antiscorbutic and diuretic; bark is aromatic and astringent; oil or pitch from it is used, like other forms of pitch, in cutaneous affections, also in gonorrhœa. **B. al'nus,** Alnus glutinosa. **B. emargina'ta,** Alnus glutinosa. **B. glutino'sa,** Alnus glutinosa. **B. len'ta,** *Sweet birch, Black birch, Cherry birch, Mountain mahogany*; American species, bark and leaves of which have smell and taste of Gaultheria procumbens. Infusion is used as excitant and diaphoretic; bark and leaves are stimulant and diaphoretic; volatile oil is nearly identical with that of gaultheria. Gaultheria is obtained from the leaves and bark. **B. na'na,** dwarf birch; mountainous shrub of Switzerland; the sap is used in gout, and applied externally in skin diseases.

Bet'ulin. Crystalline resinous substance ($C_{36}H_{60}O_3$) from inner bark of Betula alba.

Bevilac'qua. Hydrocotyle Asiatica.

Bex (cough). Cough; tussis. **B. convulsi'va,** pertussis. **B. hu'mida,** expectoration; cough with expectoration. **B. sic'ca,** dry cough. **B. theri'odes,** pertussis.

Bexaguillo. White ipecacuanha, growing in Peru.

Bex'is. Cough.

Bezoar, bez'o-ar. Calculous concretion, found in stomach, intestines, and bladder of herbivorous animals, and esteemed alexipharmic. It was believed that no poison, no eruptive or pestilential disease, could resist its influence. Various chemical agents were prepared with similar notions as to their prophylactic and curative powers in a number of diseases.

Bezoardic, bez-o-ar'dik. Concerning bezoards. Medicines supposed to possess same properties as bezoard; as antidotes, alexiteria, alexipharmics, cordials. **B. acid,** acid found occasionally in bezoardic concretions of animals.

Bezoardica radix, bez-o-ar'dik-ah rah'diks. Dorstenia contrayerva.

Bezoardicum, bez-o-ar'dik-um. Bezoard. **B. huma'num,** urinary calculus, formerly supposed to be alexipharmic.

Bhang. Bangue, hashish; cannabis.

Bi, Bin (*bis*, twice). As prefix to words, has same signification as *Di*, twice, double.

Biarticulate, bi-ar-tik'u-late (*bi, articulus,* joint). Having two joints.

Biasteric diameter, bi-as'ter-ik di-am'et-ur. Occipital diameter.

Biauricular diameter, bi-aw-rik'u-lar di-am'et-ur. Distance between auricles on the skull.

Biauriculate, bi-aw-rik'u-late. Having two auricles, as of the heart, or two ears.

Bibasic, bi-ba'sik (*bis*, twice, *basis*, base). Possessing two bases, applied to acids, or being able to unite with two equivalents of a base. **B. salts,** see *Salt.*

Biberine, be-be'rin. See *Bebeeru.*

Bibiru, be-be'ru. Bebeeru.

Bibitorius, bib-it-o're-us (*bibo*, to drink). Rectus internus oculi, so called from habit of drinker looking into the glass.

Bibliography, medical, bib-le-og'ra-fe, med'ik-al (*biblion*, book, *grapho*, to describe). Description or history, or skill in knowledge of, medical books.

Bibo'rate. Compound having one part of base to two of boric acid.

Bibro'mide. Compound having one part of an element to two of bromine.

Bibron's antidote, be'bron's ant'e-dote. See *Antidote, Bibron's.*

Bibulous, bib'u-lus. Drinking up or absorbing.

Bicarbo'nas. Bicarbonate. **B. ka'licus,** potassium bicarbonate. **B. nat'ricus,** sodium bicarbonate. **B. potas'sicus,** potassium bicarbonate. **B. so'dicus,** sodium bicarbonate.

Bicar'bonate. Compound having one part of base to two of acid.

Bicaudal, bi-kawd'al (*bi, cauda,* tail). Retrahens auris muscle.

Bicaudate, bi-kawd'ate. Monster having two tails.

Bicephalium, bi-sef-al'e-um (*bi, kephale,* head). Large sarcoma on the head, like a double head.

Bicephalus, bi-sef'al-us. Two-headed.

Biceps, bi'seps (*bi, caput,* head). That which has two heads. Two muscles, one belonging to the arm, the other to the thigh. **B. ancone'us,** anconeus. **B. brach'ii** or **brachia'lis,** B. flexor cubiti. **B. cru'ris,** B. flexor cruris. **B. cu'biti,** B. flexor cubiti. **B. exten'sor,** triceps extensor. **B. exter'nus mus'culus,** long portion of triceps brachialis. **B. fem'oris,** B. flexor cruris. **B. flex'or cru'ris,** muscle on posterior part of thigh; one head arising from tuberosity of ischium, the other from great part of linea aspera; inserted into top of fibula; serves to bend leg on thigh. **B. flex'or cubi'ti** or **f. ra'dii** or **f. hume'ri,** muscle situate at anterior and internal part of arm; extending from edge of glenoid cavity and from top of coracoid process to tuberosity of radius. It bends the forearm upon the arm. **B. hu'meri** or **inter'nus** or **inter'nus humeri,** B. flexor cubiti. **B. ma'nûs** or **ra'dii,** B. flexor cubiti. **B. su'ræ,** gastrocnemius.

Bichat (be'shah), **canal of.** Arachnoid canal.

Bichichiæ, bik-ik'e-e (*bex*, cough). Pectoral medicines; compound of one part of an element to two of chlorine.

Bichlo'ride. Compound of one part of an element to two of chlorine. **B. of mer'cury,** hydargyrum chloridum corrosivum.

Bi'cho. Portuguese name for worm that penetrates the toes, pulex penetrans. Gangrene of the rectum.

Bicipital, bi-sip'it-al (*biceps*, two-headed). Two-headed; relating to biceps. **B. em'inence,** B. tubercle. **B. fas'cia,** aponeurosis of biceps muscle. **B. groove,** longitudinal groove between tuberosities of os humeri, lodging long head of biceps. **B. tu'bercle** or **tuberos'ity,** prominence near the upper extremity of the radius, to which the tendon of the biceps is attached.

Bicol'orin. Æsculin.

Biconcave, bi-kon'kave (*bis*, twice, *concavus*, concave). Doubly concave, both sides being concave; term applied to lens, etc.

Bicon'dylar diam'eter. Diameter of jaw measured between given points on the condyles.

Biconvex, bi-kon'veks (*bis*, twice, *convexus*, convex). Doubly convex, both sides being convex.

Bicor'nate (*bi, cornu*, horn). Having two horns, as *B. uterus*, in which cornua are divergent.

Bicornis, bi-kor'nis (*bis*, twice, *cornu*, horn). Possessing or ending in two horns or processes, as the hyoid bone.

Bicus'pid (*bi, cuspis*, spear). That which has two cusps or points, as *B. teeth*, small molars; see *Molar.* **B. valve,** mitral valve.

Bicuspis, bi-kus'pis. Bicuspid tooth.

Bicy'anide. Compound in which there are two parts of the cyanide to one of the combining element.

Bid'der, gan'glion of. Ganglion in groove between auricle and ventricle of the heart.

Bi'dens acmel'la (*bi, dens*, tooth). Spilanthus acmella. **B. bipinna'ta,** Spanish needle; indigenous plant whose seed and roots are emmenagogue and expectorant. **B. conna'ta,** swamp-beggar's ticks, similar properties. **B. croca'ta,** Mexican plant, applied externally to syphilitic ulcers. **B. fer'vida,** Spilanthus oleracea. **B. frondosa,** beggar's ticks, indigenous; used in croup. **B. tetrago'na,** Mexican plant, leaves used for tea. **B. triparti'ta** grows in Europe; sialagogue.

Bidet, be-day'. Chamber bathing apparatus to be bestridden, in case of hemorrhoids, prolapsus ani, affections of sexualorgans, etc.

Bier'-right, tri'al by. See *Trial by bier-right.*

Biestings or **biest-milk.** Colostrum.

Bifem'oro-calca'neus. Gastrocnemius.

Bif'id. Divided into two parts.

Bifistular, bi-fis'tu-lar (*bis*, double, *fistula*, pipe). Possessing two tubes.

Bifo'cal. Having a double focus, as lens so arranged for presbyopia with error of refraction for far-sight.

Biforate, bif'o-rate (*bis*, twice, *foris*, opening). Provided with two perforations or pores.

Bifurcation, bi-fur-ka'shun (*bi*, *furca*, fork). Division of a trunk into two branches, as B. of trachea, aorta, etc.

Big jaw. Actino-mycosis of cattle.

Bigaster, bi-gas'ter (*bi*, *gaster*, belly). Digastricus.

Big'bloom. Magnolia macrophylla.

Bigelo'via vene'ta. Aplopappus discoideus.

Big'elow's lig'ament. Y-shaped ligament of Bigelow; ilio-femoral ligament. **B.'s opera'tion,** litholapaxy. **B.'s sep'tum,** layer of compact osseous tissue in neck of thigh-bone.

Bigeminæ eminentiæ, be-gem'in-e em-in-en'she-e (*bi*, *gemini*, twins). Quadrigemina tubercula.

Bigeminal bodies, bi-gem'in-al bod'ees. Quadrigemina tubercula.

Biggar. Disease of Bengal with dangerous cerebral symptoms.

Big'leaf. Magnolia macrophylla.

Biglenoid (bi-glen'oid) **diam'eter.** Diameter taken from one glenoid fossa to the other on the skull.

Bignonia antisyphilit'ica. Cybistax antisyphilitica. **B. aquifocialis,** W. Indian and S. American plant, bark of which is astringent. **B. capreola'ta** (after Abbé Bignon, librarian to Louis XIV.). Root and plant employed in syphilis, chronic rheumatism, and cachexiæ in general. **B. caro'ba,** Jacaranda procera. **B. catal'pa,** catalpa. **B. copa'ia,** caroba. **B. cruci'gera,** B. capreolata. **B. In'dica,** leaves are employed in India as emollients to ulcers. **B. leucox'ylon,** *Trumpet tree;* American tree, sap of which is antidote against manchineel. **B. ophthal'mica,** *Eye root, Eye vine;* indigenous in Guiana; pulp or juice of root dropped into the eye has been used in ophthalmia. **B. pur'gans,** leaves are antisyphilitic; bark of root is purgative. **B. radi'cans,** Tecoma radicans. **B. sempervi'rens,** Gelsemium nitidum.

Big'paunched. Having a large belly; abdominous.

Bijugal (bi-ju'gal) **diam'eter** (*bi*, *jugum*, yoke). Diameter between points of junction of posterior vertical edge of malar bone and extended upper edge of zygoma.

Bijugular diameter, bi-ju'gu-lar di-am'et-ur. Diameter between points of junction of masto-occipital suture with posterior border of jugular process.

Bikh. Aconitum ferox.

Bi'labe (*bis*, twice, *labium*, lip). Instrument with two blades for removing foreign bodies from the bladder through the urethra.

Bilate (bi'late) **of sodium.** Picromel. See *Glycocholate.*

Bilateral operation, bi-lat'er-al op-er-a'shun (*bi*, *latus*, side). See *Lithotomy.* **B. sym'metry,** see *Symmetry.*

Bilberry, bil'ber-re. Vaccinium myrtillus. **B., bear's,** Arctostaphylus uva ursi. **B., red,** Vaccinium vitis idæa.

Bile. Yellow, greenish, viscid, bitter, nauseous fluid secreted by the liver. It is called *hepatic* or *cystic* according as it flows into the duodenum from the liver or from the gall-bladder. It consists of water holding salts in solution, with coloring matters, fat, and mucus, the salts being especially those of soda, ammonia, and potash, in combination with glycocholic, hyoglycocholic, hyotaurocholic, chenotaurocholic, and taurocholic acids. Its sp. gr. is 1.020 to 1.026. Several pigments have been described in the bile, called bilifulvin, bilirubin, bilifuscin, biliprasin, bilicyanin, bilihumin, and cholophœin (which see). See *Cholochrome.* The fatty matter of bile chiefly consists of cholesterin or cholestrin, combined with fatty acids and various products of disintegration of tissue, as xanthin, leucin, tyrosin, and hypoxanthin.

One use of bile is to remove from the body superfluous hydrocarbon, and it also aids digestion by its emulsifying power and its action in retarding putrefaction. The quantity of bile in 24 hours is estimated at 532.8 cub. cm. (v. Wittich), 453 to 566 g. (Westphalen): in round figures 500 g., with specific gravity of 1.0104 and 2.253 per cent. of solid residue. The proportion of solid matter to liquid in the bile is about 14 to 86.

Frerichs and Gorup-Besanez made the following analysis of bile from the gall-bladder:

Composition of the Bile.

In 100 parts.	Frerichs.			Gorup-Besanez.		
	Man, æt. 18.	Man, æt. 22.	Man, æt. 49.	Man. æt. 68.	Woman, æt. 28.	Boy, æt. 12.
Water	86.00	85.92	82.27	90.87	89.81	82.81
Solids	14.00	14.08	17.73	9.13	10.19	17.19
Biliary acids with alkali	7.22	9.14	10.79	7.37	. .	14.80
Fat	0.32	0.92	4.73	. .	3.09	
Cholesterin	0.16	0.26				
Mucus and pigment	2.66	2.98	2.21	1.76	1.45	2.39
Inorganic salts	0.65	0.77	1.08	. .	0.63	

Furunculus or boil is sometimes called a bile. **B. acids,** see *Bile.* **B., black,** atrabilis. **B. canalic'uli** or **cap'illaries,** minute canals, commencement of biliary ducts. **B., cys'tic,** see *Bile.* **B. ducts,** see *Choledoch duct.* **B. fat,** cholesterin. **B. fis'tula,** opening made artificially between the gall-bladder and the bowels. **B., green,** form of bile met with in herbivorous animals; bile exposed to action of gastric juice, as in biliary vomit. **B., hepat'ic,** see *Bile.* **B. of ox,** *Ox-gall;* fresh gall of bos taurus (*fel bovis*, Ph. U. S.). Bitter stomachic and anthelmintic; tonic and laxative in cases of deficiency of biliary secretion. Inspissated ox-gall is an extract made by heating and evaporating ox-gall. **B. pig'ment,** coloring matter of bile; see *Bile.* **B. salts,** sodium glycocholate and taurocholate. **B. of swine,** *Pig's bile,* inspissated, has been used in the same cases. **B., test for,** see *Pettenkofer.*

Bilharzia hæmatobia (bil-har'ze-a he-mat-o'be-ah) or **mag'na** (after Dr. Bilharz of Cairo). Distomum hæmatobium.

Biliary, bil'e-a-re. That which relates to bile. **B. acids,** bile acids; see *Bile.* **B. appara'tus, B. or'gans, B. pas'sages,** collection of parts concurring in secretion and excretion of bile—viz., liver, pori biliarii or tubuli biliferi, hepatic, cystic, and choledoch ducts, and gall-bladder. **B. ar'tery,** cystic artery. **B. cal'culus,** see *Calculi.* **B. cirrho'sis,** form of chronic interstitial change, supposed by Charcot to be caused by an irritation coming from the contents of the bile-ducts. **B. col'ic,** attack of violent pain from passage of a gall-stone. **B. concre'tions,** concretions found in biliary apparatus. **B. ducts,** ducts which receive the bile from the penicilli of the liver and convey it to the hepatic duct. **B. fis'tula,** see *Fistula.* **B. or'gans,** see *B. apparatus.* **B. pas'sages,** see *B. apparatus.*

Biliation, bi-le-a'shun. Excretion of bile.

Bi'lic ac'id. Combination of various acids of bile.

Bilicholic acid, bi-le-kol'ik as'id. Name given by Berzelius to supposed biliary acid.

Bilicholinic (bi-le-ko-lin'ik) **a'cid.** Choleic acid.

Bilicyanin, bi-le-sy'an-in (*kuanos*, blue). Blue coloring matter produced by oxidation of pigment of bile, by adding strong nitric acid to ammoniacal solution of bilirubin.

Bilification, bi-le-fe-ka'shun. Formation of bile.

Biliflavin, bi-le-fla'vin (*flavus*, yellow). Yellow substance resulting from action of silver oxide on biliverdin.

Bilifulvin, bi-le-ful'vin (*bilis*, *fulvus*, reddish yellow). Yellow coloring matter from bile of ox; bilirubin. See *Cholochrome.*

Bilifuscin, bi-le-fus'sin (*bile*, *fuscus*, brown). $C_{16}H_{20}N_2O_4$. Dark-brown substance similar in appearance to biliprasin.

Bilihumin, bi-le-hu'min. Insoluble blackish-brown extractive matter of gall-stones, remaining after treating them with ether, water, acids, etc., and acting on residue with ammonia-water.

Bilim'bi or **Bilimbing teres,** bil-im'bing te'res. Averrhoa bilimbi.

Bi'lin. Picromel. Resinous matter resulting from evaporation of bile from which mucus has been removed; mixture of glaucocholate and taurocholate of sodium.

Bilineurine, bi-le-nu'rin. Neurine of bile; choline.

Bilious, bil'yus. Relating to bile, containing bile, or produced by bile, as B. temperament, B. symptoms, B. fever. Often used without any definite idea as

regards bile being attached to it. *Biliousness* is a term to denote symptoms of disturbance of digestive functions, constipation, malaise, furred tongue, vomiting of bile, etc. **B. fe'ver,** term indefinitely applied to some forms of malarial or enteric fever. **B. remit'tent fe'ver,** form of remittent fever, in which vomiting of bilious matter, jaundice, and tenderness over the hepatic region are the chief symptoms.

Biliphæin, bi-le-fe'in (*bilis, phaios,* dusky). See *Bile* and *Cholophæin.*

Biliprasin, bi-le-praz'in (*bilis, prasinos,* dark green). $C_{16}H_{22}N_2O_6$. Greenish-black coloring matter from gallstones.

Bilipur'pin or **Bilipur'purin.** Purple material produced by action of oxide of silver on biliverdin.

Bilipyrrhin, bi-le-pir'rhin (*bilis, purros,* reddish). See *Bile, Cholophæin,* and *Cholepyrrhin.*

Bilirubin, bi-le-ru'bin (*bilis, ruber,* red). Orange-red coloring matter in minute morphous granules, pigmentary ingredient in human bile, in urine in jaundice, and in gall-stones. $C_{16}H_{18}N_2O_3$.

Bilis, be'lis. Bile. **B. bovi'na** or **bu'bula,** ox-gall. **B. cys'tica** or **fel'lea,** cystic bile. **B. hepat'ica,** hepatic bile.

Biliverdin, bi-le-vur'din (*bilis, viridis,* green). On adding acid to solution of yellow coloring matter of bile, precipitate of green flocculi takes place, possessing properties of chlorophyll or green coloring matter of leaves; found in bile of herbivora. $C_{32}H_{36}N_4O_8$. See *Bile* and *Cholechlorine.*

Bilocular, bi-lok'u-lar (*bi, loculus,* small place). Having two cells or cavities.

Bil'va. Covolam.

Bimalar diameters, bi-ma'lar di-am'et-urs. Diameters between malar regions of face.

Bima'na (having two hands). Order of division of Mammalia, man being alone included. See *Bimanus.*

Bimanual, bi-man'u-al. Two-handed. **B. palpa'tion,** examination of pelvis and contents by hands applied, the one within and the other without. **B. ver'sion,** see *Turning.*

Bimanus (bim'an-us) or **Bimanous** (*bi, manus,* hand). One that has two hands; man is the only mammiferous animal possessing two perfect hands.

Bimastoid, bi-mas'toid. Relating to mastoid process of both sides, as bimastoid diameter.

Bimaxillary, bi-maks'il-la-re. Relating to the jawbones of both sides, as bimaxillary diameter.

Bin, in composition, see *Bi.*

Binary, bi'na-re. Consisting of two parts; in chemistry, containing two elements; in anatomy, branching into pairs. **B. combina'tion,** in chemistry, combination of two elementary bodies. **B. com'pound,** in chemistry, compound of two elements, or of an element and a compound, acting as a compound.

Binaural (bin-aw'ral) or **Binauricular,** bin-aw-rik'u-lar. Relating to both ears, as binaural stethoscope; binauricular arc, line drawn over vertex between the two ears.

Binder, bind'ur. Bandage. **B., obstet'ric,** bandage applied around the abdomen after delivery.

Bind'ing. Constipating.

Bind'weed. Polygonum aviculare. **B., blue,** Solanum dulcamara. **B., false,** Ipomœa. **B., fid'dle-leaved,** Convolvulus panduratus. **B., great,** Convolvulus sepium. **B., hedge,** Convolvulus sepium. **B., lav'ender-leaved,** Convolvulus Cantamica. **B., sea,** Convolvulus soldanella. **B., Virgin'ian,** Convolvulus panduratus.

Bind'wood. Hedera helix.

Bini'odide. Iodide containing two equivalents of iodine to one of the combining element.

Binocular, bin-ok'u-lar (*bin, oculus,* eye). Relating to or affecting both eyes, as *binocular vision,* vision with both eyes, or from impressions made upon both retinæ amalgamated into single vision. **B. band'age,** figure of 8.

Binoculus, bin-ok'u-lus. Bandage over both eyes.

Binotic, bin-o'tik (*bin, ous,* ear). Binaural.

Binoxide, bin-oks'id. Oxide containing twice as much oxygen as the first oxide of the same element.

Binsica, bin'sik-ah. Disorder of mind; atrophy of organ of imagination.

Binucleate, bi-nu'kle-ate. Having two nuclei.

Bio, be'o (*bios,* life). In composition, life.

Biochemia, be-o-kem'e-ah (*bio, chemia*). Vital chemistry; chemistry of living organisms as distinguished from that of the dead.

Biochem'ical. Relating to chemistry of living organisms.

Biochemistry, be-o-kem'is-tre. Biochemia.

Biochymia, be-o-kim'e-ah. Biochemia.

Biod, bi'od (*bios,* life). Vital force.

Biodynamics, bi-o-di-nam'iks (*bio, dunamis,* power). Doctrine of vital activity or force.

Biogamia, be-o-gam'e-ah (*gamos,* marriage). Animal magnetism.

Biogenesis, be-o-jen'es-is (*bio, genesis,* origin). Formation or development of organisms from those already existing. See *Archebiosis.*

Biogenetic (same deriv.), be-o-jen-et'ik. Relating to formation or development of life.

Biognosis, be-og-no'sis (*bio, gnosis,* knowledge). Knowledge or study of phenomena of life.

Biological, bi-o-loj'ik-al (*bios,* life, *logos,* description). Relating to laws or phenomena of life or of living bodies.

Biologist (same etymon), bi-ol'o-jist. One who studies or is versed in biology.

Biology, bi-ol'o-je (*bio, logos,* a discourse). Doctrine or science of life or of living bodies. Physiology.

Biolychnion (be-o-lik'ne-on) or **Biolych'nium** (*bio, luchnion,* lamp). Innate heat, vital heat, animal heat.

Biolysis, bi-ol'is-is (*bio, lusis,* solution). Destruction of life; cessation of life.

Biolyt'ic. Tending to destruction of life; an intensely depressing agent.

Biomagnetism, bi-o-mag'net-izm. Animal magnetism.

Biometry, bi-om'et-re (*bio, metron,* measure). Estimation of duration of life.

Bionomy, bi-on'o-me (*bio, nomos,* law). Physiology.

Biophænomenologia, be-o-fa-no-men-o-loj'e-ah (*bio, phainomenon,* appearance, *logos,* discourse). Physiology.

Bioph'agous or **Biotoph'agous** (*bios,* life, *phago,* to eat). Subsisting on living organisms, as plants.

Biophilia, be-o-fil'e-ah (*bios,* life, *phileo,* to love—love of life). Instinct of self-preservation.

Bioplasm, bi'o-plazm (*bio, plasma,* formation). Bioplasmic or germinal matter; living or germinal self-propagating matter of living beings.

Bioplasmic, bi-o-plaz'mik. Relating to bioplasm.

Bioplasson, be-o-plas'son. Protoplasm; bioplasm.

Bioplast, bi'o-plast (*bio, plasso,* to form). Distinct mass of bioplasm; minute living particle.

Bioplastic, bi-o-plas'tik. Relating to bioplasm.

Biorbital, bi-or'bit-al. Pertaining to both orbits; as, **B. an'gle,** angle of divergence of axes of vision of both eyes; **B. diam'eters,** diameters of upper part of face; **B. plane,** plane of axes of the two orbits.

Bios, be'os (*bios*). Life.

Bioscope, bi'os-kope (*bi, skopeo,* to see). Instrument used in *Bioscopy* or examination of corpse to determine whether it was born alive. See *Electrobioscopy.*

Bio'sis. Vitality; life.

Biosophia, be-o-sof'e-ah (*bio, sophia,* wisdom). Biodynamics.

Biospheres, bi'o-sferes. Minute protoplasmic particles in state of Brunonian oscillation.

Biot's respira'tion. Quiet unvarying breathing, as of one asleep.

Biostatic, bi-o-stat'ik (*bio, static*). See *Static.*

Biostatis'tics (*bio, statistics*). Medical statistics.

Biotaxy, bi'o-taks-e (*bio, taxis,* order). *Taxonomy.* Arrangement or co-ordination of living organisms according to external characters; static biology.

Biote, be'o-ta. Life.

Biothalmius, be-o-thal'me-us (*bio, thallo,* to bloom). One who is long lived or enjoys rude health.

Biothanati, be-o-than'at-e (*bio, thanatos,* death, or

biaios, violent). They who die suddenly a violent death.

Biothanatology, bi-o-than-at-ol'o-je (*bio*, *thanatos*, death). Doctrine or consideration of life and death, or of violent death.

Biotic, bi-ot'ik. Vital.

Biotics, bi-ot'iks. Physiology.

Biotomy, bi-ot'o-me (*bio*, *tome*, incision). Vivisection.

Biparasitic, bi-par-a-sit'ik. Relating to two parasites, one living on the other.

Biparietal, bi-par-i'et-al. Relating to both parietal bones; as *B. diameter*, measured from one parietal fossa to the other. **B. su'ture**, sagittal suture.

Biparous, bip'ar-us (*bi*, *pario*, to bring forth). Giving birth to twins.

Bipartition, bi-par-tish'un. Division or partition into two parts, as cells.

Bi'ped (*bi*, *pes*, foot). Having two feet.

Biphos'phate. Compound in which there is one part of the base to two parts of phosphoric acid.

Bipinna, be-pin'nah (*bi*, *pinna*, wing-feather). Diminutive penis, not exceeding in size two quills.

Biplicate, bip'lik-ate (*bis*, twice, *plico*, to fold together). Possessing two folds.

Bipolar, bi-po'lar (*bi*, *polus*, pole). Having two poles or processes, as nerve-cells, such as those found in the ganglia of the gray matter of the brain; see *Neurine*. **B. ver'sion**, see *Turning*.

Biporous, bi-po'rus (*bis*, twice, *porus*, pore). Possessing two pores.

Bipubiotomy, bi-pu-be-ot'om-e (*bi*, *pubes*, *tome*, incision). Operation of sawing through front of pelvis, substitute for Cæsarean operation.

Bira, be'rah. Cerevisia.

Birch. Betula alba. **B., black**, Betula lenta. **B., cher'ry**, Betula lenta. **B. oil**, see *Betula alba*. **B., sweet**, Betula lenta.

Bird cher'ry. Prunus padus. **B. manure**, guano. **B. pep'per**, Capsicum baccatum. **B. weed**, Polygonum aviculare.

Birds' bread. Sedum acre. **B. nest**, Hypopitys lanuginosa. **B.-nest bod'ies** or **cells**, masses of epithelial cells in cancer, having such appearance. **B. nest, ed'ible**, see *Hirundo esculenta*.

Birth. Parturition. **B., cross**, presentation, preternatural. **B., live**, see *Born alive*. **B. mark**, nævus of new-born child. **B. pal'sy**, *spastic diplegia;* spasm of all the extremities at birth or soon afterward. **B., plu'ral**, see *Multiparous*. **B., post'humous**, birth of a child after the death of its father. **B., prem'ature**, see *Parturition, premature*. **B. root**, Trillium erectum. **B., still**, see *Still-born*. **B., vir'gin**, parthenogenesis.

Birth'root. Aristolochia.

Birth'wort. Aristolochia. **B. snake'root**, Aristolochia serpentaria.

Bisacromial, bis-ak-ro'me-al. Relating to both acromion processes.

Bis'cara but'ton. Aleppo boil.

Bische. Malignant dysentery or gangrene of lower bowel which prevails in Brazil and coast of Africa.

Biscuit, bis'kit (*bis*, twice, *coctus*, baked). Dry, hard bread or cake. Medicinal or medicated biscuits are made by adding to biscuit paste medicinal solution or powder and baking.

Bisection, bi-sek'shun. Division into two parts, as of fetus in parturition by operation.

Bisenna, bis-en'nah. Mesenna.

Biser'mas. Salvia sclarea.

Bisexual, bi-seks'u-al. Having genital characteristics of both sexes; hermaphrodite.

Bisferiens, bis-fe're-ens (*bis*, *ferio*, to strike). Dicrotic; having double beat, as pulse.

Bish or **Bisk.** Aconitum ferox.

Bishop's weed. Ammi.

Bisiliac, bis-il'e-ak. Relating to both ilia; as *B. diameter*, that between cristæ ilii, transverse diameter of pelvic inlet.

Bisischiat'ic, bis-is-ke-at'ik. Relating to both ischia; as *B. diameter*, line between two tuberosities of the ischia.

Biskra (bisk'rah) **boil** or **button**, but'tun. See *Aleppo boil*.

Bislingua, bis-lin'gwah. Ruscus hypoglossum.

Bismalva, bis-mal'vah. Althæa.

Bismuth, biz'muth. *Regulus of Bismuth, Tin glass.* Metal in spicular plates of yellowish-white color, sp. gr. 9.822; fusible at 400°, volatilizable at high temperature; used in preparation of subnitrate. **B. albu'minate**, grayish-white powder; used in spasmodic affections of stomach and bowels. **B. and ammo'nium ci'trate**, in small scales, formed by dissolving citrate of bismuth in water of ammonia. **B. ben'zoate**, white powder made by action of watery solution of sodium benzoate and acid solution of bismuth nitrate; employed for dusting ulcers, soft chancres, etc. **B., but'ter of**, chloride of bismuth. **B. car'bonate**, B. subcarbonate. **B. and ce'rium sal'icylate**, reddish-white insoluble powder; useful in diseases of the gastro-intestinal mucous membrane, especially diarrhœa and dysentery caused by ulceration. **B. ci'trate**, bismuthi citras (Ph. U. S. and Br.), white insoluble powder; used for preparing citrate of bismuth and ammonium. **B. gal'late**, B. subgallate. **B. ni'trate**, ternitrate of bismuth; crystalline salt from direct solution of bismuth in nitric acid. **B. o'leate**, see *Oleates*. **B. ox'ide**, B., subnitrate of. **B. oxychlo'ride**, white insoluble powder; used as cosmetic. **B. oxyi'odide**, red insoluble powder, result of action of potassium iodide on bismuth subnitrate; used externally as antiseptic; resembling iodoform in action. **B., pu'rified**, by heating bismuth with potassium nitrate contaminating metals are oxidized and separated. **B., reg'ulus of**, bismuth. **B. sal'icylate**, pink powder precipitated when sodium salicylate is added to bismuth nitrate in solution in glycerin; used in catarrh of the intestines and stomach, diarrhœa, etc. as an intestinal antiseptic, externally as a substitute for iodoform in wounds, ulcers, etc. **B. subben'zoate**, B. benzoate. **B., subcar'bonate of**, bismuthi subcarbonas (Ph. U. S.), $(BiO)_2Co_3,H_2O$. Similar in properties to subnitrate, and used as substitute for it; white insoluble powder. **B. subgal'late**, *dermatol*, odorless, insoluble yellow powder; employed externally as substitute for iodoform in wounds, burns, ulcers, certain diseases of the eye and ear, eczema, caries of the teeth, etc.; internally, in gastro-intestinal diseases in place of bismuth subnitrate; in powder, gauze, glycerin, etc. **B. subi'odide**, B. oxyiodide. **B. subni'trate**, *Bismuthi subnitras* (Ph. U. S.), $BiONO_3H_2O$; *White bismuth, Trisnitrate of bismuth, White oxide of bismuth, Magistery of bismuth, Pearl white, Spanish white;* white, insoluble powder, prepared by addition of purified bismuth to nitric acid and precipitation by water. It is tonic, astringent, anodyne, and antispasmodic, local sedative, antiseptic; used in gastrodynia, dyspepsia, diarrhœa, dysentery, etc., and externally as drying application to ulcerated surfaces in leucorrhœa, coryza, etc., and for soothing effect in burns, ulcers, and excoriated surfaces, ozæna, etc. **B. tan'nate**, yellow insoluble powder. **B. triox'ide**, yellow insoluble oxide. **B. trisni'trate**, B. subnitrate. **B. vale'rianate**, white insoluble powder, with odor of valerianic acid; made by mixing neutral solution of oxide of bismuth in nitric acid with sodium valerianate, washing and drying the precipitate; used in gastrodynia, chronic gastralgia, neuralgia, and chronic palpitation as a nervine; dose, gr. ss–ij, three or four times a day, in pill. **B., white**, B. subnitrate.

Bismuthi et ammonii citras, biz-mu'the et am-mo'ne-e sit'ras (Ph. U. S. and Br.). Bismuth and ammonium citrate. **B. carbo'nas**, bismuth subcarbonate. **B. ci'tras** (Ph. U. S. and Br.), bismuth citrate. **B. ni'tras**, bismuth nitrate. **B. ox'idum** (Ph. Br.), bismuth oxide. **B. purifica'tum** (Ph. Br.), bismuth, purified. **B. subcarbo'nas** (Ph. U. S. and Br.), bismuth subcarbonate. **B. subio'didum**, bismuth oxyiodide. **B. subni'tras** (Ph. U. S. and Br.), bismuth subnitrate. **B. terni'tras**, bismuth nitrate. **B. valerian'as**, bismuth valerianate.

Bismuthine, biz'muth-een. Native trisulphide of bismuth.

Bismuthum, biz-mu'thum (Ph. Br.). Bismuth. **B. al'bum,** bismuth subnitrate. **B. cit'ricum,** bismuth citrate. **B. ni'tricum,** bismuth subnitrate. **B. oxydula'tum al'bum,** bismuth subnitrate. **B. purifica'tum,** purified bismuth. **B. subcarbo'nicum,** bismuth subcarbonate. **B. subni'tricum,** bismuth subnitrate. **B. tan'nicum,** bismuth tannate. **B. trisni'tricum,** bismuth nitrate. **B. valerian'icum,** bismuth valerianate.

Bispirus, be-spe'rus (*bi, spiro,* to breathe). Dipnous.

Bis'sa. Dropsy, in Egypt, of man and lower animals.

Bissulcate, bis-sul'kate (*bis,* twice, *sulcus,* furrow). Possessing two grooves.

Bistort, officinal, bis'tort, of-fis'in-al (*bis, torqueo,* to twist). Polygonum bistorta. **B., Virgin'ian,** Polygonum Virginianum.

Bistorta, bis-tor'tah. Polygonum bistorta.

Bistoury, bis'tur-e. Small cutting-knife, used in surgery, composed of blade and handle, the former movable or fixed in the latter. The chief bistouries are: *straight B.,* in which blade and cutting edge are straight, point being fine, round, or square; *convex B.,* blade being convex at cutting edge, concave at back; *concave B.,* blade being concave at edge and convex at back; *blunt-pointed B.,* blade having button at its extremity; *blunt* or *probe-pointed bistoury of Pott,* concave at cutting edge, and its point blunt, so as to be carried on palmar surface of index finger, to divide stricture in strangulated hernia. *Sir Astley Cooper's bistoury* has edge of not more than eight lines in length, situate about five lines from the point, to avoid wounding the intestine. *Bistouri caché* is a curved bistoury, blade of which is placed in a canula, whence it issues on pressing a spring. The word bistouri is used by the French for knife.

Bisulphate, bi-sul'fate. Combination of sulphuric acid, containing twice as much sulphuric acid as a normal sulphate.

Bisul'phite (*bis,* twice, *sulphis*). Acid sulphite; two equivalents of sulphurous acid are united with one of a base. **B. of carbon,** see *Carbon.*

Bitart'rate. Compound in which there is one part of base to two parts of tartaric acid.

Bitem'poral. Relating to both temporal bones, as *B. diameter* in the fœtus, line drawn from zygomatic process to opposite one.

Bitter. Amarus. **B. al'mond,** amygdalus. **B.-a. water,** aqua amygdalarum amararum. **B. ap'ple,** colocynth. **B. ash,** see *Bittera febrifuga.* **B. bark,** Pinckneya pubens, Alstonia constricta. **B. bloom,** Chironia angularis. **B. bu'gleweed,** Lycopus Europæus; tonic and alterative. **B. can'dytuft,** Iberis amara. **B. cane,** Cana agria. **B. cassa'va,** Manihot utilissima. **B. cress,** cardamine. **B. cu'cumber,** Citrullus colocynthis. **B. cup,** cup made of quassia wood. **B. dock,** Rumex obtusifolia. **B. grass,** Aletris farinosa. **B. holy,** hiera picra. **B. kino'va,** acid, kinovic. **B. or'ange,** Citrus vulgaris. **B. polyg'ala,** Polygala rubella. **B. prin'ciple,** principle contained in some vegetables, from which they derive their bitter character. **B. red'berry,** Cornus Florida. **B. root,** Apocynum androsæmifolium, Gentiana Catesbæi, Menyanthes verna. **B. sweet night'shade,** Solanum dulcamara. **B. sweet vine,** Solanum dulcamara. **B. weed,** Ambrosia trifida. **B., Welter's,** acid, carbazotic. **B. wine of iron,** see *Iron, wine of.* **B. wood,** quassia.

Bittera febrifuga, bit-te'rah feb-rif'u-gah. Quassia.

Bit'terin. See *Quassia.*

Bitters. See *Amarus.* **B., aromat'ic,** tonics to which aromatics are added. **B., Colum'bo,** tinctura calumbæ. **B., spir'it,** tinctura gentianæ composita. **B., styp'tic,** those bitters which are both styptic and astringent. **B., wine,** vinum gentianæ compositum.

Bit'tersweet. Solanum dulcamara, Celastrus scandens.

Bitumen, bit-u'men. Mineral pitch or tar; one of the family of mineral resins or hydrocarbons. **B. Barbaden'se,** Barbadoes tar; petroleum. **B., glu'tinous,** pissasphaltum. **B. of Judæ'a,** asphaltum. **B. Juda'icum,** asphaltum. **B., Mal'ta,** pissasphaltum. **B. petro'leum,** petroleum. **B. sol'idum,** asphaltum.

Bitu'minate of iod'oform. Mixture of tar, p. 100, and iodoform p. 10 or 20; used as ointment to soft chancres.

Bituminous, bi-tu'min-us. Relating to or containing bitumen.

Biu'ret reac'tion. Reaction of a purple color resulting from adding Fehling's solution to solution of peptone.

Biv'alent (*bis,* twice, *valeo,* to be able). Possessing the capability of displacing two atoms of hydrogen or combining with the same number.

Biventer, bi-ven'tur (*bi, venter,* belly). Double-bellied, as digastric muscle. **B. cervi'cis,** inner part of complexus musculus. **B. mandib'ulæ,** digastricus. **B. maxil'læ,** digastricus muscle.

Biven'tral (same etymon). Having two stomachs or bellies. **B. lobe of cerebel'lum,** wedge-shaped lobe of cerebellum behind the amygdala.

Bixa Americana, biks'ah a-mer-ik-an'ah. See *Terra orleana.* **B. orella'na** or **orlea'na,** see *Terra orleana.*

Bizygomat'ic, bi-zyg-o-mat'ik. Relating to zygoma of both sides, as *B. diam'eter,* distance between arches formed on each side by union of zygoma with temporal process of malar bone.

Bizzoze'ro, blood-plaque or **plate of.** See *Blood, globules of.*

Blabe, blah'be. Wound.

Blacciæ, blak'se-e. Rubeola.

Blacia, bla'se-ah. Debility.

Black al'der. Prinos verticillatus; Rhamnus frangula. **B. ant'imony,** antimony sulphide. **B. ash,** Fraxinus sambucifolius. **B. berry,** see *Rubus fruticosus.* **B. birch,** betula lenta. **B. blood,** see *Blood.* **B., bone,** animal charcoal. **B. bot'tle,** see *Infusum sennæ.* **B. can'cer,** melanosis. **B. cher'ry,** Prunos serotina. **B. co'hosh,** cimicifuga. **B. damp,** see *Hydrogen, carburetted.* **B. death,** see *Death, black.* **B. dog,** hypochondriasis. **B. dose,** see *Infusum sennæ.* **B. draught,** see *Infusum sennæ.* **B. drop,** acetum opii. **B. elm,** Ulmus effusa. **B. eye,** see *Ecchymosis.* **B. fe'ver,** fever, purpuric, malignant. **B. galls,** galls that have been collected before the egg has been hatched or the fly has escaped; see *Galls.* **B. ginger,** Amomum zingiber. **B. haw,** Viburnum prunifolium. **B. heads,** comedo. **B. hel'lebore,** Helleborus niger. **B. jaun'dice,** jaundice with dark discoloration. **B. lead,** plumbago. **B. leg,** sympathetic anthrax; see *Purpura.* **B. lep'rosy,** lepra nigricans. **B. li'on,** sloughing syphilitic ulcer, from which British soldiers suffered in Portugal. **B. mea'sles,** rubeola nigra. **B. mus'tard,** Sinapis nigra. **B. night'shade,** Solanum nigrum. **B. oak,** Quercus tinctoria. **B. phthis'is,** miner's asthma. **B. pitch,** pix nigra. **B. pock,** see *Variola.* **B. pep'per,** piper nigrum. **B. rasp'berry,** Rubus occidentalis. **B. root,** Aletris farinosa, Pterocaulon pycnostachyum, Coryza pycnostachia, Leptandria purpurea. **B. Sam'son,** Rudbeckia purpurea. **B. snake'root,** cimicifuga. **B. spit,** sputum of anthracosis of miners. **B. spruce,** Abies nigra. **B. tang,** Fucus vesiculosus. **B. su'gar,** extractum glycyrrhizæ. **B. tongue,** dark appearance of that organ from accumulated impurities, spores, disintegrated epithelium, etc. **B. tur'peth,** turpethum nigrum. **B. vom'it,** yellow fever; also characteristic matter vomited in that disease. **B. wal'nut,** Juglans nigra. **B. wash,** Black mercurial lotion; see *Hydrargyri submurias.* **B. wa'ter,** pyrosis. **B. wil'low,** Salix nigra.

Blactiæ, blak'te-e. Rubeola.

Bladda, blad'dah. Buttermilk.

Bladder, blad'dur. Urinary bladder; see *Vesica.* **B., air,** see *Air.* **B., biloc'ular,** sacculated bladder divided into two parts. **B., brain,** cerebral vesicle. **B., catarrh of,** see *Cystitis.* **B., colum'nar,** B., fasciculated. **B., daugh'ter,** secondary hydatid. **B., ex'trophy** or **extrover'sion of,** see *Exstrophia.* **B., eye,** optic vesicle. **B., fascic'ulated,** condition of bladder in which interior of organ is marked by strong reticulated

ridges or columns. **B. fe'ver**, pemphigus. **B., fun'dus of**, see *Urinary bladder*. **B., gall**, see *Gall-bladder*. **B., gas'trula**, perigastrula. **B., germ**, blastula. **B., her'nia of**, cystocele. **B., hia'tus, congeni'tal, of**, exstrophia of bladder. **B., inflammation of**, cystitis. **B., inver'sion of**, protrusion of the bladder through the urethra. **B., ir'ritable**, see *Cysterethismus*. **B., moth'er**, hydatid cyst from which secondary cysts arise. **B., neck of**, narrow portion of that organ. **B., rup'ture of**, see *Urinary bladder, rupture of*. **B., sac'culated**, condition of bladder in which mucous coat protrudes through muscular, so as to produce hernia, which may form vesical sacculus or appendix vesicæ. **B. sen'na**, Colutea arborescens; purgative. **B., spasm of**, see *Cystospasmus*. **B., stam'mering**, spasmodic micturition, with imperfect emptying of bladder, from want of co-ordination of muscles employed in the act. **B., swim**, air-bladder. **B., trigo'nal space of**, see *Urinary bladder*. **B., u'rinary**, see *Urinary bladder*. **B. worm**, cysticercus. **B. wrack**, Fucus vesiculosus.

Blad'dery fe'ver. Urethral fever.

Blade'bone. Scapula.

Blaeberry. Vaccinium myrtillus.

Blæsitas, ble'se-tas (*blaisos*, halting). Stammering; balbuties; defect in pronunciation, substituting soft consonants for hard, as *z* for *s*, *d* for *t*; lisping.

Blæsopodes (ble-sop'o-des) (*blaisos*, lame, *pous*, foot) or **Blæsopus**, ble'so-pus. See *Kyllosis*.

Blæsosis, ble-so'sis. Crookedness of limb; blæsitas.

Blæsus, ble'sus (*blaisos*, lame). Distortion, especially outward distortion of legs; stammerer; suffering from general paralysis.

Blain. Pustule; blotch; blister; mark left by wound; discoloration after sore; swelling of glottis in horses.

Blamma, blam'mah (blow). Wound or injury.

Blancard's pills. Pills of iodide of iron, imitated in *pilulæ ferri iodidi* (Ph. U. S.).

Blanc mange (F.), blah monj' (*blanc*, white, *manger*, to eat). Jelly prescribed as nutritive in convalescence and chronic disease; prepared usually with isinglass, sugar, and flavoring substances, with milk.

Blanch'ing. Making white, becoming white, as hair or skin.

Bland. Soothing, demulcent.

Blanket bath. Bath in which the body is wrapped in cloths.

Blanks. Epileptic vertigo.

Blas alterati'vum. Plastic force.

Blast (G. *blasen*, to blow). Infection of anything pestilential; stroke of sudden plague; flatulent affection of sheep.

Blastelasmata, blas-tel-az'mat-ah (*blastos*, germ, *elasma*, plate). Layers of fecundated ovum derived from ectoderm and endoderm.

Blastema, blas-ta'mah (*blastano*, to bud). Germ; eruption of morbific principle at surface of the body; matrix or general formative element of tissues; free exudation of plastic matter. **B. den'tis**, pulp of tooth. **B., ossif'ic** or **os'sifying**, osteogenetic layer of periosteum. **B. pi'li**, hair papilla.

Blastemal (blas-te'mal) or **Blastemat'ic.** Relating to blastema, as B. formations, those formed from blastema.

Blastematic, blas-te-mat'ik. Blastemal.

Blastesis, blas-ta'sis. Development.

Blastid, blas'tid. Space in segment of ovum preceding appearance of nucleus.

Blastidium, blas-tid'e-um. Cell in interior of another cell.

Blastocardia, blas-to-kar'de-ah (*blastos*, germ, *kardia*, heart). Molecule or germinal spot

Blastocele, blas'to-seel (*blastos*, germ, *kelis*, spot). Germinal spot.

Blastochyle, blas'to-kile (*blastos*, germ, *chulos*, juice). Clear liquid contents of germinal vesicle or blastocele.

Blastocœle, blas-to-se'le (*blastos*, germ, *koilos*, hollow). Cavity in ovum after division; central part or cavity of blastula.

Blastocyst, blas'to-sist (*blastos*, germ, *kustis*, bladder). Germinal vesicle; see *Molecule*.

Blastocystinx, blas-to-sis'tinks. Blastocyst.

Blastoderm, blas'to-derm (*blastos*, germ, *derma*, skin). Germinal membrane or vesicle; membranous sac in fecundated ovum, consisting of nucleated cells or blastomeres formed by segmentation, original structure from which embryo is developed. At the outset it is a simple layer, afterward composed of two layers, endoderm or hypoblast and ectoderm or epiblast, between which, at a later stage of development, a third layer forms, called the mesoderm or mesoblast.

Blastodermic, blas-to-der'mik. Relating to blastoderm. **B. mem'brane**, blastoderm. **B. lay'ers**, see *Molecule*. **B. ves'icles**, see *Molecule*.

Blastodisc or **Blastodisk**, blas'to-disk. Germinal disk of ovum of birds; archiblast.

Blastogenesis, blas-to-gen'e-sis (*blastos*, *genesis*, production). Production of germs.

Blastogeny, blas-toj'en-e. Evolution of germ.

Blastoma, blas-to'mah. Granuloma, growth composed of granulation tissue.

Blastomeres, blas'to-meres (*blastos*, *meros*, part). Nucleated cells formed in first stages of ovum, constituting blastoderm. From these early cells all the fœtal tissues are afterward developed. See *Morula*.

Blastomyce'tes (*blastos*, *mukes*, mushroom). Order of Fungi, multiplying by germination and sporification, including yeast fungi, torulaceæ, etc.

Blastophore, blas'to-for (*blastos*, *phero*, to carry). Part of testis containing epithelial cells or processes from which spermatozoa are developed. Part of spermatospore—sperm blastophore—which is not developed into spermatozoids.

Blastophylla, blas-to-fil'lah (*blastos*, germ, *phullon*, leaf). Ectoderm and endoderm.

Blastopore, blas'to-pore (*blastos*, *poros*, passage). Passage into cavity of innermost germ-layer through the primitive streak.

Blastosphere, blas'to-sfere (*blastos*, *sphaira*, sphere). Single row of cells in embryo arranged like a closed sphere; segmentation sphere of embryo, result of combination of the male and female elements. See *Blastula* and *Cytula*.

Blastostom'ion (*blastos*, *stoma*, mouth). Blastopore.

Blastostroma, blas-to-stro'mah (*blastos*, *stroma*, bed). Portion of ovum giving origin to blastoderm. Embryonic area.

Blastula, blas'tu-lah. Fecundated ovum, when in condition of hollow spherical space, filled with liquid or semiliquid material, walls of the sphere being made up of single cell-layer. Blastosphere.

Blastulation, blas-tu-la'shun. Development of blastula or blastosphere.

Blas'tule. Blastula.

Blatta, blat'tah. Clot. **B. Byzantia**, be-zan'she-ah, marine production from Conchylia, prescribed in epilepsy, hysteria, and hepatic obstructions. **B. Lappo'nica**, Russian cockroach. **B. Orienta'lis**, cockroach. Active principle, called *Antihy'dropin*, is diuretic, and used in albuminuria, diminishing the amount of albumen and casts in urine, and dispelling accompanying œdema.

Blaud's (blo's) **pills.** Pills of carbonate of iron, imitated in *pilulæ ferri carbonatis* (Ph. U. S.).

Blawort, bla'wurt. Centaurea cyanus, Campanula rotundifolia.

Bla'zing star. Chamælirium luteum, Liatris, Aletris farinosa.

Bleaberry, ble'ber-re. Vaccinium myrtillus.

Bleaching, ble'ching. Dealbation, or subjecting to a process of whitening. **B. pow'der**, chlorinated lime.

Blear'edness. Lippitudo; sore eyes from inflammation of edges of the eyelids.

Blear-eye, Blear-eyed, or **Blear'eyedness.** Lippus.

Bleb. Bulla.

Blechnon, bleck'non. Polypodium filix mas.

Blechnum lignifolium, blek'num lig-ne-fo'le-um. Asplenium scolopendrium. **B. squamo'sum**, asplenium ceterach.

Blechropyra, blek-rop'ir-ah (*blechros,* slow, *pur,* fever). Slow or adynamic feyer; slight fever.

Blechropyrus, blek-rop'ir-us. Typhus mitior.

Blechros, blek'ros (*blechros,* weak, slow). Epithet applied to various feeble affections, as fevers, and to the pulse.

Blechrosphygmia, blek-ro-sfig'me-ah (*blekros, sphugmos,* pulse). Slow pulse.

Bleed'er. Phlebotomist. Person suffering from hemophilia.

Bleed'ers' disease. Hæmophilia.

Bleed'ing. Hemorrhage; bloodletting. **B. boist,** cupping-glass. **B. heart,** Cypripedium luteum. **B. from nose,** epistaxis.

Blenna, blen'ah. Mucus. **B. na'rium,** nasal mucus.

Blennadenitis, blen-ad-en-e'tis (*blenna, aden,* gland). Inflammation of mucous follicles.

Blennelytria, blen-el-it're-ah (*blenna, elutron,* vagina). Discharge of mucus from the vagina; vaginal catarrh. Leucorrhœa.

Blennemesis, blen-em'es-is (*blenna, emesis,* vomiting). Vomiting of mucus.

Blennenteria, blen-en-te're-ah (*blenna, enteron,* intestine). Dysentery; mucous diarrhœa.

Blennenteritis, blen-en-ter-e'tis (same etymon). Inflammation of the bowel, with mucous discharge.

Blennisthmia, blen-isth'me-ah (*blenna, isthmos,* throat). Increased flow of mucus from pharynx and larynx; pharyngeal or pharyngo-laryngeal catarrh.

Blennocele, blen-o-se'le (Eng. blen'o-seel) (*blenna, kele,* tumor). Gonorrhœal epididymitis.

Blennochesia (blen-o-ke'ze-ah) or **Blennoche'zia** (*blenna, chezo,* to go to stool). Mucous diarrhœa.

Blennocystides, blen-o-sist'id-ees (*blenna, kustis,* cyst or bladder). Bursæ mucosæ.

Blennocysti'tis (same etymon). Cystirrhœa; catarrh of urinary bladder.

Blennodes, blen-o'des. Blennoid; myxoid; mucous.

Blennoëmesis, blen-o-em'es-is. Blennemesis.

Blennogen'ic or **Blennogenous,** blen-oj'en-us (*blenna, gennao,* to form). Mucific. Forming or generating mucus.

Blennohymenitis, blen-o-him-en-e'tis (*blenna, hymen,* membrane). Inflammation of mucous membrane.

Blennoid (blen'oid) or **Blennoideus,** blen-o-e'da-us (*blenna, eidos,* resemblance). Like mucus; myxoid; muciform.

Blennoma, blen-o'mah (*blenna,* mucus). Mucous humor or polypus.

Blennomenorrhœ'a (*blenna,* mucus, *men,* month, *rheo,* to flow). White menses; menstrual flow characterized by impoverished appearance of the blood, in tuberculous and other debilitated subjects.

Blennometritis, blen-o-met-re'tis (*blenna, metra,* uterus). Catarrhal metritis; leucorrhœa.

Blennometrorrhœa, blen-o-met-ror-rhe'ah. Leucorrhœa of uterus.

Blennophlogisma (blen-o-flo-jiz'mah) or **Blennophlogo'sis** (*blenna, phlogosis*). Inflammation of mucous membrane; mucitis.

Blennophthalmia, blen-of-thal'me-ah. Ophthalmia, usually purulent.

Blennoptysis, blen-op'tis-is (*blenna, ptuo,* to spit). Expectoration of mucus; bronchial or pharyngeal catarrh.

Blennopyra (blen-op'ir-ah) or **Blennopyr'ia** (*blenna, pur,* fire). Fever with mucous complications, as mesenteric fever, adeno-meningeal fever, etc.

Blennorrhagia, blen-or-rhaj'e-ah (*blenna, rhegnumi,* to break forth). Gonorrhœa; excessive mucous discharge. **B. bal'ani,** balanitis. **B. benig'na,** leucorrhœa. **B. chron'ica,** gleet. **B. genital'ium,** leucorrhœa. **B. no'tha,** gonorrhœa spuria; balanitis. **B. ocula'ris** or **oc'uli,** purulent or gonorrhœal ophthalmia. **B., pul'monary,** bronchorrhœa. **B. spu'ria,** B. notha. **B. urethra'lis,** urethral gonorrhœa. **B. uteri'na,** uterine gonorrhœa. **B. vagina'lis,** vaginal gonorrhœa. **B., vul'var,** gonorrhœa of vulva.

Blennorrhagic, blen-or-rhaj'ik. Relating to blennorrhagia or gonorrhœa. **B. epididymi'tis,** hernia humoralis.

Blennorrhinia, blen-or-rhin'e-ah (*blenna, rhis,* nose). Coryza.

Blennorrhœa, blen-or-rhe'ah (*blenna, rheo,* to flow). Inordinate secretion and discharge of mucus; gonorrhœa; gleet. **B. benig'na,** leucorrhœa. **B. chron'ica,** gleet; see *Gonorrhœa.* **B. cilia'ris,** ophthalmia tarsi. **B. conjuncti'væ,** purulent conjunctivitis. **B. genital'ium,** leucorrhœa. **B. of lac'rymal sac,** see *Mucocele.* **B. luo'des,** gonorrhœa impura. **B. nasa'lis,** coryza. **B. neonato'rum,** ophthalmia neonatorum. **B. oc'uli,** see *Ophthalmia.* **B. oc'uli gonorrho'ica,** see *Ophthalmia.* **B. oc'uli neonato'rum,** ophthalmia neonatorum. **B. oc'uli purulen'ta,** see *Ophthalmia.* **B. Stoerk'ii,** chronic b. of upper air-passages, with narrowness of larynx, described by Stoerk as occurring in some parts of Europe. **B. tor'pida,** gleet. **B. urethra'lis,** gonorrhœa; cystirrhœa. **B. urina'lis,** cystirrhœa. **B. vene'rea,** gleet. **B. ventric'uli,** gastrorrhœa. **B. vesi'cæ,** cystirrhœa.

Blenno'ses. Affections of mucous membranes.

Blennostasis, blen-os'tas-is (*blenna, stasis,* rest). Suppression or suspension of mucous discharge.

Blennostatic, blen-o-stat'ik (same deriv.). Remedy for suppression of mucous discharge.

Blennothorax, blen-o-tho'raks (*blenna, thorax,* chest). Pulmonary catarrh, peripneumonia notha. **B. chron'icus,** asthma humidum.

Blennotorrhœa, blen-o-tor'rhe-ah (*blenna, ous,* ear, *rheo,* to flow). Discharge of mucus from the ear; otorrhœa.

Blennurethria, blen-u-re'thre-ah (*blenna, ourethra,* urethra). Gonorrhœa; urethral blennorrhœa.

Blennuria, blen-u're-ah (*blenna, ouron,* urine). Presence of mucus in urine; cystirrhœa.

Blennymen, blen-e'men (*blenna, humen,* membrane). Mucous membrane.

Blennymenitis, blen-e-men-e'tis. Mucitis; inflammation of mucous membrane.

Blephara, blef'ar-ah (pl. of **Blepharon**). Eyelids.

Blepharadenes, blef-ar-ad'en-ees (*blepharo, aden,* gland). Meibomian glands.

Blepharadenitis, blef-ar-ad-en-e'tis (*blepharo, aden,* gland). Ophthalmia tarsi; inflammation of the eyelids, or of sebaceous glands and hair-follicles of the lids.

Blepharal, blef'ar-al. Relating to the eyelid; palpebral.

Blepharanthracosis, blef-ar-an-thrah-co'sis. Gangrenous or carbuncular inflammation of the eyelids.

Blepharelosis, blef-ar-el-o'sis (*blepharo, eileo,* to roll). Entropion; ectropion.

Blepharemphysema blef-ar-em-fe-ze'mah. Emphysema of the eyelid.

Blepharic, blef'ar-ik. Relating to the eyelid.

Blepharides, blef-ar'id-es. Eyelashes.

Blepharidoplastice, blef-ar-id-o-plas'te-se (*blepharo, plasso,* to form). Blepharoplasty.

Bleph'aris. Eyelid.

Blepharismus, blef-ar-iz'mus. Nictation; involuntary winking.

Blepharitis, blef-ar-e'tis. Ophthalmia tarsi. **B. angula'ris,** B. intermarginalis. **B. cilia'ris,** ophthalmia tarsi. **B. gangræno'sa,** blepharanthracosis. **B. glandula'ris** or **glandulo'sa,** inflammation of Meibomian glands; chalazion. **B. intermargina'lis,** inflammation of lids and parts between, from altered secretion and lacrymation. **B. inter'na,** inflammation of conjunctival portion of eyelids. **B. margina'lis,** inflammation of edges of eyelids. **B. phlegmono'sa,** intense inflammation of cellular tissue of eyelids. **B. sim'plex,** simple inflammation of edges of eyelids, with redness, crusting, and gluing together of the lids. **B. ulcero'sa,** form of blepharitis with pustules at opening of hair-glands, followed by ulceration. **B. variolo'sa,** inflammation of lids in smallpox.

Blepharo, blef'ar-o (eyelid). In composition, eyelid.

Blepharoadenitis, blef-ar-o-ad-en-e′tis (*blepharo, aden,* gland). Blepharadenitis.

Blepharoadenoma, blef-ar-o-ad-en-o′mah. Glandular tumor of eyelid.

Blepharoantheroma, blef-ar-o-anth-er-o′mah. Tumor of lid, semifluid and gelatinous, with distinct cell-wall.

Blepharoblennorrhœa, blef-ar-o-blen-nor-rhe′ah. Purulent ophthalmia. **B. neonato′rum,** see *Ophthalmia purulenta infantum.*

Blepharocarcinoma, blef-ar-o-kar-sin-o′mah. Cancer of the eyelid.

Blepharochromidrosis, blef-ar-o-kro-mid-ro′sis (*blepharo, chroma,* color, *idros,* sweat). Colored sweat, of bluish coloring matter, especially of women.

Blepharocleisis, blef-ar-o-kli′sis (*blepharo, kleisis,* closure). Occlusion or adhesion of the eyelids.

Blepharocoloboma, blef-ar-o-ko-lo-bo′mah (*coloboma,* cleft or shortening). Fissure of eyelids; deficiency of eyelid.

Blepharoconjunctivitis, blef-ar-o-kon-junk-tiv-e′tis. Inflammation affecting the conjunctiva and eyelids.

Blepharodyschrœa, blef-ar-o-dis-kre′ah (*blepharo, dus,* with difficulty, *chroa,* color). Discoloration of the eyelid; nævus of the eyelid.

Blepharœdema, blef-ar-e-de′mah (*blepharo, oidema,* swelling). Œdema of eyelids. **B. agno′sum,** hydroblepharon.

Blepharoemphysema, blef-ar-o-em-fe-ze′mah. Emphysema of the eyelids.

Blepharohæmatidrosis, blef-ar-o-he-mat-id-ro′sis (*blepharo, haima,* blood, *hidros,* sweat). Sweating of blood from the eyelids, probably local hemorrhage.

Blepharohyperidrosis, blef-ar-o-he-pur-id-ro′sis. Excessive sweating of the eyelids.

Blepharolithiasis, blef-ar-o-lith-e′as-is (*blepharo, lithos,* stone). Formation of concretions in the eyelid.

Blepharomelæna, blef-ar-o-mel-e′nah (*blepharo, melas,* black). Condition of eyelids in which there is deposit of black pigment; blepharochromidrosis.

Blepharon, blef′ar-on. Eyelid. **B. atonia′ton,** blepharoptosis.

Blepharoncosis (blef-ar-on-ko′sis) or **Blepharon′cus** (*blepharo, onkos,* tumor). Tumor of the eyelid.

Blepharo-ophthalmia, blef-ar-o-of-thal′me-ah. Blepharophthalmia.

Blepharophimosis, blef-ar-o-fe-mo′sis (*blepharo, phimoo,* to constrict). Congenital diminution of space between the eyelids; blepharostenosis.

Blepharophlegmasia, blef-ar-o-fleg-mah′ze-ah. Blepharitis.

Blepharophthalmia, blef-ar-of-thal′me-ah. Ophthalmia tarsi. **B. neonato′rum,** ophthalmia neonatorum. **B. purulen′ta,** blepharopyorrhœa. **B. ulcero′sa,** see *Ophthalmia tarsi.*

Blepharophthalmitis glandulosa, blef-ar-of-thalme′tis glan-du-lo′sah. Purulent ophthalmia of infants.

Blepharophthalmo-blennorrhœa, blef-ar-of-thal′mo-blen-or-rhe′ah. Blepharophthalmia.

Blepharophthalmostat, blef-ar-of-thal′mo-stat (*blepharo, ophthalmos,* eye, *statikos,* at standstill). Instrument to keep eyeballs and eyelids immovable.

Blepharophtheiriasis, blef-ar-o-thi-re′as-is. Condition of eyelashes, characterized by presence of lice.

Blepharophyma, blef-ar-o-fe′mah (*blepharo, phuma,* swelling). Blepharoncosis.

Blepharophysema, blef-ar-o-fiz-e′mah. Blepharemphysema.

Blepharoplasty, blef′ar-o-plas-te (*blepharo, plastikos,* forming). Formation of new eyelid; plastic surgery of the eyelid.

Blepharoplegia, blef-ar-o-plej′e-ah (*blepharo, plege,* stroke). Paralysis of the eyelid.

Blepharoptosis, blef-ar-o-to′sis (*blepharo, ptosis,* fall). Falling down of upper lid over the eye, caused by paralysis of levator palpebræ superioris muscle; unfavorable symptom, generally connected with a state of the brain favoring apoplexy or palsy. **B. ectro′pium,** ectropium. **B. entro′pion,** entropion. **B. lagophthal′mus,** lagophthalmus.

Blepharopyorrhœa, blef-ar-o-pe-or-rhe′ah (*blepharo, puon,* pus, *rheo,* to flow). Secretion of pus from the eyelids. Purulent ophthalmia. **B. neonato′rum,** form of ophthalmia neonatorum; purulent ophthalmia of infants.

Blepharorrhaphy, blef-ar-or′rhaf-e (*blepharo, rhaphe,* suture). Operation for bringing together edges of the lids by stitches, as after removal of eyeball or operation for ectropion.

Blepharorrhœa, blef-ar-or-rhe′ah (*blepharo, rheo,* to flow). Discharge of mucus or purulent matter from the eyelids.

Blepharospasm, blef′ar-o-spazm. Spasmodic action or tic of orbicularis palpebrarum muscle, generally occurring in scrofulous corneitis or conjunctivitis.

Blepharospath, blef′ar-o-spath (*blepharo, spathe,* spatula). Forceps applied to the eyelid to check hemorrhage.

Blepharostat, blef′ar-o-stat. Elevator for the eyelids, enabling the surgeon to thoroughly expose the parts for examination or operation.

Blepharostenosis, blef-ar-o-sten-o′sis (*blepharo, stenosis,* contraction). Accidental or congenital diminution of space between the eyelids. Blepharophimosis.

Blepharosymphysis, blef-ar-o-sim′fis-is (*blepharo, sumphusis,* growing together). Growing together or adhesion of the eyelids.

Blepharosyndesmitis, blef-ar-o-sin-des-me′tis (*blepharo, sundesmos,* bond). Conjunctivitis of the eyelids.

Blepharosynechia, blef-ar-o-sin-ek′e-ah (*sunecheia,* connection). Adhesion of eyelids; blepharosymphysis.

Blepharotis (blef-ar-o′tis), **Blephari′tis,** or **Blepharoti′tis.** Ophthalmia tarsi. **B. glandula′ris contagio′sa,** see *Ophthalmia.*

Blepharotosis, blef-ar-o-to′sis. Ectropium.

Blepharoxystum, blef-ar-oks-is′tum (*blepharo, xuo,* to scrape). Instrument for removing callosities from the eyelids, as in trachoma.

Blepharydatis, blef-ar-id′at-is (*blepharo, hudatis,* hydatid). Hydatid affection of the eyelid.

Blephilia hirsuta, blef-il′e-ah hur-su′tah (*blepharis,* eyelash). *Ohio horsemint, Hairy horsemint.* Indigenous plant having aromatic properties of mint family.

Blessed herb, bles′sed urb. Geum urbanum. **B. this′tle,** Carduus benedictus.

Blestrismus, bles-triz′mus. Restlessness of the sick. Jactitation.

Bleta (bla′tah) **al′ba.** White or milky urine.

Bletia campanulata, ble′she-ah kam-pan-u-lat′ah. Mexican plant used in dysentery.

Blight. Mildew. Partial paralysis of nerves of the face, from cold. **B. in the eye,** catarrhal ophthalmia; palsy of orbicularis palpebrarum and muscles of eyebrow; extravasation of blood within the conjunctiva. **B., sand′y,** conjunctivitis with photophobia and sensation of grittiness.

Blights. See *Lichen urticatus.*

Blind. Without sight; without outlet, as blind canals, the cæcum, etc. **B. boil,** see *Furunculus.* **B. fis′tula,** fistula without outlet. **B. piles,** those without any discharge externally. **B. spot,** point of entrance of optic nerve on retina.

Blind′ness. Loss of sight; see *Cæcitas.* **B., blue,** incapacity to distinguish blue color. **B., col′or,** the want of capacity to distinguish or appreciate colors; achromatopsia. **B., cor′tical,** loss of sight from lesion of cortical part of the eye. **B., day,** see *Nyctalopia.* **B., light′ning,** see *Lightning.* **B., moon,** see *Hemeralopia.* **B., ner′vous,** amaurosis. **B., night** or **noctur′nal,** see *Hemeralopia.* **B., psych′ical,** form of blindness in which sight exists, but without power of recognition. **B., red,** inability to distinguish red color. **B., snow,** see *Snow.* **B., word,** aphasia.

Blink′ing. Winking.

Blister, blis′tur. Vesicle or vesication from vesicatories or other causes; also vesicant, vesicatory; a blister plaster; substance which, when applied to the

skin, irritates it and occasions serous secretion, raising the epidermis and inducing vesicles, as cantharides, mustard, ammonia, etc. Blisters are used as counter-irritants. A blister applied a few hours to produce this effect is termed a flying blister. A perpetual blister is one kept open by appropriate dressings. **B. bee'tle,** cantharis. **B. fe'ver,** vesicular eruption of the lip; see *Fever blister*. **B. fly,** cantharis. **B., fly'ing,** transient application of blister to produce rubefaction; see *Blister*. **B., per'manent,** blister so treated as to prevent its healing. **B., perpet'ual,** see *Blister*. **B. plant,** Ranunculus acris. **B. plas'ter,** blister. **B. weed,** Ranunculus acris. **B., white,** Rupia escharotica.

Blistering (blis'tur-ing) **ce'rate.** Ceratum cantharidis. **B. collo'dion,** pyroxylin dissolved in blistering liquid. **B. fly,** cantharis. **B. liquid,** liquor epispasticus. **B. pa'per,** see *Sparadrapum vesicatorium*. **B. plas'ter,** ceratum cantharidis. **B. tis'sue,** see *Sparadrapum vesicatorium*.

Blitum Americanum, ble'tum am-er-ik-an'um. Phytolacca decandra.

Block teeth. See *Teeth, block*.

Blood, blud (Sax. bloð). Animal fluid formed chiefly from chyle; acquiring important properties during respiration; entering every organ through the circulation, distributing nutritive principles to every texture and the source of every secretion. Blood is white in molluscous and inferior animals, which are hence called white-blooded to distinguish them from the red-blooded, including the mammalia, birds, reptiles, and fishes. Arterial or red blood is florid, with a strong smell; s. g. 1.049. Venous or black blood is brownish red; s. g. 1.051. The former, distributed from the heart, is nearly the same through its whole extent; venous blood is the remains of arterial blood after different elements have been taken from it in nutrition, with addition of products of absorption. Blood, taken from a vessel and left to itself, becomes solid, separating into two distinct parts, *Serum*, or watery supernatant fluid, and *Clot*, variously called *Cruor, Coagulum, Crassamentum, Hepar* or *Placenta sanguinis* or *cruoris, Insula*, and *Thrombus*. Serum is chiefly water holding albumen in solution and salts of the blood; clot contains fibrin, coloring matter, hæmatin, little serum, and small quantity of salts. The blood is composed of water in which are dissolved salts and proteids, and suspended in it are the corpuscles. The following table presents, at a glance, a statement of the composition of the blood (Kirkes):

		Average composition of blood (in 1000 parts).
	Water	784
	Albumen	70
	Fibrin	2.2
	Red corpuscles (globulin 123, hæmatin 7)	130
Fatty matters.	Cholesterin	1.4
	Cerebrin	
	Serolin	
	Oleic and margaric acids	
	Volatile and odorous fatty acids	
	Fat containing phosphorus	
Inorganic salts.	Chloride of sodium	3.6
	Chloride of potassium	.35
	Phosphate of sodium (Na_3Po_4)	.2
	Carbonate of sodium	.82
	Sulphate of sodium	.28
	Phosphates of calcium and magnesium	.25
	Oxide and phosphate of iron	.50
	Extractive matters, biliary coloring matter, gases, and accidental substances	6.4
		1000

The four principal components of the blood are fibrin, albumen, corpuscles, and saline matter. In the *circulating blood* they are thus combined:

Fibrin, Albumen, Salts, } in solution forming *Liquor sanguinis*; red and white corpuscles suspended in the liquor sanguinis.

In *coagulated blood* they are thus combined:

Fibrin, Red and white corpuscles, } forming the *crassamentum* or clot.

Albumen, Salts, } remaining in solution, forming *serum*.

Blood taken from an artery coagulates in 3–15 minutes. The coagulation of the blood is *hastened* by moderate warmth, 100° to 120° F.; by contact with foreign matters; by access of air; by rest; and by addition of moderate amounts of water. It is *retarded* or *prevented* by greater heat or extreme cold; by contact with living tissues, especially the blood-vessels; by absence of air (after death by asphyxia blood remains fluid, also when air is withheld from drawn blood, as by film of oil); by agitation of the vessel; by more than twice the bulk of water; by addition of viscid substances, as glycerin or syrup; by addition of neutral salts, about 2 per cent. solution; by digestive ferments; and by strong acids or alkalies. (Manning.)

The *globules*, blood-globules, blood-corpuscles, blood-cells, blood-disks, or blood-vesicles are small bodies, particularly observable when the transparent parts of cold-blooded animals are examined by the aid of the microscope, and are met with in the blood of all animals. They are circular in the mammalia, excepting the camel and the llama, and elliptical in birds and cold-blooded animals; flat in all animals, and generally composed of a central nucleus enclosed in a membranous sac. Chemically, they consist of hæmatin and globulin, hæmato-globulin, or cruorin. By some, however, they, as well as globulin, hæmatocrystallin, and hæmoglobulin or hæmoglobin, have been considered to be formed of one chemical substance, readily decomposed, the crystallizable material hæmatoïdin, although the latter is usually considered a derivative of hæmoglobin. See *Globulin*. The corpuscles vary in size in different animals. The following table (from that of Gulliver and the observations of Chapman) exhibits a comparative view of the

Average Diameters of the Blood-corpuscles in Different Animals.

Mammals. Animal.	Diameter.	*Birds.* Animal.	Diameter.
Manatee	$\frac{1}{2700}$ inch.	Ostrich	$\frac{1}{1649}$ inch.
Elephant	$\frac{1}{2745}$ "	Owl	$\frac{1}{1763}$ "
Ant-eater	$\frac{1}{2765}$ "	Swan	$\frac{1}{1808}$ "
Sloth	$\frac{1}{2885}$ "	Pigeon	$\frac{1}{1873}$ "
Whale	$\frac{1}{3000}$ "	*Reptiles.*	
Camel	$\frac{1}{3123}$ "	Turtle	$\frac{1}{1231}$ "
Man	$\frac{1}{3200}$ "	Viper	$\frac{1}{1274}$ "
Orang	$\frac{1}{3283}$ "	Lizard	$\frac{1}{1665}$ "
Chimpanzee	$\frac{1}{3412}$ "	*Amphibia.*	
Dog	$\frac{1}{3512}$ "	Amphiuma	$\frac{1}{383}$ "
Opossum	$\frac{1}{3557}$ "	Proteus	$\frac{1}{450}$ "
Rabbit	$\frac{1}{3607}$ "	Siren	$\frac{1}{420}$ "
Black rat	$\frac{1}{3764}$ "	Menopoma	$\frac{1}{583}$ "
Mouse	$\frac{1}{3814}$ "	*Fishes.*	
Brown rat	$\frac{1}{3911}$ "	Pike	$\frac{1}{2000}$ "
Gray squirrel	$\frac{1}{4000}$ "	Perch	$\frac{1}{2481}$ "
Ox	$\frac{1}{4287}$ "	Lamprey	$\frac{1}{2134}$ "
Cat	$\frac{1}{4404}$ "		
Sheep	$\frac{1}{5200}$ "		
Goat	$\frac{1}{6366}$ "		
Pigmy musk deer	$\frac{1}{12325}$ "		

Besides these, blood contains white or pale globules, *leucocytes, leucocythes*, or *blood bioplasts*, which are lymph and chyle corpuscles and corpuscles produced through the action of the spleen, lymphatic and solitary glands, etc., in process of development into red corpuscles. The proportion of white to red corpuscles is about 2 or 3 to 1000.

The average thickness of a red corpuscle is about the $\frac{1}{12400}$th of an inch. The white corpuscle is larger than the red, measuring, on an average, the $\frac{1}{2500}$th of an inch; white corpuscles are more numerous in pregnancy, and in children than in adults. They are found in the spleen, in the solitary and lymphatic glands, red marrow of bones, etc.

Hayem differentiates three varieties of red corpuscles: large, with a diameter of 0.0085 metres; medium-sized, with a diameter of 0.0075; small, with a diameter of 0.0065. Among 100 blood-corpuscles, 75 are of medium size. The following facts from Vierordt are of interest in regard to the corpuscles of the blood:

Size: greatest diameter, 0.00774 metres (minimum 0.0045, maximum 0.0097); greatest thickness, 0.00190.

Weight of a single blood-corpuscle . 0.00008 mg.
Specific weight . . . . . 1.105 (Welcker); 1.088–1.089 (C. Schmidt).

Number of red corpuscles per mm.:

5,174,000 (Vierordt).
5,000,000 (Hayem).
5–6,000,000 (Patrigeon).

Ratio between white and red corpuscles:

Observers.		
Gowers	1 : 330	1 : 340 (on an average).
Welcker	1 : 335	
Moleschott . . .	1 : 357 (= 2.8 : 1000)	
Bouchut and Dubrisay	for 20–30 years	1 : 700
	for 30–58 years	1 : 616

Frey states that in his own case, while fasting, the ratio was 1 : 357. Two hours after dinner Frey obtained for himself 1 : 303; in a boy 4 years old, 1 : 345.

Moleschott, 4 hours after breakfast				1 : 466
" 2 " "	a meal containing little albumen			1 : 356
" 2 " "	a meal containing much albumen			1 : 282

A third corpuscle or globule has been described, to which various names have been given—*corpuscle of Hayem, elementary corpuscle of Zimmermann, hæmoblast, blood-plaque* or *blood-plate, disklet*—a colorless protoplasmic disk, measuring from 1.5 to 3.5 micromillimeters, or even larger. As yet they have not been established as being anything more than undeveloped lymph or white corpuscles.

The following table exhibits the computations of different physiologists regarding the amount of the circulating blood, arterial and venous:

	lbs.
Harvey, Lister, Moulins, Abildguard, ...	8
Blumenbach, Lobb, Lower and Lewes, ...	10
Sprengel	10 to 15
Günther and Bock	5 to 20
Blake	16½ to 18¾
Weber and Lehmann	17½ to 19
Müller, Burdach, and P. Bérard	20
Wagner	20 to 25
Quesnai	27
F. Hoffmann	28
Haller	28 to 30
Young	40
Hamberger	80
Keill	100

The estimates of Günther, Bock, and Blake are probably approximations to the truth. The proportion of arterial blood to venous is about 4 to 9.

Much attention has been paid to the varying condition of the blood in disease. The average proportion of each of the organic elements in 1000 parts of healthy blood is as follows, according to Le Canu and MM. Andral and Gavarret: fibrin, 3; red corpuscles, 127; solid matter of the serum, 80; water, 790; but in inflammation the amount of fibrin may be increased to 10, and the albumen diminished, as it is in Bright's disease, etc.; and in fevers, etc. the fibrin diminished in quantity. Blood-clots may become softened, and by breaking up become causes of obstruction in the vessels. See *Embolism and Thrombosis.*

Dried human blood was at one time considered to be antiepileptic, and dried blood-globules of the ox have been given internally in cases of anæmia. The blood of the goat, dried, *sanguis hirci siccatus*, sudorific and antipleuritic, the dried blood of the ox, *extractum sanguinis bovini*, and the dried red corpuscles, have been given as analeptics, especially where there was a deficiency of red corpuscles. **Blood, arte'rial,** see *Blood.* **B., black,** see *Blood.* **B., black, vas'cular sys'tem of,** see *Vascular.* **B. boil,** hæmatoma. **B. cal'culi,** see *Pseudo-calculi.* **B. ca'sein,** globulin. **B. casts,** casts of renal tubes formed by coagulated blood seen in examining urine microscopically, in hemorrhage from secreting portion of the kidney. **B. cells,** blood-globules. **B. chan'nels,** canaliculi, devoid of walls, for the passage of blood in granulation tissue. **B., char'coal,** see *Charcoal.* **B., circula'tion of,** see *Circulation.* **B. clot,** coagulum; see *Blood.* **B., col'oring mat'ter of,** see *Blood.* **B. cor'puscles,** blood-globules; see *Blood.* **B. crys'tals,** hæmatoidin. **B. cyst,** sanguineous cyst; see *Hæmatoma* and *Hæmatocele.* **B. disease,** any morbid condition, the materies morbi of which is presumed to exist in the blood. Such diseases are rather dependent upon diseased cell-action, which may be caused, however, by a modified condition of the blood; see *Hæmatonosus.* **B. disk'let,** blood-globules. **B. disks,** blood-globules; see *Blood.* **B., dried,** see *Blood.* **B. funk'ers,** see *Hæmatophobia.* **B. glands,** see *Ganglion.* **B. glob'ules,** see *Blood.* **B. heat,** 98.6° F. on the thermometric scale. **B., inflam'matory,** see *Hæmitis.* **B. isl'ands,** collections of small red spots in the vascular area in early embryonic life, afterward developing into blood-vessels. **B. liq'uor,** liquor sanguinis. **B., loss of,** hemorrhage. **B., men'strual,** see *Menses.* **B. mur'murs,** see *Murmurs.* **B. par'ticles,** blood-corpuscles. **B. pict'ures,** picture or small pattern network speedily formed by human blood under the microscope, distinguishable from that formed by other animals, which takes place more slowly with larger pattern. **B. pig'ments,** see *Pigments.* **B. plaques,** small circular disks in blood, concerned in development of red corpuscles; see *Blood.* **B. plas'ma,** see *Plasma* and *Blood.* **B. plates,** see *Blood* and *Hæmatoblasts.* **B. plates** or **plaques of Bizzozero,** see *Blood-globules.* **B. pois'oning,** presumed condition of the blood, in which its constitution is modified by reception into it of substances that render it noxious or unfit for healthy nutrition, as in pyæmia, septicæmia, etc. **B. pres'sure,** force exercised by the blood against the walls of the blood-vessels. This is modified, of course, by the condition of the heart, the elasticity of the vessels, etc. The causes of alteration in the blood-pressure may be tabulated as follows (Brunton):

May be raised—	May be lowered—
1. By the heart beating more quickly.	1. By the heart beating more slowly.
2. By the heart beating more vigorously and more completely, and sending more blood into the aorta at each beat.	2. By the heart beating less vigorously and completely, and sending less blood into the aorta at each beat.
3. By contraction of the arterioles, retaining the blood in the arterial system.	3. By dilatation of the arterioles, allowing the blood to flow more quickly into the veins.
	4. By deficient supply of blood to the left ventricle, as from contraction of the pulmonary vessels, or obstruction to the passage of blood through them, or from stagnation of blood in the large veins—*e. g.* in shock.

The following estimates have been made from direct experiments as to the nature of the blood-pressure:

(*a*) *In the arteries* (Vierordt).

	Mercury.	Column of blood.
In the newborn	= 111 mm.	= 1443 mm.
In 3-year-old	= 138 "	= 1794 "
In 14-year-old	= 171 "	= 2223 "
In adult	= 200 "	= 2600 "

Albert estimated the blood-pressure in the anterior tibial artery (peripheral part), before amputations, to be 100–160 mm. mercury; upon rising up, an increase of 10–20 mm. mercury. The application of Esmarch's bandage to one leg increases the pressure 15 mm. Alexander Eckert ascertained with the use of Bosch's sphygmomanometer the blood-pressure in the superficial temporal artery (on an average) to be:

	Mm. mercury.
2–3 years	97
3–4 years	98
4–5 years	99.5
5 years	104
6 years	108
7 years	111
8 years	111.5
9–12 years	115
Adults (females 20–30 years)	174

In the radial artery:

	Mm. mercury.
Healthy men	145–180 (v. Basch).
" persons in general	135–160 (").
" persons in general	100–130 (70–150 Zadek), Christeller.
Women	140–150 (Zadek).
Boy 4½ years of age	44 (").
" 10 " "	56 (").
" 16½ " "	100 (").

(*b*) *In the capillaries* (Kries).

The blood-pressure in the capillaries is about equal to ½ to ⅓ of arterial pressure.

(*c*) *In the veins.*

About $\frac{1}{20}$ of the pressure of the corresponding artery. In the large veins near the heart the pressure in general is negative during inspiration, positive during expiration. **B., red,** see *Blood.* **B., r., sys'tem of,** see *Vascular.* **B. root,** Sanguinaria Canadensis. **B., se'rum of,** see *Blood.* **B. sounds,** see *Murmur, arterial.* **B., spit'ting of,** hæmoptysis. **B. stains,** when spots are supposed to consist of blood, microscope, spectrum analysis, and chemical tests assist in determining the fact, and if so, whether they be of human blood. **B. stone,** hæmatites. **B. stroke,** loss of sensation and motion resulting from cerebral hemorrhage or congestion of vessels of brain; hemorrhage in areolar tissue of face, lungs, skin, etc. **B., sweat'ing of,** hæmatidrosis. **B. tab'lets,** B. plates. **B. tubes,** see *Arteries* and *Veins.* **B. tu'mor,** swelling, with effusion of blood; hæmatoma. **B., ve'nous,** see *Blood.* **B. ves'icle,** blood-globule. **B. ves'sel,** vessel destined to contain and convey blood. **B., vom'iting of,** hæmatemesis. **B. weed,** Asclepias curassavica. **B., white,** lymph. **B. wort,** Hieracium venosum, Sanguinaria Canadensis.

Blood'ing. Bloodletting; flooding.

Blood'less meth'od or **opera'tion.** Operation, as amputation, in which Esmarch's elastic bandage and tourniquet are employed and bleeding is prevented.

Bloodlessness, blud'les-nes. Anæmia.

Bloodletter, blud'let-tur. Bleeder.

Bloodletting, blud'let-ting. *Blooding, Bleeding, Letting blood;* discharge of a certain quantity of blood produced by art; opening a vessel to draw blood from it. Practised on an artery, it is called *arteriotomy;* on a vein, *phlebotomy* (venæsectio, venesection, breathing a vein); on capillary vessels, *local or capillary bleeding,* in contradistinction to the former, or *general bloodletting.* Bleeding is used during existence of disease, as in inflammation and in way of prophylaxis, (1) to diminish the actual mass of blood, and, in such case, fluids ought not to be allowed too freely afterward; (2) to diminish turgescence in any organ; *revulsive bloodletting* or bleeding, venæsectio revulsoria, when performed far from the part affected, and *derivative bloodletting* when near; (3) to diminish the corpuscles of blood, *spoliative phlebotomy.* The immediate effects of bloodletting are diminution of mass of blood and of heat, retardation of pulse, sometimes syncope.

Bloodletting from a vein, *phlebotomy,* is practised on subcutaneous veins of neck, face, forearm, and leg, sometimes of the hand or foot; the necessary apparatus consists of bandage or ribbon, compress, and lancet or fleam. The veins selected for operation are—1. In the fold of the arm, cephalic, basilic, two median, and anterior cubital. 2. In the hand, cephalic and salvatella. 3. In the foot, great and little saphena. 4. In the neck, external jugular. 5. In the forehead, frontal. 6. In the mouth, ranine. Phlebotomy in the limb is performed by tying a circular bandage round it, to render subcutaneous veins turgid by blood being obstructed, bandage not being so tight, however, as to compress the arteries. Puncture is made into the vein, and the desired quantity allowed to flow; the ligature is now removed and a compress and retaining bandage are applied.

Capillary or local bloodletting, *arterio-phlebotomy,* is practised on the skin or mucous membranes by means of leeches, lancet, or cupping. **B., top'ical,** B., local.

Blood'like. Sanguine.

Bloodshot. Hyperæmic, as of the eye.

Blood'y. *Sanguineous.* Having character of blood; relating to blood. **B. flux,** dysentery. **B. sweat,** hæmidrosis; ephidrosis cruenta.

Bloom, hon'ey. Apocynum androsæmifolium.

Bloom'ing spurge. Euphorbia corollata.

Blos'som. See *Grog-blossom.*

Blota alba, blo'tah al'bah. Bleta.

Blotch. Pustule; discolored eruption. **B., milk,** crusta lactea.

Blow'ball. Leontodon taraxacum.

Blow'ing sound. Bellows sound. **B. s., diffused,** see *Murmur, respiratory.*

Blown. Out of breath; stained with ova, as of fly.

Blow'pipe. Straight or bent tube with an opening at the end for heating substances.

Blue bells. Gentiana Catesbæi. **B., Ber'lin,** material used for injecting the vascular system in pathological investigations, of which potassium ferrocyanide, sodium sulphate, and iron chloride are the main components. **B. berry,** Caulophyllum thalictroïdes, Lantana. **B. blind'ness,** see *Blindness.* **B. bonnets,** Centaurea cyanus. **B. bottle,** Centaurea cyanus, Cyanus segetum. **B. disease,** cyanosis. **B. flag,** Iris versicolor. **B., gen'tian,** Gentiana Catesbæi. **B. gum,** blue line along the gums, indicating lead-poisoning. **B. gum tree,** Eucalyptus globulus. **B. line,** B. gum. **B., low,** Vaccinium Pennsylvanicum. **B. mass pill,** mass of mercurial pill; see *Pilulæ hydrargyri.* **B. meth'ylene,** see *Methylene.* **B. oint'ment,** mercurial ointment. **B. pill,** mercurial pill; see *Pilulæ hydrargyri.* **B. pyoktanin,** see *Pyoktanin.* **B. stone,** copper sulphate. **B. ver'vain,** Verbena hastata. **B. vi'olet,** Viola pedata. **B. vit'riol,** copper sulphate.

Blues. Hypochondriasis.

Bluet. Centaurea cyanus.

Blumea balsamif'era. Plant of Asia, source of Ngai camphor, by distillation. **B. la'cera,** species from E. Indies, having odor of turpentine; used in dyspepsia.

Blunt hook. See *Hook.*

Blush. See *Flush.* **B., cuta'neous,** see *Effervescence.* **B., inflam'matory,** erythema.

Blushwort. Erythræa.

Boa, bo'ah. Eruption of red, ichorous pimples; see *Hidroa* and *Sudamina.* **B. u'pas,** upas. **B. vis'ta fever,** yellow fever.

Boæ, bo'e. Syphilis.

Boat-belly. Condition in which marked retraction of the abdomen is present, due to emaciation.

Boat-shaped abdo'men. Boat-belly.

Bob's root. Psoralia melilotoides.

Boch'dalek, gan'glion of. Small thickening formed by branch of anterior dental nerve uniting with branch of posterior nasal nerve from Meckel's ganglion.

Bochetum, bo-ke'tum. Decoction of several sudorific woods.

Bochium (bo'ke-um) or **Bo'cium.** Bronchocele.

Bocho, bo'ko. Diosma crenata.

Bodo sal'tans. Variety of flagellata sometimes met with on unhealthy ulcers. **B. urina'rius,** species found in albuminous urine of those suffering from cholera.

Body, bod'e. Human body as a collection of organs; the trunk; body of a bone, as of the femur, sphenoid, etc., to designate shaft or middle portion of those bones; body of the uterus, main part of that organ; corpse; distinct portion of matter perceived by the senses; the rectum. **B., ad'enoid,** prostate gland; melanotic tumor. **B., adre'nal,** suprarenal capsules. **B. of Aran'tius,** see *Corpora Arantii.* **B., ax'ile,** axile corpuscles. **B., bigem'inal,** corpora quadrigemina. **B., cav'ernous,** corpus cavernosum. **B., cen'tral,** nucleus. **B., cil'iary,** see *Ciliary.* **B., coming down of,** proctocele or prolapse of rectum. **B., den'tate,** corpus dentatum. **B., fim'briate,** corpus fimbriatum. **B., ganglion'ic,** see *Nerve-cells.* **B., genic'ulate,** see *Corpus geniculatum.* **B. of High'more,** corpus Highmorianum. **B., hy'aloid,** corpus vitreum. **B. louse,** pediculus vestimenti. **B., Mal-**

pig'hian, Malpighian corpuscle. **B., Meiss'ner's,** tactile corpuscle. **B., mu'riform,** mass of vitelline globes from segmentation of vitellus. **B. of O'ken,** mesonephros. **B., ol'ivary,** corpus olivare. **B., Pacchio'nian,** granular bodies on surface of dura mater in course of longitudinal sinus. **B., Pacin'ian,** see *Pacinian corpuscles.* **B., perine'al,** see *Perineum.* **B., pin'eal,** pineal gland. **B., pitu'itary,** see *Pituitary.* **B., postpyram'idal,** posterior pyramid. **B., prepyram'idal,** anterior pyramid. **B., pyram'idal,** corpus pyramidale. **B., quadrigem'inal,** see *Corpora quadrigemina.* **B., rest'iform,** corpus restiforme. **B., rhom'boid,** fourth ventricle. **B. of Ro'senmüller,** parovarium; epoöphoron. **B., spon'gy,** corpus spongiosum. **B., stri'ated,** corpus striatum. **B., suprare'nal,** suprarenal capsule. **B., thy'roid,** thyroid gland. **B., touch,** tactile corpuscle. **B., trap'ezoid,** trapezium-shaped portion of pons Varolii. **B., vit'reous,** corpus vitreum. **B., Wolff'ian,** corpus Wolffianum, mesonephros. **B., yel'low,** corpus luteum.

Body-reading. See *Muscle-reading.*

Body-searcher, bod'e-surch-ur. *Searcher.* One who formerly examined bodies to report as to cause of death.

Body-snatcher, bod'e-snatch-ur. Resurrectionist.

Boe, bo'e. Cry.

Bœhme'ria cauda'ta. Brazilian plant; sudorific; used also for hemorrhoids.

Boelli, bo-el'le. Intestines.

Boerhaavia diandra, bur-hav'e-ah de-an'drah. Plant of South America; root is emeto-cathartic. **B. diffu'sa** grows in W. Indies; root is purgative. **B. hirsu'ta,** same habitat; leaves are employed in diseases of liver. **B. procum'bens,** plant of India; antipyretic, cathartic, anthelmintic. **B. scan'dens,** root of this shrub of W. Indies is used in gonorrhœa. **B. tubero'sa** grows in Peru; antisyphilitic.

Boethema, bo-e-the'mah (aid). Medicament.

Bœttcher, cells of. Cells arranged in single layer on membrana basilaris of cochlea. **B.'s test,** test for sugar; consists of adding equal parts of urine and of liquor potassæ, then adding small quantity of subnitrate of bismuth, and boiling for some time. If sugar is present, the bismuth becomes black or gray.

Bœttger. See *Bœttcher.*

Bog'bean. Menyanthes trifoliata.

Bogota' bark. Form of Carthagena or non-officinal cinchona bark.

Bog-rush. Eleocharis palustris.

Bo'hon u'pas. Antiaris upas.

Boil. Furunculus. **B., Alep'po,** see *Bouton.* **B., blind,** see *Furunculus.* **B., bulama,** see *Bulama.* **B., Del'hi,** see *Bouton.* **B., gum,** alveolar abscess; parulis. **B., malig'nant,** see *Furunculus.* **B., trop'ical,** B., Aleppo. **B., wasp's-nest,** see *Furunculus.*

Boi'na. Cow-pox.

Bo'la. Myrrh.

Bolbomelanoma (bol-bo-mel-an-o'mah) or **Bolbomelanosis,** bol-bo-mel-an-o'sis (*bolbos,* bulb). Melanosis of eyeball. Latter word also denotes formation of such melanotic tumor.

Bol'chon. Bdellium.

Boldine, bol'deen. Alkaloid from boldo; used in diseases of the bladder and liver and in gall-stones.

Bol'do. Leaves of Boldoa fragrans or Peumus boldus; stimulant and antiseptic.

Boldoa aromatica, bol-do'ah ar-o-mat'ik-ah. Tree of Chili; leaves and bark in baths are given in rheumatic arthritis. **B. fra'grans,** B. aromatica.

Boldo-glucine, bol'do-glu'seen. Glucoside derived from Boldoa fragrans; possesses hypnotic properties.

Boldus, bol'dus. Boldo.

Bole (*bolos,* clod of earth). Argillaceous earth; used as absorbent and alexipharmic. Various boles were stamped or sealed, hence called *terræ sigillatæ* or sealed earths. **B. Arme'nian,** red, clayey earth from Armenia and other countries of Europe, once esteemed tonic and astringent; it consists of argil mixed with lime and iron. **B., white,** is native aluminium, silicate, or argil, with trace of iron; similar properties.

Boletic (bol-et'ik) **ac'id.** Acid existing in Boletus agaricus.

Boletus agaricus, bol-e'tus ag-ar'ik-us (*bolos,* lump or mass). B. laricis. **B. al'bus,** B. laricis. **B. cervi'nus,** Elaphomyces granulatus. **B. chirurgo'rum,** B. igniarius. **B. disco'deus,** Dædalea suaveolens. **B. edu'lis,** edible species, of agreeable taste and smell. **B. esculen'tus,** edible mushroom, found in woods in Europe, much admired by gastronomes; formerly esteemed aphrodisiac. **B. fomenta'rius,** Polyporus fomentarius. **B. ful'vus,** B. igniarius. **B. hippocrepis,** B. igniarius. **B. ignia'rius,** *Agaric, Spunk, Amadou, Punk, Agaric of the oak, Touchwood, Touchwood boletus, Female agaric, Tinder;* formerly much used by surgeons as a styptic. **B. lar'icis,** *White agaric,* cathartic and emetic, and used also in sweats of phthisis. *Agaricin,* the active principle, is given for this purpose in doses of gr. $\frac{1}{20}$ to $\frac{1}{10}$. Externally, B. laricis is styptic. **B. obtu'sus,** B. igniarius. **B. officina'lis,** B. laricis. **B. pur'gans,** B. laricis. **B. sal'icis,** Dædalea suaveolens. **B. suave'olens,** Dædalea suaveolens. **B. touch'wood,** Boletus igniarius.

Bolismos, bol-iz'mos (*bolos,* mass). Boulimia.

Bolites, bol-e'tez (*bolos,* mass). Mushroom; perhaps Agaricus aurantiacus.

Bo'los. Eruption of teeth.

Bolt. To swallow without chewing, as to "*bolt* one's food."

Bo'lus (*bolos,* lump or mass). Bole; pharmaceutical preparation having pilular shape, but larger, although capable of being swallowed as a pill. **B. al'ba,** argil; commonly made into small cakes or flat masses, and stamped or sealed with certain impressions and called *terræ sigillatæ;* used like Bole Armenian, and brought from Etruria; see *Bole.* **B., aliment'ary,** mass formed by food after mastication and insalivation in the mouth, and collected upon the tongue prior to deglutition. **B. Arme'na,** bole Armenian. **B., hyster'ical,** see *Hysteria.* **B. orienta'lis,** bolar earth from Constantinople; also bole Armenian. **B. ru'bra,** bole Armenian.

Bomarea salsilla, bom-ar'e-ah sal-sil'lah (after naturalist Valmont de Bomare). Used as sudorific in Chili, and in infusion in cutaneous diseases.

Bombax, bom'baks. Cotton; see *Gossypium.* **B. Malabar'icum,** tree of East Indies, various portions of which are emetic, astringent, laxative, diuretic, and antiphlogistic. **B. septena'tum,** tree of W. Indies and S. America; seeds are demulcent, leaves are an article of diet, and root-bark is emetic.

Bom'bus (humming of bees). Ringing or buzzing in the ears. Borborygmus, or flatulent rumbling in the bowels.

Bombyx, bom'biks. Vermiform process. **B. mo'ri,** see *Sericum.*

Bona, bo'nah. Phaseolus vulgaris. **B. fe'ver,** see *Fever, bona.*

Bonannia officinalis, bon-an'ne-ah of-fis-in-al'is. Sinapis alba.

Bond'ea. Erythrophlœum.

Bon'duc. Cæsalpina bonducella; bonduc or bonducella seeds are tonic and antiperiodic, and in large doses emetic.

Bonducin, bon'du-sin. Bitter resinous principle from oily fruit of Guilandina bonducella; used in intermittent fever.

Bondue, bon'du. Gymnocladus Canadensis.

Bone. Bones are solid and hard parts, forming the basis of the bodies of animals of the superior classes, union of which constitutes the skeleton. The human body has, at adult age, 240 bones, including 32 teeth and ossa Wormiana, and excluding sesamoid bones. Anatomists divide them, from their shape, into—1. *Long bones,* forming part of the limbs and representing columns for supporting weight of body, or levers of different kinds for muscles to act upon. 2. *Flat bones,* forming parietes of splanchnic cavities. 3. *Short bones,* in parts of body where solidity and some mobility are necessary. Bones are formed of two different textures, spongy—substantia spongiosa—and compact—substantia compacta. They afford, on anal-

ysis, much phosphate and carbonate of lime, little phosphate of magnesium, phosphate of ammonium, oxide of iron and manganese, some traces of alumina and silica, gelatin, fat, and water. Lehman's analysis of the chemical characters of bone is as follows:

Gelatin and blood-vessels	33 per cent.
Phosphate of calcium	57 "
Carbonate of calcium	8 "
Fluoride of calcium	1 "
Phosphate of magnesium	1 "
	100 per cent.

The uses of the bones are usually mentioned under each bone. They give shape to the body, contain and defend the viscera, and act as levers to muscles.

TABLE OF THE BONES.

BONES OF THE HEAD.	*Bones of the Cranium or Skull.*	Frontal	1
		Parietal	2
		Occipital	1
		Temporal	2

B., acetab'ular, small bone in acetabulum of some of the vertebrata. **B., adna'sal**, premaxillary bone of some animals. **B., ador'bital**, lacrymal b., malar b. of some animals. **B., alisphe'noid**, bony cartilage in some animals, corresponding to greater wing of sphenoid in man; bone forming front of auditory capsule. **B., an'gular**, bone aiding to form part of inferior maxillary bone. **B., an'kle**, astragalus. **B., apohy'al**, bone in lower animals corresponding with lesser cornu of hyoid bone in man; epihyal bone. **B., artic'ular**, delicate lamella of articular end of bone, beneath articular cartilage; one of bones of lower jaw or mandible in some animals. **B., back**, vertebral column. **B., bar**, pubic bone. **B., basibranch'ial**, basihyal bone of fishes; row of minute bones from which four branchial arches proceed. **B., basidig'ital**, metatarsal and metacarpal bones are so called. **B., basihy'al**, bone in other animals corresponding to body of human hyoid bone; basibranchial b. **B., bas'ilar**, sphenoid and occipital bones considered as a single bone; basioccipital bone, last lumbar vertebra, and sacrum have all received this name; basisphenoid bone of birds. **B., basioccip'ital**, basilar part of occipital bone in fœtal life. **B., basisphe'noid**, part of sphenoid bone from which back part of body of that bone and sella turcica are developed; in lower animals, bone between basioccipital and presphenoid bones. **B., blade**, scapula. **B., boatlike**, scaphoid. **B., breast**, sternum. **B., calf**, fibula. **B. canals'**, canals, nutritive; diploic. **B., can'non**, middle metatarsal bone of some animals. **B., car'pal**, carpus. **B., cheek**, malar bone. **B., col'lar**, clavicle. **B., cor'acoid**, bone representing, in some animals, coracoid process in man. **B., coro'nal**, frontal bone. **B., cot'yloid**, acetabular bone. **B., cox'al**, coccyx; ilium. **B., crib'riform**, ethmoid bone. **B., crup'per**, coccyx. **B., cu'boid**, see *Cuboid.* **B., cu'neiform**, see *Cuneiform.* **B., epihy'al**, see *Epihyal.* **B., epio'tic**, cartilage in lower animals corresponding to inferior portion of mastoid process in man. **B., eth'moid**, see *Ethmoid.* **B., ex'ercise**, bony formation developed in left arm of soldiers by musket exercise. **B., exoccip'ital**, lateral occipital bone of some animals, but in man part of occipital bone of fœtus, constituting lateral part of foramen magnum and condyle. **B., exter'nal cu'neiform**, see *Cuneiform.* **B., face**, malar bone. **B., fore'head**, frontal bone. **B., front'al**, see *Frontal.* **B., fronto-na'sal**, nasal bone. **B., haunch**, ilium; innominate bone. **B. of the heart**, see *Heart, bone of.* **B., heel**, calcaneum. **B., hip**, innominate bone. **B., hook**, unciform bone. **B., huc'kle**, coccyx, astragalus. **B., hy'oid** or **hyp'siloid**, see *Hyoid.* **B., il'iac**, ilium. **B. of in'cus**, interparietal bone. **B., innom'inate**, see *Innominate.* **B., intermax'illary**, bone in fœtus behind anterior portion of superior maxillary bone, afterward united to it; in lower animals corresponds to incisive portion of upper jaw. **B., interpari'etal**, see *Interparietal.* **B., ju'gular**, malar bone; lacrymal bone. **B., knuc'kle**, coccyx. **B., lac'rymal**, see *Lacrymal.* **B., lentic'ular**, orbicular bone. **B., lig'ament**, sesamoid bone. **B., lin'gual**, hyoid bone. **B., low'er jaw** or **low'er max'illary**, inferior maxillary bone. **B., lu'nar**, semilunar bone. **B., ma'lar**, see *Malar.* **B., mand'ible** or **mandib'ular**, inferior maxillary bone. **B., mas'toid**, see *Mastoid.* **B., max'illary**, usually upper jaw-bone. **B., metatar'sal**, see *Metatarsal.* **B., mid'jaw**, B., intermaxillary. **B., na'sal**, see *Nasal.* **B., navic'ular**, see *Navicular* and *Scaphoid.* **B., occip'ital**, see *Occipital.* **B., odon'toid**, odontoid process of axis vertebra when a separate bone. **B., olfact'ory**, ethmoid bone. **B., orbic'ular**, orbicular process of incus. **B., orbitosphe'noid**, lesser wing of sphenoid bone in lower animals. **B., pal'atal** or **pal'ate**, see *Palate bone.* **B., pari'etal**, see *Parietal.* **B., perone'al**, fibula. **B., petro'sal**, petrous part of temporal bone. **B., pis'iform**, see *Pisiform.* **B., plough'share**, vomer. **B., pro-o'tic**, bone in lower animals corresponding to parts of petrous and mastoid portions and of labyrinth in man. **B., pu'bic**, see *Pubes.* **B., pyram'idal**, see *Pyramidal.* **B., rider's**, cavalry bone. **B., rump-coc'cyx**, sacrum. **B., scaph'oid**, see *Scaphoid.* **B., seat**, ischium. **B., semilu'nar**, see *Semilunar.* **B., ses'amoid**, see *Sesamoid.* **B., share**, ilium; pubic bone. **B., shin**, tibia. **B., sling**, astragalus. **B., sphe'noid** or **sphenoid'al**, see *Sphenoid.* **B., splint'er**, fibula. **B., spoke**, radius. **B., spon'gy**, turbinated bone. **B., stir'rup**, stapes. **B., supermax'illary**, superior maxillary bone. **B., tail**, coccyx. **B., tar'sal**, see *Tarsus.* **B., temp'oral**, see *Temporal.* **B., thigh**, femur. **B., tongue**, hyoid bone. **B., trap'ezoid**, trapezoid bone. **B., trique'tra**, Wormian bones. **B., turb'inal**, inferior turbinated bone. **B., tympan'ic**, bony ring nearly encircling membrana tympani. **B., un'ciform**, see *Unciform.* **B., up'per jaw**, superior maxillary bone. **B., ver'tex**, parietal bone. **B., Worm'ian**, see *Wormian.* **B., wrist**,

metacarpal bone. **B., yoke** or **zygomat'ic,** malar bone.

Bone ash. Products of bones, usually of ox and sheep, burnt white, chiefly calcium phosphate and a little carbonate; used in pharmacy. **B. bind'er,** see *Osteocolla.* **B. black,** animal charcoal. **B. discs,** bone plates. **B. doctor,** bonesetter. **B. earth,** see *Calculi, urinary,* and *Cornu ustum.* **B. fe'ver,** dengue; see *Inflammation.* **B. nip'pers,** instrument for cutting off splinters, etc. **B. phos'phate,** see *Calcis phosphas* and *Cornu ustum.* **B. plates,** perforated plates of ox-bone used in the operation of intestinal anastomosis to produce communication between the two segments of intestine. **B. set'ter,** one who pays special attention to treatment of fractures; generally applied to irregular or uneducated practitioners, supposed to have special aptness in this direction. **B. spav'in,** bony growth in hock of horse.

Bone'ache or **Bone a'gue.** See *Osteocopus.*

Bones of Ber'tin. Sphenoidal cornua. **B., brit'tleness of,** fragilitas ossium. **B., friabil'ity of,** fragilitas ossium. **B., salt of,** ammonii carbonas. **B., soft'ening of,** mollities ossium.

Bone'set. Eupatorium perfoliatum. **B., rough,** Eupatorium teucrifolium. **B., up'land,** Eupatorium sessilifolium.

Boneshave. Femoro-popliteal neuralgia.

Bonifacia, bon-e-fas'e-ah. Ruscus hypoglossum.

Bonnaya brachiata, bon-na'yah brak-e-at'ah. Plant of E. Indies, used in chronic cutaneous affections. **B. grandiflo'ra,** has similar properties in skin diseases and diseases of the liver. **B. integrifo'lia,** of E. Indies, used in gonorrhœa, epilepsy, and diseases of the eyes.

Bon'net. Reticulum. **B., cap'sule of,** capsule of Tenon. **B. pep'per,** Capsicum tetragonum.

Bonnyclabber, bon'ne-klab-ur. Sour buttermilk; thick part of sour milk.

Bonplandia angustura, bon-plan'de-ah an-gus-tu'rah (after French naturalist Bonpland). Cusparia febrifuga. **B. trifolia'ta,** Cusparia febrifuga.

Bontia (bon-she-ah) **daphnoï'des** (after Jacob Bontius, Dutch physician). Grows in W. Indies; flowers and berries in decoction are emollient; berries are also tænicide. **B. ger'minans,** Avicennia tomentosa.

Bonus genius, bo'nus je'ne-us. Peucedanum. **B. Henri'cus,** Chenopodium bonus Henricus.

Bo'ny. Osseous.

Boo'cho or **Boo'ko.** Diosma crenata.

Boo'mah nuts. Fruit of Pycnocoma macrophylla.

Bo'on u'pas. Upas.

Boo'na. Phascolus vulgaris.

Boot, Junod's. See *Junod.*

Bootia vulgaris, boot'e-ah vul-gar'is. Saponaria.

Bootikin, boot'ik-in. Glove with partition for the thumb, but no separate spaces for fingers; made of oiled silk and used in gout.

Boracic acid, bor-as'ik as'id. Boric acid.

Bo'rage. Borago officinalis.

Borago (bor-ah'go) **officina'lis.** Borage, burrage. Leaves and flowers are emollient, aperient, diuretic, and demulcent.

Bo'ras na'tricus. Sodium borate. **B. so'dicus,** sodium borate. **B. superso'dicus,** borax.

Bo'rate. Salt of boric acid.

Borated, bo'ra-ted. Containing borax or boric acid.

Borathron, bo'rath-ron. Juniperus sabina.

Bo'rax. Sodii boras, Ph. U. S. Subborate, biborate, or subprotoborate of sodium or of soda, borate of sodium or of soda. Inodorous salt, cool somewhat alkaline taste; soluble in twelve parts of water. Borax is used as a lotion in aphthæ and other oral affections, and in affections of mucous membranes. **B. hon'ey,** mel boracis.

Borbonia ruscifolia, bor-bon'e-ah rus-se-fo'le-ah (after Gaston de Bourbon, son of Henry IV. of France). S. African shrub, used in asthma and hydrothorax, and in decoction as a diuretic.

Borborus, bor'bor-us. Fecal matter.

Borborygmus, bor-bor-ig'mus (*borboruzo,* to make a dull noise). Noise made by flatus in the intestines.

Bor'derland cases. Cases of mental disorder or eccentricity approaching the grade of positive insanity, but not definitely regarded as insane.

Bore'tree. Sambucus.

Boric (bo'rik) or **Boracic acid,** bo-ras'ik as'id. H_3BO_3. Acidum boricum (Ph. U. S.). White crystalline soluble substance, made by action of chlorohydric acid on sodium borate. Antiseptic, used externally in diseases of the skin and in collyria, gargles, etc. Recently a compound has been prepared of borax, boric acid, and water, from which crystals are formed, which is antiseptic and used in surgery as preferable to boric acid.

Borium, bo're-um. Boron.

Borkhausenia cava, bork-how-sen'e-ah kav'ah (after Borkhausen, German botanist). Fumaria bulbosa.

Born. Brought forth from the womb. It has been decided by English judges that 'to be born alive,' means, that acts of life must have been manifested after the whole body has been extruded, and that respiration *in transitu* is not evidence that a child was born alive; hence respiration may be a sign of life, but not of live birth.

Borneo camphor, bor'ne-o kam'for. Borneol; solid substance obtained from Dryobalanops aromatica.

Bor'neol. Borneo camphor.

Boroci'trate of caf'fein. Used hypodermatically, being very soluble and non-irritating and antiseptic.

Borofuchsin, bo-ro-fu'sin. Stain for bacilli tuberculosis, being a solution in alcohol of fuchsin and boric acid, equal parts.

Boroglyceride, bo-ro-glis'er-ide. Combination of glycerin with boric acid, having antiseptic properties; employed especially in affections of the eye; borate of glyceryl.

Bo'ron. Simple substance, obtained by treating potassium with boracic acid; dark, olive-colored powder, devoid of taste and smell; heated in air or in oxygen, it is converted into boric acid.

Borosalicylic acid, bo-ro-sal-is-il'ik as'id. Result of addition of solution of boric acid to alcoholic solution of salicylic acid. White powder, antiseptic. *Borosalicylate of sodium* is the chief salt of this acid.

Borrago, bor-ra'go. Borago officinalis.

Borras. Black vomit.

Bo'rum. Boron.

Borve'ria emet'ica. Brazilian plant; root emetic.

Boschesjesmansthee. Methystophyllum glaucum.

Bosom, boo'zum. Breast; mamma.

Boss. Prominence, as of bone.

Bossa, bos'sah. Plague token.

Bosselated, bos'sel-a-ted. Having bosses or prominences.

Bos'ton i'ris. Iris Virginica.

Boswellia (boz-wel'le-ah, after Dr. John Boswell, of Edinburgh) **Carte'rii,** African tree, source of olibanum. **B. floribun'da,** see *Juniperus lycia.* **B. Frerea'na,** African tree, yielding elemi. **B. papyrif'era,** see *Juniperus lycia.* **B. serra'ta,** see *Juniperus lycia.* **B. thurif'era,** see *Juniperus lycia.*

Bot (*botus,* intestinal worm). Thread-worm, Oxyuris vermicularis. Also larva of fly of genus Œstrus, carried into the human stomach and hatched there.

Botal', canal' or **duct of.** Ductus arteriosus. **B. fora'men,** *F. of Galen* or *of Botal,* opening in fœtal heart between the two auricles, through which blood passes from one to the other; named after Leonard Botallus, Botal, or Botalli, who wrote in 1562. It was spoken of, however, by Vesalius, and even by Galen. **B., lig'ament of,** vestige of ductus arteriosus.

Botan'. Pæonia moutan.

Botane, bot'an-e. Herb.

Botan'ical doc'tor. Herb-doctor.

Bot'any Bay gum. Xanthorrhœa resin. **B. B. ki'no,** Australian kino. **B., medical,** knowledge of properties, characters, etc., of vegetables used in medicine.

Botch. Swelling of the skin; phlegmon.

Bothriocephalus (both-re-o-sef'al-us) or **B. la'tus** (*bothrion,* small pit, *kephale, head*). Broad tapeworm, genus Tæniadeæ; common in Switzerland, Russia, and some parts of France. It inhabits the intestines of

man, and extends to enormous length, sometimes 60 yards or more. Other varieties inhabit the intestines, as *Bothriocephalus cordatus*, only about a foot long; *B. cristatus* and *B. liguloides*, ribbon-like worm; *B. tropicus*, variety found in those resident in Guinea. See *Parasites* and *Worms*.

Bothrion (both're-on) or **Both'rium.** Alveolus, or small fossa; small deep ulcer on the cornea.

Both'rus. Fovea; pit; depression.

Botium, bo'she-um. Bronchocele; vicarious menstruation.

Bo'tou. Pareira brava.

Bo-tree. Ficus religiosa.

Botrioceph'alus, bot-re-o-sef'al-us. Bothriocephalus.

Botrophis serpentaria, bot'ro-fis ser-pen-tah're-ah. Actæa racemosa.

Botrychium, bot-rik'e-um (*botrus*, cluster of grapes). Moonwort, once used as vulnerary; root is astringent.

Botryoid, bot're-oid (*botrus*, bunch of grapes). Like a bunch of grapes, as in syphilitic gummata of the liver.

Botryomyces, bot-re-om'is-ees (*botrus*, bunch of grapes, *mukes*, fungus). Micrococcus of horses, *M. botryogenus*, giving rise to small multiple fibromatous tumors in the lungs, subcutaneous tissue, and within muscular structures. The condition is called *Botryomyco'sis*.

Botryophy'ma (*botrus*, *phuma*, growth). Vascular fungous growth on the skin.

Botryopsis (bot-re-op'sis) **platyphyl'la.** Chondodendron tomentosum.

Botryosteophyte, bot-re-os'te-o-fite (*botrus*, cluster of grapes, *osteon*, bone, *phuton*, growth). Bony growth—osteophyte—having appearance of a bunch of grapes.

Botrys, bot'ris (*botrus*, grape, cluster of grapes). Chenopodium botrys; see *Vitis vinifera*. **B. ambrosioï'des,** Chenopodium ambrosioides. **B. America'na,** Chenopodium ambrosioides. **B. anthelmin'tica,** Chenopodium anthelminticum. **B. Mexica'na,** Chenopodium ambrosioides.

Botrytis Bassiana, bot-rit'is bas-se-an'ah. Parasitic funguous formation, causing silkworm disease or muscardine.

Bots. Disease of cattle, horses, and sheep, attended with colic, spasms, etc.

Böttcher's test. See *Bœttcher*.

Bot'tle nose. Gutta rosea.

Bottry-tree, bot'tre-tre. Sambucus.

Botts. Bots.

Botuliform, bot'u-le-form (*botulus*, sausage). Having form of sausage.

Botulinic acid, bot-u-lin'ik as'id. Acid detected in sausage poisoning; see *Botulism*.

Botulism, bot'u-lizm. Sausage or meat poisoning; form of ptomaïne poisoning caused by introduction into the system of such products of decomposition.

Bou. In composition; see *Bu*.

Boubon, boo'bon (groin). Bubo.

Boucen'na. Albizzia anthelmintica.

Bouchard's nodosities, boo'shar's no-dos'it-ees. Knotty or hardened finger-joints, associated by Bouchard with gastric dilatation.

Boucnemia (book-na'me-ah) or **Bucne'mia.** Elephantiasis Arabum.

Bouda, boo'dah. Disease of dissolute Abyssinian women, characterized by severe cataleptic paroxysms.

Boudin's law. That malarial poison and tuberculosis are antagonistic.

Bouffe, boof. Eructation.

Bougie, boo-zhe' (F., candle). Flexible cylinder, variable in size, to be introduced into the urethra, œsophagus, rectum, etc., to dilate these canals when contracted. Bougies are composed of solid and insoluble substances, as plaster, wax, steel, German silver, elastic gum, gutta-percha, catgut, etc. They act, of course, only mechanically. Soluble bougies have been employed in gonorrhœa, gleet, etc. **B., armed,** B. having some caustic attached to its extremity; caustic or corrosive bougie. **B. à boule** (F.), bulbous bougie for ascertaining if a stricture exists in the urethra. **B., bul'bous,** bougie à boule. **B., caus'tic,** B., armed. **B., fil'iform,** delicate, almost thread-like bougie. **B., med'icated,** has an addition of some escharotic or other substance to destroy the obstacle, as in the caustic bougie, which has a small portion of lunar caustic or common caustic inserted in its extremity. **B., u'terine,** uterine sound.

Bouhon. Name given to malarial disease like dengue in the Sandwich Islands.

Bouillaud's (boo'yo's) **disease.** Endocarditis, history of which was exhaustively given by Bouillaud of Hôpital la Charité, Paris.

Bouillon, boo'yon (F., *bouillir*, to boil). Broth; liquid food, made by boiling flesh of animals in water. Osmazome, gelatin, and soluble salts dissolve; fat melts, and albumin coagulates. It is nourishing, owing to the gelatin and ozmazome. It is used as a nutritive material in culture of bacteria, etc.

Boulesis, boo-la'sis (*boulomai*, to will). Will; voluntas.

Boulimia (boo-lim'e-ah) or **Bulim'ia** (*bous*, ox, or *bou*, augmentative particle, *limos*, hunger). Almost insatiable hunger; canine appetite, sometimes seen in hysteria and pregnancy.

Bouncing (bown'sing) **bet.** Saponaria.

Boun'dou. Ordeal poison; akasga.

Bouquet, boo-kay'. Flavor of old wine. **B. fe'ver,** dengue.

Bourane. Arrow-poison from Erythrophlœum Guineense.

Bourdonnement (F.). Buzzing sound; murmur caused by fibrillar muscular contraction, heard on auscultation of any region.

Bourtree, bore'tree. Sambucus nigra.

Bousse'na. Musenna.

Bouton, boo-ton (F.). Bud; used vaguely for papule, vesicle, and pustule. **B. d'Alep,** *Aleppo evil*, *A. Pustule* and *Ulcer*, *A. Button*. Cutaneous affection in the Levant, to which children are liable; characterized by tubercles on the face or limbs, which soften and become covered with a scar. Ulcerations formed are long in healing, and, generally, leave a scar. It is usually left to itself; but is said to be benefited by crucial incisions into the tubercle prior to period of softening. The disease appears to be anthracoid in its character. *Biskra button* appears to have numerous analogies with bouton d'Alep.

Boutonnière, boo-ton-ne-air' ([F.] buttonhole). Long incision made into the urethra to extract calculus from the canal when too large to be discharged. Also a small incision in the peritoneum or above the pubis, to penetrate the bladder in retention of urine.

Bouvardia angustifolia, boo-var'de-ah an-gus-te-fo'le-ah. Used in Mexico in rabies. **B. hirtel'la, B. Jacqui'ni,** and **B. triphyl'la** are credited with similar properties.

Bovachevo. Datura sanguinea.

Bovillæ, bo-vil'le. Rubeola.

Bovina fames, bo-ve'nah fam'es (*bovinus*, pertaining to oxen, *fames*, hunger). Boulimia.

Bo'vine vi'rus. Vaccine matter from cow or calf.

Bovista, bo-vis'tah. Lycoperdon.

Bow, bo. Bending, as of the legs outward, *bow-leg*.

Bowdich'ia or **Bowditch'ia.** S. American plant, source of Alcornoque bark; latter is astringent and emetic.

Bow'el. Intestine. **B. complaint',** looseness of the bowels, especially in young children in the warm season. **B., low'er,** rectum.

Bow'els, con'stipated. See *Constipation*. **B., loose'ness of,** see *Diarrhœa*.

Bow'knee. Genu valgum.

Bowleg, bo'leg. See *Cnemoscoliosis* and *Bow*.

Bow'man's cap'sule. See *Kidney*. **B.'s disks,** see *Sarcous elements*. **B.'s glands,** long follicles, either flask-shaped or with projections and twistings of their blind extremities, more clearly seen on the periosteum of the nasal septum of lower animals. **B.'s mem'brane,** layer of connective tissue below corneal portion of conjunctiva. **B.'s opera'tion,** operation for thick opacity after cataract, in which two shouldered

or stop needles are introduced at opposite sides of the cornea, one fixing the membrane, the other effecting laceration. **B.'s probe**, probe for examination and dilatation of minute canals and nasal duct. **B.'s root**, Euphorbia corollata, Gillenia trifoliata, Leptandria purpurea..

Boxberry, boks'ber-re. Gaultheria. **B., moun'tain**, Arbutus uva ursi. **B. tree**, Buxus, Cornus florida. **B. wood**, Cornus florida.

Boyer's bur'sa or **cyst.** Bursa between hyoid bone and thyro-hyoid membrane; called also sub-hyoid cyst.

Boyle's fu'ming liq'uor. Ammonium sulphide in solution.

Boze'man's su'ture. Suture used in operation for vesico-vaginal fistula; a metal or button suture, oval and perforated for passage of silver wires.

Brabylon, brab'il-on. Prunum Damascenum.

Bracheriolum (brak-er-e'ol-um) or **Bracherium**, brak-a're-um. Truss.

Brachia (arms) **copulativa**, brak'e-ah kop-u-lat-e'vah. See *Peduncles of cerebellum.* **B. of op'tic lobes**, see *Brachium anterius* and *B. posterius.* **B. pon'tis**, see *Peduncles of cerebellum.*

Brachiæus, brak-e-e'us. Brachial. **B. intern'us**, Brachialis anterior.

Brachial, brak'e-al (*brachium*, arm). Belonging to the arm. **B. aponeuro'sis**, aponeurosis formed particularly by expansions of tendons of latissimus dorsi, pectoralis major, and deltoid muscles, completely enveloping the muscles of the arm. **B. arch**, arch of brachial fascia at posterior border of axilla. **B. ar'tery**, humeral artery, extends from axilla to bend of elbow, where it divides into cubital or ulnar and radial arteries. It passes along the internal edge of the biceps, behind the median nerve, and between accompanying veins. **B. fas'cia**, fascia of the arm. **B. glands**, lymphatic glands in vicinity of elbow-joint. **B. lig'ament**, ligament from greater tuberosity of humerus to point of insertion of coraco-brachialis muscle. **B. mus'cle, ante'rior**, situate at anterior and inferior part of arm, and below elbow-joint; arises, fleshy, from middle of the os humeri, and is inserted into coronoid process of the ulna; it bends the forearm. **B. plex'us**, nervous plexus, formed by interlacing of anterior branches of last four cervical pairs and first dorsal; deeply seated in hollow of the axilla, extending as far as the inferior and lateral part of the neck. It gives off thoracic, suprascapular and infrascapular, brachial (six in number), axillary, cutaneous, musculo-cutaneous, radial, cubital, and median nerves. **B. veins**, two in number, accompany the artery, frequently anastomosing with each other, and terminating in the axillary veins.

Brachiale, brak-e-al'e (bracelet). Carpus.

Brachialgia (brak-e-al'je-ah) or **Brachyal'gia** (*brachio, algos*, pain). Pain in the arm; neuralgia of the arm.

Brachialis, brak-e-al'lis. Brachial. **B. accesso'rius**, accessory muscle to B. anticus. **B. anti'cus**, brachial muscle. **B. exter'nus**, see *Triceps extensor cubiti.* **B. inter'nus**, brachial muscle. **B. posti'cus**, triceps brachii.

Brachierium (brak-e-a're-um) or **Brachile**, brak'-il-a. Truss.

Brachiluvium, brak-e-lu've-um (*brachio, luo*, to wash). Arm bath.

Brachinin, brak'in-in. Extract of Brachinus crepitans, the bombardier, used in rheumatism.

Brachio, brak'e-o. In composition, brachium or arm.

Brach'io-abdomina'lis. Occasional separate muscle, usually part of pectoralis major.

Brach'io-capsula'ris. Rare muscle, passing from shaft of humerus to capsular ligament of shoulder.

Brachio-cephal'ic. Relating to arm and head. **B.-c. ar'tery**, innominate artery. **B.-c. veins**, innominate veins.

Brachio-cubital, brak'e-o-ku'bit-al. Belonging to arm and forearm, as *Brachio-cubital ligament*, internal lateral ligament of elbow-joint, because attached to os brachii or humerus and to cubitus or ulna.

Brachio-cyllosis, brak'e-o-sil-lo'sis (*brachio, kullosis*, act of making crooked). Curvature of the arm inward, sometimes causing paralysis.

Brachio-fascialis, brak'e-o-fas-se-al'is. Slip from brachialis anticus muscle inserted into fascia of biceps.

Brachiometer, brak-e-om'et-ur. Instrument for measuring dimensions of the arm.

Brachion, brak'e-on. Brachium.

Brachioncus, brak-e-on'kus (*brachio, onkos*, swelling). Tumor or swelling of the arm.

Brachio-radial, brak'e-o-ra'de-al. Belonging to the humerus and radius; name applied to external lateral ligament of elbow-joint, because attached to the brachium or humerus and radius. The *brachio-radial fasciçle* is a small slip from the brachialis anticus inserted on the radius.

Brachio-radialis (brak'e-o-rad-e-al'is) **mus'cle.** Supinator radii longus; also third head of biceps muscle of arm.

Brachiorrheuma, brak-e-or-rhu'mah (*brachio, rheuma*, defluxion, rheumatism). Rheumatism of the arm.

Brachiostrophosis, brak'e-o-strof-o-sis (*brachio, strepho*, to twist). Injury of arm by twisting.

Brachiotomy, brak-e-ot'o-me (*brachio, tome*, incision). Amputation of the arm; dissection of the arm.

Brachirolum, brak-ir'o-lum. Truss.

Brachistocephalus, brak-is-to-sef'al-us (*brachus*, short, *kephale*, head). Having a short head.

Brachium (brak'e-um) or **Brachion**, brak'e-on. Arm from shoulder to wrist, or part between shoulder and elbow; see *Humerus.* **B. ante'rius**, rounded process passing from anterior pair of corpora quadrigemina (*nates*) obliquely outward into thalamus opticus. **B. cerebel'li**, restiform body; peduncle of cerebellum. **B. cer'ebri**, B. anterius, B. posterius. **B. copula'tivum**, superior peduncle of cerebellum. **B. for'nicis**, pillar of fornix. **B. mo'vens quar'tus**, latissimus dorsi. **B. of op'tic lobes**, B. anterius, B. posterius. **B. pon'tis**, middle peduncle of cerebellum. **B. poste'rius**, rounded process passing from posterior pair of corpora quadrigemina (*testes*) obliquely outward into optic thalamus.

Brachu'na. Nymphomania, satyriasis.

Brachy, brak'e (*brachus*, short). In composition, short.

Brachyauchen, brak'e-aw-ken (*brachy, auchen*, neck). Short neck, or one so constituted.

Brachycardia, brak-e-kar'de-ah. Bradycardia.

Brachycephalæ (brak-e-sef'al-e) (*brachy, kephale*, head) **gen'tes** (people). People with short heads. Nations whose cerebral lobes do not completely cover the cerebellum; having *brachycephalic skulls*, breadth being out of proper proportion to length. The condition is called *Brachycepha'lia* or *Brachyceph'alism.*

Brachycephalic, brak-e-sef-al'ik. Having short head.

Brachychelia, brak-e-ka'le-ah (*brachy, cheilos*, lip). Unusual shortness of lip or lips.

Brachychronic, brak-e-kron'ik (*brachy, chronos*, time). Continuing but a short time, acute.

Brachydactylous, brak-e-dak'til-us (*brachy, daktulos*, finger). Having short fingers or toes.

Brachyfacial, brak-e-fa'-she-al (*brachy, facies*, face). Having short face.

Brachyglossia, brak-e-glos'se-ah (*brachy, glossa*, tongue). Shortness of tongue.

Brachygnathus, brak-e-nath'us (*brachy, gnathos*, under jaw). Shortness of under jaw.

Brachymetropia, brak-e-met-ro'pe-ah (*brachy, metron*, measure, *ops*, eye). Myopia.

Brachyno'sis or **Brachynsis**, brak-in'sis (*brachuno*, to shorten). Unusual shortness; abbreviation.

Brachyotous, brak-e-o'tus (*brachy, ous*, ear). Having short ears.

Brachypneuma (brak-e-nu'mah) or **Brachypnœa**, brak-e-ne'ah (*brachy, pneuma*, breath). Shortness of breath; dyspnœa.

Brachypodous, brak-ip'o-dus (*brachy, pous*, foot). Having unusually short foot or feet.

Brachypoti, brak-ip'o-te (*brachy, potes*, drinker). They who drink little or who drink rarely.

Brachyrrhynchus, brak-ir-rhin'kus (*brachy*, *runchos*, snout). Shortness of nose. Such an animal is said to be *Brachyr'rhinous*.

Brachysmus, brak-iz'mus. Abbreviation, shortening.

Brachystocephalæ, brak-is-to-sef'al-e (*brachistos*, very short, *kephale*, head). Extremely short, broad skulls; having cephalic index of 86° or over.

Brachys'tomus (*brachy*, *stoma*, mouth). Having short mouth.

Bracing, bra'sing. Corroborant.

Bracken, brak'en. Ptaris aquilina. **B., rock**, Polypodium, P. incanum. **B. root**, Polypodium vulgare.

Bradæsthesia or **Bradyæsthesia**, brah-dees-tha'-ze-ah (*brady*, *aisthesis*, sensation). Impaired sensation.

Brady, brah'de (*bradus*, difficult, tardy). In composition, difficult, tardy.

Bradyarthria, brah-de-arth're-ah (*brady*, *arthron*, articulation). Slowness of articulation; bradylalia.

Bradybolismus, brah-de-bo-liz'mus (*brady*, *ballo*, to throw). Bradyspermatism.

Bradycardia, brah-de-car'de-ah (*brady*, *kardia*, heart). Slow action of the heart.

Bradycau'ma or **Bradycau'sis** (*brady*, *kauo*, to burn). Slow combustion.

Bradycaute'rium. Slow caustic action, as that of a moxa.

Bradycrote, brah'de-krote (*brady*, *kroteo*, to strike). Agent that diminishes number of pulsations of the heart, as veratrum viride.

Bradyëcoia, brah-de-ek-oi'ah (*brady*, *akoe*, hearing). Deafness; dulness of hearing.

Bradyfibrin, brah-de-fi'brin. See *Corium phlogisticum*.

Bradyglossia, brah-de-glos'se-ah (*brady*, *glossa*, tongue). Slowness of speech.

Bradylalia, brah-de-lal'e-ah (*brady*, *lalia*, speech). Slowness of expression of language.

Bradylogia, brah-de-loj'e-ah (*brady*, *logos*, discourse). Difficulty or slowness of speech; bradylalia.

Bradymasesis, brah-de-mas-a'sis (*brady*, *masesis*, mastication). Difficult or slow mastication. See *Dysmasesis*.

Bradyno'sos (*brady*, *nosos*, disease). Chronic disease.

Bradypepsia, brah-de-pep'se-ah (*brady*, *pepto*, to digest). Slow digestion; dyspepsia.

Bradyphasia, brah-de-fas'e-ah (*brady*, *phasis*, speech). Bradylogia.

Bradyphra'sia (*brady*, *phrasis*, speech). Labored speech.

Bradypnœa, brad-e-ne'ah (*brady*, *pneo*, to breathe). Slow or difficult breathing.

Bradyspermatism, brah-de-spurm'at-izm (*brady*, *sperma*, sperm). Slow emission of sperm.

Bradysuria (brah-de-su're-ah) or **Bradyu'ria** (*brady*, *ouron*, urine). Slow evacuation of urine; dysuria.

Bradytocia, brah-de-to'se-ah (*brady*, *tokos*, birth). Slow and difficult parturition.

Braid'ism. Animal magnetism; hypnotism.

Brain. Cerebrum. Encephalon. **B., abdom'inal**, solar plexus; see *Wrisberg*. **B., af'ter**, metencephalon. **B., chem'istry of**, see *Cerebrum*. **B., compres'sion of**, see *Compression*. **B., concus'sion of**, see *Concussion*. **B. fag**, see *Nervous diathesis*. **B. fe'ver**, fever, cerebral; phrenitis, meningitis. **B., fore**, prosencephalon. **B., great**, cerebrum. **B., hind**, epencephalon. **B., lit'tle**, cerebellum. **B., mid**, mesencephalon. **B. mur'mur**, systolic murmur heard in rickets in auscultation over the anterior fontanelle or in the temporal region. **B. pan**, cranium. **B., pet'rified**, see *Exostosis*. **B., railway**, neurosis peculiar to railroad employees, consisting of disturbance of sensations and perceptions, insomnia, anæsthesia, paresis, etc. **B. sand**, acervulus cerebri; gritty matter in pineal gland; see *Pineal gland*. **B., sclero'sis of**, see *Sclerosis*. **B., soft'ening of**, mollities cerebri. **B. stem**, cerebellum and transverse fibres of pons Varolii.

Brake, com'mon. Pteris aquilina. **B. rock**, Polypodium incanum, Polypodium vulgare. **B. root**, Polypodium vulgare.

Bram'ble, Amer'ican hair'y. See *Rubus fruticosus*. **B. ber'ries**, see *Rubus fruticosus*. **B., com'mon**, Rubus fruticosus.

Bran. Furfur; external layer of wheat, separated from flour by bolting. See *Bath*, *bran*.

Branca Germanica, bran'kah ger-man'ik-ah. Heracleum spondylium. **B. Leo'nis**, Alchemilla vulgaris. **B. lupi'na**, Leonurus cardiaca. **B. ur'si** or **ursi'na**, Acanthus mollis. **B. ve'ra**, Acanthus mollis.

Branch. Division of an artery or nerve; used synonymously with ramus. Often it signifies the great division, while ramus denotes a branch or division, and ramusculus a minute branch.

Branchi, bran'ke. Swelling of tonsils or parotid, or of thyroid gland.

Branchia (bran'ke-ah) or **Branchiæ**, brank'e-e. Gills of respiratory organs of fishes, consisting of mucous membrane to which blood is liberally supplied.

Branchial, bran'ke-al. Relating to branchia. **B. arch'es**, visceral arches; tissue separating contiguous branchial clefts. **B. clefts** or **fis'sures**, clefts from pharynx to outside in development of lower animal life than man. **B. cyst**, remnant of branchial arches. **B. fis'tula**, fistula between pharynx or larynx and exterior of neck.

Branchiostoma, bran-ke-os'to-mah (*branchia*, *stoma*, mouth). Opening of branchiæ or gills.

Branchus, bran'kus. Catarrhal affection of mucous membrane of fauces, trachea, etc.; hoarseness.

Branci, bran'se. Cynanche tonsillaris.

Brancia, bran'se-ah. Vitrum.

Brand's meth'od. Antipyretic treatment, as of typhoid fever, etc., by use of cold-water bath. See *Antipyretics* and *Bath*.

Brandy, bran'de. Spiritus vini Gallici (Ph. U. S. and Br.), spirit of French wine; first liquid product obtained by distilling wine; sp. gr. 0.925 to 0.941; composed of water, alcohol, and aromatic oily matter, which gives it its flavor. It ought to contain from 46 to 55 per cent. of alcohol by volume. Brandy is a powerful and diffusible stimulant; see *Spirit*. **B., ap'ple**, see *Pyrus malus*. **B. bot'tles**, see *Nymphæa lutea*. **B. egg**, see *Ovum*. **B. face**, acne rosacea. **B. nose**, acne rosacea.

Brankursine, brank-ur'seen. Acanthus mollis.

Branny tetter, bran'ne tet'ur, Pityriasis.

Brasdor's operation, braz'dor's op-ur-a'shun. Operation proposed by Brasdor, consisting in application of ligature on distal side of an aneurismal tumor.

Brasenia, bra-se'ne-ah. B. hydropeltis. **B. hydropel'tis**, *Frog-leaf*, *Little Water Lily*, *Water jelly*, *W. shield*, or *W. target*, *Deer food*. Indigenous plant, nat. ord. Ranunculaceæ, of Southern United States, covering surface of ponds, marshes, etc.; fresh leaves, mucilaginous, have been used in pulmonary complaints, dysentery, etc., like cetraria. **B. pelta'ta**, B. hydropeltis.

Brash. Transient attack of sickness. Disordered digestion, rash or eruption. **B., wa'ter**, pyrosis. **B., wean'ing**, severe form of diarrhœa, supervening at times on weaning.

Bras'ium. Malt.

Brasmos, braz'mos. Fermentation.

Brass-founder's ague, bras-fown'durz a'gue. See *Ague*. **B.-work'er's disease**, see *Ague*.

Brassica, bras'se-kah. Cabbage, ord. Cruciferæ. Vegetable more digestible when raw; when in a solid, globular mass, like a head, it is B. capitata. **B. al'ba**, Sinapis alba. **B. campes'tris**, wild navet; cultivated turnip. **B. cani'na**, Mercurialis perennis. **B. capita'ta**, brassica. **B. cu'mana**, brassica. **B. eru'ca**, garden rocket, Roman rocket, shinlock; considered by Romans aphrodisiac. **B. flor'ida**, cauliflower, more tender and digestible variety. Broccoli, Brassica sabellica, B. Italica, belongs to this variety. **B. his'pida**, B. eruca. **B. Ital'ica**, B. florida. **B. jun'cea**, Indian mustard. **B. mari'na**, Convolvulus soldanella. **B. na'pus**, rape; seed yields, on expression, oil which, at times, forms part of liniments. **B. ni'gra**, Sinapis nigra. **B. oblon'ga**, B. rapa. **B.**

olera'cea, brassica. **B. Pompeia'na,** B. florida. **B. ra'pa,** turnip; liable to same objection, but to less extent, as cabbage. **B. sabel'lica,** B. florida. **B. sati'va,** brassica. **B. sinapis'trum,** charlock; resembles black mustard.

Bra'thu. Juniperus sabina.

Braune's canal. Canal or open space made during labor by the vagina and cavity of uterus in unison during passage of the fœtus.

Braw'lins. Arbutus uva ursi, Vaccinium vitis idæa.

Brawn. Muscle.

Brawny induration, braw'ne in-du-ra'shun. Hardening of muscular and other tissues.

Braxy, braks'e. Fatal disease of sheep, especially anthrax or carbuncular fever.

Brayera anthelmintica, bray-a'rah anth-el-min'tik-ah (after Brayer, German physician). See *Hagenia Abyssinica* and *Koussein.*

Bray'erin. Resinous principle from brayera; kosin.

Brazil' nut. Nut of Bertholettia excelsa. **B. wood,** Cæsalpina echinata.

Bread, bred. See *Triticum.* **B. crumb,** mica panis. **B., glu'ten,** bread made of wheat dough deprived of chief portion of its starch by washing. Bread made of gluten only cannot be eaten, being too hard and tough; hence one-fifth of normal quantity of starch is allowed to remain. **B., In'dian,** Lycoperdon tuber. **B., mon'key,** Adansonia digitata. **B. paste,** medium for culture of bacteria, a paste of stale coarse bread. **B. root,** Camassia esculenta, Psoralea esculenta. **B., St. John's,** Ceratonia siliqua.

Breadberry, bred'ber-re. Pap.

Bread'fruit tree. Atocarpus.

Break'bone fe'ver. Dengue.

Breast, brest. Thorax, mamma. **B., ab'scess of, bro'ken,** or **gath'ered,** mastodynia apostemotosa. **B. bone,** sternum. **B. glass,** milk-glass. Glass applied to the nipple to receive milk when secreted copiously by the mamma. **B., hyster'ical,** tender and swollen condition of mammary gland in hysterical girls. **B., ir'ritable,** neuralgia of the breast; induration and tenderness of mammary gland. **B. pang** or **suf'focative,** angina pectoris. **B., pig'eon,** see *Lordosis.* **B. pump,** antlia lactea. **B. weed,** Saururus cernuus.

Breast'ings. Colostrum.

Breath, breth. Air expelled from the chest at each expiration; see *Respiration.* Offensive breath is usually dependent upon carious teeth or faulty state of the secretions of the air-passages or disordered stomach. **B. pulse,** audible pulsation given to the breath, as it issues from the mouth, by each beat of the heart; occasionally heard in dry tuberculous cavities with dense walls not separated from the heart by permeable lung-tissue. **B., sat'urnine,** see *Saturnine.* **B., short,** dyspnœa.

Breathing, abdom'inal. Form of breathing effected principally by the diaphragm. **B. air,** air of respiration; see *Respiration.* **B. capa'city,** amount of air that can be expelled from the lungs at forcible inspiration. **B., dif'ficulty of,** dyspnœa. **B. sus'pirous,** sighing; see *Suspirium.* **B. a vein,** see *Bloodletting.*

Brechma (brek'mah) or **Brechmus,** brek'mus. Bregma.

Breech. Nates. **B. presenta'tion,** appearance of breech of child as presenting part in parturition.

Breed. Race.

Breed'ing. Generation. Pregnant. **B., cross,** act of raising or breeding from different stocks or families. **B., in-and-in,** act of raising or breeding from same stock or family.

Breg'enin. Crystalline substance in brain-tissue.

Bregma, breg'mah (*brecho,* to moisten). Anterior fontanelle, or top of head, because believed to be humid in infants, and to correspond to most humid part of brain; point of union of sagittal and coronal sutures; anterior fontanelle.

Bregmatic, breg-mat'ic. Relating to bregma or anterior fontanelle. **B. bones,** parietal bones. **B. fon'tanelle,** anterior fontanelle.

Bregmato-anterior presentation, breg'ma-to-an-te'ri-or pres-en-ta'shun. Head of fœtus with anterior fontanelle toward the obturator foramen of the mother. When it is toward the acetabulum of the mother, it is called *bregmato-cotyloid presentation;* when toward the sacro-iliac articulation of the mother, *bregmato-posterior presentation.*

Bregmato-cotyloid, breg'ma-to-kot'el-oid. See *Bregmato-anterior.*

Bregmatodymia, breg-ma-to-dim'e-ah (*bregma, duo,* to enter into). See *Cephalodymia.*

Bregmato-lambdoid (breg'mat-o-lam'doid) **arc.** Arc measured on skull from bregma to point of junction of sagittal and lambdoid sutures.

Bregmato-posterior, breg'ma-to-pos-te'ri-or. See *Bregmato-anterior.*

Brephocacocolpia, bref-o-kak-o-kol'pe-ah (*brephos,* child, *kakos,* bad, *kolpos,* vulva). Gangrene of the vulva in young children.

Brephoctonon, bref-ok'ton-on (*brephos,* child, *kteino,* to kill). Coryza squarrosa.

Brephopityriasis, bref-o-pit-e-re'as-is (*brephos,* child). Pityriasis of young children.

Brephopolysarcia, bref-o-pol-e-sar'ke-ah (*brephos,* child, *poly,* much, *sarx,* flesh). Fleshiness of young children.

Brephos, bref'os. Infant; hence *Breph'icus,* relating to the infant or fœtus.

Brephotropheum, bref-o-tro-fe'um (*brephos,* newborn child, *trepho,* to nourish). Foundling hospital.

Brephulcus, bref-ul'kus (*brephos,* child, *helko,* to draw upon). Obstetric forceps.

Brephydrocephalus, bref-id-ro-sef'al-us. Hydrocephalus of infants.

Breschet's (bres'sha's) **bone'-canals'** (after French anatomist). See *Diploic.* **B.'s si'nus,** spheno-parietal sinus. **B.'s veins,** see *Diploic.*

Bres'lau test. Test to discover if the infant had breathed before death; the floating of the stomach and bowels in water, when in condition in which first taken from the body, showing that the child has been born alive.

Brevextensor, brev-eks-ten'sor. Extensor brevis muscle. **B. digito'rum,** extensor brevis digitorum.

Brevia vasa, brev'e-ah vas'ah (short vessels). Branches of splenic arteries and veins distributed to great cul-de-sac of stomach.

Breviceps, brev'e-seps (*brevis,* short, *caput,* head). Having short head, as a muscle.

Brevicollis, brev-e-kol'lis (*brevis, collum,* neck). Having a short neck.

Breviductor, brev-e-duk'tor. Abductor brevis muscle.

Breviflexor, brev-e-fleks'or. Flexor brevis muscle; short flexor, as of fingers, thumb, little finger, great toe. **B. hallu'cis,** flexor brevis pollicis pedis. **B. min'imi,** flexor brevis minimi digiti. **B. pol'licis,** flexor brevis pollicis.

Brevis cubiti, brev'is ku'bit-e. Anconeus. **B. ra'dii,** supinator brevis.

Brevissimus oculi, brev-is'sim-us ok'u-le. Obliquus inferior oculi.

Brevisupinator, brev-e-su'pin-a-tor. Supinator radii brevis muscle.

Brezilin, brez'il-in. Coloring matter contained in Brazil wood.

Brick'layer's itch. Eczema impetiginoides.

Brick-like sed'iment. See *Lateritious.*

Brick'maker's anæ'mia. Form of anchylostomiasis of those thus engaged, due to presence of anchylostomum duodenale.

Bridelia spinosa, brid-a'le-a spin-o'sa. Indian plant, bark of which is astringent and anthelmintic.

Bridge, ju'gal. Zygomatic arch. **B. of nose,** arch formed by junction of two nasal bones at middle and upper part of face.

Bri'dle. Band or membranous fold extending from one part to another, sometimes in such a way as to produce a stricture.

Brieger's bacillus, bre'ger's ba-sil'lus. Bacillus cavicida.

Bri'er, wild. Rosa canina.

Bright's disease of the kid'ney. Name applied to

several forms of disease of the kidney in which there is albumen in the urine. See *Kidney, Bright's disease of.*

Brim of pel'vis. Line of boundary of superior strait of pelvis.

Brim'stone. Sulphur. **B., flow'ers of,** sublimed sulphur.

Brin'ton root. Leptandria purpurea.

Brinviliers, bran-vil'le-a. Spigelia anthelmintica.

Briquet's ataxy, brik-a''s at'aks-y. Hysterical loss of sensibility in a limb.

Bristle (bris'l) **cells.** Ciliated cells at end of auditory nerve.

Brittle (brit'l) **gum.** Product of Acacia albida of Senegambia.

Brizoceras, briz-os'er-as. Ergot.

Broad. Body is so termed whose transverse extent is considerable compared with its length. **B. bones,** frontal, parietal, occipital, and iliac bones; they usually aid in forming parietes of splanchnic cavities. **B. lig'aments,** suspensory ligament of liver; ligaments of the uterus; see *Uterus* and *Parametritis.* **B. muscles,** these generally occupy parietes of cavities, especially those of the chest and abdomen.

Broad'nail. Onychogryphosis.

Bro'ca, an'gle of. Term applied to several angles of the skull, in craniometry. **B., convolu'tion of,** left inferior frontal convolution of brain. **B., vis'ual plane of,** plane of axes of orbits.

Broccoli, brok'kol-e. Brassica sabellica.

Brochos, bro'kos. Bandage.

Brochthus, brok'thus. Throat; œsophagus.

Brochus, bro'kus. One who has very prominent upper lip, or whose teeth project in front of the mouth.

Bro'die's disease. Doughy condition of knee-joint, obscuring points of bone.

Brodium, bro'de-um. Broth.

Broke'leak. Rumex hydrolapathum.

Bro'ken breast. See *Mastodynia apostematosa.* **B. cir'cuit,** see *Circuit.* **B. do'ses,** see *Doses.* **B. wind'ed,** asthmatic. **B. wind'edness,** asthma.

Broma, bro'mah (*broma,* food). Aliment.

Bro'ma (*bromos,* stench), Bromine.

Bro'mal. C_2HBr_3O. Oily liquid, chemical properties those of chloral; made by adding bromine to ether or absolute alcohol. **B. hy'drate,** $C_2H_3Br_3O_2$. Chemically analogous to chloral hydrate; white crystalline soluble substance, with odor like that of chloral, and pungent taste. Physiological effects resemble those of chloral hydrate, but bromal is more irritating, producing vomiting, diarrhœa, etc. Externally it causes erythema and deep-seated infiltration of areolar tissue.

Broma'lum. Bromal. **B. hydra'tum,** bromal hydrate.

Bromamide, brome'am-eed. A member of the anilide group, largely consisting of bromine; antineuralgic and antipyretic.

Bromammonium, brom-am-mo'ne-um. Ammonium bromide.

Bromamyl, brom-am'il. See *Amyl bromide.*

Bromated, bro'ma-ted. Having bromine as a constituent, as **B. camphor.** See *Camphor, bromized.*

Bromatoëccrisis, brom-at-o-ek'kris-is (*broma,* food, *ekkrisis,* excretion). Lientery; discharge of unassimilated food.

Bromatography (brom-at-og'raf-e) or **Bromog'raphy** (*broma,* food, *graphe,* description). Description of aliments. Bromatology.

Bromatology, brom-at-ol'o-je (*broma,* food, *logos,* discourse). Sitiology. Treatise on food; description of foods. Dietetics.

Bromcamphor, brome-kam'for. Camphora monobromata.

Brome'grass. Bromus ciliatus.

Bromelia ananas, bro-mel'e-ah an-an'as (after Bromel, botanist of Sweden). *Ananas, Pine-apple, Soursop;* West India tree producing most delicious fruit. **B. pin'guin,** pinguin, broad-leaved wild ananas, etc.; West India plant affording pinguin fruit, which is refrigerant, and juice, when ripe, austere. Used to acidulate punch. Intoxicating wine is made from pinguin. The berries are used for scurvy and for worms.

Brometh'yl. Ethyl bromide.

Brometum ferrosum, brom-a'tum fer-ro'sum. Ferrous bromide. **B. kal'icum,** potassium bromide. **B. quin'icum,** quinine hydrobromate.

Bromhidrosis, brome-hid-ro'sis. Bromidrosis.

Bromhy'dras. Hydrobromide, as B. morphicus, B. quinicus, etc., morphia hydrobromide, quinine hydrobromide, etc.

Bromhydrate, brome-hi'drate. Hydrobromate.

Bromhy'dric. Hydrobromic. **B. a'cid,** hydrobromic acid. **B. e'ther,** hydrobromic ether.

Bromic, bro'mik. Containing bromine. **B. ac'id,** hydrobromic acid.

Bromide of ammonium, bro'mide of am-mo'ne-um. Ammonii bromidum. **B. of cal'cium,** calcii bromidum. **B. of cam'phor,** camphor, bromide of. **B. of eth'yl,** see *Ethyl.* **B. of gold,** see *Gold.* **B. of i'ron,** ferri bromidum. **B. of lith'ium,** lithii bromidum. **B. of mer'cury,** hydrargyri bromidum. **B. of mor'phia,** morphia, bromide of. **B. of potas'sium,** potassii bromidum. **B. of rhubid'ium-ammo'nium,** see *Rhubidium.* **B. of so'dium,** sodii bromidum. **B. of stron'tium,** see *Strontium.* **B. of strych'nia,** strychnia, bromide of. **B. of zinc,** see *Zinc.*

Bro'mides. Several of these compounds have therapeutic value (see *Ferri bromidum, Potassii b., Lithii b., Calcii b.,* etc.), exercising remarkable influence in allaying nervous irritation.

Bromidrosiphobia, bro-mid-ro-se-fo'be-ah (*bromos,* fœtor, *hidros,* sweat, *phobos,* fear). Fear of, or illusion as to, unpleasant odors from surface of body.

Bromidrosis, brom-id-ro'sis (*bromos,* stench, *hidros,* sweat). Fetid sweat; at times general, *B. universalis;* at others partial, *B. localis.*

Bromine, bro'meen. Brominium. Simple body, s. g. 2.99, *Bromum* (Ph. U. S. and Br.), very volatile; of highly offensive and suffocating odor, whence its name (*bromos,* stench); met with chiefly in sea-water, and in many animal and vegetable bodies living therein; also in many mineral waters. In chemical relations it may be placed between chlorine and iodine. With oxygen it forms bromic acid; with hydrogen, hydrobromic acid. Bromine may be dissolved in forty parts of distilled water, and six drops be commenced with as a dose. Internally, in its combination, it is alterative; also used externally, especially in hospital gangrene, either alone or dissolved in water, as antiseptic and caustic. **B., chlo'ride of,** has been prescribed internally, as well as externally, in cancer and malignant tumors; chiefly in caustic paste, either alone or with other chlorides, as of zinc, antimony, and gold.

Brominium, bro-min'e-um. Bromine.

Bromism, bro'mizm. General cachectic condition induced by bromine, affecting the system toxically, attended with drowsiness, general weakness, and eruptions on the skin.

Bromium, bro'me-um. Bromine.

Bro'mized. Affected with symptoms of full or excessive doses of bromides.

Bromoform, bro'mo-form. $CHBr_3$. Liquid substance produced by distilling mixture of calcium bromide and alcohol; analogue of chloroform. As an anæsthetic similar to chloroform in its odor, taste, and effects; also hypnotic. Used in whooping cough, and externally analgesic and antiseptic, in ozæna, ulcers of the larynx, etc. In large doses it is narcotic.

Bromography, bro-mog'ra-fe. Bromatography.

Bromohyperidrosis, brom-o-hip-ur-id-ro'sis (*bromos,* smell, *hyper,* excess, *hidrosis,* perspiration). Condition in which there is increase in amount and offensive odor of sweat.

Bromo-iodism, bro'mo-i'od-izm. General cachectic condition or poisoning induced by large doses of bromine and iodine.

Bro'mol. White crystallized substance derived from precipitating weak solution of phenol with bromine-water. Antiseptic in solution, powder, or

ointment. Internally it has been used in cholera infantum and typhoid fever.

Bromomenorrhœa, brom-o-men-or-rhe'ah (*bromos,* fetid, *menes,* menses, *rheo,* to flow). Excessive and fetid discharge of menstrual blood.

Bro'mous. Fetid.

Bro'mum. Bromine.

Bromurated (bro'mu-ra-ted) or **Bromuretted,** bro'-mu-ret-ted. Containing bromine or bromide.

Bromuretum, bro-mu-re'tum. Bromide or bromuret. **B. ammo'nicum,** ammonium bromide. **B. camphora'tum,** monobromated camphor. **B. ethyl'icum,** ethyl bromide. **B. ferro'sum,** ferrous bromide. **B. potas'sicum,** potassium bromide. **B. so'dicum,** sodium bromide. **B. zin'cicum,** zinc bromide.

Bro'mus. Cereal, supposed to be oats. **B. cathar'-ticus,** species growing in Peru and Chili; rhizome is cathartic. **B. cilia'tus,** bromegrass. Indigenous; order Gramineæ; emetic, anthelmintic, cathartic, diuretic. **B. gla'ber,** Triticum repens. **B. imperia'lis,** B. purgans. **B. mol'lis,** *Soft bromegrass.* Seeds cause giddiness in man and are fatal to poultry. **B. pur'gans,** B. ciliatus. **B. temulen'tus,** Lolium temulentum.

Bronchadenes, bronk-ad'en-ees (*bronchia, aden,* gland). Bronchial glands.

Bronchadenitis, bronk-ad-en-e'tis. Inflammation of bronchial glands.

Broncharctia, bronk-ark'te-ah (*bronchia, arcto,* to contract). Bronchiostenosis.

Bronchectasia, bronk-ek-tah'ze-ah. Bronchectasis.

Bronchectasis, bronk-ek'tas-is (*bronchia, ektasis,* dilatation). Dilatation of bronchia.

Bronchelchosis, bronk-el-ko'sis (*bronchia, helkosis,* ulceration. Ulceration of bronchi.

Bronchemphraxis, bronk-em-fraks'is (*bronchia, emphraxis,* obstruction). Obstruction of bronchi.

Bronchi (bron'ke), **Bronchia** (bron'ke-ah) (pl. of **Bronchion**), **Bron'chiæ.** Two tubes, with their ramifications, arising from bifurcation of the trachea, carrying air into the lungs. For measurements of bronchia, see *Trachea.* The Latins used the term *Bronchus* for the whole trachea; its ramifications, *Bronchia.* Term also applied to spongy bodies of ethmoid bone. **B., dilata'tion of,** the most common situations for dilated bronchia are the scapular, mammary, and lateral regions, of one side usually at a time.

Bronchiadenoscirrhus, bronk-e-ad-en-o-skir'rus (*bronchia, aden,* gland, *skirrhos*). Scirrhus of bronchial glands.

Bronchiæ, bron'ke-e. See *Bronchi.*

Bronchial, bron'ke-al. Relating to bronchia. **B. ar'teries,** generally two in number, one going to each lung, arising from thoracic aorta, and accompanying the bronchia in all their ramifications. **B. asth'ma,** asthma with bronchial symptoms. **B. breath'ing,** see *Murmur.* **B. cells,** see *Cellules, bronchic,* and *Pulmo.* **B. cough** generally accompanies bronchial respiration, and indicates obstruction to entrance of air into air-cells. **B. glands,** glands of Vesalius; numerous glands of ovoid shape, of reddish hue in infant, and subsequently brown and black, seated in course of the bronchia. They may be presumed to be affected by scrofulosis when, in addition to existence of tumors in the neck, percussion gives dull sound under upper and central part of the sternum, while there is no appreciable lesion of the lungs. **B. mus'cles,** unstriped muscles of bronchial tubes. **B. nerves,** nerves furnished from pneumogastric. **B. phthi'sis,** see *Phthisis, bronchial.* **B. plex'us,** pulmonary plexus. **B. respira'tion,** see *Murmur, respiratory.* **B. sep'tum,** spur or ridge projecting upward within the trachea at point of bifurcation. **B. sound,** sound of the air passing in and out the bronchia in respiration. **B. tubes,** see *Bronchi.* **B. veins** arise from last divisions of arteries of same name, and pass on right side, into vena azygos; on the left, into superior intercostal vein.

Bronchiarctia, bron-ke-ark'te-ah. Bronchiostenosis.

Bronchic, bron'kik. Bronchial.

Bronchiectasis, bron-ke-ek'tas-is (*bronchia, ektasis,* dilatation). Dilatation of bronchial tube or tubes.

Bronchiitis, bron-ke-e'tis. Bronchitis.

Bronchio (bron'ke-o) or **Broncho,** bron'ko (*bronchos,* throat, windpipe). In composition, bronchia or bronchus.

Bronchiocatarrhus, bron-ke-o-kat-ar'rhus. Bronchial catarrh.

Bronchiole, bron'ke-ol (dim. of **Bronchium** or **Bronchus**). Minute bronchial tube; termination of bronchiæ.

Bronchiolitis, bron-ke-o-le'tis. Inflammation of bronchioles. **B. exudati'va,** inflammation of bronchioles, accompanied with tough fibrinous or adhesive sputa.

Bronchiopneumonia, bron-ke-o-nu-mo'ne-ah. Bronchopneumonia.

Bronchiorrhœ'a. Bronchorrhœa.

Bronchiorrhonchus, bron-ke-or-rhonk'us (*bronchio, rhonchos,* snoring sound). Bronchial râle.

Bronchiospasmus, bron-ke-o-spaz'mus (*bronchio, spasmos,* spasm). Spasmodic contraction of bronchial tubes.

Bronchiostenosis, bron-ke-o-sten-o'sis (*bronchio, stenosis,* contraction). Contraction or narrowness of bronchi.

Bronchismus, bron-kis'mus. Spasmodic contraction of bronchia, sometimes due to spinal paralysis.

Bronchitic, bron-kit'ik. Relating to bronchitis.

Bronchitis (bron-ke'tis) or **Bronchiitis,** bron-ke-e'-tis. Pulmonary catarrh; inflammation of lining membrane of bronchial tubes, always more or less present in cases of pulmonary catarrh, accompanied by cough, mucous expectoration, dyspnœa, and more or less uneasiness in breathing. Acute form is accompanied with all the signs of internal inflammation, and requires antiphlogistics, followed by revulsives; the chronic form, *Winter cough, Chronic catarrh,* may be confounded with phthisis, from which it is distinguished mainly by absence of hectic fever and of physical signs characteristic of latter, as well as by nature of expectoration, which is generally mucous, at times muco-purulent. When expectoration is little or none, bronchitis is said to be dry—dry catarrh; when fetid, the disease is fetid bronchitis. Plastic bronchitis is characterized by formation of solid or tubular concretions of exudation-matter within the bronchial tubes; see *Polypus oronchialis.* When bronchitis affects the smaller tubes, it is termed capillary bronchitis, and is often fatal to children; vesicular bronchitis is sometimes called vesicular pneumonia of children. Also catarrh. **B., asthen'ic,** peripneumonia notha, capillary bronchitis. **B., cap'illary,** see *Bronchitis.* **B., carbona'ceous,** see *Miner's asthma.* **B., catar'rhal,** bronchitis with muco-purulent discharge. **B., chron'ic,** see *Bronchitis.* **B., convul'sive,** pertussis. **B., croup'-ous,** polypus bronchialis; B. in which fibrinous casts of bronchial tubes exist. **B., dry,** B. with little, if any, mucous discharge or secretion. **B., exu'dative,** polypus bronchialis. **B., fet'id,** see *Bronchitis.* **B., fi'brinous,** B. crouposa. **B., mechan'ical,** inflammation of lining membrane of air-tubes, induced by inhalation of irritating particles. **B., mem'branous,** polypus bronchialis. **B., plas'tic,** polypus brachialis, bronchitis. **B., pot'ter's,** consumption, potter's. **B., pseudomem'branous,** B., fibrinous; polypus bronchialis. **B., pu'trid,** B., fetid; see *Bronchitis.* **B., suf'focative,** B., capillary. **B., sum'mer,** fever, hay. **B., vesic'ular,** see *Bronchitis.*

Bronchius, bron'ke-us. Sterno-thyroïdeus.

Bronchlemmitis, bronk-lem-me'tis (*broncho, lemma,* sheath, *itis*). Cynanche trachealis, polypus bronchialis, croupous bronchitis.

Broncho, bron'ko, in composition, see *Bronchio.*

Broncho-ægophony, bron'ko-e-gof'on-e. Ægobronchophony.

Broncho-alveolitis, bron'ko-al-ve-o-le'tis. Catarrhal pneumonia.

Bron'cho-blennorrhœ'a. Purulent form of bronchitis.

Bronchocace, bron-kok'as-e (*broncho, kakos,* faulty). Peripneumonia notha. **B. infan'tilis,** capillary bronchitis.

Bronchocatarrhus, bron-ko-kat-ar'rhus. Catarrh.

Broncho-cavernous respiration, bron'ko-kav'er-nus res-pir-a'shun. Sound heard in tuberculosis of the lungs when a cavity is included in consolidated structure.

Bronchocele, bron'ko-seel (*broncho, kele,* tumor). Inaccurate name for the affection, variously called Derbyshire neck, swelled neck, wen, and goitre. This is not a rupture, but an enlargement of the thyroid gland, common at base of lofty mountains in every part of the world. Iodine will generally occasion its absorption when case has not been of such duration as to have ended in a cartilaginous condition. Several varieties of bronchocele have been described—follicular, fibrous, amyloid, vascular, etc. Cysts in the thyroid gland are globular, tense, fluctuating tumors, containing glairy fluid of the gland, or serous or sanguineous fluid, or old grumous blood, constituting *cystic bronchocele.* Hernia of the trachea. **B., exophthal'mic,** exophthalmic goitre.

Bronchocephalitis, bron-ko-sef-al-e'tis (*broncho, kephale,* head). Whooping cough.

Bronchohæmorrhagia, bron-ko-hem-or-rha'je-ah. Hemorrhage of bronchial tubes.

Broncholemmitis, bron-ko-lem-me'tis. Cynanche trachealis; polypus bronchialis; croupous bronchitis.

Broncholith, bron'ko-lith (*broncho, lithos,* stone). Concretion in bronchial tube or gland.

Bronchomycosis, bron-ko-mik-o'sis (*broncho, mukes,* fungus). Presence or development of micro-organisms—mould fungi—in the bronchial tubes.

Bron'cho-œsophage'us. Unstriped muscular fibres passing from bronchus to œsophagus.

Bronchoparalysis, bron-ko-par-al'is-is. Asthma.

Bronchop'athy (*broncho, pathos,* disease). Disease of the bronchial tubes.

Bronchoph'onism or **Bronchophony,** bron-kof'o-ne (*broncho, phone,* voice). Resonance. **B., pectoril'oquous,** pectoriloquy. **B., strong,** pectoriloquy.

Bronchophthisis, bron-ko-te'sis. Tuberculosis of the lungs, accompanied with ulceration of bronchial tubes.

Bronchoplastic, bron-ko-plas'tik (*broncho, plasso,* to form). Epithet given to operation for closing fistulæ in the trachea. The operation is called *Bron'choplasty.*

Bronchopleurisy, bron-ko-plu'ris-e. Bronchitis complicated with pleurisy.

Bronchopleuropneumonia, bron-ko-plu-ro-nu-mo'ne-ah. Bronchitis, pleurisy, and pneumonia associated in the same individual.

Bronchopneumonia (bron-ko-nu-mo'ne-ah) or **Bronchiopneumo'nia.** Catarrhal pneumonia; inflammation of the bronchia and lungs. **B. caseo'sa,** bronchopneumonia with cheesy exudation. **B. indurati'va,** the same disease, with thickening or deposit in the connective tissue. **B. syphilit'ica,** syphilitic inflammation of lungs and bronchia. **B. tuberculo'sa,** tubercular inflammation of lungs and bronchia.

Bronchopneumonitis, bron-ko-nu-mon-e'tis. Bronchopneumonia.

Bronchopul'monary. Relating to the bronchial tubes and lungs.

Bronchorrhæmia, bron-kor-re'me-ah (*broncho, haima,* blood). Bronchorrhagia.

Bronchorrhagia, bron-kor-rhaj'e-ah (*broncho, rhegnumi,* to break forth). Hemorrhage from or into the bronchial tubes.

Bronchorrhœa, bron-kor-rhe'ah (*broncho, rheo,* to flow). Pulmonary blennorrhagia. Increased secretion of mucus from air-passages, accompanied or not by inflammation; gleet, as it were, of the pulmonary mucous membrane. **B. acu'ta,** chronic bronchitis. **B., fet'id,** see *Breath.* **B. sero'sa,** B. attended with serous discharge; *pituitous catarrh.*

Bronchorrhoncus, bron-kor-rhon'kus. Bronchial râle.

Bronchostasis, bron-kos'tas-is (*broncho, stasis,* stagnation). Bronchitis.

Bronchostenia (bron-ko-sten'e-ah) or **Bronchostenosis** (*broncho, stenos,* narrow). Contraction or narrowness of bronchial tubes.

Bronchotome, bron'ko-tome (*broncho, tome,* incision). Lancet with blunt and rounded point, mounted on a handle and fitted to the canula, which passes in along with it, and is allowed to remain in the opening made in the trachea in bronchotomy or tracheotomy. Knife for opening bronchial tubes in post-mortem examination.

Bronchotomy, bron-kot'o-me (same etymon). Operation of opening the trachea (*Tracheotomy*), larynx (*Laryngotomy*), both (*Tracheolaryngotomy*), to extract foreign bodies or permit passage of air to the lungs.

Bronchovesicular respiration, bron-ko-ves-ik'u-lar res-pir-a'shun. See *Respiration.*

Bronchus, bron'kus. See *Bronchia, Pharynx, Trachea.*

Bronzed (bronzd) **skin.** Addison's disease; see *Capsule, renal.* **B. s. disease,** see *Capsule, renal.*

Brood-cells. Cells having other cells contained within them.

Brook'lime. Veronica beccabunga.

Broom. Sophora tinctoria, Spartium scoparium. **B., but'cher's,** ruscus. **B. clo'ver,** Sophora tinctoria. **B. corn,** Sorghum vulgare. **B., in'digo,** Sophora tinctoria. **B. pine,** Pinus australis. **B. rape of Virgin'ia,** Orobanche Virginiana. **B., Span'ish,** Spartium junceum. **B., yellow,** Sophora tinctoria.

Brosimum alicastrum, bro'sim-um al-ik-as'trum. Bread-nut tree from Jamaica. **B. galactoden'dron,** cow-tree, indigenous in S. America.

Bro'sis. Eating.

Broth. Weak decoction of meat, to which condiments may be added. Stronger decoction, with various modifications, constitutes soup. **B., chick'en,** see *Chicken.* **B., egg,** see *Ovum.* **B., mut'ton,** see *Mutton.* **B., veal,** see *Veal tea.*

Brother, uterine, bruth'ur u'ter-in. Product of a twin conception. See *Uterine.*

Brousnika. Vaccinium vitis idæa.

Broussaist, broos'sa-ist. Believer in physiological and pathological opinions of Broussais. System was called *Broussaism,* or the *Physiological Doctrine,* in which excitability of gastro-intestinal mucous membrane was given much prominence.

Broussonetia tinctoria, bru-son-et'e-ah tink-to're-ah. Species of moraceous trees of W. Indies and S. America, fruit of which is used in bronchitis.

Brow. Ridge over orbit; front; acetabulum. **B. ache** or **pang,** facial or supraorbital neuralgia, hemicrania; when of malarial origin, it is called *brow ague.* **B. presenta'tion,** position of fœtus in which the brow presents. **B. shin'gles,** see *Herpes.*

Brown mix'ture. Mistura glycyrrhizæ composita.

Brown'ea coccin'ea. Tree of Venezuela, decoction of leaves of which is used in hemorrhoids.

Brown'ian, or **Browno'nian,** or **Bruno'nian.** Relating to system or opinions of Dr. John Brown, who attributed all morbid conditions to disordered excitability. **B. mo'tion** or **move'ments,** see *Motion.*

Brown'ism, or **Bru'nonism,** or **Bruno'nianism.** Doctrines of Dr. John Brown. See *Brownian.*

Brown'ist, Browno'nian, or **Bruno'nian.** Follower of system of Brown. See *Brownian.*

Brown-Se'quard's disease or **paral'ysis.** Hemiparaplegia, with hemianæsthesia of the opposite side. **B.-S.'s elix'ir,** preparation made from testicular juice, presumed to have invigorating powers in restoring the enfeebled vital powers.

Brucea antidysenterica (bru'se-ah an-te-dis-en-ter'ik-ah) or **ferrugin'ea** (after Bruce, Abyssinian traveller). Systematic name of plant whence was obtained false angustura or false cusparia bark.

Bruch, ag'gregate glands or fol'licles of. Trachoma glands of Henle. Lymph-follicles in conjunctiva, similar in morphology to glands of Peyer. **B., mem'brane of,** innermost layer of choroid coat of the eye.

Brucia (bru'se-ah) or **Brucine,** bru'seen. $C_{23}H_{26}N_2O_4$. Organic, salifiable alkaloid in false angustura (Brucea antidysenterica), and obtained from strychnos; pearly white; crystallizes in oblique prisms with parallelogrammatic base; very bitter, slightly acrid, and styptic; somewhat soluble in water, but more so in

alcohol. Brucia is a less active poison than strychnia; may be used as substitute for it and for extract of nux vomica. Dose, half a grain. It is also a local anæsthetic.

Brücke, muscle of. Ciliary muscle.

Bruf'falo. Follicular lumps or tumors of hard palate of new-born children in Egypt.

Bruise. Contusion.

Bruise'root. Stylophorum diphyllum.

Bruise'wort. Bellis saponaria.

Bruit, bru-e (F., noise). Sound heard on percussion or auscultation. Some of the chief *bruits* are the following, which, although French in nomenclature, have been accepted in lieu of any English equivalents: **B., aneuris'mal,** thrill heard upon listening over an aneurismal tumor. **B. de clapotement** (F.), splashing sound heard over organ or cavity containing gas or liquid. **B. de claquement** (F., clacking sound), produced by bringing valves together, as auriculo-ventricular valves, during contraction of ventricles. **B. du cœur** (F.), sound of beating of heart. **B. du cœur fœtal** (F., sound of the fœtal heart), pulsations of the fœtal heart heard in auscultation in latter half of utero-gestation. **B. de cuir neuf** (F., sound of new leather) or **B. de craquement** (F., sound of crackling), sound produced by friction of pericardium when dried and roughened by inflammation. **B. de diable** (F., sound of the *diable* or humming-top), venous hum. High degree of bruit de soufflet, heard on auscultating the arteries or veins—probably the latter—of the neck in chlorosis; denoting impoverished state of blood. **B. de frottement** (sound of friction), sound produced by rubbing of lung against parietes of chest during inspiration and expiration; distinctly heard in pleuritis, when pleura has become roughened. *Friction sounds, Rubbing sounds, To-and-fro sounds* are also heard in pericarditis and peritonitis; may be produced in the situation of any of the organs contained in the abdominal cavity, or of morbid growth developed there, independent of acute inflammation. **B. de frou-frou** (F.), sound like rustling of silk. **B. métallique,** metallic sound. **B. de mouche** (F., fly-sound), sound analogous to *bruit de diable,* from buzzing heard on auscultating the neck in chlorotic cases. **B. de moulin** (F., water-wheel sound), friction sound heard in some cardiac affections, mixed with gurgling and splashing. **B. musculaire** (F., muscular sound), sound accompanying first sound of heart; called also *Bruit rotatoire,* being thought to resemble rumbling of distant wheels. **B. placentaire** (F., placental bellows sound), heard on auscultation over placenta in pregnancy. **B. de pot félé** (F., sound of cracked vessel), *Cracked-pot sound,* sound heard on percussion when cavern in lungs is filled with air and has a narrow outlet. **B. respiratoire** (F.), murmur, respiratory. **B. rotatoire** (F.), see *Bruit musculaire.* **B. de scie** (F.), sawing sound. **B. de souffle** (F.), bruit de soufflet; B. de diable. **B. de souffle placentaire** or **utérin,** bruit placentaire. **B. de soufflet** (F., bellows sound, blowing sound), sound like that of bellows, heard occasionally by ear applied to the chest during contraction of the ventricles, auricles, or large arteries. It coexists with affections of the heart, but is heard also without disease of that organ—whenever, indeed, an artery is compressed. *Encephalic bellows sound* is heard on applying the ear to the occiput or to the top of the head, and indicates turgescence of vessels or inflammation. When such turgescence exists the vessels are compressed, and compression gives rise to the sound in question. See *Bellows sound.* **B. de taffetas** (F.), respiratory sound like that caused by tearing of piece of taffeta, indicating hepatization of lung, limited to the surface in pneumonia. **B. tympanique** (tympanic sound), clear sound afforded by percussing the stomach and intestines when containing air. **B. u'térin,** B. placentaire. **B. vésiculaire,** murmur, respiratory.

Brunella vulgaris, bru-nel'lah vul-gah'ris. Self-heal, heal-all; indigenous; bitter tonic.

Brunfelsia (brun-fel'se-ah) (after O. Brunfels, botanist of Metz) **unifio'ra.** Scrophulariaceous plant of Brazil, emeto-cathartic and emmenagogue.

Brun'ner's or **Brunn's glands.** *Solitary glands* or *follicles, Second pancreas.* Compound muciparous follicles, seated between mucous and muscular coats of the stomach, along the two curvatures of that organ, and in the duodenum; discovery generally attributed to Brunn or Brunner, although he restricted the term solitary glands to glands of the duodenum.

Brunonian, bru-no'ne-an. Brownian.

Brunonianism, bru-no'ne-an-izm. Brownism.

Brus'cus. Ruscus.

Brush, elec'tric, metallic electrode for localized electrization, as in neuralgia. **B., stom'ach,** brush to be passed down the œsophagus into the stomach as a stimulant and to remove mucus. See *Excutia ventriculi.*

Brush-burn. Contused wound produced by violent friction.

Bruta, bru'tah. Juniperus sabina.

Brutia, bru'she-ah. Thick pitch from Brutia, in Italy, from which was obtained *Oleum picinum.* Also instinct.

Bruxanel'li. Malabar tree, bark and leaves of which are astringent, diuretic, and anthelmintic.

Brycetus (bris'e-tus) or **Brychetos** (*brucho,* to grind the teeth). Cold, algid, as cold stage of fever.

Brychethmus (brik-eth'mus) or **Bryg'mos.** Grinding the teeth; brygma; rugitus.

Brychetus (brik-et'us) or **Bryg'mus.** See *Algidus.*

Brygma (brig'mah) or **Bryg'mus.** Grinding of teeth; common symptom, in children, of gastric or other derangement.

Bryoidin, bri-oid'in. Bitter substance from elemi.

Bryone, bri'o-ne. Bryonia alba.

Bryonia, bri-o'ne-ah (*bruo,* to bud forth) (Ph. U. S.). Root of Bryonia alba and B. dioica. **B. Africa'na,** African bryony; South African plant, in form of decoction acting as emetic, cathartic, and diuretic; used in cutaneous diseases, dropsy, and syphilis. **B. al'ba,** bryony, white bryony; ord. Cucurbitaceæ. Root is large and succulent, and has acrid, bitter taste; drastic cathartic, and also employed in whooping cough; externally applied, in cataplasm, in gout. When repeatedly washed, good starch is obtained from it. Its active bitter principle, a glucoside, is called *bryonine;* it has been employed as an active hydragogue cathartic in dropsy. *Bryonidine* is another alkaloid derived from Bryonia. **B. America'na** grows in W. Indies; properties same as B. alba. **B. dioi'ca,** red bryony, emeto-cathartic; locally, vesicant; used internally in dropsy and whooping cough. **B. epigæ'a,** species growing in India, used as anthelmintic, and in dysentery and syphilis. **B. Madera-spata'na,** diaphoretic and diuretic, used in cholera, gonorrhœa, calculous affections, etc. **B. Mechoacan'na ni'gricans,** Convolvulus jalapa. **B. ni'gra,** Tamus communis. **B. Peruvia'na,** Convolvulus angulatus. **B. rostra'ta,** root of this plant, growing in Java, is expectorant and refrigerant. **B. variega'ta,** Mexican; root is drastic and cathartic.

Bryonine, bry'on-een. $C_{48}H_{80}O_{19}$. Very bitter glucoside from Byronia alba and B. dioica, bitter; styptic and vesicant. Internally, used in pleurisy, pleuro-pneumonia, and acute rheumatism.

Bryony, bre'on-e. Bryonia alba. **B., black,** Tamus communis. **B., red,** B. dioica. **B., white,** Bryonia alba. **B., wild,** Sycios angulatus.

Bryophyllum (bre-o-fil'lum) **calyci'num.** Shrub of S. Africa, Europe, and America, leaves of which are sedative and refrigerant.

Bryoplastic, bry-o-plas'tik (*bruon,* mass, *plasso,* to form). Forming growths like excrescences, from parasites, micro-organisms, accretion, or other cause.

Bryton, bre'ton. Cerevisia.

Bu (**Bou,** abbr. of **Bous,** ox). In composition, excess, greatness; hence, bulimus, buphthalmia, etc.

Buanthropia, bu-an-thro'pe-ah (*bu, anthropos,* man). Hallucination that a person is an ox.

Bubastecordium, bu-bas-te-kor'de-um. Artemisia vulgaris.

Bub'ble fe'ver. Pemphigus.

Bube, bu'be. Pustule.

Bubo, bu'bo. Formerly the groin; inguen or inguinal glands; swelling or inflammation of these parts, bubonadenitis; inflammatory tumor seated in the groin or axilla. The term is now applied to three forms of inguinal tumor: 1. Simple or sympathetic bubo, independent of any virus in the economy. 2. Venereal bubo, occasioned by venereal virus, adenopathy, indurated bubo, suppurating bubo. 3. Pestilential or malignant bubo. **B., creep'ing,** serpiginous bubo which has ulcerated and spread in serpiginous form to adjoining parts. **B., gonorrhœ'al,** see *Bubo.* **B., idiopath'ic,** primary bubo. **B., in'dolent,** chronic, painless, hard indurations of one or more inguinal glands, accompanying indurated chancre. Multiple indolent bubo is similar induration of first row of inguinal glands only. **B., in'durated,** see *Bubo.* **B., malig'nant,** see *Bubo.* **B., parot'id,** cynanche parotidæa or mumps. **B., pestilen'tial,** see *Bubo.* **B., pri'mary** or **prim'itive,** enlargement and suppuration of one or more inguinal glands, not preceded by any other more common forms of venereal disease, nor by any other syphilitic symptom. **B., scrof'ulous,** swelling of gland, as in groin, from scrofulous condition. **B., specif'ic,** syphilitic bubo. **B., stru'mous,** B., scrofulous. **B., sup'purating,** see *Bubo.* **B., sympathet'ic,** swelling of gland, as in the groin, from irritation or injury. **B., syphilit'ic** or **vene'real,** venereal bubo. **B., vir'ulent,** produced by inoculating with virus of chancre, exists only in chancroid.

Bu'bon (*boubon*, groin) The groin. Bubo.

Bu'bon gal'banum. *Long-leaved* or *Lovage-leaved galbanum,* ord. Umbelliferæ. South African plant, wild celery, diuretic; decoction of leaves is given in dropsy and gravel. Galbanum is gummi-resinous juice; odor is fetid, taste bitter and acrid; it forms emulsion when triturated with water; antispasmodic and expectorant; externally applied as cataplasm. **B. gummif'erum,** see *Ammoniac gum.* **B. Macedon'icum,** *Macedonian parsley;* properties are similar to those of common parsley, but weaker.

Bubona, bu-bo'nah. Nipple.

Bubonadenitis, bu-bon-ad-en-e'tis. Bubo; inflammation of inguinal glands.

Bubonalgia, bu-bon-al'je-ah (*bubon, algos,* pain). Pain in the groin.

Bubonium, bu-bo'ne-um. *Golden starwort,* the plant, *Aster atticus,* formerly used in diseases of the groin.

Bubonocele, bu-bon'o-seel-e (Eng. bu-bon'o-seel) (*bubon, kele,* tumor). *Inguinal hernia, Rupture of the groin;* hernia limited to the groin. When it has descended to the scrotum it is called *Oscheocele, scrotal hernia.* The rupture passes through the abdominal ring, and, from greater size of opening in the male, is more frequent in that sex.

Bubononcus, bu-bon-on'kus (*bubon, onkos,* swelling). Bubo; swelling of the groin.

Bubonop'anus. Bubo.

Bubonorrhexis (bu-bon-or-reks'is) or **Bubonorhex'is** (*bubon, rhexis,* rupture). Bubonocele, accompanied with division of the peritoneum; or, in other words, devoid of sac.

Bubonulus (bu-bon'ul-us) or **Bubunculus,** bu-bun'ku-lus (dim. of **Bubo**). Painful swelling of lymphatics of the penis, occasional accompaniment of gonorrhœa.

Bubophthalmia, bube-of-thal'me-ah. Buphthalmia.

Bucca, buk'kah. Cheek and hollow of cheek; vulva.

Buccal, buk'kal. Concerning mouth or cheek. **B. ar'tery** arises from internal maxillary or some of its branches, as deep anterior temporal or alveolar. It is distributed to buccinator muscle and buccal membrane. **B. glands,** mucous follicles in the buccal membrane. Those near molar teeth are called *Molar glands,* and secrete a viscid humor, mixing with saliva and lubricating the mouth. **B. mem'brane,** mucous membrane lining interior of the mouth. **B. nerve,** buccinator nerve, is given off by inferior maxillary, and sends branches to the cheek, especially the buccinator muscle. **B. vein** follows the course of the artery.

Buccea, buk'se-ah. Nasal polypus, because believed to procced from the mouth. Mouthful.

Buccella, buk-sel'lah (dim. of **Buccea,** morsel). Bolus.

Buccellatio, buk-sel-lah'she-o. Mode of arresting hemorrhage by applying pledget of lint to bleeding vessel.

Buccina, buk-se'nah (*buccina,* trumpet). Turbinated bones.

Buccina'to-la'bial. Combination of orbicularis oris and buccinator muscles.

Buccinator, buk-sin-a'tor (*buccino,* to sound a trumpet). Muscle situate in substance of the cheeks, extending between posterior portions of alveolar arches of the jaws and the commissure of the lips, which it draws backward. It assists in mastication by pushing the food back toward the teeth; if the cheeks be distended by air, its contraction forces the air out.

Bucco, buk'ko. Wide-mouthed. In composition, mouth or cheek. Diosma crenata.

Bucco-labial (buk'ko-la'be-al) **mus'cle.** Anterior portion of buccinator. **B.-l. nerve,** buccal nerve.

Bucco-pharyngeal, buk-ko-far-in-je'al. Belonging to mouth and pharynx. The *B.-p. aponeurosis* or *Intermaxillary ligament* extends from internal ala of pterygoid process to posterior part of lower alveolar arch, affording attachment to buccinator and constrictor pharyngis superior muscles. **B.-p. fas'cia,** fascia covering buccinator muscle. **B.-p. mus'cle,** portion of superior constrictor pharyngis muscle from pterygo-maxillary ligament.

Bucco-pharyngeus, buk'ko-far-in-je'us. Bucco-pharyngeal.

Buccula, buk'ku-lah (dim. of **Bucca**). Small mouth; fleshy part beneath the chin.

Bucelatio, bu-sel-ah'she-o. Buccellatio.

Buceras, bu'ser-as. Trigonella fœnum. **B. fœ'num Græ'cum,** Trigonella fœnum Græcum.

Buchan'an's opera'tion. See *Lithotomy.*

Buchin'ha. Fruit of Luffa purgans; drastic.

Buchu, bu'ku. Diosma crenata. **B. fo'lia,** Diosma crenata. **B. leaves,** Diosma crenata.

Buck'bean. Menyanthes trifoliata. **B., Amer'ican,** Menyanthes verna.

Buckberry, buk'ber-re. Vaccinium stamineum.

Buckbrake, buk'brak. Osmunda regalis.

Bucket fever, buk'et fe'ver. Dengue.

Buck'eye. Æsculus hippocastanum.

Buckho, buk'ho. Diosma crenata.

Buck'horn. Osmunda regalis.

Buckthorn, buk'thorn. Rhamnus catharticus; Rhamnus frangula. **B., Califor'nia,** Rhamnus purshiana. **B., pur'ging,** Rhamnus catharticus.

Bucku, buk'u. Diosma crenata.

Buck'wheat. Polygonum fagopyrum. **B. plant, east'ern,** Polygonum divaricatum.

Bucnemia (buk-na'me-ah) or **Boucne'mia** (*bu, kneme,* leg). Elephantiasis. **B. Ind'ica,** elephantiasis. **B. sparganot'ica,** phlegmasia dolens. **B. trop'ica,** elephantiasis.

Buc'ton. Hymen.

Bud'ding germina'tion. Growth by buds on cells; gemmation.

Buecphlysis, bu-ek'flis-is (*bous,* ox, *ekphluo,* to boil up). Cow-pox.

Bue'na magnifo'lia. Tree of S. America, order Rubiaceæ; form of cinchona.

Buff, inflam'matory. Corium phlogisticum.

Buf'fer ac'cidents. Contusion and severe internal injury of the abdomen and its viscera by tight jamming between the buffers of railway cars.

Buff'y coat. Corium phlogisticum.

Bugantia, bu-gan'she-ah. Chilblain.

Bug'bane. Cimicifuga.

Buggery, bug'ger-e. Sodomy; said to have been introduced by Bulgarians, Bulgari, Bugari, or Bugeri; hence the name. Carnal copulation against nature, as of man or woman with an animal, or man with

man, or man unnaturally with woman. One who permits such an act on him is called a *Pathic.*

Buginarium, bu-jin-ah're-um. Gelatin or glycerin bougie, medicated.

Bugle, bu'gl (*bugulus*). Prunella. **B., com'mon**, Ajuga reptans. **B., water**, Lycopus Virginicus. **B. weed**, lycopus.

Bugloss (bu'glos), **dy'er's.** Anchusa tinctoria. **B., gar'den**, Anchusa officinalis. **B., up'right**, ajuga.

Buglossa, bu-glos-sah (*bous*, ox, *glossa*, tongue, from resemblance of its leaves). Anchusa officinalis.

Buglossum angustifolium majus, bu-glos'sum angus-te-fo'le-um ma'jus (*bouglosson*, ox-tongue). Anchusa officinalis. **B. latifo'lium**, Borago officinalis. **B. sati'vum**, Anchusa officinalis. **B. sylves'tris**, Anchusa officinalis. **B. tincto'rum**, Anchusa tinctoria. **B. ve'rum**, boracic acid, **B. vulga're ma'jus**, Anchusa officinalis.

Bugula, bu'gu-lah. Ajuga. **B. chamæ'pitys**, Teucrium chamæpitys. **B. pyramida'lis**, Ajuga. **B. rep'tans**, Ajuga reptans.

Buiatrica, bu-e-at'rik-ah (*bous*, ox, *iatreia*, medication). Therapeutics of diseases of cattle.

Bulam (bu-lam') **fe'ver.** Yellow fever.

Bulama (bu-lam'ah) **boil.** Boil, observed in island of Bulama, west coast of Africa, produced by larva or grub of an insect.

Bulata, bul-at'ah. Substance analogous to guttapercha, from Sapota Mülleri, or bullet-tree, in Dutch Guiana.

Bulb. Name given to different parts resembling in shape bulbous roots. The bulb of the aorta is the great sinus of the aorta; bulb or root of hair is the part whence hair originates; bulb of the urethra is the dilated portion formed by the commencement of the corpus spongiosum; the bulb of the corpus cavernosum is the enlarged portion at the root; the globe of the eye is also called the bulb. **B., arte'rial**, anterior part of embryonic heart. **B., aud'itory**, cochlea and membranous labyrinth together. **B., brach'ial**, enlargement of spinal cord in the neck at origin of brachial plexus. **B. of cor'pus caverno'sum** and **c. spongio'sum**, see *Bulb.* **B., dent'al**, pulp of tooth. **B. of eye**, see *Eye.* **B. of female**, bulbus vestibuli. **B., for'nix**, corpus albicans. **B-s, four**, corpora quadrigemina. **B. of hair**, see *Hair.* **B. of ju'gular vein**, expansion existing near point of origin of external jugular vein. **B., Krause's**, see *Krause's end-bulbs.* **B., olfac'tory**, see *Olfactory nerves.* **B. of o'vary**, bulb-shaped mass of veins at the hilus. **B. paral'ysis**, paralysis from lesion of medulla oblongata. **B., rachid'ian**, medulla oblongata. **B. of spi'nal mar'row**, medulla oblongata. **B. of the throat**, tonsil. **B. of the ure'thra**, see *Urethra.* **B. of the vagi'na**, bulbus vestibuli. **B. of vest'ibule**, bulbus vestibuli.

Bul'bar. Relating to the eyeball and rachidian bulb, or medulla oblongata. **B. ar'teries**, branches of anterior spinal artery to medulla oblongata. **B. disease** or **paral'ysis**, paralysis from causes seated in medulla oblongata, as disintegration of the nuclei; term applied to *labio-glosso-laryngeal paralysis*, a form of progressive paralysis of facial muscles of tongue, lips, and larynx of both sides. **B. myeli'tis**, see *Myelitis.*

Bulbi (bul'be) (pl. of **Bulbus**) **for'nicis.** Mammillary tubercles. **B. prio'rum cru'rum for'nicis**, mammillary tubercles. **B. vestib'uli**, glands of Bartholini.

Bulbiparous, bulb-ip'ar-us. Gem- or germ-producing; gemmiparous.

Bulbocastanum, bul-bo-kast'an-um. Bunium bulbocastanum.

Bulbo-cavernosus, bul-bo-kav-er-no'sus. Accelerator urinæ, constrictor cunni.

Bulbo-cavernous (bul-bo-kav'urn-us) **glands.** Cowper's glands.

Bulbocodium bul-bo-kod'e-um. Narcissus pseudonarcissus.

Bulbonach, bul'bon-ak. Lunaria rediviva.

Bulborrhexis, bul-bor-rheks'is (*bulbus*, *rhexis*, rupture). Rupture of the eyeball.

Bul'bo-ure'thral glands. Cowper's glands.

Bul'bo-urethra'lis. Accelerator urinæ.

Bul'bus. Bulb; eyeball. **B. agres'tis**, Colchicum autumnale. **B. arterio'sus**, anterior of three compartments in rudimentary condition of heart, dividing afterward into aorta and pulmonary artery; see *Bulb.* **B. cine'reus**, olfactory bulb. **B. cor'nu poste'rius**, bulbous prominence on posterior horn of lateral ventricle of brain. **B. cor'poris caverno'si**, bulb of corpus cavernosum. **B. cri'nis**, hair-bulb. **B. for'nicis**, corpus albicans. **B. glandulo'sus**, proventriculus. **B. medul'læ spina'lis**, medulla oblongata. **B. oc'uli**, eyeball. **B. olfacto'rius**, see *Olfactory nerves.* **B. pi'li**, see *Hair.* **B. rachid'icus**, see *Medulla oblongata.* **B. scil'læ**, bulb of squills. **B. ure'thræ**, bulb of urethra. **B. vagi'næ**, bulbus vestibuli. **B. ve'næ jugula'ris**, bulb of jugular vein. **B. vestib'uli**, bulb or semibulb of the female or of the vagina; close-packed plexus of intricately anastomosing veins, enclosed in fibrous investment, occupying space between vestibule of vagina and rami of pubic arch on each side; analogue of male bulb. **B. vomito'rius**, *Musk-grape flower*, *Hyacinthus muscari;* emetic and diuretic.

Bule'sis (*boulesis*, will). Will or power of will.

Bulga, bul'gah. Vulva, uterus.

Bulimia, bu-lim'e-ah. Boulimia.

Bulimic, bu-lim'ik. Relating to boulimia.

Bul'imy. Boulimia.

Bulithos, bu'lith-os (*bous*, ox, *lithos*, stone). Bezoar found in kidneys, gall-bladder, or urinary bladder of the ox or cow.

Bulla, bull'ah. Bleb. Portion of cuticle detached from the skin by interposition of serous or seropurulent fluid; pemphigus; hydatid. **B. ethmoïda'lis**, elevation of ethmoid cells in middle meatus of nose. **B. hæmorrhag'ica**, blood-blister, purpura. **B. syphilit'ica**, bullar syphilitic skin disease.

Bullæ, bull'e (pl. of **Bulla**). Class of skin diseases having bullæ. **B., com'pound**, bulla with two or more chambers, from coalescence of adjacent vesicles. **B. rotun'dæ cervi'cis u'teri**, nabothi glandulæ.

Bullate, bull'ate. Pertaining to bullæ.

Bull'dog. See *Tabanus.* **B. for'ceps**, spring forceps for arresting hemorrhage.

Bul'let for'ceps. Forceps for extraction of a bullet from a wound. **B. probe**, probe for detection of location of a bullet. **B. f., Nélaton's**, see *Nélaton.*

Bull'fists. Lycoperdon.

Bull'ock's blood. Given in pill in anæmia, phthisis pulmonalis, and other diseases of debility. **B.'s eye**, Sempervivum tectorum.

Bull'ous. Relating to bulla or bleb.

Bullula, bull'u-lah (dim. of **Bulla**). Small vesicle or bleb.

Bumamma, bu-mam'mah (*bu*, intensive, *mamma*, breast). Excessively large mammary gland.

Bumelia, bu-mel'e-ah. Fraxinus excelsior.

Buna, bu'nah. Coffee plant; Coffea Arabica.

Bunch. Hunch.

Bunch'backed. See *Hunch.*

Bunchosia lanceolata, bun-ko'se-ah lan-se-o-lat'ah. Plant of Mexico; bark of root is astringent.

Bun'dle of Lenhos'sek. Ascending root of pneumogastric and glosso-pharyngeal nerves. **B., prim'itive**, muscular fibre. **B., res'piratory**, B. of Lenhossek. **B. of Vicq d'Azyr**, fibres of white nervous matter in the thalamus opticus.

Bundu or **Bun'dou.** Ordeal poison of the Gaboon; substance analogous to strychnia, from apocynaceous plant of W. Africa, by some considered identical with akasja.

Bunias, bu'ne-as. Brassica napus.

Bunioid, bu'ne-oid. Napiform; like a turnip, as scirrhus.

Bunion, bun'yun (*bounos*, eminence). Enlargement and inflammation of bursa mucosa at inside of ball of great toe.

Bunium (bu'ne-um) **bulbocast'anum.** Ord. Umbelliferæ; systematic name of plant whose tuberous root, *agriocastanum*, *pignut*, *earthnut*, *hawknut*, *kippernut*, is eaten raw or roasted. **B. car'vi**, carum.

Bunnian, bun'yan. Bunyon.

Bunsen's double-cell bat'tery. Constant battery, in which carbon, amalgamated zinc, diluted sulphuric acid, and nitric acid are the component parts.

Bun'weed. Senecio Jacobæa.

Bunyon, bun'yun. Bunion.

Buophthalmia, bu-of-thal'me-ah. Buphthalmia.

Bupeina, bu-pi'nah (*bu, peina,* hunger). Boulimia.

Buphagous, bu'fag-us (*bu,* intensive, *phago,* to eat). Beef-eating; having excessive appetite.

Buphlysis, bu'flis-is. Buecphlysis.

Buphthal'mi her'ba. Anthemis tinctoria.

Buphthalmia (boof-thal'me-ah), **Buophthal'mia,** or **Bouphthal'mos** (*bu, ophthalmos,* eye, Ox-eye). First stage of hydrophthalmia; turgescence of vitreous humor, which, pushing the iris forward, forms around the crystalline a sort of border.

Buphthalmum creticum, boof-thal'mum kre'tik-um. Anthemis pyrethrum. **B. ma'jus,** Chrysanthemum leucanthemum.

Buphthalmus, boof-thal'mus. Buphthalmia, hydrophthalmia; Sempervivum tectorum.

Bupina, bu-pe'nah (*bu, peina,* hunger). Boulimia.

Bupleuroï'des. Bupleurum rotundifolium.

Bupleurum rotundifolium, bu-plu'rum ro-tun-defo'le-um (*bu, pleuron,* rib; leaves having large ribs). Round-leaved hare's ear. Ord. Umbelliferæ. Herb and seeds are aromatic.

Bur. Burdock. Lobe of ear. Pancreas of calf.

Burcquism, burk'izm. Metallotherapy.

Burdach, columns of. Columns of Gall.

Bur'dock. Arctium lappa. **B., les'ser,** xanthium.

B., prai'rie, Silphium terebinthaceum.

Burdwan fever. Malarial fever in Bengal.

Burette, bu-ret'. Glass tube for measuring liquids.

Burgundy pitch, bur'gun-de. Pix Burgundica.

Burial alive, ber'e-al a-live'. Zoothapsis.

Bu'ris. Hernia with scirrhus; scirrhus only.

Burke, burk. To take away life by suffocation, as by closing the nose and mouth, preventing costal and abdominal breathing; called from a wretch who, in 1829, in Edinburgh, procured subjects for dissection in that way, for which offence he was executed.

Burk'ing. See *Burke.*

Bur'mah boil. Furunculous endemic of Burmah.

Burmese (bur-meze') **ring'worm.** Tinea imbricata.

Burn (Sax. beþnan or byþnan, to burn). Injury produced by action of too great heat. Burns have been divided into simple burns, or those of first degree, *Dermatitis ambustionis erythematosa,*, chiefly producing rubefaction; those of second degree, or accompanied with vesication, *Dermatitis ambustionis bullosa;* and those of third degree, with destruction of parts affected, from involvement of papillary layer only to total destruction of tissues and charring of bone, *Dermatitis ambustionis escharotica.* **B., brush,** see *Brush-burn.*

Bur'net, Can'ada or great. Sanguisorba Canadensis.

Burnett's disinfecting liquid (bur-net''s dis-in-fekt'ing lik'wid) or **fluid.** Solution of zinc chloride, first used by Sir William Burnett for preserving timber, canvas, etc. from dry rot, mildew, etc., and afterward as antibromic and antiseptic, especially in case of dead bodies. The Ph. U. S. and Br. contain *liquor zinci chloridi,* made in the former by action of nitric and muriatic acid on zinc (in the latter an aqueous solution of chloride of zinc), distilled water and precipitated carbonate of zinc being added after evaporation.

Burn'ing. Disease mentioned by old historians, probably gonorrhœa and syphilis. **B. bush,** Euonymus purpureus. **B. of the feet,** beriberi.

Burns, lig'ament of. Falciform process of fascia lata.

Burnt alum. Dried alum. **B. holes,** variety of rupia in Ireland among children of the poor; noma; pemphigus gangrænosus; see *Rupia escharotica.* **B. sponge,** Spongia usta. **B. su'gar,** caramel.

Bu'row's operation. Flap plastic operation on the lip. **B.'s veins,** portal veins occupying place of urachus.

Burq'uism. Metallo-therapeutics.

Burr or **Burrh.** Rotacism.

Burrage, bur'raje. Borago officinalis.

Bur'reed, great. Sparganium ramosum.

Bursa, bur'sah (sac). See *Bursæ mucosæ.* Pouch or sac, especially synovial sac, *bursa mucosa* (which see), situate between bones and their coverings of muscles, tendons, or skin. Scrotum. **B. acromia'lis,** B. beneath deltoid muscle; also occasional b. over acromion. **B. ancone'i,** b. between olecranon and tendon of triceps extensor cubiti. **B. an'guli mandib'uli,** rare subcutaneous b. over angle of jaw. **B. a. ster'ni,** subcutaneous b. over angle between first and second pieces of sternum. **B. a. superio'ris scap'ulæ,** B. at upper angle of scapula, in serratus magnus or between it and insertion of levator anguli scapulæ. **B. anseri'na,** B. between expansion of semitendinosus, gracilis, and sartorius muscles and long internal lateral ligament. **B. bicip'itis,** B. surrounding tendon of long head of biceps in bicipital groove. **B. b. cru'ris** or **bicip'ito-fibula'ris,** B. between external lateral ligament of knee and tendon of biceps. **B. b. gastrocnemia'lis,** rare b. between sesamoid bone in external head of gastrocnemius muscle and tendon of biceps femoris or skin. **B., Boy'er's,** B. subhyoidea. **B. brachia'lis infraspina'ti,** B. between infraspinatus tendon and capsule of shoulder-joint. **B. calca'nea,** B. between tendo Achillis and back of calcaneum. **B., capit'ulo-ra'dial,** B. between head of radius and common tendon of extensors. **B. cap'sulæ oc'uli,** B. between capsule of Ténon and globe of eye. **B. carpi'na vola'ris,** B. between tendon of carpi ulnaris and pisiform bone. **B. circumflex'i pala'ti,** B. at point at which tendon of tensor palati turns around hamular process. **B., clavic'ular,** B. between clavicle and coracoid process of scapula. **B. coccyge'a,** B. between tip of coccyx and sphincter ani. **B. con'dyli exter'ni** and **inter'ni,** subcutaneous b-s over condyles of femur. **B. cor'acobrachia'lis,** B. between subscapularis and upper extremities of muscles arising from coracoid process. **B. c.-brachia'lis mi'nor,** B. under rare muscle of that name. **B. c.-clavicula'ris latera'lis,** B. between coracoid process and trapezoid ligament. **B. c.-c. me'dia,** B. between conoid and trapezoid ligaments. **B. coracoï'dea,** B. near base of coracoid process. **B. cor'dis,** pericardium. **B. cos'tæ pri'mæ,** B. between muscles of back and tuberosity of first rib. **B. cos'to-clavicula'ris,** B. within fibres of rhomboid ligament. **B. cri'cothy'ro-thyroï'dea,** B. between lateral lobes of thyroid body and crico-thyroid. **B. cubita'lis extenso'ris car'pi radia'lis bre'vis,** occasional b. over head of radius, beneath origin of extensor carpi radialis brevior and e. communis digitorum. **B. c. interos'sea** or **cu'bito-radia'lis,** B. ulno-radialis. **B. cuculla'ris,** B. trapezii. **B. deltoï'dea,** B. acromialis. **B. digas'trici ante'rior,** B. at point at which tendon of digastric muscle passes through fascia binding it to hyoid bone, or through stylo-hyoid muscle. **B. d. poste'rior,** B. between posterior belly of digastric and sterno-cleido-mastoid. **B. epicon'dyli,** rare b. between skin and external condyle of humerus. **B. epiplo'ica,** lesser peritoneal sac. **B. epitroch'leæ,** B. between skin and inner condyle of humerus. **B. extenso'ris car'pi radia'lis brevio'ris,** B. cubitalis extensoris. **B. e. c. ulna'ris,** B. beneath origin of extensor carpi ulnaris. **B. e. digito'rum pe'dis bre'vis,** B. under extensor brevis digitorum of foot. **B. e. hallu'cis bre'vis,** B. between tendon and head of first metacarpal bone. **B. fibula'ris,** B. bicipitis cruris. **B. flexo'ris car'pi ulna'ris,** B. carpina volaris. **B. f. digito'rum subli'mis,** rare b. in tendon of origin of flexor digitorum sublimis, or between it and pronator radii teres. **B. fos'sæ infraclavicula'ris,** B. between two layers of coraco-clavicular fascia in front of coracoid process. **B. fronta'lis,** B. over frontal eminences. **B. ga'leæ cap'itis,** B. between aponeurosis of occipito-frontalis and pericranium, over occipital protuberance. **B. gastrocnemia'lis exter'na** or **latera'lis,** occasional b. between outer head of gastrocnemius muscle and capsule. **B. g. inter'na** or **media'lis,** or **gastrocne'mii inter'ni,** B. between inner head of gastrocnemius

and semimembranosus, behind inner condyle. **B. gemel'li superio'ris,** B. pyriformis. **B. gemello'rum,** rare b. between gemelli muscles and capsule of hip-joint. **B. genua'lis ante'rior,** B. anserina. **B. g. latera'lis exter'na** or **latera'lis exter'na ante'rior,** B. subtendinea tensoris fasciæ latæ. **B. g. l. e. infe'rior,** B. bicipitis cruris. **B. g. l. e. supe'rior,** B. tendinis poplitei. **B. g. l. inter'na infe'rior,** B. anserina. **B. g. l. i. me'dia,** B. subligamento interno. **B. g. l. i. supe'rior,** B. subtendinea sartorii. **B. g. poste'rior,** B. gastrocnemialis interna. **B. glute'i me'dii** or **me'dii ante'rior,** B. between anterior part of tendon of gluteus medius and trochanter major. **B. g. m. poste'rior,** B. between tendons of gluteus medius and pyriformis muscles. **B. g. min'imi,** B. between tendons of gluteus minimus and great trochanter. **B. glute'o-fascia'lis, glute'o-femora'lis,** or **glute'o-trochanter'ic,** between tendon of gluteus maximus and trochanter major. **B. Gru'beri,** B. sinûs tarsi. **B. humera'lis flexo'ris digito'rum subli'mis,** B. flexoris digitorum sublimis. **B. hu'mero-tricipita'lis,** B. between anterior surface of triceps extensor cubiti and fat at lower extremity of humerus. **B. hyoï'dea,** B. subhyoidea. **B. ili'aca,** B. between ilio-psoas muscle and brim of pelvis. **B. i. ante'rior,** subcutaneous b. over anterior superior spine of ilium. **B. i. poste'rior,** subcutaneous b. over posterior superior spine of ilium. **B. il'io-cos'to-cervica'lis,** B. between ilio-costal muscle and transverse process of seventh cervical vertebra. **B. il'io-pectine'a** or **il'io-pso'as,** B. subiliaca. **B. infragenua'lis** or **infrapatella'ris** or **infrapatella'ris profun'da,** B. subpatellaris. **B. i. superficia'lis infe'rior,** B. præspinosa. **B. i. s. supe'rior,** B. præligamentosa. **B. infraspina'ta,** B. brachialis infraspinata. **B. infraspina'ti,** B. between superior margin of infraspinatus muscle and spine of scapula. **B. intermuscula'ris extenso'ris cru'ris,** occasional b. between tendons of rectus femoris and cruræus. **B. intertubercula'ris,** B. bicipitis. **B. intramuscula'ris pectora'lis majo'ris,** B. between clavicular and thoracic portions of pectoralis major. **B. intraserra'ta,** B. anguli superioris scapulæ. **B. intratendin'ea olec'rani,** B. within tendon of triceps extensor cubiti. **B. ischiad'ica,** B. between obturator internus and lesser sciatic notch. **B. i. glute'i max'imi,** B. between inferior margin of gluteus maximus and tuberosity of ischium. **B. latis'simi dor'si,** B. between tendon of latissimus dorsi and inferior angle of scapula. **B. malle'oli exter'ni,** subcutaneous b. over external malleolus. **B. m. inter'na,** subcutaneous b. over internal malleolus. **B. metacar'pea ulna'ris,** subcutaneous b. over head of fifth metacarpal bone. **B. muco'sa,** see *Bursæ mucosæ.* **B. mus'culi glute'i in tu'bere is'chii,** B. ischiadici glutei maximi. **B. obturato'ris exter'ni,** B. between obturator externus and capsule of hip-joint. **B. o. inter'ni,** B. obturatoris interni ovalis. **B. o. inter'ni circumflex'a,** B. ischiadica. **B. o. i. ova'lis,** B. between tendon of obturator and gemelli. **B. olec'rani,** subcutaneous b. over olecranon. **B. omenta'lis,** cavity formed by peritoneum in great omentum. **B. omen'ti majo'ris,** cavity of great omentum. **B. o. mino'ris,** cavity of lesser omentum. **B. o'mo-hyoï'dei,** B. between sterno-mastoid and middle tendon of omo-hyoid. **B. ova'rica,** shallow depression in broad ligament of uterus, near ovary. **B. palma'ris lon'gi,** occasional b. between origin of palmaris longus muscle and capsule of hip-joint. **B. patel'læ** or **patella'ris,** subcutaneous b. over patella. **B. patel'læ amplifica'ta,** knee, housemaid's. **B. patella'ris latera'lis** or **B. p. l. exter'na,** occasional b. between lateral expansions of tendons of quadriceps cruris and patella. **B. p. l. inter'na,** B between inner lateral expansion of tendon of quadriceps and patella. **B. p. præligamento'sa,** B. between fascia and ligament of patella. **B. p. profun'da,** B. præpatellaris subaponeurotica. **B. p. subcuta'nea,** B. præpatellaris subcutanea. **B. pectine'a,** B. between insertion of pectineus and femur. **B. pectora'lis mino'ris,** B. beneath tendon of pectoralis minor muscle. **B. peronæo'rum commu'nis,** B. between peronei tendons and inferior part of fibula. **B. perone'i lon'gi,** sac over tendon of peroneus longus at calcaneum. **B. pharynge'a,** pouch in mucous membrane of back part of pharynx in middle line. **B. phren'ico-hepat'ica ante'rior,** B. between left lateral ligament of liver and under surface of diaphragm in front. **B. p.-h. poste'rior,** occasional b. between left lateral ligament of liver and under surface of diaphragm behind. **B. planta'ris in capit'ulo os'sis metatar'si primi and quinti,** subcutaneous bursa on sole beneath heads of first and fifth metatarsal bones. **B. poplite'a,** B. beneath popliteus muscle and on capsule of knee-joint and external tuberosity of tibia. **B. postcalca'nea profun'da,** B. calcanea. **B. p. superficia'lis** or **subcuta'nea,** B. between tendo Achillis and deep fascia. **B. postgenua'lis exter'na,** B. gastrocnemialis externa. **B. præligamento'sa,** B. over ligamentum patellæ. **B. præmenta'lis,** subcutaneous b. at inferior margin of symphysis of chin. **B. præpatella'ris latera'lis inter'na subligamento'sa,** B. between internal lateral ligament of knee-joint and capsules of joint. **B. p. me'dia,** B. between fascia over patella and quadriceps aponeurosis. **B. p. media'lis profun'da,** B. subligamento-interna. **B. p. m. superficia'lis,** B. patellaris lateralis interna. **B. p. pri'ma,** subcutaneous b. in front of patella. **B. p. profun'da,** B. præpatellaris subaponeurotica. **B. p. secun'da,** B. præpatellaris subfascialis. **B. p. subaponeurot'ica** or **subtendino'sa,** B. between aponeurosis of extensors and front of patella. **B. p. subcuta'nea,** subcutaneous b. beneath aponeurosis over patella. **B. p. subfascia'lis,** B. between fascia of patella and aponeurosis of extensors of leg. **B. p. superficia'lis,** B. præpatellaris subcutanea. **B. p. ter'tia,** B. præpatellaris subaponeurotica. **B. præspino'sa,** B. over tuberosity of tibia. **B. præthyroï'dea,** occasional b. between skin and superior portion of thyroid cartilage. **B. prætibia'lis, B. prætubero'sa,** B. prespinosa. **B. pyrifor'mis,** B. beneath tendon of insertion of pyriformis muscle. **B. quadra'ti fem'oris,** B. between quadratus femoris and trochanter minor. **B. radia'lis** or **ra'dio-bicipita'lis,** B. between tendon of biceps and tuberosity of radius. **B. r. subcuta'nea,** B. over styloid process of radius. **B. retrocondyloi'dea exter'na me'dia,** B. bicipito-gastrocnemialis. **B. r. e. profun'da** or **B. r. e. pro'pria,** B. gastrocnemialis externa. **B. r. e. subcuta'nea** or **superficia'lis,** subcutaneous b. over sesamoid bone in tendon of external head of gastrocnemius muscle. **B. r. inter'na,** B. gastrocnemialis interna. **B. re'tro-epitrochlea'ris,** occasional b. between triceps extensor muscle and ulnar nerve behind, and internal condyle of humerus and capsule of elbow-joint in front. **B. sac'culi lacryma'lis,** B. between lacrymal sac and internal palpebral ligament. **B. sacra'lis,** B. over spinous process of fourth or fifth sacral vertebra, or over articulation of sacrum and coccyx. **B. sarto'rii pro'pria,** B. between tendon of sartorius and femur. **B. semimembrano'sa,** B. between lateral part of semimembranosus tendon and inner condyle of tibia; also, B. gastrocnemialis interna. **B. semimembrano'so-gastrocnemia'lis,** inferior part of B. gastrocnemialis interna. **B. semitendino'sa-bicipita'lis in tu'bere is'chii,** B. between conjoined tendon of semitendinosus and biceps and tuberosity of ischium. **B. sero'sa,** B. communicating with cavity of joint. **B. si'nus tar'si,** B. occasionally found between fascia over extensor longus digitorum and head of astragalus. **B. spi'næ scap'ulæ,** B. over spine of scapula, caused by carrying heavy weights. **B. s. sphenoï'deæ,** B. between spine of sphenoid bone and capsule of temporo-maxillary joint. **B. ster'no-hyoï'dei,** B. between insertion of sterno-hyoid muscle and hyoid bone. **B. sty'lo-hyoï'dei,** B. under insertion of stylo-hyoid muscle. **B. subachille'a,** B. calcanea. **B. subacromia'lis,** upper part of B. deltoidea on muscles of shoulder-joint. **B. subcalca'nea,** B. between inferior surface of calcaneum and plantar fascia. **B. subcla'via,** B. costo-clavicularis. **B. subcoracoï'dea,** occasional b. between subscapularis muscle and subscapularis bursa; also B. coraco-brachialis and B. scapularis. **B. subcrura'lis,** B. between quadriceps

extensor and inferior portion of front surface of femur above patella. **B. subcuta'nea calca'nei**, B. subcalcanea. **B. s. capit'uli ul'næ**, B. over styloid process of ulna. **B. s. con'dyli radia'lis hu'meri** or **condyloi'dea humeri exter'na**, B. epicondyli. **B. s. con'dyli ulna'ris hu'meri** or **condyloi'dea hu'meri inter'na**, B. epitrochlei. **B. s. ge'nu**, B. præligamentosa. **B. s. latis'simi dor'si**, B. between skin and lumbar aponeurosis. **B. s. malle'oli exter'na** or **latera'lis**, subcutaneous b. over external malleolus. **B. s. m. inter'na** or **media'lis**, subcutaneous b. over internal malleolus. **B. s. olec'rani**, B. olecrani. **B. s. tu'beris is'chii**, subcutaneous b. over tuberosity of ischium. **B. subdeltoi'dea**, B. acromialis. **B. subfascia'lis**, B. between superficial insertion of quadriceps and inferior part of fascia lata. **B. subgemella'ris**, B. pyriformis. **B. subhyoi'dea**, B. between hyoid bone and conjoined insertion of sterno-hyoid, omo-hyoid, and stylo-hyoid muscles, and thyro-hyoid membrane. **B. subili'aca**, B. under tendon of ilio-psoas muscle covering ilio-pectineal tubercle, anterior surface of pubes, and capsule of hip-joint. **B. subligamen'to-inter'na**, B. between internal lateral ligament of knee-joint and capsule of joint. **B. subligamento'sa**, B. subpatellaris. **B. sublingua'lis**, B. between tongue and mucous membrane. **B. submamma'ria**, B. between mammary gland and pectoralis major. **B. subpatella'ris**, B. between tendon of quadriceps extensor and front of tibia. **B. subscapula'ris**, B. between subscapularis muscle and coracoid process and neck of scapula. **B. subtendin'ea brachia'lis anti'ci**, B. between tendon of insertion of brachialis anticus and coronoid process. **B. s. extenso'ris car'pi radia'lis brevio'ris**, B. under tendon at its insertion into third metacarpal bone. **B. s. e. c. r. longio'ris**, B. under tendon at its insertion into second metacarpal bone. **B. s. e. lon'gi hallu'cis**, B. extensoris hallucis brevis. **B. s. flexo'ris car'pi ulna'ris**, B. carpina volaris. **B. s. ili'aci**, occasional b. between tendon of insertion of ilio-psoas muscle and femur. **B. s. infraspina'ti**, B. brachialis infraspinata. **B. s. olec'rani**, B. above olecranon, in front or at side of triceps extensor tendon. **B. s. pectora'lis majo'ris**, B. between tendon of pectoralis major and b. bicipitis and tendon of latissimus dorsi. **B. s. p. mino'ris**, occasional b. beneath insertion of pectoralis minor. **B. s. perone'i ter'tii**, B. beneath tendon of that muscle at its insertion upon head of fifth metacarpal bone. **B. s. sarto'rii**, B. between tendon of sartorius and femur. **B. s. subscapula'ris**, occasional b. between tendon of subscapularis and capsule of shoulder-joint. **B. s. tenso'ris fas'ciæ lat'æ**, B. between ilio-tibial band and capsule of knee-joint. **B. s. tere'tis mino'ris**, B. beneath tendon of teres minor. **B. s. tibia'lis anti'ci**, B. beneath tendon of that muscle at insertion. **B. s. tricip'itis brach'ii**, B. subtendinea olecrani. **B. supra-acetabula'ris**, B. between head of rectus femoris and upper border of acetabulum. **B. supra-acromia'lis**, occasional b. over acromion process. **B. supra-ancone'a intratendino'sa**, B. intratendinea olecrani. **B. supracondyloi'dea inter'na** or **media'lis**, B. between inner tendon of gastrocnemius muscle and femur. **B. supragenua'lis**, B. subcruralis. **B. suprahyoi'dea**, B. between superior surface of hyoid bone and genio-hyo-glossi muscles. **B. suprapatella'ris**, B. subcruralis; B. intermuscularis extensoris cruris; also b. occasionally found in shoemakers above the knee. **B. suprapu'bica**, B. beneath rectus abdominis at its attachment to pubes. **B. supraxiphoi'dea**, subcutaneous b. over ensiform cartilage. **B., syno'vial**, gray sac. **B. tar'sica subcuta'nea**, subcutaneous b. on dorsal surface of foot. **B. ten'dinis bicip'itis cru'ris**, B. bicipitis cruris. **B. t. poplite'i**, B. between external lateral ligament of knee-joint and tendon of popliteus. **B. tendino'sa radia'lis**, sheath surrounding tendon of long flexor of thumb. **B. t. ulna'ris**, sheath surrounding tendons of deep and superficial flexors of fingers in wrist and palm. **B. tenso'ris fas'ciæ lat'æ**, B. subtendinea tensoris fasciæ latæ. **B. t. ligamen'ti annula'ris ra'dii ante'rior**, B. palmaris longi. **B. t. ve'li palati'ni**, B. circumflexi palati. **B. tere'tis majo'ris**, between tendon of insertion of teres major and lesser tuberosity of humerus. **B. tes'tium**, scrotum. **B. thy'ro-hyoi'dea**, B. subhyoidea. **B. thyroi'dea latera'lis**, between inferior constrictor muscle and greater cornu of thyroid cartilage. **B. thyro-trachea'lis**, between isthmus of thyroid gland and trachea. **B. tibia'lis anti'ci**, B. beneath tendon of tibialis anticus at its insertion. **B. t. inter'na**, B. anserina. **B. t. subcuta'nea**, subcutaneous b. over upper end of tibia. **B. trape'zii**, B. between aponeuroses of trapezius and base of spine of scapula. **B. trochanter'ica glute'i** or **B. t. g. max'imi**, B. trochanterica profunda. **B. t. g. me'dii ante'rior**, B. glutei medii anterior. **B. t. g. m. poste'rior**, B. glutei medii posterior. **B. t. g. min'imi**, B. glutei minimi. **B. t. profun'da**, B. between tendon of gluteus maximus and posterior and external portions of great trochanter. **B. t. superficia'lis**, B. subcutanea trochanteris majoris. **B. trochlea'ris oc'uli**, B. in pulley of superior oblique muscle of eye. **B. tubero'so-ischiad'ica**, B. ischiadica. **B. ulna'ris inter'na**, B. between pisiform bone and tendon of flexor carpi ulnaris. **B. ulna'ris subcuta'nea**, B. subcutanea capituli ulnæ. **B. ulno-radia'lis**, B. between tendon of biceps flexor cubiti and radial tuberosity externally, and ulna and contiguous muscle internally. **B. vagina'lis**, synovial sheath. **B. v. abducto'ris lon'gi** and **extenso'ris bre'vis pol'licis** surround tendons of these muscles. **B. v. ante'rior extenso'ris lon'gi hallu'cis**, anterior sheath of that muscle over first metatarso-phalangeal joint. **B. v. extenso'ris car'pi ulna'ris**, sheath of that muscle. **B. v. e. lon'gi digito'rum pe'dis**, sheath for tendons of that muscle. **B. v. e. l. hallu'cis**, sheath for that muscle. **B. v. e. l. pol'licis**, separate sheath for that extensor muscle. **B. v. e. min'imi dig'iti**, small sheath for tendon of that muscle. **B. v. extenso'rum car'pi radialo'rum**, common sheath of such extensor muscles. **B. v. e. commu'nis et in'dicis**, synovial covering of tendons of common extensor and extensor of forefinger. **B. v. flexo'ris car'pi radia'lis**, B. on tendon of that muscle. **B. v. f. lon'gi digito'rum**, synovial sheath for tendon of that muscle. **B. v. f. l. hal'lucis**, sheath surrounding tendon of that muscle behind internal malleolus. **B. v. pectora'lis mino'ris**, B. around tendon of pectoralis minor. **B. v. perone'i**, sheath of peroneal tendons behind external malleolus. **B. v. p. lon'gi**, sheath of tendon of that muscle in groove of cuboid. **B. v. tibia'lis anti'ci**, sheath around tendon of that muscle. **B. v. t. posti'ci**, sheath surrounding tendon of that muscle. **B. ver'tebræ prominen'tis**, B. between skin and spinous process of seventh cervical vertebra. **B. vesicula'ris glute'i me'dii**, B. glutei medii anterior. **B. viri'lis**, scrotum.

Bursæ (pl. of **Bursa**) **abducto'ris min'imi dig'iti pe'dis**, B. between that muscle and seasamoid bone of peroneus longus; also b. between that muscle and tuberosity of fifth metatarsal bone. **B. aor'tico-trachea'les**, B. between aorta and trachea. **B. dorsa'les profun'dæ** or **subtendin'eæ**, B. between tendons of extensor muscles and capsules of metacarpo-phalangeal or metatarso-phalangeal joints. **B. d. subcuta'neæ** or **superficia'les**, B. beneath skin of dorsum of foot and hand. **B. glute'i max'imi** or **glute'o-femora'les**, B. between tendons of gluteus maximus and femur. **B. intermetacar'po-phalan'geæ**, B. between heads of second, third, fourth, and fifth metacarpal bones. **B. intermetatar'so-phalan'geæ**, B. between metatarso-phalangeal joints. **B. interos'seæ**, B. between tendons of interossei muscles and metacarpo-phalangeal joint; B. between interossei muscles and metatarso-phalangeal joint. **B. lumbrica'lium pe'dis**, B. between lumbricales muscles of foot. **B. masseter'icæ**, B. between masseter and structures beneath. **B. mucilagino'sæ**, B. mucosæ. **B. muco'sæ**, *Synovial crypts* or *follicles*. Small membranous sacs situated about joints, particularly large ones of upper and lower extremities, and, for most part, lying under tendons. They are naturally filled

with oily kind of fluid, to lubricate surfaces over which tendons play. The bursæ are, generally, either roundish or oval, and arranged under two classes, *Spherical* and *Vaginal*. **B. phalan'geæ dorsa'les,** subcutaneous b. on dorsal surface of phalangeal joints. **B. semimembrano'sæ in tu'bere isch'ii,** B. between tendon of semimembranosus and quadratus femoris muscles. **B. subcuta'neæ dorsa'les artic'uli metacar'po-phalan'gei,** B. between skin and extensor tendons over metacarpo-phalangeal articulations. **B. s. vola'res artic'uli metacar'po-phalan'gei,** B. between skin and fat and the flexor tendon with its sheath. **B. s. v. phalan'gis pri'mæ,** B. between skin and tissue beneath and flexor tendon in front of first phalanx. **B. submus'culo pediæ'o,** B. under extensor brevis digitorum pedis muscle. **B. subtendin'eæ dorsa'les artic'uli metacar'po-phalan'gei,** B. between extensor tendons on dorsum of hand and metacarpo-phalangeal joints.

Bur'sal. Relating to bursa or scrotum.

Bursalis, bur-sal'is. Bursal; obturator internus.

Bursalogy, bur-sal'o-je. Treatise on, or description of, bursæ.

Bursera acuminata (bur-se'rah ak-u-min-at'ah) or **gummif'era** (after Burser, Neapolitan botanist). *Jamaica bark tree,* resinous exudation from which has been used like balsams and turpentines in general.

Bur'sin. Yellow substance derived from Capsella bursa pastoris; astringent, styptic, and used subcutaneously as substitute for ergot.

Bursi'tis. Inflammation of a bursa. See *Synovitis.*

Burst (ruptured). Hernia, hernial.

Bursula, bur'su-lah (dim. of **Bursa**). Scrotum.

Bur'wart. Ranunculus acris.

Bur'weed. Xanthium.

Bush, Jew. Pedilanthus tithymaloides.

Busk, diam'eter of. Diameter between ear and bregma. **B., horizon'tal plane of,** plane through middle point of upper edge of external meatus, vertical to plane passing through such points and bregma.

Bus'tum (burnt). Crematory or cremation. Dead body.

Butal'amine. Derivative from spleen or pancreas of ox.

Butch'er's broom. Ruscus aculeatus.

Butea frondosa, bu'te-ah fron-do'sah (after John, earl of Bute). Tree common in Bengal and India, nat. ord. Leguminosæ, from which gum butea flows. Vermifuge and cathartic; leaves are astringent, tonic; flowers are astringent and diuretic. **B. gum,** B. frondosa. **B. ki'no,** B. frondosa. **B. parviflo'ra,** Indian shrub; gum is used in colic and hysteria.

Butter, but'ur (*bous,* ox, *turoo,* to make into cheese). Unctuous substance or concrete oil obtained from cream forming on surface of milk furnished by females of mammalia, especially by cow and goat. Employed as substitute for oils in treatment of rickets, etc. Vegetable substances resembling butter obtained from milk also receive this name. Essential fatty matter in it is *butyrin* or *butyrat of glycerin.* See *Butyric acid.* **B. of an'timony,** antimonium muriatum. **B., artific'ial,** oleomargarine. **B. of ca'coa,** *Oil of cacao, Oil of theobroma.* Concrete oil, of sweet and agreeable taste, obtained from kernels of fruit of Theobroma cacao or chocolate nut. Being firm and fusible, it is adapted to serve as a constituent of suppositories. **B. of co'coa,** fatty, concrete substance separating from milk of cocoanut. **B. and eggs,** Narcissus pseudo-narcissus. **B. ko'kum,** see *Garcinia purpurea.* **B. of nut'megs,** see *Myristica.* **B. teeth,** incisive teeth. **B. tree,** Bassia butyracea, B. latifolia, and B. Parkii. **B. weed,** Erigeron Canadense. **B. wort,** Pinguicola vulgaris. **B. of zinc,** zinc chloride.

But'tercup. Ranunculus acris and R. bulbosus.

Butterfly (but'ur-fli) **lu'pus.** Lupus erythematosus of nose. **B. weed,** Asclepias tuberosa.

Buttermilk, but'ur-milk. Thin, sour milk separated from cream by churning; contains caseum and a little butter. Refreshing drink when newly made.

But'ternut. Juglans cinerea.

Buttock, but'ok. Nates. **B. hump,** steatopyga.

Button, Biskra, but'un, bisk'rah. Aleppo boil. **B. bush,** Cephalanthus occidentalis. **B. cau'tery,** see *Cautery.* **B. of hair,** see *Hair.* **B. of Na'ples,** bubo. **B. scur'vy,** epidemic cachectic affection in Ireland; indolent button-like growths of corpus papillare of skin; allied to frambœsia. **B. snake'root,** Liatris spicata; Eryngium aquaticum. **B. su'ture,** see *Suture, twisted.*

But'tonhole frac'ture, see *Fracture.* **B. opera'tion,** see *Boutonnière.*

But'tonwood shrub. Cephalanthus occidentalis.

Butua, bu'tu-ah. Pareira brava.

Butyl (bu'til) **chlo'ral hy'drate.** Croton-chloral hydrate from action of chlorine on aldehyde. $C_4H_5Cl_3O,H_2O$. Chloral butylicum; analgesic and hypnotic; employed in neuralgia and insomnia. **B. chlo'ride,** colorless fluid; anæsthetic; effects similar to amyl chloride. **B. hy'dride,** carbohydrogen derived from rectified American petroleum; gaseous, condensable into liquid. Inhaled, produces sleep and unconsciousness, resembling nitrous oxide in action; if long continued, asphyxia results from exclusion of air.

Butyl'amine. $C_4H_{11}N$. Ptomaïne found in cod-liver oil; colorless alkaline liquid. It stimulates action of the skin and kidneys, and in large doses is narcotic and produces vomiting. See *Ptomaïnes* (table).

Butyli (bu'til-e) **chlora'lum hydra'tum.** Chloral butylicum.

Buty'phus (*bous,* ox). Cattle-plague.

Butyraceous, but-ir-a'shus (*butyrum,* butter). Resembling butter.

Bu'tyrate of gly'cerin. See *Butter.*

Butyric acid, bu-tir'ik as'id. $C_4H_8O_2$. Liquid fatty acid in perspiration, muscle-juice, and associated with glycerin and butter, odor of which, when rancid, is due to free acid. See *Butter* and *Bacillus butyricus.* **B. e'ther,** ethyl butyrate.

Butyrin, bu'tir-in. See *Butter.*

Butyroid tumor, bu'tir-oid tu'mor. Form of milk tumor of breast, contents of which resemble butter.

Butyrum, bu'tir-um. Butter. **B. amygdala'rum dul'cium,** confection (almond). **B. antimo'nii,** antimonium chloride. **B. ca'coa,** butter of cacoa. **B. lau'ri,** oil of laurel. **B. nucis'tæ,** oil of nutmeg. **B. satur'ni,** unguentum plumbi superacetatis. **B. zin'ci,** zinci chloridum.

Buxine, buks'een. Alkaloid found in leaves and bark of Buxus sempervirens; identical with bebeerin. Antiperiodic and antipyretic in doses of gr. xv–xxx.

Buxus (buks'us) **sempervi'rens.** Box tree, indigenous in Europe; root, bark, and leaves are used for worms, dyspepsia, etc., and are also diaphoretic and antisyphilitic.

Byne, be'ne. Malt.

Byrethrum, be-re'thrum. Sort of cap or couvre-chef filled with cephalic substances.

Byrsa, bir'sah (*bursa,* hide). Skin to spread plasters upon. Bursa.

Byrsodep'sicum princip'ium. Tannin.

Byrsonima chrysophylla, bir-son'im-ah kris-o-fil'-lah. Tree of Cayenne; bark is astringent, tonic, and antipyretic. **B. Cumingia'na,** Panama tree; bark is used in skin diseases. **B. spica'ta,** tree of W. Indies and S. America; bark and fruit are astringent.

Bysauchen, bis-aw'ken (*buo,* to stop up, *auchen,* neck). Morbidly stiff neck. One with short neck.

Byssinosis, bis-sin-o'sis (*bussos,* flax). Development of pulmonary disease from inhalation of fine particles of cotton, as phthisis from cotton-spinning, byssophthisis; see *Pneumoconiosis.*

Byssocausis, bis-so-kaw'sis (*byssus, kausis,* burning). Use of cotton moxa.

Byssophthisis, bis-so-te'sis. See *Byssinosis* and *Pneumoconiosis.*

Bys'sus. Vegetable substance used for fabrication of fine and rare stuffs; cotton; charpie. Vulva.

Bythus, bith'us (depth). Fundus of stomach.

Byttneriaceæ, bit-ner-e-ah'se-e. Natural order of plants, including Theobroma cacao.

C.

C. In chemical alphabet signifies nitre; also used for calx, carbon, centigrade, and cylindrical lens.

Caa. Ilex Paraguayensis, maté. Generic name, in Brazil, for an herb. **C.-ap'ia** is emetic and antidiarrhœic. **C.-atay'a,** plant of Brazil having cathartic properties.

Caape'ba. Pareira brava, Pothomorpha peltata, and P. umbellata.

Caaponga, kah-ah-pon'gah. Crithmum maritimum.

Caaro'ba. Brazilian tree; leaves, in decoction, promote perspiration. See *Caroba* and *Ceratonia.*

Cabal, kab-al'. Knowledge transmitted by tradition; art of knowing most occult properties of bodies by inspiration or supernatural media; *ars cabalistica* or *signata.*

Cabalist, kab'al-ist. One instructed or versed in cabalistic art.

Caballation (kab-al-la'shun) or **Cabal'lion.** Cynoglossum.

Caballine aloes, kab'al-ene al'oze (*caballus,* horse). Impure aloes, used by veterinary surgeons.

Cabalonga, kab-ah-lon'gah (Sp.). Seeds of Strychnos Ignatii.

Cabbage, kab'aj. Brassica. **C. bark** or **bas'tard,** bark of Andira inermis. **C., cow,** Nymphæa odorata. **C., Irish,** Dracontium fœtidum. **C. rose,** Rosa centifolia. **C., skunk,** Dracontium fœtidum. **C., swamp,** D. fœtidum. **C. tree,** Geoffræa inermis. **C., water,** Nymphæa odorata.

Cabbage-bark tree. Geoffræa inermis.

Cabbagium (kab-baj'e-um) or **Cabba'gius.** Geoffræa inermis.

Cabinet, kab'in-et. Chamber; museum. **C., pneumat'ic,** air-tight chamber, having in it an apparatus for compressing the contained air, for treatment of affections of the chest.

Caburei'ba or **Cabureici'ba.** See *Myroxylon Peruiferum.*

Cacæmia, kak-e'me-ah (*caco, haima,* blood). Faulty or morbid condition of the blood.

Cacæmic, kak-e'mik (same etymon). Affected with cacæmia.

Cacaërometer, kak-a-er-om'et-ur (*kakos,* bad, *aër,* air, *metron,* measure). Instrument for measuring quantity of deleterious matter in depraved air.

Cacæsthe'sia, Cacæsthesis (kak-ees-the'sis), **Cacaæsthe'sis,** or **Cacoæsthe'sis** (*caco, aisthesis,* feeling). Morbid sensation, indisposition, paræsthesia, pseudæsthesia.

Cacagogue (kak'a-gog) or **Cac'cagogue** (*kakke,* excrement, *ago,* to expel). Cathartic.

Cacalexiteria, kak-al-eks-it-e're-ah (*caco, alexo,* to ward off). Alexiteria.

Cacalia Alpina, kak-ah'le-ah al-pe'nah. Used in bronchitis and bronchorrhœa. **C. anteuphor'bium,** plant which tempers the caustic properties of euphorbium. **C. hasta'ta,** Siberian plant; purgative. **C. Klein'ii,** Indian plant; alterative.

Cacanthrax, kak-an'thraks. Malignant anthrax. See *Anthrax.*

Cacao (ka'ka-o) or **Cacoa,** ka'ko. Cocoa or chocolate-nut; fruit of Theobroma cacao; see *Chocolate.* **C. but'ter,** oil of theobroma.

Cacaostearin, kak-ah-o-ste'ar-in. Oil of theobroma.

Cacaphonia, kak-ah-fo'ne-ah (*kakos,* bad, *phone,* sound). Harsh, disagreeable sound or voice.

Cacaphrodite, kak-af-ro-de'te (*kakos,* evil, *Aphrodite,* Venus). Syphilis.

Cacaphthæ, kak-af'the. Malignant form of aphthæ.

Cacation, kak-a'shun (*caco,* to go to stool). Defecation.

Cacato'ria. Diarrhœa.

Cacatory, kak'a-to-re. Having alvine discharges; as *cacatory fever,* fever accompanied with copious alvine evacuations.

Cacava'ta. Cacao.

Caca'vi. Cacao, Jatropha manihot, cassava.

Caccagogue, kak'a-gog. Cathartic.

Cacce, kak'ke. Excrement.

Caccobacteria, kak-ko-bak-te're-ah. Term employed at one time to signify micro-organisms too oval in shape to be classed as micrococci, and too short in their long diameter to be considered as bacilli.

Cacenteria, kak-en-ter'e-ah (*kakos,* evil, *enteron,* intestine). Depraved condition of the bowels.

Cacephebotesia, kak-ef-a-bo-ta'ze-ah (*caco, ephebotes,* puberty). Morbid puberty. Disease occurring at puberty.

Cachæmic, kak-e'mik. Cacæmic.

Cachalot, kash'ahl-o. See *Cetaceum.*

Cacha'na. Root of balsamic Mexican plant.

Cachec'tes. A cachectic individual.

Cachectic, kak-ek'tik (same etym. as **Cachexia**). One attacked with cachexia. Relating to cachexia. Remedy for cachectic condition. **C. diseases,** constitutional diseases—gout, scrofula, tuberculosis, for example.

Cachelcoma (kak-el-ko'mah) or **Cachelcosis,** kak-el-ko'sis (*caco, helkos,* ulcer). Malignant ulcer.

Cachets (F.), kash-a'. Wafers enclosing medicinal articles.

Cachexia (kak-eks'e-ah) or **Cachex'y** (*caco, hexis,* habit). Condition in which the system of nutrition is depraved; bad habit of body, chiefly result of scorbutic, cancerous, tuberculous, or venereal disease. Term sometimes confounded with diathesis. See *Chthonophagia, Chlorosis, Distoma, Anchylostomum,* etc. **C. Africa'na,** affection resembling anæmia of miners. **C., alcohol'ic,** constitutional effects of excessive use of alcoholic drinks. **C. aquo'sa,** anæmia with dropsy, seen in lower animals. **C., arsen'ical,** chronic poisoning from arsenic. **C. calculo'sa,** lithiasis. **C., can'cerous** or **carcinom'atous,** see *Cancer.* **C., car'diac,** chlorotic condition observed in some forms of chronic heart disease. **C., chlorot'ic,** chlorosis. **C., drunk'ard's,** C., alcoholic. **C. dysthet'ica,** dyscrasia. **C. exophthal'mica,** exophthalmic goitre. **C. icter'ica,** jaundice, icterus. **C., jail,** deteriorated organic actions induced by confinement in prisons. **C., lead,** constitutional effects of chronic lead-poisoning; saturnism. **C. Londinen'sis,** impaired health or nutrition said to occur in inhabitants of London; seen also in those of other crowded cities. **C. lymphat'ica farcimino'sa,** see *Equinia.* **C., mala'rial** or **marsh,** state of cachexy observed in malarious districts; constitutional sequences of malarial fever. **C., mercu'rial,** constitutional effect of chronic mercurial poisoning, as anæmia, arthritic pain, emaciation, etc. **C., ne'gro,** C., African. **C., os'teal,** cachectic condition of children in which long bones become painful and swollen. **C., pachyder'mic,** myxœdema. **C., palu'dal** or **palus'tris,** C., malarial. **C., perios'teal,** C., osteal. **C. rena'lis,** kidney, Bright's disease of. **C. saturni'na,** lead colic; saturnism. **C., scorbu'tic,** C. from scurvy; see *Purpura.* **C. scrophulo'sa,** see *Scrofula.* **C. splen'ica,** splenic leucocythæmia, a scorbutic cachexia often accompanying diseases, especially enlargement of spleen; *splenalgia Bengalensis* in India, leukæmia, pseudo-leucocythæmia. **C. strumipri'va,** myxœdema or condition allied to it. **C., stru'mous,** scrofula. **C., syphilit'ica,** anæmic condition due to syphilitic poison. **C., tuber'cular,** condition of health causative of or resultant from tubercular disease. **C. u'teri** or **uteri'na,** fluor albus. **C. vene'rea,** syphilis. **C., ve'nous,** venosity. **C., verm'inous,** constitutional effect of worms in intestine, as anæmia, etc. **C. vir'ginum,** chlorosis.

Cachex'y. Cachexia.

Cachinnation, kak-in-na'shun (*cachinno,* to laugh aloud). Tendency to immoderate laughter, as in hysterical and maniacal affections.

Cachlex, kak'leks. Small pebble from the seashore, which, when heated in fire and cooled in whey, communicates astringency to that liquid; used in dysentery.

Cachochylous, kak-o-ky'lus. See *Cacochylia.*

Cachrys (kak'ris) **Libano'tis.** Umbelliferous plant growing in Africa and south of Europe; aromatic and astringent. **C. marit'ima,** Crithmum maritimum. **C. odontal'gica,** plant of S. Europe and Asia; seeds are used for toothache.

Caco, kak'o (abbr. of **Kakos,** bad). In composition means bad or defective. (See words beginning with *Kako.*)

Cacoa, ka'ko. Cacao. **C., but'ter of,** oil of theobroma.

Cacoæsthesis, kak-o-ees-the'sis. Cacæsthesis.

Cacoalexiteria, kak-o-al-eks-it-a're-ah (*caco, alexeo,* to ward off). Alexipharmic.

Cacocholia, kak-o-kol'e-ah (*caco, chole,* bile). Depraved condition of bile.

Cacochrœa, kak-o-kre'ah (*kakos,* evil, *chroia,* color). Change in color of skin from disease.

Cacochroi (kak'o-kroi) or **Cac'ochri** (*caco, chroa,* color). Diseases in which the complexion is morbidly changed in color.

Cacochylia, kak-o-kil'e-ah (*caco, chulos,* chyle). Depraved chylification; hence *Cacochy'lous,* indigestible.

Cacochymia, kak-o-kim'e-ah (*caco, chumos,* juice). Depravation of humors; disordered chymification. **C. plum'bea,** lead-poisoning. **C. scorbu'tica,** see *Purpura.* **C. scrophulo'sa,** scrofula. **C. vene'rea,** syphilis.

Cacochymus, kak-ok'im-us. One attacked with cacochymia; belonging to cacochymia.

Cacochymy, kak-ok'im-e. Cacochymia.

Cacocnemus, kak-ok-ne'mus (*caco, kneme,* leg). One who has disease or defect of the legs—*Cacocnemia.*

Cacocolpia, kak-o-kol'pe-ah (*kakos,* evil, *kolpos,* vagina). Gangrene of vagina or vulva.

Cacocorema, kak-o-ko-re'mah (*caco, koreo,* to purge or cleanse). Medicine which purges off vitiated humors; purgative medicine.

Cacocynanche, kak-o-sin-an'ke. Cynanche maligna; malignant angina.

Cacodæmon, kak-o-de'mon (*caco, daimon,* spirit). Evil spirit to which many disorders were ascribed; nightmare.

Cacodæmonomania, kak-o-de-mon-o-man'e-ah. Demonomania.

Cacodes, kak-o'des (*caco, ozo,* to smell). Having a bad smell.

Cacodia, kak-o'de-ah (same etymon). Bad smell.

Cacodontic, kak-o-don'tik (*kakos, odous,* tooth). Having bad teeth.

Cacodyl, kak'o-dil. Alkarsin; offensive poisonous liquid from acetyl.

Cacoethes, kak-o-a'thes (*caco, ethos,* disposition, habit). Bad or vitiated disposition or character.

Cacœthia, kak-e'the-ah (same etymon). State of malignancy.

Cacoethicus, kak-o-eth'ik-us. Having bad or vitiated disposition or character.

Cacogalactia (kak-o-ga-lak'te-ah) or **Cacoga'lia** (*caco, gala,* milk). Bad condition of milk.

Cacogalac'tica. One suffering from vitiated condition of milk.

Cacogenesis, kak-o-jen'es-is (*caco, genesis,* generation). Morbid or monstrous formation; malformation.

Cacoglossia, kak-o-glos'se-ah (*kakos, glossa,* tongue). Disordered tongue; gangrene of the tongue.

Cacometra, kak-o-me'trah (*caco, metra,* uterus). Putrescency or gangrene of uterus.

Cacomorphia, kak-o-mor'fe-ah (*caco, morphe,* shape). Malformation.

Cacomorphosis, kak-o-mor-fo'sis. Malformation; development of diseased tissue.

Caconæmia, kak-o-ne'me-ah (*caco, nemo,* to pasture). Milk sickness of cattle.

Caconychia, kak-o-nik'e-ah (*caco, onux,* nail). Morbid condition of nail.

Cacoparonychia, kak-o-par-on-ik'e-ah. See *Paronychia.*

Cacopathia, kak-o-path-e'ah (*caco, pathos,* affection). Distressed state of mind; malignant disease.

Cacopharyngia, kak-o-far-in'je-ah (*caco, pharunx*). Gangrene of pharynx.

Cacophonia, kak-o-fo'ne-ah (*caco, phone,* voice). Dissonant condition of voice.

Cacophthalmia, kak-of-thal'me-ah (*caco, ophthalmos,* eye). Gangrene or malignant disease of the eye.

Cacoplasia, kak-o-plah'ze-ah (*caco, plasso,* to form). Formation of morbid tissues. See *Cacoplastic.*

Cacoplastic, kak-o-plas'tik (*caco, plasso,* to form). Susceptible of only low degree of organization, as indurations resulting from low or chronic inflammation, fibro-cartilage, cirrhosis, etc.; opposite of euplastic.

Cacopneumonia, kak-o-nu-mo'ne-ah. Gangrene of lung.

Cacopragia (kak-o-prah'je-ah) or **Cacoprax'is** (*caco, prasso,* to perform). Depraved condition of organic functions.

Cacoproc'tia (*caco, proktos,* anus). Gangrene of the rectum.

Cacorrhachis (kak-or'rhak-is) or **Cacorrhachitis,** kak-or-rhak-e'tis (*caco, rhachis,* spine). Deformity or disease of spine. Spontaneous luxation of vertebræ and ribs, dependent upon internal causes.

Cacorrhinia, kak-or-rhin'e-ah (*caco, rhis,* nose). Gangrene of the nose.

Cacorrhythmic, kak-or-rhith'mik (*caco, rhuthmos,* rhythm). Irregular as to rhythm.

Cacosis, kak-o'sis. Bad condition of body; diseased condition in general.

Cacositia, kak-o-sit'e-ah (*caco, sition,* aliment). Disgust or aversion for food.

Cacosmia, kak-oz'me-ah (*kakos,* bad, *osme,* smell). Offensive odor.

Cacosomium, kak-o-so-me'um (*caco, soma,* body). Hospital for leprosy and incurable affections in general.

Cacosomnia, kak-o-som'ne-ah (*caco, somnus,* sleep). Sleeplessness; restless sleep.

Cacospermasia (kak-o-spur-mah'ze-ah), **Cacosperma'tia,** or **Cacosper'mia** (*caco, sperma,* sperm). Abnormal condition of sperm.

Cacosphyxia, kak-o-sfiks'e-ah (*caco, sphuxis,* pulse). Bad state of pulse.

Cacosplanchnia, kak-o-splank'ne-ah (*caco, splanchnon,* viscus). Indigestion; emaciation dependent upon imperfect digestion.

Cacostomachus, kak-o-stom'ak-us (*caco, stomachos,* stomach). That which disagrees with the stomach; indigestible.

Cacostomatosphresia, kak-o-stom-at-os-fra'ze-ah (*caco, stoma,* mouth, *osphresis,* smell). Offensive breath.

Cacostomia, kak-o-stom'e-ah (*caco, stoma,* mouth). Gangrene of the mouth.

Cacostomus, kak-os'tom-us (*caco, stoma,* mouth). Having diseased mouth or bad breath.

Cacothanasia, kak-o-than-ah'ze-ah (*caco, thanatos,* death). Unnatural, painful, or distressing death.

Cacothesis, kak-oth'es-is (*kakos, thesis,* position). Faulty position or attitude.

Cacothymia, kak-o-thim'e-ah (*caco, thumos,* mind, disposition). Depraved state of mind; mental depression.

Cacotribulus, kak-o-trib'u-lus. Centaurea calcitrapa.

Cacotrichia, kak-o-trik'e-ah (*caco, thrix,* hair). Disease of the hair.

Cacotrophia, kak-o-trof'e-ah (*caco, trophe,* nutrition). Disordered or defective nutrition. **C. pilo'rum,** keratosis pilaris, lichen pilaris.

Cacot'rophy. Cacotrophia.

Cacoucia coccinea, kak-u'se-ah kok-sin'e-ah. Perennial shrub of S. America; emeto-cathartic.

Cacozyme, kak'o-zime (*kakos, zume,* ferment). Disease-producing ferment.

Cactus, kak'tus. Cynara. **C. grandiflo'ra,** night-blooming cereus. Tincture is employed as a cardiac tonic in functional palpitation of the heart, probably from direct stimulation of the intracardiac ganglia. **C. opun'tia,** Indian fig, grows in S. America, Spain, Italy, etc.; fruit is sweetish and colors urine red when eaten; leaves are refrigerant.

Ca'cur. Fruit of Cucumis myriocarpus.

Cada'ba. Genus of family Capparidaceæ of India and Arabia; young shoots of C. farinosa are used as an antidote against venomous bites; also cathartic and antiseptic. **C. In'dica** is anthelmintic, cathartic, emmenagogue.

Cadaver, kad-ah'vur. A dead body.

Cadaveric, kad-av'ur-ik. Cadaverous. **C. al'kaloids,** ptomaïnes. **C. hyperæ'mia,** see *Cadaverous.* **C. rigid'ity,** rigidity occurring after death. **C. soft'ening of stom'ach,** condition sometimes seen after death, in which the stomach is softened from post-mortem action of gastric juice.

Cadaverine, kad-av'er-een. $C_5H_{14}N_2$. Isomeric with saprine and neuridine and animal coniine; ptomaïne in putrefying animal tissues occurring always in cultures in which the vibrio is present, as heart, liver, or lungs, and from putrid eggs and albumin of blood; heavy syrupy liquid of offensive odor. It has power to excite suppuration and necrosis. See *Ptomaïnes* (table).

Cadaverization, kad-av-er-i-za'shun. Condition which, in paleness, coldness, and loss of vital manifestations, gives appearance of dead body, as in collapse of cholera; production of death.

Cadaverous (kad-av'er-us) or **Cadav'eric.** Belonging to dead body; resembling dead body. **C.** or **Hippocrat'ic face** (see *Face*), unfavorable sign in disease, generally denoting fatal termination. **C. hyperæ'mia,** hypostatic hyperæmia observed in depending parts of dead body.

Caddy insect, kad'de in'sekt. See *Ectozoa.*

Cade. Juniperus oxycedrus.

Cadet's fuming liquid. Cacodyl, alkarsin.

Cadia (kah'de-ah) **Arab'ica** or **purpu'rea.** Egyptian leguminous plant, used in colic.

Cadiva insania, kad-e'va in-sah'ne-ah (*cadivus,* falling). Epilepsy.

Cadmia, kad'me-ah. Calamina, tutia. **C. metal'lica** or **nati'va,** arsenic.

Cadmii sulphas, kad-me'e sul'fas. Sulphate of cadmium; crystalline soluble salt, emetic; used in spots on cornea and in chronic torpid inflammation of conjunctiva, in quantity of half grain or grain to ounce of water; properties like sulphate of zinc. *Nitrate of cadmium,* in dose of one-eighth of grain, induces vomiting and purging. *Iodide,* white soluble salt, is said to possess all advantages of preparations of iodine; in ointment is used in scrofulous and other tumefactions.

Cadmium (kad-me'um) **ioda'tum.** See *Cadmii sulphas.* **C., iodide** (i'o-dide) **of,** see *Cadmii sulphas.* **C. o'leate,** see *Oleates.* **C. sulphu'ricum,** cadmii sulphas.

Caduca, kad-u'ka. Decidua. **C. Cras'sa,** decidua vera. **C. Hunte'ri,** hun-te're, decidua. **C. pas'sio,** epilepsy.

Caducity, kad-u'sit-e (*cado,* to fall). Old age; portion of human life preceding decrepitude.

Caducus morbus, kad-u'kus mor'bus (*cado,* to fall). Epilepsy.

Cadurcus, kad-ur'kus. Vulva.

Cæ'ca foram'ina. Foramina situate at fore and back parts of tuber annulare of brain and at extremities of depression made by vertebral artery.

Cæcæ hæmorrhoïdes, se'se hem-or-ro-e'des (*cæcus,* blind). Blind piles; those unaccompanied by discharge.

Cæcal, se'kal. Blind; closed at one extremity; belonging to cæcum. Cæcal arteries and veins are branches of arteriæ and venæ colicæ dextræ inferiores, distributed to cæcum. Cæcal or blind extremity of a duct is its closed termination. **C. appen'dix,** vermiform appendix of cæcum. **C. fos'sa,** depression made by folds of peritoneum going to cæcum.

Cæcitas (se'se-tas) or **Cæcitu'do** (*cæcus,* blind). Cecity, blindness; may depend on many diseases, as amaurosis, hypopyon, cataract, glaucoma, ophthalmia, atrophy of eye, etc. **C. crepuscula'ris,** hemeralopia. **C. diur'na,** nyctalopia. **C. mi'nor,** amaurosis. **C. noctur'na,** hemeralopia. **C. verba'lis,** word-blindness, or inability to understand written or printed words. See *Aphasia.*

Cæcitis, se-se'tis. Inflammation of the cæcum; typhlitis, typhloënteritis. **C., ster'coral,** fecal vomiting, frequently occurs in obstruction of the bowels.

Cæcitudo, se-se-tu'do. Cæcitas.

Cæcum, se'kum (*cæcus,* blind). Blind gut, so called from being open at one end only; portion of intestinal canal seated between termination of ileum and commencement of colon, filling almost wholly right iliac fossa, where peritoneum retains it immovably. Its length is about three or four fingers' breadth. The ileo-cæcal valve or valve of Bauhin shuts off all communication between it and ileum; appendix vermiformis cæci is attached to it. **C. fora'men,** of frontal bone, small cavity at inferior extremity of internal coronal crest or crista; fronto-ethmoidal foramen. Small cavity in middle of upper surface of tongue, near its base. **C., phleg'monous tumor of,** typhloenteritis.

Cæcus, se'kus (blind). One deprived of sight; in anatomy, applied to hole or cavity ending in cul-de-sac, or having only one opening; see *Cæcal.* Blind ducts of urethra are mucous lacunæ of that canal.

Cæla, se'lah. Malabar plant employed in pustular affections and in gonorrhœa.

Cæmentum, se-men'tum (rubble stone). See *Tooth.*

Cæpa, se'pah. Allium cepa.

Cæruleum Berolinense (se-ru'le-um ber-o-lin-en'se) or **Borus'sicum** (*cæruleus,* blue). Prussian blue.

Cæruleus morbus, se-ru'le-us mor'bus (blue disease). Cyanosis.

Cærulosis neonatorum, se-ru-lo'sis ne-on-at-o'rum. Cyanosis of newborn; cyanopathy.

Cæsalpina, sees-al-peen'ah (after Andreas Cæsalpinus). Sappan or sampfen wood; Siamese tree, wood of which is used in decoction in contusions. **C. axilla'ris,** plant of Malabar, seeds of which are emetic and antiperiodic. Brazil wood, Pernambuco or Fernambuco wood, used as astringent, is wood of Cæsalpina echinata. Another variety is brasiletto, from Cæsalpina Brasiliensis and C. crista, growing in West Indies. Nicaragua or peach-wood, analogous to this, is derived from species of Cæsalpina. The kernel of Cæsalpina bonducella, seed of which is called in India *kutkuleja* and *kutoo kurunja, banduc seeds, nickernuts,* is febrifuge tonic, antiperiodic, and anthelmintic; used, powdered and mixed with castor oil, in hydrocele. **C. coria'ria** grows in Southern America; fruit is astringent and antiperiodic, used externally for piles and prolapse of rectum. **C. cris'ta,** shrub of Jamaica, bark of which is epispastic and stimulant to ulcers. **C. morin'ga,** root is diuretic. **C. pulcher'rima,** small tree of E. and W. Indies and S. America; flowers are used in cutaneous affections, malarial fevers, and diseases of lungs; seeds and leaves are cathartic, diuretic, and abortifacient. **C. sap'pan,** seeds are emmenagogue; see *Cæsalpina.*

Cæsarean (se-za're-an) **opera'tion** or **sec'tion** (*cædo,* to cut). Operation through parietes of abdomen and uterus to extract fœtus; Julius Cæsar is said to have been so extracted. It is also called hysterotomy, hysterotocotomy, hysterotokotomy, gastrometrotomy, gasterhysterotomy, gastrometrotomy, gastrohysterotomy. When the incision is made into the uterus through the vagina, it constitutes vaginal Cæsarean section, gastroelytrotomy, gastrelytrotomy, gastrocolpotomy, laparocolpotomy, laparoelytrotomy. Cæsarean section may be required when the mother dies before delivery, when there is invincible obstacle to delivery from faulty conformation of pelvis, or when child has passed into abdominal cavity in con-

sequence of rupture of the uterus. See *Cœliotomy, Laparotomy, Porro's operation, Sänger's operation*, etc.

Cæsareanist, se-za're-an-ist. One who favors or performs Cæsarean operation.

Cæsa'rian. Cæsarean.

Cæsaries, se-za're-es (head of hair). Capillus, scalp.

Cæsarotomy, se-zar-ot'o-me. Cæsarean section.

Cæs'ium. Salts of this metal, particularly the bromide, have been used in epilepsy. The chloride diminishes the pulse-rate.

Cæsius, se'se-us (bluish-gray). Glaucoma.

Cæsones, se-zo'nes. Children born by Cæsarean operation.

Cæsura, se-zu'rah (*cædo*, to cut). Cut, incision.

Caf'ein. See *Coffea Arabica.*

Cafeism, kaf'e-ism. Anæmia, insomnia, and other constitutional effects of chronic coffee-poisoning.

Caffea (kaf-fa'ah) or **Caffeia**, kaf-fi'ah. See *Coffea Arabica.*

Caffe'ic acid. $C_9H_8O_4$. Crystallizable acid derived from coffee, in which, combined with glucose, it forms caffeo-tannic acid.

Caffeidin, kaf-fa'id-in. Base derived from caffein.

Caffeina, kaf-fe-e'nah (Ph. U. S., Br.). See *Caffeine.*

Caffeinæ citras, kaf-fe-e'ne sit'ras (Ph. Br.). Caffeine, citrate of.

Caffeine, kaf'fe-een. White alkaloid, $C_8H_{10}N_4O_2$,-H_2O, in coffee, tea, guarana, etc.; odorless crystals; it retards metamorphosis of tissue, produces contraction of blood-vessels, etc.; used in migraine, and is also antispasmodic, diuretic, and stimulant to digestive organs. Dose, from 2 to 5 grains. See *Coffea Arabica.* **C. ci'trate**, weak salt, from solution of caffein in citric acid; chief salt of caffein employed medicinally. **C., vale'rianate of**, mixture of caffein and valerianic acid, used in whooping cough and hysterical vomiting.

Other salts of caffein have been used or experimented upon for their actual or presumed therapeutic action, as the benzoate, borocitrate, citrobenzoate, citrosalicylate, hydrobromide, hydrochloride, lactate, nitrate, oxalate, phenylate, phthalate, salicylate, sulphate, tannate, etc. C. and ammonium citrate is also employed. C. and sodium benzoate, bromide, cinnamylate, citrate, and salicylate are employed, some of them hypodermically.

Caf'feo-tan'nic acid. Glucoside, $C_{14}H_8O_7$, in coffee; composed of glucose and caffeic acid. See *Caffeic acid.*

Cagas'trum. Germ of communicable diseases.

Cahincæ radix, kah-hin'se rah'diks. Cainanæ radix.

Cahincic acid, ka-hin'sik as'id. Cahincin.

Cahincin (kah-hin'sin) or **Cain'cin.** Bitter white crystallized glucoside in root and root-bark of Cainca or Chiococca racemosa; cahincic or caincic acid, $C_{40}H_{64}O_{18}$.

Caieput (ki'e-put) or **Caj'eput oil.** Volatile oil of leaves of Melaleuca cajuputi, ord. Myrtaceæ, native of Moluccas. Has strong, fragrant smell, like camphor; taste pungent and aromatic; is stimulant and useful where essential oils in general are employed; antispasmodic, stimulant, and anodyne in colic, neuralgia, toothache, earache, skin diseases, vomiting, etc. It is called oil of Witneben, from person who first distilled it.

Cainanæ (kah-in-ah'ne) or **Caincæ** (kah-in'se) **radix.** Bark of roots of Chiococca anguifuga, C. densifolia, or C. racemosa, ord. Rubiaceæ; bitter, tonic, and diuretic. See *Cahincin.*

Caincic acid, kah-in'sik as'id. Cahincin.

Caincin, kah-in'sin. Cahincin.

Caisson disease, ka'son dis-ees'. Chain of symptoms caused by working in compressed air, as in that of caisson or diving-bell in tunnelling or bridge-building, comprising intense neuralgic pains of limbs and stomach, headache, vertigo, nausea and vomiting, paralysis and coma.

Cajeput (kaj'e-put) **oil.** See *Caieput.*

Cajeputol, kaj'e-pu-tol. Oily liquid constituting larger part of oil of cajuput and of some other oils.

Caj'uput. Caieput.

Caju'putol. Cajeputol.

Cake, embryon'ic. Fœtal placenta. **C., mater'nal**, uterine placenta. **C., vas'cular**, placenta.

Calabar (kal'a-bar) **bean.** Ordeal nut; physostigma.

Calabarine, kal'ab-ar-een. Alkaloid from physostigma, having action similar to strychnia; eserine.

Cal'abash tree, nar'row-leaved ([S.] *calabaza*, gourd). Crescentia cujete.

Caladium esculentum, kal-ah'de-um es-ku-len'tum. Arum esculentum. **C. segui'num**, plant of India, S. America, and W. Indies; juice given in gout and rheumatism, and as anaphrodisiac to women; tincture used in pruritus vulvæ.

Calaf. Egyptian willow, distilled water of flowers of which—macahalef—is said to be antaphrodisiac, antiloimic, antiseptic, and cordial.

Calage, kal-azh' (F.). Wedging; method of preventing or relieving sea-sickness by pressure of a pillow against the stomach, the patient being recumbent.

Calageri or **Calagirah.** Vernonia anthelmintica.

Calagualæ radix, kahl-ag-u-ahl'e rah'diks. Root of Polypodium calaguala or adiantiforme or coriaceum or amnifolium or argenteum or politum; diuretic, and used in dropsy, pleurisy, contusions, abscesses, etc.

Calamandrina, kal-am-an-dre'nah. Teucrium chamædrys.

Calamba (kal-am'ba), **Calam'bac, Calam'bar, Calam'be, Calam'bouk.** Aloes wood.

Calamedon, kal-am-e'don (*kalamos*, reed). Oblique fracture of bone, fractured portions having shape of nib of pen; longitudinal fracture; comminuted fracture.

Calamina (kal-am-e'nah) or **Cal'amine** (*calamus*, reed, from its reed-like appearance). Native impure carbonate of zinc; chiefly used for pharmaceutical purposes in form of *calamina præparata* (Ph. Br.), prepared calamine. Calamine reduced to impalpable powder by roasting and levigation; it is sprinkled or dusted on excoriated parts, or to prevent excoriation, etc. Also alkaloid from Acorus calamus.

Calamine, kal'am-ine. Calamina.

Calamint, kal'am-int. Melissa calamintha. **C., field**, Melissa nepeta. **C., moun'tain**, Melissa grandiflora. **C., spot'ted**, Melissa nepeta.

Calaminta humilior, kal-am-in'tah hu-mil'e-or. Glecoma hederacea.

Calamintha, kal-am-in'thah (*kalos*, beautiful, *mentha*, mint). Melissa calamintha. **C. a'cinos**, basil thyme; stimulant, diaphoretic. **C. ang'lica**, Melissa nepeta. **C. aquat'ica**, Mentha aquatica. **C. clinopo'dium**, wild basil; aromatic tonic. **C. erec'ta Virginia'na**, Cunila mariana. **C. grandiflo'ra** of Southern Europe, carminative. **C. hedera'cea**, Glechoma hederacea. **C. mag'no flo're**, Melissa grandiflora. **C. monta'na**, Melissa grandiflora. **C. nep'eta**, Melissa nepeta. **C. officina'lis**, Melissa officinalis. **C. parviflo'ra**, Melissa nepeta. **C. pule'gii odo're**, Melissa nepeta. **C. trichot'oma**, Melissa nepeta.

Calamus, kal'am-us. In the Ph. U. S. rhizome of Acorus calamus. **C. Alexandri'nus**, stalk of plant of India and Egypt; antihysteric and emmenagogue. **C. aromat'icus**, Acorus calamus. **C. aromat'icus Asiat'icus**, C. Alexandrinus. **C. aromat'icus ve'rus**, C. Alexandrinus. **C. Asiat'icus**, C. Alexandrinus. **C. dra'co**, C. rotang. **C. In'dicus**, see *Saccharum.* **C. odora'tus**, Acorus calamus, Juncus odoratus. **C. ro'tang**, systematic name of plant whence dragon's blood is procured; red, resinous juice, obtained in India from wounding bark of Calamus rotang; used as astringent in hemorrhages, etc. **C. scripto'rius** (writing-pen), small, angular cavity at superior extremity of medulla in fourth ventricle of brain, supposed to resemble a pen. **C. vulga'ris**, Acorus calamus.

Calanthe (kal-an'the) **veratrifo'lia.** Species of orchids of Moluccas, used locally in œdema and internally in chronic diarrhœa.

Calasaya, kahl-as-a'yah. Cinchonæ cordifoliæ cortex.

Calatropus gigantea, kal-at'ro-pus jig-an-ta'ah. Tree of India, possessing property of exciting powerful uterine contractions.

Calcaneal (kal-ka'ne-al) or **Calca'nean** (*calx*, heel). Relating to calcaneum, as calcaneal arteries, branches from posterior tibial to the heel.

Calcanean, kal-ka'ne-an. Calcaneal.

Calcaneo- (kal-ka'ne-o) **astrag'alar** or **astrag'aloid,** as-trag'al-oid. Relating to calcaneum and astragalus.

Calcaneo-cavus, kal-ka'ne-o-kah'vus. Club-foot, combining calcaneus and cavus or talipes arcuatus.

Calca'neo-cu'boid. Relating to calcaneum and cuboid, as C.-c. articulation and C.-c. ligaments.

Calca'neo-fib'ular. Relating to calcaneum and fibula, as C.-f. ligament, middle part of external lateral ligament of ankle.

Calca'neo-navic'ular. Relating to calcaneum and scaphoid bone, as C.-n. ligaments.

Calca'neo-scaph'oid. Calcaneo-navicular.

Calca'neo-ta'lar. Calcaneo-astragaloid.

Calcaneo-tibial, kal-ka'ne-o-tib'e-al. Relating to os calcis and tibia, as C.-t. ligament.

Calcaneo-valgo-cavus, kal-ka'ne-o-val'go-kah'vus. Club-foot, combining calcaneus, valgus, and cavus.

Calcaneum, kal-kan'e-um (*calx*, heel). Largest tarsal bone forming the heel, situate at posterior and inferior part of foot; posterior surface, heel, gives attachment to tendo Achillis.

Calcaneus, kal-kan'e-us (*pes*, foot, understood). Variety of club-foot, in which dorsum of foot is drawn upward by contraction in direction of shin, heel alone touching the ground.

Calcar, kal'kahr. Calcaneum; (also, a spur) ergot. **C. a'vis,** hippocampus minor. **C. eques'trum,** delphinium consolida.

Calcareous, kal-ka're-us (*calx*, lime). Containing lime or chalk, as C. concretions, C. degeneration, C. metastasis, etc. See *Calcification*.

Calcaria carbonica, kal-kah're-ah kar-bon'ik-ah. See *Creta*. **C. caus'tica,** lime. **C. chino'vica,** calcium kinovate. **C. chlora'ta,** calcis chloridum. **C. chlo'rica,** calcis chloridum. **C. chlorin'ica,** calcis chloridum. **C. hy'drica,** slaked lime. **C. hypochloro'sa,** calcis chloridum. **C. hypophosphor'ica,** calcis hypophosphis. **C. muriat'ica,** calcium chloride. **C. oxymuriat'ica,** chlorinated lime. **C. phosphor'ica,** calcium phosphate. **C. pu'ra,** calx. **C. pu'ra liq'uida,** liquor calcis. **C. sacchara'ta,** saccharate of lime; antidote to carbolic or oxalic acid. **C. sulfura'ta,** sulphurated lime. **C. us'ta,** lime.

Calcariæ (kal-kah're-e) **aq'ua.** Lime-water. **C. chlo'rum,** calcis chloridum. **C. hypophos'phis,** calcis hypophosphis.

Calcarine fissure (kal'kar-een fis'shur) or **sul'cus.** Groove on occipital lobe, corresponding with hippocampus minor of lateral ventricle.

Calcatreppola, kal-sah-trep'po-lah. Centaurea calcitrapa.

Calcena (kal-se'nah), **Calcenon** (kal-se'non), **Calcenonia** (kal-se-no'ne-ah), **Calcinonia,** kal-sin-o'ne-ah. Concretions of tartrate of lime in the human body.

Calceolaria, kal-se-o-la're-ah (*calceolus*, small slipper). Slipperwort. **C. corymbo'sa,** species of slipperwort, diuretic. **C. pinna'ta,** used in Peru as emetic and laxative. **C. puncta'ta,** S. American shrub, stem and leaves of which are cathartic and antisyphilitic. **C. res'eda,** species in Peru, antipyretic and antiseptic. **C. trif'ida** is febrifuge and antiseptic.

Calcetus, kal-se'tus. Abounding in tartrate of lime or abnormal calcareous matter.

Calceum equinum, kal'se-um a-kwe'num (horse-shoe). Tussilago.

Calcia, kal'se-a. Calcaneum.

Cal'cic. Relating to calcium or lime.

Calciferous (kal-sif'er-us) **canals** (*calx*, *fero*, to carry). Microscopic canaliculi in cartilages of bones, full of calcareous salts.

Calcification, kal-se-fe-ka'shun (*calx*, *fio*, to become). Conversion into chalky or osseous matter by deposition of calcareous substance or lime-salts in the tissues; calcareous degeneration, as in the larger arteries, in breaking down inflammatory products, in new growths, as chondroma, etc. See *Cretefaction*. **C., an'nular,** takes place occasionally in the middle coat of vessels of medium size, causing sometimes total occlusion in them.

Calcifraga, kal-sif'rah-gah (*calx*, stone, *frango*, to break, from supposed power of breaking stone in bladder). Scolopendrium asplenium.

Calcigerous cell, kal-sij'er-us sel (*calx*, *gero*, to bear). See *Tooth*.

Calcigradus, kal-sig'rah-dus (*calx*, heel, *gradus*, step). One who walks on his heels.

Calcii (kal'se-e) **ace'tas.** Calcium acetate. **C. ben'zoas,** calcium benzoate. **C. bro'midum** (Ph. U. S.), calcium bromide. **C. carbo'nas,** calcis carbonas. **C. carbo'nas præcipita'tus** (Ph. U. S.), calcis carbonas præcipitatus. **C. chlo'ridum** (Ph. U. S., Br.), calcis murias. **C. chlorure'tum,** calcis murias. **C. hippu'ras,** calcium hippurate. **C. hy'dras** (Ph. Br.), slaked lime. **C. hypochlo'ris,** chlorinated lime. **C. hypophos'phis** (Ph. U. S.), calcis hypophosphis. **C. io'didum,** calcium, iodide of. **C. lac'tas,** calcium lactate. **C. ox'idum,** calx viva. **C. oxychlorure'tum,** calcis chloridum. **C. phos'phas præcipita'tus** (Ph. U. S.), see *Cornu Cervi*. **C. protochlorure'tum,** calcis chloridum. **C. sul'phas** (Ph. Br.), calcium sulphate. **C. sul'phidum,** calcium sulphide. **C. sul'phis,** calcium sulphite. **C. sulphocar'bolas,** calcium sulphocarbolate. **C. sulphure'tum,** calcis sulphuretum.

Calcination, kal-sin-a'shun (*calx*, lime). Submission to strong heat of an infusible mineral substance so as to deprive it of water, or of any other volatilizable substance entering into its composition, or which we wish to combine with oxygen.

Calcinatum majus poterii, kal-sin-ah'tum mah'jus po-ta're-e. Hydrargyrum præcipitatum.

Calcine, kal'sine. To subject to calcination.

Calcinonia, kal-sin-o'ne-ah. Calcena.

Calcis (kal'sis) **bichlorure'tum.** Calcis chloridum. **C. carbo'las,** carbolate of lime. **C. carbo'nas,** creta. **C. carbo'nas du'rus,** creta, marmor. **C. carbo'nas friab'ilis,** creta. **C. carbo'nas præcipita'tus** or **præcipita'ta,** calcii carbonas præcipitatus (Ph. U. S.), precipitated carbonate of lime, precipitated chalk; same properties as creta præparata, and preferred to it in certain cases, as in tooth-powders, owing to freedom from gritty particles. **C. chlo'ridum,** chloride or chloruret or hypochlorite or chlorite or oxymuriate of lime, calx chlorata (Ph. U. S., Br.), protoxichloruret of calcium, bleaching or Tennant's powder; compound resulting from action of chlorine on hydrate of lime; valuable disinfecting agent. See *Disinfection*. When dissolved in water it has likewise been employed internally and externally in various diseases, as scrofula, fœtor oris, foul ulcers, etc. **C. he'par,** calcis sulphuretum. **C. hy'dras,** slaked lime, see *Calx*. **C. hypochlo'ris,** calcis chloridum. **C. hypophos'phis,** calcii hypophosphis (Ph. U. S.), hypophosphite of lime, calcium hypophosphite, obtained by union of phosphorus with milk of lime and long boiling, during which phosphuretted hydrogen gas is given off, purifying and evaporating. Hypophosphites have been recommended as furnishing phosphorus to the tissues. Dose, one to five grains in syrup. Hypophosphites of sodium, potassium, and ammonium, and of iron, quinia, and manganese, have likewise been used; several of them are officinal (Ph. U. S.). **C. lactophos'phas,** calcium lactophosphate, l. of lime; freshly precipitated phosphate of lime dissolved in free lactic acid; usually given in syrup, teaspoonful of which represents two grains of lactophosphate; dose, dessertspoonful or more; given where phosphorus is indicated. **C. linimen'tum,** lime liniment; see *Linimentum calcis*. **C. liq'uor,** lime-water. **C. mu'rias,** muriate of lime, chloride of calcium. It has been given as tonic, stimulant, etc. in scrofulous tumors, glandular obstructions, general debility, etc. Liquor calcii chloridi or solution of chloride of cal-

cium is officinal (Ph. Br.); dose, from gtt. xxx to fʒj in cupful of water. **C. oxymu'rias,** calcis chloridum. **C. phos'phas,** calcii phosphas præcipitatus (Ph. U. S.), $Ca_3(Po_4)_2$, bone phosphate of calcium, employed in scrofula, mollities ossium, rickets, and chronic phthisis. Dose, gr. x–xxx. **C. sul'phas** (Ph. U. S.), calcium sulphate of lime, plaster of Paris; important surgically as dressing for fractured limbs, etc. on account of its almost insolubility and facility of hardening without change of bulk. **C. sul'phis,** sulphite of lime; see *Sulphurous acid.* **C. sulphure'tum,** sulphuret of lime, calcium sulphide or sulphuret, hydrosulphate of lime; used in solution as bath in itch and other cutaneous affections, and as depilatory. Vleminckx's solution, used in itch and other cutaneous affections, is solution of calcium sulphuret.

Calcitrapa, kal-sit'rah-pah. Centaurea calcitrapa, Delphinium consolida. **C. hippophæs'tum,** Centaurea calcitrapa. **C. stella'ta,** Centaurea calcitrapa.

Calcium (kal'se-um) **a'cetate,** soluble crystalline salt, diuretic and resolvent; also employed in scrofula. **C. ars'enate,** compound of calcium and arsenic acid; three are known. **C. ars'enite,** compound of calcium and arsenious acid. **C. ben'zoate,** white crystalline salt, from boiling benzoic acid in milk of lime; antilithic. **C. bisul'phite,** antizymotic; disinfectant. **C. bo'rate,** powder formed by addition of borax to solution of calcium chloride. **C. broma'tum,** calcium bromide. **C. bro'mide,** $CaBr_2$, white soluble crystalline substance, taste resembling bromide of potassium, though more pungent; the dose is gr. xv–xxx or more; hypnotic and sedative in irritable conditions of nervous system attended with exhaustion. **C. car'bolate,** see *Carbolate.* **C. car'bonate,** calcis carbonas. **C. chino'vicum,** calcium kinovate. **C. chlora'tum,** calcium chloride. **C. chlo'ride,** calcis murias. **C. ci'trate,** compound of calcium and citric acid, formerly used as a diuretic and in nephritis and calculus. **C. flu'oride,** CaF_2, crystalline substance present in bones, in enamel of teeth, mineral water, sea-water, etc. **C. glycerobo'rate,** mixture by fusion of equal parts of C. borate and glycerin. **C. hip'purate,** compound of calcium and hippuric acid, by action of the latter on lime-water; used in affections of the urinary organs, of the liver, ascites, and cutaneous diseases consequent on diseases of the liver. **C. hy'drate,** slaked lime. **C. hydrosul'phide,** $Ca(SH)_2$, gray substance, used as a powerful depilatory. **C. hypochlo'rite** or **hypochloro'sum,** chlorinated lime, calcis chloridum. **C. hypophos'phite,** calcis hypophosphis. **C. hypophosphoro'sum,** calcis hypophosphis. **C. hyposul'phite,** antizymotic. **C. i'odate,** C. iodide. **C. ioda'tum,** C. iodide. **C. i'odide,** prepared by the action of iodide of iron on milk of lime; doses, from 1–3 or 4 grains in phthisis, scrofula, erysipelas; also antiseptic. **C. iodobro'mide,** compound of calcium, iodine, and bromine; used in exophthalmic goitre. **C. kino'vate,** combination of calcium and kinovic acid; used in diarrhœa and dysentery. **C. lac'tate,** used to obtain lactic acid and other lactates. **C. lac'ticum,** calcium lactate. **C. lactophos'phate,** calcis lactophosphas. **C. mu'riate,** calcis murias. **C. ni'trate,** $Ca(NO_3)_2$, white, hygroscopic substance, noticed in places in which animals freely urinate. **C. orthophos'phate,** C. phosphate. **C. ox'alate,** in eight-sided crystals, deposited in urine; see *Calculi, urinary,* and *Oxaluria.* **C. ox'ide,** lime; see *Calx.* **C. oxyda'tum,** calx viva. **C. oxyda'tum hydra'tum,** slaked lime. **C. phos'phate,** calcis phosphas. **C. phosphor'icum,** calcium phosphate. **C., protoxichlo'ruret of,** calcis chloridum. **C. protox'ide,** calx. **C. sacch'arate,** C. sucrate. Three compounds of calcium and saccharic acid are known. **C. sal'icylate,** white, odorless, tasteless powder; employed with bismuth salicylate in diarrhœa of children and inflammation of the stomach and bowels. **C. su'crate,** compound of calcium and saccharose, formed when lime is dissolved in cane-sugar. **C. sul'phate,** calcis sulphas. **C. sul'phide,** calcis sulphuretum. **C. sul'phite,** see *Sulphurous acid.* **C. sulphocar'bolate,** soluble crystalline salt; antiseptic; used in diarrhœa of children, rickets, etc. **C. sul'phuret,** calcis sulphuretum. **C. thioantimo'niate,** $Ca_3(SbS_4)_2$, made by calcining together oyster-shells or chalk, sulphur, and antimony trisulphide; employed in gout, scrofula, rheumatism, etc. **C. thiosul'phate,** C. hyposulphite.

Calcoglobulin, kal-ko-glob'u-lin. Union of salts of calcium with proteid in commencing change to bone.

Calcosubphalangeus minimi digiti, kal-ko-sub-fal-an-je'us min'im-e dij'it-e. Abductor minimi digiti pedis. **C. subphalange'us pol'licis,** abductor pollicis pedis.

Calcotar, kal'ko-tar. Ferri sulphas.

Calculi, kal'ku-le (pl. of **Calculus**; dim. of **Calx,** stone). Concretions in any part of animal body, most frequently in organs acting as reservoirs and in excretory canals. They are met with in tonsils, joints, biliary ducts, digestive passages, lacrymal ducts, mammæ, pancreas, pineal gland, prostate, lungs, salivary, spermatic, and urinary passages, and uterus. They may be owing to deposition of substances composing them from fluid passing along the duct, or product of nutritive irritation. Their solution is generally impossible; spontaneous expulsion or extraction is most practicable way of getting rid of them. **C., al'ternating,** see *Calculi, urinary* (table). **C., al'vine,** calculi of stomach and intestines. **C., arthrit'ic** or **artic'ular,** chalk-stones, gout-stones, nodes; concretions forming in ligaments, and within capsules of joints, in persons affected with gout; composed of uric acid, soda, and some animal matter; rarely, urate of lime and chloride of sodium; see also *Concretions, articular.* **C., au'ral,** ceruminous concretions in external auditory canal. **C., bezoar'dic,** bezoar. **C., bil'iary,** biliary concretions, gallstones, some being nothing more than secretion of bile thickened; greater part are composed of cholesterin, with some coloring matter of bile. Biliary calculi are most frequently found in gall-bladder, *cystic calculi;* at other times, in substance of liver, in branches of ductus hepaticus, *hepatic calculi;* or in ductus communis choledochus, *hepatocystic calculi.* Antiphlogistics when there is inflammatory action, and anæsthetics and strong doses of opium to allay pain and spasm, with warm bath, are chief remedies; olive oil has been used internally as presumed solvent. **C. of blad'der,** C., vesical. **C., blood,** fibrinous concretions in which are traces of blood; see *Pseudo-calculi.* **C., bone-earth,** see *Calculi, urinary* (table). **C., breast,** calculi of mammæ. **C., bron'chial,** calculous concretions in bronchial tube. **C., car'diac,** calcareous fibrinous clots in heart. **C., chalk'y,** concretions of carbonate and phosphate of calcium, etc., found in various organs and regions of the body. **C., com'pound,** see *Calculi, urinary* (table). **C., cor'al,** form of calculus occurring in pelvis of kidney and from casts of the renal pelvis. **C., cuta'neous,** hard cutaneous concretions, generally sebaceous matter, sometimes chalky; milium. **C., cys'tic,** see *Calculi, biliary,* and *C., urinary* (table). **C., cys'tine,** or **cys'tic ox'ide,** yellow, greasy, friable, urinary calculi, made up chiefly of cystine. **C., den'tal,** C., salivary. **C. of ears,** concretions in meatus auditorius externus; merely indurated cerumen, frequent cause of deafness. **C., encys'ted,** vesical calculi in pouch or sac in wall of bladder. **C. enterol'ithi,** enteroliths. **C. fel'lei,** calculi, biliary. **C., fi'brinous,** form of urinary calculi containing coagulated albumin; see *Blood-calculi.* **C. of fis'tulous pas'sages,** see *C., urinary.* **C., fu'sible,** see *Calculi, urinary.* **C. of gall-blad'der,** see *Calculi, biliary.* **C., gas'tric,** C. of stomach. **C. of heart,** C., cardiac. **C., he'mic,** C., blood. **C., hemp'seed,** calcium oxalate calculi in kidney. **C., hepat'ic,** see *Calculi* and *C., biliary.* **C., hep'ato-cyst'ic,** see *Calculi* and *C., biliary.* **C., incar'cerated,** C., encysted. **C., in'digo,** C. of ureter, containing indigo blue. **C. of intes'tines,** calculi of stomach and intestines. **C., joint,** C., arthritic. **C. of kid'ney,** see *Calculi, urinary.* **C., lac'rymal,** concretions in lacrymal passages, where they may occasion abscess and fistulæ. **C., lac'teal,** calculi of

mammæ. **C., lith'ic,** uric-acid calculi; see *Calculi, urinary.* **C., lung,** C., pulmonary. **C. of mam'mæ,** lacteal calculi; concretions of yellowish-white color in excretory ducts of mammary gland. **C., mul'berry,** calcium oxalate calculi; see *Calculi, urinary.* **C., na'sal,** concretions in nasal passages, rhinoliths; see *Dacryolite.* **C., nephrit'ic,** C. of kidney; see *Calculi, urinary.* **C., organ'ic,** C. made up of organic materials, as blood, epithelium, etc. **C., ox'alate of lime,** mulberry calculi, hempseed calculi; see *Calculi, urinary* (table). These are usually rough, and occur in children, oxalate of lime being chief ingredient. **C., pancreat'ic,** C. of pancreatic duct, usually chalky. **C., parot'id,** C. of that gland or duct. **C. of phos'phate of cal'cium** or **lime,** see *Calculi, urinary* (table). **C., phosphat'ic,** C. variously formed of ammonio-magnesium phosphate, calcium phosphate, and ammoniaco-magnesian and calcium phosphate. **C. of pin'eal gland,** sabulous concretions in this gland, composed of phosphate of lime; see *Acervulus.* **C. podag'rici,** arthritic. **C., prepu'tial,** spherical or ovoidal concretions, usually composed of uric acid, formed from urine, when prepuce is long and narrow, between prepuce and glans penis. **C. of pros'tate** or **C., prostat'ic,** symptoms are those common to tumefaction of prostate, sometimes those of calculi in bladder. **C., pros'tato-ves'ical,** C., vesico-prostatic; see *Calculi, urethral.* **C., pul'monary,** lung-stones, lung-calculi, concretions in lung or bronchial tubes met with in dead body, without seeming to have produced unpleasant symptoms during life; or they may have been accompanied with symptoms of phthisis (lithophthisis, phthisis calculosa); see *Lithiasis pulmonum.* They are usually formed mainly of carbonate of lime and animal matter. **C., re'nal,** calculi formed in any part of kidney; see *Calculi, urinary.* **C., sal'ivary,** concretions, usually of phosphate and carbonate of lime and animal matter, developed in substance of salivary glands or their excretory ducts; they may be extracted by incision in interior of mouth. Calculus developed in sublingual ducts has been called sublingual calculus and ranula lapidea. **C., sanguin'eous,** C., blood. **C., scro'tal,** C. of integument of scrotum, C. of bladder or prostate found in scrotum. **C., sem'inal,** C., spermatic. **C., spermat'ic,** concretions found in vesiculæ seminales after death, not detected during life. **C., stercora'ceous,** fecal concretions. **C. of stom'ach and intes'tines,** alvine calculi; calculi of stomach are rare, and are almost always carried thither by antiperistaltic action of intestines; symptoms are those of chronic gastritis. Intestinal concretions are not uncommon in animals (see *Bezoard*), but are rare in man; they are fetid and formed, ordinarily, between valvulæ of small intestines or in cells of large or old herniæ, and are generally evacuated *per anum.* **C., sublin'gual,** salivary concretions of sublingual gland; ranula. **C., subprepu'tial,** C., preputial. **C. of ton'sils,** calculous concretions occasionally formed in tonsils; sometimes discharged by spitting, either alone or with pus of abscess occasioned by them. **C., trip'le** or **trip'le phos'phate,** see *Calculi, urinary.* **C., ureter'ic,** C. in ureter; see *Calculi, urinary.* **C., ure'thral,** C. in urethra, but usually formed in bladder or kidney; see *Calculi, urinary.* **C., u'ric,** see *Calculi, urinary* (table). **C., u'rinary,** concretions form from crystallizable substances in urine, met with in whole course of urinary passages and in fistulous openings wherever urine stagnates naturally or accidentally; more common at two extremities of life and in some countries and districts; at times, clot of blood, portion of mucus, etc. form a nucleus. Symptoms and treatment vary according to seat of calculus; there is no such thing, probably, as a medical solvent. See *Urinary calculi.*

The most important varieties of urinary calculi, produced by combination or intermixture of different ingredients, may be thus tabulated:

TABULAR VIEW OF DIFFERENT SPECIES OF URINARY CALCULI.

SPECIES OF CALCULI.	EXTERNAL CHARACTERS.	CHEMICAL COMPOSITION.	REMARKS.
1. LITHIC or URIC.	*Form*, a flattened oval. S. g. generally exceeds 1.500. *Color*, brownish or fawn-like. *Surface*, smooth. *Texture*, laminated.	It consists principally of *uric acid.* When treated with nitric acid, a beautiful pink substance results. This calculus is slightly soluble in water, abundantly so in the pure alkalies.	It is the prevailing species, but the surface sometimes occurs finely tuberculated. It frequently constitutes the *nuclei* of the other species.
2. MULBERRY.	*Color*, dark brown. *Texture*, harder than that of the other species; s. g. from 1.428 to 1.976. *Surface*, studded with tubercles.	It is *oxalate of calcium*, and is decomposed in the flame of a spirit-lamp, swelling out into a white efflorescence, which is *quicklime.*	This species includes some varieties which are remarkably smooth and pale-colored, resembling *hempseed.*
3. BONE-EARTH.	*Color*, pale brown or gray. *Surface*, smooth and polished. *Structure*, regularly laminated; the laminæ easily separating into concrete crusts.	Principally *phosphate of calcium.* It is soluble in muriatic acid.	
4. TRIPLE.	*Color*, generally brilliant white. *Surface*, uneven, studded with shining crystals, less compact than the preceding species. Between its laminæ small cells occur, filled with sparkling particles.	It is an *ammonio-magnesium phosphate*, generally mixed with phosphate of calcium. Pure alkalies decompose it, extracting its ammonia.	This species attains a larger size than any of the others.
5. FUSIBLE.	*Color*, grayish-white.	A compound of the two foregoing species.	It is very fusible, melting into a vitreous globule.
6. CYSTIC.	Very like the triple calculus, but it is unstratified and more compact and homogeneous.	It consists of *cystic oxide.* Under the blowpipe it yields a peculiarly fetid odor. It is soluble in acids and in alkalies, even if they are fully saturated with carbonic acid.	It is a rare species.
7. ALTERNATING.	Its section exhibits different concentric laminæ.	Compounded of several species, alternating with each other.	
8. COMPOUND.	No characteristic form.	The ingredients are separable only by chemical analysis.	

Chemists have demonstrated the existence of several components of urinary calculi, viz., uric acid, urates of ammonium, sodium, potassium, and magnesium, xanthic oxide, cystine, calcium oxalate, calcium and magnesium carbonates, ammoniaco-magnesium phosphate, phosphates of calcium, magnesium, and iron; mucus, nitrogenized matters, modified blood; coloring matters; silica, mica, oxide of iron, and different foreign bodies; urea, benzoate of ammonium, oxalate of ammonium, ammonium chloride, and other immediate principles of the urine.

1. *Renal calculi.* Have very irregular shape; at times no indication of their presence; at others, occasion attacks of pain in the kidneys, sometimes accompanied by bloody or turbid urine. Often they cause inflammation. Generally formed of uric acid or oxalate of lime, or phosphates with animal matter. Treatment varies with presumed constituents and absence or presence of inflammatory signs—relieving the irritation by opiates. Surgical operation is rarely applicable.

2. *Calculi of the ureters.* These come from the kidneys, and produce unpleasant effects when so large as to obstruct the course of the urine and occasion distension of the ureters, or when the rough surface irritates the mucous membrane and occasions pain, hemorrhage, abscesses, etc. Pain during the passage is very violent, extending, at times, to the testicle of the same side, and occasioning numbness of the thigh. Treatment consists in general or local bloodletting, warm bath, and opiates.

3. *Vesical calculi, stone in the bladder*, are the most common form, sometimes proceeding from the kidneys. most commonly formed in the bladder itself. Sense of weight in perineum, and sometimes of body rolling when patient changes position; pain or itching at extremity of glans in men; frequent desire to pass urine; sudden stoppage to its flow, and bloody urine, are the chief phenomena, producing suspicion of their existence. We cannot be certain without sounding the patient. Sometimes, when of small size, they are expelled; most commonly they remain in the bladder, disorganization of which they occasion unless removed by surgical operation.

4. *Urethral calculi* almost always proceed from the bladder. The obstruction they cause to passage of urine, hard tumor, and noise occasioned when struck by the sound, indicate their presence. They are removed by incision. They form, at times, in the prostate gland, *prostatolithi.* Prostatic calculus may project into the urethra, and thus assist to form *prostatovesical calculus.*

5. *Calculi of fistulous passages* arise when there is fistulous opening into the urethra. They may generally be extracted with facility.

Cal'culi of the u'terus are very rare; the signs indicating them during life are those of chronic engorgement. Their existence is not usually suspected. **C., ve'nous**, vein-stones, phleboliths. **C., ves'ical**, see *C., urinary.* **C., ves'ico-prostat'ic**, see *C., urinary.* **C., xanth'ic, xanth'in**, or **xanth'ic oxide**, occasional form of greasy calculus, composed of xanthin and hypoxanthin.

Calculifragus, kal-ku-lif'rag-us (*calculus, frango*, to break). Lithontriptic.

Cal'culoid. Resembling calculus.

Cal'culous. Relating to, or affected with, calculus. **C. ox'ide**, oxide, cystic.

Calculus, kal'ku-lus. See *Calculi.*

Caldamentum, kal-dah-men'tum. Fomentation.

Caldarium, kal-dah're-um (*calidus*, hot). Hot bath. Hot chamber of Roman bath. See *Stove.*

Calea (kal'e-ah) **Zacatechichi.** Mexican plant, given in infusion as tonic and antiperiodic.

Calefacients, kal-e-fa'se-ents (*calidus*, warm, *facio*, to make). Substances exciting warmth in part to which they are applied, as mustard, pepper, etc. They belong to class of stimulants.

Calefactio, kal-e-fak'she-o. Augmentation of heat in the animal economy, evinced by sensation of heat, disposition to perspiration, great thirst, general indisposition, flushed countenance, etc. Treated by antiphlogistics and abstinence. Constipation; gonorrhœa; chafing. **C. vir'gæ**, chancre.

Caleidophone, kal-i'do-fon (*kalos*, beautiful, *phone*, sound). Instrument for making visible the vibrations essential to production of sound.

Calendula alpina, kal-en'du-lah al-pe'nah. Arnica montana. **C. arven'sis**, wild marigold; juice has been given in jaundice and cachexia. **C. officina'lis**, single or garden marigold. Flowers (*Calendula*, Ph. U. S.) and leaves are aperient, diaphoretic, and have been used in cancer. **C. palus'tris**, Caltha palustris.

Calendulæ martiales, kal-en'du-le mar-she-a'les. Ferrum ammoniatum.

Calendulin, kal-en'du-lin. Amorphous principle from Calendula officinalis.

Calentura, kal-en-tu'rah (*caleo*, to be warm). Fever; tropical fever; sunstroke; species of delirium affecting sailors in torrid zone, a variety of phrenitis. **C. amaril'la**, yellow fever. **C. contin'ua**, synocha.

Calentu'ras. Cinchona tree of Philippine Isles, bitter and febrifuge. **C. palo**, fever-wood; cinchona and trees with similar properties.

Cal'euture. Calentura.

Calf. Round posterior portion of leg; sura. **C. kill**, Kalmia latifolia. **C. knee**, entogonyancon. **C. of leg**, sura.

Calf's foot. Arum maculatum.

Calibre, kal'ib-er. Diameter; lumen.

Calices, kal'is-ees (pl. of **Calyx**). See *Calix.*

Calico (kal'ik-o) **bush.** Kalmia latifolia.

Calidarium, kal-id-ah're-um. Stove; hot chamber of Roman bath.

Calidum, kal'id-um (*calidus*, warm). Hot. **C. anima'le**, animal heat. **C. inna'tum**, animal heat, vital heat.

Califor'nia lau'rel. Umbellaria Californica, of Western U. States; leaves are used in nervous headaches, neuralgia, etc.

Califor'nin. Bitter principle from Quina Californica.

Caligatio, kal-ig-ah'she-o (*caligo*, mist). Dazzling; cloudiness of front part of crystalline lens.

Cali'go (mist). Obscurity of vision; opaque cornea. **C. cor'neæ**, obscurity of vision due to speck on cornea; the speck itself. **C. humo'rum**, obscurity from opacity of humors. **C. len'tis**, cataract. **C. à pacheablepharo'si**, pacheablepharosis. **C. palpebra'rum**, opacity in region of eyelids. **C. pupil'læ**, closure of pupil; synezisis. **C. synezi'sis**, synezisis. **C. tenebra'rum**, night-blindness; hemeralopia.

Cal'ipers. Callipers.

Calisaya, kal-is-a'yah. Name of several species of cinchona; cinchona bark. **C. bark**, yellow cinchona bark, source of quinine; Cinchonæ cordifoliæ cortex.

Calisthenics (kal-is-then'iks) or **Callisthen'ics** (*kalos*, beautiful, *sthenos*, strength). Art of promoting, by appropriate exercises, strength of body and grace of movements.

Calix (kal'iks) or **Cal'yx** (*kalux*, cup). Small cup-like membranous canals surrounding papillæ of kidney and opening into its pelvis, whither they convey urine; cavity left on ovary by rupture of Graafian vesicle. **C. vomito'rius**, emetic goblet made of antimony, which produces emetic effect when water is added.

Calla palustris, kal'lah pa-lus'tris. Water arum; indigenous; rhizome is stimulant, expectorant, and diaphoretic. **C. Virgin'ica**, Peltandra Virginica.

Calliblepharum, kal-le-blef'ar-um (*kallos*, beauty, *blepharon*, eyelid). Agent for beautifying the eyelids.

Callicanthus, kal-le-kan'thus. Calycanthus.

Callicarpa (kal-le-kar'pah) **acumina'ta** (*kallos*, beauty, *karpos*, fruit). Order Verbenaceæ; purgative. **C. America'na**, French mulberry; indigenous; eutrophic in cutaneous diseases; used in dropsy. **C. Bonplandia'na**, species of verbenaceous plants of S. America, diaphoretic and cathartic. **C. ca'na**, E. Indian species; leaves are diaphoretic and diuretic. **C. lana'ta**, shrub of India; bark is aromatic, bitter, and

leaves are diuretic and emollient. **C. rheed'ii**, species growing in Malabar, root and bark of which are used in fevers, diseases of the liver and skin. **C. tomento'sa**, C. lanata, C. cana.

Callicocca (kal-le-kok'kah) **eveas** or **ipecacuanha**, ip-e-kak-u-an'hah (*kallos*, beauty, *kokkos*, berry). Ipecacuanha.

Callicore, kal-lik'or-e (*kallos*, beauty, *kore*, virgin). Pupil of the eye. Amaryllis.

Callicreas, kal-lik're-as (*kallos*, beauty, *kreas*, flesh). Pancreas.

Callionymos, kal-le-on'im-os (*kallos*, beauty, *onoma*, name). Convallaria maialis.

Callipædia, kal-le-pa'de-ah (*kallos*, beauty, *pais*, child). Art of begetting beautiful children.

Callipers, kal'ip-urz. Instrument for measurement of pelvis, chest, etc. **C. of Baudelocque**, see *Pelvimeter*.

Calliphyllum, kal-le-fil'lum (*kallos*, beauty, *phullon*, leaf). Asplenium trichomanoides, adiantum.

Callipygos, kal-lip'ig-os (*kallos*, beauty, *puge*, buttocks). Cognomen of Venus, from her beautiful nates.

Callisen's operation, kal'lis-en's op-ur-a'shun. See *Colotomy*.

Callisthenics, kal-lis-then'iks. Calisthenics.

Callitriche aquatica, kal-lit'rik-e ah-kwat'ik-ah (*kallos*, beauty, *thrix*, hair). C. verna. **C. heterophyl'la**, C. verna. **C. interme'dia**, C. verna. **C. ver'na**, *Water chickweed, Water starwort;* indigenous; diuretic, used in dropsy.

Callitris Eckloni, kal'lit-ris ek-lo'ne (*kallos*, beauty). African tree from which gum exudes, used in fumigation in gout, rheumatism, œdema, etc. **C. quadrival'vis**, tree of N. Africa, source of gum sandarac.

Callomania, kal-lo-man'e-ah (*kallos*, beauty). Mania in regard to beauty.

Calliosal, kal-lo'sal. Relating to corpus callosum; term applied to convolution of brain. **C. gy'rus**, convolution or gyrus of corpus callosum.

Cal'lose. Callous.

Callositas, kal-los'it-as. Induration. **C. palpebra'rum**, scleriasis. **C. vesi'cæ**, enlargement of the bladder. See *Cystauxe*.

Callosity, kal-los'it-e (*callus*, hard). Hardness, induration, and thickness of skin, assuming horny consistence in places where exposed to pressure. Induration of old wounds, old ulcers, fistulous passages, etc. See *Tylosis, Tyloma, Keratoma*.

Calloso-marginal, kal-lo'so-mar'jin-al. Relating to corpus callosum and margin of hemispheres of brain, as *calloso-marginal fissure* or *sulcus*, fissure on middle of cerebral hemispheres.

Callous, kal'lus (*callus*, hard). That which is hard or indurated.

Calluna (kal-lu'na) **Atlant'ica, eri'ca,** or **vulga'ris** (*kalluno*, to adorn). Erica vulgaris.

Callus, kal'lus. Osseous matter thrown out between fractured extremities of bone, acting as a cement and as a new bony formation; callosity. **C., defin'itive**, C., permanent. **C., ensheath'ing** or **exter'nal**, C., provisional. **C., inter'nal** or **inte'rior**, provisional callus in medullary canal of the brain after fracture. **C., per'manent**, callus deposited between extremities of fractured bone, afterward converted into new bone. **C., provis'ional** or **tem'porary**, callus deposited around fracture and in course of medullary canal, keeping fragments in apposition until union has occurred; it is then absorbed. Direct union between fragments may take place, as in soft parts, provisional callus—ensheathing callus of Paget—not being thrown out unless there has been some movement of the fragments.

Calm'ative. Quieting; sedative.

Calomba, kal-om'bah. Calumba.

Calomel, kal'o-mel (*kalos*, beautiful, *melas*, black). Term formerly applied to æthiops mineral; now applied to mild chloride of mercury only, mercurous chloride, Hg_2Cl_2. See *Hydrargyri chloridum mite*. **C., i'odide of**, mercury, iodide of chloride of. **C. stools**, green, spinach-like evacuations occasioned by use of calomel. **C. va'por**, see *Hydrargyri chloridum mite*. **C., veg'etable**, resin of podophyllum.

Calomelas, kal-om'el-as. Calomel.

Calonia, kal-o'ne-ah. Myrrh.

Calophyllum (kal-o-fil'lum) **cala'ba** (*kalos*, beautiful, *phullon*, leaf). Tree of W. Indies and S. America; source of ocuje oleoresin, used as substitute for balsam of Peru and copaiva; expectorant, excitant, and diaphoretic, in gonorrhœa, bronchitis, etc. **C. inophyl'lum**, see *Fagara octandra*.

Calor, ka'lor. Heat. **C. anima'lis**, animal heat. **C. fer'vens**, temperature of boiling water. **C. mor'dax** or **mor'dicans**, intense heat of skin; internal heat. **C. nati'vus**, animal heat.

Caloric, kal-or'ik, heat.

Caloricity, kal-or-is'it-e. Faculty possessed by living bodies of generating sufficient caloric to enable them to resist atmospheric cold and to preserve a temperature nearly equal. Animal heat.

Calorifacient (kal-or-if-a'she-ent) or **Calorif'iant** (*calor, facio*, to make). Having power of producing heat.

Calorific, kal-or-if'ik. Producing heat.

Calorification, kal-or-if-ik-a'shun. Function of producing heat in organized bodies.

Calorimetry, kal-or-im'et-re (*calor*, heat, *metron*, measure). Measurement of amount of heat in a body, or specific heat.

Calorineses, kal-or-in-a'ses. Diseases characterized by sensible change in amount of animal heat.

Caloripuncture, kal-or-e-punk'ture. Puncture with needle at high heat.

Calory, kal'or-e. See *Heat*.

Calosanthes Indica, kal-os-an'thees in'dik-ah. Tree of E. Indies; diaphoretic; used in rheumatism.

Calotropis gigantea (kal-ot'ro-pis jig-an'te-ah) or **muda'rii** (*kalos*, beautiful, *tropis*, keel). Mudar. **C. Hamilto'nia** or **heterophyl'la**, C. procera. **C. proce'ra**, tree of India and Africa, yielding mudar bark; diaphoretic, expectorant, and used as substitute for ipecac.

Caltha alpina, kal'thah al-pe'nah (*calathus*, basket). Arnica montana. **C. arven'sis**, Calendula arvensis. **C. bish'ma** or **bis'mah**, species of N. India, root of which is febrifuge. **C. lute'ola**, Calendula officinalis. **C. ma'jor** or **marsh**, C. palustris. **C. monta'na**, Arnica montana. **C. officina'lis**, Calendula arvensis. **C. palus'tris**, *Marsh marigold, Marsh caltha, Cowslips, Meadow bright, Water buttercup;* indigenous; syrup prepared from it for cough. **C. sati'va** or **vulga'ris**, Calendula officinalis.

Cal'trap or **Caltrops**, kal'trops. See *Trapa natans*.

Calumba, kal-um'bah. Called also *Colombo, Calomba, Colomba, Columbo, Calumbo*. Root of Jateorrhiza palmata and of J. calumba (Ph. U. S.), Cocculus palmatus, ord. Menispermaceæ; indigenous in Mozambique; bitter aromatic tonic. Dose, gr. x to ʒj in powder. Crystallizable principle obtained from it is called *calombin;* another principle in it seems identical with berberina. **C., Amer'ican**, American or Marietta columbo, *Indian lettuce, Yellow gentian, Golden seal, Meadow pride, Pyramid*. Root, frasera, is used in the same cases as true calumba.

Calumbæ radix, kal-um'be rad'iks. Calumba.

Calumbic acid, kal-um'bik as'id. Bitter principle from calumba, $C_{22}H_{24}O_7$.

Calumbin, kal-um'bin. Neutral principle of calumba, $C_{42}H_{44}O_{14}$.

Calva, kal'vah (*calvus*, bald). Cranium, upper part especially; skull-cap, vault of cranium.

Calvaria, kal-vah're-ah. Cranium proper; calva.

Calva'rium. Calvaria.

Calvata, kal-vat'ah. Calvities. **C. ferramen'ta**, surgical instruments with smooth head or button.

Calvities, kal-vish'e-ees (*calvus*, bald). Baldness; absence of hair, particularly at top of and at back of the head. Alopecia. **C. adna'ta**, baldness when congenital. **C. palpebra'rum**, loss of eyelashes. Madarosis.

Calvitium, kal-vish'e-um. Calvities.

Calvity, kal'vit-e. Calvities.

Calvus, kal'vus (bald). Devoid of hair; athrix.

Calx, kalks. Protoxide of calcium; lime. Lime employed in pharmacy should be recently prepared by calcination. When water is sprinkled over caustic lime, we have slaked lime, hydrate of lime, calcis hydras. Heel; see *Calcaneum*. **C. bismu'thi**, bismuth subnitrate. **C. chlora'ta** (Ph. U. S. and Br.), calcis chloridum. **C. chlorina'ta**, calcis chloridum. **C. extinc'ta**, slaked lime. **C. cum ka'li pu'ro**, potassa cum calce. **C. oxymuriat'ica**, calcis chloridum. **C. re'cens**, calx viva. **C. sacchara'tum**, see *Syrupus calcis*. **C. sali'ta**, calcis murias. **C. sulphura'ta** (Ph. U. S. and Br.), sulphurated lime; used as a depilatory. **C. e tes'tis**, lime prepared from shells; has no medicinal advantages over that from marble. **C. us'ta** or **vi'va**, lime or quicklime. External operation of calx viva is escharotic. Lime is a good disinfecting agent; employed internally in liquor calcis.

Calycanthus, kal-ik-an'thus (*kalux*, flower-cup, *anthos*, flower) **flor'idus** or **fra'grans**, *Carolina allspice, Sweet-scented shrub, Sweet shrub*. Indigenous plant; root is tonic and emetic and an aromatic stimulant. Active principle is alkaloid called *Calycanthine*.

Calyces, kal'is-es (pl. of **Calyx**). See *Calix*.

Calyciform (kal'is-e-form) or **Cal'ycoid.** Calyx- or cup-shaped.

Calymma, kal-im'mah (covering). Eyelid; vault of skull.

Calyptranthes caryophyllata, kal-ip-tran'thes kah-re-o-fil-lat'ah (*kaluptra*, veil, *anthos*, flower). Myrtus caryophyllata.

Calystegia sepium, kal-is-tej'e-ah se'pe-um (*calyx, stege*, covering). Convolvulus sepium. **C. reniform'is**, Convolvulus soldanella. **C. soldanel'la**, Convolvulus soldanella.

Calyx, kal'iks. Calix. Ovisac.

Camara, kam'ar-ah (vaulted room). Calva; fornix of brain; hollow part of external ear.

Camarated, kam'ar-a-ted. Having shape of an arch or dome, as the skull.

Camaratio, kam-ar-ah'she-o. Camarosis.

Camarosis (kam-ar-o'sis) or **Camaro'ma** (*kamara*, vaulted room). Species of fracture of skull, camerated fracture, in which the fragments form a vault, with base resting on the dura mater.

Camassia esculenta, kam-as'se-ah es-ku-len'tah. *Camass, kamas*, or *quamash root, Bread root*. Prairie turnip; used as food by some tribes of Indians. **C. Frase'ri**, species of United States with large edible bulb.

Cama'tos. Exhaustion, debility, disease.

Çambaib'a. Curatella sambaiba.

Cam'bery. Myrtus pimenta.

Cam'bie-leaf. Nymphæa alba, N. lutea.

Cam'bing. Tree of Molucca, from bark of which gum-resin exudes; used in dysentery. Resembles simarouba.

Cambium, kam'be-um. Protoplasm; layer of periosteum adjacent to the bone.

Cam'boc. Aloes.

Cambodia (kam-bo'de-ah) or **Cambo'dium.** Cambogia.

Camboge, kam'boje. Cambogia.

Cambogia, kam-bo'je-ah (from Cambodia, in E. Indies). Camboge or gamboge, ord. Guttiferæ. Yellow juice obtained from Hebradendron Cambogioïdes and other plants of natural family Guttiferæ. According to the U. S. and Br. Pharmacopœias, it is derived from Garcinia Hanburii. Drastic cathartic, emetic, and anthelmintic; used in visceral obstructions and dropsy, and wherever powerful hydragogue cathartic is required. Dose, gr. ij–vj, in powder, united with calomel, squill, etc. **C. gut'ta**, Garcinia cambogia.

Cambogic acid, kam-bo'jik as'id. Yellowish soluble acid obtained from camboge.

Cambo'gium. Camboge.

Cam'buc. Aloes.

Cambuca (kam-bu'kah) or **Cambuc'ca.** Bubo and venereal ulcer in the groin or near the genital organs.

Camelina sativa, kam-el-e'na sat-e'vah. Grows in Europe and Asia; expressed oil of the seeds is like linseed oil, and is emollient in skin diseases; the herb has been used in inflammation of the eye.

Camellia thea (kam-el'le-ah the'ah) or **theifera**, the-if'er-ah. Thea Chinensis, tea plant; other species of camellia are sources of other teas.

Camera, kam'er-ah. Chamber, fornix, vault, camara. **C., ante'rior**, anterior cornu. **C. arterio'sa**, right ventricle of heart. **C. cor'dis**, pericardium. **C. cra'nii**, calva. **C. medulla'ris**, centrum ovale. **C. oc'uli**, chamber of the eye. **C. o. ter'tia**, canal of Petit. **C. sep'ti lu'cidi**, fifth ventricle of brain.

Cameræ, kam'er-e (pl. of **Camera**). Chambers, as *C. oc'uli*, chambers of the eye. **C. cerebel'li**, inferior occipital fossæ.

Cameratio, kam-er-ah'she-o. Camarosis.

Camforosma, kam-for-oz'mah. Camphorosma.

Camin'ga. Canella alba.

Camisia fœtûs, kam-is'e-ah fe'tus (fœtal shirt). Chorion.

Camisole (F.), kam'is-ole. Straight jacket for restraining violently insane or delirious persons.

Cam'omele. Chamomile.

Camomile, kam'o-mile. Chamomile.

Camotes, kam-o'tes. Convolvulus batatas.

Camp fever, kamp fe'vur. See *Fever, camp*. **C. mea'sles**, see *Rubeola*.

Campanula, kam-pan'u-lah (dim. of **Campana**, bell). Bellflower. **C. glomera'ta**, species of Europe and Asia, leaves of which are used in throat inflammations. **C. Ind'ica**, Convolvulus purpureus. **C. trache'lium**, Canterbury bell or throatwart, astringent, and used in decoction in relaxation of the fauces.

Campe, kam'pe. Flexion.

Campeachy wood. Hæmatoxylon.

Camper (kam'pur), **an'gle of.** Maxillary angle, formed by lines drawn from incisor teeth to prominent point of forehead above and point of chin below. **C.'s lig'ament**, deep perineal fascia. **C., plane of**, plane passing through centres of both auditory meatuses and centre of lower border of anterior aperture of nose. **C.'s profile line**, middle line in plane tangent to most conspicuous points of the face, above and below.

Camphene, cam-feen'. Radical of camphor. Camphene or camphine is represented by pure oil of turpentine. That which is occasionally used therapeutically is oil of turpentine purified by distillation from solution of caustic potassa.

Camphire, kam'fir. Camphor.

Camphol, kam'fol. See *Camphor*.

Campholurethane, kam-fol-u-re'thane. Two isomeric bodies derived from Ngai camphor; crystalline acid having composition of urethanes.

Camphor, kam'for (Arab. *caphur* or *kamphur*). Laurinole; Chinese camphor. Concrete volatile oil or stearoptene ($C_{10}H_{16}O$), distilled from Laurus camphora, Persea camfora, Camphora officinarum, Cinnamomum camphora (Ph. U. S. and Br.), trees of E. Indies, order Laurineæ. Two kinds of crude camphor occur in commerce—one from Batavia, but chiefly produce of Japan, called Dutch camphor and Japan camphor; the other common crude camphor, China camphor, Formosa camphor, from India. It is refined by sublimation. Camphor is also obtained in Borneo and Sumatra—Borneo or Sumatra camphor—from Dryobalanops camphora. Camphor has a strong and fragrant odor; is volatile, not easily pulverizable; texture crystalline; soluble in alcohol, ether, oils, vinegar, and slightly so in water. It is stimulant, anodyne, antaphrodisiac, antispasmodic, diaphoretic, and sedative. Dose, gr. v to xx. Dissolved in oil or alcohol, it is applied externally in rheumatic pains, bruises, sprains, etc. In large doses it is a narcotico-irritant poison. Camphor oil or liquid camphor, camphol, of India, is obtained by piercing young camphor trees, Dryobalanops camphora. *Oleum camphoræ*, oil of camphor, is a volatile oil obtained from Camphora officinarum. **C., birch**, betulin. **C., Bor'neo**, borneol ($C_{10}H_{18}O$), white substance produced from Dryobalanops aromatica by chemical action; used in Eastern Asia for medicinal purposes and for embalming, etc. **C., bro'mide of,**

brom'ized, or **monobrom'ated**, white or colorless crystalline substance, insoluble in water, soluble in alcohol and ether, formed by acting upon camphor, heated on water-bath, with bromine. Dose, gr. ij–iv, in delirium tremens and analogous nervous diseases. **C., car'bolized**, germicidal liquid, prepared by adding 1 part by weight of carbolic acid to 3 parts of camphor. **C. ce'rate**, ceratum camphoræ. **C., i'odized**, combination of iodine and camphor, employed as substitute for inhalation of iodine alone. **C. ju'lep**, mistura camphoræ. **C. lau'rel**, Cinnamomum camphora. **C. lin'iment**, linimentum camphoræ. **C. mix'ture**, mistura camphoræ. **C. monobro'mide**, camphor, bromide of. **C. oil**, yellowish-brown oil found in all parts of camphor tree. **C. o. of Bor'neo**, volatile brownish oil derived from Dryobalanops aromatica. **C. oint'ment**, unguentum camphoratum. **C. tea**, solution made by pouring boiling water on lump of camphor. **C. wa'ter**, aqua camphoræ.

Camphora, kam'fo-rah. Camphor. **C. broma'ta** or **monobroma'ta** (Ph. U. S.), camphor, bromized. **C. officina'rum**, camphor. **C. thy'mi**, thymol.

Camphoraceous, kam-fo-ra'she-us. Relating to or containing camphor.

Camphorata hirsuta, kam-fo-rat'ah hur-su'tah, and **C. Monspelien'sium**. Camphorosma Monspeliaca.

Camphorated, kam'for-at-ed. Relating to camphor; containing camphor. **C. phe'nols**, combination of camphor with phenols, as thymol, resorcin, salol, etc.

Camphorates, kam'for-at-es. See *Acid, camphoric.*

Camphoric acid, kam-for'ik as'id. See *Acid, camphoric.*

Camphorosma (kam-for-oz'mah) (*camphor*, *osme*, odor) **hirsu'ta**, **Monspeli'aca**, **Monspelien'sis**, or **peren'nis**. *Hairy camphorosma, Stinking ground pine*, ord. Chenopodiaceæ; this plant, growing near the Mediterranean, has odor of camphor; is diuretic, carminative, emmenagogue, diaphoretic, cephalic, antispasmodic; it is used in dropsy and asthma.

Camphura, kam'fur-ah. Camphor.

Cam'phyl al'cohol. Camphorated alcohol, spirits of camphor.

Campimeter, kamp-im'et-ur. Instrument for measuring range of vision.

Campion (kam'pe-on) **rose.** Lychnis githago.

Campomanesia linearifolia, kam-po-man-a'ze-ah lin-e-ar-e-fo'le-ah (after Campomanes, Spanish naturalist). Tall tree of Peru, whose bright yellow fruit, palillo, has an exceedingly agreeable scent and is edible.

Campsis, kamp'sis. Forcible bending by bone or cartilage from proper shape without breaking; unnatural curvature of a part, as a limb. **C. depres'sio**, depression.

Campyle, kam'pil-e. Curvature.

Campylochei'rus or **Campylochi'rus** (*kampule*, curvature, *cheir*, hand). Crookedness of the hands or arms.

Campylorrhachis, kam-pil-or'rak-is (*kampulos*, crooked, *rhachis*, spine). Monster whose spine is crooked.

Campylorrhinus, kam-pil-or-rhe'nus (*kampulos*, crooked, *rhis*, nose). Monster whose nose is crooked.

Compyloscelus, kam-pil-os'sel-us (*campyle*, *skelos*, leg). Having crooked or deformed legs.

Campylotes, kam-pil-ot'es (*campyle*, curvature). Curvature, crookedness.

Campylotis (kam-pil'ot-is) or **Campylum**, kam'-pil-um (*kampulotes*, flexion). Cataclasis.

Cana agria, kahn'ah ag're-ah. Bitter cane; juice used in Brazil in diabetes. **C. fis'tula**, Cassia fistula.

Canabis, kan'ab-is. Cannabis.

Can'ada bal'sam. Turpentine from Abies balsamea. **C. Bur'net**, Sanguisorba Canadensis. **C. erig'eron**, Erigeron Canadense. **C. flea'bane**, Erigeron Canadense. **C. pitch**, Pix Canadensis. **C. snakeroot**, root of Ararum Canadense.

Canadol, kan'ad-ol. Hydrocarbon from petroleum, resembling rhigolene; local anæsthetic.

Canal, kan-al'. Channel for affording passage to liquids, or solids, or to certain organs. See *Canales, Canaliculi, Canaliculus*, and *Canals.* **C., abdom'inal**, inguinal canal. **C., alimen'tary**, *Digestive canal* or *tube, Alimentary duct* or *tube;* canal extending from the mouth to the anus. According to Vierordt, the digestive canal is, on an average, 8 m. in length, in proportion of 5 : 1 to the length of the body—

Of adults	10–11.5 m. (Schwann).
Of new-born children	4.5 m. "
Length of duodenum (12″) (convex side).	32 cm.
Length of jejunum ($\frac{2}{5}$)	5.5–6.2 m.
" " ileum ($\frac{3}{5}$)	
" " large intestine	130–162 cm.
" " cæcum	6–8 m.
" " rectum	16 cm.

C., alisphe'noid, canal in alisphenoid bone for passage of external carotid artery. **C., alveoden'tal**, dental canals. **C., alve'olar**, inferior dental canal. **C., arach'noid**, canal formed by extension of arachnoid over transverse and longitudinal fissures of brain, surrounding vena magna Galeni; orifice of canal has been termed *foramen of Bichat*, but this opening is probably made artificially in act of removing the brain. **C. of Aran'tius**, ductus venosus. **C., arte'rial**, ductus arteriosus. **C., aud'itory**, see *C., external auditory*, and *C., internal auditory.* **C., auric'ular**, external auditory canal; canal in fœtus between the auricle and ventricle. **C. of Bar'tholin**, ductus Bartholinus. **C. of Bi'chat**, C., arachnoid. **C., bil'iary**, hepatic duct. **C. of Botal**, ductus arteriosus. **C. of Bres'chet**, venous channels in diploë of skull. **C., bulbular, of Petit**, C. of Petit. **C., carot'id**, canal in petrous bone for internal carotid artery. **C., cen'tral**, medullary canal. **C., cer'vical**, canal of cervix uteri. **C., cer'vico-u'terine**, uterine canal. **C., chol'edoch**, choledoch duct; bile-duct. **C., chor'dæ tym'pani**, canal for passage of chorda tympani nerve. **C., cil'iary**, ciliary canal. **C. of Cloquet**, hyaloid canal. **C., coch'lear**, spinal canal of cochlea. **C., con'dyloid**, condyloid foramen. **C., connect'ing**, coiled portion of uriniferous tubule. **C. of Cor'ti**, canal formed by arches of Corti and basilar membrane. **C. of Cotun'nius**, aquæductus vestibuli. **C., cru'ral**, see *Crural.* **C., cu'bital**, passage for ulnar vessels at bend of elbow. **C. of Cu'vier**, ductus venosus; cardinal vein. **C., cys'tic**, see *Gall-bladder.* **C. def'erent**, deferens vas. **C., den'tal**, inferior dental canal. **C., den'tinal**, calcigerous tubes or canaliculi of dentine. **C., digest'ive**, alimentary canal. **C., ejac'ulatory**, ejaculatory duct. **C. of epidid'ymis**, convoluted duct forming epididymis. **C., Eustach'ian**, canal in petrosal bone containing part of Eustachian tube. **C., extern'al aud'itory**, canal leading from auricle to membrana tympani. **C., fa'cial**, aqueduct of Fallopius. **C., Fallo'pian**, aqueduct of Fallopius; oviduct. **C., fem'oral**, inner part of sheath of femoral vessels. **C. of Ferrein'**, canal between edges of closed lids and globe of eye. **C. of Fonta'na**, ciliary canal. **C., galactoph'orous**, lactiferous tubule of mammary gland. **C. of Gärtner**, see *Gärtner.* **C., Guidi's**, Vidian canal. **C. of Hav'ers**, see *Haversian.* **C. of Hen'le**, H.'s loop-tubes; urinferous tubules. **C., hepat'ic**, hepatic duct. **C. of Ho'vius**, C. of Fontana. **C. of Hu'guier**, small canal at inner side of fissure of Glaser, through which chorda tympani nerve leaves cavity of tympanum. **C., Hun'ter's** (after John Hunter), aponeurotic membrane, consisting of transverse fibres passing from surface of vastus internus to abductor magnus and abductor longus muscles, and enclosing between muscles named a passage, Hunter's canal, containing femoral artery and vein and saphenous nerve. **C., hy'aloid**, cylindrical passage formed by reflection of hyaloid membrane into interior of vitreous body around nutritious artery of the lens. **C., inci'sive** or **inci'sor**, see *Palatine canals.* **C., infraorb'itar**, suborbitar canal. **C., in'guinal**, see *Inguinal.* **C., inter'nal aud'itory**, internal auditory meatus. **C., intes'tinal**, portion of digestive canal formed by the intestines, from pylorus to anus. **C. of Ja'cobson**, canal, tympanic. **C., lac'rymal**, osseous canal containing nasal duct. **C., Lœwenberg's**, part of canal of cochlea above Corti's membrane. **C.,**

ma'lar, canal in malar bone for passage of malar division of temporo-malar branch of superior maxillary nerve. **C., max'illary,** C., dental. **C., me'dian,** central canal of spinal cord; aqueduct of Sylvius. **C., med'ullary,** cylindrical cavity in body or shaft of long bone containing marrow; vertebral canal, central canal of spinal cord. **C., mem'branous of coch'lea,** C. of cochlea, following spiral turns of lamina spiralis. **C., mucip'arous** or **mu'cous,** canal, interior of which has mucous lining. **C. of Mül'ler,** canal existing in fœtal state on outer side of Wolffian body. **C., na'sal,** lacrymal canal. **C., naso-pal'atine,** incisor canal. **C., neu'ral,** vertebral canal; medullary tube. **C., neurenter'ic,** see *Canalis neurentericus.* **C., neurocen'tral,** vertebral canal. **C. of Nuck** (from Nuck, who first described it), cylindrical sheath formed around round ligaments of uterus by prolongation of peritoneum into inguinal canal, giving rise to hydrocelic cysts in labium externum, readily mistaken for hernia of labium. **C., nutrit'ious,** nutritive canal of bone; Haversian canal. **C., obstet'ric,** pelvic canal and canal formed by uterus and vagina. **C., ob'turator,** C. in the ilium for passage of obturator vein and nerve; see *Obturator.* **C., olfac'tory,** nasal fossæ in early embryonic life. **C., op'tic,** optic foramen. **C., pal'atine,** see *Palatine.* **C., pancreat'ic,** pancreatic duct. **C., partu'rient,** C., obstetric. **C., pel'vic,** canal of pelvis included between superior and inferior straits. **C. of Petit,** see *Petit.* **C., poplite'al,** canal beneath sulcus for popliteal vessels and nerve. **C., por'tal,** interlobular biliary canals. **C., prim'itive,** canal of early embryonic life; neural canal. **C., pter'ygoid,** Vidian canal. **C., pter'ygo-pal'atine,** posterior palatine canal. **C., pul'mo-aor'tic,** ductus arteriosus. **C., rachid'ian,** vertebral canal. **C., Reck'linghausen's,** see *Canaliculi, serous.* **C. of Reiss'ner,** membranous canal of cochlea; ductus cochlearis. **C., rhachid'ian,** vertebral canal. **C. of Rivi'nus,** duct of sublingual gland. **C. of Ro'senthal,** spiral canal of modiolus. **C., sac'ral,** prolongation of vertebral canal in sacrum. **C., sagit'tal,** posterior semicircular canal. **C. of Schlemm,** minute circular canal, discovered by Prof. Schlemm, of Berlin; situate at point of union of cornea and sclerotica. **C., semicir'cular,** see *Semicircular.* **C., spermat'ic,** deferens vas; inguinal canal of male. **C., spi'nal,** vertebral canal. **C., spi'ral of cochlea,** see *Scalæ of cochlea.* **C., spi'ral of modi'olus,** minute canal surrounding the modiolus in lamina spiralis. **C., spi'roid,** aqueduct of Fallopius. **C. of Stenon,** or, more correctly, **Sten'son,** ductus salivalis superior. **C. of Stil'ling,** hyaloid canal; central canal of spinal cord. **C., subor'bital,** infraorbital canal. **C., supraor'bital,** canal at superior margin of orbit for supraorbital nerve and artery. **C., tem'poral,** zygomatico-temporal canal. **C., tem'poro-ma'lar,** zygomatic canal. **C., thora'cic,** thoracic duct. **C., tu'bal** or **tu'bo-ova'rian,** oviduct. **C., tympan'ic,** canal opening on lower surface of petrous portion of temporal bone, between carotid canal and groove for internal jugular vein; it contains Jacobson's nerve. **C., u'rinary,** urethra. **C., urogen'ital,** urogenital sinus. **C., u'terine,** canal of neck and body of uterus. **C., vas'cular,** Haversian canal; cartilage canal. **C., vec'tor,** tube, Fallopian. **C., ve'nous,** ductus venosus; canal existing only in fœtus, extending from bifurcation of umbilical vein to vena cava inferior, into which it opens below the diaphragm; at times it ends in an infrahepatic vein. It pours into the cava part of the blood passing from the placenta by the umbilical vein. After birth it becomes a fibro-cellular cord. **C., ver'tebral,** canal for lodgment of spinal cord in vertebræ. **C., vestib'ular,** urogenital sinus. **C., vul'var,** vestibule of vagina. **C., vul'vo-u'terine,** vagina, parturient canal. **C., vul'vo-vagi'nal,** vulva and vagina regarded as one canal; opening of hymen. **C. of Whar'ton,** Wharton's duct, ductus salivalis inferior. **C. of Wir'sung,** pancreatic duct. **C. of Wolff,** Wolffian duct.

Cana'la. Spigelia.

Canales, kan-al'ees (pl. of **Canalis**) **accesso'rii.** Passages for veins penetrating the jugular tubercle. **C. aërif'era,** see *Bronchia.* **C. alveola'res,** dental canals. **C. Breschet'i,** canals in diploë for passage of veins. **C. circula'res,** semicircular canals. **C. coch'leæ,** scalæ of the cochlea. **C. diplo'ici,** C. Brescheti. **C. Haver'sii,** canals, nutritive. **C. intersacra'les,** canals for sacral nerves. **C. lacryma'les,** lacrymal ducts. **C. laqueifor'mes,** Henle's loop-tubes; uriniferous tubules. **C. membra'nei re'num,** see *Calix.* **C. metacarpa'les,** spaces in palm of hand between flexor tendons. **C. nutrit'ii,** see *Canal, nutritious.* **C. sanguinif'eri,** blood-vessels. **C. semicircula'res,** semicircular canals. **C. semicircula'res membrana'cei,** semicircular canals. **C. semina'les,** seminiferous tubules. **C. tubæfor'mes,** semicircular canals. **C. tubercula'rium quadrigemino'rum,** aqueduct of Sylvius.

Canalicular, kan-al-ik'u-lar. Having small canals. **C. ab'scess of breast,** abscess communicating with galactophorous ducts. **C. tis'sue,** tissue containing small canals, as that of bone.

Canaliculated (kan-al-ik'u-la-ted) or **Canaliculatus,** kan-al-ik-u-lah'tus. Grooved.

Canaliculi, kan-al-ik'u-le (pl. of **Canaliculus**). See *Canales.* **C. accesso'rii,** canals for passage of veins at external margin of anterior condyloid canal or canals. **C. bilia'rii** or **bilif'eri,** pori biliarii. **C. of bone,** small canals in bones connecting the lacunæ, or the lacunæ with the Haversian canals; see *Lacunæ of bone.* **C. calcif'eri,** see *Calciferous canals.* **C. den'tium,** dentinal tubules. **C. Haversia'ni,** canals, nutritive. **C. juice,** C., serous. **C. lacryma'les,** lacrymal ducts. **C. limac'um,** lacrymal ducts. **C., lymphat'ic,** C., serous. **C. medulla'res,** Haversian canals. **C. petro'si,** canals in petrous portion of temporal bone for petrosal nerves. **C. pterygoi'dei,** C. sphenoidales. **C. semicircula'res,** semicircular canals. **C. semina'les,** see *Testicle.* **C. seminif'eri,** see *Testicle.* **C., se'rous,** minute channels in connective tissue supposed to form the origin of lymphatic vessels; small vessels connecting with lymph-vessels or forming communication between the lymphatic vessels and the capillaries. **C. sphenoida'les,** small canals or furrows in sphenoid bone. **C. vascul'osi,** canals, nutritive.

Canaliculization, kan-al-ik-u-liz-a'shun. Formation of canals in cartilage; a preparatory stage of ossification of cartilage by extension of the periosteal processes.

Canaliculus, kan-al-ik'u-lus (dim. of **Canalis,** channel). Small channel. **C. Arnol'di,** small canal in temporal bone transmitting auricular branch of vagus. **C. arterio'sus,** ductus arteriosus. **C. ba'sipharynge'us,** canal between sphenoid and palate bones for passage of pterygo-palatine vessels and pharyngeal nerve to pharynx. **C., collect'ing,** collecting tubule of kidney. **C. communicatio'nis,** canal under petrous portion of temporal bone transmitting vein from middle cranial fossa to lateral sinus. **C. innomina'tus,** C. basi-pharyngeus. **C. laqueifor'mis,** Henle's loop-tube. **C. mastoï'deus,** C. Arnoldi. **C. pharynge'us,** canal formed by sphenoid and palate bones and ala of vomer; C. basi-pharyngeus. **C. tympan'icus,** canal in petrous bone for Jacobson's nerve. See also *Canal, Canalis, Canales, Canaliculi.*

Canalis, kan-al'is. Canal, meatus. **C. alimenta'rius,** canal, alimentary. **C. alveola'ris,** dental canal. **C. an'imæ,** trachea. **C. arterio'sus,** arterial duct. **C. Bichat'ii,** canal, arachnoid. **C. Botal'li,** ductus arteriosus. **C. canalicula'tus,** gorget. **C. carot'icus,** carotid canal. **C. centra'lis,** central canal of spinal cord. **C. centra'lis modi'oli** or **coch'leæ,** see *Tractus spiralis foramenulentus.* **C. cervica'lis** or **cervi'cis,** see *Uterus.* **C. choled'ochus,** ductus communis choledochus. **C. ciba'rius,** alimentary canal. **C. Cloquet'i,** hyaloid canal. **C. coch'leæ os'seus,** see *Scalæ of cochlea.* **C. cochlea'ris,** cochlear canal. **C. condyloï'deus,** condyloid foramen. **C. corp'orum quadrigemino'rum,** aqueduct of Sylvius. **C. cra'niopharynge'us,** fœtal canal from bottom of pituitary fossa, containing process of dura mater. **C. cyst'icus,**

cystic duct; see *Gall-bladder*. **C. def'erens**, deferens vas. **C. eminen'tiæ quadrigem'inæ**, aquæductus Sylvii. **C. endolymphat'icus**, aqueduct of vestibule. **C. ethmoïda'lis**, internal orbital canal. **C. facia'lis**, aqueduct of Fallopius. **C. Fallo'pii** or **Fallo'piæ**, aquæductus Fallopii. **C. fibro'sus**, canal made by interosseous membrane of leg for anterior vessels and nerves. **C. Fontan'æ**, canal of Fontana. **C. gangliona'ris**, tractus spiralis foramenulentus; spinal canal of modiolus. **C. guttura'lis tym'pani**, Eustachian tube. **C. hepat'ico-cyst'icus**, ductus choledochus communis. **C. hyaloï'deus**, canal, hyaloid. **C. hypoglos'si**, anterior condyloid foramen. **C. incisi'vus**, anterior palatine canal. **C. inci'sor**, canal, incisor. **C. innomina'tus**, canal for passage of superficial petrosal nerve. **C. intestina'lis** or **intestino'rum**, intestinal tube. **C. lacrymalis**, lacrymal or nasal duct. **C. mandibula'ris**, inferior dental canal. **C. mastoï'deus**, canal for passage of Arnold's nerve. **C. maxilla'ris infe'rior**, inferior dental canal. **C. maxilla'ris supe'rior**, foramen rotundum. **C. me'dius**, aquæductus Sylvii. **C. medul'læ spina'lis**, see *Vertebral column*. **C. medulla'ris**, canal, medullary. **C. membrana'ceus**, cochlear duct. **C. mus'culo-perone'us**, space between origins of several muscles of leg occupied by lower part of peroneal artery. **C. na'so-lacryma'lis**, lacrymal or nasal duct. **C. naso-palati'nus**, palatine duct (anterior). **C. ner'vi facia'lis**, aqueduct of Fallopius. **C. ner'vus fistulo'sus re'num**, ureter. **C. neurenter'icus**, canal in embryo between digestive and medullary canals. **C. Nuck'ii**, canal of Nuck. **C. or'bitæ nasa'lis**, lacrymal or nasal duct. **C. op'ticus**, optic foramen. **C. palati'nus tym'pani**, Eustachian tube. **C. peripher'icus modi'oli**, see *Tractus spiralis foramenulentus*. **C. Petiti** or **Petitia'nus**, canal of Petit. **C. pharyn'go-tympan'icus**, embryonic canal in pharynx and tympanum. **C. quadrigem'inæ**, aqueduct of Sylvius. **C. radi'cis**, canal in root of tooth. **C. recur'rens**, Vidian canal. **C. reu'niens**, minute canal between round saccule in membranous labyrinth and ductus cochlearis. **C. Rosenthalia'nus** or **Rosenthal'ii**, spiral canal of modiolus. **C. rotun'dus**, foramen rotundum. **C. sacra'lis**, see *Sacral*. **C. scala'rum commu'nis**, infundibulum of the cochlea. **C. Schlem'mii**, canal of Schlemm. **C. semicircula'ris horizonta'lis**, see *Semicircular canals*. **C. semicircula'ris vertica'lis poste'rior**, see *Semicircular canals*. **C. semicircula'ris vertica'lis supe'rior**, see *Semicircular canals*. **C. spheno-palati'nus** or **spheno-pharynge'us**, canaliculus basi-pharyngeus. **C. spina'lis**, vertebral canal; central canal of spinal cord. **C. spira'lis coch'leæ**, see *Scalæ of cochlea*. **C. spira'lis modi'oli**, see *Tractus spiralis foramenulentus*. **C. supraorbita'lis**, supraorbital foramen. **C. Syl'vii**, aqueduct of Sylvius. **C. tar'si**, tarsal canal. **C. tempora'lis**, occasional opening in temporal bone between glenoid fossa and tympanic portion. **C. transversa'rius**, canal formed by series of transverse foramina of cervical vertebræ. **C. tympan'icus**, canal, tympanic. **C. urina'rius**, urethra. **C. urogenita'lis**, urogenital sinus. **C. utric'ulo-saccula'ris**, canal between utriculus and endolymphatic duct. **C. veno'sus**, ductus venosus. **C. vertebra'lis**, spinal cord. **C. Vidia'nus**, pterygoid or Vidian canal. **C. zygomat'ico-facia'lis**, malar canal. **C. zygomat'ico-tempora'lis**, temporal canal of malar bone. **C. zygomat'icus**, temporo-malar canal.

Canalization, kan-al-iz-a'shun. Process of formation of channels or canals, blood-vessels, for example. Conversion of a vessel into a rigid tube. Method of drainage for wounds by formation of canals, not by tubes.

Canals, kan-als'. See *Canal*. *Canales*, *Canalis*, *Canaliculi*, *Canaliculus*. **C., bone, of Breschet**, see *Diploic*. **C. of Hav'ers**, or **Haver'sian**, canals, nutritive. **C., nu'tritive**, canals for nutrition of bones, Haversian canals, or canals of Havers. Canals through which vessels pass to bones; lined by very fine lamina of compact texture, or formed in the texture itself. **C. of Rivi'nus**, ducts of sublingual gland. **C., semicir'cular**, see *Semicircular canals*. **C., sem'inal**, see *Seminal*. **C. se'rous**, canaliculi, serous. **C., of Steno**, duct of Steno.

Canan'ga odora'ta. Tree of S. Asia, from which ylang-ylang oil is obtained.

Canapacia, kan-ap-as'e-ah. Artemisia vulgaris.

Canarium commune, kan-ah're-um kom-mu'ne. Amyris elemifera.

Canaryseed, kan-a're-seed. Phalaris Canariensis.

Canaryweed. Orchil.

Cancamum (kan'kam-um) or **Can'camy.** Mixture of several gums and resins from Africa; used to deterge wounds. Anime.

Cancellated (kan'sel-la-ted), **Cancel'lous**, or **Can'cellate** (made of lattice-work). Formed of cancelli.

Cancelli, kan-sel'le (pl. of **Cancel'lus**, lattice-work). Cellular or spongy texture of bones, consisting of numerous cells communicating with each other, containing fatty matter, analogous to marrow; met with, principally, at extremities of long bones; some short bones consist almost wholly of it. It allows of expansion of extremities of bones, without adding weight, and deadens concussions.

Cancellous, kan-sel'lus. Cancellated. See *Cancelli*.

Cancer, kan'sur (crab). Disease probably originally so called either on account of the hideous appearance which ulcerated cancer presents, or on account of great veins surrounding it, which the ancients compared to the claws of the crab. See *Carcinoma*. Cancers were formerly distinguished, according to the stages, into *occult*, *cancer occultus*, and *open*, *c. apertus*, the former being the scirrhous form, the latter the ulcerated condition. The term cancer is much more limited at the present day in its application than formerly, and although it is necessary to define the different varieties previously recognized by their old and at one time familiar names, the description of cancerous or carcinomatous growths proper is greatly restricted and simplified. Cancers are defined at the present day as most atypical new formations of cells of the epithelial type, grouped irregularly in the alveoli of a more or less dense fibroid stroma. The epithelial type implies origin from epiblast or hypoblast, and the absence of intercellular substance; it does not imply any specific form of cell. In cancer we have epithelial cells, often of the most abnormal form, filling up the lumina of gland-tubes (if it start from a gland), bursting through their basement or limiting membrane, and ramifying in the spaces of connective tissue (Green). Cancer-cells are of large size and of various forms—round, oval, fusiform, caudate, or polygonal—and their nuclei and nucleoli are large and prominent, and they lie loosely in the alveoli without any intervening stroma; but there is no specific cancer-cell different from that characterizing other new formations or even normal tissues. The stroma is of fibrillated tissue arranged so as to form communicating alveoli, in which are the cancer-cells; numerous blood-vessels are in the stroma and surround the alveoli like a network, and lymphatics communicate freely with the alveoli.

Cancers undoubtedly have an epithelial origin; that is, they originate either in the growth of a resting embryonic epithelial rudiment (Cohnheim), or on the multiplication of some epithelial cells. Other conditions being favorable, such as malignancy, the cells burst through any basement membrane, and grow in the connective tissue along lymph-spaces and channels. Glandular infection is thus easy to explain (Green). Surrounding structures gradually become infiltrated, and secondary changes often occur, such as fatty degeneration, hemorrhage, pigmentation, colloid and mucoid degeneration, etc.

According as the cancer-cells spring from stratified epithelium, columnar epithelium, or the epithelium of acinous glands, cancers are divided into two classes: *Acinous cancer*, including Scirrhus or chronic cancer, and *Epithelial cancer*, including squamous and columnar-celled Epithelioma, the latter being also called Adenoid cancer. Any of these varieties may develop into a colloid or gelatiniform form of de-

generation, that was once called *colloid* or *gelatiniform cancer*.

Cancers occur usually after the age of thirty-five, are very malignant, grow rapidly, invade surrounding tissues to a serious extent, frequently ulcerate, involve the lymphatic glands at an early stage, and implicate the general system. For their production they require a peculiar diathesis or cachexia, *cancerous cachexia*.

Cancer, a'cinous, see *Cancer*. **C., acute',** encephaloid. **C., ad'enoid,** adeno-carcinoma. **C. al'bus,** C. aquaticus. **C., alve'olar,** sometimes restricted to colloid cancer, but applicable to cancer generically, as having alveoli; see *Cancer*. **C. aper'tus,** cancerous ulceration. **C., ap'inoid,** scirrhus having pear-shaped structure in its interior. **C. aquat'icus,** variously called *Gangrenous inflammation of the mouth, Canker of the mouth, Gangrenous sore mouth, Gangrenous erosion of the cheek, Sloughing phagedena of the mouth, Water canker*. Sloughing or gangrenous ulceration of the mouth, often accompanied with afflux of saliva; not uncommon in children's asylums. **C., are'olar,** colloid. **C. as'tacus,** see *Cancrorum chelæ*. **C., black,** cancer, melanotic. **C. of the blood,** leucocythæmia. **C. of the breast,** masto-carcinoma. **C. caminario'rum,** cancer, chimney-sweeper's. **C., caul'iflower,** form of epithelioma having externally ulcerated fissures, resembling cauliflower. **C. cell,** cell at one time considered as characteristic of cancer; polygonal, caudate, fusiform, concentric, compound; the liquid in which cancer-cells float was called *cancer serum*. It is not now considered that there is a distinct cell characteristic of cancer. See *Cancer*. **C., cell'ular,** encephaloid medullary carcinoma; m. sarcoma. **C., cere'briform,** encephaloid; medullary sarcoma. **C., chim'ney-sweep'er's,** epithelioma or epithelial cancer of the scrotum; soot-wart. This affection begins with a superficial, painful, irregular tubercular ulcer, with hard, elevated edges, occupying the lower part of the scrotum; sometimes the testicles are involved. **C., chon'droid,** variety of scirrhus, on section resembling cartilage. **C., chron'ic,** scirrhus. **C., clay-pipe,** C., smoker's. **C., col'loid,** see *Colloid*. **C., cyl'inder-cell,** epithelioma, cylindrical. **C., cyst'ic,** colloid; cysto-carcinoma. **C., dendri'tic,** papilloma; C., villous. **C., ebur'neous,** kind of waxy degeneration of the breast, but not strictly cancerous scleroma. **C., embol'ic,** C. caused by embolism. **C., enceph'aloid** or **encephalom'atous,** medullary sarcoma. **C., endothe'lial,** villous endothelioma. **C., epithe'lial,** see *Epithelial* and *Epithelioma*. **C., epithe'lial, of scro'tum,** cancer, chimney-sweeper's. **C., fi'brous,** scirrhus; recurrent fibroid. **C. fungoï'des** or **fungo'sus,** fungus hæmatodes; scirrhus. **C., fun'gous,** fungus hæmatodes. **C. Gale'ni,** bandage for head, the eight heads of the bandage resembling, rudely, crab's claws. It is now supplied by bandage with six heads, called *Bandage of Galen* or *Bandage of the poor*. **C., gelat'iniform** or **gelat'inous,** colloid. **C., gland'ular,** adenocarcinoma; cylindrical epithelioma. **C., green,** chloroma. **C., gum** or **gum'mous,** colloid. **C., hæm'atoid,** fungus hæmatodes. **C., hard,** scirrhus. **C. intestino'rum,** enteropathia cancerosa. **C. juice,** viscid, creamy fluid squeezed or scraped from surface of section of a malignant growth. **C., lard'iform** or **lar'inoid,** lardlike form of scirrhus. **C., la'tent,** C. occultus. **C. of liv'er,** hepato-scirrhus. **C. of lung,** phthisis, cancerous. **C. lu'pus,** lupus. **C., mas'toid,** see *Mastoid cancer*. **C., med'ullary,** encephaloid medullary carcinoma; m. sarcoma. **C. melæne'us,** cancer, melanotic. **C., melanot'ic,** black or melanoid cancer; combination of cancer and melanosis; see *Melanotic sarcoma*. **C., milt'like,** medullary sarcoma; see *Miltlike*. **C. mol'lis,** encephaloid. **C., mu'cous,** colloid. **C. mundito'rum,** cancer, chimney-sweeper's. **C., myxom'atous,** cancer that has been transformed into myxoma. **C., na'piform,** cancer, turnip-like in appearance. **C., neph'roid,** kidney-shaped medullary sarcoma. **C. occul'tus,** see *Cancer*. **C. oc'uli,** scirrhophthalmus. **C. o'ris,** cancer aquaticus; stomacace. **C. os'sa,** spina ventosa. **C., os'teoid,** spina ventosa; cancer containing bony matter; osteoid chondroma; osteosarcoma; see *Osteoid sarcoma*. **C., pancreat'ic,** cancer resembling the pancreas in appearance; cancer of pancreas. **C., pap'illary,** papillary epithelioma; papilloma. **C. pharyn'gis et œsoph'agi,** Læmoscirrhus. **C., pig'mentary,** C., melanotic. **C., placent'al,** medullary sarcoma, resembling placenta in appearance; cancer of placenta. **C., pulp'y** or **pulpa'ceous,** colloid. **C. purgato'ris infumic'uli,** cancer, chimney-sweeper's. **C., ro'dent,** see *Epithelioma, Lupus,* and *Rodent*. **C. root,** Orobanche Virginiana; Phytolacca decandra; Conopholis Americana; Epiphegus Virginiana; Aphyllon uniflorum. **C., sarcom'atous,** glandular cancer with sarcomatous degeneration. **C. scirrho'sus,** scirrhus. **C. scro'ti,** cancer, chimney-sweeper's. **C. se'rum,** C. juice; see *Cancer-cell*. **C., smo'ker's,** epithelioma of mouth and lips from irritation of nicotine of tobacco or of pipe. **C., soft,** hæmatodes fungus; medullary cancer; encephaloid. **C., so'lanoid,** see *Solanoid*. **C., soot,** epithelioma from soot or a chimney-sweeper's cancer. **C. spongio'sus,** fungus hæmatodes. **C. of stom'ach,** gastrostenosis cardiaca et pylorica; C., stone-scirrhus. **C., telangiectat'ic,** fungus hæmatodes. **C. terebrans,** epithelioma. **C. of test'icle,** see *Sarcocele*. **C. tubero'sum,** carcinoma tuberosum; keloid. **C. u'teri,** metrocarcinoma. **C. verruco'sus,** wartlike form of epithelioma. **C., vil'lous,** dentritic vegetation; cancer in mucous membranes when covered by villous growth; papilloma. **C. vulga'ris,** scirrhus. **C., water,** C. aquaticus. **C. weed,** Goodyera pubescens; Salvia lyrata.

Cancerism, kan'sur-izm. Cancerous diathesis.

Canceroma, kan-sur-o'mah. Carcinoma.

Cancerous, kan'sur-us. Relating to or affected with cancer.

Cancerwort, kan'sur-wurt. Linoria spuria; L. elatine; veronica.

Canchalagua, kan-chal-ag'wah. Chironia Chilensis; Erythræa Chilensis.

Cancrena, kan-kre'nah. Gangrene.

Can'criform. Cancroid.

Cancrodes, kan-kro'dez. Cancroid.

Cancroid, kan'kroid (*cancer, eido,* form). Assuming a cancerous appearance. Name given to certain cutaneous cancers by Alibert; called also *Cheloid* or *Keloid*, from their presenting flattish raised patch of integument, resembling tortoise-shell. Epithelioma. **C. ul'cer,** rodent ulcer.

Cancroïs, kan'kro-is. See *Cancroid*.

Cancroma, kan-kro'mah. Carcinoma.

Cancrorum chelæ, kan-kro'rum ke'le (*chele,* claw). Crab's claws; like crab's stones or eyes; concretions found, particularly, in *Cancer astacus* or *cray-fish*, considered to be antacid.

Cancrosus, kan-kro'sus. Cancerous.

Cancrum, kan'krum. Cancer; ulceration having tendency to spread. **C. o'ris,** cancer aquaticus; stomacace; noma. **C. puden'di,** noma of female genital organs.

Candela, kan-de'lah (*candeo,* to glow). Bougie; candle used for inhalation. **C. candela'ria,** verbascum. **C. fuma'lis,** pastil. **C. medica'ta,** bougie. **C. re'gia** or **re'gis,** Verbascum nigrum; V. thapsus.

Candelaria, kan-de-lah're-ah (*candela,* candle). Verbascum nigrum.

Candi (kan'de) or **Can'dum** (*candidus,* white, purified). Candy; purified and crystallized sugar; Cannabis sativa; see *Saccharum*.

Candidum ovi, kan'did-um o've (white of egg). Albumen ovi.

Can'dle. Bougie. **C. ber'ry,** Myrica cerifera. **C. fish,** eulachon. **C. fish oil,** oil from Thaleichthys Pacificus, eulachon or oulachon oil; similar properties to cod-liver oil. **C., mercu'rial,** candle made of wax and vermilion, for mercurial fumigation. **C. nut,** Aleurites Moluccana. **C. nut oil,** cathartic oil expressed from Aleurites triloba, kekune or kukui oil. **C. tree,** Parmentiera cerifera. **C. tril'oba,** Viola sebifera.

Candy, kan'de. Candi.

Candytuft, kan'de-tuft. Iberis. **C., bit'ter,** Iberis amara.

Cane, sugar. Sucrose. See *Saccharum.* **C., sweet,** Acorus calamus.

Canella alba, kan-el'lah al'bah (dim of **Canna,** reed). West India tree, so called because its bark is rolled up like a reed. *Canella bark, Canella, Canellæ cortex* (Ph. U. S.), ord. Guttiferæ, is pungent aromatic. It is stimulant, tonic, and often added to bitters and cathartics. **C. ama'ra,** bark of Cinnamomum culilawan. **C. caryophylla'ta,** Myrtus caryophyllata. **C. Cuba'na,** C. alba, Laurus cassia. **C. dul'cis,** bark of C. alba. **C. Jamaicen'sis,** C. alba. **C. Magellan'ica,** bark of Drimys Winteri. **C. Malabar'ica,** Cinnamomum cassia. **C. silves'tris,** E. Indian cinnamon. **C., white,** C. alba. **C. Wintera'na,** C. alba. **C. Zeylan'ica,** cinnamon; Daphnidiun myrrha.

Canellifera Malabarica, kan-el-lif'er-ah mal-a-bar'-ik-ah. Laurus cassia.

Canel'lin. Principle extracted from Canella alba.

Canelli'na. Cinnamon bark.

Caneo'tica. Crete boil or button; endemic ulcer.

Canicaceous, kan-ik-a'she-us. Furfuraceous.

Canicæ, kan'is-e. Meal or bread in which there is much bran.

Canicida, kan-is-e'dah (*canis, cædo,* to kill). Aconite.

Caninanæ, kan-in-an'e. Chiococca racemosa; Cainca. **C. ra'dix,** caincæ radix.

Canine, kan'ine (*canis,* dog). Resembling structure, actions, etc. of a dog, as canine teeth, c. appetite, etc. **C. em'inence,** C. prominence. **C. fos'sa,** infraorbitar or suborbitar fossa; small depression on superior maxillary bone, above canine tooth, giving attachment to caninus or levator anguli oris muscle. **C. hun'ger,** boulimia. **C. laugh,** sardonic laugh; form of laugh, facial expression of which is produced particularly by spasmodic contraction of the caninus muscle. Probably this expression, as well as cynic spasm, originated in resemblance of the affection to certain movements in upper lip of dog. It is also called *risus sardonicus,* from similar symptoms having been induced by Ranunculus sceleratus, growing in Sardinia. **C. mad'ness,** hydrophobia. **C. mus'cle,** levator anguli oris. **C. prom'inence,** protuberance of canine tooth of upper jaw. **C. teeth,** eye teeth, pug teeth; teeth between lateral incisors and small molars of jaw, so named because resembling the teeth of a dog.

Canini-labialis, kan-e'ne-lab-e-al'is. Levator anguli oris.

Caninus, kan-e'nus (canine). Levator anguli oris. **C. sen'tis,** Rosa canina. **C. spas'mus,** see *Canine laugh.*

Caniram. Strychnos nux vomica.

Caniramine, kan-ir'am-een. Brucine.

Canirubus, kan-e-ru'bus. Rosa canina.

Canis, kan'is (dog). Frænum præputii; vulva. **C. intersec'tor** (dog-killer), Veratrum sabadilla. **C. Pon'ticus,** Castor fiber.

Canitia (kan-ish'e-ah), **Canities** (kan-ish'e-ees), or **Canitu'do** (*canus,* white). Blanching, whiteness or grayness of the hair, and especially of that of the head. When occurring from old age it is not a disease; sometimes it happens suddenly, apparently as result of mental emotion.

Canker, kan'kur (*cancer*). Violent or corrosive ulceration; disease of horse's foot or dog's ears; stomatitis, aphtha, cancer aquaticus, stomacace. **C. ber'ry,** fruit of Rosa canina and Solanum Bahamense. **C. flow'er,** Rosa canina. **C. of mouth,** cancer aquaticus. **C. nail,** hang-nail. **C. rash,** sore throat; cynanche maligna. **C. root,** sorrel. **C. rose,** Papaver rhœas; Rosa canina. **C., water,** cancer aquaticus. **C. weed,** Senecio Jacobæa, S. silvaticus, S. tenuifolius.

Canna, kan'nah (reed). See *Tous-les-mois, Cassia fistula, Trachea.* **C. angustifo'lia,** plant of Brazil, diaphoretic, stimulant, antirheumatic. **C. arrow root,** tous-les-mois. **C. brach'ii,** ulna. **C. domes'tica cru'ris,** tibia. **C. edu'lis,** tous-les-mois. **C. fis'tula,** Cassia fistula. **C. gut'turis,** trachea. **C. In'dica,** Sagittarium alexipharmacum. **C. ma'jor, tibia. C. mi'nor,** fibula, radius. **C. odorif'era,** Acorus calamus. **C. Orienta'lis,** juice is used in earache; C. Indica. **C. pulmo'nis,** trachea. **C. soluti'va,** Cassia fistula. **C. starch,** tous-les-mois, Queensland arrow root.

Can'nabene. Liquid derived from volatile oil of Cannabis Indica.

Cannabin, kan'nab-in. Amorphous alkaloid derived from Indian hemp or Cannabis Indica. Brown syrupy glucoside obtained from watery extract of Cannabis Indica; hypnotic. **C. tan'nate,** cannabinum tannicum.

Cannabina, kan-nab'in-ah. Cannabin; cannabine. **C. aquat'ica,** Eupatorium cannabinum.

Can'nabine. Brown syrupy alkaloid derived from Cannabis Indica; hypnotic.

Cannab'inine. Volatile alkaloid from Cannabis Indica.

Cannabino'na or **Cannabinone,** kan-nab'in-one. Soft resinous substance derived from Indian hemp; hypnotic.

Cannab'inum. See *Cannabin* and *Cannabine.* **C. tan'nicum,** cannabine tannate. Astringent brownish powder; hypnotic, derived from precipitating watery extract of Indian hemp by tannic acid.

Can'nabis. Hemp; fruit of Cannabis sativa. **C. America'na,** American hemp; flowering tops of Cannabis sativa, cultivated in the southern United States. **C. In'dica,** Indian hemp. According to Ph. U. S., the flowering tops of the female plant of Cannabis sativa, grown in the E. Indies,—from which the resin has not been removed (Ph. Br.). The leaves and flowers are narcotic and astringent; they are chewed and smoked. The seeds, mixed with opium, areca, and sugar, produce a kind of intoxication, and are so used in India. An alcoholic extract of the dried tops, churrus, *Extractum Cannabis Indicæ* (Ph. U. S. and Br.), has been used in Europe and in this country as a narcotic and anti-convulsive, in the dose of quarter of a grain, increased cautiously and gradually. Tannate of cannabine has also been prescribed as a narcotic and hypnotic. The dried plant which has flowered, and from which resin has not been removed, called *Gunjah, Ganjah, Guaza,* and *Guazah, Haschisch, Hachisch, Hashish,* or *Chaschisch,* consists of tops and tender parts only of the plant, collected immediately after inflorescence, and simply dried. **C. sati'va,** common hemp of Asia, America, and Europe. The seed, hempseed, is oily aud mucilaginous; a decoction is sometimes used in gonorrhœa.

Cannabium, kan-nab'e-um. Cannabis, cannabine.

Can'nabum. Hemp.

Cannacorus radice crocea, kan-nak'or-us rad-e'se kro'se-ah. Curcuma longa.

Can'nel. Laurus cinnamomum, Cinnamomum Zeylanicum. **C. bone,** clavicle. **C. water,** aqua cinnamomi.

Cannella, kan-nel'lah. Canella; cinnamon.

Can'nellate or **Can'nellated.** Grooved. **C. bod'ies,** corpora striata.

Can'non bone. Metacarpal bone of the horse.

Can'nula. Canula.

Can'nulæ (pl. of **Cannula**) **pulmo'num.** Bronchia.

Cannular (kan'nu-lar) or **Cannulate,** kan'nu-late. Tubular.

Canoe (kan-oo') **birch.** Betula papyracea. **C. wood,** Liriodendron tulipifera.

Can'on bone. Cannon bone.

Cano'pum. Elder flower. See *Sambucus.*

Can'or stethoscop'icus (*canor,* tune). Metallic tinkling heard on auscultation.

Can'quoin's caust'ic paste. Pasta zinci chloridi.

Cantab'rica (from *Cantabri,* people of Spain). Convolvulus Cantabrica.

Canta'brum. Bran.

Cantamen, kan-tah'men. Charm; incantation.

Cantarella, kan-tar-el'la. Acqua tofana; Meloe proscarabæus.

Cantarel'lus. Meloe proscarabæus.

Cantaris, kan'tar-is. Fumaria officinalis; cantharis.

Cantatio, kan-tah'she-o (*canto*, to sing). Charm; incantation.

Can'tel. Vertex.

Cante'rium. Cantherius.

Canthal, kan'thal. Relating to canthus or angle of eyelids.

Cantharellus (kan-thar-el'lus) **ciba'rius.** Chanterelle, form of fungus prized in Europe as article of food.

Canthariasis, kan-thar-e'as-is. Condition of infection from cantharis or other coleopterous insect.

Cantharic acid, kan'thar-ik as'id. $C_{10}H_{12}O_4$. Acid derived from cantharidin by action of hydriodic acid.

Canthar'idal. Relating to or containing cantharides. **C. collo'dion,** collodion with cantharides, collodium cum cantharide (Ph. U. S. and Br.).

Cantharidate, kan-thar'id-ate. Salt of cantharidic acid and a base.

Canthar'ides. See *Cantharis*. **C. ce'rate,** ceratum cantharidis. **C. lin'iment,** linimentum cantharidis. **C. pa'per,** charta cantharidis.

Cantharidic, kan-thar-id'ik. Relating to cantharides. **C. acid,** $C_{10}H_{14}O_4$; acid derived from cantharidin. **C. acid, anhyd'rous,** cantharidin.

Canthar'idin or **Cantharidi'na.** See *Cantharis*.

Cantharidinic acid, kan-thar-id-in'ik as'id. Cantharic acid.

Cantharidinum, kan-thar-id-e'num. Cantharidin.

Canthar'idism. Symptoms resulting from the employment of cantharides, whether taken internally or by application of blister, such as strangury, pain or swelling of genital organs, and bloody urine, due to inflammation of kidneys or bladder or gastro-intestinal irritation.

Canth'aris (pl. **Canthar'ides**) (Ph. U. S. and Br.). *Blistering fly, Blister fly, Blister beetle, Spanish fly, Fly.* This fly (ord. Coleoptera) is originally, perhaps, native of Italy and Spain. It is found on species of Oleaceæ, as ash, privet, and lilac; and of Caprifoliaceæ, as elder and lonicera. It is the most common vesicatory; given internally, and even when absorbed from the skin, it stimulates the mucous membrane of the stomach and bowels and affects the urinary organs, exciting strangury. This may be prevented, in cases of blisters, by interposing between the blistering plaster and the skin a piece of tissue paper. Diluents relieve the strangury. Dose, internally, gr. ½ to j. If kept dry, the flies will retain activity for many years. Their active principle, *cantharidin, cantharidina,* or *vesicatorin,* anhydride of cantharic acid, in colorless scales or prisms, $C_{10}H_{12}O_4$, is a colorless substance used in lieu of cantharides in cerates, plasters, blistering fluid, etc. Internally cantharidin has been recently prescribed in tuberculosis. Cantharis vesicatoria is the ordinary blistering insect used in Europe.

Cantharis or Lytta vittata and C. atrata, C. marginata, and C. cinerea of America; C. atomaria of Brazil; C. ruficeps of Sumatra and Java; C. gigas, Lytta cærulea, of Guinea and E. Indies; C. violacea, Lytta gigas mas, of E. Indies; C. Syriaca, Lytta segetum, of Arabia; Mylabris, M. punctata, M. pustulata, and M. cichorii of China and E. Indies; Meloe proscarabæus and M. maialis, or true mayworm, possess similar properties. **C. vesicato'ria,** cantharis.

Canthec'tomy (*kanthos*, angle of eye, *ektome*, excision). Division or excision of canthus or angle of eye.

Canthitis, kan-the'tis. Inflammation of canthus of the eye.

Canthium coronatum, kan'the-um kor-o-nat'um. Gardenia or Randia dumetorum.

Cantholysis, kan-thol'is-is (*kanthos*, angle of eye, *lusis*, loosening). Division of canthus of eye and canthal ligament.

Canthoplastice, kan-tho-plas'tis-e. Canthoplasty.

Canthoplasty, kan'tho-plas-te (*kanthos*, angle of eye, *plastikos*, formative). Formation, by plastic operation, of the angle of the eye, usually outer angle; an operation performed when the eyelids are not sufficiently cleft.

Canthorrhaphy, kan-thor'rhaf-e (*kanthos, rhaphe*, suture). Suture of angle of eye for restoration of normal interpalpebral fissure.

Canthot'omy (*kanthos*, angle of eye, *tome*, incision). Simple division of the canthus of the eye, generally external canthus.

Canthus, kan'thus. Corner or angle of the eye. The greater or major canthus is the inner angle; the lesser or external or minor canthus, the outer angle. See *Palpebra*. **C., na'sal,** inner canthus of eye. **C., tem'poral,** outer canthus.

Cantion, kan'te-on. Crystallized sugar, candy. Cantong, plant of Philippines; edible, laxative, and externally applied to wounds, burns, and scrofulous sores.

Canula (kan'u-lah) (dim. of **Canna,** reed) or **Can'nula.** Small metal, wood, or rubber tube used in surgery. **C., Bellocq''s,** silver tube, with movable rod and steel spring, for introduction of a ligature in hemorrhage from the nose and its cavities. **C., lac'rymal,** small tube introduced into the lacrymal duct in constriction of its calibre. **C. pulmo'num,** trachea.

Canutillo, kan-u-te'yo. Ephedra antisyphilitica, growing in Texas; used internally in gonorrhœa and leucorrhœa; externally as a styptic.

Can'vum. Cannabis sativa.

Caoutchouc, kout'shook. E. Indian name for *Indian rubber, Elastic gum, Gum elastic, Cayenne resin, Cautchuc;* substance formed by drying milky juice of Hævea or Hevea Guaniensis, Jatropha elastica, Siphonia cahuchu, S. elastica, Seringue tree, and of Ficus Indica and Artocarpus integrifolia, and other S. American trees. A carbohydrogen, insoluble in water and alcohol. It may be sulphured or vulcanized; that is, combined with sulphur by aid of heat, which process, long continued, converts it into hard rubber. Boiling water softens and swells it. Soluble in essential oils and ether, when it may be blown into bladders. Used in fabrication of catheters, bougies, pessaries, courtplaster, elastic stockings, bandages, etc.

Cap. Conical end of lymph-follicle; tegmentum. **C. of Bro'ca,** see *Præpurculum*. **C., fri'ar's,** Aconitum napellus. **C., pitch,** see *Depilatory*. **C., sol'dier's,** C., friar's.

Capacity, breathing, kap-as'it-e bre'thing. See *Vital capacity*. **C., calorif'ic,** specific heat. **C., combi'ning,** atomicity. **C., lung, pulmon'ic, pul'monary,** or **res'piratory,** see *Vital capacity*. **C., testamen'tary,** mental capacity sufficient to enable a person to make a will. **C., ther'mal,** specific heat. **C. thora'cic** or **vi'tal,** vital capacity.

Cape horse sick'ness. Anthrax.

Capelina (kap-el-e'nah) or **Capelli'na.** *Woman's hat.* Recurrent bandage, resembling a riding-hood, applied to the head, to the clavicle in fractures of that bone or of the acromion process, spine of scapula, etc., and to stumps after amputation. **C. of am'putated limb,** bandage applied around a stump. **C. of clav'icle,** employed in fractures of acromion, clavicle, and spine of scapula.

Capeline bandage, kap'el-een ban'daj. Capelina.

Caper, ka'pur (goat). Odor of axilla; bromidrosis. **C. bush** or **plant,** Capparis spinosa; Euphorbia lathyris.

Capetus, kap'et-us. Small pit or fossa.

Capeweed. Roccella tinctoria. **C., Austra'lian** or **New Zealand,** Hypochœris radicata.

Caphopic'rin or **Caphopic'rite.** Brown bitter acid from rhubarb.

Capiat, kap'e-at (let it take). Instrument for seizing and removing foreign matters from the uterus, as remains of placental or other structures.

Capillamentum, kap-il-lah-men'tum (*capillus*, hair). Villous or hairy fibril or covering.

Capillarity, kap-il-lar'it-e. Attraction of liquids to walls of capillary tubes; capillary attraction; hair-like condition, as of fibrils.

Capillary, kap'il-la-re (*capillus*, hair). Hair-like; very small or fine. **C. attrac'tion,** power exercised by minute tubes, causing fluid in them to rise above its level. **C. bronchi'tis,** see *Bronchitis*. **C.**

fis'sure, minute slender fissure or cleft. **C. næ'vus,** birth-mark; form of nævus vascularis, in which the capillaries are distended and massed together. **C. tubes,** tubes of delicate calibre. **C. ves'sels,** extreme radicles of arteries and veins, together constituting the capillary intermediate or peripheral vascular system. Arterial capillaries are those terminating minute canals; biliary and gall capillaries are the intralobular; pulmonary capillaries are those between pulmonary arteries and veins; venous capillaries are those immediately preceding formation of minute veins.

Capillatio, kap-il-lah'she-o. Trichismus; condition of being covered with hair.

Capillatus, kap-il-lat'us. Covered with fine hair; impuber.

Capillic'uli. Capillary vessels.

Capillimen'tum. Hair or hairy covering.

Capillitium, kap-il-lish'e-um. Capillamentum; entropion, scalp. **C. distich'ia,** distichiasis. **C. intrica'tum,** plica polonica.

Capillorum defluvium, kap-il-lo'rum de-flu've-um. Alopecia.

Capillus, kap-il'lus. Hair; hair of the head. See *Hair*. **C. ven'eris,** Adiantum capillus veneris. **C. v. Canaden'sis,** Adiantum pedatum or Canadense.

Capiplenium (kap-e-plen'e-um) or **Capitiplen'ium** (*caput, plenum,* full). Variety of catarrh; heaviness or disorder in the head; gravedo.

Capistratio, kap-is-trah'she-o (*capistrum,* halter). Phimosis; trismus.

Capistrum, kap-is'trum. Capelina, trismus. **C. au'ri,** borax. **C. sim'plex,** bandage for head or jaw; capelina.

Capita (kap'it-ah) (pl. of **Caput**) **cor'porum cavernoso'rum.** Crura of penis. **C. diaphrag'matis,** crura of diaphragm. **C. medul'læ oblonga'tæ,** thalami optici.

Capital, kap'it-al. Belonging to the head; important. **C. opera'tions,** important or major operations.

Capitate (kap'it-ate) (having a head or heads) **papil'læ.** Fungiform papillæ.

Capitatum, kap-it-at'um. Os magnum.

Capitellate, kap-it-el'late. Having small head or prominence.

Capitellum, kap-it-el'lum (dim. of **Caput**). Alembic; head of a small bone or small head of bone; round lower end of humerus.

Capitiluvium, kap-it-e-lu've-um (*caput, luo,* to wash). Bath or wash for the head.

Capitiplenium, kap-it-e-plen'e-um. Capiplenium.

Capitipurgia, kap-it-e-pur'je-ah. Caput purgia.

Capitisple'nius. Splenius capitis.

Capititraha, kap-it-it'rah-hah (*caput, traho,* to draw). Instruments which draw down the head of the fœtus when impacted in the pelvis.

Capitium, kap-ish'e-um. Head-bandage. **C. mag'num quadrangula're** or **quadra'tum,** four-cornered head-bandage. **C. mi'nus** or **triangula're,** three-cornered head-bandage.

Capitoductor, kap-it-o-duk'tor (*caput,* head, *duco,* to lead). Obstetrical forceps.

Capitones, kap-it-o'nes (*caput,* head). Fœtuses whose heads are so large as to render labor difficult; condition is called macrocephalia.

Capitraha, kap-it'rah-hah. Capititraha.

Capitular (kap-it'u-lar) **process.** Process or dorsal vertebra for attachment of rib.

Capitulum, kap-it'u-lum (dim. of **Caput,** head). Alembic, condyle; head of small bone; small head or process. **C. arytenoi'deum,** corniculum laryngis. **C. cos'tæ,** head of a rib; see *Costa*. **C. laryn'gis,** corniculum laryngis. **C. mar'tis,** Eryngium campestre. **C. medul'læ spina'lis,** optic thalami. **C. pi'li,** bulb of hair. **C. Santori'ni,** corniculum laryngis. **C. stape'dis,** elevation for articulation of stapes and incus. **C. ul'næ,** round projection at lower end of ulna.

Capituluvium, kap-it-u-lu've-um. Capitiluvium.

Capnisis or **Capnisma,** kap-nis'mah (*kapnos,* smoke). Fumigation.

Capnoïdes cava, kap-no-e'des kav'ah. Fumaria bulbosa.

Capnorchis, kap-nor'kis. Fumaria bulbosa.

Cap'nos or **Cap'nus** (*kapnos,* smoke). Fumaria.

Ca'pon. Cagot; castrated fowl.

Capparis (kap'par-is) or **Cappa'ria.** *Caper bush, Prickly caper bush;* grows on shore of Mediterranean. Ord. Capparideæ. Bark of root and buds are astringent and diuretic; buds are stimulant and antiscorbutic. The latter are a well-known pickle—capers. **C. Ægypti'aca,** species of Egypt; root is diuretic and anthelmintic. **C. amygdali'na,** root and fruit of this S. American plant are anodyne and laxative; flowers used in jaundice and amenorrhœa; leaves are antispasmodic. **C. aphyl'la,** this Indian plant is employed as an application to boils, skin diseases, arthritic affections, etc. **C. baduc'ca,** species of caper, cultivated in India. A liniment is made with its juice and rubbed on painful parts. The flowers are purgative. **C. brevispi'na,** E. Indian plant; leaves and flowers are cathartic. **C. Brey'nia,** plant of W. Indies; bark of root is diuretic, purgative, and emmenagogue. **C. coria'cea,** plant of Peru, employed in epilepsy and hysteria. **C. cynophalloph'ora,** plant of W. Indies; bark of root is diuretic and purgative; fruit is antispasmodic. **C. ferrugin'ea,** plant of W. Indies; bark of root is diuretic, cathartic, and emmenagogue. **C. Moriso'nia,** of S. America, is antispasmodic. **C. sati'va,** C. spinosa. **C. soda'da,** of Asia and Africa; unripe berries are used as a condiment; when ripe, are used for cases of sterility. **C. spino'sa,** capparis.

Cap'ra (goat). Odor of armpits.

Capragina (kap-rah-je'nah) or **Capro'go.** Galega officinalis.

Cap're. Marabou mulatto, of five combinations, the white element in combination being 40–48, the colored 80–88.

Capreolaria (kap-re-o-lah're-ah) (*capreolus,* tendril) **vasa,** vah'sah. Spermatic arteries and veins.

Capreolaris, kap-re-o-lah'ris (*capreolus,* tendril). Capreolate. Twisted, spiral, as spermatic vessels.

Capreolus, kap-re'ol-us (tendril). Helix.

Capria, kap're-ah. Capparis spinosa.

Capric acid, kap'rik as'id. Acid in butter, fusel oil, and other substances; caproic acid.

Capricornus, kap-re-kor'nus. Plumbum.

Caprifolia, kap-re'fo-le-ah (*caper,* goat, *folium,* leaf). Lonicera periclymenum.

Caprifolium distinctum, kap-re-fo'le-um dis-tinck'tum. Lonicera periclymenum. **C. pericly'menum,** Lonicera periclymenum. **C. sempervi'vens,** Lonicera sempervivens. **C. sylvat'icum,** Lonicera periclymenum.

Capriloquium, kap-re-lo'kwe-um (*caper,* goat, *loquor,* to speak). Egophony.

Caprinic acid, kap-rin'ik as'id. Capric acid.

Caprizans pulsus, kap-re'zans pul'sus (*caper,* a goat). Bounding pulse. See *Pulse, caprizant.*

Caproic (kap-ro'ik) or **Capron'ic ac'id.** $C_{10}H_{20}O_2$. Acid in sweat, butter, and oxidized albumins; capric acid.

Cap'ron. Fumaria officinalis.

Capronic acid, kap-ron'ik as'id. Caproic acid.

Capros (kap'ros). Penis.

Caproylamine, kap-royl'am-een. $C_6H_{15}N$. Ptomaïnes occurring in putrefaction of yeast and in cod-liver oil. See *Ptomaïnes* (table).

Capryl, kap'ril. Radical of a series including caprylic acid and caprylic alcohol.

Capryl'ic acid. Acid united with glycerin and some animal fats; forms caprylates.

Capsa, kap'sah (chest). Capsule, case. **C. chirur'gica,** case of drawers for surgical apparatus. **C. cor'dis,** pericardium.

Capsaicin, kap-sa'is-in. See *Capsicum annuum.*

Capsarium, kap-sah're-um. Capsula.

Capsel'la (dim. of **Capsa**) **bur'sa pasto'ris.** Thlaspi bursa.

Capsici fructus, kap'se-se fruc'tus. Red or cayenne pepper.

Capsicia, kap-sis'e-ah. See *Capsicum.*

Capsicin (kap'se-sin) or **Capsici'na.** See *Capsicum.*

Capsicol, kap'sik-ol. Oily material derived from capsicum.

Capsicum, kap'sik-um (*kapto,* to bite). Officinal name of fruit of Capsicum fastigiatum (Ph. U. S. and Br.), whence cayenne pepper is obtained—Cayenne, Guinea, African, Chilli, or Chilly pepper, garden ginger. The pungent aromatic properties of baccæ capsici, capsicum berries, known in commerce as Guinea pepper, pod pepper, chillies, are yielded to ether, alcohol, and water. They are highly stimulant and rubefacient, and are used as a condiment. Powdered capsicum has been found efficacious in delirium tremens, in doses of gr. xx–xxx, in beef-tea and brandy mixture. A volatile alkaloid, *Capsicine,* has been derived from them; also a body resembling camphor, called *Capsicia.* **C. an'nuum,** chiefly grown in this country, was formerly regarded as the main and officinal source of capsicum. **C. bacca'tum,** bird pepper. **C. fastigia'tum,** see *Capsicum.* **C. frutes'cens,** of E. Indies, spur pepper, goat pepper. These three plants are indigenous in warmer regions of Asia and America, and are cultivated all over the world. **C. gros'sum,** bell pepper, is considered a variety of C. frutescens. **C. Hispan'icum,** Capsicum annuum. **C. lon'gum,** C. annuum. **C. tetrago'num,** boneset pepper, from Jamaica, variety of C. annuum.

Cap'sis. Quick breathing or swallowing.

Capsitis, kap-se'tis. Inflammation of capsule of lens.

Capsocataracta, kap-so-kat-ar-ak'tah. Capsular cataract.

Cap'sula (dim. of **Capsa**). Capsulè; alveolus of lung. **C. adipo'sa,** capsule, external. **C. aq'uea cartilagino'sa,** membrane of Descemet. **C. articula'ris,** capsular ligament. **C. bul'bi oc'uli,** capsule of Bonnet. **C. commu'nis Glisso'nii,** capsule of Glisson. **C. crystal'lina,** capsule of lens. **C. den'tis,** dental follicle or capsule. **C. fibro'sa,** sclerotica; fibrous capsule of kidney. **C. Glisso'nii** or **hepat'ica,** capsule of Glisson. **C. hæmat'ica,** capsule, hæmatic. **C. humo'ris aq'uei,** membrane of Descemet; see *Aqueous humor.* **C. len'tis,** capsule of lens. **C. lumba'ris,** receptaculum chyli. **C. Müllerii,** Bowman's capsule. **C. nervo'rum,** neurilemma; perineurium. **C. nu'clei cerebel'li,** white fibres around dentate body. **C. ova'rii,** peritoneal covering of ovary. **C. præaquo'sa,** membrane of Descemet. **C. prostat'ica,** pelvic and prostatic fascia. **C. re'nis,** suprarenal capsule. **C. Ret'zii,** C. prostatica. **C. sequestra'lis** or **seques'tri,** see *Sequestrum.* **C. suprarena'lis,** suprarenal capsule. **C. synovia'lis,** synovial bursa. **C. ve'næ por'tæ,** capsule of Glisson.

Capsulæ (kap'su-le) **atrabilia'riæ.** Suprarenal capsules. **C. lie'nis** or **Malpig'hii,** corpuscles of spleen. **C. rena'les,** suprarenal capsules. **C. semina'les,** vesiculæ seminales. **C. synovia'les,** bursæ mucosæ.

Capsular, kap'su-lar. Relating to or resembling a capsule. **C. advance'ment,** operation to produce displacement of the insertion forward of the tendon of an ocular muscle, drawing Tenon's capsule with it. **C. ar'teries,** suprarenal arteries and veins; vessels belonging to suprarenal capsules, divided into superior, middle, and inferior; the first proceed from inferior phrenic, second from aorta, third from renal artery; corresponding veins enter phrenic, vena cava, and renal veins. **C. cat'aract,** cataract of capsule of lens. **C. lig'ament,** articular or fibrous capsule. Membranous, fibrous, and elastic bags or capsules, of whitish consistence, thick, and resisting, which surround joints, are so called.

Capsula'ris hu'mero-scapula'ris. Brachio-capsularis.

Capsule, kap'sule (box or case). Name given by anatomists to enveloping parts which bear no analogy to each other. See *Capsule, gelatinous.* **C., artic'ular,** capsular ligament of joints. **C., atrabil'iary,** suprarenal capsule. **C., aud'itory,** otic vesicle. **C. of Bon'net,** ocular sheath at equator of eyeball, is pierced by tendons of the oblique muscles, and more anteriorly by those of the recti muscles. Posterior portion of sheath, up to passage of tendons, is called capsule of Bonnet; anterior portion, capsule of Tenon. **C., Bowman's,** see *Kidney.* **C. of a cell,** cell membrane. **C., cell'ular, of eye,** see *Eye.* **C., exter'nal,** layer of fatty and connective tissue around the kidney; layer of white nervous fibres between claustrum and nucleus lenticularis. **C., fi'brous,** capsular ligament. **C., gelat'inous,** capsule of gelatin, by means of which copaiba, disagreeable pills, powders, etc. are enveloped in gelatin to conceal their taste. **C. of Glis'son,** membrane described by Glisson, nothing more than dense areolar membrane surrounding vena porta and its ramifications in liver. **C. of glomer'ulus,** see *Capsule of Bowman.* **C. of the heart,** pericardium. **C., hemat'ic,** gelatinous capsule, containing extract made from blood of calf, sheep, or ox, and proposed to be given where there seems to be deficiency of blood-corpuscles, as in chlorosis. **C., hemorrhoi'dal,** instrument which, embracing the base of hemorrhoidal tumor, forms a capsule into which Vienna paste may be applied. **C., hy'aloid,** membrana limitaris of retina. **C., inter'nal,** white nervous fibres between optic thalamus and nucleus caudatus and nucleus lenticularis. **C. of kid'ney,** fibrous covering of kidney; C., renal. **C. of lab'yrinth,** bony investment of membranous labyrinth. **C. of lens,** see *Crystalline.* **C. of Malpig'hi,** C., Bowman's. **C. of Müller,** capsule, Bowman's. **C., na'sal,** C., olfactory. **C. of nerves,** neurilemma. **C., oc'ular,** C. of Tenon; see *Eye.* **C., olfac'tory,** cartilaginous or bony structure in animals, in which the olfactory organs are situated. **C., op'tic,** cartilaginous or bony structure in animals, corresponding with sclerotica in man. **C., ova'rian,** Graafian vesicle. **C., persist'ent,** cuticula dentis. **C., re'nal,** *Suprarenal* or *atrabiliary capsule, Renal gland, Adrenals, Suprarenal body.* A flat triangular body, covering upper part of each kidney as with a helmet. The hollow cavity in its interior contains brown, reddish, or yellowish fluid. The renal capsules were long supposed to be secretory organs of fancied atrabilis. They are ductless glands, and much larger in the fœtus than in the adult, and, in the absence of definite knowledge as to their exact functions, it has been supposed that their importance is possibly limited to the period of fœtal existence. The following facts are of interest: The weight of the right suprarenal body is 4 g.; left, 4.6 g. (E. Bischoff); height, 20–34 mm.; breadth, 41–54; thickness (antero-posterior), 3–6, 9 at base (the left is generally smaller and higher than the right). Globular projections occasionally seen on their surface are called *renunculi succenturiati. Suprarenal cachexia,* the leading characteristics of which are anæmia, general languor, and debility, remarkable feebleness of heart's action, irritability of stomach, and peculiar bronzed skin, was first described by Dr. Thomas Addison of London, as connected with diseased condition of the suprarenal capsules; hence called *Disease of Addison, Bronzed-skin disease.* **C., sem'inal,** extremity of vas deferens, which is sensibly dilated in vicinity of vesiculæ seminales; also vesiculæ themselves. **C., sense,** cavities, in animals, as ear, nose, orbit, etc., in which organs of sense are contained. **C. of spleen,** fibrous investment of that organ. **C., suprare'nal,** capsule, renal. **C., syno'vial,** membranous bag surrounding movable articulations and canals and giving passage to tendons. Synovial capsules exhale, from their articular surface, a fluid to favor motions of parts upon each other. See *Bursa mucosa* and *Synovia.* **C. of teeth,** enamel cuticle. **C. of Tenon,** see *Capsule of Bonnet.* **C. of urinif'erous tu'bule,** C., Bowman's.

Capsulitis, kap-su-le'tis. Inflammation of a capsule or of the capsule of the lens alone. **C. ocula'ris,** inflammation of fibrous capsule of globe of eye.

Cap'sulo-cilia'ris. Relating to capsule of lens and ciliary body.

Cap'sulo-lentic'ular. Relating to the lens and its capsules.

Capsulot'omy (*capsula, tome,* incision). Division of capsule of lens, the instrument used being called a *Cap'sulotome.*

Capta'tion. First stage of hypnotism, in which the subject's attention is fixed.

Capula'ga. Amomum cardamomum.

Capulum, kap'u-lum. Contortion or curvature of the eyelids or other parts.

Capulus, kap'u-lus (handle of anything). Penis.

Cap'uron, card'inal points of. Fixed points on the pelvis, the ileo-pectineal eminence in front, the sacro-iliac articulations behind.

Cap'ut (head). The head. Top of bone or other part. Head of small bones is sometimes termed capitulum, cephalidium, cephalis, cephalium. Glans penis. **C. angula're,** head of quadratus labii superioris muscle. **C. as'peræ arte'riæ,** larynx. **C. auricula're,** muscular slip from styloglossus muscle, arising from cartilage of ear. **C. cæ'cum co'li** or **C. co'li,** see *Cæcum.* **C. cauda'ti,** C. corporis striati. **C. cor'dis,** base of heart. **C. cor'nu poste'rius,** expanded extremity of posterior horn of lateral half of gray substance of spinal cord. **C. epididym'idis,** head of epididymis; globus major. **C. galea'tum,** child's head born with a caul. **C. gal'li, gallina'ceum,** or **gallinag'inis,** see *Gallinaginis caput.* **C. gelatino'sum,** mass of gray matter on back and inner margin of posterior gray column of spinal cord; substantia gelatinosa. **C. genita'le,** glans. **C. inclava'tum** or **incuvea'tum,** head of child impacted during birth. **C. infraorbita'le,** infraorbital head of quadratus labii superioris. **C. lie'nis,** head or upper end of spleen. **C. lu'bricum,** penis. **C. ma'jus,** head of epididymis; globus major. **C. medul'læ,** cerebrum. **C. medul'læ oblonga'tæ,** optic thalamus. **C. Medu'sæ,** venous dilatation around the navel in newborn child, and occurring also in scirrhus of the liver. **C. mi'nus,** tail of epididymis. **C. mon'achi,** Leontodon taraxacum. **C. obli'quum,** adductor hallucis. **C. ob'stipum,** torticollis. **C. os'sis,** head of bone. **C. pancrea'tis,** head of pancreas. **C. pe'nis,** glans penis. **C. pur'gia,** remedies for purging the head: errhines, sternutatories, apophlegmatisantia, etc. **C. quadra'tum,** rectangular appearance of skull noticed in rickets. **C. scap'ulæ,** acromion. **C. succeda'neum** (succedaneous head), tumefied scalp, which first presents in certain cases of labor. **C. ta'li,** head of astragalus. **C. ter'tium,** adductor magnus femoris. **C. tes'tis,** epididymis. **C. vit'uli,** antirrhinum majus. **C. zygomat'icum,** a head of quadratus labii superioris; levator anguli oris.

Caque'ta bark. Carthagena bark.

Car'a. Head, as of a bone. **C. Schul'li,** Malabar plant, applied externally, maturative and resolvent; decoction of root used internally in ischuria.

Carabac'cium. Aromatic wood of India; tonic, stomachic, and antiscorbutic.

Carabay'a bark. From Brazil; allied to cinchona bark; Cinchona elliptica.

Carabus, kar'ab-us. Genus of coleopterous insects, recommended for toothache, pressed between the fingers and rubbed on the gum and tooth. Some species are vesicant.

Cara'che. Pustular eruption on negroes in Peru.

Caracosmos, ka-ra-koz'mos. Sour milk; see *Oxygala.*

Caragahen. Carrageen.

Caragana flava (kar-ag-an'ah flav'ah) or **macrophyl'la.** Shrub, roots of which are considered in China as tonic and emollient, and used also in gout and rheumatism.

Car'ageen. Carrageen.

Caragna, kar-an'yah. Caranna.

Caraiba, kar-i'bah. Coroba.

Caraipa angustifolia, kar-i'pah an-gus-te-fo'le-ah. Astringent tree of Guiana, S. America. **C. fascicula'ta,** S. American tree yielding balsam of tamacoari, used in scabies.

Caraman'nia gum. Bassora gum.

Carama'ta. Tree in Pomeroon, febrifuge bark of which is used in typhoid and remittent fevers.

Carambola, kar-am'bol-ah. Averrhoa carambola.

Caramel, kar'ah-mel. Sugar subjected to action of heat, nearly 400° F., until partly decomposed; deliquescent, of brown color, and strong, agreeable empyreumatic odor.

Caranna (kar-an'yah) or **Carag'na.** Tacamahaca caragna, gum caranna; gum resin flowing from Icico caranna, in New Spain, and formerly used as vulnerary and in plasters.

Carapa Guianensis, kar-ap'ah gee-an-en'sis. Andiroba; S. American tree, ord. Meliaceæ; bark is bitter and astringent; antiperiodic and anthelmintic, virtues depending upon peculiar bitter principle, *carapin.* Oil of the nuts, oleum carapæ, or crab oil, is bitter and anthelmintic, and poisonous to insects. **C. Guineen'sis,** indigenous in Senegal; oil expressed from it—kundah or tallicoonah oil—is purgative and anthelmintic; decoction of wood is tonic, and the resin is used as fumigative in chronic otorrhœa. **C. In'dica** or **Moluccen'sis,** E. Indian tree, bark and root of which are bitter, tonic, and used in diarrhœa and dysentery; seeds are used in colic. **C. Rumph'ii,** of E. Indies, has similar properties. **C. toulou'couna,** bark has properties similar to C. Guineensis; from it a bitter resinoid, *touloucounin,* is obtained.

Carapat, kar'ap-at. Castor oil; Ricinus communis.

Cara'te or **Cara'thes.** Form of endemic chloasma in S. America, New Granada especially, affecting colored races particularly.

Caraway, kar'a-way. Carum. **C. seeds,** see *Carum.* C. water, aqua carui.

Car'bamide. Urea, regarded as the urine of an acid radical with the compound radical amidogen, NH_2; or compound of urea and radical .

Carbanilamide, karb-an-il'am-ide. Phenylurea or amide of carbanitic acid.

Carbanilethane, karb-an-il'eth-ane. Ethyl phenylcarbamate; phenylurethane.

Carbasa (kar'bas-ah) or **Carbasus,** kar'bas-us. Lint; surgical gauze. **C. ac'idi carbol'ici,** carbolic acid gauze. **C. eucalyp'ti,** eucalyptus gauze. **C. thy'mol,** thymol gauze.

Carbazol, karb'az-ol. Diphenylimide.

Carbazotate, karb-az'ot-ate. Picrate. **C. of ammo'nia** or **ammo'nium,** picrate of ammonia or ammonium; combination of ammonia with carbazotic or picric acid, found efficient in intermittent fever and whooping cough.

Carbazotic acid, karb-az-ot'ic as'id. Picric acid.

Car'bide. Carburet.

Carbinol, kar'bin-ol. Methyl alcohol.

Car'bo. Carbon; elementary body, extensively distributed in nature, one of principal elements of organized bodies; coal; charcoal. Anthrax. **C. anima'lis,** animal charcoal, usually prepared by subjecting bones to red heat in close vessels. Result is bone black or ivory black; given in same cases as carbo ligni. The Ph. U. S. and Br. contain a formula for preparation of *carbo animalis purificatus,* purified animal charcoal. **C. car'nis,** C. animalis. **C. fu'ci vesiculo'si,** charcoal prepared from sea-wrack, applied externally in scrofulous enlargements. **C. huma'num,** human excrement. **C. lig'ni** (Ph. U. S. and Br.), *Charcoal, Wood charcoal;* fresh charcoal is antiseptic; used to improve digestive organs in cases of worms, dyspepsia, etc.; as cataplasm to gangrenous and fetid ulcers, tinea, etc., and forms good tooth-powder; dose, gr. x–℥j. **C. lig'no,** C. ligni. **C. os'sium,** animal charcoal. **C. pal'pebræ** or **palpebra'rum,** anthracosis. **C. pa'nis,** burnt bread. **C. san'guinis,** burnt blood. **C. spon'giæ,** spongia usta. **C. trichlora'tus,** carbonis trichloridum. **C. vegeta'bilis** or **vegeta'lis,** wood charcoal.

Carbohæmia, kar-bo-he'me-ah (*carbo, haima,* blood). Accumulation of waste and excrementitious carbon or of carbon compounds in the blood.

Carbohy'drates. Composed of carbon, hydrogen, and oxygen, the H and O forming water; starch dextrin and sugar, for example. They generally contain six atoms of carbon or a multiple of six; most of them are white, solid, and soluble in water. The most important carbohydrates are the sugar and

starch groups, as saccharoses, glucoses, and amyloses, as arranged in the following table (Simon):

CLASSIFICATION OF CARBOHYDRATES.

	Glucoses. $C_6H_{12}O_6$.	Saccharoses. $C_{12}H_{22}O_{11}$.	Amyloses. $C_6H_{10}O_5$.
Vegetable,	Grape-sugar, Fruit-sugar, Mannitose,	Cane-sugar, Melitose, Maltose,	Starch. Dextrin. Gums. Cellulose.
Animal,	Inosite,	Milk-sugar,	Glycogen.

Carbolate, kar'bo-late. Salt formed by union of carbolic acid with a base. Carbolates, especially carbolate of lime, have been much used as antibromics and disinfectants, and internally in diarrhœa, etc.

Carbolic acid, kar-bol'ik as'id (*carbo, oleum,* oil). *Phenic acid, Phenylic acid, Phenol, Coal-tar, Creasote, Hydrated oxide of phenyl, Phenylic alcohol, Phenyl hydrate.* $C_6H_{51}HO$. Solid substance obtained from products of distillation of coal-tar, between 180°–190° C. (356°–374° F.). More closely identified in composition with alcohols than acids; white or colorless when pure, odor and taste like creasote, fusible at from 93° to 106°, forming oily liquid, soluble in 20 parts of water at 60° F., and in alcohol, ether, glycerin, and essential oils. It is officinal in Ph. U. S. and Br., under name *Acidum carbolicum.* It is generally employed externally; when applied pure or in strong solution, it is a strong irritant, exciting burning pain, which is followed by local anæsthesia. Prevents or corrects putrefaction in animal substances, and has therefore been used in cases of purulent infection, dissecting wounds, hospital gangrene, etc. It has also been extensively employed as a disinfectant, and, from its parasiticidal influence, in diseases connected with presence of microscopic plants or animals, as in scabies, porrigo, thrush, etc., applied in weak solution or ointment. It has been used as a dressing for wounds, and as a gentle irritant or alterative, or concentrated, as a mild escharotic, in chronic ulcers, cutaneous affections, etc. Internally, it is given in doses of one or two grains, or in its concentrated liquid form (obtained by placing bottle containing it in hot water) of one or two drops, in a tablespoonful or two of sweetened water, in vomiting or diarrhœa or gastric and intestinal affections of zymotic origin, as yeasty vomiting, flatulence depending on fermentation in undigested food, etc. Its salts, as carbolates or phenates, are used externally in solution.

Carbolic acid may be prescribed externally in aqueous, alcoholic, and ethereal solutions, solution in glycerin—*glyceritum acidi carbolici* (Ph. Br.)—lard, etc., in form of carbolized or antiseptic liniments, ointments (*unguentum acidi carbolici,* Ph. U. S. and Br.), plasters, etc. The Ph. Br. has *acidum carbolicum liquefactum,* carbolic acid, liquefied by addition of 10 per cent. of water. **C. ac'id, impure',** *acidum carbolicum crudum* (Ph. U. S.), liquid obtained during distillation of coal-tar at temperature between 170°–190° or 338° and 374° F.; it consists of carbolic and cresylic acids, with impurities derived from coal-tar, and is used externally or for disinfecting purposes. **C. acid, liq'uefied,** see *Carbolic acid.* **C. acid pois'oning,** carbolism; symptoms are weak pulse, faintness, muscular debility, stertorous expiration. **C. ac'id wa'ter,** see *Carbolic acid.*

Carbolism, kar'bol-izm. Deleterious effects upon the system by absorption of carbolic acid, when taken internally to excess or absorbed through an exposed surface, with perhaps vomiting and diarrhœa, coma, anæsthesia, dark urine, and sometimes a fatal result. If the acid has been swallowed, give albuminous drinks, sweet oil, lime-water, or soluble sulphate.

Carbolized, kar'bol-ized. Carbolated; treated with carbolic acid, so as to make the substance antiseptic.

Carbolu'ria. Occurrence of an aromatic compound in the urine following the internal administration of carbolic acid.

Carbon. Carbo; charcoal. **C. bichlo'ride,** *carbonic chloride, tetrachloride of carbon;* transparent colorless fluid with ethereal odor, made from chloroform by action of chlorine, or by passing dry chlorine through bottle containing sulphuret of carbon. As an anæsthetic it resembles chloroform, but has a more depressing effect on the action of the heart. **C. bisul'phide,** carbonis sulphuretum. **C. diox'ide,** carbonic acid. **C. monox'ide,** carbonic oxide. **C. sesquichlo'ride,** carbonis trichloridum. **C. sesquii'odide,** carbonis sesquiiodidum. **C., sul'phide,** carbonis sulphuretum. **C. sul'phuret,** carbonis sulphuretum. **C. terchlo'ride,** carbonis trichloridum; see *Chloroform.* **C. tetrachlo'ride,** carbon, bichloride of.

Carbonaceous, kar-bon-a'shus. Carboniferous.

Carbonæmia, kar-bon-e'me-ah. Undue quantity of carbon—carbon dioxide—in the blood.

Carbonagogue, kar-bon'ag-og (*carbon, agogos,* leading). Agent that expels carbon.

Carbonas, kar-bo'nas. Carbonate; generic name for salt formed by combination of carbonic acid with salifiable base. **C. ammo'niæ** or **ammo'nicus,** ammonium carbonate. **C. baryt'icus,** barium carbonate. **C. bismu'thicus,** bismuth carbonate. **C. cal'cicus,** calcium carbonate. **C. ferri-saccha'ratus** seu **ferro'sus carbona'tus,** saccharated carbonate of iron. **C. ka'licus,** potassium carbonate. **C. lith'icus,** lithium carbonate. **C. magne'sicus,** magnesium carbonate. **C. na'tricus,** sodium carbonate. **C. plum'bicus,** lead carbonate. **C. potas'sicus,** potassium carbonate. **C. so'dicus,** sodium carbonate. **C. so'dii,** sodium carbonate. **C. zin'cicus,** zinc carbonate.

Carbonate, kar'bon-ate. Carbonas. **C. ammo'nium, ba'rium, i'ron, lith'ium,** etc., see *Ammonium, Barium, Iron, Lithium,* etc.

Carbonated, kar'bon-a'ted. Impregnated with carbonic acid.

Carbo'nei bisul'phidum (Ph. U. S.). Carbon bisulphide; internally, not important except as a poison; externally, counter-irritant and a local anæsthetic. **C. tetrachlo'ridum,** carbon tetrachloride. **C. trichlo'ridum,** carbon trichloride.

Carboneum, kar-bo'ne-um. Carbon. **C. chlora'tum,** chloroform. **C. oxyda'tum,** carbonic oxide. **C. sulphura'tum,** carbon bisulphide. **C. trichlora'tum,** carbon trichloride.

Carbonic acid, kar-bon'ik as'id. *Solid air of Hales, Factitious* or *fixed air, Carbonaceous* or *calcareous* or *aërial* or *mephitic acid, Mephitic air, Carbon dioxide;* gas supporting neither respiration nor combustion, not often used in medicine. It is the main agent in effervescent draughts, fermenting poultices, etc.; it is often found occupying the lower parts of mines—then called choke damp—caverns, tombs, wells, brewers' vats, etc., and not unfrequently has been a cause of death; lime thrown into such places absorbs the carbonic acid. **C. ac'id wa'ter,** aqua acidi carbonici; carbon monoxide. **C. ox'ide,** gas resulting from passing carbonic acid over red-hot charcoal or metallic iron; positively deleterious, often causing injurious phenomena, which have been ascribed to inhalation of carbonic acid; when directed on denuded surface it produces anæsthetic effects similar to those of chloroform.

Carboniferous, kar-bon-if'er-us (*carbon, fero,* to bear). Containing carbon.

Carbonis bichloridum, kar-bo'nis bi-klo'rid-um. Bichloride or dichloride or tetrachloride of carbon, chlorocarbon, tetrachlormethane, perchlormethane. Made by decomposing olefiant gas, chloroform, or bisulphide of carbon by chlorine gas. Transparent, very volatile, oily fluid, smelling something like chloroform; s. g. 1.59. When inhaled acts like chloroform, but more slowly and depressingly on the heart; has been used hypodermically in neurotic affections in dose of 20 drops. **C. sesquichlo'ridum,** carbonis trichloridum. **C. sesquiïo'didum** or **sesquiïodure'tum,** sesquiïodide or sesquiïoduret of carbon. Made by mixing concentrated alcoholic solutions of iodine and potassa, until former loses its color; solution is obtained from which water throws down yellow precipitate, sesquiïodide of carbon. Used in enlarged glands and in cutaneous affections; applied

externally. See *Iodoform.* **C. sulphure'tum,** sulphuret, sulphide, bisulphide, or bisulphuret of carbon, carburet of sulphur. Transparent, colorless fluid, with very penetrating, disagreeable odor and taste, cooling at first, but afterward acrid and aromatic; diffusible, excitant, diaphoretic, diuretic, emmenagogue, and antispasmodic. Used externally where cooling influence must be rapidly exerted, and as local anæsthetic, and also inhaled as an anæsthetic. **C. trichlo'ridum** or **sesquichlo'ridum,** terchloride or sesquichloride of carbon. Formed by action of chlorine or chlorohydric ether under influence of sunlight. Has been given in cholera and applied to correct fetor of foul ulcers.

Carbonium, kar-bo'ne-um. Charcoal. **C. sulphura'tum,** carbonis sulphuretum.

Carbonization, kar-bon-i-za'shun. Process by which substances are changed into charcoal by combustion.

Carbonized, kar'bon-ized. Changed into charcoal.

Carbonometry, kar-bon-om'et-re (*carbon, metron,* measure). Estimation of amount of carbonic acid in air of expiration.

Car'bonyl. Class of compounds uniting with H to form alcohol; uniting with H and O of water to form monobasic acids.

Carbosulphuric acid, kar-bo-sul-fu'rik as'id. Sulphocarbolic acid.

Carboxyhæmoglo'bin. Compound of hæmoglobin and carbon monoxide, producing suffocation when brought in contact with the red corpuscles by its paralyzant action upon them.

Carbox'yl. Carbonyl.

Carbuncle, kar'bun-kl (dim. of **Carbo,** live coal). Localized, deeply-seated suppurative inflammation involving the skin and cellular tissue, accompanied with a hard, painful swelling and asthenia; often erroneously termed anthrax, although allied to it in symptoms, etc. Anthrax. **C. ber'ry,** terminthus. **C., fa'cial,** œdematous inflammatory swelling of the lip, involving the nose and cheek, often preceded by pustule or vesicle; painful, sloughing, and accompanied with constitutional depression. It is sometimes malignant; miscalled malignant pustule. **C., fun'gous,** chronic fungous discharging tumor on head or trunk; terminthus. **C. of tongue,** glossanthrax.

Car'buncled face. Gutta rosea.

Carbuncular (kar-bun'ku-lar) or **Carbun'culate.** Relating to or resembling carbuncle; anthracoid. **C. erysip'elas,** symptomatic charbon. **C. exan'them,** anthracia.

Carbunculatio oculi, kar-bun-ku-lah'she-o ok'u-le. Gangrenous inflammation of the eyelids.

Carbunculation, kar-bun-ku-la'shun. Formation of carbuncle; development of gangrene.

Carbunculoid, kar-bun'ku-loid. Resembling carbuncle.

Carbunculosis, kar-bun-ku-lo'sis. Anthracosis.

Carbunculous, kar-bun'ku-lus. Relating to carbuncle.

Carbunculus, kar-bun'ku-lus (dim. of **Carbo,** live coal). Carbuncle, anthrax. **C. angino'sus,** cynanche maligna. **C. benig'nus,** boil. **C. bul'bi,** carbuncular inflammation of eye. **C. contagio'sus,** see *Anthrax.* **C. epizoö'ticus,** malignant pustule. **C. fungoï'des,** carbuncle, fungous. **C. Gal'licus,** see *Anthrax.* **C. Hungar'icus,** see *Anthrax.* **C. labio'rum et gena'rum,** cancer aquaticus. **C. mag'nus** or **malig'nus,** contagious anthrax. **C. oc'uli,** anthracosis of eye. **C. palpebra'rum,** gangrenous inflammation of the eyelids. **C. pestilentia'lis,** contagious anthrax. **C. Polo'nicus,** see *Anthrax.* **C. pulmo'num,** gangrenous inflammation of the lungs. **C. septentriona'lis,** see *Anthrax.* **C. sep'ticus,** contagious anthrax. **C. Sibe'ricus,** malignant pustule. **C. sim'plex** or **sporad'icus,** anthrax. **C. symptomat'icus,** anthrax as a symptom of other affections, as certain fevers or epidemic diseases. **C. ulcusculo'sus,** cynanche maligna.

Car'buret. Compound of carbon and some other element; carbide.

Carburetted hydrogen, kar-bu-ret'ted hi'dro-jen. See *Hydrogen, carburetted.*

Carcaros, kar'kar-os (*karkairo,* to tremble). Fever with general tremor and unceasing noise in the ears; intermittent fever.

Carche'sium. Apparatus for reduction of dislocations.

Carcinæmia, kar-sin-e'me-ah. Cancerous cachexia.

Carcinelcosis, kar-sin-el-ko'sis (*carcinus, helkosis,* ulceration). Cancerous ulcer.

Carcinodes (kar-sin-o'deez) or **Carcinoï'des.** Cancroid.

Carcinoma, kar-sin-o'mah (*karkinos,* cancer). Cancer. **C. alveola're,** colloid. **C. asbol'icum,** chimney-sweeper's cancer. **C., atroph'ic,** barsati. **C. caminario'rum,** chimney-sweeper's cancer. **C. collo'des** or **colloï'des,** see *Colloid.* **C. cuta'neum** or **cu'tis,** cancer of the skin. **C. du'rum,** scirrhus. **C. encephaloï'des,** encephaloid. **C. epithelio'des** or **epithelio'sum,** epithelial cancer. **C. fascicula'tum,** spindle-celled sarcoma. **C. fibro'sum,** scirrhus. **C. gelatino'sum,** colloid cancer. **C. glandula're,** glandular cancer of the epithelium. **C. gum,** colloid. **C. hæmato'des,** hæmatodes fungus. **C., hepat'ic,** hepatoscirrhus. **C. hyali'num,** colloid. **C. intestino'rum,** cancer of the intestines. **C. lenticula're,** scirrhous cancer of the skin, afterward involving the glands. **C. lin'guæ,** glossocarcinoma. **C. of the liv'er,** hepatoscirrhus. **C. medulla're** or **medullo'sum,** encephaloid. **C. melano'des** or **melanot'icum,** cancer, melanotic. **C. mol'le,** encephaloid. **C. mucip'arum** or **muco'sum,** colloid. **C. myxomato'des,** cancer in which mucous tissue is involved. **C. ni'grum,** cancer, melanotic. **C. osteoï'des,** spina ventosa; osteoid cancer. **C. reticula're** or **reticula'tum,** scirrhus. **C. sarcomato'des,** sarcomatous cancer. **C. scirrho'sum,** scirrhus. **C. scro'ti,** cancer, chimney-sweeper's. **C. sim'plex,** scirrhus. **C. spongio'sum,** encephaloid, hæmatodes fungus. **C., squam'ous-celled,** epithelial cancer. **C. testic'uli,** see *Sarcocele.* **C. tubero'sum,** cancer involving connective tissue, nodules appearing on various parts, going on to softening and ulceration. **C., tu'bular,** cylindroma. **C. u'teri,** metrocarcinoma, metroscirrhus. **C. ventric'uli,** gastroscirrhus; see *Gastrostenosis.* **C. villo'sum,** cancer, villous; papilloma.

Carcinomatous, kar-sin-om'at-us. Relating to carcinoma.

Carcinomelcosis, kar-sin-om-el-ko'sis. Carcinelcosis.

Carcinoses, kar-sin-o'ses. Family of diseases embracing different forms of cancer.

Carcinosis, kar-sin-o'sis. General development of carcinoma; cancerous cachexia; cancer.

Carcinosus, kar-sin-o'sus. Cancerous.

Carcinous, kar'sin-us. Cancerous.

Carcinus, kar'sin-us. Cancer. **C. ebur'neus,** sclerema. **C. globulo'sus,** carcinoma tuberosum. **C. medulla'ris,** medullary carcinoma. **C. mela'neus,** melanotic cancer. **C. spongio'sus,** medullary carcinoma.

Cardamantica, kar-dam-an'tik-ah. Cardamine pratensis, Lepidium iberis.

Cardamine (kar-dam-e'ne) **ama'ra.** European bitter-cress, antiscorbutic. **C. chelido'nia,** herb of S. Europe, antiscorbutic. **C. fonta'na,** Sisymbrium nasturtium. **C. hirsu'ta,** species of small bitter-cress; properties those of C. amara. **C. impa'tiens,** species of England and France, with similar properties. **C. nastur'tium,** Sisymbrium nasturtium. **C. praten'sis,** *Cardamon, Cardamum, Ladies-smock, Cuckoo-flower, Common bitter cress, Meadow cress,* ord. Cruciferæ. Flowers are alterative, antiscorbutic, and antispasmodic. **C. umbro'sa,** C. amara.

Cardaminum minus, kar-dam'e-num me'nus. Tropæolum majus.

Cardamom, kar'dam-om. Fruit of Elettaria cardamomum (Ph. U. S.), and various species of amomum and elettaria. **C., Bengal',** Amomum maximum. **C., clus'ter,** Amomum cardamomum. **C., great'er,** or **greater Jav'a,** Amomum grana paradisi. **C., Jav'a,** Amomum maximum. **C., les'ser,** Amomum cardamomum. **C., long,** fruit of Elettaria major from Ceylon. **C.,**

Madagas'car, fruit of Amomum angustifolium or A. grana paradisi. **C., Mal'abar**, variety of lesser cardamom; see *Amomum cardamomum*. **C., Nepal'**, Amomum maximum. **C., offic'ial** or **offic'inal**, Amomum cardamomum. **C., round**, Amomum cardamomum. **C., small**, C., lesser. **C., true**, Amomum cardamomum.

Cardamomum, kar-dam-o'mum. See *Amomum cardamomum*. **C. Ar'abum**, Amomum grana paradisi. **C. ma'jus**, Amomum grana paradisi. **C. Malabaren'se** or **Malabar'icum**, see *Amomum cardamomum*. **C. max'imum**, Amomum grana paradisi. **C. mi'nus**, Amomum cardamomum. **C. pipera'tum**, Amomum grana paradisi. **C. racemo'sum**, Amomum cardamomum. **C. rotun'dum**, Amomum cardamomum. **C., wild**, Fagarastrum Capense. **C. Zeylan'icum**, Ceylon cardamom.

Cardamomus, kar-dam-o'mus. Cardamomum.

Cardamon (kar'dam-on) or **Car'damum**. Cardamine pratensis.

Car'den's amputation, am-pu-ta'shun. See *Amputation*.

Cardia, kar'de-ah (the heart). Superior or œsophageal orifice of the stomach. The heart.

Cardiac, kar'de-ak. Relating to the heart or to the upper orifice of the stomach. A cordial. Tonic to the heart. **C. an'eurism**, aneurism of the heart. **C. ap'oplexy**, hemorrhage in the structure of the heart. **C. ar'teries**, coronary arteries, two in number; arise from aorta, little above free edge of sigmoid valves, and are distributed on both surfaces of the heart. **C. asth'ma**, asthma dependent on disease of the heart. **C. cy'cle**, period of a systole and diastole of the heart. **C. disease**, generic term for the diseases of the heart. **C. gan'glia**, minute ganglia upon nerves distributed to the heart. **C. gan'glion**, G. of Wrisberg, nervous ganglion situate beneath the arch of the aorta, to the right side of the ligament of the ductus arteriosus in the superficial cardiac plexus. **C. glands**, small œsophageal glands at cardiac opening of stomach. Small lymphatic glands in mediastinum. **C. im'pulse**, visible elevation of the chest-wall from movement of the heart. **C. mur'murs**, see *Murmurs*. **C. mus'cle**, the muscular substance of the heart. **C. nerves**, commonly three on each side, superior, middle, and inferior, furnished by corresponding cervical ganglia. Usually there are two on the left side, the upper and middle, drawing their origin from the last two cervical ganglia. There are, besides, cardiac filaments, from the pneumogastric nerve, confounded with the above. **C. notch**, space on anterior surface of left lung for apex of heart. **C. or'ifice**, opening between stomach and œsophagus. **C. or'ifices**, opening between cavities of the heart. **C. plex'us**, there are three plexuses: 1. *Great cardiac plexus*, situate upon bifurcation of trachea; formed by convergence of middle and inferior cardiac nerves, and by branches from the pneumogastric, descendens noni, and first thoracic ganglion. 2. *Anterior cardiac plexus*, situate in front of ascending aorta near its origin; formed by filaments from superior cardiac nerves, from cardiac ganglion, and from great cardiac plexus. Filaments from this plexus accompany the left coronary artery, and form the anterior coronary plexus. 3. *Posterior cardiac plexus*, seated upon posterior part of ascending aorta near its origin; formed by branches from great cardiac plexus; divides into two sets of branches, which together constitute the posterior coronary plexus. **C. revolu'tion**, C. cycle. **C. sed'atives**, substances which diminish the force and frequency of the action of the heart; see *Heart*. **C. sounds**, heart, sounds of. **C. stim'ulants**, substances which speedily increase the force and frequency of the pulse in cases of depressed vitality, etc.; see *Heart*. **C. ton'ics**, substances which do not exhibit any immediate action on the heart, but which gradually increase the force of the pulse; see *Heart*. **C. valves**, see *Heart*. **C. veins**, coronary veins, commonly four in number, two anterior and two posterior. Among the former—venæ innominatæ of Vieussens—one runs along the right border of the heart, called the vein of Galen. The cardiac veins open into the right auricle by one orifice, furnished with a valve.

Cardi'aca cris'pa or **lyc'opus**. Leonurus cardiaca. **C. pas'sio**, cardialgia. **C. triloba'ta** or **vulga'ris**, Leonurus cardiaca.

Cardiaci (kar-de'as-e) **mor'bi**. Diseases of the heart.

Cardiacus, kar-de'ak-us. Cardiac, cordial, stomachal. Leonurus.

Cardiagra, kar-de'ag-rah (*cardia*, *agra*, seizure). Cardialgia; gout or pain of the heart.

Cardiagraphy, kar-de-ag'ra-fe (*cardia*, *graphe*, description). Anatomical description of the heart.

Cardial, kar'de-al. Relating to the heart; cardiac.

Cardialgia, kar-de-al'je-ah (*cardia*, *algos*, pain) or **Cardial'gy**. Pain of the stomach; stomach-ache; heartburn. Impaired appetite, with gnawing or burning pain in the stomach or epigastrium; symptom of dyspepsia. Neuralgia of the stomach. Pyrosis. Nervous cardialgia is a painful affection of the stomach not dependent on perceptible change of structure. **C. inflammato'ria**, gastritis. **C., ner'vous**, see *Cardialgia*. **C. sputato'ria**, pyrosis.

Cardialgic, kahr-de-al'jik (same etymon). Relating to, or affected with, cardialgia.

Cardial'gy. Cardialgia.

Cardialogy, kar-de-al'o-je (*cardia*, *logos*, discourse). Treatise on the heart. Anatomy of the heart. Description of the heart.

Cardiamorphia, kar-de-ah-mor'fe-ah (*cardia*, *a*, priv., *morphe*, shape). Malformation of the heart.

Cardianæsthe'sia or **Cardianæsthe'sis**. Loss of sensibility of the heart.

Cardianastrophe, kar-de-an-as'tro-fe (*cardia*, *anastrophe*, turning round). Transposition or displacement of the heart.

Cardianeuria, kar-de-ah-nu're-ah (*cardia*, *a*, priv., *neuron*, nerve). Deficient nervous power of the heart.

Cardianeurysma, kar-de-an-u-riz'mah. Aneurism of the heart. Dilatation of cardiac orifice of the stomach.

Cardiant, kar'de-ant. Medicine affecting the action of the heart; see *Cardiac sedatives*, *C. stimulants*, and *C. tonics*.

Cardiaplegia, kar-de-ah-ple'je-ah. Cardioplegia.

Cardiarctia, kar-de-ark'te-ah (*cardia*, *arctus*, narrow). A hybrid term denoting diminution of cavities of the heart from hypertrophy. Cardiostenosis.

Cardiasthma, kar-de-asth'mah. Cardiac asthma.

Cardiatelia, kar-de-ah-ta'le-ah. Defective development of the heart. Atelecardia.

Cardiatomy, kar-de-at'o-me (*cardia*, *tome*, incision). Cardiotomy. Dissection of the heart; anatomy of the heart.

Cardiatrophia, kar-de-at-rof'e-ah. Atrophy of the heart.

Cardiauxe, kar-de-awks'e (*cardia*, *auxe*, increase). Hypertrophy of the heart.

Cardicentesis, kar-de-sen-ta'sis (*cardia*, *kentesis*, puncture). Puncture of the heart; aspiration of the heart.

Cardiechemata, kar-de-ek-em'at-ah (*cardia*, *echema*, sound). Heart-sounds.

Cardiectasis, kar-de-ek'tas-is (*cardia*, *ektasis*, extension). Dilatation of the heart; see *Aneurism of the heart*. Cardianeurysma. **C. partia'lis**, aneurism of the heart.

Cardielcosis, kar-de-el-ko'sis (*cardia*, *helcos*, ulcer). Ulceration of the heart.

Cardiethmoliposis, kar-de-eth-mo-lip-o'sis (*cardia*, *ethmos*, sieve, *lipos*, fat). Deposit of adipose matter in connective tissue of the heart. Steatosis cordis.

Cardieurysma, kar-de-u-riz'mah (*cardia*, *eurusma*, dilatation). Aneurism of the heart; abnormal dilatation of the heart.

Cardihelcosis, kar-de-hel-ko'sis. Ulceration of the heart.

Cardilæa, kar-de-le'ah. Cardialgia.

Cardimelech, kar-dim'el-ek. Supposititious active principle seated in the heart, governing the vital functions.

Cardinal (kar'din-al) **flow'er.** Lobelia cardinalis. **C. f., blue,** Lobelia syphilitica. **C. plant,** Lobelia cardinalis. **C. points,** principal nodal and focal points associated with refraction of spherical surfaces. **C. veins,** veins in the embryo, passing from the Wolffian bodies to the heart.

Cardinamentum, kar-din-am-en'tum (*cardo,* hinge). Ginglymus; gomphosis; articular surface of inferior extremity of humerus.

Cardio-aortic, kar'de-o-a-ort'ik. Relating to heart and aorta. **C.-arte'rial,** relating to heart and arteries.

Cardiobotanum, kar-de-o-bot'an-um. Centaurea benedicta.

Cardiocele, kar-de-o-se'le (Eng. kar'de-o-seel), (*cardia, kele,* rupture). Hernia of the heart, especially into the abdominal cavity, *C. abdominalis.*

Cardiocentesis, kar-de-o-sen-ta'sis. Cardicentesis.

Cardioclasis, kar-de-ok'las-is (*cardia, klasis,* rupture). Rupture of the heart.

Cardiodemia, kar-de-o-de'me-ah (*cardia, demos,* fat). Fatty heart.

Cardiodyne, kar-de-od'in-e (*cardia, odune,* pain). Pain in the heart or cardiac region; cardialgia. **C. spasmod'ica intermit'tens,** angina pectoris.

Cardiodyn'ic (same etymon). Relating to pain in the heart.

Cardiodysæsthesia (kar-de-o-dis-es-tha'ze-ah) or **Cardiodysæsthesis,** kar-de-o-dis-es-tha'sis. Impaired sensibility of the heart.

Cardiodysneuria, kar-de-o-dis-nu're-ah. Impaired nervous supply to the heart; want of tone in the heart.

Cardiogmus, kar-de-og'mus. Cardialgia; palpitation; obscure aneurism of the heart or great vessels; angina pectoris. **C. cor'dis sinis'tri,** angina pectoris. **C. strumo'sus,** exophthalmic goitre.

Cardiogram, kar'de-o-gram. Tracing of movements, or beat of apex, of heart by a cardiograph.

Cardiograph, kar'de-o-graf (*cardia, grapho,* to write). Instrument in which traces of the ventricles are communicated to a writing-lever, similar to a sphygmograph.

Cardiography, kar-de-og'raf-e. Examination with a cardiograph.

Car'dio-inhib'itory cen'tre. Supposed nerve-centre in medulla oblongata, arresting the heart's action when stimulated. **C. nerves,** fibres of spinal accessory nerve to the par vagum.

Cardioliths, kar'de-o-liths (*cardia, lithos,* stone). Concretions of the pericardium, partially incrusting the heart.

Cardiol'ogy. Cardialogy.

Cardiomalacia, kar-de-o-mal-ah'she-ah (*cardia, malakia,* softness). Softening of the heart, from inflammation or as a consequence of lesion of function of nutrition.

Cardiometer, kar-de-om'et-ur. See *Hæmodynamometer.*

Cardiometry, kar-de-om'et-re (*cardia, metron,* measure). Measurement of the heart, as by percussion and auscultation.

Cardiomyoliposis, kar-de-o-me-o-lip-o'sis (*cardia, mus,* muscle, *lipos,* fat). Steatosis cordis; fatty degeneration of the heart.

Cardion'cus (*cardia, onkos,* tumor). Aneurism of the heart or aorta.

Cardioneuralgia, kar-de-o-nu-ral'je-ah. Neuralgia of the heart; angina pectoris.

Cardionosus, kar-de-on'os-us (*cardia, nosos,* disease). Disease of the heart.

Cardiopalmus, kar-de-o-pal'mus (*cardia, palmos,* palpitation). Rapid and feeble palpitation or fluttering of the heart.

Cardioparaplasis (kar-de-o-par-ap'las-is) or **Cardioparaplas'mus** (*cardia, paraplazo,* to lead astray). Malformation of the heart.

Cardiopathia, (kar-de-o-path-e'ah) or **Cardiop'athy** (*cardia, pathos,* affection). Disease of the heart.

Cardiopericarditis, kar-de-o-per-e-kar-de'tis. Carditis with pericarditis.

Cardiophthalmos, kar-de-of-thal'mos (*cardia, ophthalmos,* eye). Exophthalmic goitre.

Cardioplectic, kar-de-o-plek'tik. Relating to cardioplegia; one so affected.

Cardioplegia, kar-de-o-ple'je-ah (*cardia, plege,* a stroke). Paralysis of the heart; wound of the heart; spasm of cardiac orifice of stomach.

Cardioplethora, kar-de-o-pleth'o-rah. Plethora, or engorgement of heart with blood.

Cardiopneumatic, kar-de-o-nu-mat'ik (*cardia, pneumon,* lung). Relating to the heart and lung. **C. move'ments,** movements of the air in respiration due to pulsations of the heart and great vessels.

Cardiopneumograph, kar-de-o-nu'mo-graf (*cardia, pneumon,* lung, *grapho,* to write). Instrument devised to describe or register movement of the air in respiration, as affected by systole and diastole of heart and action of larger vessels.

Cardiopolyæmia, kar-de-o-pol-e-e'me-ah. Cardiaplethora.

Cardiopulmonary (kar-de-o-pul'mon-a-re) or **Cardiopulmonic,** kar-de-o-pul-mon'ik. Relating to the heart and lungs.

Cardiopuncture, kar-de-o-punk'ture. Puncture of the heart, as with a needle, to study its movements cardiographically.

Car'dio-res'piratory mur'mur. See *Murmur.*

Cardiorrheuma, kar-de-or-rhu'mah (*cardia, rheuma,* defluxion). Rheumatism of the heart.

Cardiorrhexis, kar-de-or-rheks'is (*cardia, rhexis,* laceration). Laceration or rupture of the heart.

Cardioscirrhosis, kar-de-o-skir-rho'sis. Scirrhus of heart.

Cardiosclerosis, kar-de-o-skle-ro'sis (*cardia, skleros,* hard). Induration of heart.

Cardioscope, kar'de-o-skop (*cardia, skopeo,* to see). Instrument for observing heart movements.

Cardiospermum (kar-de-o-spur'mum) **halicac'abum.** Root of this plant of India, winter-cherry, balloon-vine, heart-seed, growing in U. S., is aperient; leaves are expectorant; externally is applied to rheumatic parts.

Cardiosphyg'mograph. Cardiograph and sphygmograph combined.

Cardiostenosis (kar-de-o-sten-o'sis) or **Cardiastenosis** (*cardia, stenosis,* contraction). Contraction of the openings or cavities of the heart.

Cardiothyroid (kar-de-o-thi'roid) **exophthal'mos.** Exophthalmic goitre.

Cardiotomy, kar-de-ot'om-e (*cardia, tome,* incision). Dissection of the heart; anatomy of the heart.

Cardiotoxic, kar-de-o-toks'ik (*cardia, toxicon,* poison). Poisonous to the heart.

Cardiotrauma (kar-de-o-trow'mah) or **Cardiotrau'sis** (*cardia, trauma,* wound). Wound of the heart.

Cardiotromus, kar-de-ot'rom-us (*cardia, tromos,* tremor). Rapid and feeble palpitation or fluttering of the heart.

Cardiotrophia, kar-de-o-trof'e-ah (*cardia, trophe,* nourishment). Nutrition of the heart.

Cardiotrotus, kar-de-ot'ro-tus (*cardia, titrosko,* to wound). One affected with wound of the heart.

Cardio-valvulitis, kar'de-o-val-vu-le'tis. Inflammation of valves of the heart.

Cardipericarditis, kar-de-per-e-kar-de'tis. See *Pericarditis.*

Carditic, kar-dit'ik. Cardiac; relating to carditis.

Carditis, kar-de'tis. Inflammation of fleshy substance of the heart. The symptoms are often confounded with those of pericarditis. Carditis, with some, includes both inflammation of the external investing membrane and that of the interior of the heart. See *Pericarditis* and *Endocarditis.* **C. exter'na,** pericarditis. **C. inter'na,** endocarditis. **C. membrano'sa,** pericarditis. **C. muscula'ris,** carditis. **C. polypo'sa,** polypi of the heart. **C. sero'sa,** pericarditis.

Cardivalvulitis, kar-de-val-vu-le'tis. Inflammation of valves of the heart in endocarditis.

Car'do. Ginglymus.

Car'dol. Acrid oil; blistering principle from juice of cashew nut, Anacardium occidentale.

Cardoleum, kard-o'le-um. See *Anacardium occidentale.*

Cardoon, kar-doon'. Cynara cardunculus.

Cardopathium (kar-do-path'e-um), **Cardopatium** (kar-do-pat'e-um), or **Cardopa'tum corymbosum,** korim-bo'sum. Acro-narcotic herb of Southern Europe, employed externally in cutaneous affections, as the itch, to check gangrene, and for odontalgia.

Cardopatium, kard-o-pat'e-um. Cardopathium; Carlina acaulis.

Cardopericarditis, kar-do-per-e-kar-de'tis. See *Pericarditis.*

Carduus (kar'du-us) **acan'thus.** Acanthus mollis. **C. al'tilis,** Cynara scolymus. **C. benedic'tus,** Centaurea benedicta. **C. Brazil'ia'nus,** Bromelia ananas. **C. cni'cus,** Centaurea benedicta. **C. domes'ticus cap'ite majo'ri,** Cynara scolymus. **C. hæmorrhoïda'lis,** Cirsium arvense. **C. Maria'nus** or **Ma'riæ,** common milk thistle, ladies' thistle, ord. Compositæ. Bitter tonic; seeds are oleaginous. **C. pi'neus,** Atractylis gummifera. **C. sati'vus,** Carthamus tinctorius. **C. sati'vus nonspino'sus,** Cynara scolymus. **C. solstitia'lis,** Centaurea calcitrapa. **C. stella'tus,** Centaurea calcitrapa. **C. tomento'sus,** Onopordium acanthium. **C. ven'eris,** Dipsacus fullonum.

Ca-re. Head.

Carebaresis (kar-a-bar-a'sis) or **Carebaria,** kar-e-bah're-ah (*kare,* head, *baros,* weight). Heaviness of the head.

Care'na. Twenty-fourth part of a drop.

Care'num. Head.

Care'taker. Nurse.

Careum, ka're-um. Carum.

Carex arenaria, ka'reks ar-en-ah're-ah. German sarsaparilla; see *Sarsaparilla.* **C. dis'ticha,** root of this herb of Europe and N. America is diaphoretic and emollient.

Ca'riated. Carious.

Carica, kar'ik-ah. See *Ficus carica.* **C. papa'ya,** papaw tree, melon tree, ord. Cucurbitaceæ. Native of America, India, and Africa; fruit has flavor of pumpkin, and is eaten like it; milky juice of plant—papaw juice—and seed and root are anthelmintic. The juice has been used as digestive of albuminoid substances and to remove diphtheritic membrane; but *Papa'in, Papa'yin,* or *Papayo'tin* is preferred internally, in doses of gr. ¼–j.

Car'icæ. Figs.

Caricin, kar'is-in. Amorphous material derived from precipitating the juice of Carica papaya with alcohol; formerly considered its active peptonizing agent.

Caries, ka'reez (decay). Ulceration of bone; necrosis being death of bone. Recognized by swelling of bone preceding and accompanying it, by abscesses it occasions, fistulæ which form, sanious character, peculiar odor, and quantity of suppuration, and by the evidence afforded by probing. When dependent on any virus in the system, this must be combated by appropriate remedies. **C. articulo'rum,** fungous arthritis. **C. callo'sa,** chancre, syphilitic. **C. carno'sa,** C. fungosa in which there are fleshy granulations. **C. centra'lis,** caries of bone caused by inflammation beginning in central part of medullary structure. **C. den'tis** or **den'tium,** dental gangrene. **C. fungo'sa,** tubercular caries; fungous arthritis. **C. Gal'lica,** chancre, syphilitic. **C. gangræno'sa,** caries. **C. granulo'sa,** fungous arthritis. **C. inter'na,** C. centralis. **C. mol'lis,** C. granulosa. **C. necrot'ica,** caries with necrosis. **C. pudendo'rum** or **puden'dagra,** see *Chancre.* **C. scrofulo'sa** or **strumo'sa,** tubercular caries. **C. sic'ca,** carious arthritis, without suppuration. **C. of the spine,** Pott's disease, osteitis of bodies of vertebræ and intervertebral fibro-cartilage. **C. tuberculo'sa,** tubercular caries. **C. of ver'tebræ,** C. of the spine. **C. vertebra'rum,** C. of the spine. **C. vir'gæ,** chancre of the penis.

Carina, kar-e'nah (keel). Vertebral column, especially of fœtus. Prominence on roof of aqueduct of Sylvius. Breastbone bent inward; hence *pectus carinatum,* chest so affected. *Carinated,* boat-shaped; condition in which the abdomen is retracted, resembling the shape of a boat. **C. for'nicis,** ridge on surface of fornix cerebri. **C. trache'æ,** projection of rings of bronchi at the bifurcation of trachea. **C. vagi'næ,** projection of anterior wall of vagina near vestibule.

Carinate, kar'in-ate. Shaped like a keel.

Cariosity, ka-re-os'it-e. Caries.

Carious, ka're-us. Relating to or affected with caries.

Carissa (kar-is'sah) **caran'das.** Shrub of India, ripe fruit of which is stomachic; when unripe, astringent. **C. xylopic'ron,** tree of island of Bourbon; bitter tonic, vermifuge, and antipyretic.

Carium terræ, ka're-um ter're. Calx; gluten.

Carli'na acau'lis. Carline thistle, growing in the Pyrenees, Switzerland, Italy, etc.; tonic, stimulant, emmenagogue, diuretic, and sudorific. **C. chamæ'leon,** C. acaulis. **C. gummif'era,** Atractylis gummifera. **C. vulga'ris,** diaphoretic and diuretic.

Car'line this'tle. Carlina acaulis.

Carlinic acid, kar-lin'ik as'id. Atractylic acid.

Carlsbad, mineral waters of, karls'bahd, min'ur-al wah'turz. Town in Bohemia celebrated for its hot baths. There are several springs, differing chiefly in temperature. The principal salts are sulphate of sodium, sulphate of potassium, chloride of sodium, carbonate of calcium, carbonate of sodium, etc. The waters are stimulating, alterative, and aperient. Temperature, 121° to 167° Fahr.

Car'men (verse). Amulet; charm to abort disease or cure it.

Carminantia (kar-min-an'she-ah) or **Carminativa,** kar-min-at-e'vah. Carminatives.

Carminants (kar'min-ants) or **Carminatives,** kar-min'at-ivz (*carmen,* a charm). Remedies which allay pain "like a charm," by causing expulsion of flatus from the alimentary canal; they generally belong to the classes of aromatic oils, alcohols, or ethers, and act by increasing gastric and intestinal peristalsis. The chief carminatives (Brunton) are—

Allspice and its oil.	Ether and acetic ether.
Anise and its oil.	Fennel.
Asafœtida.	Ginger.
Cajeput oil.	Horseradish.
Capsicum.	Mace.
Caraway and its oil.	Mustard.
Cardamoms.	Nutmeg and its oil.
Chilies.	Pepper.
Chloroform.	Peppermint and its oil.
Cinnamon and its oil.	Spearmint and its oil.
Cloves and its oil.	Spirits.
Coriander and its oil.	Valerian and its oil.
Dill and its oil.	

Car'mine. Pigment derived from cochineal, used for microscopic staining; leucomaïne from yeast, wine, etc.

Carminic acid, kar-min'ik as'id. Coloring principle of cochineal. When acted upon by dilute sulphuric acid, the product is *red carmine.*

Carnabadia, kar-nah-bad'e-ah. Carum (seed).

Carnabadium, kar-nah-bad'e-um. Cuminum cyminum.

Car'nal in'tercourse or **know'ledge.** Sexual intercourse.

Carnassial, kar-nas'se-al. Flesh-eating, as *carnassial teeth,* teeth adapted to such purpose.

Carnation, kar-na'shun. Dianthus caryophyllus.

Carnau'ba. Root of Copernicia cerifera, used as alterative in place of sarsaparilla.

Carneous, kar'ne-us (*caro,* flesh). Consisting of flesh; resembling flesh. **C. col'umns,** columnæ carneæ. **C. fi'bres,** fleshy fibres, muscular fibres.

Carneum marsupium, kar'ne-um mar-su'pe-um (fleshy pouch). Ischio-trochanterianus.

Carnicula, kar-nik'u-lah (dim. of **Caro,** flesh). The gum.

Carnificatio, kar-nif-ik-ah'she-o. Carnification. **C. pulmo'num,** hepatization of the lungs.

Carnification, karn-i-fik-a'shun (*caro, fio,* to become). Transformation into flesh; morbid state of certain organs, in which the tissue acquires a consistence like that of fleshy or muscular parts. It is sometimes observed in hard parts, the texture becoming softened, as in osteosarcoma. When it occurs in the lungs, as from pressure of exudation of pleurisy, they present a texture like that of liver, as in the fœtal lung; splenization. Amyloid degeneration. **C. of bone,** osteosarcosis. **C., pul'monary,** consolidation of lung from inflammation; conversion of lung structure into apparently muscular structure.

Carnified, kar'ne-fide. Transformed into flesh or flesh-like material.

Carniform abscess, kar'ne-form ab'sess (*caro, forma,* form). Abscess ordinarily occurring near the articulations, and whose orifice is hard, sides thick and callous.

Carnine, kar'neen (*caro, carnis,* flesh). White bitter leucomaïne in muscle and meat extracts; $C_7H_8N_4O_3$.

Carniv'ora. See *Carnivorous.*

Carnivorous, kar-niv'or-us (*caro, voro,* to eat). Resembling flesh; eating flesh; any substance which destroys excrescences in wounds, ulcers, etc., as an escharotic. Flesh-eating animals form a separate order of mammalia, under the name *Carnivora.*

Carnization, kar-ne-za'shun. Carnification.

Car'nochan, opera'tion of. Excision of ganglia of Meckel and infraorbital nerve.

Carnosa cutis, kar-no'sah ku'tis (fleshy skin). Panniculus carnosus. **C. tu'nica,** fleshy layer.

Car'nose. Fleshy; like flesh.

Carnosity, kar-nos'it-e. Fleshy excrescence. **C. of ure'thra,** caruncle in the urethra; small fleshy excrescence or fungous growth in male urethra. **C., vene'real,** cutaneous, cellular, and membranous tumor, dependent upon syphilitic virus; condyloma; polysarcia.

Carno'sus. Carneous.

Car'nous. Carneous.

Caro, ka'ro. Flesh, as of muscles. **C. accesso'ria,** see *Flexor longus digitorum pedis profundus perforans* (*accessorius*). **C. anseri'na,** horrida cutis. **C. bovil'la** or **bo'vis,** beef. **C. bu'bula,** beef. **C. carcino'des,** cancerous growth. **C. contu'sa,** bruise of the flesh. **C. cru'da,** raw meat. **C. em'inens** or **excres'cens,** excrescence. **C. fungo'sa,** proud flesh; fungosity. **C. gallina'cea,** horrida cutis. **C. glandulo'sa,** gland; epiglottic gland. **C. luxu'rians,** proud flesh; fungosity. **C. orbicula'ris,** placenta. **C. parenchymat'ica,** parenchyma. **C. quadra'ta,** palmaris brevis. **C. quadra'ta Syl'vii,** see *Flexor longus digitorum pedis profundus perforans* (*accessorius*). **C. vis'cerum,** parenchyma.

Carob tree, kar'ob tree. Creatonia siliqua.

Caroba, kar-o'bah. Bark of Bignonia copaia, Jacaranda caroba or Brasiliana or procera, Kordelestris; genus of natural order Bignoniaceæ of Brazil; leaves are alterative, diuretic, and sudorific, and are used in syphilis and syphilides; fruit of Ceratonia siliqua.

Carobin, kar'o-bin. Crystallized principle from caroba.

Carodes, kar-o'dez. Carotic.

Caroli'na all'spice. Calycanthus floridus. **C. ip'ecac,** Euphorbia ipecacuanha. **C. jas'mine,** Gelsemium sempervivens. **C. pink,** Phlox Carolina.

Car'omel. Caramel.

Carony (kar-o'ne) **bark.** Angustura or cusparia bark; Galipea officinalis.

Ca'ros. Carus; caraway.

Carosis, kar-o'sis. Profound sleep; carus.

Carota, kar-o'tah (carrot). See *Daucus carota.*

Carotic, kar-ot'ik (*karos,* stupor). Carotid; comatose; relating to or producing stupor; relating to carotids. **C. ar'teries,** carotids. **C. gan'glion,** see *Carotid nerve.* **C. nerve,** carotid nerve. **C. plex'us,** see *Carotid nerve.*

Carotica, kar-ot'ik-ah. Narcotics.

Carotico-thyroïdeus, ka-rot'ik-o-thir-o-e'de-us. Stray fibres of sterno-thyroid muscle from the carotid sheath.

Caroticus, kar-ot'ik-us. Carotic or carotid.

Carotid, kar-ot'id (*karos,* stupor). Name given to certain arteries of the neck and head or to parts associated with them. **C. ar'teries,** cephalic arteries; great arteries of the neck, carrying blood to the head; they are divided into—1. *Primitive* or *common carotid artery,* the left of which arises from the aorta, and the right from the trunk common to it and the subclavian; 2. *External* or *pericephalic carotid,* branch of primitive extending from the last to neck of condyle of lower jaw; and, 3. *Internal carotid,* cerebral or encephalic artery, another branch of the primitive, which, arising at the same place as the external, enters the cranium, and terminates on a level with the fissures of Sylvius, dividing into several branches. **C. canal',** canal in temporal bone, through which carotid artery and several nervous filaments pass. **C. foram'ina,** internal and external, arc at each extremity of the carotid canal. **C. gan'glion,** see *Carotid nerve.* **C. gland,** ductless gland formerly regarded as an intercarotic ganglion of the great sympathetic. **C. groove,** depression on sphenoid bone from contact of internal carotid artery. **C. nerve,** carotic nerve; branch from superior cervical ganglion of the great sympathetic, ascending by the side of the internal carotid; divides into two portions, which enter the carotid canal, and by communication with each other and petrosal branch of Vidian form the carotid plexus. They frequently form a small gangliform swelling on the under part of the artery, carotic or carotid or cavernous ganglion, ganglion of Laumonier. **C. plex'us,** see *Carotid nerve.* **C. sheath,** process of fascia of the neck, in which are the carotid artery, pneumogastric nerve, and jugular vein. **C. si'nus,** venous plexus in carotid canal. **C. tri'angle,** see *Cervical triangles.* **C. tu'bercle,** tubercle on transverse process of sixth cervical vertebra; carotid artery may be compressed against it.

Carotidæus, kar-ot-id-e'us. Carotid.

Caro'tin. Red coloring matter from root of carrot.

Caro'tis. Carotid artery. **C. cephal'ica** or **cerebra'lis,** internal carotid artery. **C. commu'nis,** common carotid artery. **C. exter'na** or **facia'lis,** external carotid artery. **C. inter'na,** internal carotid artery. **C. primiti'va,** common carotid artery.

Carotta, kar-ot'tah. Daucus carota.

Caroy-seeds. Seeds of Carum carvi.

Car'païne. $C_{14}H_{27}NO_2$. Alkaloid from Carica papaya; toxic to the heart, promptly giving relief in aortic insufficiency and stenosis; given hypodermically in doses of gr. $\frac{1}{10}$ to $\frac{1}{6}$.

Car'pal (*karpos,* wrist). Belonging or relating to the carpus or wrist. **C. arch'es,** network of branches of arteries distributed to the wrist and vicinity. **C. articula'tions,** articulations of bones of the wrist. **C. bones,** see *Carpus.* **C. bur'sæ,** bursæ of the wrist-joint. **C. joints,** articulations of the carpal bones. **C. lig'aments,** see *Carpal.*

Carpalia, kar-pah'le-ah. Bones of the wrist.

Carpa'thian bal'sam. Thin turpentine from Pinus cembra.

Carpathicum, kar-path'ik-um. See *Pinus cembra.*

Carpentaria, kar-pen-tah're-ah. Achillea millefolium.

Carpenter's (kar-pen-turz) **leaf.** Galax aphylla.

Carpe'sium. Carpasium.

Carphodes, kar-fo'deez (*karphos,* flocculus). Flocculent, stringy, as mucus.

Carphology (kar-fol'o-ge) or **Carpol'ogy** (*karphos,* flocculus, *lego,* to gather). Floccilation, floccitation. Action of gathering flocculi. Delirious picking of bed-clothes, denoting great cerebral irritability and debility; an unfavorable sign in fevers, etc.

Carphos, kar'fos. Trigonella fœnum.

Carpia, kar'pe-ah (*carpo,* to pluck). Linteum; charpie.

Carpiæus, kar-pe-e'us. Palmaris brevis.

Carpial, kar'pe-al. Belonging to the carpus. **C. lig'aments,** fibrous fasciæ uniting bones of carpus; annular ligaments.

Carpian, kar'pe-an. Carpial.

Carpinus betulus, kar-pe'nus bet'u-lus. *Hornbeam, Ironwood, Hornbeech, Horse beech, White beech.*

Tree of Oak family, ord. Cupuliferæ, resembling beech, in woods of Europe. Leaves contain tannin, hence are astringent.

Carpismus, kar-piz'mus. Carpus.

Carpobalsamum, kar-po-bal'sam-um. Fruit of Balsamodendron Gileadense. Allspice. See *Amyris opobalsamum* and *Pimento*.

Carpocace, kar-pok'as-e (*carpus*, *kakos*, evil). Disease of the carpus.

Carpo-carpal, kar'po-kahr'pal. Relating mutually to bones of carpus.

Carpo-cervical, kar'po-sur'vi-kal. Relating to wrist and neck, as carpo-cervical tie, an arm-sling.

Carpologia, kar-po-loj'e-ah. Carphologia. **C. spasmod'ica**, subsultus tendinum.

Carpol'ogy. Carphology.

Carpo-metacarpal, kar'po-met-ah-kar'pal. Relating to carpus and metacarpus, as carpo-metacarpal articulations.

Carpo-metacarpus minimi digiti, kar'po-met-ah-kar'pus min'im-e dij'it-e. Abductor metacarpi minimi digiti. **C.-m. min'imi pol'licis**, opponens pollicis.

Car'po-olec'ranal. Relating to wrist and olecranon process. Term given to a sling so applied. **C. polli'cis**, flexor brevis pollicis manûs.

Carpo-pedal, kar'po-pe'dal (*carpus*, *pes*, foot). Relating to the wrist and foot. **C.-p. spasm**, cerebral spasmodic croup. Spasmodic affection of the chest and larynx accompanied by convulsions, occurring between the third and ninth month, and characterized by excessive dyspnœa and loud croupy noise on inspiration. The seat of the disease is evidently in the cerebro-spinal axis, perhaps owing to erethism seated elsewhere, but communicated to the cerebro-spinal centre, and reflected to the respiratory and other muscles concerned. The gums should be freely divided, if necessary, with use of cathartics, revulsives, narcotics, and appropriate diet. See *Asthma thymicum*.

Carpo-phalangeus minimi digiti, kar'po-fal-an-je'us min'im-e dij'it-e. Abductor minimi digiti.

Car'po-phalangi'nus. Carpo-phalangeus.

Carpopogon pruriens, kar-po-po'gon pru're-ens. Mucuna pruriens.

Carpos, kar'pos. Fruit.

Carpotica, kar-pot'ik-ah (*karpos*, fruit). Diseases affecting or incidental to impregnation or parturition.

Carpozyma, kar-po-ze'mah (*karpos*, fruit, *zume*, ferment). Alcoholic ferment.

Carpus, kar'pus. The wrist; part between forearm and hand. Eight bones compose it (in two rows). In the superior row, from without to within, are the scaphoid or navicular, lunar or semilunar, cuneiform, and orbicular or pisiform. In the lower row, trapezium, trapezoid, magnum, and unciform.

Carrageen (kar'rah-geen) **moss**. Fucus crispus.

Carrageen'ia. Mucilage of Chondrus crispus or carrageen; converted by action of nitric acid into mucic acid.

Carraway, kar'ra-way. Carum.

Car'rhageen. Fucus crispus.

Carrichtera vellæ, kar-richt'er-ah vel'le. Herb of S. Europe, leaves of which are antiscorbutic.

Carron (kar'ron) **oil**. Linimentum aquæ calcis.

Car'rot. Daucus carota. **C. can'dy**, Athamanta Cretensis. **C., dead'ly**, Thapsia.

Carsu'ta. Gentiana purpurea.

Carthagena (kar-tha-je'nah) **barks**. See *Cinchona*.

Carthamus (kar'tham-us) **lana'tus**. Species of composite herbs of Europe, Asia, and Africa; bitter tonic and stomachic; root is diaphoretic and antipyretic. **C. macula'tus**, Carduus marianus. **C. tincto'rius**, *Saffron-flower*, *Safflower*, *Safflow*, *Bastard saffron*, *Dyer's saffron*, ord. Compositæ. Seeds are aromatic, cathartic, and diuretic, yet to parroquets they are an article of food. Flowers are cosmetic and diaphoretic.

Carthegon, kar-tha'gon. See *Buxus*.

Carthu'sian pow'der. Kermes.

Cartilage, kar'til-aje. Gristle. Solid part of animal body, of medium consistence between bone and ligament, which in the fœtus is a substitute for bone, but in the adult exists only in joints, at extremities of ribs, etc. Cartilages are whitish, flexible, compressible, and very elastic; some of them apparently inorganic. Several varieties are met with, as hyaline, which has a translucent matrix; white fibro-cartilage, matrix being made up of white fibrous tissue; elastic, with a matrix of elastic tissue. When cartilage, in any of its forms, is boiled it yields chondroid, with the exception of those connected with joints—articular cartilages. Cartilages are covered by white fibrous elastic tissue, to which vessels and nerves are distributed. **C., acces'sory**, C., sesamoid. **C., a'lar**, nasal c. **C., an'nular**, C., cricoid, C. between conchal c. and meatus auditorius externus. **C., anon'ymous**, cricoid c. **C., aor'tic**, second right costal c., situated in front of arch of aorta. **C., arthro'dial** or **artic'ular**, layer of c. over articulating surface of bone. **C., aryt'enoid**, see *Arytenoid*. **C., aster'nal**, costal c. not connected with the sternum. **C., aud'itory**, embryonic auditory capsule. **C., auric'ular**, C. of external ear. **C. cap'sule**, capsule around c. cell. **C., cel'lular**, C. made up chiefly of cells. **C., cil'iary**, C., tarsal. **C., circumferen'tial**, C. around edges of articular cavity. **C., connect'ing**, C. of which that of symphysis pubis is an example, where joint has little motion. **C., cos'tal**, see *C-s of ribs*. **C., cri'coid**, see *Cricoid*. **C., cu'neiform**, C. of Wrisberg; see *Cuneiform cartilages of larynx*. **C., diarthro'dial**, C., arthrodial. **C. of the ear**, see *Ear*. **C., elas'tic**, see *Cartilage*. **C., en'siform**, see *Xiphoid* and *Sternum*. **C., epiglot'tic**, epiglottis. **C., Eusta'chian**, triangular c. between bony part of Eustachian tube and pharynx. **C., fi'broelas'tic**, see *Cartilage*. **C., float'ing**, loose c. in an articulation. **C., hy'aline**, see *Cartilage*. **C. of incrusta'tion**, C., arthrodial. **C., innom'inate**, cricoid c. **C., interartic'ular**, fibro-cartilage between articulating surfaces of bones. **C., interos'seous**, see *C., arthrodial* or *articular*. **C., interver'tebral**, fibro-cartilage placed between the vertebræ. **C., invest'ing**, C., articular. **C. of Ja'cobson**, cartilaginous nodule in nasal septum situated above anterior nasal spine. **C., loose**, C., floating. **C. of Lusch'ka**, cartilaginous nodule in true vocal cord. **C., mandib'ular**, C., Meckel's. **C., meat'al**, C., auricular. **C., Meckel''s**, C. in intra-uterine life, upper part of which forms the malleus and its handle; lower part a rod, on external surface of which the lower jaw is developed. **C., per'manent**, see *Cartilages of ossification*. **C., plex'iform**, C., elastic; see *Cartilage*. **C., pul'monary**, left second costal c. situated in front of pulmonary orifice of heart. **C., retic'ular** or **re'tiform**, elastic c.; see *Cartilage*. **C., sep'tal**, nasal c. **C., ses'amoid**, small c. occasionally found in tendons. **C., supra-aryt'enoid**, cornuculum laryngis. **C., tar'sal**, see *Tarsus*. **C., tem'porary**, see *Cartilages of ossification*. **C., thy'roid**, thyroid c. **C., tu'bal**, C., Eustachian. **C., uni'ting**, C., connecting. **C. of Weit'brecht**, interarticular c. in acromio-clavicular joint. **C., xi'phoid**, see *Xiphoid* and *Sternum*.

Car'tilages of the ap'erture. Alar c-s. **C-s, artic'ular**, invest bony surfaces which are in contact; hence are called *investing* or *incrusting cartilages*. **C-s, cu'neiform, of lar'ynx**, see *Cuneiform*. **C-s, incrust'ing**, C-s, articular. **C-s, interartic'ular**, are situated within joints; knee-joint, for example. **C-s, interver'tebral**, see *Intervertebral*. **C-s, invest'ing**, C-s, articular. **C-s of lar'ynx**, see *Larynx*. **C-s of nose**, nasal c-s. **C-s, obdu'cent**, C-s, articular. **C-s of ossifica'tion** are such as, in progress of ossification, have to form integrant part of bones; as those of long bones in the new-born infant. The year termed *temporary;* the others being *permanent*. All cartilages, with exception of articular, are surrounded by membrane analogous to periosteum, called *Perichondrium*. **C-s, per'manent**, see *C-s of ossification*. **C-s, precur'sory**, C-s of ossification. **C-s, primor'dial**, C-s, temporary; see *C-s of ossification*. **C-s of ribs** are, in some respects, only prolongations of the ribs. Those of the nose, meatus auditorius, and

Eustachian tube, present a similar arrangement. Other cartilages resemble union of fibrous and cartilaginous textures; hence their name, *Fibro-cartilages.* **C-s of Santori'ni,** see *Corniculum laryngis.* **C-s, semilu'nar,** see *Semilunar.* **C-s, sig'moid,** semilunar c-s. **C-s, ster'nal,** costal c-s. **C-s, tar'sal,** connective tissue forming framework of the eyelids. **C-s, tem'porary,** see *C-s of ossification.* **C-s of trache'a,** see *Trachea.* **C-s of Wris'berg,** cuneiform c-s of larynx.

Cartilagine, kar'til-aj-een. Organic ingredient of cartilage; converted by boiling into chondrin.

Cartilagines (pl. of **Cartilago**) **accessoriæ,** kar-til-aj'in-es ak-ses-so're-e. See *Nasal cartilage.* **C. ala'res,** see *Nasal cartilage.* **C. ala'rum mino'res,** see *Nasal cartilage.* **C. arytænoï'deæ,** arytenoid cartilages. **C. basila'res digito'rum,** fibro-cartilages of the fingers. **C. cornicula'tæ,** cornicula laryngis. **C. costa'les** or **costa'rum,** costal cartilages. **C. cuneifor'mes,** cuneiform cartilages. **C. epac'tiles,** see *Nasal cartilage.* **C. falca'tæ** or **falcifor'mes,** semilunar cartilages. **C. guttura'les,** arytenoid cartilages. **C. inferio'res,** see *Nasal cartilage.* **C. interarticula'res,** interarticular cartilages. **C. interarytenoï'deæ,** interarytenoid cartilages. **C. intercala'res,** intervening cartilages. **C. intervertebra'les,** intervertebral cartilages. **C. luna'tæ,** semilunar cartilages. **C. menis'ci,** semilunar cartilages. **C. mino'res inferio'res,** see *Nasal cartilage.* **C. na'si,** nasal cartilage. **C. pinna'les,** see *Nasal cartilage.* **C. pyramida'les,** arytenoid cartilages. **C. quadra'tæ,** see *Nasal cartilage.* **C. Santorinia'næ,** cornicula laryngis. **C. semiluna'res,** semilunar cartilages. **C. sesamoï'deæ,** see *Nasal cartilage.* **C. sigmoï'deæ,** semilunar cartilages. **C. superio'res latera'les,** see *Nasal cartilage.* **C. thyreoï'des** or **thyro'ïdes,** thyroid cartilages. **C. triangula'res,** see *Nasal cartilage.* **C. trique'træ laryn'gis,** arytenoid cartilages. **C. voca'les,** connective-tissue nodules in vocal cords. **C. Wrisbergia'næ,** cuneiform cartilages.

Cartilaginification, kar-til-aj-in-i-fi-ka'shun (*cartilago, facio,* to make). Production or generation of cartilage. Chondrogenesis.

Cartilaginis arytenoïdeæ capitulum, kar-til-aj'-in-is ar-it-en-o-e'de-e kap-it'u-lum. Corniculum laryngis.

Cartilaginous, kar-til-aj'in-us. Belonging to, composed of, or resembling cartilage. **C. tis'sue,** see *Cartilage.* **C. tu'mor,** chondroma; cartilaginous tumor; enchondroma.

Cartilago, kar-til-ah'go. Cartilage. **C. annula'ris,** cricoid cartilage. **C. auric'ulæ** or **aur'is,** cartilage of the ear. **C. basila'ris,** cricoid cartilage; fibro-cartilage in foramen lacerum medium. **C. clypea'lis,** thyroid cartilage. **C. cornicula'ta,** corniculum laryngis. **C. cricoï'dea,** cricoid cartilage. **C. cuneifor'mis,** see *Cuneiform cartilages of the larynx.* **C. ensifor'mis,** xiphoid cartilage. **C. epiglot'tica,** epiglottis. **C. gingiva'lis,** fibrous covering of alveolar groove at birth. **C. guttura'lis,** arytenoid cartilage. **C. innomina'ta,** cricoid. **C. lin'guæ,** septum of tongue. **C. mucrona'ta,** xiphoid cartilage. **C. osses'cens,** temporary cartilage. **C. pelta'lis,** thyroid cartilage, xiphoid cartilage. **C. pelta'tus,** thyroid cartilage. **C. peren'nis,** permanent cartilage. **C. per'manens,** permanent cartilage. **C. quadrangula'ris,** cartilage of nasal septum. **C. reticula'ris,** reticular cartilage, as of epiglottis, cornicula laryngis, pinna of ear. **C. Santorinia'na,** corniculum laryngis. **C. scutifor'mis,** thyroid cartilage. **C. sep'ti na'rium,** see *Nasal cartilage.* **C. triangula'ris** or **trique'tra car'pi,** triangular cartilage of wrist. **C. triti'cea,** see *Thyreo-hyoid membrane.* **C. tu'bæ,** cartilage of lining of Eustachian tube. **C. u'vifer,** uvula. **C. ve'ra,** hyaline cartilage. **C. Wrisberg'ii,** see *Cuneiform cartilages of the larynx.* **C. xiphoï'des,** xiphoid cartilage.

Ca'rum. Caraway; carraway. Fruit or seeds, caraway seeds, are carminative. Dose, gr. x to ʒij. The oil, *oleum carui,* officinal, has properties of the seeds. Dose, gtt. ij to vj. **C. ajowan,** see *Ajwain.* **C. bulbocas'tanum,** Bunium bulbocastanum. **C. car'vi,** carum. **C. petroseli'num,** Apium petroselinum. **C. vulga're,** C. carui.

Caruncle, kar'un-kl (dim. of **Caro,** flesh). Small portion of flesh, fleshy excrescence, as *lacrymal caruncle,* on the conjunctiva, near the inner canthus. **C., ure'thral,** fibro-vascular tumor at the aperture of the female urethra. See *Carnosities, Caruncula,* and *Carunculæ.*

Caruncula, kar-un'ku-lah. Caruncle. **C. innomina'ta,** lacrymal gland. **C. lacryma'lis,** lacrymal caruncle; small, reddish, follicular body at inner angle of the eye; secretes a gummy substance. **C. ma'jor,** small papilla or elevation on duodenal mucous lining at point of emptying of the biliary and pancreatic ducts. **C. mammilla'ris,** olfactory tubercle. **C. mi'nor,** small papilla or elevation in duodenum at point of entrance of accessory pancreatic duct. **C. Morgag'nii,** middle lobe of prostate; see *Prostate.* **C. oc'uli,** lacrymal caruncle. **C. pros'tate,** middle lobe of prostate gland. **C. saliva'lis** or **sublingua'lis,** sublingual caruncle at opening of Wharton's duct. **C. semina'lis,** gallinaginis caput. **C. ure'thræ,** gallinaginis caput; see *Carnosities.*

Carunculæ (pl. of **Caruncula**) **cuticulares,** kar-un'ku-le ku-tik-u-lah'res. Nymphæ. **C. hymena'les,** C. myrtiformes. **C. mammilla'res,** extremities of lactiferous tubes in the nipples; olfactory nerves. **C. myrtifor'mes,** small reddish tubercles near the orifice of the vagina, formed by mucous membrane; they are regarded as remains of ruptured hymen. **C. papilla'res,** papillæ of kidney. **C. uteri'næ,** fleshy excrescences of lining membrane of uterus. **C. vagina'les,** C. myrtiformes.

Caruncular (kar-un'ku-lus) or **Carun'cular.** Relating to caruncles or carnosities.

Caruon, kah'ru-on. Carum.

Carus, ka'rus. Profound sleep; last degree of coma, with complete insensibility, which no stimulus can remove. Sopor, coma, lethargia, and carus are four degrees of the same condition. **C. apoplex'ia,** apoplexy, cerebral. **C. asphyx'ia,** asphyxia. **C. catalep'sia,** catalepsy. **C. ecs'tasis,** ecstasis. **C. hydrocephal'icus,** hydrocephalus internus. **C. ab insolatio'ne,** coup de soleil. **C. lethar'gus,** lethargy. **C. l. cataph'ora,** somnolency. **C. l. vig'il,** coma vigil. **C. paral'ysis,** paralysis. **C. p. paraple'gia,** paraplegia. **C. veter'nus,** lethargy.

Ca'rus, curve of. See *Pelvis.*

Car'vacrol. $C_{13}H_{14}O$. Thick oil, with smell and taste of creasote, obtained by acting on oil of caraway with caustic potassa or glacial phosphoric acid; antiseptic. **C. i'odide** has been employed externally in same cases as iodoform.

Carvi, kar've. Carum. **C. seeds,** see *Carum.*

Car'vol. $C_{10}H_{14}O$. Aromatic odorous liquid produced by acting on oleum carui with sulphide of hydrogen, and digesting the product with caustic potash.

Carvum, kar'vum. Caraway.

Carya, kar'e-ah. Hickory, Juglans regia. **C. basil'ica,** Juglans regia.

Carydion, kar-id'e-on. Corylus avellana.

Caryedon catagma, kar-e-a'don kat-ag'mah (*karuedon,* resembling nut [broken]). See *Fracture.*

Caryocinesis, kar-e-o-sin-a'sis (*karuon,* nucleus, *kinesis,* motion). Term expressive of the various structural phases undergone by a nucleus in the course of the indirect division of cells or other nuclei.

Caryodaphne densiflora, kar-e-o-daf'ne den-se-flo'rah. Plant of Java having bitter bark, and leaves that are used in colic.

Caryolysis, kar-e-ol'is-is (*karuon,* nucleus, *lusis,* loosening). Caryocinesis.

Caryomitome, kar-e-om'it-ome (*karuon, tome,* incision). Nuclear fibril.

Caryomitosis, kar-e-o-mit-o'sis. Caryocinesis.

Caryon, kar'e-on. See *Juglans regia.* **C. heracleon'ticon, lep'ton,** or **pon'ticon,** Corylus avellana (nut). **C. trip'ton,** nutmeg.

Caryophylla, kar-e-o-fil'lah (*karuon,* nut, *phullon,* leaf). Geum urbanum.

Caryophyllata (kar-e-o-fil-lat'ah) **alpi'na, aquat'-**

ica, or **lu'tea.** Geum rivale. **C. monta'na,** Geum rivale and G. montanum. **C. nu'tans** or **riva'lis,** Geum rivale. **C. urba'na,** Geum urbanum. **C. vulga'ris,** Geum urbanum.

Caryophyllin, kar-e-o-fil'lin. $C_{20}H_{32}O_{21}$. White resinous substance obtained from cloves; when oxidized by nitric acid, *caryophyllinic acid* results, $C_{20}H_{32}O_8$.

Caryophyllum, kar-e-o-fil'lum. Eugenia caryophyllata. **C. ru'brum,** Dianthus caryophyllus.

Caryophyllus, kar-e-o-fil'lus. See *Eugenia caryophyllata.* **C. America'nus,** see *Myrtus pimenta.* **C. aromat'icus,** Eugenia caryophyllata. **C. horten'sis** or **mul'tiplex,** Dianthus caryophyllus. **C. pimen'ta,** Myrtus pimenta. **C. vulga'ris,** Geum urbanum.

Caryoplasm, kar'e-o-plazm (*karuon,* nucleus, *plasma,* formative material). Nuclear protoplasm.

Caryotæ, kar-e-o'te (*karuotis,* date tree). Best kind of dates.

Casamum, kas'am-um. Cyclamen.

Casamunar, kas-am-u'nar. Cassumuniar.

Cas'ca bark. Erythrophlæum.

Cascara (kas-kar'ah) or **Cascaril'la** ([S.] bark, little bark). Names under which cinchona bark is known in Peru; the gatherers are called cascarilleros. **C. amar'ga,** Honduras bark; bark of Picramnia antidesma of Central America; alterative, used in syphilis and chronic skin diseases. **C. sagra'da,** *sacred bark;* dried bark of Rhamnus purshianus; mild laxative in habitual constipation; see *Rhamnus.*

Cascarilla, kas-kar-il'lah ([S.] little bark). Cascara, Croton eleuteria. **C. carabay'a,** see *Cinchonæ cordifoliæ cortex.* **C. colora'da,** Cinchonæ oblongifoliæ cortex. **C. rox'a,** Cinchonæ oblongifoliæ cortex.

Cascarillæ cortex, kas-kar-il'le kor'teks. Cascarilla.

Cascarillin, kas-kar-il'lin. White crystalline substance derived from bark of Croton eleuteria. $C_6H_9O_2$. See *Croton cascarilla.*

Case. Box for preservation of instruments or medicines. A pocket-case contains small instruments in constant use with the surgeon. Condition of a patient, as case of fever, etc.; history of a case. **C., dress'ing,** case of instruments for dressing wounds. **C., heart,** pericardium. **C., mus'cle,** elements entering into formation of striated muscular fibre.

Casearia astringens, kas-e-ar'e-ah as-trin'jens. Bark of this S. American plant is used as poultice to indolent ulcers. **C. cauzia'la,** E. Indian tree; bitter; pulp of fruit is diuretic.

Casearius, kaz-e-ar'e-us (*caseus,* cheese). Cheesy.

Caseate, ka'ze-at. Lactate.

Caseation (ka-ze-a'shun) or **Caseifica'tion** (*caseus,* cheese). Degeneration, as of inflammatory exudations, into a cheesy or curdy mass, tending to further decomposition or transformation. Milk fever of parturition. Precipitation of casein in the coagulation of milk.

Caseiform, ka'ze-e-form. Cheesy or caseinous.

Casein, ka'ze-in. Caseous matter; the great nitrogenized constituent of milk, occurring in proportion of two to six per cent. Identical in composition with the chief constituents of blood, fibrin, and albumin, all being compounds of protein; contains large quantity of phosphorus. A similar principle exists in vegetables, vegetable casein or legumin, vegetable gluten, chiefly in leguminous seeds—peas, beans, lentils. Like vegetable albumin, casein is soluble in water, and the solution is not coagulable by heat. Casein is precipitated from milk by acid and by rennet at 104° F. Casein also occurs in sebaceous secretion of the surface of the body. **C., an'imal,** see *Casein.* **C. of blood,** albuminose, globulin. **C., glu'ten,** C., vegetable; see *Casein.* **C., milk,** see *Casein.* **C. of sali'va,** ptyalin; see *Saliva.* **C. of small intes'tine,** albuminose. **C., veg'etable,** see *Casein.*

Caseous, ka'ze-us. Cheesy. **C. degenera'tion,** caseation. **C. mat'ter,** caseation. **C. pneumo'nia,** see *Pneumonia.*

Caseum, ka'ze-um. Casein.

Caseus, ka'ze-us. Cheese. **C. equi'nus,** cheese prepared from mare's milk.

Cashew, kash-u'. Anacardium occidentale. **C. gum,** see *Anacardium occidentale* and *Swietania mahogani.* **C. nut,** fruit of Anacardium occidentale; irritant and escharotic. **C. nut, Oriental,** fruit of Semecarpus anacardium; called also marking-nut, marsh-nut, Malacca bean.

Cashoo'. Aromatic pectoral drug of India; catechu.

Casia, kas'e-ah. Laurus cassia.

Casimiroa edulis. Mexican tree, ord. Rutaceæ, fruit of which is eatable, also anthelmintic; pulp is hypnotic; bark is a bitter.

Casket. Case. **C., mus'cular,** see *Case, muscular.*

Casmina (kaz'min-ah), **Casmonar,** or **Casmunar.** Cassumuniar.

Cassa, kas'sah. Thorax. **C. bark,** sassy bark.

Cassada (kas-sad'ah) **root.** Jatropha manihot.

Cassava (kas-sav'ah), **bitter.** Jatropha manihot. **C. flour** or **meal,** dried, ground residue in roots of Manihot utilissima, after juice has been expressed. **C. root,** Jatropha manihot. **C. starch,** dried starch obtained from expressed juice of Manihot utilissima; Brazilian starch.

Cassee'na or **Casse'na.** Ilex vomitoria.

Casser, ganglion of. Ganglion of Gasser.

Casse'rius, mus'cle of. Laxator tympani minor.

Cassia, kas'se-ah. Laurus cassia. **C. ab'sus,** absus. **C. acutifo'lia,** C. senna. **C., Ægyp'tian,** C. senna. **C. ala'ta,** ringworm shrub, winged senna plant; species of cassia, from W. Indies, used externally in diseases of the skin, as herpes and eczema; also cathartic. **C. Alexandri'na,** C. fistula. **C. angustifo'lia,** Indian senna; C. elongata. **C. auricula'ta** grows in India; root is used in skin diseases and those of the urinary organs, bark in syphilis, leaves in skin diseases, flowers in diabetes, seeds in diabetes and rheumatism. **C. bark,** Chinese cinnamon; bark of Cinnamomum aromaticum. **C. Bonplandia'na,** C. fistula. **C. Brasilia'na,** C. grandis. **C., brown,** C. glandulosa. **C. buds,** unripened flowers of several species of Cinnamomum. **C. canel'la,** Laurus cassia. **C. caryophylla'ta,** Myrtus caryophyllata. **C. cathart'ica,** plant of Brazil, cathartic like senna. **C. chamæcris'ta,** prairie senna, partridge pea, wild senna; indigenous; ord. Leguminosæ; resembles Cassia Marilandica. **C. cinnamo'mea,** Laurus cassia. **C., Egyp'tian,** Cassia senna. **C. elonga'ta,** Cassia senna. **C. emargina'ta,** tree of W. Indies; leaves have action like senna, pods like those of C. fistula. **C. excel'sa,** C. fistula. **C. fis'tula,** purging cassia, pulp of Cassia fistula or Cathartocarpus fistula, pudding pipe tree; see *C. pulp.* Laxative. Pods of Cassia moschata of New Granada are smaller, but have like properties. **C. glau'ca,** tree of E. Indies and Australia, used in gonorrhœa, diabetes, and gout. **C. gran'dis,** horse cassia, from Brazil; purgative. **C. lanceola'ta,** C. senna. **C. leniti'va,** C. acutifolia. **C. lig'nea,** Laurus cassia. **C. lig'nea Malabar'ica,** Laurus cassia. **C. Marilan'dica,** American or wild senna, locust plant; leaves are similar in virtue to those of Cassia senna, but inferior in strength. **C. med'ica** or **medicina'lis,** C. angustifolia. **C. mol'lis,** C. grandis. **C. moscha'ta,** see *Cassia fistula.* **C. ni'gra,** C. fistula. **C. occidenta'lis,** stinking weed or wood, grows in Southern U. S.; styptic; root diuretic; bark is antipyretic; leaves are purgative. **C. officina'lis,** C. senna. **C. orienta'lis,** C. senna. **C. pulp,** sweet mucilaginous matter obtained from carefully prepared recent pods of Cassia fistula, or by diffusion in water, straining, and evaporation. It is the chief cathartic ingredient in them. See *Cassia fistula.* **C., pur'ging,** Cassia fistula. **C. sen'na,** name of plant affording senna. Senna (Ph. U. S.) is leaflets of Cassia acutifolia and elongata; also of C. angustifolia (Ph. Br.). The leaves of senna, or Ægyptian cassia, have a faint smell and bitterish taste. The active part, by some called *cathartin, cathartic,* or *cathartinic acid,* is extracted by alcohol and water, and has been given as a purgative in dose of 2 to 5 grains. Leaves are hydragogue cathartic, and apt to gripe. Dose of powder, ℈j to ʒj. Infusion is the best form. Varieties of senna in commerce are Tinnivelly senna, Bombay or common India senna, Alexandrian senna, Tripoli senna, and

Aleppo senna. **C. sensiti'va** or **seric'ea**, shrub of S. America and W. Indies; juice has been used in inflammation of the nates and legs. **C. siliquo'sa**, C. fistula. **C. sopho'ra**, roots of this E. Indian herb are used in diseases of the skin and liver; bark and seeds in diabetes. **C. to'ra** or **toroï'des**, E. Indian herb; leaves are laxative, and used as applications to ulcers, pustules, etc.; root is used externally in ringworm.

Cassiæ artamentum, kas'se-e ar-ta-men'tum. See *Cassia fistula*. **C. fis'tulæ pul'pa**, see *Cassia pulp*. **C. flo'res**, see *Laurus cinnamomum*.

Cassi'ala. Hyssopus.

Cassida galericulata, kas'sid-ah gal-er-ik-u-lat'-ah. Scutellaria galericulata.

Cassina, kas-se'nah. Ilex vomitoria.

Cassine Caroliniana, kas-se'ne kar-o-lin-e-an'ah. Ilex Paraguensis. **C. ev'ergreen**, Ilex vomitoria. **C. Par'agua**, Ilex Paraguensis. **C. ve'ra**, Ilex vomitoria.

Cassis, kas'sis. Ribes nigrum.

Cassomba or **Cassombo**. Carthamus tinctorius.

Cas'su. Superior form of catechu, from Areca catechu.

Cassumuniar (kas-su-mu'ne-ar), **Cassumu'nar**, or **Casamu'nar**. Bengal root. Root from E. Indies, aromatic bitter, tonic, and stimulant; once considered a panacea.

Cassuvium, kas-su've-um. Anacardium. **C. pomif'erum**, Anacardium occidentale.

Cassyta (kas'sit-ah) or **Cas'sytha filifor'mis** (fil-e-for'mis). S. African plant, employed by Cape colonists as a wash in scald head, and an antiparasitic; also in gonorrhœa, ophthalmia, ulcers, etc., and as a cooling drink in fevers.

Cast. Anything formed in a mould, as it were; hence, casts formed in urinary tubules, as in tubular nephritis, in diphtheria, in nasal cavities, the trachea, bronchi, etc. See *Contortion*, *Blood-casts*. **C., cork'screw**, C., spiral. **C., epithe'lial**, C. of epithelial cells of urinary tubules. **C. in the eye**, strabismus. **C., hy'aline**, translucent cast, probably from coagulation of albuminoid substance, found in urine, coming either from kidney or testicle. **C., mu'coid** or **mu'cous**, cast-like matter made up of mucus. **C., re'nal**, cast of uriniferous tubule. **C., spi'ral**, renal cast twisted over itself in the urinary passages. **C., testic'ular**, form of cast, like renal cast, sometimes noticed in spermatorrhœa. **C., transpa'rent**, C., hyaline; C., waxy. **C., tube**, see *Tube-casts*. **C., u'rinary**, cast of urinary canal or tubule. **C., wax'y**, renal cast having resemblance to wax.

Castalia speciosa, kas-tal'e-ah spes-e-o'sah. Nymphæa alba.

Castanea, kas-tan'e-ah. Fagus castanea; see also *Fagus castanea pumila*. **C. equi'na**, Æsculus hippocastanum. **C. pu'mila**, Fagus castanea pumila. **C. ves'ca**, Fagus castanea. **C. vulga'ris**, Fagus castanea.

Castela Nicholsoni, kas-te'la nik-ol-so'ne. Shrub of tropical India, Africa, and America, having antiperiodic properties; similar qualities are assigned to its active principle, *amargosin*.

Castigans, kas-te'gans (*castigo*, to correct). Corrigent.

Castiglionia lobata, kas-til-e-o'ne-ah lo-bat'ah (after L. Castiglioni). Piñoncillo tree; tree of Peru; when incision is made into the stem a clear liquid flows out, which becomes black and horny-like, and is a powerful caustic; Jatropha curcas.

Castillon (kas-til'yon) **pow'ders** (called after their proposer). See *Powders, Castillon*.

Cas'tin. Bitter extractive from Vitex agnus-castus.

Castor (kas'tor), **Amer'ican** or **Cana'dian**. American variety of castor fiber. **C., bay**, Magnolia glauca. **C. bean**, see *Ricinus*. **C., Cana'dian**, C., American. **C., Eng'lish**, C., American. **C. fi'ber**, the beaver, which furnishes castor, an odorous secretion used as a nervine and antispasmodic; see *Castoreum*. Its blood, urine, bile, and fat were also formerly used in medicine. **C. Gal'liæ**, French and European variety of C. fiber. **C. oil**, expressed oil of Ricinus communis; cathartic; used externally in ointments, hair-washes, etc.; see *Ricinus communis*. **C., Pruss'ian** or **Russ'ian**, castor procured from European or Asiatic beaver; more valuable medicinally than American castor. **C. seeds**, seeds of Ricinus communis. **C. wood**, Magnolia glauca.

Castoreum kas-to're-um. Castor; peculiar concrete matter (castor fiber) found in follicles between anus and external genitals of beaver in both sexes; odor is strong, unpleasant, and peculiar; taste bitter, subacrid; antispasmodic and nervine; see *Castor fiber*. Dose, gr. x–xx. **C. America'num**, castor Americanus. **C. Canaden'se**, castor Americanus. **C. Europæ'um**, Russian castor; known also under names C. Germanicum, C. Moscoviticum, C. Rossicum, C. Sibericum.

Castorin, kas'to-rin. White waxy crystalline derivative of castor.

Castrangula, kas-tran'gu-lah. Scrophularia aquatica, S. nodosa.

Castration, kas-tra'shun (*castro*, to emasculate). Orcheotomy, orchidotomy, gelding, spaying. Operation of removing the testicles or one testicle only. *Spaying, Female castration*, is a term usually restricted to removal of the ovaries. See *Alteration*, *Castratus*, and *Oöphorectomy*.

Castratura, kas-trah-tu'rah. Castration.

Castra'tus. One deprived of testicles. An animal in this condition is said to be altered. The operation has been practised to procure clearer and sharper voice. In the East guardians of the harem, for sake of security, are converted into castrati or eunuchs, who sometimes have both testes and penis removed.

Casuarina (kas-u-ar-e' nah) **equisetifo'lia** or **In'dica**. Astringent bark of this plant of the E. Indies is used in diarrhœa and dysentery. **C. litora'lis, lito'rea**, or **muriat'ica**, tinian pine of India, has similar properties; also tonic.

Casumu'niar. Cassumuniar.

Casus, kah'sus (*cado*, to fall). Case; symptom; prolapsus; accident. **C. pal'pebræ superio'ris**, falling down of the upper eyelid; see *Blepharoptosis*. **C. u'vulæ**, relaxation and tumefaction of the uvula; see *Staphylœdema*.

Cat foot. Gnaphalium polycephalum. **C. mint**, Nepeta cataria. **C. tail**, Typha latifolia. **C. thy'me**, Teucrium marum.

Cata (kat'a) or **Cath** (*kata*, downward, after). At times gives additional force to the radical word.

Catabasis, kat-ab'as-is (*katabaino*, to descend). Expulsion of humors downward. Descent, as of the testicles. Decline of disease.

Catabatic, kat-a-bat' ik. Having a tendency to fall, descend, or decline.

Catablema, kat-ah-bla'mah (*kataballo*, to throw; anything let fall, as a curtain). Outermost bandage, securing the rest.

Catab'olism (*kataballo*, to throw down). Normal tissue-disintegration.

Catabythismomania, kat-ah-bith-iz-mo-man'e-ah (*katabuthismos*, submersion). Insanity, with propensity to suicide by drowning.

Catacasmus, kat-ak-az'mus (*cata, akazo*, to prick). Cupping; scarification.

Catacauma, kat-ak-aw'mah (*cata, kauo*, to burn). Burn or scald.

Catacausis, kat-ak-aw'sis. Combustion, human. **C. ebrio'sa**, combustion, human.

Catacerasticus, kat-ah-ser-as'tik-us (*katakerastikos*, corrective). Medicine capable of blunting acrimony of the humors.

Catachasmus, kat-ak-as'mus. Catacasmus.

Catachloos, kat-ak'lo-os (*cata, chloos*, green). Very green, as fecal matter colored by bile.

Catachrisis, kat-ak'ris-is (*cata, chrio*, to anoint). Inunction.

Catachrisma, kat-ak-ris'mah. Ointment.

Catachriston, kat-ak-ris'ton. Liniment.

Catachysis, kat-ak' is-is (*katachuo*, to pour upon). Affusion with cold water; douche. Decantation.

Cataclasis, kat-ak' las-is (*kataklazo*, to break to pieces). Distortion or spasmodic fixation of the eyes; spasmodic occlusion or eversion of the eyelids. Fracture of a bone.

Catacleis, kat'ah-kleis (*cata, kleis,* clavicle). Term applied to many parts, as first rib, acromion, articulation of sternum with ribs, etc.

Catacleisis, kat-ah-kleis'is (act of locking up). Morbid union or occlusion of the eyelids.

Cataclysis, kat-ak'lis-is (*cata, lusis,* loosening). Purging; bathing.

Cataclysm, kat'ak-lizm (*katakluzo,* to submerge). Clyster; shower bath or copious affusion of water; ablution; douche; sudden shock.

Catacrotism, kat-ak'ro-tizm. Catadicrotism.

Catacrotous (kat-atk'ro-tus) or **Catacrot'ic** (*cata, kroteo,* to strike). Pulse with double beat, waving being observed in downward strokes of the sphygmograph.

Catacrusis, kat-ah-kru'sis (*katakrouo,* to beat down). Revulsive action or treatment.

Catadicrotism, kat-ah-dik'ro-tizm. Variation in descending strokes of sphygmograph.

Catæonesis, kat-e-on-a'sis (*cata, aionao,* to moisten). Cataclysm; catantlema.

Catagau'na. Cambogia.

Cataglossum, kat-ah-glos'sum (*katago,* to draw down, *glossa,* tongue). Instrument for pressing down the tongue. See *Glossocatophus.*

Catagma, kat-ag'mah. Fracture. **C. fissu'ra,** see *Contrafissura.* **C. fractu'ra,** fracture.

Catagmatics, kat-ag-mat'iks. Remedies supposed to be capable of occasioning formation of callus to unite fragments of bone.

Catagraphology, kat-ah-graf-ol'o-je (*cata, grapho,* to write, *logos,* discourse. Art of writing prescriptions.

Catalentia, kat-ah-len'she-ah. Epilepsy; epileptiform disease.

Catalepsia, kat-ah-lep'se-ah. Catalepsy. **C. pulmo'num,** spasm of the glottis. **C. spu'ria,** see *Ectasis.*

Catalepsy, kat'ah-lep-se (*cata, lambano,* to seize hold of). Disease in which there is sudden suspension of action of the senses and of volition, the limbs and trunk preserving different positions given to them; affection seen at times as a form of, or in association with, chorea, insanity, and ether or chloroform intoxication. **C., artific'ial,** form of this disease induced in the hypnotic state. **C., feigned, sim'ulated,** or **spu'rious,** form of catalepsy imitated by malingerers or accompanying insanity; in the former there cannot be loss of sensation or of sensibility to pain.

Cataleptic, kat-ah-lep'tik Relating to catalepsy; affected with catalepsy. **C. attack',** attack of catalepsy; see *Catalepsy.* **C. meth'od,** administration of external agents when internal agents are inapplicable, as by inunction.

Catalep'tiform or **Cataleptoid,** kat-ah-lep'toid (*catalepsy, eidos,* resemblance). Resembling catalepsy.

Catalotic, kat-al-ot'ik (*cata, aloao,* to grind). Remedy which removes unseemly cicatrices.

Catalpa, kat-al'pah. Catawba tree, bean tree, Indian bean. A decoction of the pods of catalpa, American tree, Didynamia angiospermia, has been used in chronic nervous asthma; seeds are antispasmodic and expectorant, wood is emetic, and bark anthelmintic; leaves are emollient and anodyne, applied externally. **C. arbo'rea, bignonioï'des, cordifo'lia,** or **syringæfo'lia,** catalpa.

Catalysis, kat-al'is-is (*cata, luo,* to decompose). Paralysis; dissolution, as by death; action of presence in producing decomposition, as when a body possessing what has been termed catalytic force resolves other bodies into new compounds by mere contact or presence, without itself experiencing any modification.

Catalyst, kat'al-ist. Substance producing catalysis.

Catalytic, kat-al-it'ik. Medicine acting by destruction or counteraction of morbid agencies in the blood; disease induced by such agency; see *Catalysis.* **C. force,** see *Catalysis.*

Catamenia, kat-ah-me'ne-ah (*cata, men,* month). Menses. **C. al'ba,** leucorrhœa usually preceding, substituting, or increased by monthly menstrual discharge.

Catamenial, kat-ah-me'ne-al. Menstrual, menstruous; appertaining or relating to catamenia.

Catameniorum fluxus immodicus, kat-ah-me-ne-o'rum fluks'us im-mod'ik-us (immoderate flow of menses). Menorrhagia.

Catamysis, kat-am'is-is. Occlusion or closure of the eyelids.

Catanance, kat-an-an'se. Cichorium intybus.

Catananche cærulea, kat-an-an'ke se-ru'le-ah. Herb of S. Europe, considered laxative.

Catangelus, kat-an'jel-us. Ruscus.

Catantlema (kat-ant-la'mah) or **Catantle'sis** (*cata, antlao,* to pour). Ablution with warm water; fomentation; affusion.

Catantochasmus, kat-an-to-kaz'mus (*katanta,* downward, *chasma*). Term applied to skulls in which line connecting staphylion and basion looks forward when referred to radius fixus as a horizontal, making with it angle of from 0° to 13°.

Catantopylus, kat-an-top'il-us (*katanta,* downward, *pule,* orifice) Term applied to skulls in which foramen magnum looks slightly backward (1° to 8°) when referred to radius fixus as horizontal.

Catantorrhinus, kat-an-tor-rhin'us (*katanta,* downward, *rhis,* nose). Term applied to skulls in which line from hormion to subnasal point lies below radius fixus, making with it angle of from 1° to 16.5°.

Catantostomus, kat-an-tos'to-mus (*katanta,* downward, *stoma,* mouth). Term applied to skulls in which line connecting hormion and alveolar point lies below radius fixus, making with it angle of from 9° to 25.5°.

Cantanturaniscus, kat-an-tur-an-is'kus (*katanta,* downward, *ouraniskos,* roof of mouth). Applied to skulls in which line connecting posterior border of incisive foramen and alveolar point looks backward when referred to radius fixus as horizontal, making with it angle of from 1° to 20°.

Catanturanus, kat-an-tur'an-us (*katanta,* downward, *ouranos,* palate). Applied to skulls in which line connecting staphylion and alveolar point looks backward when referred to radius fixus as horizontal, making with it angle of from 1° to 17°.

Catapas'mus (*katapasso,* to sprinkle). Moderate friction.

Catapausis, kat-ah-paws'is (*cata, pausis,* sedation). Sedation.

Catapepsis, kat-ah-pep'sis (*cata,* intensive, *pepsis,* digestion). Normal complete digestion.

Catapha'sia (*cata, aphasia,* loss of speech). Repetition of a word or words to a morbid degree.

Catapho'nic (*cata, phone,* sound). Relating to reflection of sound.

Cataphora, kat-af'or-ah (*kataphora,* fall). State resembling sleep, with privation of feeling and voice; somnolency; profound sleep, synonymous with sopor; lethargy. **C. co'ma,** sanguineous apoplexy. **C. hydrocepha'lica,** serous apoplexy. **C. magnet'ica,** somnambulism, magnetic.

Cataphoresis, kat-ah-for-a'sis (*kataphero,* to drive down). Act of transferring remedial agents through medium of constant current to deeply-situated tissues, as in nasal catarrh; application of chloroform to nerve-substance, etc.

Cataphoric, kat-ah-for'ik (same etymon). Relating to power of inducing passage of fluids through membranes by medium of constant current.

Cataphracta (kat-ah-frak'tah) or **Cataphrac'tes** (*kataphrasso,* to furnish with armor). Cuirass; bandage applied around the thorax and shoulders.

Cataphrixis, kat-ah-friks'is (*cata, phrisso,* to shiver). Chilliness and pain from exposure to cold.

Catapiesis, kat-ah-pe'es-is (*cata, piezo,* to press). Depression.

Catapinosis, kat-ah-pin-o'sis (*cata, pino,* to drink). Absorption.

Cataplasis, kat-ap'las-is (*kataplasso,* to besmear). Act of overlaying with plaster; application of a plaster.

Cataplasm, kat'ah-plazm (same etymon). Poultice; medicine applied externally, under form of thick pap.

Cataplasms are formed of various ingredients and used for different objects, being anodyne, emollient, antiseptic, etc. A simple poultice acts only by virtue of its warmth and moisture. Mealy, fatty substances, leaves of plants, certain fruits, crumb of bread, etc., are the most common bases. **C., al'um,** coagulum aluminosum. **C. of beer-grounds,** see *Cataplasma fermenti.* **C., bread-and-milk,** see *Cataplasma lini.* **C., car'rot,** cataplasma dauci. **C., char'coal,** cataplasma carbonis ligni. **C. of chlo'rinated so'da,** cataplasma sodæ chlorinatæ. **C., flax'seed,** cataplasma lini. **C., hem'lock,** cataplasma conii. **C., ice,** see *Ice.* **C., ley,** see *Lixivium.* **C., lin'seed,** cataplasma lini. **C., mush,** see *Cataplasma lini.* **C., oil'-cake,** see *Cataplasma lini.* **C., slip'pery elm,** cataplasma ulmi. **C., yeast,** cataplasma fermenti.

Cataplasma, kat-ah-plaz'mah. Cataplasm. **C. aëra'tum,** C. fermenti. **C. antisep'ticum,** poultice containing charcoal, creasote, carbolic acid, or other antiseptic material. **C. astrin'gens,** poultice of galls, alum, or other astringent substance. **C. carbo'nis,** charcoal cataplasm, or poultice made by adding powdered charcoal to common cataplasm; antiseptic to foul ulcers, etc. **C. cerevis'iæ,** C. fermenti. **C. commu'ne,** flaxseed poultice. **C. coni'i,** hemlock cataplasm, poultice made by spreading soft extract of hemlock on flaxseed poultice; used in malignant painful ulcers. **C. dau'ci,** carrot cataplasm, made by boiling carrot-root until soft enough to form a poultice; used in fetid ulcers. **C. emol'liens,** flaxseed poultice; C. lini. **C. fæc'ulæ cerevis'iæ** or **fermen'ti,** yeast cataplasm or poultice (wheaten flour, beer, yeast, and water); antiseptic, and good application to bruises. A cataplasm of beer-grounds, cataplasma fæculæ cerevisiæ, is used in same cases. **C. li'ni,** linseed or flaxseed cataplasm, made by mixing boiling water with linseed meal; excellent emollient. Bread-and-milk cataplasm, ground oil-cake cataplasm, and mush cataplasm, or C. of Indian corn, are used in similar cases. **C. rubefa'ciens,** C. sinapis. **C. sina'pis,** sinapism, mustard cataplasm, poultice or plaster (mustard and linseed meal equal parts and boiling water); rubefacient and stimulant, applied to painful part in rheumatism, localized pains, etc. **C. so'dæ chlorina'tæ** or **chlora'tæ,** cataplasm of chlorinated soda, chlorine poultice, made by adding solution of chlorinated soda to flaxseed cataplasm; applied to foul, offensive ulcers. **C. ul'mi,** slippery-elm poultice, made by adding boiling water to powdered bark of Ulmus fulva, stirring constantly; light, agreeable cataplasm.

Cataplectic, kat-ah-plek'tik (*cata, plesso,* to strike). Striking suddenly, as a cataplectic attack.

Cataplexis, kat-ah-pleks'is (*cata, plesso,* to strike). Act of striking with amazement or sudden prostration; apoplexy; extreme sensibility of teeth.

Cataponesis, kat-ah-pon-a'sis (*cataponeo,* to overcome with fatigue). Exhaustion from overwhelming exertion or labor.

Catapo'sis (*cata, posis,* drinking). Deglutition.

Catap'otra. Cardiac opening of stomach.

Catapsyxis, kat-ah-siks'is (*katapsucho,* to refrigerate). Coldness of body or limbs without rigor and horripilation.

Cataptosis, kat-ap-to'sis (*cata, ptosis,* fall). Fall of patient with epilepsy or apoplexy; sudden resolution of a paralytic limb.

Catapulta virilis, kat-ah-pul'tah vir-il'is (male catapult, *cata, pallo,* to throw). Penis.

Cataputia major, kat-ah-pu'te-ah ma'jor. Ricinus communis. **C. mi'nor,** Euphorbia lathyris.

Cataract, kat'ar-akt (*kataraktes,* waterfall, cataract). Opacity of crystalline lens or its capsule, preventing passage of rays of light, and precluding vision. Cataracts have been divided into spurious and genuine; the former, pseudo-cataracta, where obstacle to vision is between capsule of lens and uvea; the latter, where it is in the lens or capsule.

Lenticular cataract is seated in the lens, capsular or membranous in the capsule. *Capsular cataract* is divided again into anterior, posterior or polar, and complete capsular cataract. When the anterior form is elevated above surface of capsule, it has been termed *pyramidal cataract. Lamellar* or *zonular cataract* consists of layer of opaque lens substance lying between the nucleus and transparent portion of cortical substance; generally congenital or developed in infancy. *Cortical cataract* usually commences at the margin, grayish-white stripes being observed running toward centre of lens, cloudiness soon involving the whole lens. *Nuclear* or *hard senile cataract* is a form usually met with in old people. When the capsule is rendered opaque, in consequence of injury, *traumatic cataract,* suffusio ex vulnere, which cuts or ruptures any part of it, it thickens, becomes leathery, and has been called *Arid siliquose cataract. Morgagnian, lacteal,* or *puriform cataract* is a milky variety, in which the crystalline is transformed into liquid similar to milk, or in which there is opacity of fluid situate between the lens and its capsule. *Capsulo-lenticular cataract* affects both lens and capsule.

Cataracts are also called *hard,* sclerocataracta, suffusio dura; *soft,* phacomalacia, suffusio mollis; *stony; milky* or *cheesy,* galactocataracta, cataracta lacticolor, according to their density: white, pearly, yellow, brown, gray, green, black, according to their color: fixed or vacillating—cataracta capsulolenticularis fixa or tremula, according as they are fixed or movable behind the pupil. They are likewise called cataractæ marmoraciæ, fenestratæ, stellatæ, punctatæ, dimidiatæ, etc., according to appearances they present. In diabetic cataract opacity is probably dependent on impaired nutrition connected with diabetes.

Cataract may be simple or complicated with adhesion, amaurosis, specks, etc.; and primary or primitive, when opaque before operation; secondary, when opacity is result of operation.

Cataract is commonly a disease of elderly individuals, although, not unfrequently, congenital, suffusio congenita. It forms slowly; objects are at first seen as through a mist; light bodies appear to fly before the eyes, and not until after months or years is sight wholly lost. Operation alone will obviate the evil by removing obstacle to passage of light to the retina. The following methods are employed for this purpose, the operator observing the rules of antiseptic surgery: the flap operation, linear extraction, the modified or peripheral linear (Von Graefe), the short flap (De Wecker), the needle operation, and the suction method. The old operation of couching or depression has been abandoned by ophthalmic surgeons.

The *needle operation,* or *discission,* consists in opening the capsule of the lens; the aqueous humor comes in contact with the substance of the lens, and absorption is brought about. This mode of operating is adapted to cataracts in children. The *suction method* consists in lacerating the anterior lenticular capsule with needles; an incision is made in the cornea large enough to allow the aspirator to be introduced, suction is made with it, and the lens matter removed in this manner. Selection of the most appropriate operation must depend upon the peculiar nature of the case.

Cat'aract, ante'rior cen'tral, C., polar. **C., ax'ial,** C., nuclear. **C., black,** nuclear cataract darkened by absorption of hæmatin, with inflammation of inner part of the eye; at one time amaurosis was so called. **C., calca'reous,** cataract with calcareous deposits, often so hard as to receive the name *osseous.* **C., cap'sular,** see *Cataract.* **C., capsulo-lentic'ular,** see *Cataract.* **C., ca'seous,** C., cheesy. **C., cen'tral,** C., neutral; centradiaphanes. **C., chee'sy,** see *Cataract.* **C., choles'terin,** cataract having particles of cholesterin glistening in the lens. **C., com'plicated,** see *Cataract.* **C., congen'ital,** see *Cataract.* **C., cor'tical,** see *Cataract.* **C., crys'talline,** C., lenticular; see *Cataract.* **C., cyst'ic,** see *Cataracta cystica.* **C., diabe'tic,** cataract associated with diabetes. **C., dot'ted,** C., punctated. **C., false,** opacity of the cornea or aqueous humor not involving the lens. **C., fi'brinous,** false cataract, in which plastic lymph is deposited on the lens or its capsule. **C., fixed,** see *Cataract.* **C., flu'id,** see *Cataracta cystica.* **C., fu'siform,** spindle-shaped nuclear cataract. **C., gen'uine,** see *Cataract.* **C.,**

glycosu'ric, diabetic c.; see *Cataract.* **C., green**, cataract complicated with glaucoma. **C., hard**, see *Cataract.* **C., hy'aloid**, cataract probably dependent upon opacity of vitreous humor. **C., intersti'tial**, C., lenticular. **C., lamel'lar, lam'inar**, or **lam'inated**, opacity of several lamellæ of the lens, not of whole lens itself; generally congenital. **C., lentic'ular**, see *Cataract.* **C., lymph**, cataracta cystica. **C., mem'branous**, see *Cataract.* **C., milk'y**, soft, milk-like opacity of lens. **C., mixed**, opacity of lens, at first cortical, afterward nuclear also. **C., Morgag'nian**, cataracta cystica. **C., nu'clear**, see *Cataract.* **C., opaque**, see *Cataract.* **C., opera'tions for**, see *Cataract.* **C., os'seous**, see *C., calcareous.* **C., perinu'clear**, C., lamellar. **C., pigmen'tous**, spurious cataract due to traumatism, causing detachment of pigment. **C., po'lar**, opacity of centre of capsule of lens anteriorly, *anterior central* or *polar c.*; or posteriorly, *posterior central* or *polar c.* **C., pri'mary** or **prim'itive**, see *Cataract.* **C., pseu'do-mem'branous**, opacity of lens, having white maculæ, result of iritis. **C., punc'tated**, dotted form of cataract of cortex of lens. **C., pu'rulent**, hypopyon. **C., pu'trid**, hypopyon. **C., pyram'idal**, see *Cataract.* **C., sec'ondary**, C. consequent on some disease in vicinity, tumor, etc. **C., se'nile**, hard cataract of old age. **C., sha'king**, C., tremulous. **C., sim'ple**, see *Cataract.* **C., soft**, see *Cataract.* **C., sol'id**, C., hard. **C., spin'dle-shaped**, C., fusiform. **C., spu'rious**, see *Cataract.* **C., sto'ny**, see *Cataract.* **C., traumat'ic**, see *Cataract.* **C., trem'ulous**, condition in which, from laceration of parts or other cause, there is unusual mobility of the lens and iris. **C., true**, C., lenticular. **C., vac'illating**, C., trembling; see *Cataract.* **C., zo'nular**, C., lamellar; see *Cataract.*

Cataracta, kat-ar-ak'tah. Cataract. **C. accre'ta**, cataract with adherent iris. **C. arbores'cens**, cataract with pigmentary deposit on lens. **C. argente'a**, cataract with fatty matter of bile in the lens. **C. ar'ida siliquo'sa**, see *Cataract.* **C. axia'lis**, cataract with central opacity; nuclear cataract. **C. calca'rea**, cataract, calcareous. **C. capsula'ris**, capsular cataract. **C. cap'sulo-lenticula'ris**, see *Cataract.* **C. centra'lis**, C. from obscurity of central portion of the lens. **C. cys'tica**, cystic or fluid condition of lens, especially its cortex. **C. dimidia'ta**, see *Cataract.* **C. fenestra'ta**, see *Cataract.* **C. fusifor'mis**, spindle-shaped opacity of lens. **C. glau'ca**, glaucoma. **C. grumo'sa**, cataract with blood deposit in the pupil. **C. gyp'sea**, C. accreta. **C. lac'tea**, milky cataract. **C. lactic'olor**, see *Cataract.* **C. liq'uida**, liquid or fluid form of cataract. **C. marmora'cea**, see *Cataract.* **C. Morgagnia'na**, see *Cataract.* **C. ni'gra**, amaurosis. **C. nuclea'ris**, nuclear cataract; see *Cataract.* **C. puncta'ta**, see *Cataract.* **C. pyramida'ta**, opacity having pyramidal shape. **C. seni'lis**, cataract of old people; see *Cataract.* **C. stella'ta**, see *Cataract.* **C. traumat'ica**, see *Cataract.* **C. vir'idis**, glaucoma.

Cataractous, kat-ar-ak'tus. Of the nature of cataract; relating to cataract.

Cataria, kat-ah're-ah (*catus*, a cat, because cats are fond of it). See *Nepeta.* **C. vulga'ris**, nepeta.

Catarrh, kat-ar' (*cata*, *rheo*, to flow). Discharge of fluid from a mucous membrane. " Term is usually applied to simple inflammation of mucous membrane of the nasal and respiratory passages, but is now extended to all mucous membranes, as of stomach, bladder, etc. Catarrh, in the English sense, pulmonary or bronchial catarrh, lung fever, (vulgarly) a cold, is superficial inflammation of the mucous follicles of the trachea and bronchi; commonly of but little consequence, but apt to relapse and become chronic. It is characterized by cough, thirst, lassitude, fever, watery eyes, with increased secretion of mucus from the air-passages; antiphlogistic regimen and time usually remove it; sometimes inflammation of the bronchial tubes may prove fatal. **C., alcohol'ic**, gastro-intestinal irritation of habitual drinkers. **C., alve'olar**, engorgement of alveoli of lung occurring in broncho-pneumonia. **C., atroph'ic na'sal**, chronic disease characterized by atrophy of the lining membrane of the nose and turbinated bones, with offensive discharge; see *Oæna* and *Rhinitis.* **C., autum'nal**, fever, hay. **C. of the blad'der**, see *Cystitis.* **C., Bos'tock's**, hay fever. **C., bron'chial**, catarrh, congestive asthma. **C., choler'iform**, see *Cholera infantum.* **C., chron'ic**, bronchitis (chronic). **C., dry**, see *Bronchitis.* **C., epidem'ic**, catarrh prevailing owing to some particular atmospheric condition, and affecting a whole country—influenza. **C., follic'ular**, catarrh involving follicles, which become elevated and granular. **C., gas'tric**, gastrorrhœa; see *Gastritis.* **C., gas'tric, chron'ic**, pyrosis. **C., hemorrha'gic**, catarrh in which fluid secreted is mixed with blood, as in cases of variola, pyæmic poisoning, etc. **C., hyper'trophic na'sal**, chronic disease characterized by hypertrophy of lining membrane of nose and pharynx. **C., intes'tinal**, see *Enteritis.* **C., larynge'al**, laryngo-catarrhus. **C., na'sal**, coryza. **C., pap'illary**, C. of papillæ of kidney. **C., pitu'itous**, chronic bronchorrhœa, with excessive secretion; humid asthma. **C., pul'monary**, bronchitic catarrh. **C., rose**, fever, hay. **C., Rus'sian**, influenza. **C., se'rous**, clear or slightly bloody catarrh, with tinged secretion. **C. of skin**, dermatitis. **C., suf'focative**, capillary bronchitis. **C., suf'focative ner'vous**, laryngeal or bronchial catarrh threatening suffocation; asthma thymicum. **C., sum'mer**, fever, hay. **C. of u'terus**, see *Metritis, Leucorrhœa.* **C., vagi'nal**, see *Leucorrhœa.* **C., ves'ical**, see *Cystitis.*

Catarrhacta, kat-ar-rhak'tah. Cataract.

Catarrhal, kat-ar'rhal. Relating to or resembling catarrh. **C. pueumo'nia**, see *Pneumonia.*

Catarrhectica, kat-ar-rhek'tik-ah (*katarhegnumi*, to break down). Evacuating remedies, such as diuretics, cathartics, etc.

Catarrheuma, kat-ar-rhu'mah (*cata*, *rheuma*, defluxion). Catarrh.

Catarrhexia (kat-ar-rheks'e-ah) or **Catarrhexis**, kat-ar-rheks'is (*katarrhexis*, breaking down). Evacuant action from the bowels, stomach, or other organs. **C. ve'ra**, discharge of blood from the bowels.

Catarrhœa, kat-ar-rhe'ah (*cata*, *rheo*, to flow). Catarrh; rheumatism.

Catarrhoëticus (kat-ar-rho-et'ik-us) or **Catarrho'icus.** Epithet for disease produced by discharge of phlegm; catarrhal.

Catarrhopa phymata, kat-ar-rho'pah fe'mat-ah (*katarrhopos*, sloping downward). Tubercles or other growths tending downward or with their apices downward.

Catarrhophe (kat-ar'rho-fa) or **Catarrhophesis**, kat-ar-rof-a'sis (*cata*, *rhophao*, to swallow). Absorption.

Catarrhopia, kat-ar-rho'pe-ah (*cata*, *rhope*, inclination). Afflux of fluids toward inferior parts, and especially toward the viscera of the abdomen; *anarrhopia* expresses the opposite phenomenon, tendency toward upper parts.

Catarrho-pneumonia, kat-ar'rho-nu-mo'ne-ah. Catarrhal pneumonia.

Catarrhoschesis, kat-ar-rhos'kes-is (*katarrhoos*, catarrh, *schesis*, suppression). Suppression of mucous discharge or catarrh.

Catarrhous, kat-ar'rhus. Catarrhal; affected with catarrh.

Catarrhus, kat-ar'rhus. Catarrh, defluxion, tussis. **C. æsti'vus**, fever, hay. **C. bellinsula'nus**, mumps; see *Cynanche parotidæa.* **C. benig'nus**, common cold. **C. bronchia'lis**, catarrh. **C. bronchio'rum**, bronchitis. **C. à conta'gio**, influenza. **C. epidem'icus**, influenza; epidemic catarrh. **C. febri'lis**, catarrhal fever. **C. feri'nus**, whooping cough. **C. à frig'ore**, see *Catarrh.* **C. genita'lium**, leucorrhœa. **C. gonorrhœ'a**, gonorrhœa. **C. intestina'lis**, diarrhœa. **C. larynge'us** or **laryn'gis**, laryngocatarrhus. **C. ad na'res**, coryza. **C. nasa'lis**, coryza. **C. pec'toris**, see *Catarrh.* **C. pulmona'lis**, catarrh. **C. pulmo'num**, bronchitis; catarrh. **C. rubeolo'sus**, catarrh incident to measles. **C. Rus'sicus**, influenza. **C. seni'lis**, bronchitis (chronic); senile catarrh. **C. sic'cus**, dry catarrh. **C. suffocati'vus Barbaden'sis**, C. trachealis; suffoca-

tive catarrh. **C. trachea'lis,** catarrh of the trachea alone, or of the larynx and trachea; see *Laryngocatarrhus.* **C. ure'thræ,** gonorrhœa pura. **C. urethra'lis,** gonorrhœa. **C. vesi'cæ,** catarrh of the bladder; cystorrhœa.

Catarrhysis, kat-ar'rhis-is (*cata, rheo,* to flow). Catarrhopia, defluxion.

Catartisis (kat-ar'tis-is) or **Catartismus,** kat-ar-tiz'mus (*katartizo,* to repair). Coaptation or replacement of luxated or fractured bone. Reduction of hernia.

Catasarca, kat-ah-sark'ah (*cata, sarx,* flesh). Anasarca.

Catasceue, kat-ah-su'e (*cata, skeue,* equipment). Structure. Muscular exercise-apparatus.

Cataschasm, kat'as-kazm (*cata, schazo,* to scarify). Bloodletting; scarification.

Catasei'sis (violent shaking). Concussion.

Catastagmus, kat-ah-stag'mus (*cata, stazo,* to drop). Catarrh; coryza.

Catastalagmus, kat-ah-stal-ag'mus (*cata, stalazo,* to drop). Catarrh, coryza, distillation.

Catastaltic, kat-ah-stal'tik (*cata, stello,* to repress). Hæmatostatic, sedative, astringent, styptic. Passing downward, as nervous force.

Catastasis, kat-as'tas-is (*katastasis,* constitution). Constitution, state, condition. Reduction of bone. Sedation.

Catatasis, kat-at'as-is (*katateino,* to extend). Extension; extension and reduction of a fractured limb. Reduction of dislocation.

Catathesis, kat-ath'es-is (act of depositing). Depression.

Catathlipsis, kat-ah-thlip'sis (*cata, thlibo,* to press). Oppression.

Cataton'ia, Catat'ony (*cata,* intensive, *tonos,* tone or tension). Disease of the brain, of the nature of intense melancholy and general paresis of the insane.

Catawba (kat-aw'bah) **tree.** Catalpa.

Cataxis, kat-aks'is. Fracture; production of fracture.

Catch fly. Apocynum androsæmifolium; Silene Virginica. **C. weed,** Galium aparine.

Cat'echin. White astringent principle derived from catechu; catechuic acid.

Catechin'ic acid. Catechin.

Catechu, kat'e-ku (East Indian term, signifying juice of a tree). Extract prepared from wood of Acacia catechu (Ph. U. S.), cætchu, black catechu or cutch, and from leaves and young shoots of Nauclea or Uncaria gambir (Ph. Br.), pale catechu, Oriental trees. Extractum catechu is a powerful astringent, used in diarrhœa, intestinal hemorrhage, leucorrhœa, ulcers, sore throat, etc. **C. ni'grum,** officinal catechu. **C. pal'lidum,** see *Catechu.*

Catechu-tannic acid, kat'e-ku-tan'nik as'id. Peculiar form of tannic acid derived from catechu.

Cateiadion, kat-i-ad'e-on. Instrument formerly thrust into the nostrils to excite hemorrhage in cases of headache.

Catelectrode, kat-e-lek'trode. Cathode.

Catelectrotonic (kat-e-lek-trot'on-ik) or **Catelectrotonous,** kat-e-lek-trot'on-us (*cata, elektron, tonos,* tension). Relating to or producing catelectrotonus.

Catelectrotonus, kat-e-lek-trot'on-us. Increased excitability or irritability of a nerve at the negative pole after passage of a current through it.

Cateonesis, kat-a-on-a'sis (*cata, aionao,* to moisten). Catantlema.

Catesbœa mecrantha (kates-be'ah mek-ran'thah) **or spino'sa.** W. Indian shrub, bark of which is tonic and antipyretic.

Cat'foot. Antennaria dioica.

Cat'gut. Galega Virginiana. **C., car'bolized,** see *Ligature, antiseptic.* **C. lig'ature,** ligature made of catgut soaked in solution of carbolic acid and sweet oil; see *Ligature, antiseptic.*

Cath. In composition, see *Cata.*

Catha edulis, kath'ah ed-u'lis. Shrub of Asia and Africa, leaves of which are used as a drink, similar to coffee, and in insomnia and migraine.

Cathæresis, kath-e'res-is (diminution). Extenuation or exhaustion. Catharsis. Cauterization.

Cathæretic (kath-e'ret-ik) or **Catharetic,** kath-ar-et'ik (*kathairo,* to purge). Cathartic; (*kathaireo,* to destroy) tending to destruction or emaciation. Escharotic.

Catharism (kath'ar-izm), **Cathariza'tion** (*kathairo,* to purge). Depuration; purgation.

Catharma, kath-ar'mah. Matter evacuated by purgation or by spontaneous purging. Cathartic.

Catharmus, kath-ar'mus. Purgation. Cure of disease by magic, etc.

Catharsis, kath-ar'sis (*kathairo,* to purge). Natural or artificial purgation of any passage—mouth, anus, vagina, etc.; usually from the bowels only.

Cathar'tate. A salt of cathartic acid.

Cathartic, kath-ar'tik (same etymon). Producing catharsis. Medicine which, when taken internally, increases the number of alvine evacuations. Some substances act upon the upper part of the intestinal canal, as calomel and colocynth; others on the lower part, as aloes, and some on the whole extent, as saline purgatives. Cathartics are either purgative or laxative.

Cathartics are divided into laxatives, simple cathartics, drastic cathartics, saline cathartics, hydragogues, and cholagogues, as follows (Brunton):

Laxatives.

Cassia.	Manna.
Castor oil (in small doses).	Molasses.
Figs.	Prunes.
Gingerbread.	Stewed apples.
Honey.	Sulphur.
Magnesia.	Tamarinds.

Simple Cathartics.

Aloes.	Olive oil.
Cascara sagrada.	Rhamnus frangula.
Castor oil.	Rhubarb.
Magnesia.	Senna.
Magnesium carbonate.	Sulphur.

Drastic Cathartics.

Colocynth.	Jalap.
Croton-oil.	Podophyllin.
Elaterium.	Scammony.
Gamboge.	

Saline Purgatives.

Magnesium citrate.	Potassium sulphate.
Magnesium sulphate.	Potassium tartrate.
Potassium bitartrate.	Sodium phosphate.
Potassium and sodium tartrate.	Sodium sulphate.
	Sodium sulphovinate.

Hydragogues.

Elaterium.	Potassium bitartrate.
Gamboge.	

Cholagogues.

Aloes.	Mercurial preparations (blue pill, calomel, hydrargyrum cum cretâ.
Euonymin.	
Iridin.	

C. ac'id, glucoside, $C_{180}H_{96}N_2SO_{82}$, active principle of senna; see *Cassia senna* and *Rhamnus.*

Cathartin, kath-ar'tin. Bitter purgative substance from senna. Principle derived from Rhamnus catharticus; see *Cassia senna, Convolvulus Jalapa,* and *Rhamnus.*

Cathartin'ic ac'id. See *Cassia senna* and *Rhamnus.* In brown soluble scales; laxative in doses of 4 to 6 grains.

Cathartocarpus (kath-ar-to-kar'pus) **excel'sus** (*kathairo,* to purge, *karpos,* fruit). Cassia fistula. **C. fis'tula** or **fistuloi'des,** Cassia fistula. **C. moscha'tus,** Cassia moschata.

Cathartogen'ic ac'id, Cathartog'enin. Brown substance, product of action of dilute acids, as hydrochloric acid, upon cathartic acid.

Cathartoman'nit. Saccharine principle from senna leaves, $C_{21}H_{44}O_{19}$.

Cathedra, kath'ed-rah (a seat). Anus.

Cathelectrot'onus. Catelectrotonus.

Cathemerinus (kath-em-er'in-us) or **Catheme'rius** (*cath, hemera,* day). Quotidian.

Catheretic, kath-er-et'ik (*kathaireo,* to destroy). Mild caustic applied to wart, exuberant granulation, etc. Cathartic.

Catheter, kath'et-ur (*katheter,* a probe). Hollow tube introduced into the urinary bladder to draw off urine; made of silver or elastic gum. Catheters may also be passed into the nasal duct or Eustachian tube. See *Bougie.* **C., bent** or **el'bowed,** catheter, extremity of which is an elbowed curve; used especially in prostatic affections. **C., elast'ic,** C., flexible. **C., Eustach'ian,** catheter for examining or treating the Eustachian tube. **C., fe'male,** short catheter, to be passed into the female urethra. **C. fe'ver,** adynamic form of fever after catheterization; urethral fever. **C., flex'ible,** catheter made of flexible material, as rubber, etc. **C., na'sal,** instrument adapted for catheterizing the ductus ad nasum.

Cathet'eris. Catheter.

Catheterisis, kath-et-ur'is-is. Catheterism.

Catheterism (kath'et-ur-izm) or **Catheteriza'tion.** Introduction of catheter, hollow sound, or tube into a natural passage, as through the urethra into the bladder, Eustachian tube, larynx, etc.; in latter cases called tubage. Probing a wound.

Catheterization, kath-et-ur-iz-a'shun. Catheterism.

Catheterize, kath'et-ur-ize. To introduce a catheter; to probe or sound a cavity.

Cathidry'sis (*kathidruo,* to set in place). Reduction of a part to its natural situation.

Cathion, kath'e-on. Electro-positive element.

Catho'dal. Cathodic.

Cathode, kath'ode. Negative pole or electrode, point of exit of the galvanic current.

Cathodic, kath-o'dik (*cata, hodos,* a way). Relating to cathode; term referring to downward or efferent course of nervous action. **C. clo'sure contrac'tion,** muscular contraction taking place when the galvanic circuit is completed. **C. o'pening contrac'tion,** muscular contraction taking place when the galvanic circuit is broken.

Cath'odus. Downward or efferent course of nervous action, or downward afflux of blood.

Catholicon, kath-ol'ik-on. Panacea; purging electuary.

Cathorasis, kath-or'as-is (*kathorao,* to look intently). Acuteness of sight.

Cathypnia (kath-ip'ne-ah) or **Cathypno'sis** (*cata, hupnos,* sleep). Profound sleep.

Catias, kat'e-as. Cateiadion; catheter knife for tenotomy.

Cation, kat'e-on. Cathion.

Cati'vi. Contagious cutaneous disease of Honduras, characterized by numerous colored spots.

Catling, kat'ling. Knife, double-edged.

Cat'mint, Cat'nep, or **Cat'nip.** Nepeta cataria; Catamintha officinalis.

Cato, kat'o (*kato,* below, beneath). Abdomen; intestines; as prefix, beneath, downward.

Catocathartic, kat-o-kath-ar'tik (*cato, kathairo,* to purge). Medicine purging downward; antithesis to Anacathartic.

Catoche, kat'ok-e (*katecho,* to take possession of). Catalepsy; coma vigil; tetanus; fever with coma.

Catocheilon, kat-o-kile'on (*cato, cheilos,* lip). Lower lip.

Catochus, kat'ok-us (*katochos,* firm). Catoche. Induration of connective tissue. **C. cervi'nus,** tetanus. **C. holoton'icus,** tetanus. **C. infan'tum,** induration of cellular tissue.

Catocœlia, kat-o-se'le-ah (*cato, koilia,* abdomen). Hypogastrium; lower part of the abdomen.

Catomismus, kat-o-miz'mus (*cato, omos,* shoulder). Reducing luxation of humerus by raising the body by the arm.

Catopter, kat-op'tur (*cata, opto,* to see). Speculum.

Catoptric, kat-op'trik. Relating or appertaining to catoptrics or reflection of light. **C. examina'tion of the eye,** catoptric test; when a lighted candle is held before the eye, pupil of which has been dilated by belladonna, three images of it are seen—two erect, one inverted—the former owing to reflection from the cornea and anterior surface of crystalline; the latter, to reflection from posterior layer of the crystalline, inverted, and between the other two; a means of diagnosis between cataract and amaurosis, in the latter all the images being seen. Opthalmoscope is now used as substitute for this method.

Catop'trics. Part of physics treating of reflected light.

Catoptromancy, kat-op'tro-man-se (*katoptris,* mirror, *manteia,* divination). Divination by means of a mirror.

Catoptron, kat-op'tron (*cata, opto,* to see). Speculum.

Catoretic (kat-o-ret'ik) or **Catoter'ic.** Purgative.

Catorrhinus, kat-or'rhin-us (*cato, rhis,* nose). Term applied to skulls in which line from hormion (the point or middle line of junction of posterior border of vomer and sphenoid) to subnasal point (centre of inferior border of anterior nasal aperture) lies below radius fixus (linear distance between hormion and inion), the resulting angle being from 16.5° to 35°.

Catostomus, kat-os'tom-us (*cato, stoma,* mouth). Term designating skulls which have line between hormion and alveolar point (centre of anterior margin of superior alveolar arch) below radius fixus, angle being from 25.5° to 42.5°.

Catotica, kat-o'tik-ah (*kato,* beneath). Diseases infecting internal surfaces.

Catouraniscus, kat-u-ran-is'kus (*cato, ouraniskos,* roof). Craniometrical term to designate skulls in which line between posterior border of incisive foramen and alveolar point looks backward when referred to radius fixus as horizontal, resultant angle being from 20° to 40°.

Catouranus, kat-oor'an-us (*cato, ouranos,* roof of mouth). Craniometrical term used to designate skulls in which line between staphylion (median point of posterior nasal spine) and alveolar point (centre of anterior margin of superior alveolar arch) looks backward when referred to radius fixus as horizontal, the resultant angle being 17° to 34°.

Catoxys, kat-oks'is (*kata,* intensive, *oxus,* acute). Highly acute, as a disease.

Cat's eye. Opalescent appearance of pupil and of bottom of the eye, which reflect light in various colors or degrees of intensity, according to the direction in which the eye is turned. See *Amaurotic cat's eye.* **C.'s foot,** Antennaria dioica. **C.'s hair,** Euphorbia piluifera. **C.'s purr,** peculiar thrill sometimes heard in diseases of the heart.

Cattagau'ma. Cambogia.

Cat'tail. Typha latifolia. **C. flag,** typha latifolia.

Cattle-plague. Rinderpest.

Cattle-poison plant. Australian name for different varieties of Gastrolobium.

Catulotic, kat-u-lo'tik. Promoting cicatrization.

Caturus speciflorus, kat-u'rus spes-e-flo'rus (*katta,* cat, *oura,* tail—from shape of its flowers). E. Indian shrub, used in diarrhœa and dysentery.

Caucalis carota, kaw-kal'is kar-o'tah. Daucus carota. **C. daucoï'des,** bur-parsley, hedge-parsley, of Europe; fruit is diuretic and emmenagogue; *C. c. grandiflora* has similar properties. **C. latifo'lia,** bastard parsley of Europe; diuretic. **C. sanic'ula,** sanicula.

Caucaloïdes, kaw-kal-o-e'des (like **Caucalis**). Patella.

Caucasian, kaw-ka'zhe-an. See *Homo.*

Cauchuc, kaw'shook. Caoutchouc.

Cauda, kaw'dah (a tail). Tail. Elongated extremity of muscle or other structure; see *Clitorism, Coccyx, Penis.* **C. agres'tis,** Acalypha betulina. **C. cauda'ti,** C. corporis striati. **C. cerebel'li,** vermiform process. **C. coccyge'a,** coccyx. **C. collic'uli cauda'ti,** C. corporis striati. **C. cor'poris stria'ti,** posterior extremity of corpus striatum. **C. epididym'idis,** tail of epididymis. **C. equi'na** (horse's tail), the spinal marrow, at its termination, about the second lumbar vertebra, gives off a number of nerves, which, when unravelled, resemble a horse's tail; hence the name; see *Medulla spinalis.* **C. fe'lis,** caturus. **C. hel'icis,** tail of the

process of the helix. **C. lie'nis,** lower extremity of spleen. **C. muli'ebris,** clitoris. **C. mus'culi,** see *Muscle.* **C. pancre'atis,** tail of pancreas. **C. pri'or flexo'ris bre'vis,** abductor brevis alter. **C. puden'di,** clitoris; polypus uteri. **C. sa'lax,** penis. **C. stria'ti,** delicate termination of nucleus caudatus.

Cau'dad. In a direction toward the tail or posterior extremity.

Caudal (kawd'al) or **Caud'ate** (*cauda,* tail). Relating or appertaining to a tail. Having a tail or tail-like appendage, as cells or corpuscles in cancer. **C. lig'ament,** lower extremity of spinal cord. **C. ver'tebræ,** coccygeal and sacral vertebræ, those belonging to the tail.

Caudate, kawd'ate. Caudal. **C. lobe of liv'er,** see *Liver.* **C. nu'cleus,** see *Corpus striatum.*

Caudation, kawd-a'shun (*cauda,* tail). Clitorism.

Caudatus, kawd-at'us. Caudal or caudate.

Caudex (kawd'eks) **cer'ebri** (*caudex,* stem). Peduncle of brain. **C. dorsa'lis,** spinal cord; medulla oblongata. **C. enceph'ali,** cerebral peduncle; medulla oblongata; crus cerebri; pons Varolii. **C. medulla'ris,** cerebral peduncle.

Caudle, kawd'le. Nourishing gruel containing egg, sugar, wine, and nutmeg.

Cau'do-fem'oral. Agitator caudæ.

Caul (*caula,* sheep-fold). *Lucky hood, Omentum, Amnion.* When a child is born with membranes over the face, it is said to be *born with a caul.* The caul is supposed to confer privileges upon the possessor; hence the membranes are dried, and sometimes sold for a high price, and even bequeathed, and are occasionally carried about for a long series of years. See *Epiploon.*

Cauledon, cawl-e'don (*kaulos,* stalk). Transverse fracture.

Cauliflower, kawl'e-flow-ur (*caulis,* (G.) *Kohl,* cabbage). Brassica florida. **C. can'cer,** ulcerated cancer of cervix uteri. **C. excres'cence,** excrescence appearing about the origin of the mucous membranes, chiefly about the anus and vulva, and resembling in appearance a head of cauliflower; it is often syphilitic. *Cauliflower excrescence of the uterus* is an epitheliomatous growth from the circumference of the os uteri, and, at times, from the surface of the cavity of the uterus.

Caulis, kawl'is (*kaulos,* stalk). Penis; cervix uteri; crus cerebri. **C. flor'ida,** Brassica florida. **C. u'teri,** cervix uteri.

Caulophyllin, kawl-o-fil'lin. Resinous matter derived from caulophyllum; tonic.

Caulophyllum thalictroïdes, kawl-o-fil'lum thalik-tro-e'des (*kaulos,* stalk, *phullon,* leaf). *Blueberry Cohosh, Cohosh, Cohush, Blue Cohosh, Papoose* or *Pappoose root, Squaw root, Blue ginseng, Yellow ginseng.* Plant of family Berberideæ, growing all over the U. States. Root is said to be emmenagogue, diaphoretic, diuretic, and antispasmodic. Rhizome and rootlets are officinal under the name Caulophyllum (Ph. U. S.).

Cauloplegia, kawl-o-plej'e-ah (*caulis, plege,* stroke). Injury or paralysis of the penis.

Caulorrhagia, kawl-or-rhaj'e-ah (*caulis, rhegnumi,* to break forth). Hemorrhage from the penis. **C. ejaculato'ria,** discharge of blood from the urethra in the act of emission of sperm. **C. stillati'tia,** hemorrhage from the urethra.

Caulorrhœa, kawl-or-rhe'ah (*caulis, rheo,* to flow). Discharge from the penis. **C. benig'na,** gonorrhœa pura; urethral blennorrhea of the male.

Caulus, kawl'us. Penis; neck of uterus; crus cerebri.

Cauma, kaw'mah (burnt part). Great heat of the body or atmosphere. Inflammation; internal inflammation; inflammatory fever. Spot burned by cautery. **C. bronchi'tis,** cynanche trachealis. **C. cardi'tis,** carditis. **C. cysti'tis,** cystitis. **C. enteri'tis,** enteritis. **C. gastri'tis,** gastritis. **C. hæmorrhag'icum,** active hemorrhage. **C. hepati'tis,** hepatitis. **C. hysteri'tis,** metritis. **C. nephri'tis,** nephritis. **C. odontal'gicum,** odontalgia. **C. ophthalmi'tis,** ophthalmia. **C. oti'tis,** otitis. **C. paroti'tis,** cynanche parotidæa. **C. peritoni'tis,** peritonitis. **C. phreni'tis,** phrenitis. **C. pleuri'tis,** pleuritis. **C. podag'ricum,** gout. **C. rheumatis'mus,** rheumatism, acute. **C. spleni'tis,** splenitis.

Caumat'ic (*kauma,* burn). Febrile; pyretic.

Caumatodes (kaw-ma-to' des) or **Caumate'rus.** Burning hot, as *Febris caumatodes,* inflammatory fever.

Caun'ga. Areca.

Causa, kaw'sah. Cause. **C. ab'dita,** latent cause. **C. conjunc'ta** or **con'tinens,** proximate cause. **C. exci'tans,** exciting cause. **C. procatarc'tica,** predisposing cause; occasional cause. **C. prox'ima,** proximate cause.

Causæ (kaw'se) (pl. of **Causa**) **ab'ditæ.** Predisponent or remote causes. **C. actua'les,** occasional causes. **C. præincipien'tes,** procatarctic causes. **C. prægu'menæ,** predisponent causes.

Cau'sal. Relating to a cause.

Causalgia, kaws-al'je-ah (*kausos,* heat, *algos,* pain). Burning pain as in neuralgia, commonly in the foot, but also in the region of an injured nerve.

Cause, kawz. Act preceding another, and seeming to be a necessary condition for concurrence of the latter, as in production of disease. **C., acces'sory,** one which has only secondary influence in production of disease. **C., acciden'tal,** one which acts only in certain given conditions, and does not always produce the same disease; cold, for example. **C., antece'dent,** remote or predisposing cause. **C., endopath'ic,** one arising within the body, as mental emotions. **C., essen'tial,** one that produces the effect without regard to other causes. **C., exci'ting,** C., occasional; C., proximate. **C., exopath'ic,** C., external. **C., exter'nal,** one acting from without, as air, cold, etc. **C., hid'den,** C., occult. **C., imme'diate,** C., essential or proximate. **C., inter'nal,** C., endopathic. **C., mechan'ical,** one acting mechanically, as pressure upon the windpipe in inducing suffocation. **C. neg'ative,** anything, privation of which may derange the functions, as abstinences too long continued. Opposed to *positive causes,* which directly induce disease, as use of indigestible food, spirituous drinks, etc. **C., obscure',** C., occult. **C., occa'sional,** exciting cause; one which immediately produces a disease. **C., occult',** hidden cause; obscure cause; one with which we are unacquainted; certain inappreciable characters of the atmosphere, giving rise to epidemics. **C., phys'ical,** one acting by virtue of physical properties, as form, hardness, etc. **C., physiolog'ical,** one acting only on living matter; narcotics, for example. **C., pos'itive,** see *C., negative.* **C., predispo'nent** or **predispo'sing,** remote cause; one which renders the body liable to disease; *general,* affecting a number of people, or *particular,* affecting only one person. **C., pri'mary,** C., proximate. **C., prin'cipal,** one exerting the chief influence in production of disease, as distinguished from accessory cause. **C., procatarc'tic** (relating to origin or beginning), word used with different significations, synonymously with predisponent or remote cause, and with occasional or exciting cause. **C., prox'imate,** one producing direct and immediate effect; superabundance of blood, for example, being the proximate cause of plethora. **C., remote'** or **sec'ondary,** C., predisponent. **C., specif'ic,** one of specific character, as a micro-organism.

Causis, kawz'is (*kaio,* to burn). Burn, cauterization, combustion, ebullition, fermentation. See *Incendium* and *Ustion.*

Causodes, kawz-o'des (*kausis,* burn). Inflammatory.

Causoma, kawz-o'mah (*kausis,* burn). Inflammation. See *Cauma, Causis.*

Caustic, kaws' tik (*kaustikos,* that which burns). Term applied to bodies having property of burning or disorganizing animal substances. The most active are called *escharotics,* completely decomposing the tissues to which they are applied. Caustics are also termed corrosives. **C. al'cohol,** sodium ethylate. **C. ammo'nia,** aqua ammoniæ. **C. ar'rows,** small sharp-pointed cones of paste, containing zinc chloride or other caustics, introduced into the substance of tumors.

C. bary'ta, barium hydrate. **C. bear'er,** instruments for carrying lunar caustic. **C., black,** concentrated sulphuric acid made into paste with saffron. Used in cancer. **C., Can'quoin's,** pasta zinci chloridi. **C. collo'dion,** solution of corrosive sublimate p. iv in collodion p. xxx, used for destroying nævi materni. **C., com'mon,** causticum commune. **C. of Fil'hos,** mixture of melted potassa 100 p., lime 20 p., poured into moulds. **C. i'odine, Lu'gol's,** iodine and iodide of potassium, each ℥j, dissolved in water f℥ij; used in lupus and fungous granulations. **C., Landol'fi's,** mixture of chlorides of bromine, zinc, gold, and antimony. **C., lu'nar,** argenti nitras. **C., mit'igated,** diluted nitrate of silver. **C. paste,** Canquoin's pasta zinci chloridi. **C. points,** C. arrows. **C. pot'ash,** potassa. **C. so'da,** sodium hydrate. **C., Vien'na,** potassa cum calce.

Caustica adustio, kaws'tik-ah ad-us'te-o (caustic burning). Cauterization.

Causticity, kaws-tis'it-e. Impression made by caustic bodies on the organ of taste. Property distinguishing those bodies.

Causticophorum, kaws-tik-of'or-um (*kaustikos*, capable of burning, *phero*, to carry). Caustic-bearer.

Causticum, kaws'tik-um. Caustic. **C. Æthiop'icum,** paste made by rubbing powdered saffron with concentrated sulphuric acid; used as caustic in gangrenous and carcinomatous ulcers. **C. alkali'num,** potassa fusa. **C. America'num,** Veratrum sabadilla. **C. antimonia'le,** antimonium muriatum. **C. chirur'gicum,** potassa fusa. **C. cum chlorure'to zin'cico,** Canquoin's caustic. **C. commu'ne,** potential cautery, common caustic, consisting of quicklime and black soap, equal parts; potassa fusa. **C. c. acer'rimum,** potassa fusa. **C. c. for'tius,** potassa cum calce. **C. luna're,** argenti nitras. **C. ni'grum,** caustic, black. **C. cum potas'sa et calce,** caustic of Filhos. **C. potentia'le,** potassa fusa. **C. sali'num,** potassa fusa. **C. Viennen'se,** potassa cum calce; see *Powder, Vienna.*

Causus, kaws'us (*kausos*, heat). Ardent fever; gastric intermittent fever. **C., endem'ial** or **endem'ic, of West Indies,** fever, yellow. **C. trop'icus endem'icus,** fever, yellow.

Cauter, kawt'ur (*kauter*, a burner). Cauterium.

Cauterant (kawt'er-ant) or **Cauteret'ic.** Possessing caustic effects.

Cauteriasmus (kaw-ter-e-az'mus), **Cauterisa'tio,** or **Caut'erism.** Cauterization.

Cauterium, kaw-ter'e-um. Cautery. **C. actua'le,** actual cautery. **C. potentia'le,** potential cautery.

Cauterization, kaw-ter-iz-a'shun (*kauteriazo*, to cauterize). Firing; act of applying caustic or cautery; effect of cautery or caustic.

Cauterize, kaw'tur-ize. To apply cautery or caustic; to burn with cautery or caustic.

Cautery, kaw'tur-e. Substance used for firing, burning, or disorganizing parts to which it is applied. Cauteries were formerly divided into actual and potential. The word is now restricted to the red-hot iron or to positive burning. It was formerly much used for preventing hemorrhage from divided arteries, and also with the same views as a blister. The "button cautery," recommended by Sir Dominic Corrigan for "firing" or producing speedy rubefaction, consists of a thick iron wire shank, inserted into a small wooden handle, having on its slightly curved extremity an iron disk or button. The term *Potential cautery* was generally applied to causticum commune, but is now used synonymously with caustic in general. **C., ac'tual,** cautery. **C., but'ton,** see *Cautery.* **C., clamp,** instrument for cauterizing pedicle of ovarian tumor. **C., galvan'ic,** actual cautery, in which wire is made intensely hot by electricity; see *Moxa.* **C., gas,** application of heat through metallic or porcelain instruments heated by ordinary burning gas. **C., lin'ear,** C. applied in a straight line. **C., Paquelin's,** see *Thermo-cautery.* **C., poten'tial,** causticum commune; see *Cautery.* **C., vir'tual,** C., potential.

Cava, kav'ah (hollow). Vena cava; any cavity, as orbit, vulva, etc.; kava. **C. vena** ('hollow or deep-seated vein'). Name given to two great veins which meet at the right auricle of the heart. The vena cava superior, thoracica, or descendens is formed by union of the subclavian veins, and receives successively, before its termination at the upper part of the right auricle, the inferior thyroid, right internal mammary, superior diaphragmatic, azygos, etc. The vena cava inferior, abdominalis, or ascendens arises from union of the two primary iliacs, opposite the fourth or fifth lumbar vertebra, receives middle sacral, lumbar, right spermatic, hepatic, and inferior diaphragmatic veins, and opens at the posterior and inferior part of the right auricle.

Cav'al. Appertaining to vena cava. **C. ap'erture,** opening in central tendon of diaphragm for ascending vena cava.

Cavalry (kav'al-re) **bone.** Osseous deposit in adductor muscles of thigh, from pressure in the saddle; rider's bone.

Cavatio, ka-vah'she-o (*cavus*, hollow). Cavity, excavation.

Cave of Ret'zius. See *Retzius.*

Cavea, kav'e-ah. Cavity. See *Carum.*

Caverna, kav-ur'nah (cavern). Cavity, as in the lungs; female organs of generation. See *Cavum, Cavity,* and *Vulva.*

Cavernæ (pl. of **Caverna**) **dentium,** kav-ur'ne den'she-um. See *Alveoli.* **C. fron'tis,** frontal sinuses.

Cavernitis, kav-urn-e'tis. Inflammation of corpora cavernosa penis.

Cavernous, kav'ur-nus. Having small cavities or caverns; relating to a cavity or to the cavernous bodies of the penis; hollow (as to sound heard on auscultation). **C. angio'ma,** angioma cavernosum. **C. ar'tery,** artery of corpus cavernosum. **C. bod'ies,** corpora cavernosa; kind of cylindrical sac composed of cells; separated through its whole extent by a vertical, incomplete septum, and forming nearly two-thirds of the penis. The corpus cavernosum on each side arises from the ascending portion of the ischium, and terminates obtusely behind the glans. **C. bod'ies of the clit'oris,** two hollow crura, forming the clitoris. **C. bod'y of the vagi'na,** substance composed of blood-vessels and cells, similar to those of the penis and clitoris, covering the outer extremity of the vagina on each side; it contracts the entrance to the vagina during coition; see *Bulbus vestibuli.* **C. breath'ing,** C. respiration. **C. gan'glion,** see *Carotid* or *Carotic nerve.* **C. groove,** carotid groove. **C. lymph tu'mor,** lymphangioma. **C. nerves,** nerves from prostatic plexus to corpora cavernosa. **C. plex'us,** plexus of sympathetic nerves in carotid groove; plexus of nerves on membranous urethra. **C. râle,** C. rhonchus. **C. respira'tion;** when a cavity exists in the lungs, and one or more ramifications of the bronchia terminate in it, a loud tubal noise is emitted, provided the cavity be not filled with fluid, called cavernous respiration; the cough is also cavernous. When the capacity of the cavern is great, the sound of respiration is like that produced by blowing into a decanter, with the mouth at a little distance from the neck—*amphoric respiration* (*amphora*, a flask). The *veiled puff* is a modification of cavernous respiration, in which, according to Laënnec, a sort of movable veil interposed between the excavation and the ear seems to be agitated to and fro. **C. rhon'chus,** see *Cavernous respiration* and *Gurgling.* **C. si'nus,** venous cavity of the dura mater, filled with a multitude of reddish, soft filaments, intersecting each other, and, as it were, reticulated. The anterior extremity of each cavernous sinus has been named ophthalmic sinus. **C. tex'ture** or **tis'sue,** spongy substance forming greater part of penis and clitoris. It consists of a complicated lacework of arteries and veins and nervous filaments, with small fibrous plates from the tunica fibrosa or albuginea, forming by decussation numerous cells communicating with each other. This spongy texture produces erection by dilating and swelling on influx of blood. **C. tu'mors,** see *Tumors, cavernous.* **C. voice,** sound of voice from chest on auscultation; pectoriloquy. **C. whis'per,** blowing

sound heard over cavities when words are whispered.

Cavernulous (dim. of **Cavernous**) **rhonchus**, kav-urn'u-lus rhon'kus. See *Gurgling.*

Caviale (kav-e-al'e), **Caviare** (kav-e-ar'e), or **Caviar'**. Culinary preparation made on shores of Black and Caspian Seas, chiefly from roe of sturgeon, mixed with salt and other condiments. Also used as substitute for cod-liver oil.

Cavicula (kav-ik'u-lah) or **Cavil'la** (*cavus*, hollow). Ankle or space between malleoli; cuneiform bone; astragalus.

Cavitaria, kav-it-ar'e-ah. See *Entozoa.*

Cavitas, kav'it-as (*cavus*, hollow). Cavity. **C. antro'sa au'ris**, tympanum. **C. arachnoïda'lis**, subarachnoid or subdural space. **C. bucca'lis**, cavity of mouth. **C. buccina'ta**, cochlea. **C. cochlea'ta**, cochlea. **C. con'chæ**, inner hollowed part of concha. **C. cotyloï'dea**, acetabulum. **C. den'tis**, pulp-cavity. **C. digita'ta ventric'uli latera'lis**, cornu posterius ventriculi lateralis. **C. ellip'tica**, dilatation at one end of semicircular canals of the ear. **C. glenoï'dea**, glenoid cavity. **C. hemisphær'ica**, see *Crista vestibuli.* **C. hu'meri glenoï'des**, glenoid cavity of scapula. **C. innomina'ta**, navicular fossa. **C. intermalleola'ris**, glenoid cavity of tibia. **C. labyrin'thi**, see *Labyrinth.* **C. na'rium**, nares. **C. oc'uli**, orbit. **C. orbicula'ris**, see *Crista vestibuli.* **C. o'ris**, mouth. **C. ova'lis**, see *Crista vestibuli.* **C. pri'ma** or **quin'ta**, fifth ventricle. **C. pul'pæ**, see *Tooth.* **C. rhomboida'lis**, fourth ventricle. **C. rotun'da**, see *Crista vestibuli.* **C. semiluna'ris**, sigmoid fossa. **C. semiova'lis**, see *Crista vestibuli.* **C. sigmoï'dea**, sigmoid fossa. **C. subrotun'da**, see *Crista vestibuli.* **C. Syl'vii**, fifth ventricle. **C. tym'pani** or **tympan'ica**, tympanic cavity. **C. Valsal'væ**, mastoid cavity. **C. Vieussen'ii**, fifth ventricle.

Cavitates (pl. of **Cavitas**) **cerebri**, kav-it-ah'tes ser'e-bre. Ventricles of the brain. **C. du'ræ ma'tris**, sinuses of dura mater. **C. innomina'tæ**, auricles of the heart. **C. interscapula'res**, see *Interscapularis.* **C. nasa'les** or **na'rium**, nasal fossæ.

Cavities (kav'it-ees), **aë'rial.** Air-cells. **C., cer'ebral**, ventricles of the brain. **C., closed**, serous sacs. **C., fron'tal**, frontal sinuses. **C., na'sal**, cavities of the nose. **C. of reserve'**, cavities under the deciduous teeth, in which permanent teeth afterward appear. **C., res'piratory**, minute terminations of smallest bronchial tubes. **C., splanch'nic**, those containing viscera; they are three in number, cranium, chest, and abdomen.

Cavity, kav'it-e. Hollow of anything, as of cranium, mouth, nasal fossæ, etc. **C., an'cyroid**, posterior cornu of lateral ventricle. **C., arach'noid**, subdural space. **C. of Aran'tius**, ventricle of Arantius or of Aranzi. **C., aud'itory**, C. of tympanum. **C., cleav'age**, blastocele. **C., cot'yloid**, acetabulum. **C., decid'ual**, C. between decidua vera and d. reflexa in early fœtal life. **C., den'tal**, pulp-cavity. **C., dig'ital**, C., ancyroid. **C., epiplo'ic**, omental bursa. **C., glen'oid**, see *Glenoid.* **C., gut'tural**, C. of pharynx. **C., mar'row** or **med'ullary**, C. in bone in which marrow is contained. **C., neu'ral**, spinal canal; neural canal. **C., o'ral**, C. of mouth. **C., or'bital**, orbit. **C., pel'vic**, portion of c. of abdomen situated below level of linea ileo-pectinea and promontory of sacrum. **C., pericar'dial**, hollow space between the pericardium and the heart. **C., perienter'ic**, cœloma. **C., peritone'al**, space between layers of peritoneum; see *Peritoneum.* **C., pleu'ral**, C. between layers of pleura. **C., pul'mona'ry**, C. formed by morbid process, chiefly tuberculous, in the tissue of the lungs. **C., pulp**, C. in a tooth in which dental pulp is found. **C., sig'moid**, see *Sigmoid.* **C., thora'cic**, see *Thorax.* **C., tympan'ic**, tympanum. **C., vas'cular**, pulp-cavity. **C., ven'tral**, C. of abdomen. **C., ventric'ular**, cavity of ventricle of the brain, v. of the heart, or v. of the larynx.

Cav'o-val'gus. Cavus and valgus united in the same individual.

Cavum, kav'um. Cavity. **C. abdom'inis**, cavity of abdomen. **C. arachnoïdea'le** or **arachnoï'deum**, subdural space. **C. bucca'le**, cavity of mouth. **C. cervi'cis u'teri**, cervical canal. **C. coch'leæ**, cavity of cochlea. **C. cra'nii**, cavity formed by proper bones of cranium. **C. den'tis**, see *Tooth.* **C. Douglas'ii**, Douglas's pouch. **C. endolymphat'icum**, cavity of membranous labyrinth. **C. fau'cium**, isthmus of fauces. **C. laryn'gis**, cavity of larynx. **C. mastoï'dei**, mastoid cavity. **C. Meckel'ii**, space between layers of dura mater in which is the Gasserian ganglion. **C. mediasti'ni** or **mediastina'le**, see *Mediastinum.* **C. medulla're**, medullary canal. **C. na'rium** or **na'si**, nares, nasal fossæ. **C. o'ris**, mouth. **C. pericard'ii**, see *Pericardium.* **C. perilymphat'icum**, cavity between membranous and osseous labyrinths. **C. pharyn'go-larynge'um**, part of cavity of the pharynx nearest the larynx. **C. pharyn'go-nasa'le**, portion of the pharynx nearest the nose. **C. pharyn'go-ora'le**, continuous space of mouth and pharynx. **C. pul'pæ**, pulp-cavity of a tooth. **C. Retz'ii**, loose areolar space in subperitoneal tissue of anterior wall of abdomen. **C. thora'cis**, see *Thorax.* **C. tym'pani**, tympanum. **C. u'tero-recta'le**, recto-uterine fossa. **C. u'tero-vesica'le**, utero-vesical fossa.

Cavus, kav'us. Talipes arcuatus.

Cayapona globulosa, ky-ap-o'nah glob-u-lo'sah. Plant of Brazil, used as a purgative; active principle, *cayaponin*, is a prompt purgative in dose of gr. $\frac{1}{10}$.

Cayenne' pep'per. Capsicum.

Cayuput, ky'u-put. Cajuput.

Caz'enave's lu'pus. Lupus erythematosus.

Ceanothus, se-an-o'thus. Cirsium arvense. **C. America'nus**, celastrus. **C. reclina'tus**, Columbrina reclinata; alkaloid derived from it is called *ceanothine.* **C. triner'vis**, celastrus.

Ceasma, se-az'mah. Fissure; fragment.

Cebadilla, seb-ad-il'lah. Sabadillla.

Cebipi'ra. Brazilian tree, whose bitter and astringent bark is used in antirheumatic baths and fomentations.

Cebocephalus, se-bo-sef'al-us (*kebos*, ape, *kephale*, head). Monster in which the nose does not project and interocular region is narrow and plane, giving the physiognomy a striking resemblance to that of the ape.

Cecis, se'sis. Gall-nut; see *Quercus infectoria.*

Cecity, se'sit-e. Blindness.

Cecro'pia pelta'ta. Tree of S. America, bark of which is astringent and mucilaginous in diarrhœa, ulcers, etc.

Cecutiency, se-ku'te-en-se (*keutho*, to conceal). Incipient obscurity of vision.

Cedar (se'dar) **of Leb'anon.** Cedrus Libanotica. **C., red**, Juniperus Virginiana. **C., white**, Cupressus thyroïdes.

Cedeia, sed-i'ah (*kedeuo*, to attend to a dead body). Embalming.

Cedma, sed'mah. Aneurism; varix; bubo; rheumatic pain of the joints, especially of the hips, groin, or genital organs.

Cedrela febrifuga, sed-re'lah feb-rif'u-gah (*kedros*, cedar). See *Swietenia febrifuga.* **C. odora'ta**, *Barbadoes bastard cedar; Jamaica cedar;* bark and wood are antiperiodic. **C. rosmari'nus**, tree of Cochin China; flowers are nervine and diuretic, and employed in headache, catarrh, rheumatism, etc. **C. Too'na**, Indian mahogony, white cedar; bark is astringent, and used also in same cases as cinchona.

Cedreleum, sed-rel-e'um (*kedros*, cedar, *elaion*, oil). Oil of cedar.

Cedria (sed're-ah) or **Cedreum**, sed're-um. Oil of resin which flows from cedar of Lebanon, identical with oil of cedar; see *Pinus sylvestris.*

Ced'rin. Bitter principle derived from Simaba cedron.

Ced'ron. See *Simaba cedron.*

Cedronella, sed-ron-el'lah. Melissa. **C. Mexica'na**, Mexican plant, flowering tops of which are used in place of melissa. **C. triphyl'la**, Dracocephalum Canariense.

Cedrostis, sed-ros'tis. Bryonia alba.

Cedrus baccifera, sed'rus bak-sif'er-ah. Juniperus lycia; Juniperus sabina. **C. Libanot'ica,** cedar of Lebanon, from which a variety of manna is obtained. **C. mahog'ani,** Swietenia mahogani.

Ceke, the-ke. Elephantiasis of the scrotum (Fiji term).

Celandine, sel'an-deen. Impatiens. Chelidonium. **C., com'mon,** Chelidonium majus. **C., less'er,** Ranunculus ficaria. **C. pop'py,** Stylophorum diphyllum.

Celastrine, sel-as'treen. Alkaloid obtained from Celastrus edulis, possessing properties resembling cocaine.

Celastrus, sel-as'trus. New Jersey tea, red root. Used like lobelia in syphilis; also in splenic enlargement. It is bitter and astringent; strong infusion of dried leaves and seeds is used in aphthæ, and as a gargle in scarlatina. **C. panicula'tus,** shrub of India and S. America; oil of the seeds is tonic, stimulant, and diaphoretic, but chiefly a veterinary medicine. **C. scan'dens,** *Climbing staff tree, Climbing bitter-sweet, wax-work;* American shrub, bark of which is emetic, diaphoretic, and narcotic.

Celation, se-la'shun (*celo,* to conceal). Concealment of pregnancy or delivery.

Celatomy, se-lat'om-e. Celotomy.

Cele, se'le (*Eng.* pron. seel) (*kele,* tumor, protrusion, or rupture). Common suffix, as in hydrocele, bubonocele, etc. See *Hernia.*

Celery, sel'er-e. Apium graveolens. **C. pine,** Phylloladus trichomanoïdes. **C. water,** Ranunculus sceleratus. **C., wild,** Bubon galbanum.

Cele'ta or **Celetes,** sel-e'tes. See *Hernial.*

Ce'lioscope. Cœloscope.

Celis, se'lis (*kelis,* spot, stain). Macula or spot on the skin. See *Kelis.*

Cell. Elementary structure of which organic substances are formed, or from which they are developed. Small cavity; same signification as cellule. The whole organized body may be regarded as a congeries of cells having different endowments, each set being concerned in special acts connected with absorption, nutrition, and secretion wherever action of selection or elaboration has to be effected. Cells are termed primary, elementary, or primordial. When they give rise to other cells, they are termed parent or mother cells, the resulting cells being termed daughter cells. See *Cytoblast* and *Cytogeny.* Element of galvanic battery. See *Galvanism.* **C., ad'ipose,** see *Fatty vesicles.* **C., air,** see *Air-cells.* **C., albu'minous,** cell containing albumin, but not mucus. **C., alve'olar,** C. in wall of acinus of a gland. **C., amœ'boid,** cell capable of changing shape like an amœba; wandering cell. **C., apo'lar,** nerve-cell; devoid of poles or processes, particularly of sympathetic system. **C., apoplec'tic,** see *Apoplectic.* **C., ba'sal** or **bas'ilar,** layer of these cells constitutes deepest layer of epithelium. **C., beak'er,** goblet-shaped cell observed on mucus-secreting surfaces. **C., bipo'lar,** nerve-cell with two poles or processes. **C., blood,** blood-corpuscle. **C. body,** mass of a cell. **C., bone,** cell in lacuna of bone. **C., bron'chic,** cellule, bronchic. **C., bud'ding,** gemmation; cytogenesis. **C., Bun'sen's,** see *Bunsen.* **C., calcig'erous,** see *Tooth.* **C., cal'iciform,** C., beaker. **C., can'cer,** round cell, with large nucleus, observed in some forms of cancer, but not diagnostic of it; see *Cancer-cell.* **C., car'rier,** wandering cell; phagocyte. **C., car'tilage,** nucleated cell of cartilage, often containing glycogen and fatty matter. **C., cil'iated,** see *Cilia.* **C., colum'nar,** cylindrical cell, as in small intestine. **C., connective-tissue,** connective-tissue corpuscle. **C. of Cor'ti,** external hair-cells of organ of Corti. **C. cov'er,** operculum. **C., Daniell's,** see *Daniell's* and *Galvanism.* **C., daugh'ter,** see *Cell.* **C., Dei'ter's,** small cells in the cochlea. **C. devel'opment** or **forma'tion,** cytogeny. **C., denti'nal,** see *Tooth.* **C. divis'ion,** formation of new or daughter cells by separation of mother cells; see *Caryocinesis.* **C. doc'trine,** doctrine or theory of formation of cells and of tissues from cells. **C., elemen'tary,** see *Cell.* **C., embryon'ic,** cells from which embryonic organs and tissues are developed, or which in the adult resemble cells of the embryo. **C., endog'enous,** development cells within mother cells. **C., endothe'lial,** pavement corpuscle of the blood-vessels, the pleura, and peritoneum. **C., epider'mic** or **epithe'lial,** cells or corpuscles that cover free membranous surfaces of body, and form epidermis and epithelium. They are developed from germs furnished by subjacent membrane. **C., epithe'lial,** cell, epidermic. **C., ethmoid'al,** see *Ethmoid.* **C., exuda'tion,** see *Corpuscles, exudation.* **C., fat,** see *Fatty vesicles.* **C., fibre,** cells forming minute connective-tissue fibres. **C., floor,** auditory cells in organ of Corti. **C. force,** plastic or formative force seated in a cell, by agency of which different tissues are developed; see *Cell life.* **C. forma'tion,** cytogeny. **C., galvan'ic,** see *Cell* and *Galvanism.* **C. gen'esis,** cytogeny. **C., germ,** cytoblast; see *Molecule.* **C., germ'inal,** see *Cytoblast.* **C., gi'ant,** see *Giant.* **C., gob'let-shaped,** C., beaker. **C., hepat'ic,** C., liver. **C. life,** life possessed by separate cells that form tissues, and by which nutrition of the tissues is presumed to be effected. **C. of liv'er,** cells constituting glandular structure and lobules of liver. **C., lym'phoid,** cell having amœboid movement. **C., mas'toid,** cells in interior of mastoid process. **C. mem'brane,** capsule or tissue surrounding a cell; membrane forming wall of capillary vessels. **C., mother,** see *Cell.* **C., motor,** motor cellule; cell whence nerve-power sets out to be distributed to muscular fibre. **C., mu'cous,** cells having mucus in their interior, or engaged in its secretion. **C. multiplica'tion,** cytogenesis. **C., mus'cular,** contractile cell of muscular fibre. **C., nerve,** nerve-corpuscle or vesicle; cell characteristic of nervous substance. **C., neu'ro-mus'cular,** lower forms of cell life, having partly nervous and partly muscular qualities. **C., nu'cleated,** see *Cytoblast.* **C., olfac'tory,** *olfactory epithelium, cell of Schultze.* Sensory cell of olfactory organs, fusiform in shape. **C., os'seous,** lacuna of bone. **C., pa'rent,** see *Cell.* **C., pig'ment,** pigment-cells mingled with epidermic cells, most manifest in the colored races, and best seen on inner surface of choroid of the eye, where they form pigmentum nigrum. **C., pri'mary,** see *Cell.* **C., primor'dial,** see *Cell.* **C. pro'cess,** prolongation of cell-substance. **C. prolifera'tion,** cytogenesis. **C. pro'toplasm,** protoplasm. **C. of Purkinje,** cells forming fibres of Purkinje in the heart; spindle-shaped nerve-cells forming a layer between the outer and nuclear layer of the cortex of cerebellum. **C., pyram'idal,** nerve-cells found in the cortex of all regions of the cerebellum. **C. sap,** protoplasm. **C. of Schultze,** olfactory cells. **C., sperm,** see *Sperm.* **C., squa'mous,** pavement cell. **C. stro'ma,** matrix of cell. **C. territory,** according to Virchow, district of intercellular substance ruled over by cell lying in middle of it, and exercising influence on neighboring parts. **C. the'ory,** cell doctrine. **C. wall,** see *Cell* and *Cytoblast.* **C., wandering,** see *Wandering* and *Amœboid.*

Cella, sel'lah. Cell. **C. frigida'ria,** Roman bath. **C. latera'lis,** lateral ventricle of brain. **C. me'dia,** middle cornu of lateral ventricle of brain. **C. tur'cica,** sella turcica.

Cellæform, sel'le-form. Having shape of a cell; cytoid.

Celliferous, sel-lif'er-us (*cella, fero,* to carry). Cell-bearing or producing.

Celloid, sel'loid. Resembling a cell or cellule.

Cells, amœboid, am-e'boid. See *Amœboid.* **C., bron'chic,** cellules, bronchic. **C. of Clau'dius,** see *Corti.* **C., colos'sal,** many-nucleated masses of protoplasm in bone-cavities; see *Myeloplaxes.* **C. of Die'ters,** see *Corti.* **C. eat'ing,** see *Phagocytes.* **C., gi'ant,** *Myeloplaxes.* **C., gus'tatory,** see *Cells, olfactory.* **C., mi'gratory,** see *Amœboid.* **C., olfac'tory,** fusiform nucleated cells in the nasal mucous membrane, terminating in form of a long stiff hair or of several finer hairs—*olfactory hairs.* **C. of Purkinje,** large cells between nuclear and molecular layers of gray matter of the cerebellum. **C., vi'bratile,** see *Cilia.* **C., wan'dering,** see *Amœboid.*

Cellula, sel'lu-lah (dim. of **Cella**). Cellule. **C. germinati'va,** germinal vesicle. **C. lactife'ra,** acinus of mammary gland. **C. pulmo'nea,** air-cell and alveolus.

Cel'lulæ (pl. of **Cellula**). Cells. **C. aë'reæ,** air-cells; cellules, bronchic. **C. bipola'res,** bipolar cells. **C. bron'chicæ,** air-cells; cellules, bronchic. **C. co'li,** cells, pouches, or saccules of colon. **C. Malpighia'næ,** air-cells. **C. Malpig'hii** or **Malpighia'næ,** cellules, bronchic. **C. mastoï'deæ,** mastoid cells. **C. medulla'res,** areolæ opening into medullary cavities of bones. **C. orbita'riæ,** lacrymal cells. **C. pulmona'les,** air-cells; cellules, bronchic; see *Pulmo.* **C. san'guinis,** blood-corpuscles. **C. tympan'icæ,** alveoli in floor of tympanum.

Cellular, sel'u-lar. Relating to or composed of cells or cellules. **C. mem'brane,** membrane formed of cellular or areolar tissue; generally used for the tissue itself. **C. pathol'ogy,** doctrine of cell-agency in causation of disease. **C. sys'tem,** whole areolar tissue of human body. **C. tis'sue,** generally called connective tissue. Recticulated, filamentous, laminated, cribriform, porous, areolar, connective, conjunctive, and mucous tissue; reticular or cellular substance. Most common organic tissue. It contains irregular areolæ—not cells, therefore more properly called areolar tissue—between the fibres, as well as serum, fat, and adipous tissue. Of the fibres, some are of yellow elastic, but the greater part are of white fibrous tissue, and frequently present form of broad flat bands, without distinct fibrous arrangement. See *Fibrous.* Cellular tissue or texture unites every part of the body, determines its shape, and by its elasticity and contractility, and by fluid contained in its areolæ, facilitates motion of parts on each other. It has been divided by anatomists into external, general, or common cellular tissue, which does not penetrate organs; cellular texture forming envelopes of organs; and that which penetrates into organs, accompanying and enveloping all their parts, constituting the basis of all the organs. **C. tis'sue of bones,** see *Cancelli.*

Cellulated, sel'u-la-ted. Containing or made up of small cells.

Cellule, sel'ule (dim. of **Cella**). Small cell or cavity. Cellules are small cavities between laminæ of cellular tissue, corpora cavernosa, etc.

Cellules (sel'ules) or **Cells, bron'chic.** Air-cells of the lungs. See *Pulmo.*

Cellulin, sel'u-lin. Cellulose.

Cellulitis, sel-u-le'tis. Inflammation of cellular or areolar tissue. **C. or'bitæ,** inflammation of cellular tissue of orbit. **C., parau'terine,** parametritis. **C., pel'vic,** parametritis. **C., periu'terine,** parametritis. **C. venena'ta,** inflammation from dissection wound, or from absorption of any animal poison; see *Wound.*

Cellulo-fibrous (sel-u-lo-fi'brus) **tumor.** Tumor, fibro-cellular.

Celluloid, sel'u-loid. Artificial substance made from cellulose or gun-cotton and camphor, condensed.

Cellulosa, sel-u-lo'sah. Cellular tissue.

Cellulose, sel'u-loze. Substance forming cell-walls and tissues of plants. Cellulin forms almost entire portion of woody fibre, linen and cotton fibre. When acids are added to it, and camphor is added to the precipitate, and the mass compressed, celluloid is formed. Cellulose is left after action on vegetable tissue of solvents fitted to dissolve out matter deposited in its cavities and interstices. It exists in the corpora amylacea of the brain and other parts. It is identical with starch in the proportion of its constituents, and forms the principal part of the thickness of walls of cells, vessels, etc. of which vegetable organism is composed. **C. degenera'tion,** see *Lardaceous.*

Cellulosity, sel-u-los'it-e. Condition of having small cells or spaces.

Cellulosus (sel-u-lo'sus) or **Cellulous,** sel'u-lus. Cellular.

Celo, se'lo (*kele,* rupture). In composition, rupture.

Celocolica, sel-o-kol'ik-ah (*kele,* hernia). Colic produced by strangulated hernia.

Celo'des or **Celoï'des.** Keloid.

Celology, sel-ol'o-je (*celo, logos,* discourse). Doctrine or description of hernia; treatise on hernia.

Celoma, sel-o'mah. Cœloma.

Celosia arvensis, sel-o'ze-ah ar-ven'sis. African plant; seeds are anthelmintic. **C. irig'yna,** plant of Africa; leaves are astringent. **C. nit'ida,** plant of W. Indies; seeds and flowers are astringent.

Celosomus, sel-o-so'mus (*celo, soma,* body). Monster in which the trunk is malformed and eventration or displacement of viscera exists.

Celotome, sel'o-tome (*celo, tome,* incision). Knife for operation on hernia.

Celotomus, sel-ot'om-us. Knife used in operation for hernia. Adjectively, relating to celotomy.

Celotomy, sel-ot'o-me (*celo, tome,* incision). Kelotomy; operation for radical cure of inguinal hernia. Operation for hernia in general—herniotomy.

Cel'sia Coromandelia'na. Bengalese plant; sedative and astringent.

Celsus (sel'sus), **meth'od of.** See *Lithotomy.*

Celtis (sel'tis) **austra'lis.** Nettle-tree; European tree; branches are astringent. **C. obli'qua** or **occidenta'lis,** *Sugarberry, Hackberry, American nettletree, Beaverwood;* indigenous; bark is anodyne and cooling; berries are sweet and astringent; used in dysentery. **C. orienta'lis,** Asiatic tree, having aromatic root and bark. **C. ta'la,** plant of S. America; leaves are expectorant.

Cement, se-ment'. Glutinous substance introduced into a carious tooth to prevent access of air or other extraneous matters. Layer of bone covering neck and root of tooth; see *Lute* and *Tooth.*

Cementoblasts, se-men'to-blasts (*cementum, blastos,* bud or cell). Cement-forming cells.

Cementum, se-men'tum. Cement.

Cemos, se'mos (*kemos,* muzzle). Capistrum; Hedera helix.

Cenæsthesis sen-es'tha-sis. Cœnasthesis.

Ceneangia (sen-e-an-je'ah) or **Cenangi'a** (*kenos,* empty, *angeion,* vessel). Inanition. Empty state of vessels.

Cenembatesis, sen-em-bat-a'sis (*kenos,* empty, *embaino,* to enter). Paracentesis. Act of probing wound or cavity.

Ceneones, sen-e-o'nes (*keneon,* empty space). Flanks.

Cenogenesis (sen-o-jen'es-is) or **Cenog'eny** (*kenos,* empty, *genesis,* generation). False development, not in accordance with the evolution of species or ancestral type.

Cenosiophthisis, sen-os-e-o-te'sis (*kenosis,* evacuation, *phthisis,* wasting). Wasting from excessive evacuations or discharges.

Cenosis, sen-o'sis (*kenoo,* to empty). Evacuation. Inanition. Opposed to repletion.

Cenospudia, sen-os-pu'de-ah (*kenos,* empty, *spoude,* application). Brown study or listless musing.

Cenotic, sen-ot'ik (*kenoo,* to empty). Drastic; evacuant.

Cenotica, sen-o'tik-ah. Diseases affecting fluids. Morbid discharges, or excess, deficiency, or irregularity of such as are natural; drastics.

Centaurea (sen-taw're-ah) **behen** (after the centaur Chiron). *Behen album, Been, White behen;* astringent. **C. benedic'ta,** *Blessed holy thistle, Virgin Mary thistle;* strong decoction is emetic; strong infusion diaphoretic; light infusion tonic and stomachic. **C. calcitra'pa,** *Calcitrapa, Common star-thistle, Star knapweed;* tonic given in intermittents, dyspepsia, etc. **C. centau'rium,** Greater centaury of S. Europe; root is bitter, tonic, and astringent. **C. cy'anus,** *Corn flower, Blue bottle* or *bonnets;* plant of Europe and U. States; juice is used for collyria; flowers were once much used as cordial, tonic, etc. in ophthalmia. **C. ja'cea,** species growing in Asia and Europe, bitter astringent, root of which is diuretic and also used in gargles. **C. ni'gra,** *Black centaury* or *knapweed, Bell wood, Button weed;* properties similar to C. jacea. **C. sic'ula** or **solstitia'lis,** *St. Barnaby thistle, Yellow-flowered centaury;* flowers are bitter and antiperiodic; root is diuretic. **C. stella'ta,** Centaurea calcitrapa.

Centaureum (sen-taw're-um) or **Centau'ris.** Chironia centaurium.

Centau'rin. Bitter principle from Erythræa centaurium.

Centaurium magnum, sen-taw're-um mag'num. Centaurea centaurium. **C. mi'nus vulga're,** Chironia centaurium. **C. officina'le,** Centaurea centaurium. **C. par'vum,** Chironia centaurium.

Centaury, American, sen'taw-re, a-mer'i-kan. Chironia angularis; Sabbatia angularis. **C., Austra'lian,** Erythræa Australis. **C., Europe'an,** Chironia centaurium. **C., great'er,** Centaurea centaurium. **C., les'ser,** Chironia centaurium.

Centenarian, sen-te-na're-an. One who has attained a hundred years.

Centesis, sen-ta'sis (*kenteo*, to perforate). Paracentesis, puncture.

Centi, sen'te (*centum*, a hundred). In composition, a hundred.

Centigrade, sen'te-grade (*centum*, a hundred, *gradus*, degree). Thermometer having 100 degrees between freezing and boiling points of water (0°–100°); see *Thermometer*.

Centigramme, sen'te-gram (F.) (*centi*, *gramma*, gramme). Hundredth part of gramme, equal to about the fifth part of a French grain, .1543 Troy grain; see *Weights and Measures*.

Centilitre, sen'te-le-tur (*centi*, *litra*, litre). Ancient Greek measure for liquids; hundredth part of a litre—.61028 English cubic inch, equal to nearly 2.7053 fluidrachms; see *Weights and Measures*.

Centimetre, sen'te-me-tur. Hundredth part of a metre—equal to about four lines, .3937 English inch; see *Weights and Measures*.

Centimorbia, sen-te-mor'be-ah (*centi*, *morbus*, disease). Lysimachia nummularia.

Centinervia, sen-te-nur've-ah (*centi*, *nervus*, nerve). Plantago major.

Centinodia, sen-te-no'de-ah (*centi*, *nodus*, knot). Polygonum aviculare.

Cento virginalis, sen'to vir-jin-al'is (virginal tent covering). Hymen.

Centrad, sen'trad. See *Central aspect*.

Centradiaphanes, sen-trah-de-af'an-es (*kentron*, centre, *a*, priv., *diaphanes*, transparent). Cataract owing to obscurity of central portion of the crystalline; central cataract.

Central, sen'tral. Relating to centre of body or body of a vertebra. **C. ar'teries of brain,** branches to central ganglia from circle of Willis. **C. ar'tery of ret'ina,** central artery of Zinn; artery given off from ophthalmic artery, penetrating optic nerve a little behind ball of eye, running in axis of nerve, and spreading out into many small branches upon inside of retina. When the nerve is cut across near the eye, the orifice of the divided artery is observable. Formerly called porus opticus. **C. as'pect,** aspect toward centre of an organ; *centrad* is used adverbially to signify toward central aspect. **C. canal',** medullary canal; space in optic nerve for central artery and vein of retina; canal in modiolus for branch of cochlear nerve. **C. convolu'tions,** convolutions of brain separated by central sulcus. **C. fis'sure,** central sulcus. **C. lig'ament,** filum terminale. **C. lobe,** insula cerebri. **C. lob'ule,** small lobule of superior vermiform process of cerebellum in incisura anterior. **C. myeli'tis,** inflammation of central matter of spinal cord. **C. ner'vous sys'tem,** the whole brain and spinal cord. **C. point of perine'um,** point of intersection of tendons in front of the anus. **C. sul'cus,** fissure separating frontal and parietal lobes of cerebrum. **C. ten'don of di'aphragm,** see *Diaphragm*.

Centrale, sen-tral'e. Bony element in embryonic carpus or tarsus, becoming afterward tubercle of scaphoid carpal bone and navicular tarsal bone.

Centre, sen'tr. Middle point of a figure or body; centre of physiological activity, as nerve-centre. See *Localization*. **C., accel'erating,** hypothetical centre in medulla oblongata, producing acceleration of pulsation of the heart. **C., acous'tic,** sensory centre of auditory nerve in back part of the superior temporal convolution. **C. of ac'tion,** viscus in which a function is executed, and to which several other organs contribute; as the stomach during chymification, duodenum during chylification, or uterus during gestation. **C., a'no-spi'nal,** nervous centre seated at fifth, sixth, and seventh lumbar vertebræ, controlling defecation, when communication with the cerebrum is intact. **C., a'no-ves'ical,** centre in spinal cord, near origin of third and fourth sacral nerves, regulating sphincters of rectum and bladder. **C., arrest' of the heart,** see *C., cardio-inhibitory*. **C., aud'itory,** point in brain—probably in the temporo-sphenoidal lobes—to which auditory impressions are conveyed; acoustic centre. **C., Broca's,** see *Broca*. **C., Budge's,** C., genito-spinal. **C., car'diac,** portion of medulla oblongata increasing or diminishing action of heart; inferior cervical and superior dorsal regions of spinal cord, which exert excito-motory action on the heart. **C., car'dio-accel'eratory,** C., accelerating. **C., car'dio-inhib'itory,** centre in medulla, producing slowness of pulsation of the heart. **C., cer'ebro-spi'nal,** cerebro-spinal axis. **C., cil'io-spi'nal,** nervous centre in lower part of cervical portion of spinal cord, connected with dilatation of the pupil. **C., col'or,** C. for perception of color in the occipital cortex. **C., convul'sion,** C. in floor of fourth ventricle, stimulation of which produces spasm. **C., co-ord'inating,** part of nervous system supposed to regulate and control co-ordination, as cerebellum, cerebral ganglia, and gray matter of spinal cord. **C., cor'tical,** regions of cortex of brain to which special functions have been ascribed. **C., cough'ing,** nervous centre connected with coughing, in the medulla above the respiratory centre. **C., defeca'tion,** C., ano-vesical. **C., degluti'tion,** C., swallowing. **C., ejacula'tion** or **ejac'ulatory,** nervous centre, about fourth lumbar vertebra, controlling ejaculation of semen. **C., epigas'tric,** ganglions and nervous plexuses formed by great sympathetic and pneumogastric nerves in the epigastrium, around cœliac artery; solar plexus. **C., erec'tion,** nervous centre in spinal cord—genito-spinal centre—under influence of the medulla. **C. of flux'ion,** part toward which fluids are particularly attracted; as an irritated organ. **C., gen'ito-spi'nal,** see *Genito-spinal*. **C., gen'ito-u'rinary,** centre in lumbar region in spinal cord controlling genito-urinary apparatus. **C., gus'tatory,** centre in brain for taste, in uncinate gyrus. **C., inhib'itory,** C., moderator. **C., in'spiratory,** several centres are described, being in optic thalamus, corpora quadrigemina, and medulla oblongata. **C., mastica'tion,** C. in medulla, presiding over mastication. **C., med'ullary,** part of embryonic nervous system afterward developed into brain and spinal marrow. **C., micturi'tion,** C., vesico-spinal. **C., mo'tor,** convolutions about upper part of fissure of Rolando. **C., ner'vous,** organs whence the nerves originate, as brain and spinal marrow. **C., neu'ral,** C., medullary. **C., nutri'tion,** C., trophic. **C., olfac'tory,** C., gustatory. **C., op'tic,** see *Optic centre*. **C. of ossifica'tion,** point of commencing ossification of bone. **C., o'val,** when the two hemispheres of the brain are sliced away, down to level with corpus callosum, the medullary part in each is of oval shape; hence called centrum ovale minus. The two centres of opposite sides, together with the corpus callosum, form the centrum ovale of Vieussens. **C., parturi'tion,** reflex centre in medulla spinalis, opposite first and second lumbar vertebræ, associated by nerves with uterine plexus. **C., peristal'tic,** C. in medulla oblongata, controlling peristaltic action of the intestines. **C., phren'ic,** central aponeurosis, central or cordiform tendon of diaphragm. **C., res'piratory,** region in medulla oblongata, or floor of fourth ventricle, for inducing and co-ordinating movements of respiration. **C. of rota'tion,** term used in ophthalmology to designate the point about which the eye revolves; located 14 mm. posteriorly to the cornea. **C., sal'ivary** or **saliva'tion,** C. seated in the floor of the fourth ventricle, regulating the secretion of saliva. **C., sen'sory,** region in the brain for reception of sensory impressions; it includes those for the

special senses. **C., smell,** C., olfactory. **C., sneez'ing,** C. in medulla oblongata, connected by nerves to expiratory muscles. **C., spasm,** C., convulsion. **C., speech,** centre in third left frontal convolution, controlling speech. **C., swal'lowing,** nervous centre in floor of fourth ventricle, controlling such action. **C. of sympathet'ic irradia'tions,** any organ which excites, sympathetically, action of other organs more or less distant, with which it seems to have no immediate communication. **C., taste,** C., gustatory. **C., ten'dinous, of di'aphragm,** centre, phrenic. **C., troph'ic,** centre presiding over nutrition, seated in gray matter of brain, spinal cord, and sympathetic ganglia. **C., vaso-constric'tor,** nervous centre producing contraction of blood-vessels. **C., vaso-dila'tor,** nervous centre producing dilatation of blood-vessels. **C., vaso-mo'tor,** region of medulla oblongata and spinal cord, regulating movement of the smaller vessels. **C., ves'ico-spi'nal,** nervous centre in lumbar region, connected with cerebrum, controlling urination. **C., vis'ual,** nervous centre of vision, in occipital lobe. **C. of vis'ual direc'tions,** point between the eyes from which direction of vision is measured. **C., vi'tal,** respiratory centre. **C., vom'iting,** C. in medulla regulating this action.

Centric, sen'trik. Relating to a centre, as nervous centre.

Centrifugal, sen-trif'u-gal (*centrum, fugio,* to fly from). Efferent; passing from a centre or nervous centre, as motor nerves, which are centrifugal nerves conveying impressions to the periphery from the central parts of the nervous system.

Centripetal, sen-trip'et-al. Passing to a nervous centre, as afferent or sensory fibres.

Centrolecithal, sen-tro-les'ith-al (*lekithos,* yolk of egg). Term applied to ova in which mass of yolk is in the centre.

Centromyrs'ine. Ruscus.

Centrostaltic, sen-tro-stal'tik (*stello,* to send). Term applied to action of nervous force in the spinal centre.

Centrosteosclerosis, sent-ros-te-o-skle-ro'sis. Ossification in central spaces of long bones.

Centrum, sen'trum. Centre; body of vertebra, projection of spine. **C. cer'ebro-spina'le,** cerebro-spinal axis. **C. cine'reum,** posterior gray commissure. **C. commu'ne,** solar plexus. **C. ner'veum,** centre, phrenic. **C. op'ticum,** optic centre. **C. ova'le,** centre, oval. **C. ova'le mi'nus,** see *Centre, oval.* **C. ova'le of Vieus'sens,** centre, oval. **C. perine'i,** central region of perineum. **C. phren'icum,** central tendon of diaphragm. **C. semicircula're gem'inum,** tænia semicircularis. **C. semi-ova'le,** centrum ovale majus. **C. tendin'eum** or **tendino'sum,** centre, phrenic. **C. Vieussen'ii,** centrum ovale majus. **C. vita'le,** term applied to medulla oblongata or to medulla oblongata and medulla spinalis as far as second cervical nerve, in any part of which a wound would be instantly fatal.

Centum capita, sen'tum kap'it-ah (hundred heads). Eryngium campestre.

Centumnodia, sen-tum-no'de-ah (*centum,* hundred, *nodus,* knot). Polygonum aviculare.

Cen'tury plant. Agave Americana.

Cepa, se'pah (onion). Allium cepa. **C. ascolon'ica or fis'silis,** Bulbus esculentus. **C. mari'na,** scilla. **C. victoria'lis,** Allium victoriale. **C. vulga'ris,** Allium cepa.

Cephaëline, sef-ah'el-een. Emetin.

Cephaëlis, sef-ah'el-is. Rubaceous shrub of W. Indies, used in respiratory affections. **C. ipecacuan'ha,** ipecacuanha. **C. musco'sa,** root of this Cuban tree is emetic, as is that of the Jamaica shrub, **C. punicea.**

Cephalad, sef'al-ad (*kephale,* head). Toward the head.

Cephalæa, sef-ah-le'ah (*kephale,* head). Headache; cephalalgia; periodical, violent, or chronic headache. **C. arthrit'ica,** gouty or rheumatic headache. **C. hemicra'nia,** hemicrania. **C. nauseo'sa,** C. spasmodica. **C. pulsat'ilis,** pulsatile pain in the temples. **C. sero'sa,** headache from serous effusion within the cranium. **C. spasmod'ica,** sick headache, characterized by partial spasmodic pain, often shifting from one part of the head to another; chiefly commencing in the morning, with sickness and faintness, and extremely apt to recur.

Cephalæmatocele, sef-al-e-mat'o-seel-e (Eng. sef-al-e-mat'o-seel) (*kephale,* head, *haima,* blood, *kele,* tumor). Effusion of blood under the scalp, from sinus of dura mater, through opening in cranium.

Cephalæmatoma, sef-al-e-mat-o'mah (*cephale, haima,* blood). Sanguineous tumor, sometimes developed between pericranium and bones of the head of newborn children. **C. du'ræ ma'tris,** sanguineous tumor between dura mater and bone of skull in newborn child. **C., inter'nal,** C. duræ matris. **C. neonato'rum,** cephalæmatoma; caput succedaneum. **C. ve'rum,** cephalæmatoma.

Cephalæmia, sef-al-e'me-ah (*cephale, haima,* blood). Hyperæmia or congestion of the brain; accumulation of blood in vessels of the brain.

Cephalagogus, sef-al-ag-o'gus (*cephale, agogos,* leader). Instrument for drawing down the fœtal head; obstetrical forceps.

Cephalagra, sef-al-ag'rah (*cephale, agra,* seizure). Pain in the head; gouty or rheumatic headache.

Cephalagraphia, sef-al-ah-graf'e-ah (*cephale, graphe,* description). Anatomical description of the head.

Cephalalea, sef-al-al'e-ah. Headache.

Cephalalgia, sef-al-al'je-ah (*cephale, algos,* pain). Pain in the head, headache; generic name for every kind of headache, whether symptomatic or idiopathic. **C. anæ'mica,** headache from anæmia, the cranial blood-vessels being spasmodically contracted. **C. catamenia'lis,** headache at time of menses, or from their suppression. **C. catarrha'lis,** headache from cold or catarrh. **C. congesti'va,** congestive headache. **C. contagio'sa,** influenza. **C. gravida'rum,** headache of pregnant women. **C. inflammato'ria,** headache of inflammations, as of phrenitis. **C. neurasthen'ica,** headache of nervous exhaustion. **C. period'ica,** intermittent headache, headache returning periodically; properly, perhaps, a form of neuralgia. **C. pulsat'ilis,** headache accompanied with pulsation in the head or temples. **C. rheumat'ica,** rheumatism affecting the frontal, occipital, or temporal muscles, scalp, and cranial periosteum. **C. spasmod'ica** or **stomach'ica,** sick headache; see *Cephalæa.*

Cephalalgic, sef-al-al'jik (same etymon). Relating to cephalalgia. One affected with or subject to headache.

Cephalal'gy. Cephalalgia.

Cephalalogy, sef-al-al'o-je (*cephale, logos,* discourse). Anatomy of the head.

Cephalandra Indica, sef-al-an'dra in'dik-ah. Plant of S. Africa and S. Asia; root and leaves are used in small-pox.

Cephalanthus occidentalis, sef-al-an'thus ok-seden-tal'is (*cephale, anthos,* flower). *Buttonwood shrub, Buttonbush, Whiteball, Little snowball, Swampwood, Pond dogwood, Globeflower;* shrub growing all over U. States; bark of root is antiperiodic, tonic, expectorant, and laxative.

Cephala'ria centauroï'des. Plant of S. Europe and Asia, aperient and depurative.

Cephalartic, sef-al-ar'tik (*cephale, artizo,* to make complete). Cephalic remedy.

Cephalatome, sef'al-a-tome. Instrument for performing cephalatomy.

Cephalatomy (sef-al-at'o-me) or **Cephalatomia,** sef-al-at-om'e-ah (*cephale, tome,* incision). Anatomy, or dissection, or opening of the head.

Cephale, sef'al-e. Head.

Cephalhæmatocele, sef-al-he'mat-o-seel-e (Eng. sef-al-he-mat'o-seel) (*cephale, haima,* blood, *kele,* rupture). Blood tumor of head communicating internally with the brain.

Cephalhæmatoma, sef-al-he-mat-o'mah. Cephalæmatoma.

Cephalhydrocele, sef-al-hi-dro-seel'e (Eng. sef-al-hy'dro-seel) (*cephale,* head, *hudor,* water, *kele,* tumor). Accumulation of water under the cranial fascia.

Cephal'ic. Relating to the head; remedy for headache. **C. ar'tery,** common carotid artery. **C. flex'ure,** see *Flexure.* **C. hood,** part of fold of external germ-layer nearest to anterior extremity of fœtus. **C. in'dex,** proportion of longitudinal to transverse diameter of the cranium, obtained by assuming former to be 100, and reducing the latter to this denomination. **C. nerves,** nerves of the cranium. **C. rem'edy,** see *Cephalic.* **C. tet'anus,** see *Tetanus.* **C. vein,** great superficial vein at outer part of arm and forearm, beginning on back of hand by radicles, which unite into a single trunk, called cephalic of the thumb. The name cephalic was given to it because it was supposed to have connection with the head, and that bloodletting ought to be performed from it in head affections. **C. ver'sion,** see *Turning.*

Cephal'ica pol'licis. Superficial radial vein.

Cephalici morbi, sef-al'is-e mor'be. Brain diseases.

Cephalidium (dim. of **Cephale**), sef-al-id'e-um. Small head.

Cephalindex, sef-al-in'deks. Cephalic index.

Cephaline, sef-al-e'ne. Base or root of the tongue.

Cephaline, sef'al-een. Substance like lecithine, obtained from the brain.

Cephalitis, sef-al-e'tis. Phrenitis; encephalitis.

Cephality, sef-al'it-e. Undue size or preponderance of the head to the rest of the body.

Cephalium, sef-al'e-um. Cephalidium.

Cephalocele sef-al-o-seel'e (Eng. sef'al-o-seel) (*cephale, kele,* rupture). Encephalocele.

Cephalocentesis, sef-al-o-sen-ta'sis (*cephale, kentesis,* puncturing). Puncturing of the head, as for hydrocephalus.

Cephaloclasia, sef-al-o-klah'ze-ah (*cephale, klasis,* breaking). Cephalotripsy.

Cephalocysts, sef'al-o-sists (*cephale, kustis,* cyst). Broad-worms, cestoidea, parasitic in intestines of various animals.

Cephalodesmion, sef-al-o-dez'me-on (*cephale, desmos,* band). Bandage for the head.

Cephaloductor, sef-al-o-duk'tor (*cephale, ductor,* leader). Obstetric forceps.

Cephalodymia, sef-al-o-dim'e-ah (*cephale, duo,* to enter into). Class of double monstrosities, in which the heads are united; divided into two genera, frontodymia and bregmatodymia. In the former union is between ossa frontis; in the latter, between bregmata.

Cephalodynia, sef-al-o-din'e-ah (*cephale, odune,* pain). Cephalalgia; epicranial rheumatism.

Cephalœdema, sef-al-e-de'mah (*cephale, oidema,* swelling). Hydrocephalus; œdema of the head.

Cephalo-facial index, sef-al-o-fa'she-al in'deks. Relation of capacity of skull to combined capacity of orbits and nasal fossæ, including cavities contiguous to latter.

Cephalogenesis, sef-al-o-jen'es-is (*cephale, genesis,* generation). Generation or development of the skull or head.

Cepalograph, sef'al-o-graf (*cephale, grapho,* to describe). Instrument for measuring shape and proportions of the head.

Cephalography, sef-al-og'raf-e (*cephale, graphe,* description). Anatomical description of the head. Use of a cephalograph.

Cephalohæmato'ma. Cephalhæmatoma.

Cephalohæmia, sef-al-o-he'me-ah. Cephalæmia.

Cephalohæmometer, sef-al-o-he-mom'et-ur. Instrument for determining changes in blood-pressure within the cranium.

Cephalo-humeralis, sef'a-lo-hu-mer-al'is. Muscle in horse corresponding to human deltoid and upper part of sterno-cleido-mastoid.

Ceph'alo-hyoepiglot'ticus. Fibres of glosso-epiglottic muscle arising from hyoid bone.

Cephaloid, sef'al-oid (*cephale, eidos,* resemblance). Resembling a head; encephaloid.

Cephalology, sef-al-ol'o-je (*cephale, logos,* discourse). Treatise on, or description of, the head.

Cephaloloxia, sef-al-o-loks'e-ah (*cephale, loxos,* oblique). Wry-neck.

Cephaloma, sef-al-o'mah. Encephaloid.

Cephalomelus, sef-al-om'el-us (*cephale, melos,* limb). Monster having one or two accessory limbs on the head.

Cephalomeningitis, sef-al-o-men-in-je'tis (*cephale, meninx,* membrane, *itis,* inflammation). Inflammation of the membranes of the brain; meningocephalitis.

Cephalometer, sef-al-om'et-ur (*cephale, metron,* measure). Instrument for measuring different dimensions of the fœtal head, *Cephalom'etry.*

Cephalomonodidymi, sef-al-o-mon-o-did'im-e (*cephale,* head, *monos,* alone, *didumos,* twin). Monstrous twins, united at the head or having only one head.

Cephalomyitis, sef-al-o-me-e'tis (*cephale,* head, *mus,* muscle). Inflammation of muscles of the head.

Cephalomyodyn'ia (*cephale, mus,* muscle, *odune,* pain). Pain in muscles of the head.

Cephalo-nasal index, sef'al-o-na'sal in'deks. Proportionate capacity of cranium and nasal cavities.

Cephalonia, sef-al-o'ne-ah. Abnormal development of the cranium and brain.

Cephalonosus, sef-al-on'os-us (*cephale, nosos,* disease). Any cerebral disease or fever. See *Fever, Hungaric.*

Cephalo-orbital index, sef'al-o-or'bit-al in'deks. Proportionate capacity of orbits and cranium.

Cephalo-orbito-nasal index, sef'al-o-or'bit-o-na'sal in'deks. Cephalo-facial index.

Cephalopages (sef-al-op-ah'jes) or **Cephalop'agus** (*cephale, pegnumi,* to join together). Monstrosity in which twins are united by the head, the condition being called *Cephalop'agy.*

Cephalopagotome, sef-al-o-pag'o-tome. Instrument for division and traction of head of fœtus.

Cephalo-parasiticus, sef'al-o-par-a-sit'ik-us. Monstrosity of twins united by the head, one imperfectly formed as a parasitic growth on the other.

Cephalopath'ic (*cephale, pathos,* disease). Relating to disease of the head.

Cephalopathy, sef-al-op'ath-e (*cephale, pathos,* disease). Generic term for disease of the head.

Cephalopharyngæus, sef-al-o-far-in-je'us (*cephale, pharunx,* pharynx). Belonging to the head and pharynx. Portion of constrictor pharyngis superior attached, above, to inferior surface of basilar process of os occipitis. Cephalo-pharyngeal aponeurosis is a thin, fibrous membrane attached to basilar process, and giving insertion to fibres of constrictor pharyngis superior muscle.

Cephalophyma, sef-al-o-fe'mah (*cephale, phuma,* tumor). Tumor of the head. Cephalæmatoma.

Cephaloponia, sef-al-o-pon'e-ah (*cephale, ponos,* pain). Cephalalgia.

Cephalopsycter, sef-al-o-sik'ter (*cephale, psukter,* cool place). Arrangement for application of cold to the head.

Cephalopyosis, sef-al-o-pe-o'sis (*cephale, puon,* pus). Abscess of the head.

Cephaloracchidian, sef-al-o-rak-kid'e-an. Cephalospinal.

Cephalorrhæmia, sef-al-or-re'me-ah (*cephale, rheo,* to flow). Hemorrhage of the brain.

Cephalorrheu'ma. Rheumatism of the head.

Cephaloscope, sef'al-o-skope (*cephale, skopeo,* to see). Stethoscope placed over ear of patient to listen to air of respiration.

Cephaloseisis, sef-al-o-si'sis (*seisis,* agitation). Concussion of the brain.

Cephalosomatodymia, sef-al-o-so-mah-to-dim'e-ah (*cephale, soma,* body, *duo,* to enter into). Double monstrosity, in which union is between heads and trunks.

Cephalospinal, sef-al-o-spi'nal. *Cephalorachidian, Encephalorachidian, Cerebrospinal, Cerebrorachidian, Craniospinal.* Hybrid term (*cephale, spina*). Belonging to head and spine. **C. flu'id,** *Cephalorachidian fluid, Cerebrospinal fluid, Subarachnoidean fluid;* exhaled fluid beneath the arachnoid, wherever pia mater exists in connection with brain and spinal cord. **C. in'dex,** comparative area of foramen magnum and cubic capacity of cranium.

Cephalostat, sef'al-o-stat (*cephale, statos,* at rest),

Head-rest, for securing immobility of the head, as in operations on the eye.

Cephalostyle, sef'al-o-stile (*cephale, stulos,* pillar). Osseous sheath of chorda dorsalis.

Cephalothlasia, sef-al-o-thlaz'e-ah (*cephale, thlao,* to crush). Operation of crushing the fœtal head.

Cephalothlast, sef'al-o-thlast (same etymon). Cephalotribe, for crushing the fœtal head.

Cephalothlibe, sef'al-o-thlibe (*cephale, thlibo,* to crush). Cephalotribe.

Cephalothoracopagus, sef-al-o-thor-ak-op'ag-us. Twin monstrosity, having heads and chests united.

Cephalothoracosterumenos, sef'al-o-thor-ak-o-ster-u'men-os (*cephale, thorax,* chest, *stereo,* to rob). Monster without a head or chest.

Cephalothryp'sis (*cephale, thrupsis,* breaking up). Cephalotripsy.

Cephalothryp'tor. Cephalotryptor.

Cephalotome, sef'al-o-tome. Instrument for perforating the cranium; cephalatome.

Cephalotomy, sef-al-ot'o-me. Cephalatomy.

Cephalotrac'tor (*cephale, traho,* to draw). Obstetrical forceps.

Cephalotribe, sef'al-o-tribe (*cephale, tribo,* to crush). Instrument for perforating and crushing head of the fœtus in utero in parturition.

Cephalotridymus, sef-al-o-trid'im-us. Three-headed monster.

Cephalotripsy, sef'al-o-trip-se (*cephale, tribo,* to crush). Operation of crushing head of fœtus in utero.

Cephalotrypesis, sef-al-o-trip-a'sis (*cephale, trupesis,* perforation). Trepanning.

Cephalotryptor, sef-al-o-trip'tor (same etymon). Trephine; cranium perforator.

Cephalulcus, sef-al-ul'kus (*cephale, helko,* to draw). Fillet with which to facilitate expulsion of the fœtal head.

Cepulla, sep-ul'lah (dim. of **Cepa**). Allium cepa.

Cera, se'rah. Wax. See *Ceratum.* **C. al'ba,** see *Cera flava.* **C. amyla'ta,** pulverizable beeswax, basis for pills. **C. citri'na,** cera flava. **C. fla'va,** yellow wax; peculiar concrete animal substance prepared by the bee—apis mellifica—and by some plants, as Ceroxylon and Myrica cerifera. By bleaching, cera alba, or white wax, is produced; demulcent and emollient; sometimes given in emulsion, in diarrhœa and dysentery, but chiefly in cerates and ointments. Many vegetable products also contain wax, hence the name *Vegetable wax.*

Ceraceous, ser-a'she-us. Waxy.

Ceradine, ser'ad-een. Alkaline derived from veratrum album.

Cerææ, ser'e-e (*keras,* horn). Cornua of uterus.

Ceramium, ser-am'e-um. Liquid measure containing over seven gallons. **C. helminthochor'tus,** Corsican moss, Corallina Corsicana; see *Helminthochorton.*

Ceramuria, ser-am-u're-ah (*keramos,* earth, *ouron,* urine). Phosphatic urine; see *Urine.*

Ce'ras (horn). Cornu; cornea.

Cerasea (ser-ah'se-ah) or **Cera'sia.** Cherry tree.

Cerasin, ser'as-in. Insoluble material derived from gummy exudation from cherry, peach, and plum trees, identical with metarabin.

Cera'sion, Cer'asos, or **Cerasum,** ser'as-um. See *Prunus cerasus.*

Cerasus acida, ser'as-us as'id-ah. Prunus cerasus. **C. a'vium,** Prunus avium, P. nigra. **C. capronia'na,** Prunus cerasus. **C. dul'cis,** Prunus nigra. **C. duraci'na,** Prunus cerasus. **C. fimbria'ta,** Prunus Virginiana. **C. horten'sis,** Prunus cerasus. **C. laurocer'asus,** Prunus laurocerasus. **C. pa'dus,** Prunus padus. **C. pe'nis,** glans penis. **C. racemo'sus sylves'tris,** Prunus padus. **C. ru'bra,** Prunus cerasus. **C. serot'ina,** Prunus Virginiana. **C. Virginia'na,** Prunus Virginiana. **C. vulga'ris,** Prunus cerasus.

Cerate, se'rate (*cera,* wax). Pharmaceutical preparation containing composition of wax, oil, or lard, with or without other ingredients. Simple cerate, ceratum (Ph. U. S.), is a mixture of white wax ℥iij and lard ℥x, and is applied as an emollient to excoriations, etc.; see *Ceratum cetacei.* **C., blis'tering,** cerate of cantharides; see *Emplastrum lyttæ.* **C. of cal'amine,** known also as cerate of carbonate of zinc, Turner's cerate, is a mixture of calamine, yellow wax, and lard. **C., cam'phor,** ceratum camphoræ. **C. of canthar'ides,** blister or blistering ointment, ointment of Spanish flies, is a mixture of spermaceti cerate and powdered cantharides. It is used to keep blisters, issues, etc. open. Cerate of cantharides is officinal under name ceratum cantharidis (Ph. U. S.). **C. of ex'tract of canthar'ides,** see *Emplastrum lyttæ.* **C., Gou'lard's,** ceratum plumbi compositum. **C. of lard,** cerate. **C. of lead, com'pound,** ceratum plumbi compositum. **C., res'in, com'pound,** ceratum resinæ compositum. **C., sav'ine,** ceratum sabinæ. **C., soap,** ceratum saponis. **C., spermace'ti,** ceratum cetacei. **C. of supera'cetate** or **su'gar of lead,** ceratum plumbi superacetatis. **C., Turner's,** cerate of calamine. **C. of zinc carbonate,** cerate of calamine.

Cerate'a or **Cerat'ia.** Ceratonia siliqua.

Ceratectasia, ser-at-ek-tah'ze-ah (*keras,* cornea, *ektasis,* extension). Staphyloma of cornea; abnormal projection of cornea. **C. con'ica,** ceratoncus; conical staphyloma. **C. sphœ'nica,** spherical staphyloma.

Ceratectomy (ser-at-ek'to-me), **Cerec'tomy** (*cerato, ektomos,* cut out). *Kerectomy* or *Keratectomy.* Section or incision of cornea, as in cataract, or to give exit to pus effused in the eye, in hypopyon, etc.

Ceratiasis, ser-at-e'as-is (*keras,* horn). Morbid condition characterized by corneous growths.

Ceratin, ser'at-in (*keras,* horn). Horny matter existing in hair, nails, epidermis, etc.

Ceration, ser-a'shun. Siliqua; cornu of uterus.

Ceratitis, ser-at-e'tis. Inflammation of the cornea; corneitis; keratitis. **C., dot'ted** or **puncta'ta,** inflammation of anterior chamber of the eye. **C. sup'purans,** inflammation of the cornea, with collection of purulent matter between laminæ of the cornea, having the shape of a nail. Onyx.

Ceratium, ser-at'e-um. Ceratonium siliqua; St. John's bread. Ceration.

Cerato, ser'at-o (*keras,* horn). In composition, cornu or horn, or cornea. (See *Ceras* and words beginning with *Kerato.*)

Cerato-arytenoideus, ser'at-o-ar-it-en-o-e'de-us. Fibres of crico-arytenoideus posticus muscle from inferior cornu of thyroid cartilage.

Ceratocele, ser-at-o-se'le (Eng. ser'at-o-seel) (*cerato, kele,* tumor). Protrusion of transparent cornea, or rather of membrane of aqueous humor, through opening in the cornea. Keratocele.

Ceratocentesis, ser-at-o-sen-ta'sis (*keras,* horn, *centesis,* puncture). Puncturation of the cornea.

Ceratococcus, ser-at-o-kok'kus. Sphærococcus.

Ceratoconus, ser-at-o-ko'nus. Staphyloma of the cornea.

Ceratocricoid, ser-at-o-kri'koid. Merkel's muscle; rare muscle of the larynx, first described by Merkel of Leipsic; existing only on one side, arising close to the origin of outer fibres of crico-arytenoidæus posticus, and attached to posterior margin of inferior cornu of thyroid cartilage.

Ceratodeïtis, ser-at-o-de-e'tis. Ceratitis.

Ceratodeocele, ser-at-o-de-o-se'le (Eng. ser-at-o-de'-o-seel). Ceratocele.

Ceratodeonyxis, ser-at-o-de-on-iks'is. Ceratonyxis.

Cerato'des membra'na. Cornea.

Ceratodistos, ser-at-o-dis'tos (*keras,* horn, *histos,* tissue). Structure or tissue of cornea.

Ceratodi'tis. Ceratitis.

Ceratogenesis, ser-at-o-jen'es-is (*cerato, genesis,* generation). Formation of horn or of ceratoma.

Ceratoglobus, ser-at-o-glo'bus. Hydrophthalmia.

Ceratoglossus, ser-at-o-glos'sus (*cerato, glossa,* tongue). Muscle extending from great cornu of hyoid bone to base of tongue; part of hyoglossus.

Ceratohyal, ser-at-o-hy'al. Relating to cornu of hyoid bone and the bone itself; lesser cornu of os hyoides, viewed as a separate bone.

Ceratohyoï'deus. Keratohyoideus; stylohyoid muscle.

Ceratoid, ser'at-oid (*cerato, eidos,* resemblance). Resembling horn. Cornea.

Ceratoïditis, ser-at-o-id-e'tis. Ceratitis.

Ceratoïgenesis, ser-at-o-e-jen'es-is. Ceratogenesis.

Cer'ato-iri'tis. Inflammation of cornea and iris.

Ceratoitis, ser-at-o-e'tis. Ceratitis.

Ceratoleucoma, ser-at-o-lu-ko'mah. Leucoma.

Ceratolysis, ser-at-ol'is-is. Keratolysis.

Ceratoma, ser-at-o'mah. Horny growth or formation.

Ceratomalacia, ser-at-o-mal-ah'se-ah (*cerato, malakia,* softness). Softening of cornea.

Ceratomalagma, ser-at-o-mal-ag'mah (*cerato, malasso,* to soften). Cerate.

Ceratomandibular, ser-at-o-man-dib'u-lar. Hyomandibular.

Ceratomeningitis, ser-at-o-men-in-je'tis (*cerato, meninx,* membrane, *itis,* inflammation). Ceratitis.

Ceratomeninx, ser-at-o-me'ninks. Cornea.

Ceratomia, ser-at-om'e-ah. Ceratectomy; cerotomy.

Cerat'omy. Ceratotomy.

Ceratonia siliqua, ser-at-o'ne-ah sil'e-kwah (*keras,* horn). Algaroba, or St. John's bread, carob tree, sweetpod; fruit is mucilaginous, and employed in decoction where mucilages are indicated.

Ceraton'osus. Disease of the cornea.

Ceratonyxis, ser-at-on-iks'is (*cerato, nusso,* to puncture). Operation to depress the crystalline by means of a needle introduced into the eye through the cornea; see *Cataract.*

Ceratopharyngeus, ser-at-o-far-in-je'us (*cerato, pharunx,* pharynx). Small fleshy bundles, forming part of the hyopharyngeus.

Ceratoplastice, ser-at-o-plas'tis-e. Ceratoplasty.

Cer'atoplasty (*cerato, plastikos,* formative). Operation for formation of artificial cornea.

Ceratorrhexis, ser-at-or-rheks'is (*cerato, rhexis,* rupture). Rupture of cornea.

Ceratoscope, ser'at-o-skope (*keras,* horn, *skopeo,* to see). Instrument for examination of cornea, *Ceratoscopy.*

Ceratosis, ser-at-o'sis. Ceratogenesis.

Ceratostaphylinus, ser-at-o-staf-il-e'nus (*cerato, staphule,* the uvula). Fleshy fibres of thyrostaphylinus muscle.

Ceratostroma, se-ra-tos'tro-mah (*keras,* horn, *stroma,* layer). Ichthyosis.

Ceratostro'sis. Development of ichthyosis, or formation of layer of horny tissue on the skin.

Ceratotomus, ser-at-ot'om-us. Ceratotome, keratotome; knife for dividing transparent cornea in cataract, *Ceratotomy.*

Ceratotomy, ser-at-ot'om-e. Ceratectomy.

Ceratum, ser-ah'tum. Cerate, simple cerate. **C. ad'ipis,** cerate. **C. al'bum,** C. cetacei, C. Galeni. **C. de Althæ'â,** unguentum de althæâ. **C. calami'næ** or **calamina're,** cerate of calamine. **C. cam'phoræ** (Ph. U. S.), camphor cerate; made of olive oil, camphor liniment, and cerate; somewhat stimulating dressing. **C. canthar'idis** (Ph. U. S.), cerate of cantharides (cantharides, yellow wax, resin, and lard); (in Ph. Br. cantharides, yellow wax, prepared suet, prepared lard, and resin). **C. de Cerus'â,** unguentum plumbi subcarbonatis. **C. ceta'cei,** spermaceti cerate; cerate made of spermaceti, white wax, and olive oil, officinal in Ph. U. S.; emollient to ulcers, etc. **C. ce'ti,** ceratum cetacei. **C. cicu'tæ,** ceratum comii. **C. citri'num,** ceratum resinæ. **C. coni'i,** made of ointment of conium, spermaceti, white wax; used in cancerous and scrofulous sores, etc. **C. epilot'icum,** cerate of calamine. **C. extrac'ti canthar'idis** (Ph. U. S.), cantharides, resin, yellow wax, lard, and alcohol. **C. fla'vum,** cerate made of yellow wax, expressed oil of almonds, and water. **C. Gale'ni,** Galen's cerate; made of cold cream, white wax, oil of sweet almonds, and water or rose-water; mild application to chaps, etc. **C. Goular'di,** C. plumbi compositum. **C. hydrar'gyri compos'itum,** compound cerate of mercury (made of ung. hydrarg., cerat, sapon. comp., and camphor), is discutient to indolent tumors. **C. lap'idis calamina'ris,** cerate of calamine. **C. laudanisa'tum,** mixture of Sydenham's laudanum and Galen's cerate. **C. lithar'gyri aceta'tis compos'itum,** C. plumbi compositum. **C. lyt'tæ,** cerate of cantharides. **C. mercuria'le,** unguentum hydrargyri. **C. myris'ticæ,** yellow wax, olive oil, and expressed oil of nutmeg. **C. pica'tum,** oily matter from boiling pitch; same uses as tar. **C. pi'cis,** C. resinæ pini. **C. plum'bi compos'itum,** compound lead cerate, Goulard's cerate, Goulard's ointment. It is composed of liq. plumb. subacet. and ceratum camphoræ. **C. plum'bi subaceta'tis** (Ph. U. S.), C. plumbi compositum. **C. plum'bi superaceta'tis,** cerate of superacetate or sugar of lead. It is made of acetate of lead, white wax, and olive oil; cooling and astringent. **C. refrig'erans Gale'ni,** C. Galeni. **C. resi'næ,** resin cerate or ointment, yellow basilicon, basilicon ointment. It is made of resin, yellow wax, and lard (Ph. U. S.); of resin, yellow wax, and simple ointment (Ph. Br.); stimulating application to old ulcers, etc. **C. resi'næ compos'itum,** compound resin cerate, Deshler's salve. It is made of resin., sevum, cera flava, terebinthina, ol. lini. **C. resi'næ pi'ni,** yellow wax, pine resin, turpentine. **C. rosa'tum,** rose cerate. **C. sabi'næ,** savin or savine cerate, savin or savine ointment. It is made of extract. sabin. fluid. and cerat. resinæ (Ph. U. S.); irritative, drawing. Used in same cases as cerate of cantharides. **C. sapo'nis,** soap cerate. It is made of emplastrum saponis, cera flava, oleum olivæ; applied in sprains or fractures. **C. satur'ni,** C. plumbi compositum. **C. sim'plex,** cerate, ceratum cetacei. **C. spermace'ti,** C. cetacei. **C. subaceta'ti plum'bi medica'tum,** C. plumbi compositum. **C. sulphura'tum,** washed sulphur, almond oil, Galen's cerate. **C. tetraphar'macum,** piselæum. **C. vir'ide,** unguentum subacetatis cupri. **C. zin'ci carbona'tis,** cerate of carbonate of zinc. It is made of zinci carbonas præparata and unguentum simplex; used in same cases as ceratum calaminæ.

Cerbera (ser'ber-ah) **ahovai.** See *Strychnia.* **C. man'ghas,** tree of E. Indies; leaves and juice are emetic and purgative. **C. odol'lam,** poisonous tree of E. Indies; yields a poisonous glucoside called cerberin; bark and leaves are purgative. **C. saluta'ris,** tree of Cochin China; root and nut are employed in colic and affections of the stomach. **C. tan'ghin,** tanghinia; tree of Madagascar; kernel of fruit is a deadly paralyzing poison. **C. theve'tia,** see *Strychnia.*

Cer'berin. See *Cerbera odollam.*

Cercaria, sur-kar'e-ah (*kerkos,* tail). Genus of agastric, caudate, infusory animalcules; larval form of trematode worms, to which spermatozoa have been presumed by some to belong.

Cerchnasmus (surk-naz'mus), **Cerchnoma** (surk-no'mah), **Cerch'nos,** or **Cerchnus,** surk'nus (*kerchneo,* to render hoarse). Hoarseness; rough voice produced by hoarseness; see *Rattle.*

Cercis, sur'sis. Pestle, radius, tibia; see *Pilum.* **C. Canaden'sis,** red bud, Judas tree; astringent bark is used in diarrhœa and dysentery, and as an injection in leucorrhœa and gleet.

Cercoma (sur-ko'mah) **Schæff'eri.** Species of vesicating coleopterous insects in France.

Cercomo'nas. Genus of infusoria. **C. glob'ulus,** species found in incrustations on human teeth. **C. hom'inis** or **intestina'lis,** infusoria found in evacuations, especially of typhoid fever, diarrhœa, and cholera; megastoma intestinalis. **C. vagina'lis,** infusoria found in the vagina, *trichomonas vaginalis.*

Cer'cos. Penis.

Cercosis, sur-ko'sis (*kerkos,* tail). Clitoris; nymphomania and elongation of clitoris; polypus uteri, sarcoma cercosis. **C. clitor'idis** or **C. exter'na,** clitorism.

Cerea, se're-ah. Cerumen.

Cerealia, se-re-al'e-ah (*Ceres,* goddess of corn). Gramineous plants, seeds of which serve for nourishment of man; as wheat, barley, rye, etc.

Cerealin, se're-al-in. Albuminoid matter derived from cereals.

Cerebellar, ser-e-bel'lar. Relating to the cerebellum. **C. an'gle,** suboccipital angle. **C. ar'teries,** arteries supplying the cerebellum, derived from vertebral and basilar. **C. hem'ispheres,** two hemispheres of cerebellum. **C. lam'inæ,** narrow folds of cortical layer of cerebellum. **C. pro'cesses,** superior peduncles of cerebellum. **C. sec'tor,** space in middle plane of skull, between lines projected from hormion to opisthion and inion. **C. veins,** veins from cerebellum emptying into venæ Galeni or venous sinuses at base of skull.

Cerebel'li cap'sula. White fibres surrounding corpus dentatum.

Cerebellitis, ser-e-bel-le'tis. Inflammation of cerebellum.

Cerebel'lo-spi'nal. Part of nervous system which includes the cerebellum and spinal cord.

Cerebellous, ser-e-bel'lus. Cerebellar. **C. ap'oplexy,** apoplexy of cerebellum.

Cerebellum, ser-e-bel'lum (dim. of **Cerebrum**). Little brain; portion of medullary mass contained in the cavity of the cranium, filling lower occipital fossæ below the tentorium, and embracing the tuber annulare and medulla. It is composed, like the cerebrum, of vesicular and tubular substance, so that on section it has an arborescent appearance—arbor vitæ. The cerebellum is divided into two lobes or hemispheres or lateral masses, superior anterior or quadrangular lobe, and superior posterior or semilunar lobe; each lobe is again subdivided into monticuli or lobules. The hemispheres are separated in front by a deep notch, incisura cerebelli anterior, and behind by the incisura cerebelli posterior. **C., gan'glion of,** corpus dentatum.

Cerebral, ser'e-bral. Similar to or relating to the brain. **C. an'gle,** angle between lines projected from auricular point to glabella and inion. **C. apoph'ysis,** pineal gland. **C. ar'teries,** these are three on each side: anterior, or artery of corpus callosum; middle, sylvian artery, furnished by internal carotid; posterior, or posterior and inferior, artery of the brain, profunda cerebri, from vertebral. **C. com'missures,** commissures uniting hemispheres of the brain. **C. convolu'tions,** tortuous divisions of the cortical substance of the cerebrum. **C. exhaus'tion,** neurasthenia. **C. fe'ver,** meningitis. **C. gan'glia,** optic thalami and corpora striata. **C. hem'ispheres,** two portions into which the cerebrum is divided by the great longitudinal fissure; united at inferior part by the corpus callosum. **C. in'dex,** relation of transverse diameter of brain to longitudinal. **C. lobes,** see *Cerebrum.* **C. localiza'tion,** apportionment of functions to various localities on substance of brain; see *Localization.* **C. mac'ula,** redness of skin, supposed to be connected with inflammation of the brain. **C. nerves,** those arising within the cranium. **C. pe'duncles,** crura cerebri. **C. pneumo'nia,** see *Pneumonia.* **C. protu'berance,** pons Varolii. **C. rheum'atism,** rheumatic inflammation of membranes of the brain. **C. sec'tor,** space in middle plane of skull, between lines projected from hormion to nasion and basion, or from hormion to nasion and inion. **C. si'nuses,** sinuses of dura mater. **C. surprise',** instantaneous stupor occurring after sudden compression or laceration of the brain. **C. tri'gone,** fornix cerebri. **C. veins,** veins lying within the pia mater. **C. ven'tricles,** V. of the brain. **C. ves'icles,** bulbous expansions on primary neural tube of early embryo, developing into the brain,

Cerebralgia, ser-e-bral'je-ah. Cerebral neuralgia.

Cerebrasthenia, ser-e-bras-then-e'ah (*cerebrum, astheneia,* weakness). Weakness of the brain.

Cerebration, ser-e-bra'shun. Action of the brain during any mental or moral manifestation. **C., uncon'scious,** unconscious exercise of the mind during sleep or mental occupation.

Cerebria, ser-eb're-ah. Spontaneous acute, general inflammation of the substance of the brain, uncomplicated with meningitis. **C. partia'lis,** monomania.

Cerebric acid, ser'e-brik as'id. Azotized material existing in gray substance of brain; impure cerebrin.

Cerebriform, ser'eb-ri-form (*cerebrum, forma,* form). Encephaloid.

Cerebrifugal, ser-e-brif'u-gal. Epithet for nerve-fibres passing from the brain.

Cerebrin, ser'e-brin. White powder obtained from brain-matter; forms nearly 10 per cent. of white nervous substance. $C_{17}H_{33}NO_3$. See *Cerebrum.*

Cerebrin'ic ac'id. Weak acid found in brain-tissue.

Cerebrip'etal. Epithet for nerve-fibres passing to the brain.

Cerebritis, ser-e-bre'tis. Inflammation of the substance of the brain; encephalitis.

Cerebroid, ser'e-broid. Encephaloid.

Cerebromalacia, ser-e-bro-mal-ah'se-ah (*cerebrum, malakia,* softness). Softness of brain-substance.

Cerebropathy, ser-e-brop'ath-e (*cerebrum, pathos,* affection). Mental disorder; see *Nervous diathesis.*

Cerebropsychosis, ser-e-bro-sy-ko'sis (*psuche,* mind). Cerebral disease with mental disturbance.

Cerebrorhachidian, ser-e-bro-rak-id'e-an (*cerebrum, rhachis,* spine). Cephalo-spinal; cerebro-spinal.

Cerebrosclerosis, ser-e-bro-skle-ro'sis. Sclerosis or induration of the brain.

Cerebroscopy, ser-e-bros'ko-pe (*cerebrum, skopeo,* to see). Examination of the brain, as by ophthalmoscopy; encephaloscopy; use of the ophthalmoscope for diagnosis of brain diseases.

Cerebrose, ser'e-brose. Saccharine matter ($C_6H_{12}O_6$) in brain-tissue, isomeric with glucose.

Cerebrosides, ser'e-bro-sides. Substances in the tissue of the brain containing cerebrose.

Cerebrosis, ser-e-bro'sis. Mania.

Cerebro-spinal, ser'e-bro-spi'nal. Relating to the brain and spinal cord. A cerebro-spinal or cerebro-spinant is a neurotic exercising special influence over the functions of the brain and spinal cord and their respective nerves. **C.-s. ax'is,** see *Encephalon.* **C.-s. fe'ver,** meningitis, cerebro-spinal. **C.-s. flu'id,** cephalo-spinal fluid. **C.-s. meningi'tis,** see *Meningitis.* **C.-s. sys'tem,** brain and spinal cord and nerves connected therewith.

Cerebro-spinant, ser'e-bro-spi'nant. Cerebro-spinal.

Cerebrote, ser'e-brote. White fatty, amyloid principle in the brain.

Cerebrotomy, ser-e-brot'o-me (*cerebrum, tome,* incision). Dissection of the brain; encephalotomy.

Cerebrum, ser'e-brum (*kara,* the head). The brain; the whole contents of the cranium, or upper portion only, the posterior and inferior portions being called cerebellum. The brain, properly so called, extends from the os frontis to the superior occipital fossæ. Anteriorly, it rests on the orbitar vault; behind this, on the middle fossæ of the base of the cranium; and posteriorly on the tentorium cerebello superextensum. The upper surface is divided by a deep median cleft into two halves or hemispheres, united at the base by the corpus callosum. On its surface are numerous convolutions. The inferior surface exhibits, from before to behind, three lobes, distinguished as anterior, middle, and posterior. The cerebrum is contained in a triple envelope, dura mater, pia mater, and arachnoid (see *Meninges*). Two substances may be distinguished in it: white, medullary, tubular or fibrous—medulla cerebri; and cortical, cineritious, vesicular, or gray. The former occupies all the interior and base of the brain; the latter is grayish and softer, and is situate particularly at the surface. Much progress has been made recently, especially by experiments on animals, in the localization of various functions in different areas and points in the cerebrum, of many motor actions especially; and some of these seem to be so definitely determined that already great surgical advance has been made in the removal of tumors from the cerebrum. See *Centre* and *Localization.*

The brain is the material organ of mental and moral manifestations. Three primary vesicles are developed, at an early period of fœtal life, from the

medullary canal, and, with their lining of epiblast, constitute the primitive brain, as follows (Chapman):

I. Anterior primary vesicle.	1. Prosencephalon.	Cerebral hemispheres, corpora striata, corpus callosum, fornix, lateral ventricles, olfactory bulb (rhinencephalon).
	2. Thalamencephalon (Diencephalon).	Thalami optici, pineal gland, pituitary body, third ventricle, optic nerve (primarily).
II. Middle primary vesicle.	3. Mesencephalon.	Corpora quadrigemina, crura cerebri, aqueduct of Sylvius, optic nerve (secondarily).
III. Posterior primary vesicle.	4. Epencephalon.	Cerebellum, pons Varolii, anterior part of fourth ventricle.
	5. Metencephalon.	Medulla oblongata, fourth ventricle, auditory nerve.

The brain differs in weight in different nations and races. According to Davis:

	Men.	Women.
European races	1367 grammes.	1204 grammes.
Oceanic "	1319 "	1219 "
American "	1308 "	1187 "
Asiatic "	1304 "	1194 "
African "	1293 "	1211 "
Australian "	1214 "	1111 "

The average human brain weighs from 48 to 50 ounces, in a newborn child 10 to 14 ounces, and at the age of seven years already averages 40 ounces. The average weight of the adult female brain is about 44 ounces, or about five ounces less than that of the adult male (Kirkes). The blood circulating in the brain amounts to about $\frac{1}{5}$ of its volume. The relative weights of the cerebrum, cerebellum, etc. are as follows (Quain):

Average weight of—	Male.	Female.
Cerebrum	43.98 oz.	38.75 oz.
Cerebellum	5.25 "	4.76 "
Pons and medulla	0.98 "	1.01 "
Entire encephalon	50.21 "	44.52 "
Ratio of cerebrum to cerebellum	1 to 8$\frac{1}{2}$	1 to 8$\frac{1}{4}$

The brain consists chemically of about 75 per cent. of water, 15 of fats, 7.5 of albuminoids, 1.5 of salts, 1 of extractives, including cerebrin, lecithin, cholesterin, fat, fatty acids, phosphorus, sodium chloride, salts of lime, potash, and magnesia. The amount of phosphorus is from 1.3 to 1.7 per cent. (Chapman).

Cer'ebrum abdomina'le. Solar plexus. **C. elonga'tum,** medulla oblongata. **C. lon'gum** or **oblon'gum,** spinal cord. **C. par'vum, C. poste'rius,** cerebellum.

Cerecloth, antiseptic, sere'kloth, an-te-sep'tik. Cloth or thin calico saturated with solid paraffin, to which oil, wax, and carbolic acid are added; used for wounds.

Cerectomy, ser-ek'to-me. Ceratectomy.

Cerefolium, ser-e-fo'le-um. Scandix cerefolium. **C. hispan'icum,** Chærophyllum odoratum. **C. sylves'tre,** Chærophyllum sylvestre.

Cerelæum, ser-el-e'um (*keros,* wax, *elaion,* oil). Cerate.

Cereolus, ser-a'ol-us (*cera,* wax). Bougie.

Cererium, ser-a're-um. Cerium.

Cereus, se're-us (*cera,* wax). Bougie. **C. flagellifor'mis,** poisonous Mexican plant; antispasmodic and anthelmintic; externally rubefacient. **C. grandiflo'rus,** Cactus grandiflora. **C. medica'tus,** bougie. **C. monilifor'mis,** plant of W. Indies, used in fomentations and cataplasms in inflammatory diseases of the skin and rheumatism. **C., night-bloom'ing,** Cactus grandiflora. **C. panicula'tus,** pulp of the fruit is used in bilious affections and fevers.

Cerevisia, ser-e-viz'e-ah (from *Ceres,* goddess of corn). Term to include malt liquors, as ale, beer, porter. **C. abi'etis** or **abieti'na,** spruce beer. **C. ama'ra,** bitter beer, containing wormwood or gentian. **C. fermen'tum** (Ph. Br.), beer, yeast, a ferment obtained in brewing beer, and produced by Saccharomyces cerevisiæ. **C. lupula'ta,** beer made from hops. **C. ni'gra,** black beer, made by infusing berbs in beer or ale.

Ce'ria. Celia, cerevisia; flat intestinal worm.

Cerii oxalas, se're-e oks'al-as. Officinal in Ph. U. S. and Br. See *Cerium.*

Cerintha major, ser-in'tha major. Honeywort, wax-plant; European plant, astringent, and employed in affections of the eye.

Cerion, ser'e-on (honeycomb). See *Favosus, Porrigo favosa.*

Cerium, se're-um (after planet *Ceres*). Metal resembling iron; oxidizable at ordinary temperatures in moist atmosphere. Nitrate and oxalate are only compounds used medicinally. Salts of cerium are sedative and tonic, and have been used in dyspepsia, vomiting of pregnancy, chorea, etc., resembling subnitrate of bismuth in action. The oxalate of the sesquioxide, cerii oxalas, is officinal (Ph. U. S.). Dose of the oxalate or nitrate, 1 grain.

Cerocoma, ser-o-ko'mah. Genus of coleopterous insects, all species of which are vesicant.

Ceroleum, ser-o'le-um (*cera, oleum,* oil). Cerate.

Ceroma, ser-o'mah (*keros,* wax). Cerate; amyloid degeneration.

Ceromel, ser'o-mel (*cera,* wax, *mel,* honey). Mixture of wax and honey, used in India as application to indolent ulcers.

Ceronia, ser-o'ne-ah. Ceratonia siliqua.

Ceronium, ser-o'ne-um. Cerate.

Ceropegia acuminata, ser-o-pej'e-ah ak-u-min-at'-ah. Species of asclepiadaceous plants of E. Indies, used as stomachic tonic and in diseases of bowels of children.

Cerosis, ser-o'sis. Kerosis.

Cerostro'ma or **Cerostrosis,** ser-o-stro'sis (*keras,* horn, *stroma,* layer, or *strosis,* spreading). Hystricisasis; ichthyosis hystrix.

Cerote (ser-ote'), **Ce'roton,** or **Cerotum,** ser-o'tum. Cerate.

Ceroxylon, ser-oks'il-on (*keros,* wax, *xulon,* wood). See *Cera flava* and *C. alba.* **C. andic'ola,** large Peruvian tree, from which wax is obtained.

Cerumen, ser-u'men (*cera,* wax). Unctuous humor, similar to wax, in meatus auditorius externus, secreted by glands beneath skin lining meatus. It lubricates the meatus, preserves suppleness of the lining membrane, prevents the introduction of bodies floating in the atmosphere, and by its bitterness and unctuousness prevents insects from penetrating.

Ceru'mi. Cerumen.

Ceruminosis, ser-u-min-o'sis. Condition of, or causing, excessive secretion or accumulation of cerumen in external auditory canal.

Ceruminous, ser-u'min-us. Relating to or secreting cerumen. **C. glands,** ceruminous follicles; glands or follicles secreting cerumen.

Cerus, se'rus. Cera.

Ceruse, ser-oos'. Plumbi subcarbonas.

Cerussa, ser-oos'sah. Plumbi subcarbonas. **C. aceta'ta,** plumbi superacetas. **C. al'ba hispan'ica,** plumbi subcarbonas. **C. al'ba no'rica,** plumbi subcarbonas. **C. ni'gra,** graphites. **C. serpenta'riæ,** see *Arum maculatum.*

Cervaria alba, ser-vah're-ah al'bah. Laserpitium latifolium.

Cervi boletus, sur've bol-a'tus. Elaphomyces granulatus. **C. el'aphi cor'nu,** cornu cervi; see *Cervus.*

Cervical, sur'vik-al (*cervix,* neck). Trachelian; relating to the neck, or neck of uterus. **C. ar'teries,** these are three in number: 1. Ascending, superior, or superficial, branch of inferior thyroid. 2. Transverse, branch of axillary artery or of subclavian. 3. Posterior or profound, branch of subclavian; see *Princeps cervicis artery.* **C. bend,** bend made between medulla spinalis and myelencephalon in embryonic development of cerebro-spinal axis. **C. canal',** canal of neck of uterus. **C. curve,** curve of cervix. **C. em'inence,** prominence of spine of seventh cervical vertebra. **C. fas'cia,** sheath of muscles of neck. **C.**

gan'glions, three ganglions of great sympathetic in the neck; cervical glands or lymphatic glands of neck are also so called; see *Trisplanchnic nerve*. Also ganglion formed by union of several ganglia in the uterovaginal plexus. **C. glands**, lymphatic glands of neck. **C. lig'aments**, two in number: 1. Anterior, extending from basilar process of occipital bone to anterior part of first cervical vertebræ. 2. Posterior or supraspinous, ligamentum nuchæ, extending from outer occipital protuberance to spinous process of seventh cervical vertebra; in animals with large heads it is very strong; see *Nucha*. **C. nerves**, these are eight in number on each side, and form eight cervical pairs. **C. nu'cleus**, mass of gray matter in spinal cord opposite third and fourth cervical nerves. **C. pachymeningi'tis**, see *Pachymeningitis*. **C. plex'us**, nervous network formed by anterior branches of first three cervical nerves, above posterior scalenus muscle, and at outer side of pneumogastric nerve, carotid artery, and jugular vein. **C. preg'nancy**, development of fœtus in cervical canal. **C. re'gion, ante'rior deep**, prevertebral region; region of neck, occupied by three pairs of muscles placed immediately in front of the cervical and three superior dorsal vertebræ—viz., rectus capitis anticus major, rectus capitis anticus minor, and longus colli—hence termed prevertebral muscles. **C. ribs**, prolongations like ribs occasionally seen in connection with vertebræ of neck. **C. tri'angles**, the side of the neck is divided into two large triangles by the sterno-mastoid muscle—anterior triangle or triangular space, and posterior triangle or triangular space. The anterior triangular space is divided into three smaller triangles by digastric muscle above, and by anterior belly of omo-hyoid below; named from below upward, inferior carotid triangle, superior carotid, and submaxillary. The posterior triangle or triangular space is crossed by posterior belly of omo-hyoid, which divides it into two triangles—upper or occipital, and lower or subclavian. **C. veins** have nearly the same distribution as the arteries. **C. ver'tebræ**, first seven vertebræ of spine. See *Vertebræ*.

Cervicalis, sur-ve-ka'lis. Cervical. **C. ascen'dens**, Iliocostalis cervicis muscle; four or five fleshy slips forming an extension of the ilio-costalis accessory muscle into the neck. **C. descen'dens**, C. ascendens; hypoglossus; fasciculus of sacro-lumbalis muscle.

Cervicaria, sur-ve-kah're-ah. Name given to several varieties of Campanula.

Cerviciplex, sur'vis-e-plex. Cervical plexus.

Cerviciscapularis, sur-ve-se-skap-u-lar'is. Levator anguli scapulæ.

Cervicispinal, sur-ve-se-spi'nal. Relating to neck and spinal column.

Cervicitis, sur-ve-se'tis. Trachelitis; inflammation of cervix uteri.

Cervico, sur've-ko (*cervix*, neck). In composition, neck, or neck of uterus. **C.-acromia'lis**, part of trapezius muscle passing from neck to acromion process. **C.-auricula'ris**, relating to back of neck and ear, or to one of several muscles so distributed in lower animals. **C.-bas'ilar**, relating to neck and region of basilar process of occipital bone. **C.-brach'ial**, relating to neck and arm, or brachial plexus and cervical nerves. **C.-branch'ial fis'tula**, branchial fistula. **C.-bregmat'ic**, relating to neck and vertex of head, as cervico-bregmatic diameter. **C.-cos'to-humera'lis**, rare muscle passing from sixth cervical vertebra and first rib to humerus. **C.-fa'cial**, belonging to neck and face; smaller main division of facial nerve distributed to face and neck. **C.-hu'meral**, levator claviculæ. **C.-mastoï'deus**, relating to neck and mastoid process; splenius capitis. **C.-na'sal**, relating to neck and nose, as muscle in lower animals so distributed. **C.-occip'ital**, cleido-occipital; relating to neck and occipital bone. **C.-scap'ular ar'tery**, transverse cervical artery. **C.-spi'nal**, relating to neck and spine. **C.-subscapula'ris**, rhomboideus muscle of some lower animals, arising from posterior cervical ligament. **C.-vagi'nal**, relating to neck of uterus and vagina. **C.-ves'ico-vagi'nal**, relating to cervix uteri, bladder, and vagina; as cervico-vesico-vaginal fistula.

Cervicodynia, sur-ve-ko-din'e-ah (*cervico*, *odune*, pain). Pain in the neck; rheumatism of the neck.

Cervispina, sur-ve-spe'nah (buckthorn). Rhamnus.

Cervix, sur'viks. Neck, neck of uterus, etc. **C. cor'nu**, narrow portion of posterior cornu of medulla spinalis. **C. cor'poris restifor'mis**, narrowed portion of restiform body. **C. cos'tæ**, neck of rib. **C. den'tis**, neck of tooth. **C. fem'oris**, neck of femur. **C. glan'dis**, narrow portion of penis back of glans. **C. obsti'pa**, torticollis. **C. pedunculo'rum**, C. corporis restiformis. **C. pe'nis**, C. glandis. **C. rig'ida**, torticollis. **C. u'teri**, neck of uterus. **C. vesi'cæ**, neck of bladder. **C. vesi'cæ fel'leæ**, neck of gall-bladder.

Cervus, sur'vus (stag). Horn of cervus elaphus. Hartshorn contains 27 parts of gelatin in the 100. Jelly made from shavings is emollient and nutritive. See *Cornu cervi*. Cornu ustum, burnt hartshorn, is a weak antacid.

Cesa'rean. Cæsarean.

Cessatio mensium, ses-sa'she-o men'se-um. Amenorrhœa; menopause.

Cesto'da or **Cesto'des.** Order of parasitic worms. Tænia is an example. See *Parasites* and *Worms*.

Ces'toid entozo'a. See *Parasites* and *Entozoa*.

Cestron (ses'tron) or **Ces'tros.** Betonica officinalis; trocar.

Cestrum auriculatum, ses'trum aw-rik-u-lat'um. Yerba santa; leaves of this shrub of Peru are used in fevers. **C. hediun'dinum**, shrub of Peru, emollient and astringent, applied to hemorrhoids. **C. par'qui**, Chilian plant; decoction of leaves is used for tinea.

Ceta'ceous. Relating to spermaceti; like spermaceti.

Cetaceum, set-ah'se-um (*cetus*, whale). Officinal in Ph. U. S. and Br. *Spermaceti*, *Sperm*. Inodorous, insipid, white, crystallized, friable, unctuous substance, obtained from physeter macrocephalus or spermaceti whale; demulcent and emollient, but mostly used in cerates and ointments.

Ceterach (set'er-ak) **officina'lis** or **officinarum**, offis-in-ah'rum. Asplenium ceterach.

Ce'tin. White substance resulting from crystallization of spermaceti from boiling alcohol.

Ceto'nia aura'ta. Beetle in Russia, used medicinally.

Cetraria islandica, set-rar'e-ah is-lan'dik-ah. *Cetraria* (Ph. U. S. and Br.). Lichen islandicus.

Cetraric acid, set-rar'ik as'id. Bitter acid, $C_{18}H_{16}O_8$, in Cetraria islandica, to which its tonic properties are ascribed.

Cetrar'in. $C_{18}H_{16}O_8$. Bitter principle from Cetraria islandica; in white bitter crystals; employed in chlorosis, because thought to augment the number of blood-globules; also stimulates salivary, biliary, and pancreatic secretions, and hence used in chronic constipation. Dose, 1½–3 grains.

Cetyl, se'til. $C_{16}H_{33}$. Hypothetical radical of cetyl-alcohol, $C_{16}H_{34}O$, or cetyl hydrate, ethal; white crystalline substance, soluble in ether and alcohol, resulting from saponification of spermaceti.

Cevadic acid, sev-ad'ik as'id. $C_5H_8O_2$. Acid obtained from cevadilla.

Cevadilla, sev-ad-il'lah See *Veratrum sabadilla*. **C. hispano'rum**, Veratrum sabadilla.

Cevadilline, sev-ad-il'leen. $C_{34}H_{53}NO_8$. Alkaloid derived from cevadilla.

Cevadine, sev'ad-een. $C_{32}H_{49}NO_9$. Alkaloid from cevadilla. When saponified, *Cevine*, $C_{27}H_{43}NO_8$, results.

Cevine, sev'een. See *Cevadine*.

Ceylon', bad sick'ness of. Beriberi. **C. card'amom**, product of variety of Elettaria cardamomum in Ceylon. **C. cin'namon**, bark of Cinnamomum Zeylanicum. **C. moss**, edible moss from Ceylon.

Chabert's disease. Sympathetic anthrax, endemic disease of cattle.

Chærefolium, ke-re-fo'le-um. Scandix cerefolium.

Chæromania, ke-ro-man'e-ah (*chairo*, to be pleased). Gay form of insanity, called Amenomania.

Chærophyllum, ke-ro-fil'lum (*chairo*, to rejoice, *phullon*, leaf). Scandix cerefolium. **C. angula'tum**,

C. sylvestre. **C. anthris'cus,** C. vulgaris. **C. aromat'icum,** musk chervil; diuretic. **C. cerefo'lium,** Scandix cerefolium. **C. monog'ynum,** C. sylvestre. **C. odora'tum,** sweet cicely; has aromatic smell of aniseed. **C. sati'vum,** scandix. **C. sylves'tre,** *Bastard hemlock, Wild chervil,* or *Cow-weed;* slightly fetid aromatic. **C. tem'ulum,** Chærophyllum sylvestre. **C. verticilla'tum,** C. sylvestre.

Chæte, ke'te. Hair of the head. Capillus.

Chætosis, ke-to'sis (*chaite,* hair). Bristliness of the hair.

Chafeweed. Gnaphalium.

Chaff bone. Lower jaw.

Cha'fing. Fret, gall of the skin. Red excoriations occurring in consequence of friction of parts—intertrigo—or between folds of the skin, especially in fat or neglected children. Washing with cold water and dusting with hair-powder is the best preventive.

Cha'gres fe'ver. Pernicious fever, malarial or yellow fever, of that locality.

Chag'ual gum. Chilian gum from Pourretia lanuginosa.

Chair, obstet'ric. Labor chair. **C., whirl'ing,** chair in which insane are placed, made to revolve with great rapidity, as a tamer in furious mania.

Chairamine, chair'am-een. $C_{22}H_{26}N_2O_4$. Alkaloid from Remijia Purdiana bark.

Chairomania, chair-o-man'e-ah. Chæromania.

Chalacium, kal-ah'se-um. Chalazion.

Chalasis (kal'as-sis) or **Chalasmus,** kal-az'mus (*chalao,* to relax). Relaxation; atony; separation of cornea from sclerotic; obstruction of pupil by iris.

Chalasodermia, kal-as-o-dur'me-ah. Chalastodermia.

Chalastic, kal-as'tik. Medicine for removing rigidity of fibres. Emollient or relaxant; laxative.

Chalastodermia (kal-as-to-dur'me-ah) or **Chalasoder'mia** (*chalastos,* relaxed, *derma,* skin). Abnormal extension and relaxation of the skin.

Chalaza (kal-az'ah), **Chala'zion, Chala'zium,** or **Chalazo'sis** (*chalaza,* hail). Tarsal tumor, tarsal or Meibomian cyst. Hard, round, transparent tumor, developed in different parts of the body, especially the eyelids. Cicatricula of egg, or more dense internal layer of albumen, which adheres to the yolk and is continued, in spiral twisted bands, toward the extremities of the egg.

Chalaziferous membrane, kal-az-if'er-us mem'brane. In egg, membrane to which chalaza is connected.

Chala'zion. Chalaza. Meibomian cyst.

Chalazonephritis, kal-az-o-nef-re'tis. Kidney, Bright's disease of.

Chalazosis, kal-az-o'sis. Chalaza.

Chalcanthum, kal-kan'thum. Ink; see *Atramentum;* iron sulphate. **C. al'bum,** zinc sulphate.

Chalcoïdeum, kal-ko-e'de-um (**Os**). Cuneiform bone.

Chalice (chal'is) **flower.** Narcissus pseudonarcissus.

Chalicosis, kal-e-ko'sis (*chalix,* pebble). Deposit of dust in lung; stone-cutter's phthisis; fibroid phthisis; see *Pneumoconiosis.*

Chalini, kal'in-e. See *Lip.*

Chalinoplas'ty (*chalinos,* frænum, *plasso,* to form). Operation for forming new frænum; plastic operation on corner of mouth.

Chalk, chawk. Creta. **C. eat'ing,** see *Limosis.* **C. and gum band'age,** form of immovable apparatus or bandage made by adding boiling water to equal parts of gum arabic and precipitated chalk. **C. mix'ture,** mistura cretæ. **C., precip'itated,** Creta præcipitata. **C., prepared,** Creta præparata. **C., red,** Rubrica febrilis. **C. stones,** calculi, arthritic.

Chalmoo'gra. Chaulmoogra.

Chalybeate, kal-ib'e-at (*chalups,* iron or steel). Ferruginous, martial, ferrated; of or belonging to iron; containing iron, as chalybeate tonic.

Chalybis rubigo, kal'ib-is ru-be'go (rust of steel). Ferri subcarbonas.

Chalybocrenæ, kal-ib-o-kra'ne (*chalyps, krene,* a spring). Waters, mineral (chalybeate).

Chalybopegæ, kal-ib-o-pa'ge (*chalyps, pege,* a spring). Waters, mineral (chalybeate).

Chalyps, kal'ips (*chalups,* steel). Steel; protocarburet of iron. As a medicine steel does not differ from iron. **C. tartariza'tus,** ferrum tartarizatum.

Chama, kam'ah. Yawning, gaping.

Chamæ, kam'e (*chamai,* on the ground). In composition, on the ground.

Chamæacte, kam-e-ak'te (*chamæ, akte,* elder tree). Sambucus ebulus.

Chamæbatos, kam-e'bat-os (*chamæ, batos,* bramble). Fragaria. Rubus.

Chamæcedrus, kam-e'sed-rus (*chamæ, kedros,* cedar). Artemisia santonica.

Chamæcissus, kam-e-sis'sus (*chamæ, kissos,* ivy). Glechoma hederacea.

Chamæclema, kam-e-klem'ah (*chamæ, klema,* a shoot). Glechoma hederacea, Nepeta glechoma. **C. hedera'cea,** Glechoma hederacea.

Chamæconchus, kam-e-kon'kus. Having orbital index of 80° or less.

Chamæcranius, kam-e-kran'e-us (*chamæ, cranium,* skull). Term applied to skulls having ratio of length to height from 59.6 to 74.5.

Chamæcyparissus, kam-e-sip-ar-is'sus (*chamæ, kuparissos,* cypress). Artemisia santonica.

Chamædolichocephalous, kam-e-dol-ik-o-sef'al-us. Both chamæcephalous and dolichocephalous.

Chamædrops, kam-e'drops. Teucrium chamædrys.

Chamædrys, kam-e'dris (*chamæ, drus,* the oak). Rubus chamæmorus, Teucrium C., veronica. **C. inca'na marit'ima,** Teucrium marum. **C. ma'rum,** Teucrium marum. **C. mi'nor re'pens,** Teucrium C. **C. officina'lis,** Teucrium C. **C. palus'tris,** Teucrium scordium. **C. scor'dium,** Teucrium scordium. **C. spu'ria,** Veronica officinalis. **C. vulga'ris,** Teucrium C.

Chamælæa, kam-e-le'ah (*chamæ, elaia,* olive tree). Daphne alpina.

Chamælæagnus, kam-e-le-ag'nus. Myrica gale.

Chamæleon album, kam-e'le-on al'bum (*chamæ, leon,* lion). Carlina acaulis; Atractylis gummifera.

Chamæleuce, kam-e-loo'se (*chamæ, leukos,* white). Tussilago.

Chamælinum, kam-e'lin-um (*chamæ, linon,* flax). Linum catharticum.

Chamælirin, kam-e'lir-in. Bitter glucoside from Chamælirium luteum; cardiac depressant.

Chamælirion (kam-e-lir'e-on) or **Chamælirium luteum,** kam-e-lir'e-um lu'te-um (*chamæ, leirion,* lily). *Devil's bit, Blazing star, Unicorn root;* indigenous; remedial properties have been assigned to it in leucorrhœa, amenorrhœa, and dysmenorrhœa.

Chamæmelum, kam-e-me'lum (*chamæ, melon,* apple). Anthemis nobilis. **C. chrysan'themum,** Leucanthemum vulgare, **C. fœt'idum,** Anthemis cotula. **C. no'bile,** Anthemis nobilis. **C. odora'tum,** Anthemis nobilis. **C. vulga're,** Matricaria chamomilla.

Chamæmesocephalous, kam-e-mes-o-sef'al-us. Being both chamæcephalous and mesocephalous.

Chamæmorus, kam-e'mor-us (*chamæ, morea,* mulberry tree). Teucrium chamæpitys, Rubus chamæmorus. **C. Norweg'ica,** Rubus chamæmorus.

Chamæopisthius, kam-e-o-pis'the-us (*chamæ, opisthios,* behind). Term applied to skulls having angle of 17° to 24.5° formed between line from hormion to lambda and radius fixus.

Chamæpeuce, kam-e-pu'se (*chamæ, peuke,* pine). Camphorosma monspeliaca.

Chamæpitys, kam-e'pit-is (*chamæ, pitus,* pine). Teucrium chamæpitys. **C. anthyl'lus,** Teucrium iva, Ajuga iva. **C. Monspeliaca** or **moscha'ta,** Teucrium iva, Ajuga iva.

Chamæplion, kam-e'ple-on. Erysimum; sissymbrium.

Chamæprosopic, kam-e-pros-o'pik (*chamæ, prosopon,* face). Having a low face.

Chamærhaphanus, kam-e-raf'an-us (*chamæ, rhaphanis,* radish). Upper part of root of apium.

Chamærops serratula, kam-e'rops ser-rat'u-lah (*chamæ, rops,* shrub). Saw palmetto; farina is prepared from the roots.

Chamber, chame'bur. Term used in speaking of the eye, in which are two chambers, anterior and posterior. The *anterior* is the space between the cornea and anterior part of iris; *posterior* was formerly described as the space between the iris and anterior surface of crystalline; but the only space to be called the posterior chamber is a narrow chink between the peripheral part of the iris, the suspensory ligament, and the ciliary processes. They are filled with aqueous humor, and communicate by the opening of the pupil. **C., larynge'al,** cavity of larynx.

Chamomile, kam'o-mile. Anthemis nobilis. **C., dog's,** Anthemis cotula, Matricaria chamomilla. **C., dy'er's,** Anthemis tinctoria. **C., Eng'lish,** Anthemis nobilis. **C. flow'ers,** Anthemis nobilis. **C., Ger'man,** Matricaria chamomilla. **C., Ro'man, C., Scotch,** Anthemis nobilis. **C., Span'ish,** Anthemis pyrethrum. **C., stink'ing,** Anthemis cotula. **C. tea,** Infusum anthemidis. **C., wild,** Anthemis cotula, Matricaria glabrata.

Chamomilla, kam-o-mil'lah. Chamomile, Anthemis nobilis. **C. fœt'ida,** Anthemis cotula. **C. ma'jor** or **no'bilis,** Anthemis nobilis. **C. nos'tras,** Matricaria chamomilla. **C. officina'lis** or **officina'rum,** Matricaria chamomilla. **C. Roma'na,** Anthemis nobilis. **C. silves'tris** or **vulga'ris,** Matricaria chamomilla. **C. spu'ria,** Anthemis cotula. **C. vulga'ris,** matricaria.

Champooing, sham-poo'ing. Shampooing.

Chance'bone. Ischion.

Chancela'gua. Canchalagua.

Chancre, shank'er (from *cancer*). *Shanker.* Sore arising from direct application of venereal virus; hence almost always seated, in men, on the penis. Term now applied to syphilitic chancre, the initial lesion of syphilis; while the simple non-infecting sore is now called a *chancroid.* The following table shows the situation of chancres and of the enlarged glands in relation with them (Culver and Hayden):

The Locations of Chancre.

Chancres of the genital organs, of the integument in their immediate neighborhood, or of the anus.	Inguinal glands.
Chancres of the lips and chin.	Submaxillary glands.
Chancres of the tongue.	Subhyoid glands.
Chancres of the eyelids.	Pre-auricular glands.
Chancres of the fingers.	Epitrochlear and axillary glands.
Chancres of the arm and breast.	Axillary glands.

The following characteristics distinguish chancre from chancroid:

Differential Diagnosis of Chancre and Chancroid.

Chancre.	*Chancroid.*
Has a period of incubation; generally two to three weeks.	Has no period of incubation.
Is usually single.	Is usually multiple.
Looks like superficial erosion.	Is "punched out" and excavated in appearance.
The edges are sloping.	The edges are undermined.
The floor is smooth, red or copper-colored.	The floor is uneven and "worm-eaten."
The secretion is serous and rather scanty.	The secretion is purulent, copious, and auto-inoculable.
The induration is cartilaginous and sharply limited.	There is no induration, but the sore may be surrounded by a zone of œdematous infiltration, not sharply limited.
The neighboring lymphatic glands are indurated, painless, freely movable beneath the skin, not matted together, and rarely suppurate.	If the neighboring lymphatic glands are involved, they form an inflamed, painful mass, which usually suppurates; the skin becomes red, tender, and hot.

Chancres have been classified into two varieties: *hard* — indurated, Hunterian, infecting, ulcus venereum durum or syphiliticum; *soft* — non-indurated, ulcus venereum molle. *Mixed chancre* is one existing in an individual who has at the same time gonorrhœa, soft chancre, and syphilis. *Serpiginous chancre* is a venereal or phagedenic sore, extending from several points, in form of portions of circles. The French use the word chancre, in popular language, for cancerous ulcers, malignant aphthæ of children, etc. Formerly the terms caroli and caries pudendorum were used for venereal pustules or sores on the parts of generation. See *Syphilis.*

Concealed or *masked chancre* is one situate in the urethra or vagina or os uteri, and supposed to give occasion to gonorrhœa virulenta. The term chancre is also applied to corroding ulcer, tartar of teeth, carbuncle of tongue in animals, ulcer of mucous membrane of nose.

Chancre, concealed. See *Chancre.* **C., hard,** see *Chancre.* **C., Hunter'ian,** see *Chancre.* **C., in'durated,** see *Chancre.* **C., infect'ing,** see *Chancre.* **C., masked,** see *Chancre.* **C., mixed,** see *Chancre.* **C., phageden'ic,** erosive chancroid with a tendency to extend; see *Phagedenic.* **C., serpig'inous,** a variety of phragedenic chancre which appears to creep around in curved lines; see *Chancre.* **C., soft,** see *Chancre.*

Chancroid, shan'kroid (*chancre, eidos,* resemblance). Soft, suppurating ulcer. (For the differential characteristics of chancroid and chancre, see *Chancre.*) **C., diphtherit'ic,** a chancroid incrusted with lymph.

Chancroid'al. Relating to chancroid. **C. bu'bo,** local chancroidal ulcer of the groin, present in about one-third of the cases of chancroidal disease. **C. ul'cer,** chancroid.

Chancrous, shan'krus. Resembling or relating to chancre.

Change of life. Period of life when the menses cease; see *Menopause* and *Menses.*

Channel, chan'el. Canal. **C., jug'ular,** space for jugular vein between levator humeri and sternomaxillaris muscles in lower animals. **C., lymph,** lymph sinus. **C., lymphat'ic** or **plasmat'ic,** serous canaliculi; see *Canaliculi.*

Chan'nelled. Canaliculate.

Chantran'sia rivula'ris. Species of algæ in European rivers, used for asthma and tuberculosis, and applied externally to wounds, fractures, burns, etc.

Chap. Superficial abrasion of the skin, the process being called *chapping;* see *Rhagades.* The jaw.

Character, kar'ak-tur (mark or impression). In pathology, stamp or appearance; special nature or history of a disease; that which distinguishes one individual from another as regards his understanding and passions. See *Symbol.*

Charantia, kar-an'she-ah. Momordica elaterium.

Char'as. Churrus.

Charbon (F., charbon). Gangrenous swelling; carbuncle; anthrax.

Charcoal, char'kole. Carbo, carbo ligni. **C., an'imal,** carbo animalis. **C., blood,** animal charcoal derived from carbonizing dried blood with carbonate of potassium, and washing product with water. **C., bone,** charcoal from bones of animals. **C. poul'tice,** cataplasma carbonis. **C. res'pirator,** see *Respirator.* **C., veg'etable,** see *Carbo.*

Charcot's (shar'ko's) **arthrop'athy.** C.'s disease. **C.'s crystals, Charcot-Ley'den crystals,** or **Charcot-Neu'mann crystals,** crystals of phosphoric acid and albuminous matter detected in sputum of asthmatic patients, in phthisis and fibrinous and acute bronchitis, in the spleen and other parts, and in semen—phosphate of spermine—in leucæmia, etc. **C.'s disease,** sclerosis of spinal cord occurring in scattered patches; lateral amyotrophic sclerosis. Term also applied to an affection of the joints, *Charcot's arthropathy* or *joint disease,* especially of the knee-joint, tabetic arthropathy; in locomotor ataxy, ataxic arthropathy. **C.-Robin crystals,** crystals forming in the blood from a leucæmic patient if allowed to stand a few days.

Chardonin, char'don-in. Bitter substance of Carduus benedictus.

Charistolochia, kar-is-to-lok'e-ah. Artemisia vulgaris.

Charlatan, shar'lat-an ([I.] *ciarlare*, to talk much). Circulator, quack, empirical pretender, empiric. Originally, itinerant vender of a medicine, to which he attributed marvellous properties. By extension, any one who endeavors to deceive the public by passing himself off as more skilful than he really is.

Charlatanry, shar'lat-an-re. Conduct or action of a charlatan; quackery, empiricism.

Charlock, char'lok. Sinapis arvensis.

Charm (*carmen*, verse, because charms often consisted of verses). Trick, spell, enchantment. Sort of magic or superstitious practice, consisting of words, characters, etc., by which it was believed individuals might be struck with sickness or death, or be restored to health.

Charpie, shar-pe' ([L.] *carpo*, to pluck). Linteum.

Charta, char'tah (paper). Paper medicated for therapeutic purposes. **C. antiarthrit'ica,** gout paper. **C. antirheumat'ica,** gout paper. **C. arsenica'lis,** arsenical cigarettes. **C. atropisa'ta,** fine paper containing solution of sulphate of atropia, to place on the eyelid, just as **C. calabar'ica,** paper similarly treated with extract of physostigma, is used. **C. canthar'idis** (Ph. U. S.), cantharides or blistering paper, made of ol. olivæ., terebinthina canadensis, cantharides pulv., water; intended as a convenient substitute for common blistering plaster. **C. cera'ta,** fine paper coated with thin layer of wax. **C. epispas'tica** (Ph. Br.), C. cantharidis. **C. nitra'ta** or **C. potas'sii nitra'tis** (Ph. U. S.), paper with potassium nitrate, which is burnt for relief of asthma. **C. resino'sa,** C. antirheumatica. **C. sina'pis** (Ph. U. S. and Br.) or **sinapisa'ta,** mustard paper (made of *sinapis nigra* and *liquor guttæ perchæ*, on stiff paper, four inches square, and dry). This is intended as a substitute for mustard plaster. Before application to the skin the mustard paper must be dipped for about fifteen seconds in warm water. **C. vesicato'ria,** see *Sparadrapum vesicatorium*. **C. virgin'ea,** amnion.

Chartaceous, char-ta'she-us. Paper-like.

Chartæ, char'ta. Class of preparations officinal in the British and U. S. Pharmacopœias, for convenience of external application. See *Charta cantharidis*, etc.

Chartazinc, char'ta-zink. Tissue-paper impregnated with zinc oleate.

Chartreuse (shar-truse'), **liqueur de.** Celebrated cordial elixir; see *Arquebusade, eau d'*.

Chartula, chart'u-lah. Small paper; paper in which medicine is enclosed.

Chasch'isch. See *Cannabis*.

Chasme, kas'me. Yawning; spasm of the respiratory muscle.

Chas'saignac's drain'age tube. Tube of small calibre with numerous perforations near one end. **C.'s opera'tion,** operation for excision of the shoulder-joint, in which the biceps tendon is not divided.

Chaste'tree. Vitex.

Chaudepisse, shode-pese ([F.] *chaud*, hot, *pisser*, to pass water). Gonorrhœa.

Chaule. Maxillary bone.

Chaulmoogra (chawl-moo'grah) or **Chaulmu'gra.** Fruit of Gynocardia odorata, chaulmoogra, ord. Capparideæ, of India. Bland fixed oil is obtained by expressing the dried seed, which is used by the natives in leprosy. Seed are given internally, in the dose of about ʒss in the day, and the eruption is rubbed with the oil. The oil is also used externally in psoriasis and internally in consumption, scrofula, rheumatism, and syphilis. *Gynocardic acid* is the active principle.

Chaussier's (sho'se-a's) **tube.** Tube resembling a catheter in shape, employed in artificial respiration of children.

Cha'vel. Maxillary bone.

Chavica (chav'ik-ah) **betle.** Betel. **C. officina'rum,** Piper officinarum. **C. Roxburgh'ii,** Piper longum.

Chavicic acid, chav-is'ik as'id. Acid obtained from chavicine.

Chavicine, chav'is-een. Alkaloid of pepper.

Chaw'bone. Maxillary bone.

Chaw'ing (Sax. ceopan; G. *kauen*, to chew). Mastication.

Check lig'aments. Odontoid ligaments.

Check'en. Cheken.

Checkerberry, chek'er-ber-re Arbutus uva ursi; Mitchella repens.

Cheek (A. Sax. *ceac*) (gena). Sides of the face. **C. bone,** malar bone. **C. teeth,** molar teeth.

Cheese (A. Sax. *cyse*). An aliment prepared from caseous and oleaginous parts of milk. Fresh cheeses owe their chief medical properties to the immediate principle, essentially cheesy, to which the name *caseum* or *casein* has been applied. Those recently salted are digested with comparative facility. The flavor of cheese is owing to an ammoniacal caseate. Cheese itself is not easy of digestion, although it may stimulate the stomach to greater exertion, and thus aid the digestion of other substances. **C. bacil'lus,** spirillum tyrogenum; tyrotoxicon. **C., cottage,** *Pot cheese*, a cheese always eaten perfectly fresh; see *Cheese*. **C., poison,** a poison generated by microorganisms; see *Ptomaines* and *Tyrotoxicon*. **C., pot,** see *Cheese*. **C. ren'net,** Galium verum. **C., smear'case** (G. *schmierkäse*), preparation of curds used as food.

Cheese'lope (A. Sax. *cerelob*, curdled milk). Rennet.

Chee'sy. Having the nature of cheese. **C. degenera'tion,** somatic cheese-like metamorphosis. See *Degeneration*.

Cheilalgia, kile-al'je-ah (*cheilo*, *algos*, pain). Pain in the lip.

Cheilitis, kile-e'tis (*cheilo*, *itis*, denoting inflammation). Inflammation of the lip.

Cheilo, kile'o (*cheilos*, lip). In composition, lip.

Cheiloangioscopy, kile-o-an-je-os'ko-pe (*cheilo*, *angeion*, blood-vessel, *skopeo*, to examine). Microscopic examination of the circulation of the lips.

Cheilocace, kile-ok'as-e (*cheilo*, *kakos*, evil). Disease characterized by swelling, induration, and slight redness of the lips without inflammation; also the thickness of the upper lip of scrofulous children. See *Stomacace* and *Cancer aquaticus*.

Cheilocarcinoma (kile-o-kar-sin-o'mah) or **Chileocarcino'ma.** Cancer of the lip.

Cheilodiæresis, kile-o-de-a're-sis (*cheilo*, *diairesis*, partition). Hare-lip.

Cheilogenioschesis, kile-o-jen-e-os'kis-is. Fissure of the lip and alveolar process.

Cheilomalacia, kile-o-mal-ah'she-ah (*cheilo*, *malakos*, soft). Cancer aquaticus; stomacace.

Cheilon, kile'on. Inflammatory swelling of the lips; one who has a thick lip.

Cheiloncus, kile-on'kus (*cheilo*, *onkos*, swelling). Cheilophyma; swelling of the lip.

Cheilophyma, kile-o-fe'mah (*cheilo*, *phuma*, tumor). Cheiloncus.

Cheiloplastice, kile-o-plas'tis-e (*cheilo*, *plastikos*, forming). Operation for an artificial lip.

Cheiloplasty, kile'o-plas-te. Cheiloplastice.

Cheilopom'pholyx. Dysidrosis Disease of the sweat-glands of the hands and feet; vesicular and bullar skin disease.

Cheilorrhagia, kile-or-rhah'je-ah (*cheilo*, *rhegnumi*, to break forth). Hemorrhage of the lips.

Cheilos, kile'os (*cheilo*, lip). Lip.

Cheiloschisis, kile-os'kis-is (*cheilo*, *schisis*, a splitting). Hare-lip.

Cheilostomatoplasty, kile-o-sto'mah-to-plas-te (*stoma*, mouth, *plasso*, to form). Plastic operation for forming the mouth after removal of the lower lip.

Cheilosyncleisis, kile-o-sin-kli'sis (*cheilo*, *sun*, together, *klino*, to incline). Congenital adhesion of the labia majora; otherwise named cellular atresia of the vulva.

Cheima, ki'mah. Cold.

Cheimetlon, ki-met'lon (*cheima*, winter, *tlao*, to suffer). Chilblain.

Cheimia, ki'me-ah (*cheimie*, wintry cold). Rigor.

Cheir, kire (hand). Manus. See *Chir*.

Cheiragra, kire'ag-rah (*agra,* seizure). Chiragra.

Cheiranthus cheiri, kire-an'thus ki're (*cheir,* hand, *anthos,* flower). Systematic name of the common yellow wall-flower; flowers have been esteemed nervine, narcotic, and deobstruent.

Cheirapsia, kire-ap'se-ah (*cheir, hapto,* to touch). The action of rubbing or scratching; troublesome symptom in the itch.

Cheirarthrocace, kire-ar-throk'as-e (*cheir, arthron,* joint, *kakia,* evil). Inflammation of articular surfaces of wrist.

Cheiriater, kire'e-ah-tur (*cheir, iatros,* physician). Surgeon.

Cheirisma (kire'iz-mah), **Cheiris'mus,** or **Cheiris'mos.** Any manual operation.

Cheirixis, kire-iks'is. Surgery.

Cheiroplethes, kire-o-pla'thes (*cheir, pletho,* to fill). Fasciculus.

Cheiropompholyx, kire-o-pom'fol-iks (*cheir,* hand, *pompholux,* small vesicle). Bullous eruption on the hands and feet. Dysidrosis.

Cheiropterygium, kire-o-ter-ij'e-um (*cheir, pterugion,* little wing). The typical five-fingered limb.

Cheirosis, kire-o'sis (*cheiroo,* to subdue). Subactio.

Cheirostemon platanoïdes, kire-o-stem'on plat-an-o-i'dees. Mexican plant; hand-flower tree.

Chekanine, chek'an-een. Volatile alkaloid obtained from leaves of Myrtus cheken.

Chek'en, Chek'an. Leaves and root of Chilian Myrtus chekan, used in catarrh of mucous membranes; diuretic and expectorant.

Chela, ke'lah (*chele,* claw, hoof, etc.). This word has several significations. *Chela,* a forked probe used for extracting polypi from the nose. *Chelæ,* chaps or cracks on the feet, organs of generation, etc. *Chelæ* likewise means claws, especially those of the crab; see *Cancrorum chelæ.*

Chelæ (ke'le) **palpebra'rum.** See *Tarsus.*

Chelapa, kel-ah'pah. Convolvulus jalapa.

Chele, ke'le. Chela.

Chelerythrine, kel-er'ith-reen. Alkaloid of chelidonium.

Chelidon, kel'id-on (*chelidon,* the swallow). Hollow at the bend of the arm.

Chelidonia rotundifolia (kel-id-o'ne-ah ro-tun-de-fo'le-ah) **minor** (*chelidon,* the swallow). So called because its flowering coincides with the return of the swallow; Ranunculus ficaria.

Chelidonine, kel-id'on-een. Alkaloid of Chelidonium majus.

Chelidonium, kel-id-o'ne-um. Bryonia alba. **C. diphyl'lum,** Stylophorum diphyllum. **C. hæmato'des,** C. majus. **C. ma'jus,** ord. Papaveraceæ. Chelidonium (Ph. U. S.); celandine; root and recent plant have been considered aperient and diuretic; externally, the juice has been employed in cutaneous diseases. **C. mi'nus,** Ranunculus ficaria.

Chelis, ke'lis. Kelis.

Cheloid, ke'loid (*chelus,* tortoise, *eidos,* resemblance). Cancroid; keloid.

Cheloïdes, kel-o-e'des. Keloid.

Chelois, kel'o-is. See *Cancroid.*

Cheloma, kel-o'mah. Keloid.

Chelone, kel-o'ne. Instrument for extending a limb; so called because in its slow motions it resembles a tortoise; see *Testudo.* **C. glab'ra,** *Common Snakehead, Turtlehead, Turtlebloom, Shellflower, Balmony.* Indigenous plant, blossoming from July to November; leaves are bitter and tonic; without any aromatic smell, and with very little astringency.

Chelonia mydas, kel-o'ne-ah me'das. Green turtle. This species of turtle abounds on the coast of Florida. It is the one so prized by the epicure.

Chelonion (kel-o'ne-on) or **Chelo'nium** (*chelone,* tortoise). Upper, gibbous part of the back, so called from its resembling in shape the shell of the tortoise. Scapula.

Chelonophagi, kel-o-nof'ah-je (*chelone,* tortoise, *phago,* to eat). Ancient name for certain tribes who dwelt on the coast of the Red Sea, and who lived only on tortoises.

Chel'tenham salts. Sometimes made from the waters; at others factitiously, in imitation of the celebrated purgative Cheltenham waters of England.

Chelys, ke'lis. Thorax.

Chelyscion, kel-is'se-on (*chelus,* thorax). Short dry cough.

Cheme, ke'me. Ancient measure equivalent to about two teaspoonfuls.

Chemeia or **Chemeutice,** kem-u'tis-e. Chemistry.

Chemia, kem-e'ah. Chemistry. **C. organ'ica,** chemistry, organic. **C. pharmaceu'tica,** see *Chemistry.*

Chemiater, kem-e'ah-tur (*chemia, iatros,* physician). Chemical physician.

Chemiatria (kem-e-ah-tre'ah) or **Chimiatri'a** (*chemia, iatreia*). The art of curing by chemical means.

Chemiatrus, kem-e-ah'trus. Chemical physician.

Chem'iatry. Medical practice based on the idea that diseases must be treated on chemical principles.

Chem'ic or **Chemical,** kem'ik-al. Relating to chemistry. **C. equa'tion,** symbolic statement of a given reaction. **C. food,** see *Ferri phosphas.* **C. med'icine,** medicine formed by the aid of chemistry, in contradistinction to Galenical medicine.

Chemicohistology, kem-ik-o-his-tol'o-je. Doctrine of organic chemistry and morphology of tissues.

Chemicophanta, kem-ik-o-fan'tah (*chemia, phaino,* to manifest). Chemist.

Chem'icus. Chemical, chemist.

Chemism, kem'izm. Abuse of chemistry in its application to the science of organized bodies. By some used synonymously with *Chemiatria.* Also, the aggregate of chemical actions appertaining to a function, as chemism of respiration.

Chemist, kem'ist. One acquainted with chemistry. In Great Britain, and occasionally in the United States, it has also the signification of "one who sells chemicals."

Chemistry, kem'is-tre (*chumos,* juice, or from Arab. *chema,* secret). *Chymistry.* Branch of the natural sciences whose object is to investigate the nature and properties of bodies, simple and compound, inorganic and organized, and to study the force or power by virtue of which every combination is effected. It investigates the action between the integrant molecules or atoms of bodies.

Organic chemistry, Chemia organica, Organochemia, is the chemistry of organized substances, animal and vegetable. *Animal chemistry, Zoöchemy* or *Zoöchymy, Zoöchemia,* is the chemistry of substances afforded by the dead or living animal body. This branch of chemistry has been further subdivided into *physiological,* when it considers the changes produced in organized bodies in health; *pathological,* when it regards those produced by organic or other diseases. *Anthropochymy, Anthropochemia,* is the chemistry of the human body. Chemistry is called *Therapeutical* or *Pharmaceutical, Pharmacochymia, Chemia pharmaceutica,* when it is engaged in the analysis of simple medicines; in improving the prescribing and preparing of chemical and Galenical medicines; in the means of preparing them and detecting adulterations, etc. *Hygienic chemistry* is that which is applied to the means of rendering habitations healthy, of analyzing the air we breathe, preventing the occurrence of disease, pointing out healthy aliments, and appreciating the influence of professions, etc. on the health of man. All these different subdivisions, with vegetable chemistry, *Phytochemistry,* are, at times, included under the head of *Medical chemistry;* at others, the term comprehends only the *animal, vegetable,* and *pharmaceutical* subdivisions. *Vital chemistry, Biochemia,* is that which is exerted under the influence of vitality. *Histochemy, Histochemia, Histochemistry,* is the chemistry of the tissues, and *Phlegmatochemy* that of the animal humors.

A knowledge of chemistry is of great importance to the physician. Many of the functions are of a chemical nature; many diseases require a chemical mode of treatment; and, without an acquaintance with it, two or more substances might be given in combination which, by forming a chemical union,

might give rise to other compounds possessing very different virtues from the components taken singly, and thus the prescriber be disappointed in the results. **Chemistry, analyt'ical,** chemistry applied to analysis of organic or inorganic bodies, especially the former. **C., an'imal,** see *Chemistry.* **C., hygien'ic,** see *Chemistry.* **C., inorgan'ic,** chemistry of substances not endowed with properties or characteristics of organized bodies. **C., med'ical,** see *Chemistry.* **C., organ'ic,** see *Chemistry.* **C., pharmaceut'ic,** see *Chemistry.* **C., therapeut'ical,** see *Chemistry.* **C., veg'etable,** see *Chemistry.* **C., vi'tal,** see *Chemistry.*

Chemolysis, kem-ol'is-is (*chemeia,* chemistry, *luo,* to loosen). Decomposition of organic bodies by inorganic agents.

Chemolytic, kem-o-lit'ik. Relating to chemolysis.

Chemosis, kem-o'sis (*cheme,* aperture, or rather, perhaps, from *chumos,* humor). *Chymosis.* Name given to ophthalmia when the conjunctiva surrounding the cornea forms a high ring, making the cornea seem, as it were, at the bottom of a well; by some, used synonymously with *ophthalmia membranarum.* It is, essentially, œdema of the subconjunctival areolar tissue. See *Ophthalmia.*

Chemotactic (kem-o-tak'tic) **ac'tion** (*chemeia,* chemistry, *taxis,* order). Chemotaxis.

Chemotax'is, kem-o-taks'is (same etymon). The property possessed by certain chemical agents of attracting leucocytes.

Chemotice, kem-ot'is-e. Chemistry.

Chemoticus, kem-ot'ik-us. Chemical.

Chenoboscon, chen-o-bos'kon (*chen,* goose, *boske,* food). Potentilla anserina.

Chenocholalic (chen-o-kol-al'ik) or **Chenocholic** (chen-o-kol'ik) **ac'id** (*chen,* goose, *chole,* bile). Acid derived from goose-bile.

Chenopodium album, chen-o-po'de-um al'bum (*chen,* goose, *pous,* foot). Lambsquarters. Ord. Chenopodiaceæ. Common garden vegetable in the United States; antiscorbutic. **C. ambrosi'acum,** C. ambrosioïdes. **C. ambrosioï'des,** Mexican or Spanish tea; infusion was once drunk as tea; has been given in paralytic cases, and in the United States is used as an anthelmintic indiscriminately with C. anthelminticum, as it is at Rio Janeiro, where it is called *Herva de Santa Maria;* in Portugal, *Herva formigueira,* and at the Azores, *Uzaidella.* **C. anthelmin'ticum,** *Wormseed, Worm goosefoot, Wormseed goosefoot, Jerusalem oak* of America, *Goosefoot, Stinkweed.* This plant grows plentifully in the United States; fruit (Chenopodium, Ph. U. S.) is much used as a vermifuge; the oil, oleum chenopodii (Ph. U. S.), in dose of 8 to 10 drops, is more frequently exhibited. **C. bo'nus Henri'cus,** *English Mercury, Allgood, Angular-leaved goosefoot, Mercury goosefoot, Good King Henry.* Leaves are emollient, and have been applied to ulcers, etc.; considered refrigerant and eccoprotic. **C. bo'trys,** Jerusalem oak (Eng.), possesses anthelmintic properties. **C. fœ'tidum,** Chenopodium vulvaria. **C. ol'idum,** C. vulvaria. **C. qui'noa,** quinua, nutritious, wholesome, and agreeable article of food with the Peruvians; the leaves, before the plant attains maturity, are eaten as spinach; the seeds are used as food. **C. sagitta'tum,** C. bonus Henricus. **C. suffructico'sum,** C. ambrosioïdes. **C. vulva'ria,** stinking orache or goosefoot; the fetid smell has occasioned it to be used as an antispasmodic and nervine.

Chenotaurocholic acid, chen-o-taw-rok'ol-ik as'id (*chen,* goose, *tauros,* bull, *chole,* bile). Acid derived from goose-bile. Chenocholalic acid.

Cheopina, che-o-pe'nah. Chopine.

Cheoplastic, che-o-plas'tik (*cheo,* to pour, *plastikos,* formative). Applied to a process for mounting artificial teeth, consisting in pouring an alloy of metals into a properly prepared matrix.

Che'quen. See *Chekan.*

Chequerberry, chek' ur-ber-re. Gaultheria. See *Checkerberry.*

Cheragra, cher'ah-grah. Chiragra.

Cheramis, cher'am-is. Cheme.

Cherbachem. Veratrum album.

Cherbas. Lactuca.

Chermes, kur'mes. Kermes. **C., min'eral,** antimonii sulphuretum præcipitatum and A. sulphuretum rubrum.

Chernibium, chur-nib'e-um. Urinal.

Cherry, cher're. See *Prunus cerasus.* **C., bird,** Prunus padus. **C., choke,** Prunus Virginiana. **C., ground,** Physalis viscosa. **C. lau'rel,** Prunus laurocerasus; the distilled leaves yield hydrocyanic acid and a volatile oil; it is used diluted to 0.05 per cent. of hydrocyanic acid; see *Prunus laurocerasus.* **C.-l. wa'ter,** aqua laurocerasi; see *Prunus laurocerasus.* **C. tree, black,** Prunus avium. **C. t., red,** Prunus cerasus. **C. t., wild,** Prunus Virginiana. **C. water,** kirschwasser. **C., wild clus'ter,** Prunus padus. **C., win'ter,** Physalis.

Chersæ, kur'se. Feces.

Chervil, chur'vil. Scandix cerefolium. **C., wild,** Chærophyllum sylvestre.

Chesis, ke'sis (*chezo,* to go to stool). Frequent desire to evacuate the bowels.

Chest (*kiste,* wicker basket). Thorax. **C., bar'rel-shaped,** peculiar formation of chest existing in chronic empyema, in which the chest resembles a barrel in shape, and moves up and down during respiration as if consisting of one piece; lateral expansion is absent. **C. ex'plorator,** see *Explorator, chest.* **C. meas'urer,** stethometer. **C. measurer, Sib'son's,** an instrument described by Dr. Sibson, which is used for determining the mobility of the chest. It is a species of spring which, when applied to the parietes of the chest, measures the modifications of its diameters, and indicates by the motion of the index hand on a dial any movement of respiration to the hundredth of an inch. **C., nar'row,** see *Lordosis.*

Chest'nut. Castanea nux. **C., horse,** Æsculus hippocastanum. **C. oak,** Quercus prinus; bark possesses marked astringent properties. **C. tree,** Fagus castanea.

Chew'ing. Mastication.

Chew-stick, chu'stik. Gonania Domingensis; so named because employed as a masticatory and dentrifice.

Cheyletes scabiei, ki-la'tees scab'e-a-e. Itch mite.

Cheyne-Stokes respira'tion, called also **Cheyne-Stokes gasp** or **Tidal-wave breathing.** A form of dyspnœa, consisting of inspirations becoming shorter, deeper, and more labored until temporarily suspended, and then resumed with the same succession. An alarming symptom, especially of heart affection, aortic disease, etc., and from cutting off of supply of arterial blood from the brain or respiratory centre in the medulla.

Chezanance, kez-an-an'se (*chezo,* to go to stool, *ananke,* necessity). Ointment composed of honey and alum, and rubbed on the anus to occasion evacuations.

Chia (ke'ah), **Chia-terra** (*Chios,* the island whence obtained). A kind of white earth. **C. seed,** fruit of Salvia Chian and S. columbariæ.

Chiacum collyrium, ke'ak-um kol-lir'e-um. Collyrium consisting of several drugs and Chian wine.

Chiadus, ke'ad-us. Furunculus.

Chian turpentine, ki'an tur'pen-tine. Turpentine obtained from bark of Pistacia terebinthinus.

Chiasm, ki'azm (*chiazo,* to mark like the letter X). Crucial union of parts, as the optic commissure or chiasm of the optic nerves.

Chiaster, ke-as'tur (*chiazo,* to mark with the letter X). Ancient figure-of-8 bandage for fracture of the patella.

Chiastometer, ke-as-tom'et-ur (*chiastos,* crosswise, *metreo,* to measure). Instrument for measuring the distance between the eyes.

Chiastus, ke-as'tus (*chiastos*). Bandage, so called because it resembles the letter X.

Chi'cha. Drink made in Peru with Indian meal dried in the sun and fermented with water, or from rice, peas, barley, etc.

Chicken-breasted, chick'en-brest'ed. Projection of sternum caused by forward curvature of vertebral column.

Chick'en-broth. When chicken-tea is boiled down one-half, with the addition of a little parsley or celery, and the yolk of an egg previously beaten up in two ounces of soft water, it forms a soup much relished by the convalescent.

Chicken cholera, chick'en kol'e-rah. Cholera of barnyard fowls. See *Bacillus choleræ gallinarum.* **C. grapes,** fruit of Vitis cordifolia. **C. pep'per,** Ranunculus abortivus.

Chick'en-pox. Varicella.

Chick'en-tea. Chicken-water. A mildly nutritious broth used in convalescence where the lightest animal diet is indicated.

Chickenwort, chick'en-wurt. Alsine media.

Chick'weed. Alsine media, Anagallis arvensis. **C., wa'ter,** Callitriche vérna.

Chic'ory (chichore). Cichorium intybus; tonic and stimulant; used to adulterate coffee, or, according to some, to improve its taste by admixture with it.

Chi'cot. Seeds of Gymnocladus Canadensis, Kentucky coffee-bean, used as substitue for coffee.

Chig'go, Chig'gre, or **Chig'oe.** See *Chique.*

Chignon (shin'yon) **fun'gus.** Growth of fungous nodules on the hair, probably due to micro-organism.

Chilalgia, kil-al'je-ah. Labial neuralgia.

Chilbladder, chil'blad-ur. Chilblain.

Chil'blain. Erythematous inflammation of the feet, hands, etc., occasioned by cold. It is very common in youth—not so in the adult or in advanced age, and is apt to degenerate into painful, indolent ulcerations. Chilblains are prevented by accustoming the parts to exposure, and are treated by stimulant, terebinthinate, and balsamic washes, ointments, and liniments.

Child. A son or daughter; infans, puer.

Child'bearing. Parturition.

Child'bed. Parturition, the state of parturiency. **C. fe'ver,** puerperal fever.

Child'birth. Parturition.

Childcrowing, child-kro'ing. Laryngismus stridulus; asthma thymicum.

Child'hood. Infancy.

Child'ill. Parturition.

Child'ing. Parturient.

Child-mur'der. Infanticide.

Chil'dren's bane. Cicuta maculata.

Chiliogramma, kil-e-o-gram'mah (*chilioi,* a thousand, *gramma,* gramme). Weight of 1000 grammes.

Chiliophyllon, kil-e-o-fil'lon (*chilioi,* a thousand, *phullon,* leaf). Achillea millefolium.

Chilisalpe'ter. Sodium nitrate.

Chilissochisorhaph'ia. Operation for the radical cure of hernia by passing scrotal integument through the inguinal ring, and attaching it to the skin of the thigh through the femoral ring.

Chilitis, kil-e'tis. Inflammation of the lip.

Chill. Rigor. **C., conges'tive,** rigor congestivus; cold stage of congestive fever. **C., dumb,** fever, masked.

Chil'li, Chil'lies. Capsicum.

Chilo, ke'lo. In composition, lip; see *Cheilo.*

Chilogramma (kil-o-gram'mah) or **Cheilogram'ma** (*cheilos, gramma,* line). Line extending downward from angle of the mouth, supposed to indicate pulmonary or cardiac disease in children.

Chi'lon (*cheilos,* lip). An inflammatory swelling of the lip; one having a thick lip.

Chiloplastice (kil-o-plas'tis-e) or **Chiloplasty,** kil'o-plas-te. Operation for restoration of lost portion of a lip.

Chiloschisma (kil-o-skiz'mah) or **Cheiloschis'ma** (*cheilos,* lip, *schisis,* a splitting). Hare-lip.

Chilostomatoplasty, kil-o-stom'at-o-plas-te (*cheilos,* lip, *stoma,* mouth, *plasso,* to form). *Chilostomatoplas'tice, Cheilostomatoplas'tice.* Surgical operation for restoring the buccal opening after the removal of epithelioma of the lower lip.

Chimaphila, chim-af'il-ah (*cheima,* winter, *phileo,* to love). Pyrola umbellata. **C. umbella'ta,** Pyrola umbellata.

Chimaphiline, chim-af'il-een. Crystalline product of aqueous distillation of wintergreen.

Chimetlum, chim-et'lum (*cheima,* winter, *tlao,* to suffer). Chilblain.

Chimia, kim-e'ah. Chemistry.

Chimiater, kim-e-at'ur (*chimia, iatros,* physician). Chemiater.

Chimiatria, kim-e-at-re'ah. Chemiatria.

Chim'ney-sweep'er's can'cer. See *Cancer, chimney-sweeper's.*

Chim'ney-weed. Lichen roccella.

Chimon, ke'mon (*cheima,* winter). Chilblain, cold.

Chin (Sax. *cyn*). Inferior and middle part of the face, below the lower lip.

China, che'nah. Cinchona (from *quinquina*). Smilax china (from *china*). **C., Amer'ican** or **West Indian,** Smilax pseudo-china. **C., calisay'a,** Cinchonæ cordifoliæ cortex. **C., coto,** plant supposed to furnish paracotoin; see *Paracotoin.* **C. grass,** delicate silky material for surgical dressing. **C. occidenta'lis,** Smilax pseudo-china. **C. orienta'lis,** Smilax china. **C. pondero'sa,** Smilax china. **C. re'gia,** Cinchonæ cordifoliæ cortex. **C. root,** Smilax china. **C. spu'ria nodo'sa,** Smilax pseudo-china. **C. ve'ra,** Smilax china.

Chinamin, chi'nam-in. Alkaloid obtained from the cultivated Indian bark of Cinchona siccarubra.

Chincapin, chin'kah-pin. Fagus castanea pumila. **C. water,** Nelumbium luteum.

Chinche, chin'cha ([S.] a bed-bug). Cimex.

Chinchina, chin-che'nah. Cinchona.

Chinchona, chin-ko'nah. Cinchona.

Chinchunchulli. Ionidium marcucci.

Chincough. Pertussis.

Chinese' galls. See Rhus semialata.

Chi'nic acid. Quinic acid.

Chinidin, chi'nid-in. Quinidia.

Chinidinum, chin-id-e'num. Quinidine.

Chininometry, chin-in-om'et-re. See *Quiniometry.*

Chininum, chin-e'num. Quinine. **C. arsen'icum,** quinine arseniate. **C. bisulphur'icum,** quinine bisulphate. **C. fer'ro-cit'ricum,** iron and quinine citrate. **C. hydrobroma'tum,** quinine hydrobromate; see *Chinium.*

Chinioidine, chin-e-oid'een (*china,* cinchona). *Chinoidine, Chinoidina, Chinoidinum* (Ph. U. S.), *Chinoidin, Quinoidine, Quinoidin, Quinodin.* Substance separated from cinchona; has been supposed to be a mixture of quinia, cinchona, and a peculiar resinous matter, but according to Liebig simply the alkaloid quinia in an amorphous state — amorphous quinia — sometimes called precipitated extract of bark. In the Ph. U. S. it is defined as a mixture of alkaloids, mostly amorphous, obtained as a by-product in the manufacture of the crystallizable alkaloids from cinchona. A fluorescent substance closely resembling quinia has been found in the animal body, and hence has been called animal chinioidine or quinoidine.

Chinium, chin'e-um. Quinine. **C. acet'icum,** quiniæ acetas. **C. arsenico'sum,** quiniæ arsenias. **C. cit'ricum,** quiniæ citras. **C. ferrocyanogena'tum,** quiniæ ferrocyanas. **C. hydrochlor'icum,** quiniæ murias. **C. hydroiod'icum,** quiniæ hydriodas. **C. lac'ticum,** quiniæ lactas. **C. muriat'icum,** quiniæ murias. **C. ni'tricum,** quiniæ nitras. **C. phosphor'icum,** quiniæ phosphas. **C. sa'litum,** quiniæ murias. **C. sulphu'ricum,** quiniæ sulphas. **C. tan'nicum,** quiniæ et cinchoniæ tannas. **C. valerian'icum,** quiniæ valerianas.

Chin-jerk. Jaw-jerk. See *Reflex.*

Chinoleinum, chin-o-le-e'num (*chinium, elaion,* oil). Chinoline. See *Leukoleinum.*

Chinoline, chin'o-leen. C_9H_7N. A tertiary amine, prepared by distillation of quinine or cinchonine, and afterward synthetized by other processes; colorless pungent liquid. Antiseptic, antipyretic, and antifermentative.

Chinquapin, chin'kah-pin. Fagus castanea pumila.

Chin'whelk. Sycosis.

Chiococ'ca anguif'uga. C. racemosa. See *Caincæ radix.*

Chiococcæ radix, che-o-kok'ke rad'iks (*chion,* snow, *kokkos,* berry). Caincæ radix.

Chioli, che'ol-e. Furunculus.

Chion, che'on. Snow.

Chionablepsia, che-on-ah-blep'se-ah (*chion,* snow, *ablepsia,* blindness). Snow-blindness.

Chionanthus Virginica, che-on-an'thus vur-jin'ik-ah (*chion,* snow, *anthos,* flower). *Fringe tree, Snowdrop tree;* indigenous; nat. ord. Oleaceæ. Infusion of the root has been used as an antiperiodic and tonic.

Chionotyphlosis, che-on-o-tif-lo'sis (*chion,* snow, *tuphlosis,* blindness). Snow-blindness.

Chionyphe (che-o'nif-e) **Carteri** (*chion,* snow, *huphe,* texture). See *Mycetoma* and *Parasites.*

Chique, sheek (S. *chigo, chiquito,* small). *Pulex penetrans, Tick, Chiggre, Chigoe, Chiggo, Chegre, Chigoë, Sikka* of Cayenne, *Bicho, Tunga* of Brazil, *Nigua* of Mexico, *Pique* of Paraguay, *Jigger.* Small insect in America and the Antilles, which gets under the epidermis and excites great irritation.

Chir, kir (hand). See *Cheir.*

Chirades (kir'ad-es) or **Cheir'ades.** Chaps of the hand.

Chiræta, kir-e'tah. Gentiana chirata.

Chiragra (kir'ah-grah) or **Cheir'agra** (*chir, agra,* seizure). Gout in the hand.

Chirapotheca, kir-ap-o-tha'kah (*chir, apotheke,* store, closet). Arsenal.

Chirapsia, kir-ap'se-ah (*chir, hapto,* to handle). Friction.

Chirarthritis, kir-ar-thre'tis (*chir, arthron,* joint, *itis,* inflammation). Inflammation of the joints of the hand.

Chirarthroc'ace. See *Cheirarthrocace.*

Chirata (chir-at'ah), **Chirayi'ta, Chiray'ta,** or **Chiretta,** kir-et'tah. Gentiana chirayta.

Chiratin, kir-at'in. Bitter principle of chirata.

Chirheuma, kir-oo'mah. Chirrheuma.

Chiriater, kir-e-at'er (*chir, iatros,* physician). Surgeon.

Chiriatria, kir-e-at-re'ah. Surgery.

Chirimoya, kir-e-moy'ah. Anona tripetala.

Chirisis, kir'is-is (*chir,* hand). Surgery.

Chirismus, kir-iz'mus. Surgery.

Chirixis, kir-iks'is (*cheirixis*). Surgery.

Chiro, kir'o (*cheir,* hand). In composition, hand.

Chirocyrtosis, kir-o-sur-to'sis (*chiro, kurtosis,* crookedness). Crookedness of the hand.

Chiromancy, ki'ro-man-se (*chiro, manteia,* divination). Palmistry; art of divining by inspection of the hand.

Chiromania, kir-o-man'e-ah (*chiro, mania*). Masturbation.

Chiromantia, kir-o-man-te'ah. Chiromancy.

Chironax, kir-o'nax (*cheironax,* from, *chir,* hand). Surgeon.

Chironia, kir-o'ne-ah (after Chiron, the Centaur, who is said to have discovered its use). Genus of plants, ord. Gentianaceæ. Also, Tamas communis. **C. angula'ris,** *American centaury, Rosepink, Wild succory, Bitterbloom, Centry.* Every part of this plant is a pure and strong bitter, which property is communicated alike to alcohol and water; tonic and stomachic. **C. centau'rium,** *Smaller* or *lesser centaury, European centaury.* Tops of the lesser centaury, *Centaurii cacumina,* are aromatic and tonic, and are sometimes employed as such. **C. Chilen'sis,** *Chachinlagua, Chancelagua.* Very bitter plant, indigenous in Chili. Possesses the virtues of the *Chironeæ.*

Chironian ulcer, kir-o'ne-an ul'sur. Chironium.

Chironium (kir-o'ne-um), **Cheironei'on** (*cheiron,* bad, malignant). An ulcer difficult of cure—of a swollen, hard, and callous nature, Chironian ulcer; perhaps from Chiron the Centaur, who was unable to cure such ulcers, or was affected with them.

Chironomia, kir-o-nom'e-ah. Cheironomia.

Chiropodalgia, kir-o-po-dal'je-ah (*chiro, pous,* foot, *algos,* pain). Painful affection of the wrist and ankles. See *Acrodynia.*

Chiropodist, kir-op'o-dist (*chiro, pous,* foot). One who treats diseases of the hands and feet, or rather whose profession it is to remove corns and bunions.

Chirop'odistry, kir-op'o-dis-tre. Medical or surgical treatment of hands and feet.

Chirorrheuma, kir-or-rhu'mah. Rheumatism of the hands.

Chirosis, kir-o'sis (*cheiroo,* to subdue). Operation of making plasters, extracts, etc. with the hand, or with the pestle and mortar.

Chirostrophosis, kir-o-strof-o'sis (*chiro, strepho,* to turn). Distortion of the hand.

Chirotheca, kir-o-the'kah (*chiro, theke,* sheath). Bandage for the hand. A kind of bandage in which the fingers and hand are enveloped in spiral turns. When the whole hand and fingers are covered, it is called the *double* or *complete;* and when only a finger is covered, the *half* or *incomplete.* See *Gantelet.*

Chirotribia, kir-o-trib'e-ah (*chiro, tribo,* to rub). Friction with the hand; according to others, dexterity in an art.

Chirrheuma, kir-rhu'mah (*chir, rheuma,* flux). Rheumatism of the hand.

Chirurgeon, kir-ur'jun. Surgeon.

Chirurgi physici, kir-ur'je fiz'is-e. See *Surgeon.*

Chirurgia, kir-ur'je-ah (*chir, ergon,* work). Surgery. **C. anaplas'tica,** restoration of lost parts. **C. curto'rum,** restoration of lost parts. **C. infuso'ria,** infusion of medicines. **C. milita'ris,** surgery, military. **C. transfuso'ria,** transfusion.

Chirurgical, kir-ur'jik-al. Surgical.

Chirurgicus, kir-ur'jik-us. Surgical.

Chirurgus, kir-ur'jus. Surgeon.

Chi'rurgy. Surgery.

Chist. Arabic word signifying the sixth part; sixth part of the congius or gallon.

Chitine, chit'een (*chiton,* a covering). The substance forming the exterior surface of crustaceæ and insects.

Chiton, che'ton. Tunic.

Chitoniscus, chit-on-is'kus (dim. of **Chiton**). Indusium.

Chittem- (chit'tem) or **Chit'tim-bark.** Bark of Rhamnus purshianus.

Chittramoo'lum. Plumbago Zeylanica.

Chium vinum, che'um ve'num (from Chios, the island where it was produced). Chian wine, used by the physicians of antiquity in cases of defluxions and ophthalmiæ.

Chives. Allium Schœnoprasum, a variety of garlic.

Chliaros, kle'ar-os (tepid). Name anciently given to slight fevers.

Chliasma, kle-az'mah. A tepid and moist fomentation.

Chloasma, klo-az'mah (*chloos,* greenish-yellow color, verdure). *Liverspot, Mothpatch.* Cutaneous affection characterized by one or more broad, irregular-shaped patches, of a yellow or yellowish-brown color, occurring most frequently on the front of the neck, breast, abdomen, and groins. The patches do not generally rise above the surface. There is usually some degree of itching. A cryptogamous growth has been found in it, called *Microsporon furfur,* also *Epidermophyton.* The causes are not very evident. Sulphur internally—in any and every form—generally removes it speedily. Should there be difficulty, the external use of the remedy in baths or fumigations may succeed. A form of chloasma or of pityriasis versicolor called *Mal de los Pintos, Pinta, Quiricua,* and *Tinna* occurs in Mexico. **C. al'bum,** achroma. **C. gravida'rum,** discoloration of pregnancy. **C. hepat'icum,** discoloration due to liver disorder. **C. tox'icum,** C. from impregnation from infusion through medium of the circulation. **C. traumat'icum,** C. from undue pressure, etc. of parts. **C. vulga're,** C. hepaticum. The term is sometimes applied to tinea versicolor.

Chlora, klo'rah. Chlorine.

Chloracetic acid, klor-as-e'tik as'id. Caustic somewhat similar in its action to nitric acid, producing a rapid and deep cauterization; formed by the action of chlorine on acetic acid, the latter losing one equivalent of hydrogen and taking chlorine in its place. The salts are *Chloracetates.*

Chloracetization, klor-a-se-tiz-a'shun. Local anæsthetization by means of chloracetic acid.

Chloræmia, klor-e'me-ah (*chloros,* green, *haima, blood*). Green sickness; chlorosis.

Chloral, klo'ral (Ph. U. S. and Br.). C_2HCl_3O,H_2O. Substance formed by the prolonged action of chlorine on pure anhydrous alcohol; hence its name (chlorine and alcohol). The impure oily liquid thus obtained is distilled and purified, and anhydrous chloral, an oily, colorless fluid, is the result. This undergoes decomposition by standing, and is converted into a solid. It combines with water to form acicular crystals of the hydrate of chloral, *chloral hydrate,* a soluble substance, decomposed by alkalies, producing chloroform in a pure state. Some of its effects have, indeed, been ascribed to the partial decomposition of chloral into chloroform in the circulation. It has been prescribed as an anodyne and soporific, causing extreme muscular relaxation, etc., in the dose of ten to twenty grains, or even more, in solution, in insomnia, delirium tremens, eclampsia, neuralgia, colic, etc. **C. al'coholate,** crystalline product of absolute alcohol and hydrous chloral. **C. antipy'rin,** hypnol; oily substance produced by mixing concentrated solutions of hydrate of chloral and antipyrin; hypnotic, but depressant to the heart's action. **C. butyl'icum,** butychloral. **C., cro'ton,** *Crotonate of chloral;* formed by the action of chlorine on allyl; it is an anæsthetic, producing profound cerebral insensibility, and, if continued, loss of function of the spinal cord and paralysis of the medulla oblongata. **C. form'amide,** chloralamid. **C. hy'drate,** see *Chloral.* **C. hydrocy'anate,** in white prisms, used as substitute for bitter-almond water and cherry-laurel water. **C. men'thol,** oily liquid resulting from heating together equal parts of chloral and menthol; used in neuralgia of the face, migraine, odontalgia, etc. **C. ure'thane,** somnal.

Chloralamid, klor-al'am-id. Chloral formidate; union of chloral anhydride with formamide; colorless crystallized substance. Used as a hypnotic and analgesic and as substitute for chloral hydrate. Average hypnotic dose for an adult is about 30 grains.

Chloral'imid. Derivative of chloral resulting from action of ammonium acetate on chloral hydrate; in colorless, tasteless, odorless crystals; used at one time as substitute for chloral hydrate.

Chloralism, klor'al-izm. Condition produced by the use of chloral in excess, as cerebral anæmia, sleeplessness, melancholy, joint-pains, feeble heart, slight paralysis, eruptions, etc.

Chloralization, klor-al-i-za'tion. Administration of chloral; effect of chloral.

Chloraloin, klor-al'o-in. Product of the combination of chlorine and aloin.

Chloralum, klor-al'um. Several preparations under this name have been employed as disinfectants, but their efficiency is not established. They contain varying proportions of chloride of aluminium; hence the name.

Chlorammo'nium. Ammonium chloride.

Chloramyl, klor'am-il. Preparation consisting of two drachms of amyl nitrite to one pound of chloroform; used cautiously for inhalation when the amyl nitrite is indicated.

Chloranth'us. Plant of nat. ord. Chloranthaceæ. *C. brachys'tachys* and *C. officina'lis* are natives of Japan; used as aromatic stimulants. **C. inconspic'ius,** used in China for scenting tea.

Chlo'ras. Chlorate. **C. kal'icus depura'tus,** potassæ murias hyperoxygenatus.

Chlorasma, klo-raz'mah (*chloros,* green). Chlorosis.

Chlorate, klo'rat. Salt of chloric acid with a base.

Chloratum, klo-rat'um. Chlorate.

Chloraur'ate of ammo'nium. Ammonio-chloride of gold.

Chlorepatitis, klor-ep-at-e'tis (*chloros,* green, *hepar,* liver). Hepatitis complicated with chlorosis.

Chlorephidrosis, klor-ef-id-ro'sis (*chloros, ephidrosis,* perspiration). Green perspiration.

Chlorethane, klor-e'thane. Ethyl chloride.

Chlore'tum. Chloride. **C. calca'riæ,** calcis chloridum.

Chlorhydric (klor-hy'drik) **acid.** Hydrochloric acid.

Chloriasis, klo-re'as-is (*chloros,* green). Chlorosis.

Chloric ether, concentrated, klo'ric e'ther, kon'sen-tra-ted. See *Ether, chloric.* **C. e., strong,** see *Ether, chloric.*

Chloride, klor'ide. Compound containing an element or radical in combination with chlorine. **C. of eth'yl,** C_2H_5Cl, prepared by treating alcohol with hydrochloric acid; colorless, inflammable, volatile liquid; used as a local anæsthetic in spray form in minor surgery. **C. of gold,** auri chloridum; salt used therapeutically in phthisis and tubercular diseases; said to be of use in the treatment of lupus; dose, gr. $\frac{1}{100}$ t.d. **C. of lime,** calcis chloridum. **C. of meth'yl,** chlormethyl. **C. of meth'ylene,** methylene chloride. (For chlorides of iron, sodium, potassium, etc., see *Ferri chloridum, Sodii chloridum, Potassii chloridum,* etc.

Chlorimetry, klor-im'et-re (*chloros,* green, *metron,* measure). Measurement of quantity of chlorine contained in a chlorine compound.

Chlorinated, klor'in-a-ted. Containing or combined with chlorine. **C. lime,** calx chlorinata.

Chlorine, klor'een (*chloros,* green). *Chlorinum, Oxymuriatic acid gas, Oxygenated muriatic acid, Dephlogisticated marine acid, Halogene, Murigene.* So far as we know, this is an elementary substance. It is a greenish, yellow gas, of a strong, suffocating smell and disagreeable taste, incapable of maintaining combustion and respiration, and very soluble in water. One of its characteristics is that of destroying almost immediately all vegetable and animal colors. It is employed in fumigations as a powerful disinfecting agent. A dilute solution, Aqua or Liquor chlorini, Chlorinii liquor, Chlorinei aqua, Aqua chlori (Ph. U. S.), Liquor chlori (Ph. Br.), Chlorine water, or Solution of chlorine, has been administered internally in diarrhœa and chronic dysentery. Immersion of the hands and arms in chlorine has often removed itch and other cutaneous affections. It has also been inhaled in a dilute state in the early stage of phthisis, but it is of doubtful efficacy, and is better adapted for chronic bronchitis. **C., bisul'phuret of,** sulphur, chloride of. **C. poul'tice,** cataplasma sodæ chloratæ. **C. wa'ter,** see *Chlorine.*

Chlor'ite. Compound of chlorous acid with a base.

Chlormethyl, klor-meth'il. Methyl chloride.

Chloroänæmia, klor-o-an-e'me-ah (*chloros,* green, *anæmia*). Chlorosis.

Chlorobo'rate of sodium. White crystalline powder, soluble in water, said to possess antiseptic properties.

Chlorocarbon, klor-o-kar'bon. Carbon bichloride.

Chlorocruorin, klor-o-kru'or-in. Greenish substance present in the blood of some annelids, analogous to the hæmoglobin of the blood of mammalia.

Chlorodyne, klor'o-dine. A preparation, originally secret, proposed in 1848, and said to consist of "perchloric acid with a new alkaloid." Later analyses proved it to consist of a variety of substances, and it has been imitated by combining morphia, dilute muriatic and hydrocyanic acids, capsicum, chloroform, ether, cannabis indica, oil of peppermint, etc. in formulæ varying with different chemists. Given as an anodyne chiefly in serous diarrhœas and cramps in the stomach.

Chloroform, klor'o-form (*chlorine, formyl*). *Perchloride* and *Terchloride of formyl, Chloroformyl,* called also, but not correctly, *Terchloride of carbon* and *Chloric ether,* is a colorless, oleaginous liquid, of a sweetish ethereal odor, hot, aromatic, and peculiar taste. Specific gravity of that of the Ph. U. S., *chloroformum venale,* a liquid containing at least 98 per cent. of chloroform, is at least 1.47. This preparation is used only externally and as a solvent. For internal use, the U. S. Pharmacopœia has a *chloroformum purificatum.* Its s. g. is 1.485 to 1.490 at 59° Fahr. This is the preparation preferably used internally, externally, and for anæsthetization. It is used with great advantage in asthma and in diseases in which a grateful soothing agent is required. Dose, ♏x to xxx or more, diluted with water. It is largely prescribed as an anæsthetic agent in painful diseases, and to obtund sensibility in surgical operations and in parturition by inhalation. The usual quantity with

this view is from f℥ss to f℥ij. See *Anæsthetic.* Ether is now more generally employed as an anæsthetic. **C., gel'atinized,** mixture of chloroform with white of an egg, used as a liniment. **C. lin'iment,** see *Linimentum chloroformi.* **C. mix'ture,** see *Mistura chloroformi.* **C. wa'ter,** *Aqua chloroformi* (Ph. Br.), solution of chloroform in distilled water in the proportion of 3 : 400 parts.

Chloroformium, klor-o-for'me-um. Chloroform.

Chloroformization, klor-o-for-mi-za'shun. The aggregate of anæsthetic phenomena occasioned by the inhalation of chloroform. To *chloroformize* a patient is to induce such phenomena.

Chloroformum, klor-o-for'mum. Chloroform. **C. purifica'tum,** see *Chloroform.* **C., tinc'ture of,** ether, chloric. **C. vena'le,** see *Chloroform.*

Chloroformyl, klor-o-form'il. Chloroform.

Chlorogenic acid, klor-o-jen'ik as'id. Caffeo-tannic acid.

Chlorogenine, klor-oj'en-een. Alstonine.

Chlorohæmat'ic. Hæmin.

Chloroleucos, klor-o-lu'kos (*chloros,* green, *leukos,* white). Greenish white.

Chloroma, klor-o'mah (*chloros,* green). Peculiar form of tumor containing a yellow-green substance, which takes the place, at times, of muscles and periosteum.

Chloromethyl (klor-o-meth'il) or **Chlormeth'yl.** Methylene bichloride.

Chloropercha, klor-o-per'kah (*chloros,* green). Guttapercha dissolved in chloroform.

Chlor'ophane. See *Chromophane.*

Chlorophthisis, klor-o-te'sis (*chloros,* green, *phthisis*). Phthisis accompanied with chlorosis.

Chlorophyll, klor'o-fil (*chloros,* green, *phullon,* leaf). Green coloring matter of leaves.

Chloroquinones, klor-o-kwi'nones. Compounds of chlorine with quinone.

Chlorosis, klor-o'sis (*chloros,* green). Disease which affects young females, more particularly those who have not menstruated. It is characterized by a pale, lurid complexion, languor, listlessness, depraved appetite and digestion, palpitation, etc. It generally goes off on occurrence of the menstrual flux; but sometimes it is long before this is established, and, at times, the catamenia are in larger quantity than usual. The blood of chlorotics is generally thin, light-colored, and deficient in red corpuscles and in iron, and the clot is in less proportion to the serum than in health. On auscultation, a bellows' sound has been almost invariably detected over the heart, and a continuous blowing sound in the larger arteries (especially the carotids and subclavians), reinforced by each systole of the ventricle, and resembling the buzzing of a humming-top, the cooing of doves, the whistling of air through a key-hole, etc. See *Bruit.* Very similar sounds are heard in the arteries after copious hemorrhage; they seem, therefore, to coincide with enfeebled circulation. Tonics, as iron, are usually required in the treatment, the disease most commonly occurring in those in whom there is considerable torpor of the system. **C. Æthio'pum,** chlorosis with an irresistible desire to eat dirt. See *Chthonophagia.* **C. amato'ria,** hectic fever. **C., Egyp'tian,** disease of Italy, and especially of Egypt, characterized by bloody stools, slowly progressive emaciation, debility, and anæmia, caused by the presence of an entozoon, the *Anchylostoma duodenale,* in the bowels. **C. gigante'a,** see *Polysarcia.* **C. trop'ica,** anæmia tropica.

Chlorosma, klor-oz'mah (from *chloros,* green). Chlorosis.

Chlorotic, klor-ot'ik. Affected with chlorosis or pertaining to chlorosis, as a chlorotic female, chlorotic symptoms, etc.

Chloroxanthous, klor-o-zan'thus (*chloros,* green, *xanthos,* yellow). Greenish-yellow.

Chlorphe'nol. Monochlorphenol; mixture of chlorinated phenol, alcohol, menthol, and eugenol. C_6H_4Cl,OH. Volatile liquid; antipyretic; employed in the treatment of tuberculosis in the shape of inhalations; possesses antiseptic properties; applied locally to wounds and ulcers.

Chlorum, klor'um. Chlorine.

Chloruret, klor'u-ret. Chloride.

Chloruretum ammonicum, klor-u-ra'tum am-mo'nik-um. Ammoniæ murias. **C. au'rico-so'dicum,** sodio-auric chloride. **C. au'ricum,** auric chloride. **C. baryt'icum,** barium chloride. **C. cal'cicum,** calcium chloride. **C. cal'cis,** chlorinated lime. **C. ferro'sum,** ferrous chloride. **C. hydrargyr'icum,** mercuric chloride. **C. ox'idi cal'cii,** calcis chloridum. **C. potas'sicum,** potassium chloride. **C. so'dicum,** sodium chloride. **C. zin'cicum,** zinc chloride.

Chlorurum, klo-ru'rum. Chloride.

Choak (Sax. *aceocan*). Cynanche trachealis. **C., wolf,** see *Lycanche.*

Choana, cho-ah'nah (*choane,* funnel). Pelvis. **C. cer'ebri,** infundibulum of the brain.

Choanæ, cho-ah'ne (pl. of **Choana**). Posterior nares.

Choa'ne. Infundibulum.

Choanoid, cho'an-oid. Funnel-shaped; relating to a muscle found in eyes of certain animals.

Choanorrhagia, cho-an-or-raj'e-ah (*choane, rhegnumi,* to break forth). See *Epistaxis.*

Choa'va. Coffea Arabica.

Chocolata, choc-o-lat'ah. Chocolate. **C. cum osmazo'mâ,** see *Osmazome.* **C. salu'tis,** see *Chocolate.* **C. sim'plex,** see *Chocolate.*

Chocolate, chok'o-late. (Said to be compounded from two East Indian words, *choco,* sound, and *atte,* water, because of the noise made in its preparation; or from Choco, a province in Mexico, where the tree abounds, and whence it was imported into Europe about 1520.) An alimentary paste prepared from the kernels of Theobroma cacao or Cacao, with sugar, and often aromatics; see *Cacao.* Chocolate thus simply prepared—as it is met with, indeed, in commerce—is called in France Chocolat de santé, *Chocolata simplex* or *salutis;* it is not very easy of digestion. Chocolat a la vanille contains three ounces of vanilla and two of cinnamon to twenty pounds of common chocolate. The addition of the aromatic renders it somewhat more digestible. Chocolates may likewise be medicated. **C. cum fer'ro,** ferruginous chocolate. **C. nuts,** see *Cacao.* **C. os'mazome,** see *Osmazome.* **C. root,** Geum rivale, G. Virginianum.

Chœnicis, ke'nis-is (*choinike,* the nave in which the axle turns). Trepan.

Chœradenterophthisis, keer-ad-en-ter-o-te'sis (*choiros,* swine, *enteron,* intestine, *phthisis*). Intestinal phthisis; tabes mesenterica.

Chœradodes, keer-ad-o'des (*choiros,* swine, scrofula, *odes*). Of the nature of scrofula; affected with scrofula.

Chœradology, keer-ad-ol'o-je (*chœras, logos*). The study of scrofula.

Chœras, ke'ras (*choiros,* swine). Scrofula.

Chœrocalymma, keer-o-kal-im'mah (*choiros,* vulva, *kalumma,* hood). Integument of the vulva.

Chœrocnesmus, keer-o-nez'mus (*choiros,* vulva, *knesme,* itching). Itching of the vulva.

Chœrus, ke'rus (*choiros*). Vulva.

Choke cherry. Prunus Virginiana. **C. damp,** carbonic acid; see *Hydrogen, carburetted.*

Choked disk. Engorged condition of the optic disk, symptomatic of intracranial affection; inflammation of papilla of the eye, indicating inflammation of optic nerve (optic neuritis). Papillitis is therefore a better term than choked disk.

Chokes. Throat.

Chola, ko'lah (*chole*). Bile.

Cholæmia (kol-e'me-ah), **Cholhæ'mia,** or **Cholihæ'mia** (*chole, haima,* blood). Morbid state in which bile exists in the blood; jaundice.

Cholago, kol-ah'go. Cholas.

Cholagogue (kol'ag-og) (*chole,* bile, *ago,* to expel) or **Cholago'gus.** The ancients gave this name to cathartics which were reputed to cause the flow of bile.

Cholalate, kol'al-ate. Salt of cholalic acid.

Cholalic acid, kol-al'ik as'id. Acid obtained from compound bile-acids; cholic acid,

Cholangioitis (kol-an-je-o-i'tis), **Cholangei'tis**, or **Cholangi'tis** (*chole*, bile, *angeion*, vessel). Inflammation of the bile-ducts.

Cholansis, kol-an'sis (*cholos*, lame). Lameness of the hand, rendering a person one-handed.

Cholas, ko'las. Epigastric region; the intestines.

Cholasma, ko-laz'mah. Cholosis.

Cholate, ko'late. Relating to the presence of the principal acid of bile, found chiefly in ox-bile.

Chole, kol'e. Bile.

Choleate, kol-e'ate. Taurocholate; cholate.

Cholecchysis (ko-lek'is-is) or **Cholen'chysis** (*chole*, *ekchusis*, effusion). Effusion of bile.

Cholechlorine (kol-e-klor'in) or **Cholochlo'ine** (*chole*, *chloros*, green). Green coloring matter of the bile; biliverdin.

Cholecroin, kol-e-kro'in (*chole*, bile, *chroo*, to color). Bilirubin mixed with other matter.

Cholecrome, kol'e-krome. Cholocrome.

Cholecyst, kol'e-sist (*chole*, *kustis*, bladder). Gall-bladder.

Cholecystectasia, kol-e-sis-tec-tah'ze-ah (*cholecystis*, *ektasis*, dilatation). Dilatation of the gall-bladder.

Cholecystectomy, kol-e-sis-tek'to-me (*chole*, *kustis*, bladder, *ektome*, amputation). Excision of the gall-bladder.

Cholecystenterostomy, kol-e-sist-en-ter-os'tom-e (*chole*, *kustis*, bladder, *enteron*, intestine, *stoma*, opening). Operation for making a communication between the gall-bladder and bowel, for the purpose of relieving obstruction in the common bile-duct, or for removal of the gall-bladder.

Cholecysteurysma, kol-e-sist-u-riz'mah (*chole*, *kustis*, bladder, *eurusma*, dilatation). Dilatation of the gall-bladder.

Cholecystis, kol-e-sist'is. Gall-bladder.

Cholecystitis, kol-e-sis-te'tis (*chole*, *kustis*, bladder). Inflammation of the gall-bladder. **C. calculo'sa**, inflammation of the gall-bladder caused by passage of a calculus.

Cholecystoncus, kol-e-sis-ton'kus (*chole*, *kustis*, bladder, *onkos*, tumor). Hypertrophy of the gall-bladder.

Cholecystor'rhaphy (*cholecystis*, gall-bladder, *rhaphe*, suture). Cholecystotomy combined with suture of the gall-bladder.

Cholecystotomy, kol-e-sis-tot'o-me (*chole*, *kustis*, bladder, *temno*, to cut). Opening the gall-bladder by abdominal operation, as for removal of gall-stone.

Choledoch (kol'e-dok) (*chole*, *dochos*, containing or receiving) or **Choled'ochus**. Containing or receiving bile. The *ductus choledochus* is the duct formed by the union of the hepatic and cystic ducts, which pours the hepatic and cystic bile into the duodenum.

Choledochiarctia, kol-e-dok-e-ark'te-ah (*choledochus*, *arcto*, to narrow). Narrowing of ductus choledochus communis.

Choledochitis, kol-e-dok-e'tis. Inflammation of the choledoch duct.

Choledochot'omy (*choledochus*, *tome*, incision). Operation on choledoch duct for removal of calculi.

Choledochus, kol-ed'ok-us (*chole*, *dochos*, containing). Choledoch; receiving bile.

Choledography, kol-e-dog'raf-e (*chole*, *grapho*, to describe). Description of what relates to the bile and biliary organs.

Choledology, kol-e-dol'o-je (*chole*, *logos*, discourse). Treatise on the bile and biliary organs.

Cholegraphia, kol-e-graf'e-ah. Choledography.

Cholehæmia, kol-e-he'me-ah (*chole*, *haima*, blood). Icterus.

Choleia, kol-i'ah (*cholos*, lame). Claudication.

Choleic, kol-e'ik. Relating to bile.

Cholelith, kol'e-lith (*chole*, *lithos*, stone). Gall-stone.

Cholelithia, kol-e-lith'e-ah (*chole*, *lithos*, stone). Cysthepatolithiasis. **C. ic'terus**, icterus.

Cholelithiasis, kol-e-lith-e'as-is. Aggregate of phenomena caused by biliary calculi.

Cholelithotomy, kol-e-lith-ot'o-me (*chole*, *lithos*, stone, *tome*, incision). Removal of gall-stones.

Cholelithotripsy, kol-e-lith'o-trip-se. Cholelithotrity.

Cholelithotrity, kol-e-lith-ot'ri-te (*chole*, *lithos*, stone, *tribo*, to crush). Operation of crushing of gall-stone *in situ*.

Cholelithus, kol-el'ith-us. See *Calculi, biliary*.

Cholelogia, kol-e-loj'e-ah. Treatise on, or description of, the bile and biliary organs.

Cholemesia (kol-e-ma'ze-ah) or **Cholem'esis** (*chole*, *emesis*, vomiting). Vomiting of bile.

Cholenchysis, kol-en'kis-is. Cholecchysis.

Cholepoiesis (kol-e-poi-a'sis) or **Cholopoie'sis** (*chole*, *poiesis*, fabrication). Secretion of bile.

Cholepoietic (kol-e-poi-et'ik) or **Cholopoiet'ic** (*chole*, *poietikos*, producing). Bile-secreting.

Cholepyra, kol-ep'ir-ah (*chole*, *pur*, fire, fever). Fever, bilious.

Cholepyretus, kol-e-pir'et-us. Fever, bilious.

Cholepyrrhin (kol-e-pir'rhin) or **Cholepyr'rin** (*chole*, *purrhos*, of a golden color). See *Bile* and *Cholecrome*.

Choler, kol'er. Bile. Anger was supposed to be produced by superabundance of bile; hence the term *choler* for anger.

Cholera, kol'er-ah (*chole*, bile, *rheo*, to flow, or *cholades*, intestines, or *cholera*, gutter of a house to carry off the rain). *Cholera morbus*, *Sporadic* or *bilious cholera*. The higher degrees have been called *Centrogangliïtis*, *Myeloganglïitis*, and *Hologanglïitis*. Disease characterized by anxiety, gripings, spasms in the legs and arms, and by vomiting and purging (generally bilious). Vomiting and purging are, indeed, the essential symptoms. The disease is most common in hot climates, and in temperate climates during summer. *Spasmodic, Asiatic, Malignant, Indian, Epidemic, Pestilential, Serous, Algid, Convulsive, Nervous, Eastern* or *Oriental cholera, Asphyxia pestilenta, Pestilential asphyxia, Choleric pestilence, Cholera orientalis, C. Indica, C. epidemica, C. asphyxia, C. pestifera, C. serosa, C. spastica, Typhoid fever of India, Rice disease* (because supposed by some to be caused by damaged rice), is frightful in the rapidity of its progress, the patient sometimes dying in a few hours from the first onset. In a typical case there are three stages: first, of diarrhœa; second, of rice-water evacuations, vomiting, cramps, coldness and lividity of the skin, etc., with a peculiar pinched expression of the face—*facies cholerica*—and collapse; and a third stage, in favorable cases, of reaction or consecutive fever. In temperate climates common cholera is not usually a disease of much consequence. It requires that the stomach and bowels should be cleared, and afterward the irritation be allayed by full doses of opium. In *malignant cholera* the treatment must vary with the stage of the disease, the efforts of the physician during that of collapse being directed to the restoration of animal heat by external applications, etc. In the worst forms, however, it runs its course unmodified by treatment. Proper sanitary conditions and pure drinking-water, as has been demonstrated in the epidemic in Hamburg in 1892, which was due to obtaining polluted drinking-water from the Elbe, may prevent outbreaks of the disease. Investigation of cholera discharges has shown the presence of a special bacillus, to which the causation of the disease is ascribed. From its shape it is called the *Comma bacillus;* see *Spirillum choleræ Asiaticæ*. **C., al'gid**, see *Cholera*. **C., bil'ious**, see *Cholera*. **C., blue**, colored substance observed in cholera culture in meat extract containing peptone and gelatin. **C. cells**, C. fungi. **C., chick'en**, epidemic disease of fowls, with inflammation and ulceration of the organs of digestion, etc.; see *Bacillus choleræ gallinarum*. **C. cor'puscles**, C. fungi. **C. fun'gi**, C. cells, C. corpuscles. Microscopical bodies resembling fungi, which were discovered in the stomach and intestines of cholera patients after death, or in the rice-water evacuations. They were regarded as the cause of Asiatic cholera; but later researches define them more accurately under the name of Comma bacilli; see *Cholera*. **C. hand**, ap-

pearance presented by the cyanotic hand of a patient in the collapse of cholera. **C., hog,** a very fatal and epidemic disease occurring among hogs, of a contagious nature, characterized by skin eruptions, coughing, and dyspnœa. It runs its course very fast, and is accompanied with rapid emaciation, debility, and frequently paralysis of the extremities. **C., In'dian,** see *Cholera.* **C. In'dica,** see *Cholera.* **C. infan'tum,** *Choleric fever of infants, Cholera of infants,* disease so termed by American physicians. It occurs, generally, in the Middle States of the Union, in June or July, and continues during the hot weather; hence called the "summer complaint." Chief symptoms are vomiting, purging of green or yellow matter, slime, or blood, attended with pain or uneasiness, and swelling of the abdomen, with some pyrexia, generally. The heat of the weather seems to be the predisposing, if not the exciting, cause. Fatal disease in towns, differing little, if at all, from what is vulgarly called the *Watery gripes* in England. **C., malig'nant,** see *Cholera.* **C. mor'bus,** cholera; popular term for severe vomiting accompanied with purging. **C. nos'tras,** cholera morbus. **C., Orien'tal,** see *Cholera.* **C. pestif'era,** see *Cholera.* **C., pestilen'tial,** see *Cholera.* **C. poi'son,** see *Poison.* **C. reac'tion,** the color reaction of mineral acids upon the cholera bacillus. **C., red,** coloration produced on addition of nitric acid to filtered cholera stools or rice-water stools. **C., se'rous,** cholera. **C. sic'ca,** pneumatosis of the digestive passages, in which there is a copious discharge of gas upward and downward. **C., spasmod'ic,** see *Cholera.* **C., sporad'ic,** see *Cholera.* **C., sum'mer,** cholera infantum. **C., ty'phoid,** term applied to the secondary symptoms that often follow the cholera attack proper, as excessive adynamia, etc. **C. vulga'ris,** cholera morbus.

Cholerad, kol'er-ad. Micro-organism containing the contagium of Asiatic cholera.

Choleragen'ic, kol-er-ah-jen'ik (*cholera, gennao,* to produce). Cholera-breeding.

Choleraic. Choleric.

Cholerama'nia. Choleromania.

Cholerapho'bia (*cholera, phobos,* dread). Choleromania.

Cholerapho'nia (*cholera, phone,* voice). Voice, choleric.

Chol'eric. Belonging to bile; also to cholera (*Choleraic*), as the *choleric* or *choleraic* poison. **C. face,** the sharp, pinched, and peculiarly altered face in spasmodic cholera. **C. fe'ver of in'fants,** cholera infantum. **C. tem'perament,** bilious temperament.

Choler'iform. Choleroid.

Cholerine, kol'er-een (dim. of **Cholera**). *Choleraic diarrhœa, Cholrine.* Diarrhœa prevailing during cholera epidemics. First stage of epidemic cholera; also, precursory symptoms of cholera; mild form of cholera. The zymotic principle of cholera.

Cholerodiarrhœ'a. Diarrhœa of cholera; mild attack of that disease.

Choleroid, kol'er-oid (*cholera, eidos,* resemblance). Resembling cholera, as a choleroid diarrhœa.

Choleromania (kol-er-o-man'e-ah) or **Cholerama'nia** (*cholera, mania*). Dread of cholera to such extent that the individual fancies himself affected or threatened by it.

Cholerophobia, kol-er-o-fo'be-ah (*cholera, phobos,* dread). Choleromania.

Cholerophone, kol-er-o-fo'ne (*cholera, phone,* voice). Voice, choleric.

Choleroprosopon, kol-er-o-pros-o'pon (*cholera, prosopon,* countenance). Facial expression of cholera.

Choleropsis, kol-er-op'sis (*cholera, opsis,* countenance). Facial expression of cholera.

Cholerotyphus, kol-er-o-ti'fus. Typhoid or malignant form of cholera.

Cholerrhagia, kol-er-rhaj'e-ah (*chole, rhegnumi,* to break forth). Active discharge of bile; cholera.

Cholerrhœa, kol-er-rhe'ah (*chole, rheo,* to flow). Flow of bile; bilious diarrhœa. **C. lymphat'ica,** cholera.

Cholestearinoma, kol-e-ste-ar-in-o'mah (*chole, stear,* suet). Cholesteatoma.

Cholesteatin, kol-e-ste'at-in. Cholesterin.

Cholesteatoma, kol-e-ste-a-to'mah (*chole, steatoma*). *Pearl tumor.* Encysted tumor, presenting upon the anterior of the cyst several superimposed layers of cholesterin, which glisten like pearl. Hence it was named by Cruveilhier the *laminated nacreous fatty tumor,* and it is sometimes termed the *adipociriform.*

Cholesteræmia, kol-es-ter-e'me-ah (*cholesterin, haima,* blood). Presumed morbid condition in which an accumulation of retained cholesterin is supposed to exist in the blood.

Cholesterin, kol-es'ter-in. *Cholesterine, Cholestearine, Cholesteatine,* (*chole, stear,* suet), *Adipocire, Choline.* $C_{26}H_{43}OH$. It is an alcohol, *cholesteric alcohol.* Inodorous, insipid substance, in white, shining scales; fusible, and crystallizing, on cooling, in radiated fibres. It forms the crystalline part of certain biliary calculi; is found in the blood, the brain and nerves, the liver and spleen, the meconium, the crystalline lens, and in various tumors, deposits, and degenerations, as well as in the seeds of many plants, olive oil, etc. It is an ingredient of the excretion of the liver. See *Adipocire.* **C. degenera'tion** or **disease,** see *Lardaceous.*

Cholesteritis, kol-es-ter-e'tis. See *Confusio.*

Cholesteryl, kol-es'ter-il. Radical of cholesterin, $C_{26}H_{43}$.

Choletelin, kol-et'e-lin. Derivative of ordinary bile-pigment by oxidation, found in the urine of patients suffering from affections of the liver.

Choleuma, kol-u'mah (*cholos,* lame). Lameness of the hand.

Choleverdin, kol-e-vur'din (*chole,* bile, *viridis,* green). Product of oxidation of biliverdin.

Cholhæmia, kol-he'me-ah (*chole, haima,* blood). Cholæmia.

Cholia, kol'e-ah. Lameness of the hand.

Cholic (kol'ik) **acid.** *Glycocholic acid.* Azotized substance, an ingredient of the bile. This and taurocholic acid break up respectively into cholalic acid and glycocoll, and the same acid and taurin.

Cholicele, kol-e-se'le (Eng. kol'e-seel) (*chole,* bile, *kele,* tumor). Swelling formed by the bile morbidly accumulated in the gall-bladder.

Cholicus, kol'ik-us. Bilious.

Cholihæmia, kol-e-he'me-ah (*chole, haima,* blood). Cholæmia.

Choline, ko'leen. $C_5H_{15}NO_2$. Cholesterin. Also a ptomaïne or leucomaïne found in bile and elsewhere, with action similar to, but more virulent than, neurine. Obtained by action of hydrochloric acid on hog-bile, but may be prepared synthetically. It is also found in fatty seeds and nuts, yolk of eggs, in the blood, lungs, heart, eye, placenta, etc. It is derived from decomposition of lecithin. The four ptomaïnes choline, neurine, betaïne, and muscarine form the choline group. See *Ptomaïne* (table).

Cholius, kol'e-us (*chole,* bile). Bilious.

Cholocatarrhophe (kol-o-kat-ar'rho-fe), **Cholocatarrhophe'sis, Cholocatarrhoph'ia** (*chole, katarropheo,* to sup up). Absorption of bile.

Cholochloin, kol-o-klo'in (*chole, chloos,* greenish yellow). See *Cholechrome* and *Cholechlorine.*

Cholochlorin, kol-o-klor'in (*chole, chloros,* green). See *Cholocrome* and *Cholechlorine.*

Cholochrome, kol'o-krome (*chole, chroma,* color). *Cholecrome.* Term proposed by Thudicum to designate coloring matter of bile in all its varieties. *Cholophæine, Cholepyrrhine, Biliphæine,* and *Bilifulvine* are synonymous terms for the brown coloring matter, and *Cholochlorine, Cholochloine,* and *Biliverdin* for the green coloring matter.

Cholocyanin, kol-o-si'an-in. Bilicyanin.

Cholocystectasis (kol-o-sis-tek'ta-sis) or **Cholocystecta'sia.** Dilatation of the gall-bladder.

Cholocystis, kol-o-sis'tis. Gall-bladder.

Cholocystitis, kol-o-sis-te'tis. Inflammation of the gall-bladder.

Cholocyston'cus. Cholecystoncus.

Cholocystopleuritis, kol-o-sis-to-plu-re'tis (*chole,* bile, *kustis,* bladder, *pleuritis*). Inflammation of the gall-bladder and pleura.

Cholocystor'rhaphy (*chole, cystis*), gall-bladder, *rhaphe*, suture). Operation for evacuation of contents of gall-bladder by incision through the abdominal walls and suture of the gall-bladder to the margins of the incision.

Cholocystot'omy. Cholecystotomy.

Cholodes, kol-o'des. Bilious.

Cholodiarrhœa, kol-o-di-ar-rhe'ah. Bilious diarrhœa.

Cholodochi'tis. Choledochitis.

Cholodysenter'ia. Bilious dysentery.

Cholography, kol-og'ra-fe (*chole, grapho*, to describe). Description of bile and biliary organs.

Cholohæmatin, kol-o-he'mat-in. Pigment from sheep's bile.

Choloid, kol'oid (*chole, eidos*, resemblance). Having the appearance of bile.

Choloidanic acid, kol-oid-an'ik as'id. $C_{16}H_{24}O_7$. Acid obtained from cholalic acid by boiling cholic acid with nitric acid.

Chololith, kol'o-lith (*chole, lithos*, stone). Biliary calculus.

Chololithic, kol-o-lith'ik (*chole, lithos*, stone). Relating to gall-stones.

Chololithus, kol-ol'ith-us. Biliary calculus.

Cholology, kol-ol'o-je (*chole*, bile, *logos*, discourse). The study or doctrine of bile.

Choloma, kol-o'mah (*cholos*, lame, maimed). Distortion of a limb; incapacity of moving it. Also the act of limping; claudication.

Cholophæin, kol-o-fe'in. $C_{16}H_{18}N_2O_4$. See *Cholecrome* and *Bile.*

Choloplania, kol-o-plan'e-ah (*chole, planao*, to lead astray). Jaundice.

Cholopoësis, kol-ô-po-e'sis. Formation of bile.

Cholopoëtic, kol-o-po-et'ik (*chole, poieo*, to make). Relating or appertaining to the formation of bile.

Cholorrhagia (kol-or-rhaj'e-ah) or **Cholorhœ'a,** (*chole*, bile, *rhegnumi*, to burst forth). Sudden discharge of bile.

Cholorrhœa, kol-or-rhe'ah (*chole, rheo*, to flow). Abnormous discharge of bile.

Choloses, kol-o'sees (*chole*). Under this head may be included every morbid affection of the liver.

Cholosis, kol-o'sis (*cholos*, lame). *Claudication.* Hippocrates employs this word particularly for a lameness of the hand which renders a person one-handed. Also, icterus; bilious dyscrasy. **C. America'na,** fever, yellow.

Cholosterina, kol-o-ster-e'nah. Cholesterin.

Cholotes, ko'lo-tes (*cholos*, lame). Cholosis.

Cholozemia febrilis, kol-o-za'me-ah feb-re'lis (*chole, zemia*, detriment). Fever, bilious.

Cholrine, kol'rin. Cholerine.

Choluria, kol-u're-ah (*chole, ouron*, urine). Passage of bile in urine; greenish appearance of urine, suggestive of that of bile.

Cholus, ko'lus. Bile.

Cholystenterosectomy, kol-ist-en-ter-o-sek'tom-e. Cholecystenterostomy.

Chon'dral. Relating to cartilage.

Chondralgia, kon-dral'je-ah (*chondros, algos*, pain). Pain in a cartilage.

Chondrarthrocace, kon-drar-throk'as-e (*chondros, arthron*, joint). Disease affecting articular cartilage.

Chondrectomy, kon-drek'tom-e (*chondros, ektome*, excision). Excision of a cartilage or a part of it.

Chondrexarthroma (kon-dreks-ar-thro'mah), **Chondrexarthro'sis,** or **Chondrexarthre'sis** (*chondros*, cartilage, *exarthreo*, to dislocate). Displacement of a cartilage.

Chondric, kon'drik. Cartilaginous.

Chondrification, kon-drif-i-ka'shun (*chondro, facio*, to make). Formation of, or conversion into, cartilage.

Chondrigen, kon'dre-jen (*chondros*, cartilage, *gennao*, to form). Cartilaginous substance yielding chondrin.

Chondrin, kon'drin (*chondros*, cartilage). Chondrine. Variety of gelatinous substance, obtained by boiling the cornea, the permanent cartilages, and the bones before they are ossified.

Chondrinogen, kon-drin'o-jen. Chondrigen.

Chondritis, kon-dre'tis (*chondro, itis*). Inflammation of cartilage.

Chon'dro (*chondros*, cartilage). In composition, cartilage.

Chondroblast, kon'dro-blast (*chondro, blastos*, germ). Cell forming cartilage.

Chondrocatag'ma (*chondro, katagma*, fracture). Fracture of a cartilage.

Chondrocele, kon-dro-se'le (Eng. kon'dro-seel). Sarcocele whose contents resemble cartilage.

Chondroclasis, kon-drok'las-is (*chondro, klasis*, fracture). Fracture of a cartilage.

Chondroclasts, kon'dro-klasts (*chondro*, cartilage, *klao*, to prune) Cells which are believed to exert an influence on the absorption of cartilage.

Chondro-coracoïdeus, kon'dro-kor-ak-o-e'de-us (*chondros, coracoïdeus*, belonging to the coracoid process). Variation of the pectoralis major.

Chondrocostal, kon-dro-kos'tal (*chondro, costa*, rib). Having relation to the ribs and their cartilages, as *chondrocostal articulation*, etc.

Chondro-cranium, kon'dro-kran'e-um (*chondro, kranion*, skull). Embryonic form of cranium of the higher vertebrates.

Chondrodendron tomentosum, kon-dro-den'dron to-men-to'sum (*chondros*, cartilage, *dendron*, tree). Climbing vine, ord. Menispermaceæ, inhabiting Peru and Brazil; root furnishes pareira.

Chondrodeocele, kon-dro-de-o-se'le (Eng. kon-dro'-de-o-seel). Chondrocele.

Chondrodes, kon-dro'des. Cartilaginous, chondroid.

Chondrodesma, kon-dro-dez'mah (*chondro, desma*, ligament). Cartilaginous ligament.

Chondrodialysis, kon-dro-de-al'is-is (*chondro, dialusis*, dissolution). Decomposition or dissolution of cartilage.

Chondrodynia, kon-dro-din'e-ah (*chondro, odune*, pain). Pain in a cartilage.

Chondro-epitrochlearis, kon'dro-ep-e-trok-le-ah'ris. Chondro-coracoideus.

Chondrofibro'ma. Chondroma with elements of fibroma.

Chondrogen, kon'dro-jen. Chondrigen.

Chondrogenesia (kon-dro-jen-ez'e-ah) or **Chondrogen'esis** (*chondro, genesis*, formation). Formation of cartilage; morbid conversion of parts into cartilage.

Chondroglossus, kon-dro-glos'sus (*chondro, glossa*, tongue). Fasciculus of fleshy fibres, passing from the lesser cornu of the os hyoides to the tongue; forms part of the hyoglossus.

Chondrography, kon-drog'ra-fe (*chondro, graphe*, a description). Description of cartilages.

Chondroid, kon'droid (*chondro, eidos*, resemblance). Cartilaginiform; resembling cartilage.

Chondrolith, kon'dro-lith (*chondro, lithos*, stone). Cartilage in state of concretion.

Chondrology, kon-drol'o-je (*chondro, logos*, discourse). Treatise on, or description of, cartilages.

Chondroma, kon-dro'mah (*chondro, oma*). *Benign osteosarcoma, Osteochondrophyte.* Cartilaginous growth, not a simple growth or hyperplasia of pre-existing cartilage. Chondroma rarely arises from permanent cartilage; it usually proceeds from bones, including spina ventosa, osteosarcoma, etc., with many. It involves especially the extremities of the long bones and the bones of the hands and feet. The term, as well as *Enchondroma*, is also applied to growths which, histologically, resemble cartilage. To a pouched cartilaginous growth the term *Cylindroma* has been given. The latter term has also been applied to a sarcomatous tumor met with in the eyelids, orbit, etc. *Ecchondroses* are simple outgrowths from normal cartilage. Cartilaginous tumors may also be developed in soft parts entirely distinct from the bones or cartilages, as in the testicle, lungs, etc., and especially in the vicinity of the parotid gland. **C., os'teoid,** periosteoma.

Chondromalacia, kon-dro-mal-ah'se-ah (*chondros*, cartilage, *malakia*, softening). Softening of cartilage.

Chondromalacosis, kon-dro-mal-ak-o'sis. Chondromalacia.

Chondromyces, kon-dro-me'ses (*chondros, mukes,* fungus). Fungoid degeneration of cartilage.

Chondromyxo'ma. Mucous enchondroma.

Chondropharyngeus, kon-dro-far-in-je'us (*chondros,* cartilage, *pharynx*). Fibres of the muscular coat of the pharynx, arising from the lesser cornu of the os hyoides, and forming part of the constrictor medius. See *Constrictor pharyngis.*

Chondrophyma, kon-dro-fe'mah (*chondro, phuma,* tumor). Cartilaginous tumor; tumor involving cartilage.

Chondrophyte, kon'dro-fite (*chondro, phuton,* plant). Cartilaginous growth of a fungoid character.

Chondroplast, kon'dro-plast (*chondro, plasso,* to form). Cartilage-cell. See *Osteoplast.*

Chondroporosis, kon-dro-po-ro'sis (*chondro, poros,* pore). First stage of cartilaginous ossification.

Chondros, kon'dros. Cartilage.

Chondrosarcoma, kon-dro-sar-ko'mah. Cartilaginous sarcoma.

Chondro-scapular (kon-dro-skap'u-lar) **muscle.** Muscular band occasionally found extending from first costal cartilage to superior margin of scapula.

Chondrosis, kon-dro'sis (*chondro, osis*). Morbid formation or condition of cartilage.

Chondrosternal, kon-dro-ster'nal (*chondro, sternon,* the breast-bone). Having relation to the cartilages of the ribs and breast-bone, as *chondrosternal ligament,* articulations, etc.

Chondrosyndesmus, kon-dro-sin-dez'mus (*chondro, sundesmos,* ligament). Union of bones by means of fibro-cartilage; synchondrosis.

Chondrotomy, kon-drot'o-me (*chondro, tome,* incision). Dissection of cartilages, the instrument used being a *chondrotome.*

Chondroxiphoid, kon-dro-zi'foid (*chondros,* cartilage, *xiphoid,* the cartilage so called). Having relation to the xiphoid cartilage, as *Chondroxiphoid ligament.*

Chondrus, kon'drus. Cartilage; xiphoid cartilage in particular. Alica; Fucus crispus. **C. cris'pus** or **mamillo'sus,** Fucus crispus. **C. polymorphus,** Fucus crispus.

Chonus, ko'nus (*chonos*). Infundibulum.

Cho'part's amputa'tion. Amputation at the mediotarsal articulation. See *Amputation.* **C.'s mix'ture** consists of copaiba, alcohol, sweet spirits of nitre, syr. tolutanus, and aqua menthæ piperitæ.

Chopine, chop'een. Measure which contains 16 ounces; pint measure.

Chop'-nut. Calabar bean.

Chorah, ko'rah (region). Any void space; also, the orbit of the eye.

Chord, dorsal. Notochord. **C., spermat'ic** or **testic'ular,** spermatic cord.

Chorda, kor'dah (*chorde,* gut, and hence a string made of gut). *Corda.* Cord. It has several meanings, as tendon, intestines (*Chordæ*), genital organs; *Chorda* or *funiculus tympani,* a branch of the seventh pair of nerves, according to some; of the fifth pair, according to others, which passes through the tympanum. *Chordæ Willisii, Trabeculæ Willisii* are the small fibres which cross the sinuses of the dura mater; so called from their first describer, Willis. *Chordæ tendineæ* are the tendinous and cordlike substances which connect the columnæ carneæ of the ventricles of the heart to the valves, etc. **C. acus'tica,** see *Striæ acusticæ.* **C. arte'riæ umbilica'lis,** remains of umbilical artery. **C. dorsa'lis,** *Dorsal chord, Notochord.* Axis around which, according to Von Baer, the first parts of the fœtus are formed, the rudiment of the future vertebral column. **C. duc'tus arterio'si,** remains of ductus arteriosus, the chord from pulmonary artery to arch of aorta. **C. d. veno'si,** remains of ductus venosus, extending from left branch of portal vein to vena cava. **C. Hippoc'ratis,** Achillis tendo. **C. longitudina'lis cor'poris callo'si,** see *Raphe.* **C. mag'na,** tendo Achillis. **C. obli'qua cu'biti,** oblique ligament. **C. pe'nis,** chordee. **C. spasmod'ica,** chordee. **C. spermat'ica,** spermatic cord. **C. spina'lis,** spinal cord. **C. tym'pani,** see *Chorda.* **C. umbilica'lis,** umbilical cord. **C. ve'næ umbilica'lis,** round ligament of the liver. **C. vene'rea** or **ven'eris,** chordee. **C. vertebra'lis,** spinal cord.

Chordæ, kor'de (pl. of **Chorda**). See *Chorda.* Chordee. **C. acus'ticæ,** medullary striæ. **C. Ferren'ii,** cords, vocal. **C. internun'ciæ,** see *Internuncial.* **C. longitudina'les Lancis'ii,** see *Raphe.* **C. œsophage'æ,** œsophageal nerves. **C. serpenti'næ,** small striæ on floor of fourth ventricle, situated in front of fovea anterior. **C. tendin'eæ,** small tendinous chords connecting papillary muscles of heart with auriculoventricular valves; see *Chorda.* **C. transversa'les Willis'ii,** see *Corpus callosum.* **C. voca'les,** cords, vocal. **C. volu'biles,** C. serpentinæ. **C. Willis'ii,** see *Chorda.*

Chordal, kor'dal. Relating to chord, cord, or notochord. **C. sali'va,** secretion of saliva which occurs when chorda tympani nerve is irritated. **C. tis'sue,** variety of connective tissue existing in the notochord.

Chordapsus, kor-dap'sus (*chorde,* intestine, *hapto,* to tie). Constriction or twisting of the intestines. Colica ileus. See *Enteritis* and *Ileus.*

Chordee, kor-de' (F. *corder,* to bind with a cord). Painful affection of the penis attending gonorrhœa, and happening chiefly at night. It occurs when the violence of the inflammation is such that the urethra cannot expand as much as the corpora cavernosa during erection, and consequently the glans seems painfully drawn downward,

Chorditis, kor-de'tis. Inflammation of spermatic or vocal cords. **C. tubero'sa,** inflammation of the vocal cords. **C. voca'lis,** inflammation of the vocal cords.

Chordurethritis, kord-u-re-thre'tis (*chordee, urethritis*). Gonorrhœa accompanied with chordee.

Chorea, ko-re'ah (*choreia,* a dance). *St. Vitus's dance, St. John's dance, Viper's dance,* because its movements resemble dancing. The characteristics are irregular and involuntary motions of one or more limbs, and of the face and trunk. It is a disease usually occurring before puberty, and is generally connected with torpor of the system, and of the digestive organs in particular. Its duration is long, but it is usually devoid of danger, although frequently but little under the control of medicine. The spasms do not continue during sleep. Indications of treatment are to strengthen the general system and stimulate the intestinal canal. Rest, mental and physical, purgatives once or twice a week, and chalybeates, with appropriate regimen, will fulfil these. *Chorea saltatoria—methodical* or *rhythmic chorea*—is a form of the disease characterized by involuntary jumps, often taking place methodically or rhythmically. *C. rotatoria* is a form characterized by rotation or oscillation of the head or trunk or one limb; *C. oscillatoria,* by irregular or measured oscillations, partial or general, of the head, trunk, or limbs. *Diaphragmatic* or *laryngeal chorea* is a peculiar cry or bark accompanying *tic non-douloureux.* See *Tic.* **C. Anglo'rum.** Chorea proper. **C., chron'ic,** spasm of facial muscles. **C. cor'dis,** chorea with disordered action of the heart. **C., diaphragmat'ic,** see *Chorea.* **C. dimidia'ta,** hemichorea. **C., elec'tric,** *Convulsivo-cerebral typhus, Dubini's disease,* affection seen in certain districts of Lombardy, so called in consequence of the similarity between the convulsive shock of the limbs and the shocks caused by the action of the induction coil; very fatal. **C. of the eye,** C. oculi. **C., fa'cial,** spasm of facial muscles. **C. festi'nans** (*festino,* to hurry), form of chorea in which the patient is irresistibly impelled to run forward or backward; see also *Paralysis agitans.* **C. Germano'rum,** C. magna. **C. gesticulato'ria,** chorea. **C., hered'itary,** C., Huntingdon's. **C., Huntingdon's,** form of chronic chorea of adults, affecting whole families, with irregular movements, confusion of speech, and dementia. **C., hyster'ical,** see *Hysteria.* **C. insan'iens,** disease of adults, particularly of period of pregnancy, in which there are violent movements, with delirium, fever, etc. **C., larynge'al,** see *Chorea.* **C. mag'na** or **C. mag'na Germano'rum,** C. accompanied with convulsive motions

observed in hysterical persons or due to a psychosis. **C. ma'jor**, this form includes certain hysterical and hypnotic affections, often of an epidemic character, as rhythmical hysterical spasms, tarantism, etc.; C. magna. **C., mani'acal**, C. with great mental disturbance, in women especially. **C., method'ical**, see *Chorea*. **C., mimet'ic**, C. caused by imitation of those so affected. **C. mi'nor**, C. proper. **C. neural'gica**, tic douloureux; see *Chorea*. **C. nu'tans**, C. in which there are nodding movements. **C. oc'uli**, clonic spasm of the muscles of the iris. **C. oscillato'ria**, see *Chorea*. **C., pandem'ic**, C. major. **C., par'tial**, see *Tic*. **C., post-hemiple'gic** and **pre-hemiple'gic**, choreiform movements before and after attack of hemiplegia. **C., rhyth'mic**, see *Chorea*. **C. rotato'ria**, see *Chorea*. **C. saltato'ria**, see *Chorea*. **C. sanc'ti Johan'nis** or **Modes'ti**, chorea. **C. s. Valenti'ni**, chorea; tarantismus. **C. s. Vi'ti**, chorea. **C. scripto'rum**, cramp, writer's. **C. seni'lis**, paralysis agitans and senile trembling. **C. of Syd'enham**, ordinary chorea.

Choregia, ko-rej'e-ah (*choros*, a troop of dancers and singers, *ago*, to lead). Hippocrates uses this term for the whole of the apparatus necessary for a physician or surgeon.

Choreic, ko-re'ik. Relating or appertaining to, or having the characters of, chorea; one affected with chorea.

Chore'iform. Resembling chorea.

Choremania, ko-re-man'e-ah (*choreia*, dance, *mania*). Chorea, especially C. Germanorum.

Choreoid, ko're-oid. Relating to the chorion.

Choreomania, ko-re-o-man'e-ah. Chorea.

Chorial, ko're-al. Relating to the chorion.

Chorio-blastoses, ko're-o-blas-to'ses (*chorion*, *blastano*, to sprout). Diseases of the chorion or of the corium and connective-tissue.

Chorio-capillaris, ko're-o-kap-il-lah'ris. Inner layer of capillaries of choroid coat of the eye.

Choriocele, ko-re-o-se'le (Eng. ko're-o-seel) (*chorion*, *kele*, tumor). Protrusion of the choroid tunic of the eye, resembling a hernia in appearance.

Choriodeïtis, ko-re-o-de-e'tis. Choroiditis.

Choriodes (ko-re-o'des), **Chorioïdea** (ko-re-o-e'de-ah), or **Chorioïdes**, ko-re-o-e'des. Choroid.

Cho'riodo-cycli'tis. Inflammation of the choroid extending to the ciliary body.

Cho'riodo-iri'tis. Inflammation of the choroid involving the iris; as in *Choriodo-retinitis* the retina is similarly affected.

Chorioïditis, ko-re-o-e-de'tis. Choroiditis.

Chorion, ko're-on (*chorion*, skin, or *choreo*, to contain). The true chorion; thin, transparent membrane surrounding the fœtus in utero on every side. It is a complex membrane made up of two parts, viz.: the membranes of the ovum, external to the pleuro-peritoneal cavity, that is to say, of the vitelline membrane and false amnion; and secondly, of the allantois, which is a diverticulum of the splanchnopleura and hypoblast pushed out into the pleuro-peritoneal cavity (Gray). Soon after the entrance of the ovum into the uterus, villous prolongations are formed on its surface, which have given it the name shaggy chorion or chorion frondosum. These villi are the agents of the absorption of nutritive matter for the fœtus. By some anatomists the chorion is considered to be formed of two layers: the outer, called by Burdach exochorion; the inner, endochorion. The chorion is exterior to the amnion. Also the true skin. See *Corium* and *Cutis*. By some the zona pellucida. **C., cys'tic disease of**, see *Hydatid mole*. **C. frondo'sum**, see *Chorion*. **C. fungo'sum**, decidua. **C. læ've**, non-villous part of the chorion. **C., prim'itive**, zona pellucida. **C. reticula'tum**, decidua. **C., shag'gy**, see *Chorion* and *Decidua*. **C. spongio'sum**, see *Decidua*. **C., spon'gy**, see *Decidua*. **C. tomento'sum**, see *Decidua*. **C., vil'lous**, C., shaggy.

Chorionic, ko-re-on'ik. Relating to the chorion.

Chorionitis, ko-re-on-e'tis (*chorion*, *itis*). Cystitis.

Chorio-retinitis, ko're-o-ret-in-e'tis. Choroiditis complicated with retinitis. **C.-r. dissemina'ta**, C.-r., usually syphilitic, followed by exudation and atrophy. **C.-r., equato'rial**, C.-r. affecting the periphery of the retina.

Choristocephalus, kor-is-to-sef'al-us. Double monster with separate heads.

Chorium, ko're-um. Chorion.

Choroid, ko'roid (*chorion*, skin, corium, *eidos*, resemblance). Several parts are so called which resemble the chorion in the multitude of their vessels. **C. ap'oplexy**, effusion of blood from the choroidal vessels, from traumatic causes, between the choroid and retina; detected by ophthalmoscopic examination. **C. ar'teries**, anterior choroid, small branch of the internal carotid, distributed especially to the choroid plexus. The posterior, similarly distributed, comes from the posterior cerebral. **C. coat**, see *Choroidea tunica*. **C. mus'cle**, ciliary muscle. **C. plex'us**, two membranous and vascular duplicatures of the pia mater, situate in the lateral ventricles; they are fixed to the tela choroidea by one edge, and are loose and floating at the other. **C., sarco'ma of**, see *Sarcoma*. **C. tu'nic** or **mem'brane**, choroidea tunica. **C. veins**, choroideæ venæ. **C. web**, choroidea tela.

Choroid'al ring. The outer ring, seen with the ophthalmoscope, which bounds the choroid coat of the eye at the entrance of the optic nerve.

Choroïdea (ko-ro-e'de-ah) **infe'rior.** Choroid plexus of fourth ventricle. **C. supe'rior**, choroid plexus of lateral ventricles. **C. te'la**, a kind of vasculo-membranous prolongation of the pia mater which lines the lower surface of the fornix united with the corpus callosum. It is stretched above the third ventricle, and covers the posterior commissure and corpora quadrigemina. Anteriorly, the tela choroidea is continuous with the plexus choroides. **C.** or **Chorioï'dea tu'nica**, or simply the *Choroid*, *Vascular membrane*, thin, highly vascular membrane, of a very dark color, which lines the sclerotica internally. The part behind the iris is called *Uvea*. Situate between the sclerotica and retina, it has an opening posteriorly for the passage of the optic nerve, and terminates anteriorly at the great circumference of the iris, where it is continuous with the ciliary processes. Its outer surface is pretty intimately attached to the sclerotica by blood-vessels and nerves, as well as by a delicate brown tissue, which has been called *Lamina fusca*. Its inner surface is smooth, and lies in contact with the retina. The choroid consists mainly of a dense capillary plexus and of small arteries and veins to and from this plexus. On its external surface, next the sclerotic, is a thin membrane of fine elastic fibres arranged in lamellæ, the *Lamina supra-choroidea*, continuous with the lamina fusca of the sclerotic, and covered with endothelium and forming spaces which communicate, by perforations in the sclerotic through which the vessels and nerves enter, with the capsule of Tenon. Internal to this is the *choroid proper*, consisting of two layers, the outermost composed of small arteries and veins, with pigment-cells interspersed between them, and the inner consisting of a capillary plexus. The *external layer* consists, in part, of the larger branches of the short ciliary arteries, but is formed principally of veins, the *venæ vorticosæ*, which converge to four or five equidistant trunks that pierce the sclerotic midway between the margin of the cornea and the entrance of the optic nerve. Interspersed between the vessels are dark star-shaped pigment-cells, fibrous offsets from which, communicating with similar branchings from neighboring cells, form a delicate network or stroma which toward the inner surface of the choroid loses its pigmentary character. The *internal layer* consists of an exceedingly fine capillary plexus formed by the short ciliary vessels, and known as the *Tunica Ruyschiana*, on the inner surface of which is a very thin, structureless—or, according to Kölliker, faintly fibrous—membrane, called the *lamina vitrea*, closely connected with the stroma of the choroid and separating it from the pigmentary layer of the retina (Gray). The layers of pigment-cells, called pigmentum nigrum, stratum pigmenti, ophthalmochroïtes, Æthiops animal, absorb the rays of light after they

have traversed the retina. Others make the choroid consist of three layers, the innermost of which is the *membrana pigmenti* or *Bruchii, membrane of Bruch.* **C. ve'næ,** two veins that creep along the tela choroidea, into which almost all those of the lateral ventricles of the upper part of the cerebellum, of the pineal gland, and the corpora quadrigemina open. The venæ Galeni open into the *sinus quartus* or *fourth sinus.*

Choroïdeitis, ko-ro-e-de-e'tis. Choroiditis.

Choroidere'mia. Absence of choroid.

Choroïdes (ko-ro-e'des) or **Choroïdeus,** ko-ro-e'de-us. Choroid.

Choroiditis, ko-ro-e-de'tis (*choroïdes, itis*). *Choroideïtis, Internal ophthalmia.* Inflammation of the choroid coat of the eye may be either specific, as from syphilis—*Syphilitic choroiditis*—or non-specific—*Simple choroiditis. Choroiditis disseminata* or *exudativa* is characterized by disseminated exudations of a buff color on the surface and into the tissue of the choroid, producing atrophy of the choroid. Choroiditis may be complicated with inflammation of the retina, sclerotica, iris, etc., as *Retino-choroiditis, Sclerotico-choroiditis, Choroido-iritis,* etc. *Suppurative choroiditis* involves all the tissues of the eye, and is generally of traumatic origin. See *Panophthalmitis.* **C. disseminа'ta,** see *Choroiditis.* **C. exudati'va,** see *Choroiditis.* **C. sero'sa,** see *Glaucoma.* **C., sim'ple,** see *Choroiditis.* **C., specif'ic,** see *Choroiditis.* **C., sup'purative,** see *Choroiditis* and *Panophthalmitis.*

Choroïdo-cyclitis, ko-ro-e'do-sik-le'tis. Inflammation of choroid and ciliary parts.

Choroïdo-iritis, ko-ro-e'do-e-re'tis. See *Irido-choroiditis.*

Choroïdo-retinitis, ko-ro-e'do-ret-in-e'tis. Inflammation of choroid and retina. See *Chorio-retinitis.*

Choromania, ko-ro-man'e-ah (*choros,* dance, *mania*). Chorea, especially C. Germanorum.

Chorosynclonus, ko-ro-sin'klo-nus (*choros,* dance, *sun, kloneo,* to raise a commotion). General chorea.

Chortasthma, kort-asth'mah (*chortos,* hay). Hay fever.

Chosis, ko'sis (*choo,* to heap up). Application of hot sand to the body, as in a sand bath.

Chow'der. A favorite New England dish, made of fish, pork, onions, and biscuit, stewed together. In Devonshire, England, chowder is a fish-seller. In the west of England *chowder beer* is a liquor made by boiling black spruce in water, and mixing it with molasses.

Chremma, krem'-mah (*chremma,* sputum). Sputum.

Chrempsis, kremp'sis. Exspuition.

Chrisis, kre'sis (*chrio,* to anoint). Action of anointing. Inunction.

Chrism. Chrisma.

Chrisma, kris'mah. The act of anointing; salve or liniment used.

Chris'tison's form'ula. Formula for calculating the solids in urine. Multipy the last two figures of the specific gravity by 2 for specific gravities below 1018, and by 2.33 for specific gravities above 1018, the result being the amount of solids per 1000 parts.

Christ'mas rose. Helleborus niger.

Christopher (kris'tof-er) **herb.** Actæa spicata.

Christophoria'na Canaden'sis racemo'sa. Actæa racemosa. **C. spica'ta,** Actæa spicata.

Christus, kris'tus (*christos,* anointed). Liniment or ointment.

Chroa, kro'ah. *Chræa, Chroma.* Color in general; surface of the body; skin.

Chro'ma (*chroa,* color). Color. See *Chroa.*

Chromacrinia, kro-mah-krin'e-ah (*chroma, krino,* to separate). Secretion of colored matter, as from the skin, by perspiration.

Chromasciameter, krom-as-ce-am'et-ur (*chroma,* color, *skia,* shadow, *metron,* measure). Apparatus for testing color-sense by contrasting colors.

Chromaskioptikon, kro-mah-ske-op'tik-on (*chroma,* color, *skia,* shadow, *optikos,* seeing). Apparatus for detecting color-blindness by the use of colored shadows.

Chro'mate. Salt of chromic acid.

Chromatelopsis, kro-mah-tel-op'sis (*chroma,* color, *ateles,* incomplete, *opsis,* sight.) Color-blindness.

Chromatic, kro-mat'ik. Relating to color. **C. aberra'tion,** see *Aberration.*

Chromatin, kro'mat-in. Cell-substance having special capacity for coloration; a delicate plexus of fibrils found in nuclei of cells. See *Nucleoplasm* and *Karyoplasm.*

Chromatism, kro'mat-izm. Color production; unnatural coloration.

Chromatogenous, kro-mat-oj'en-us (*chroma, gennao,* to generate). Producing color, as *chromatogenous apparatus.* **C. appara'tus,** suppositious glandular apparatus for producing the coloring matter of the skin, composed of a glandular or secreting parenchyma, situate a little below the papillæ, and presenting special excretory ducts, which pour out the coloring matter on the surface of the true skin.

Chromatol'ogy (*chroma, logos,* description). Science of colors. Examination of color spectroscopically.

Chromatometablepsia, kro-mat-o-met-ah-blep'se-ah (*chroma,* color, *meta, blepo,* to look upon). Color-blindness.

Chromatometer, kro-mat-om'et-ur (*chroma, metron,* measure). Color-measuring instrument.

Chromatometry, kro-mat-om'et-re. Measurement of relativeness of color intensity.

Chromatopathic, kro-mat-o-path'ik (*chroma, pathos,* disease). Affecting the pigment system of the skin. Chromatopathic affections include melasma, leucasmus, xanthocroia, achroma, ephelis, etc.

Chromatophobia, kro-mat-o-fo'be-ah (*chroma, phobos,* dread). Morbid sensibility to certain colors.

Chromatopseudopsia, kro-mat-o-su-dop'she-ah (*chroma, pseudes,* false, *opsis,* vision). Achromatopsia.

Chromatopsia, kro-mat-op'se-ah. Chromopsia.

Chromatoptometry, kro-mat-op-tom'et-re. Measurement of color sense.

Chromatoses, kro-mat-o'ses. Skin diseases characterized by excess or absence or deficiency of pigment.

Chromatosis, kro-mat-o'sis. Pigmentation of tissue.

Chromatoskiameter, kro-mat-o-ski-am'et-ur. Chromaskiopticon.

Chromaturia, kro-mat-u're-ah (*chroma, ouron,* urine). Discharge of urine of an unnatural color.

Chrome alum. Sulphate of chromium and potassium.

Chromhidro'sis or **Chromidrosis,** kro-mid-ro'sis (*chroma, hidros,* sweat). Abnormal coloration of the perspiratory secretion, as in stearrhœa nigricans, seborrhœa nigricans, and pityriasis nigricans.

Chromhydrosis, krom-hid-ro'sis (*chroma, hudor,* water). Stearrhœa nigricans.

Chromic acid, kro'mik as'id. *Acidum chromicum* (CrO_3), chromic anhydride. Obtained by crystallization from a mixture of *bichromate of potassa* and *oil of vitriol.* Has been used as an escharotic in external hemorrhoids, and is well suited to the destruction of morbid growths, condylomata, excrescences, etc., being said to give less pain than other caustics. It is used in dentistry as a hemostatic for painting on syphilitic ulcers, and as an application to tender and sweaty feet in ozæna and gonorrhœa.

Chromidrosis, kro-mid-ro'sis (*chroma,* color, *hidrosis,* sweat). Condition attended with coloration of the sweat.

Chro'mium. An element whose compounds are but little used in medicine; chromic acid is a teroxide, **C., hy'drated sesquiox'ide of,** this substance has been employed as an astringent and tonic in cholera infantum and other diseases of the alimentary canal.

Chromoblast, kro'mo-blast (*chroma, blastos,* bud). A pigment-producing cell.

Chromocrinia, kro-mo-krin'e-ah (*chroma, krino,* to separate). Secretion of colored matter, as from the skin, by perspiration. Chromidrosis.

Chromocytom'eter. Instrument for determining the amount of hæmoglobin in the blood.

Chromogen, kro'mo-jen (*chroma, gennao,* to produce). Animal tissue color-producing in certain chemical contacts. Micro-organisms which form pigment are called *Chromogenes.*

Chromogenetic, kro-mo-jen-et'ik. Chromogenic.

Chromogenic, kro-mo-gen'ik. Color-producing, as in the case of the bacterium rubescens.

Chromogenous, kro-moj'en-us. Chromogenic, chromogenetic.

Chromoleptic, kro-mo-lep'tik (*chroma, lambano,* to take). Easily colored.

Chromomictor, kro-mo-mik'tor. Apparatus for mingling different-colored lights.

Chromophane, kro'mo-fane (*chroma, phaino,* to show). Coloring substance of retina.

Chromophanes, kro'mo-fanes. Retina colors, chlorophane, xanthophane, and rhodophane—green, yellow, and red.

Chromophilous, kro-mof'il-us (*chroma, phileo,* to love). Easily colored; chromoleptic. Term applied in particular to cell-nucleus.

Chromophytosis, kro-mo-fit-o'sis (*chroma, phuton,* growth). In this country synonymous with tinea versicolor; in continental Europe with pityriasis versicolor. Phytosis versicolor.

Chromopseudopsis, kro-mo-su-dop'sis. Color-blindness.

Chromopsia, kro-mop'se-ah (*chroma, opsis,* vision). *Chroöpsy, Chromopsy, Iridescent vision.* State of vision in which a colored impression, as of the rainbow, is made on the retina; said to be observed in inflammation of the optic nerve, jaundice, etc.

Chromoptometer, kro-mop-tom'et-ur (*chroma, metron,* measure). Apparatus for testing color sense.

Chromosteatodes, kro-mo-sta-at-o'des (*chroma, stear,* fat). Affection of the skin characterized by alteration in the color of the sebaceous secretion.

Chronic, kron'ik (*chronos,* time). Of long duration. **C. diseases** are those whose duration is long or whose symptoms proceed slowly; the antithesis to chronic is acute.

Chronicity, kro-nis'it-e. State of being chronic, as a disease.

Chronius, kro'ne-us. Chronic.

Chronograph, kro'no-graf (*chronos,* time, *grapho,* to write). Instrument for recording intervals of time.

Chronogynia, kro-no-jin'e-ah (*chronos,* time, *gune,* a woman). Menstruation.

Chrononosi, kro-non'o-se (*chronos, nosos,* disease). Chronic diseases.

Chronopathiæ, kro-no-path-e'e (sing. **Chronopathi'a**) (*chronos, pathos,* affection). Chronic diseases.

Chronoscope, kro'no-skope (*chronos, skopeo,* to view). Electro-magnetic clock for recording fractional parts of a second.

Chronothermal, kro-no-thur'mal (*chronos,* time, *therme,* heat). Relating to time and temperature; epithet given to a fanciful system which maintains that there can be no increase or diminution of temperature without motion; that motion consists in attraction and repulsion, and these being peculiar to electric action, medicines must change the motions of the system and be electrical in their operation.

Chroöpsy, kro-op'se (*chroa,* color, *opsis,* vision). State of vision in which a colored impression, as of a rainbow, is made on the retina.

Chrotici, krot'is-e (*chros,* skin). Cutaneous diseases.

Chrotopsia, kro-top'se-ah (*chroa,* color, *opsis,* vision). Chroöpsy.

Chrupsia, kroop'se-ah (*chroa,* color, *opsis,* vision). Chroöpsy.

Chrupsy, kroop'se. Chroöpsy.

Chrysa fibraurea, kre'sa fib-raw're-ah (*chruseos,* of a golden color). Coptis.

Chrysalea, kris-al'e-ah. Nitromuriatic acid.

Chrysalis, kris'al-is (*chrusos,* gold). The pupa of insects.

Chrysammic acid, kris-am'ik as'id (*chruseos,* golden, *ammos,* sand). Acid obtained from aloes or from treating chrysophanic acid with nitric acid.

Chrysanilin, kris-an'il-in. Anilin yellow.

Chrysanthemum, kris-an'them-um (*chryso, anthemon,* flower). Calendula officinalis. **C. leucan'themum,** *Ox-eye daisy, Daisy, Whiteweed, Goldens, Maudlinwort,* ord. Compositæ; flowers and herb are slightly acrid, and were once used in pulmonary diseases. **C. parthe'nium,** Matricaria parthenium.

Chrysarobin, kris-ar-o'bin (*chruseos,* golden, *araroba*). $C_{30}H_{26}O_7$. Chrysarobinum (Ph. U. S. and Br.); extract from Goa powder, product of decay of Andira araroba, of Brazil; a yellow powder, found very useful in cutaneous affections, as psoriasis and chronic eczema; internally it is emetic and cathartic.

Chryse, kris'e (*chruseos,* golden). Name of an ancient yellow plaster, composed of thus, alum, lead, colophony, resin, oil, and orpiment, boiled in vinegar.

Chrysitis, kris-e'tis (*chrusites,* golden). See *Plumbi oxidum semivitreum.*

Chryso, kris'o (*chrusos,* gold). In composition, gold.

Chrysobalanus Galeni, kris-o-bal'an-us gal-a'ne (*chryso, balanos,* nut). See *Myristica moschata.*

Chrysobarin, kris-o-bar'in. Chrysarobin.

Chrysochalcus, kris-o-kal'kus (*chryso, chalkos,* copper). Brass.

Chrysocolla, kris-o-kol'lah (*chryso, kolla,* glue or cement). Borax.

Chrysocoma, kris-ok'o-mah (*chryso, kome,* hair). Achillea millefolium.

Chrysokreatinin, kris-o-kre-at'in-in (*chruseos,* golden, *kreas,* meat). A leucomaïne from muscle resembling kreatinine.

Chrysolachanum, kris-o-lak'an-um (*chryso, lachanon,* potherb). Chenopodium bonus Henricus.

Chrysolepic acid, kris-o-lep'ik as'id. Picric acid.

Chrysolithus, kris-ol'ith-us (*chryso, lithos,* stone). *Chrysolite.* Precious stone, of a golden color, regarded by the ancients as cardiac, cephalic, etc.

Chrysomelia, kre-so-me'le-ah (*chryso, melon,* apple). See *Citrus aurantium.*

Chrysophan, kris'of-an (*chrusos, phaino,* to shine). Yellowish powder obtained from senna and rhubarb.

Chrysophanate (kris-of'an-ate) **of zinc.** Brownish-red powder; compound of chrysophanic acid and zinc.

Chrysophanic (kris-o-fan'ik) **acid.** Acid derived from Goa powder, senna, rhubarb, and several other vegetable substances; and by oxidation from chrysarobin.

Chrysophyllum (kris-o-fil'lum) **Buranhem** (*chryso, phullon,* leaf). Monesia. **C. caini'to,** broad-leaved star apple. Tree of the Antilles, ord. Sapotaceæ, which produces one of the best fruits of the country; there are several varieties of it. **C. glyciphlæ'um,** monesia.

Chrysopus, kris'o-pus (*chruseos,* of a golden color). Cambogia.

Chrysos, kris'os (*chrusos*). Gold.

Chrysospermum, kris-o-spur'mum (*chryso, sperma,* seed). Sempervivum tectorum.

Chrysosplenium, kris-o-splen'e-um. Genus of Saxifragaceæ. **C. alternifo'lium** and **C. oppositifo'lium,** two species, the herbs of which were formerly employed as mild laxatives.

Chthonophagia, thon-o-fah'je-ah (*chthon,* earth, *phago,* to eat). Dirt-eating. Disorder of the nutritive functions observed among the negroes of the South and of the West Indies, in which there is an irresistible desire to eat dirt. It is accompanied by most of the signs of chlorosis. The Ottomacs on the Orinoco, and the natives of portions of the Hudson's Bay territory, are *Chthonoph'agi,* or earth-eaters, the earth being a form of steatite. See *Geophagism.*

Chthononosology, thon-o-nos-ol'o-je (*chthon,* earth, *nosos,* disease, *logos,* description). The geography of diseases.

Chumosis, ku-mo'sis. Chemosis.

Chunus. See *Lichen tropicus.*

Churn'milk. Buttermilk.

Chur'rus. See *Cannabis.*

Chus (*choos*). Liquid measure among the Greeks, answering to the *congius* of the Romans, and containing six sextarii, or twelve Attic cotylæ, or nine pints.

Chyazic, ke-az'ik. Relating to hydrocyanic acid.

Chylangioma, kil-an-je-o'mah (*chylus, angioma*). Dilated condition of the lymphatics.

Chylar, kile'ar. Chylous.

Chylarion, kil-ar'e-on. See *Chyle.*

Chylariose, kile-a′re-oze. The natural sugar of fruits.

Chyle, kile (*chulos,* juice, or *chuo,* to pour). The word, in Hippocrates, means *Tisane* or *Decoction of Barley, Chyla′rion.* Galen first used it in its present sense—*i. e.* for a nutritive fluid, extracted by intestinal absorption from food which has been subjected to the action of the digestive organs. It is of a whitish appearance, and is formed from the chyme in the duodenum, and the rest of the small intestines, by the chyliferous vessels, which arise at the mucous surface of the intestine. Along these it passes through the mesenteric glands to the thoracic duct, and is finally poured into the left subclavian. It is composed, like the blood, of a fluid—liquor chyli—and of chyle-corpuscles or globules, the average size of which is about $\frac{1}{4000}$ of an inch. They who regard the chyle to be nothing more than fatty matter of the food apply the term to the emulsified oil in the intestinal canal even before it is taken up by the chyliferous vessels. See *Chyme.* **C. cor′puscles,** see *Chyle.* **C. res′ervoir,** receptaculum chyli. **C. ves′sels,** lymphatics of the mesentery.

Chylectica, kil-ek′tik-ah (*chylus, hektikos,* hectic). Disease associated with secretion of chyle.

Chyletus scabiei, kil-a′tus ska-be′a-e. Acarus scabiei.

Chylidrosis, kil-id-ro′sis (*chylus, hidrosis,* sweating). Sweating of milky fluid.

Chyliferous, kile-if′er-us (*chylus, fero,* to carry). Chyle-bearing. **C. ves′sels,** *Lacteals;* vessels which convey the chyle from the intestines to the thoracic duct. They have also been called *Galactophorous vessels.*

Chylification, kile-if-i-ka′shun (*chylus, facio,* to make). Formation of chyle during the digestive processes. It has, at times, been applied to the changes produced on the aliment in the small intestine, but is now restricted to the act of forming chyle at the radicles of the chyliferous vessels.

Chyline, kil-e′na. Cyclamen.

Chylisma, kil-iz′mah (*chulizo,* to press out juice). Expressed juice, or even the dregs, of plants.

Chylismus, kil-iz′mus. The act of expressing the juice of vegetables, etc.

Chylocystis, kil-o-sis′tis (*chylus, kustis,* bladder). Receptaculum chyli.

Chylodes, kil-o′des. Chylous.

Chylodiabetes, kile-o-di-ah-be′tes. Chyluria.

Chylodiarrhœa, kile-o-di-ar-rhe′ah. Cœliac flux.

Chylodochium, kil-o-dok-e′um (*dechomai,* to receive). Receptaculum chyli.

Chylography, kile-og′ra-fe (*chylus, graphe,* description). Description of the anatomy, etc. of the chyliferous vessels.

Chylo-pericardium, kil′o-per-e-kar′de-um. Effusion of chyle within the pericardium.

Chylopoëtic, kile-o-po-et′ik. Relating to or connected with the formation of chyle; chiefly applied to the organs immediately concerned in it, as the stomach, intestines, omenta, and mesentery. *Assistant chylopoëtic* organs are viscera which aid in the formation of chyle, as the liver and pancreas.

Chylopoiesis, kil-o-poi-e′sis (*chylus, poieo,* to make). Chylification.

Chylorrhœa, kil-or-rhe′ah (*chylus, rheo,* to flow). Excessive flow of chyle; diarrhœa with milk-colored discharges; cœliac flux. **C. pec′toris,** chylothorax. **C. rena′lis,** chyluria. **C. urina′lis,** chyluria.

Chylosis, kil-o′sis. Chylification.

Chylothorax, kil-o-tho′raks (*chylus, thorax,* chest). Effusion of chyle into the chest, owing to the rupture of a chyliferous vessel.

Chylous, ki′lus. Relating to chyle, or having some analogy to that fluid.

Chyluria, kil-u′re-ah (*chylus, ouron,* urine). *Chylous urine.* Discharge of milky urine without any apparent lesion of the kidneys or bladder.

Chylus, ki′lus. Chyle; decoction; succus.

Chyme, kime (*chumos,* juice, or *chuo,* to pour). *Chymus.* Pulp formed by the food mixed with the supradiaphragmatic and gastric secretions after it has been for some time in the stomach. In this state it continues until it reaches the biliary and pancreatic ducts, which open into the duodenum, where the conversion into chyle occurs, which is absorbed by the chyliferous vessels—the excrementitious portion of the food traversing the large intestine to be evacuated *per anum. Chyme* and *Chyle* were used in an inverse sense by the ancients to that accepted at present.

Chymi, kim′e (*chumoi*). Humors.

Chymi′a, Chymia′ter, Chym′ical, Chym′ist, Chym′istry, etc. See corresponding words commencing with *Chem.*

Chymification, kime-if-i-ka′shun (*chymus, facio,* to make). Formation of chyme. See *Chyme.*

Chymochezia, kim-o-ka′ze-ah (*chymus, chezo,* to go to stool). Cœliac flux.

Chymoplania, kim-o-plan′e-ah (*chymus, plane,* a wandering). Transposition of secretions. Family of diseases, including icterus, uroplania, menoplania, and galactoplania.

Chymorrhœa, kim-or-rhe′ah (*chymus, rheo,* to flow). Cœliac flux; lientery.

Chymosin, kim-o′sin. Pepsin.

Chymosis, kim-o′sis. Chemosis; chymification.

Chymous, ki′mus. Relating to or resembling chyme.

Chymozemia, kim-o-za′me-ah (*chymus, zemia,* loss). Morbid increase in the quantity of the secretions.

Chymus, ki′mus. Chyme.

Chytlen (chit′len) **ra′dix.** Cylindrical root, bitter and inodorous, brought from China. The Chinese regard it as stomachic.

Chytlon, chit′lon (*chuo,* to pour out). Liquid formerly used for rubbing the body after bathing.

Cibarious, se-ba′re-us. Esculent.

Cibarium, se-bah′re-um (*cibus*). Aliment.

Cibarius panis, se-bah′re-us pan′is. Coarse bread. Bread made of second flour.

Cibation, se-bah′shun (*cibus,* food). The taking of food. In pharmacy it is the same as incorporation.

Cibotium (se-bo′te-um) or **Cibo′tion.** Genus of ferns. **C. Bar′ometz,** growing in China; rhizome possesses astringent properties; the hairs are also employed in medicine.

Cibus, se′bus. Aliment. **C. al′bus,** blanc mange. **C. deo′rum,** asafœtida.

Cicatrices (pl. of **Cicatrix**) **ovariorum,** sik-at-re′ses o-var-e-o′rum. Cicatrices or scars left in the ovary after escape of the ova.

Cicatricial, sik-at-rish′al (*cicatrix*). Relating or appertaining to, or having the character of, a cicatrix. **C. tis′sue,** variety of connective tissue in which but few cells and vessels are present; it exists in wounds and ulcers when they are undergoing the process of healing.

Cicatriciform (sik-at-ris′i-form) or **Cicat′riform.** Resembling a cicatrix.

Cicatricula, sik-at-rik′u-lah (dim. of **Cicatrix**). Small cicatrix. The term is also applied to a small white spot, called the *tread, chalaza, chalazium,* observable at the surface of a fecundated egg. Archiblast; the blastoderm of an egg; see *Molecule.*

Cicatrisantia, sik-at-riz-an′she-ah. Remedies formerly considered to be capable of producing cicatrization.

Cicatrix, sik-a′triks (*cæco,* to conceal, because it conceals the wound). *Cicatrice.* Scar; seam. Union of parts which have been divided. A *scar* or formation, of a reddish color, afterward whitish, and of variable thickness, which takes place at the surface of wounds or ulcers after their cure. A cicatrix may vary much in shape, consistence, and thickness. The cicatrix of a bone is called callus. A *vicious cicatrix* is one which interferes with the action of the parts on which it occurs. The *scars* after small-pox are called *pits* or *pockmarks;* see *Pockmark.* **C., atroph′ic,** C. depressed below the level of the surrounding surface. **C., hy′pertrophic,** C. elevated above the surrounding surface. **C. vari′olæ,** pockmark. **C., vic′ious,** see *Cicatrix.*

Cicatrization, sik-at-ri-za′tion. Process by which

a cicatrix is formed. Every tissue, except the nails, epidermis, hair, and enamel, is, probably, capable of cicatrization.

Cicely (sis'el-e), **sweet.** Chærophyllum odoratum, Osmorrhiza longistylis, Scandix odorata.

Cicer arietinum, se'ser ar-e-at-e'num. *Cicer plant.* Seeds are ground into flour, and used as bread in some countries. **C. lens,** Ervum lens.

Cicera tartari, sis'er-ah tar'tar-e. Small pills of turpentine and cream of tartar, of the size of a vetch or cicer.

Cichore, sik-o're. Cichorium intybus.

Cichoreum. Cichorium.

Cichoria. Cichorium intybus.

Cichorium (sik-o're-um) **agres'te** or **cris'pum.** C. intybus. **C. endiv'ia,** systematic name of the *Endive, Endivia,* or *Endiva.* Common potherb of the East, and eaten as salad; the root roasted and ground is often mixed with coffee. **C. in'tybus,** systematic name of the *Wild succory, Wild cichory, Cichory, Chicory, Wild endive, Witloof succory, Bunk.* It is bitter, and has been given as a tonic and alterative; root, roasted and ground, is often used instead of, or mixed with, coffee. **C. officina'rum** or **silves'tre,** C. intybus.

Cichory, sik'o-re. Cichorium intybus. **C., wild,** Cichorium intybus.

Cici, se'se. Ricinus communis.

Cicindela, sis-in-da'lah (dim. of **Candela,** candle). Glowworm; once thought to be anodyne and lithontriptic.

Cicinnus, sis-in'nus. Hair on the temples. Relating to castor-oil plant.

Cicinobolus, sis-in-ob'o-lus (*kikinos,* relating to castor-oil plant, *bolus*). Bolus of root of castor-oil plant and tobacco leaves, used in veterinary medicine.

Cicinus, sis-in'us. Cicinnus.

Cicis, se'sis. See *Quercus infectoria.*

Cicongius, se-kon'je-us. An ancient measure containing 12 pints.

Cicuta, sik-u'tah. Conium maculatum; æthusa. **C. amo'mum,** seeds are diuretic and carminative. **C. angustifo'lia,** variety of C. virosa, used externally in rheumatism; very poisonous. **C. aquat'ica,** C. virosa. *Water hemlock, Cowbane, Brook-tongue, Deathin, Devil's salep, Scoots, Poison turnip.* Not used internally; violent poison, often eaten by mistake for *Wild smallage,* Apium graveolens. It produces tremors, vertigo, burning at the stomach, and all the symptoms occasioned by the narcotico-acrid class of poisons. **C. Califor'nica,** variety of C. virosa growing in the U. S. near the Pacific. **C. cyna'pium,** Æthusa cynapium. **C. macula'ta,** *American water hemlock, American hemlock, Snakeweed, Death of man, Water parsley, Poison root, Wild hemlock, Children's bane, Spotted cowbane,* is analogous in botanical character and medical properties to the European species; see *Conium maculatum.* **C. ma'jor,** Conium maculatum. **C. ma'jor fœt'ida** or **vulga'ris,** Conium maculatum, **C. officina'le,** fresh young parts of Conium maculatum. **C. Stoerk'ii,** Conium maculatum. **C. tenuifo'lia,** C. angustifolia. **C. terres'tris,** Conium maculatum. **C. viro'sa,** Cicuta aquatica. **C. vulga'ris,** Conium maculatum.

Cicuta'ria. Chærophyllum sylvestre. **C. aquat'ica,** Cicuta aquatica, Phellandrium aquaticum. **C. odora'ta,** Chærophyllum odoratum. **C. viro'sa,** Cicuta aquatica.

Cicutine, sik-u'teen. See *Conium.* Volatile alkaloid from Cicuta virosa. **C., bromhy'drate of,** coniine hydrobromide.

Cicutox'ine, sik-u-tox'een. Poisonous acid liquid obtained from Cicuta virosa.

Cider. *Cyder.* Said to have been formerly written *sidre,* and to have come from *Sicera,* which signifies any kind of fermented liquor other than wine. It is made from the juice of apples, and is a wholesome drink; liquor similarly prepared from pears is called *Perry.* In some of the cider regions of England a *cider colic* sometimes prevails, probably due to an excess of acetic acid.

Cido'nium. Cydonium.

Cigar, se-gar'. *Cigarra* (S.), *Cigarro.* Small tubular roll of tobacco, used for smoking; some of the medicinal or medicated cigars or cigarettes are made of dried plants, with or without the addition of medicinal articles. When rolled in paper they form *cigarettes,* which may be used with or without combustion. Arsenical cigarettes are made of paper impregnated with an aqueous solution of arsenious acid or of arseniate of soda, and dried. Those of nitre are prepared by soaking blotting-paper in a nearly saturated solution of nitrate of potassium; stramonium is also employed for a similar purpose.

Cigarette, sig-ar-et'. See *Cigar.* Cigarettes of belladonna contain 1 gr. each of the leaf of belladonna; cigarettes of digitalis each contain 1 gr. of digitalis; while those of eucalyptus contain each 1 gr. of eucalyptus. Mercurial cigars or cigarettes are made by steeping denarcotized tobacco in a weak corrosive-sublimate solution, opium being added. See *Cigar.*

Cigarra, se-gar'rah. Cigar.

Cignus, sig'nus. An ancient measure which contained about two drachms.

Cilia, sil'e-ah (singular **Cilium**). Eyelashes; hairs on the eyelids. Their use seems to be to prevent the entrance into the eye of light bodies flying in the atmosphere, and to diminish in certain cases the intensity of light. Also, the tarsi or eyelids. Likewise, a peculiar sort of moving organs resembling small hairs, *vibratory* or *vibratile cilia,* attached to special anatomical elements, *epithelial, vibratile,* or *ciliary cellules,* which are visible with the microscope in many animals, and even in some bacteria. They are found on parts of the body habitually in contact with water or other more or less fluid matters, and produce motion in these fluids, impelling them along the surface of the parts. Cilia have been found to exist in all animals except crustaceæ, having been discovered on the respiratory, uterine, and other membranes of mammalia, birds, and reptiles. In the higher animals which possess them they are internal, but on the protozoa possessing them, external.

The terms *vibratory motion* and *ciliary motion* have been used to express the phenomena exhibited by the moving cilia, and this motion is probably concerned in the progression of fluids along the membranes. The motion is in the direction of the outlets of canals. **C., invert'ed,** inversion of the eyelashes or of the free edges of the eyelids upon the ball of the eye. **C., vi'bratile** or **vi'bratory,** see *Cilia.*

Cil'iar. Ciliary.

Cilia'res glan'dulæ. Meibomian glands.

Ciliaris, sil-e-ah'ris. Ciliary. Orbicularis palpebrarum. **C. circula'ris,** circular fibres of ciliary muscle. **C. radia'lis,** radiating fibres of ciliary muscle. **C. Riola'ni** (after Riolan, the French anatomist), transversely striated muscular fasciculi in the eyelid, running parallel with and close to the margin of the lid.

Ciliary, sil'e-ar-e. Relating to the eyelashes or to cilia. Term also applied to different parts entering into the structure of the eye, from the resemblance between some of them (ciliary processes) and the eyelashes. **C. ar'teries,** these are furnished by the ophthalmic artery. They are distinguished into—1. *Short* or *posterior,* 30 or 40 in number, which are distributed to the ciliary processes. 2. *Long,* two in number, which, by the anastomosis of their branches, form two arterial circles at the anterior surface of the iris. 3. The *anterior, Arteriæ ciliares anteriores* of Haller, the number of which is variable. These pierce the sclerotic a few lines from its union with the cornea, and are principally distributed to the iris. **C. bod'y,** *Ciliary disk.* Ring of the choroid surrounding the crystalline in the manner of a crown, placed behind the iris and the ciliary circle; resembling the disk of a radiated flower, and formed by the union of the ciliary processes. See *Ciliary muscle.* **C. canal',** *Canal of Fontana.* Small, extremely narrow circular space, formed between the ciliary circle, the cornea, and the sclerotica. It can be filled with injection, and it is not certain that it is not the cavity of a blood-vessel, and hence has been called *Circulus*

venosus iridis. **C. cir'cle,** ciliary ligament. **C. disk,** ciliary body. **C. epithe'lium,** see *Epithelium.* **C. gan'glion,** ophthalmic ganglion. **C. lig'ament,** *C. Circle* or *Ring, Commissure of the uvea.* Species of grayish ring, of a pulpy consistence, situate between choroid, iris, and sclerotica. The internal surface of the choroid is uniform until it approaches within ten lines and a half of the edge of the cornea; here a dentated line is observed, termed *ora serrata.* The outer surface presents the annulus albidus or gangliformis, the anterior edge of which unites to the inner surface of the sclerotica and constitutes the ciliary ligament. **C.** or **tar'sal mar'gin of the eyelids,** edge in which the cilia or eyelashes are situate. **C. mo'tion,** see *Ciliary.* **C. mus'cle,** the part of the orbicularis palpebrarum in the vicinity of the ciliary margin. Also, the grayish, semitransparent structure behind the ciliary ligament, and covering the outside of the ciliary body. By its contraction the ciliary processes, and with them the lens, must be drawn toward the cornea. It appears to be the same muscle as the *Tensor choroïdeæ, Protrahens lentis, Musculus Brueckianus, Choroid muscle* of some anatomists. Its circular fibres constitute the *compressor lentis muscle.* **C. mus'cle of Riolan,** ciliaris Riolani. **C. nerves,** 12 to 16 in number. They arise from the nasal nerve, and particularly from the anterior part of the ophthalmic ganglion, and unite in two fasciculi, which pass around the optic nerve, and pierce the sclerotica near the entrance of that nerve into the eye. They are lost in the ciliary ligament. **C. neural'gia,** neuralgic pain in the brow, temples, etc. **C. plex'us,** C. ligament. **C. pro'cesses,** triangular folds, 60 or 80 in number, placed at the side of each other, and radiating so as to resemble the disk of a radiated flower. They are lodged in depressions at the anterior part of the vitreous humor. **C. re'gion,** region at inferior part of cornea and ciliary body. **C. ring,** ciliary ligament. **C. stri'æ** are numerous pale, radiated striæ in the posterior portion of the ciliary body, but so covered by pigmentum as not to be distinctly seen till the paint is removed. The ciliary processes are formed by these striæ. **C. veins** follow nearly the same course as the arteries. In the choroid they are so tortuous that they have received the name *vasa vorticosa.* They open into the ophthalmic vein. **C. zone;** under the corpus ciliare, the capsule of the vitreous humor sends off an external lamina, which accompanies the retina, and is inserted with it into the fore part of the capsule of the lens, a little before its anterior edge. This is the *Zonula ciliaris* or *Zinnii, Zonula* or *Zone of Zinn, Zone of Haller.* It is of a striated appearance and circular form, and assists in fixing the lens to the vitreous humor.

Ciliated (sil'e-a-ted) or **Cil'iate.** Provided with cilia, as ciliated epithelium, the epithelium to which vibratory cilia are attached.

Cilia'tion. State of being possessed of cilia.

Ciliform, sil'e-form (*cilium, forma*). Resembling a cilium.

Cilio-retinal, sil'e-o-ret'in-al. Relating to posterior ciliary system and retina.

Cilio-spinal, sil'e-o-spi'nal. Relating to portion of spinal cord controlling ciliary movements. **C.-s. cen'tre,** see *Centre.*

Cilium, sil'e-um. Eyelash. See *Cilia.*

Cillo, sil'lo (*killo,* to move). Name given by some authors to a perpetually tremulous upper eyelid; a trembling which in some cases is called *Life's blood.*

Cillosis, sil-lo'sis. Cillo.

Cilo, se'lo. Procephalus; a fœtus whose head is so large as to impede delivery; transverse tract of the peduncle; tractus transversus pedunculi.

Cimbia, sim'be-ah. Fasciculus arciformis pedis.

Cimex (se'meks) **lectula'rius.** *Bed-bug* or *Chinche;* once used medicinally.

Cimicifuga, sim-e-sif'u-gah (*cimex, fugo,* to drive away). See *Actæa racemosa.* **C. fœt'ida,** fœtid bugbear, so called from its offensive odor. **C. racemo'sa,** Actæa racemosa. **C. serpenta'ria,** species of the United States and Florida; root is officinal. *Cimicifuga* (Ph. U. S. and Br.) is employed in chorea and rheumatism.

Cimicifugin, sim-e-sif'u-gin. Crystallizable principle obtained from cimicifuga.

Cimina'lis. Gentiana.

Cimmaro'ma. The pulp of this plant of Spain and Brazil is laxative.

Cimolia purpurescens, sim-o'le-ah pur-pur-es'ens. *Fuller's earth;* compact bolar earth employed in the arts; used at times as a cooling application to inflamed nipples, etc. **C. ter'ra,** *Cimolite,* from Kimolos, an island in the Cretan Sea, where it was procured; formerly used as an astringent.

Cina (se'nah). Artemisia santonica and other varieties of Artemisia; anthelmintic. **C. ci'na,** cinchona. **C. levan'tica,** see *Cina* and *Artemisia santonin.* This is the only variety of Cina now imported.

Cinabaris, sin-ab'ar-is. Hydrargyri sulphuretum rubrum.

Cinabarium, sin-ab-ar'e-um. Hydrargyri sulphuretum rubrum.

Cinabra, sin'ab-rah. The smell of a he-goat; rank smell, like that of the armpit; Hircus alarum; bromidrosis.

Cinæ'bene. A constituent and volatile oil of artemisia.

Cinædia, sin-e'de-ah (*kinaidia*). Masturbation; pæderasty; excessive indulgence of sexual appetite.

Cinædis'ma. Cinædia.

Cinædus, sin-e'dus. A subject of buggery.

Cinara, sin'ar-ah. Artichoke. **C. horten'sis,** Cynara scolymus. **C. scol'ymus,** Cynara scolymus.

Cinchamidine, sin-kam'id-een. *Hydrocinchonidine.* Alkaloid from mother-water from which cinchonidine has been extracted.

Cinchene, sin'keen. Base ($C_{19}H_{20}N_2$) obtained from cinchonine.

Cinchocerotin. sin-ko-ser'o-tin. $C_{27}H_{48}O_2$. Substance derived from some forms of S. American calisaya bark.

Cinchoïdinum, sin-ko-id-e'num. Cinchonidine.

Cinchol, sin'kol. $C_{20}H_{34}O$. Substance like cholesterin, from Cinchona officinalis.

Cincholine, sin'kol-een. Volatile oily liquid alkaloid from mother-water of quinine.

Cinchona (sin-ko'nah) or **Chincho'na.** (So called from the Spanish viceroy's lady, the Countess de Chinchon, who was cured of fever by it at Lima, about 1638.) Called also *Jesuit's bark* or *powder, Cortex patrum,* because it was introduced into Europe by the Jesuits; also *Countess's powder* and *Cardinal del Lugo's powder,* because he introduced it at Rome; and in France, *Talbor's powder* and *English remedy,* because successfully used there by Sir Robert Talbor, who kept it a secret. Pharmacopœial name of several kinds of bark from the various species of cinchona, containing at least 3 per cent. of the proper cinchona alkaloids (Ph. U. S.), ord. Cinchonaceæ. The richest in the antiperiodic alkaloids is said to be the bark of *Cinchona succirubra* of Ecuador, which, with other species, has been transplanted to India, Java, Jamaica, and other countries. The productiveness in alkaloids seems to have been increased by such transplantation. Cinchona is called also *Santonica bark, Peruvian bark, Kina* or *Quina, Bark of barks, Kinkina, Cina cina, Quinquina, Magnum dei donum,* and in Peru *Cascara* and *Cascarilla.*

A large number of natural alkaloids have been obtained from cinchona bark, and many artificial ones, which will be referred to under their appropriate heads. Several of these possess therapeutic interest, the chief of which, quinia, cinchonia, and other alkaloids, exist in combination with kinic, cinchonic, or quinic acid as kinates. *Quinia,* $C_{20}H_{24}N_2O_2$, is derived largely from the yellow; *cinchonine,* $C_{29}H_{22}N_2O$, from the pale bark. *Quinidia* or *quinidine,* $C_{20}H_{24}N_2O_2$, is another alkaloid, isomeric with quinia; *cinchonidia* or *cinchonidine,* $C_{19}H_{22}N_2O$, with cinchonia; and *quinicia* or *quinicine* and *cinchonicia* or *cinchonicine* are isomeric with cinchonine and cinchonidia, from which they are derived by heat. *Quinamine,* $C_{19}H_{24}N_2O_2$, and

conquinamine, $C_{19}H_{24}N_2O_2$, and a number of other comparatively unimportant alkaloids, are also derived from the cinchona barks. (See *Quinia*, *Cinchonia*, etc.) Certain acid principles are also contained in the cinchona barks, as *quinic* or *chinic acid*, *cinchotannic acid*, and *kinovic* or *quinovic acid*. They also contain *quinovin*, which is decomposed by the action of muriatic acid into quinovic acid and a saccharine matter. (See *Acid*, *kinovic*.)

Cincho'na amygdalifo'lia. See *Cinchonæ cordifoliæ cortex*. **C. angustifo'lia**, C. lancifolia. **C. austra'lis**, species of cinchona growing in Bolivia; an inferior bark. **C. bark**, bark of any species of cinchona. **C. b. tan'nin**, cinchotannic acid. **C. bases**, C. alkaloids; see *Cinchona*. **C. bi'color**, an inferior bark, used as substitute for genuine cinchona. **C. Bolivia'na**, see *Cinchonæ cordifoliæ cortex*. **C. Calisay'a**, see *Cinchonæ cordifoliæ cortex*. **C. Carabayen'sis**, see *Cinchonæ Caribææ cortex*. **C. Carolinia'na**, Pinckneya pubens. **C. cine'rea**, C. pallida. **C. coccin'ea**, species of Guayaquil; bark is variety of red cinchona bark. **C. Condamine'a**, see *Cinchonæ lancifoliæ cortex*. **C. cordifo'lia**, bark of New Granada and Peru; known as Santa Martha bark and common yellow Carthagena bark or yellow bark of Santa Fé. **C. cris'pa**, species of Cinchona officinalis. **C. ellip'tica**, Carabaya bark is obtained from it. **C. erythan'thra**, a species affording quinamine. **C. feb'rifuge**, mixture of cinchona alkaloids procured from various barks. **C. fla'va**, see *Cinchonæ cordifoliæ cortex*. **C. hirsu'ta**, variety of C. pubescens; bark is a variety of loxa bark. **C. lanceola'ta**, Peruvian species yielding Carthagena bark. **C. lancifo'lia**, yellow bark variously called *Colombia bark*, *Bogota bark*, *Coqueta bark*, etc. **C. ledgeria'na**, variety of C. calisaya. **C. lox'a**, pale bark from Ecuador and Peru, recognized by a number of pharmacopœias. **C. micran'tha**, see *Cinchonæ lancifoliæ cortex*. **C. nit'ida**, pale cinchona bark, forming principal part of huanuco bark, and imported sometimes as loxa bark. **C. officina'lis** (yellow bark), *Cinchonæ cordifoliæ cortex*. **C. ova'ta**, see *Cinchonæ cordifoliæ cortex*. **C. pal'lida**, Cinchonæ lancifoliæ cortex. **C. Peruvia'na**, native of Peru and cultivated in India; yields pale bark. **C. Pitay'a** or **Pitayen'sis**, Pitaya bark. **C. pubes'cens**, see *Cinchonæ cordifoliæ cortex*. **C. ru'bra**, red cinchona. **C. scrobicula'ta**, see *Cinchonæ cordifoliæ cortex*. **C. succiru'bra**, see *Cinchona* and *Cinchonæ oblongifoliæ cortex*. **C. of Virgin'ia**, Magnolia glauca.

Cincho'næ Caribæ'æ cor'tex—from *Exostema Caribæum*, *Caribæan* or *Saint Lucia bark*, from *Exostema* or *Exostemma floribundum*—and *Pitaya bark*, *Quinquina bicolor*, are useful substitutes for the cinchona of Peru. These are the most important spurious barks. They contain neither quinia nor cinchonia. **C. cordifo'liæ cor'tex**, *Cinchona calisaya*, *C. flava* (U. S. Ph.), *Yellow*, *Royal*, or *Calisaya cinchona bark*. Odor aromatic; taste strong, bitter, astringent. The active principle is *quinia*. The *false* or *spurious Calisaya barks* are those of Cinchona calisaya, variety Josephiana; C. Boliviana, C. ovata, variety rufinervis, called, in Peru, Cascarilla Carabaya—the Carabaya bark of commerce; of C. scrobiculata, two varieties, Cusco bark and bark of St. Ann; of C. pubescens, which furnishes the Cusco or Arica bark, and of C. amygdalifolia. **C. excel'sa**, of India, *Hymenodictyon excelsum*, supposed to possess the antiperiodic virtues of the true cinchonas, does not contain any quinia or cinchonia. The bitter principle rather resembles that of the horse-chestnut. **C. lancifo'liæ cor'tex**, *Cinchona pallida* (Ph. U. S.), *Pale cinchona bark*, *Pale*, *Loxa*, or *Crown bark*; bark of *Cinchona Condaminea* and *C. micrantha*. Its odor is aromatic; taste pleasant, bitter, and astringent. Its active principle is *Cinchonia*. **C. oblongifo'liæ cor'tex**, *Cinchona rubra* (Ph. U. S.), *Red cinchona bark*, *Red bark*, *Cascarilla roxa* and *C. colorada*, of S. America. Odor and taste the same as the pale, but more intense. This variety of bark is assigned to the *Cinchona oblongifolia* and *C. succirubra*, but in the Ph. U. S. to the latter alone. Active principles, *cinchonia* and *quinia*. The last three are the only official varieties in the Pharmacopœia of the United States. There are many other varieties, however, which are genuine cinchona barks, and yet have not been considered worthy of official position, as *Cinchona cinerea*, *Gray bark*, *Silver bark*, or *Huanuco* or *Lima bark*, which is obtained around Huanuco in Peru, and, with the *Jaen* or *Ash bark* and the *Huamilies bark*, belongs to the class of pale or Loxa barks. Among the genuine but inferior barks are those brought from the northern Atlantic ports of South America, which in commerce are variously called *Pitaya*, *Bogota*, *Carthagena*, *Maracaybo*, and *Santa Martha barks*. The *Bogota* is also called *Fusagasuga* and *Coquetta bark*.

All these barks are bitter, astringent, tonic, and eminently febrifuge; see *Antipyretics*. The yellow bark has been thought superior to the others, but the red contains an active principle. While the alkaloids derived from the bark are usually prescribed, there are cases in which the bark in substance is often demanded. It is employed in every disease in which there is deficient tone; but in cases where the stomach is much debilitated the powder should be avoided, in consequence of the woody fibre, which might disagree. Externally it is used in enemata, gargles, etc., and in gangrenous ulcerations. When it excites nausea, an aromatic may be added to it; if purging, opium; if costiveness, rhubarb, etc. Dose, ʒss to ʒj or more. *Bark jackets* were formerly employed, especially in the agues of children, consisting of waistcoats with powdered cinchona quilted between the layers.

Cinchonamine, sin-kon'am-een. $C_{19}H_{24}N_2O$. Alkaloid in cuprea bark, usually associated with cinchonine. Sialagogue, and far more toxic than quinine.

Cinchonate, sink'on-ate. A salt of cinchonic acid.

Cinchonetine, sink-on'et-een. Substance derived from acting on cinchonine sulphate with iron peroxide.

Cinchonia, sin-ko'ne-ah. Cinchonine. **C. sul'phate**, see *Cinchonine*. **C. tan'nate**, quiniæ et cinchoniæ tannas.

Cinchoniæ sulphas, sin-ko'ne-e sul'fas. *Cinchoninæ sulphas* (Ph. U. S. and Br.), *Sulphate of cinchonia*. The officinal salt is the neutral sulphate. It is soluble in water and alcohol. The action of the sulphate of cinchonia is similar to that of the sulphate of quinia, but it is less energetic, and consequently requires to be given in larger doses.

Cinchonic, sin-kon'ic. Appertaining or relating to cinchona.

Cinchonicine, sin-kon'is-een. *Cinchonicina*, *Cinchonicia*. When a salt of cinchonia is exposed to heat, with certain precautions, the alkaloid is changed into another, isomeric with itself, to which this name has been given. Cinchonicine and its sulphate possess the same medical properties as cinchonia and its salts. Dose, gr. v to gr. xv.

Cinchonid'ia. Cinchonidine.

Cinchonidinæ (sin-kon-id-een'e) **sulphas** (Ph. U. S.). Cinchonidine sulphate.

Cinchonidine, sin-kon'id-een. See *Cinchona*. Various salts are employed, as the benzoate, bromhydrate, hydrochloride, salicylate, sulphate, etc. **C. sul'phate**, *Cinchonidinæ sulphas* (Ph. U. S. and Br.). Neutral sulphate of cinchonidine; an alkaloid of exceedingly bitter taste, obtained from bark of various species of Cinchona. Its action is similar to that of quinine, but it is less powerful.

Cinchonine, sink'on-een. $C_{20}H_{24}N_2O$. *Cinchonina* (Ph. U. S.), *Cinchonin*, *Cinchonia*. Alkalid obtained from various species of Cinchona; organic, crystalline alkali, of a white color, and bitter, slightly astringent taste; very soluble in alcohol and ether, but almost insoluble in water. **C. sul'phate**, salt of cinchonine which is sometimes substituted for sulphate of quinine. See *Cinchoniæ sulphas*. Other salts of cinchonine are also employed. **C., tar'trate of**, see *Quinine, tartrate of*.

Cinchoninum, sin-kon-e'num. Cinchonine.

Cinchonism, sink'on-ism. Quininism.

Cinchonology, sink-on-ol'o-je. Quinology.

Cinchonometry, sink-o-nom'et-re. Analysis of cin-

chona barks to discover proportion of alkaloids in them.

Cinchoquinine, sin-ko-kwi'nine. White, tasteless preparation, said to contain all the alkaloids of the cinchona barks, as quinia, cinchonia, quinidia, etc., but probably devoid of quinia.

Cinchoratine, sin-kor'at-een. Aricine.

Cinchotannic acid, sin-ko-tan'nik as'id. A form of acid derived from cinchona bark.

Cinchotine, sink'o-teen. Alkaloid ($C_{19}N_{24}Z_2O$) in various cinchona barks and cuprea barks; quinidia.

Cincinnulus, sin-sin'u-lus (dim. of **Cincinnus**). Little lock or curl of hair.

Cincinnus, sin-sin'nus (*kikinnos*). A curled or frizzled lock; hair on the temples.

Cinclisis, sink'lis-is (*kinklisis*, agitation, rapid and frequent motion). Movement of the thorax in dyspnœa. Used, also, synonymously with nictation.

Cinclismus, sin-kliz'mus (*kinklismos*). Cinclisis.

Cinefaction, sin-e-fak'shun (*cinis*, pl., *cineres*, ashes, *facio*, to make). Incineration.

Cinema (sin-a'mah) or **Cine'sis** (*kineo*, to move). Motion.

Cinematics, sin-e-mat'iks. Kinetics.

Cineraceous, sin-er-a'shus. Ash-colored; livid.

Cineraria maritima, sin-er-ah're-ah mar-it'im-ah (*cineres*, ashes, from the white down covering the leaves). Achoavon, Abiat.

Cineration, sin-er-a'shun (*cineres*, ashes). Reducing to ashes; incineration.

Cinerea, sin-a're-ah. Ashen in color, as gray substance of brain and nerves.

Cinereo-albidus, sin-a're-o-al'bid-us. Ashy white.

Cineres clavellati, sin'er-es klav-el-lat'te. See *Potash*. **C. gravellat'i,** see *Potash*. **C. Rus'sici,** potash of commerce.

Cinereus, sin-a're-us. Cineritious.

Cineritious, sin-er-ish'e-us (*cineres*, ashes). Of the color of ashes. The cortical substance of the brain, and the vesicular neurine in general, have been so called. See *Cortex cerebri* and *Neurine*.

Cinesia, sin-a'ze-ah. Active or passive movement used in treating diseases.

Cinesialgia, sin-ez-e-al'ge-ah (*kinesis*, movement, *algos*, pain). Condition of a muscle in which contraction is followed by pain.

Cinesiology, sin-ez-e-ol'o-je (*kinesis*, movement, *logos*, treatise). Science of movements of the body, employed for therapeutical or hygienic results.

Cinesiometric, sin-ez-e-o-met'rik (*kinesis*, movement, *metron*, measure). Relating to measurement of movements.

Cinesion'osus (*kinesis*, movement, *nosos*, disease). Disease of the motor apparatus, or one in which the powers of motion are affected.

Cinesipathy, sin-ez-ip'ath-e (*kinesis*, motion, *pathos*, affection). Mode of treating diseases by gymnastics or appropriate movements.

Cinesis, sin-a'sis (*kinesis*). Motion.

Cinesitherapy, sin-ez-e-ther'ap-e (*kinesis*, *therapeia*, medical treatment). Mode of treating disease by means of active or passive movements.

Cinethmics, sin-eth'miks (*kineo*, to move). The science of movements in general.

Cinetic, sin-et'ik. Motory.

Cinetica, sin-et'ik-ah. Diseases affecting the muscles, and characterized by irregular action of the muscles or muscular fibres, commonly denominated spasm; also, agents that affect the voluntary or involuntary motions.

Cinetus, sin-a'tus (*kineo*, to move). Movable; term applied also to the diaphragm.

Cingula, sin'gu-lah. Band or belt. **C. of Bur'dach,** upper part of gyrus fornicatus.

Cingularia, sin-gu-lah're-ah (*cingulum*, because of its shape). Lycopodium.

Cingulum, sin'gu-lum (*cingo*, to gird). Zone; cincture; girdle. The part of the body situate below the ribs, to which a girdle is applied; waist; herpes zoster; bundle of fibres in the gyrus fornicatus. **C. abdom'inis mus'culo-aponeurot'icum,** the abdominal muscles. **C. Hilda'ni,** leathern girdle formerly used for the reduction of luxations and fractures of the extremities. **C. hu'meri,** pectoral arch. **C. mercuria'le,** *Mercurial belt*. Woollen girdle or belt containing mercurial ointment; was used as an antisyphilitic and in diseases of the skin. **C. pudicit'iæ,** a device formerly used to cover the female genitals, intended to prevent coition. **C. sanc'ti Joan'nis,** Artemisia vulgaris. **C. Ven'eris,** corona Veneris; see *Crown of Venus*. **C. veno'sum prostat'ico-urethra'le,** plexus of veins around the prostate and rectum which connect the veins of each side.

Cinin, sin'in. Santonine.

Cinis fæcum, sin'is fe'kum (ashes of lees). See *Potash*. **C. infecto'rius,** see *Potash*.

Cinnabar, sin'nab-ar (*kinnabari*). Hydrargyri sulphuretum rubrum. **C. Græco'rum,** see *Calamus rotang*.

Cinnabaris, sin-nab'ar-is. Cinnabar.

Cinnamene, sin'-nam-een. Colorless oil having an agreeable aroma derived from cinnamic acid.

Cinnamic, sin-nam'ik. Pertaining to or derived from cinnamene. **C. ac'id,** a crystalline acid obtained from several balsams; it is procured by the oxidation of cinnamic aldehyde. **C. al'dehyde,** C_9H_8O, main constituent of oil of cinnamon.

Cinnamodendron axillare, sin-nam-o-den'dron ax-il-la're. Bitter bark of Brazil, used in asthenic fevers and scurvy. **C. cortico'sum,** aromatic bark of the Antilles, used as a substitute for Wintera aromatica.

Cinnamomum, sin-nam-o'mum. Cinnamon; bark of C. Zeylanicum. **C. acu'tum,** Ceylon cinnamon. **C. al'bum,** Canella alba. **C. aromat'icum lig'num,** Canella alba. **C. cam'phora,** indigenous in China, Japan, and E. Asia; calmative in nervous diseases, used in spasmodic cough and asthmatic affections, and externally in the form of liniment. **C. cas'sia,** C. aromaticum. **C. Chinen'se,** Chinese cinnamon. **C. culilawan,** Laurus culilawan; bark is bitter, and used in intestinal affections, blennorrhœa, etc. **C. iners',** tree of Sumatra; bark is a condiment; seeds are used in dysentery and bronchial affections of children. **C. ve'rum,** Ceylon cinnamon. **C. Win'teri,** Canella alba. **C. Zeylan'icum,** tree of Ceylon; see *Cinnamon, Ceylon*.

Cinnamon, sin'nam-un. See *Laurus cinnamomum*. **C., bas'tard,** Cinnamomum cassia, Canella alba, cascarilla. **C., Ceylon',** Cinnamomum Zeylanicum and its inner bark; carminative and astringent. **C., Chi'na** or **Chinese',** bark of Cinnamomum aromaticum or other species of China; officinal in some pharmacopœias. **C., Mal'abar,** Laurus cassia. **C. oil,** oleum cinnamomi. **C., true,** Cinnamomum Zeylanicum. **C. water,** aqua cinnamomi. **C., wild,** Laurus cassia.

Cinnamosma, sin-nam-oz'mah. Stimulant and aromatic bark, resembling canella.

Cinnamyl, sin'nam-il. C_9H_7O. Radical in cinnamic acid or hydrate of cinnamyl. **C. al'cohol,** $C_9H_{10}O$, from heating styracin with a caustic alkali. **C. al'dehyde,** C_9H_8O, oil derived from oxidation of cinnamyl alcohol, main constituent of oil of cinnamon. **C. eu'genol,** derivative of eugenol; in colorless, odorless, tasteless crystals; presumed to be useful in tuberculous affections.

Cin'namylate of caf'feine. Said to be well adapted for hypodermic injections; diuretic and cardiac stimulant.

Cinonosi, sin-on'os-e (pl. of **Cinonosus**) (*kineo*, to move, *nosos*, disease). Diseases impairing motion.

Cinoper, sin'o-per. Hydrargyri sulphuretum rubrum.

Cinoplanesis, sin-o-plan-a'sis (*kineo*, to move, *planesis*, a wandering about). Irregularity or want of coordination of motion.

Cinquefoil, sink'foil (*quinque*, five, *folium*, leaf). Potentilla reptans and other species of Potentilla. **C., marsh,** Comarum palustre. **C., Nor'way,** Potentilla Norvegica.

Cinta, sin'tah (*cingo*, to apply a belt). Girdle. **C. beriber'ica,** feeling of tightness around the waist, symptomatic of beri-beri.

Cinzilla, sin-zil'lah (*cingulum*). Herpes zoster.

Cion, se'on (a column). Uvula; excrescence of vulva; eruption on the nose.

Cionis, se'on-is. Uvula; tumefaction or elongation of the uvula; staphylodialysis.

Cionitis, se-on-e'tis (*cion, itis*). Inflammation of the uvula; uvulitis, staphylitis.

Cionoptosis, se-on-op-to'sis (*kion,* uvula, *ptosis,* a falling down). Elongation of the uvula.

Cionorrhaphia, se-on-or-raf'e-ah (*cion, rhaphe,* suture). Staphylorraphy.

Cionotome, se-on'o-tome (*cion, tome,* incision). Curved scissors for cutting off the uvula.

Cionotomy, se-on-ot'o-me. Excision of the uvula; staphylotomy.

Cipipa. See *Jatropha manihot.*

Cipu'ra Martinicen'sis. Species of iridaceous herbs, root of which is tonic, astringent, and emmenagogue.

Circæa, sur-se'ah (after Circe, the enchantress). Atropa mandragora, Circæa Lutetiana. **C. Lutetia'na,** *Parisian circæa, Enchanter's nightshade,* or *Bindweed, Mandrake.* This plant, common in the vicinity of Paris, was formerly considered resolvent and vulnerary, and supposed to possess magical properties. **C. pubes'cens** or **vulga'ris,** C. Lutetiana.

Circelli, sur-sel'le (pl. of **Circellus**). Small circles. **C. cerebel'li,** laminæ of the cerebellum. **C. veno'si spina'les** or **vertebra'les,** transverse veins between anterior and posterior longitudinal spinal veins.

Circellus, sur-sel'lus. Small circle. Applied to circular anastomoses. **C. veno'sus foram'inis intervertebra'lis,** plexus of veins around intervertebral foramen. **C. v. hypoglos'si,** plexus of veins around hypoglossal nerve in the anterior condylar foramen.

Circinate, sur'sin-ate. Resembling a ring in shape; term applied to the appearance of cutaneous lesions.

Circinus, sur'sin-us (dim. of **Kirkos,** circle). Herpes zoster.

Circle, sur'k'l. Circulus; circuit. **C. of Ca'rus,** Carus's curve. **C., cil'iary,** ciliary ligament. **C., galvan'ic,** galvanic circuit. **C. of Hal'ler,** circulus Halleri. **C., tym'panal,** annulus of tympanum. **C., volta'ic,** galvanic circuit. **C. of Wil'lis,** see *Circulus.*

Circocele, sur-so-se'le (Eng. sur'so-seel). Cirsocele.

Circuit, sur'kit (*circumeo,* to go around). In pathological language, generally means period, course, revolution; galvanic circuit. **C., bro'ken,** term applied to galvanic circle when plates or wires are separated. **C., closed,** term applied to the galvanic circuit when the plates or wires are in contact. **C., open,** C., broken.

Circuitus, sur-ku'it-us. Circuit; period.

Circular, sur'ku-lar (*circulus,* circle). Having the form of a circle, as circular amputation, circular bandage, etc. **C. insan'ity,** insanity alternating in different manifestations, interspersed with lucid intervals; periods of depression and excitement, for example, recurring alternately. **C. si'nus of Ridley,** see *Sinus coronarius.*

Circula'ris. Circular or orbicular muscle, as of the lips or eyelids or sphincter ani.

Circulating, sur'ku-la-ting. Carried around in the circulation of the blood to the tissues of the body, as albumen, blood, etc. **C. blood** or **fluid,** see *Blood.*

Circulatio, sur-ku-lah'she-o. Circulation.

Circulation, sur-ku-la'shun (*circum,* around, *fero, latum,* to carry). Physiologists give this name to the motion of the blood through the different vessels of the body (*sanguimotion*); to that function by which the blood, setting out from the left ventricle of the heart, is distributed to every part of the body by the arteries through the capillaries, proceeds into the veins, returns to the heart, enters the right auricle, and passes into the corresponding ventricle, which sends it into the pulmonary artery to be distributed to the lungs, whence it issues by the pulmonary veins, and passes into the left auricle; from this it is sent into the left ventricle, and is again distributed by means of the arteries. Circulation also denotes continuous movement of the air. **C., arte'rial,** see *Circulation.* **C., cap'illary,** that which takes place in the capillary vessels, and is, in some measure, independent of the action of the heart. See *Capillary vessels.* **C., collat'eral,** C. through other vessels when the supply of blood by vessels important in the ordinary system of circulation is cut off or closed, as after ligation, amputation, etc. **C., compensa'tory,** C., collateral. **C., fœ'tal,** see *Fœtal circulation.* **C., greater,** see *C., pulmonary.* **C., lesser,** C., pulmonary. **C., placen'tal,** C. of the blood of the fœtus through the umbilical arteries, fœtal veins, etc., and of the blood of the mother through the uterine arteries, sinuses, etc., and uterine veins. **C., por'tal,** see *Porta vena.* **C., pul'monary** or **pulmon'ic,** the circle from the right to the left side of the heart by the lungs. The *greater* or *systematic* or *systemic* circulation is that through the rest of the system. **C., ve'nous,** see *Circulation.* **C., vitel'line,** circulation, during existence of the umbilical vesicle, to the vitellus and back to the heart, before the establishment of the placental circulation at the beginning of the third month.

Circulator, sur'ku-la-tor. Charlatan.

Circulatory, sur'ku-la-to-re. Relating to the circulation of the blood; sanguimotory.

Circulus, sur'ku-lus (dim. of **Circos,** *kirkos,* a circle). Circle or ring; cycle; any part of the body which is round or annular, as *circulus oculi,* globe, bulb, or orb of the eye; also applied to objects which by no means form a circle, as the circle of Willis, which is an anastomotic circle at the base of the brain, formed by the anterior and posterior cerebral arteries and the communicating arteries of Willis. **C. arterio'sus Halle'ri,** plexus of vessels on the surface of the sclerotic where the optic nerve enters that membrane. **C. a. i'ridis,** see *Circulus iridis.* **C. a. mus'culi cilia'ris,** very small arteries arranged in circular form in the centre of the ciliary muscle. **C. a. ner'vi op'tici,** plexus of arteries in the sclerotic, circular in form, around the optic nerve, consisting of branches from the short posterior ciliary arteries. **C. a. umbilica'lis,** circular anastomosis of vessels around the umbilicus. **C. a. Willis'ii,** circle of Willis; see *Circulus.* **C. a. Zinn'ii,** circulus arteriosus nervi optici. **C. artic'uli vasculo'sus,** vascular circle around cartilages of joints. **C. callo'sus Halle'ri,** fibro-cartilaginous ring around each auriculo-ventricular opening of the heart, to which the tricuspid and mitral valves are attached. **C. cilia'ris,** ciliary ligament. **C. conjuncti'væ,** see *Corona conjunctivæ.* **C. Halle'ri,** circle of Haller; circular anastomosing chain formed under the areola by the veins of the nipple. **C. i'ridis** or **ma'jor,** arterial circle at anterior border of the ciliary muscle, formed by branches of the long posterior ciliary and of the anterior ciliary arteries. The *Circulus iridis minor* is a circle of anastomoses formed by the arteries of the iris near the pupillary margin. **C. i. mi'nor,** see *Circulus iridis major.* **C. Mascagn'ii,** circle of minute capillaries in vicinity of zonule of Zinn in the fœtus. **C. membrana'ceus** or **membrano'sus,** hymen. **C. os'seus,** tympanic portion of temporal bone. **C. quad'ruplex,** four-fold bandage used by the ancients. **C. san'guinis aor'ticus** or **ma'jor,** systemic circulation. **C. s. minor** or **pulmona'lis,** pulmonic circulation. **C. tonsilla'ris,** plexus formed by tonsillar branches of the glosso-pharyngeal nerve around the base of the tonsil. **C. umbilica'lis,** circle around the umbilicus in the subperitoneal tissue by branches from superior and inferior epigastric and superior vesical arteries. **C. veno'sus,** venous circle in the embryo which bounds the area vasculosa or vascular area. **C. v. are'olæ,** venous circle formed by the union of the veins around the nipple; it embraces, however, only two-thirds of the circuit. **C. v. cilia'ris** or **v. cor'neæ,** canal of Schlemm. **C. v. Halle'ri,** C. v. mammæ. **C. v. i'ridis,** ciliary circle. **C. v. ischiad'icus,** anastomoses between internal iliac and sciatic veins. **C. v. mam'mæ,** plexiform anastomosis of subcutaneous veins around the nipple. **C. v. obturato'rius,** anastomosis between internal circumflex and external and internal iliac veins, around the obturator foramen. **C. v. orbicula'ris cilia'ris,**

canal of Fontana. **C. v. Rid'leyi**, circular sinus. **C. v. trachea'lis**, circle formed around the trachea by the thyroid veins just below the thyroid gland. **C. v. umbilica'lis**, circle of vessels around the umbilicus. **C. Willis'ii**, circle of Willis.

Circum, sur'kum (L.). As a prefix, around.

Circumactio, sur-kum-ak'she-o. Movement of circumduction used in reducing luxations.

Circumagentes, sur-kum-ah-jen'tes (*circum, ago*, to act). Rotating; rotator muscles, as the oblique muscles of the eye, *C. bulbi*.

Circumanal, sur-kum-a'nal (*circum*, around, *anus*). Surrounding the anus. **C. glands**, glands around the anus.

Circumbuc'cal (*circum*, around, *bucca*, mouth). Around the opening of the mouth.

Circumcalualis membrana, sur-kum-kal-u-al'is mem-bran'ah. Conjunctiva.

Circumcised, sur'kum-sized. Subjected to circumcision.

Circumci'ser. One who practises circumcision; a peritomist.

Circumcisio, sur-kum-siz'e-o (*circum, cædo*, to cut). Circumcision. **C. fœmina'rum**, removal of the nymphæ; see *Circumcision*.

Circumcision, sur-kum-sizh'un. Posthetomy; ancient operation performed by some nations, as the Jews, as a religious ceremony. It consists in removing circularly a portion of the prepuce of infants—a custom which was probably suggested with a view to cleanliness. In cases of extraordinary length of prepuce, or when affected with disease, the operation is sometimes performed by surgeons. A similar operation is practised among the Ægyptians, Arabians, and Persians on the female, *Circumcisio fœminarum*, by removing a portion of the nymphæ, and at times the clitoris. **C. of the conjuncti'va**, peritomy.

Circumcisura, sur-kum-siz-u'rah. Circumcision; circular incision.

Circumcisus, sur-kum-se'zus. One who has been circumcised.

Circumclusion, sur-kum-klu'zhun (*circum, cludo*, to close). Closure of an artery by a pin and wire loop; a form of acupressure.

Circumcorneal, sur-kum-kor'ne-al. Around the cornea.

Circumduction, sur-kum-duc'shun (*circum, duco*, to lead). Circular motion impressed on a luxated bone for the purpose of reducing it.

Circumductionis opifer, sur-kum-duk-she-o'nis op'-if-er (worker of circumduction). Obliquus superior oculi.

Circumferentia articularis, sur-kum-fer-en'she-ah ar-tik-u-lar'is. The cylindrical surface which produces lateral articulation of the radius. Also, the surface by which the head of the ulna similarly articulates with the lower end of the radius.

Circumferential cartilage, sur-kum-fer-en'shal kar'til-aje. Circular fibro-cartilage surrounding the cavity of a joint.

Circumflex, sur'kum-fleks (*circum, flecto*, to bend). Curved circularly; name given to several organs. **C.** or **artic'ular ar'teries of the arm** are distinguished into anterior and posterior; they arise from the axillary, and are distributed around the shoulder. **C. ar'teries of the thigh** are distinguished into external and internal; are given off from the profunda, and surround the head of the thigh bone. **C. il'iac ar'teries**, see *Iliac*. **C. mus'cle**, muscle arising from the spinous process of the sphenoid bone, and inserted into the velum pendulum palati; it stretches the velum. **C. nerve**, axillary nerve. **C. of pal'ate**, circumflexus palati. **C. veins** follow the arteries.

Circumflex'or. Muscle that bends or twists, as the C. muscle of the Eustachian tube.

Circumflexus, sur-kum-fleks'us. Circumflex. **C. pala'ti** or **pala'ti mol'lis**, tensor palati; abductor of the Eustachian tube.

Circumforaneus, sur-kum-for-an'e-us (*circum, foris*, door). Charlatan.

Circumfusa, sur-kum-fu'sah (*circum, fundo*, to pour). Surroundings, as atmosphere, climate, residence, etc.; in short, everything which acts constantly on man externally and internally.

Circumgyration, sur-kum-ji-ra'shun (*circum, gyrus*, circle). Vertigo.

Circumligatura, sur-kum-lig-at-u'rah (*circum, ligo*, to bind). Ligature; paraphimosis.

Circumlitio, sur-kum-lish'e-o (*circum, lino*, to anoint). Term formerly used for liniments, but especially for those applied to the eyelids.

Circumnutation, sur-kum-nu-ta'shun. Describing a circle by variable arcs.

Circumoc'ular (*circum, oculus*, eye). Surrounding the eye.

Circumossale, sur-kum-os-sal'e (*circum, os*, bone). Periosteum.

Circumpolar, sur-kum-po'lar. Surrounding a pole.

Circumpolariza'tion. Examination as to amount of sugar in a liquid by rotation of polarized light.

Circumscribed, sur'kum-skribed (*circum, scribo*, to write, to make lines). Term applied, in pathology, to tumors which at their base are distinct from the surrounding part.

Circumsection, sur-kum-sek'shun (*circum, seco*, to cut). Circumcision.

Circumvalla'tæ papil'læ (*circum, vallo*, to intrench). See *Papillæ of the tongue*.

Circumvallate, sur-kum-val'late. Surrounded by a ridge or prominence. See *Papillæ of the tongue*.

Circumvolution, sur-kum-vo-lu'shun. A winding around; convolution; coil. **C., cris'tate**, dentate convolution.

Circus, sur'kus (circle). Circular bandage. **C. move'ments**, circular locomotion observed in brain affections of a certain character.

Cirrhagra, sir'rhag-rah (*cirrus*, curl, *agra*, seizure). Plica. **C. Polono'rum**, plica Polonica.

Cirrhonosis, sir-ron-o'sis (*kirrhos*, yellow). Cirrhosis.

Cirrhonosus, sir-ron'os-us (*kirrhos*, yellow, *nosos*, disease). Disease of the fœtus in which there is a yellow coloration of the serous membranes.

Cirrhosis, sir-ro'sis (*kirrhos*, yellow). *Kirrhosis, Cirrhonosis, Kirrhonosis*. Pathological condition in which the tissues undergo change to induration from excessive formation of connective tissue followed by contraction. Term was originally applied to a granular condition of the liver caused by yellow coloring matter sometimes secreted in the tissues. **C., bil'iary**, C. affecting tissues around the bile-ducts. **C., car'diac** or **cor'dis**, C. from chronic interstitial inflammation of the heart. **C. he'patis**, C. of the liver; *Interstitial hepatitis, Granulated, granular, mammillated, tuberculated*, or *hobnailed liver*. Appears to be dependent upon repletion of the terminal extremities of the biliary ducts with bile, along with altered nutrition of the intervening parenchyma, by which the liver becomes smaller in size or atrophied. The granular induration of drunkards is sometimes called lobular cirrhosis; see *Hepatatrophia* and *Hepatitis, interstitial*. **C. hypertroph'ica adipo'sa**, interstitial inflammation of the liver with fatty degeneration. **C., ir'ritative**, C. from irritation of some deleterious agent, such as alcohol. **C. jec'oris**, C. of the liver. **C. of the kid'ney**, interstitial nephritis. **C. of the liv'er, atroph'ic**, contraction of atrophied liver from interstitial inflammation. **C. of the lung**, interstitial pneumonia; condition of the lung, the general character of which is a tendency to consolidation or contraction of the pulmonary tissue, with dilatation of the bronchial tubes. It has been termed by others *Fibroid degeneration of the lung*; see *Phthisis, fibroid*. **C., mus'cular**, neurotic atrophy of muscle from injury or disease of ganglia cells of anterior cornu of cord, medulla, or pons, or of the efferent muscular fibres connecting them with the muscles. **C. of the o'vary**, interstitial oöphoritis. **C. parasita'ria**, interstitial hepatitis caused by a parasite, Distomum campanulatum. **C. peritone'i**, peritonitis deformans. **C. pulmo'nis** or **pulmo'num**, interstitial pneumonia; C. of the lung. **C. re'num**, interstitial nephritis. **C. of the stom'-**

ach, chronic interstitial gastritis; see *Linitis.* **C. ventric'uli,** C. of the stomach.

Cirrhotic, sir-rhot'ik. Affected with or having the character of cirrhosis.

Cir'ri (pl. of **Cirrus**). Locks of hair; tendrils. **C., aud'itory,** auditory hairs in internal ear, presumably associated with audition.

Cirsaneurysma, surs-an-u-riz'mah (*kirsos,* varix). Cirsoid aneurism.

Cirshydroscheocele, surs-hid-ros-ke-o-se'le (Eng. surs-hi-dros'ke-o-seel). Cirsocele combined with hydrocele.

Cirsicus, surs'ik-us. Varicose.

Cirsium arvense, surs'e-um ar-ven'se (*cirsus,* because formerly used in varix). Common plant, used in France in the form of cataplasm in hemorrhoids, and worn as an amulet. **C. macula'tum,** Carduus marianus.

Cirsoblepharon, surs-o-blef'ar-on (*cirsus, blepharon,* eyelid). Varicosity of the eyelid.

Cirsocele, surs-o-se'le (Eng. surs'o-seel) (*cirsus, kele,* hernia). *Varicose hernia;* by some authors employed synonymously with varicocele; by others, *Varicocele* is the tumor formed by the veins of the scrotum; *Circocele, Funiculus varicosus, Cirsocele funiculi seminalis,* the varicose dilatation of the spermatic veins. The scrotum feels as if it contained earth-worms; it is commonly an affection of no consequence, demanding merely the use of a suspensory bandage, but sometimes requires an operation. See *Varicocele.*

Cirsoid, sur'soid (*cirsus, eidos,* resemblance). Varicose, or resembling a varix; term once applied to the upper part of the brain, as well as to the spermatic vessels. See *Aneurism.*

Cirsom'phalos or **Cirsomphalus,** surs-om'fal-us (*cirsus, omphalos,* navel). Varicose dilatation of the veins surrounding the navel. The term has likewise been applied to the aneurismal dilatation of the arteries of that region; called also *Varicomphalus.*

Cirsophthalmia, surs-of-thal'me-ah (*cirsus, ophthalmos,* eye). *Varicose ophthalmia;* high degree of ophthalmia, in which the vessels of the conjunctiva are considerably injected; varicose condition of corneal staphyloma.

Cirsoscheum, surs-os'ke-um (*cirso, oscheon,* scrotum). Cirsocele of the scrotum.

Cirsotomy, surs-ot'o-me (*cirsus, tome,* incision). Operation for the removal of varices by incision.

Cirsul'cus (*cirsus, ulcus,* ulcer). Varicose ulcer.

Cirsus, surs'us (*kirsos*). Varix.

Cirsydroscheocele, surs-id-ros-ke-o-se'le (Eng. surs-id-ros'ke-o-sele) (*cirsus, hudor,* water, *oscheon,* scrotum, *kele,* rupture). Varicocele with water in the scrotum.

Ciseau, se-zo' (*scindo,* to cut). Flattened rod of metal, sharpened at one extremity, and used in anatomical preparations and in surgical operations for dividing bones.

Cissa, sis'sah. Softening; malacia.

Cissampelia (sis-sam-pel'e-ah) or **Cissampeline,** sis-sam'pel-een. Principle in pareira root ($C_{18}H_{21}NO_3$). See *Pareira brava.*

Cissampelos abutua, sis-sam'pel-os ab-u'tu-ah (*kissos,* ivy, *ampelos,* vine). Chondodendron tomentosum. **C. Capen'sis** grows in the mountainous parts of the Cape of Good Hope; root is used as an emetic and cathartic by the Boers. **C. glaber'rima,** see *Pareira brava.* **C. microcar'pa,** C. pareira. **C. pare'ra,** Pareira brava.

Cissinum, sis-se'num. Plaster of ivy, used in wounds of the nerves or tendons.

Cissoïdes, sis-so-e'des (*cissus, eidos,* resemblance). Resembling ivy; capreolaris.

Cissus (sis'sus) **ac'ida.** Sacred vine of India; roots are applied externally to buboes and piles. **C. ala'ta** has astringent leaves. **C. digita'ta,** native of Arabia; leaves are antipyretic. **C. glau'ca,** elephant's vine; juice is used in form of plaster; leaves are antipyretic. **C. heptaphyl'la,** native of India; used in diseases of the eye. **C. quadrangula'ris** grows in E. Indies and Africa; the leaves are used in affections of the bowels, and are applied externally in lumbago. **C. quinquefo'lia,** Ampelopsis quinquefolia.

Cistern (sis'turn), **lum'bar.** Receptaculum chyli. **C. of Pecquet',** receptaculum chyli. **C. sem'inis,** receptacle of the semen.

Cisterna, sis-tur'nah (*cista,* chest). Term applied to various parts of the body which serve as reservoirs for different fluids. Fourth ventricle of the brain. Common meeting of the lactiferous vessels in the mamma. **C. am'biens,** arachnoid canal; subarachnoid space around crura cerebri. **C. chias'matis,** interpeduncular space. **C. chy'li,** receptaculum chyli. **C. cor'poris callo'si,** third ventricle; subarachnoid reservoir or confluence of vessels at the fossa of Sylvius. **C. lumba'ris,** receptaculum chyli. **C. mag'na,** fourth ventricle; part of subarachnoid space above the transverse fissure of the cerebellum. **C. Pecquet'i,** receptaculum chyli. **C. perilymphat'ica vestib'uli,** space between utricle and saccule from osseous wall of vestibule. **C. subarachnoïda'lis,** subarachnoid space.

Cisternæ, sis-tur'ne (pl. of **Cisterna**). Reservoirs of various sorts, or confluent vessels, as cisternæ pontis, subarachnoid confluents at base of brain.

Cistocele (sis-to-se'le) or **Cys'tern of Pecquet'.** Cystocele.

Cistus Canadensis, sis'tus kan-a-den'sis. Helianthemum Canadense. **C. Cre'ticus,** *Gum cistus, Rock rose;* systematic name of the plant whence the *Labdanum, Labdamen,* or *Ladanum,* a blackish-green gum-resinous substance of agreeable smell, is obtained. Formerly it was a component of warm plasters, and prescribed internally as a stomachic. Ladanum is also obtained from *Cistus ladaniferus* and *C. laurifolius.* **C. gum,** C. Creticus. **C. salvifo'lius,** C. Creticus. **C. taur'icus,** C. Creticus.

Citharus, sith'ar-us. Thorax.

Citrago, sit-rah'go (*citrus,* citron). Melissa.

Citraria, sit-rah're-ah. Melissa.

Citras, sit'ras. Citrate. **C. ammo'nico-fer'ricus,** ammonio-ferric citrate. **C. bismuth'icus,** bismuth citrate. **C. chinicus,** quiniæ citras. **C. fer'ricus,** ferric citrate. **C. kal'icus,** potassium citrate. **C. lith'icus,** lithium citrate. **C. magnes'icus,** magnesium citrate. **C. potas'sicus,** potassium citrate. **C. quin'icus,** quinine citrate. **C. sod'icus,** sodium citrate.

Citrate, sit'rate. A salt of citric acid, as citrate of iron, magnesium, etc., from its combination with magnesium, iron, etc.

Citrea malus, sit're-ah mal'us. See *Citrus medica.*

Cit'rene. Terebinthinate volatile oil ($C_{10}H_{16}$) from rind of the lemon. **C. hy'drate** or **C. ter'pin,** crystallized substance from adding water to citrene.

Citreolus, sit-re'ol-us. Cucumis sativus.

Citreous, sit're-us. Lemon-like.

Citric acid, sit'rik as'id. $H_3C_6H_5O_7,H_2O$. *Acidum citricum* (Ph. U. S. and Br.), *Acid of lemons.* Is found in the juice of the lemon, lime, cranberry, etc., from which it is obtained, and has an extremely acid but agreeable taste. Employed in medicine as antiseptic, refrigerant, and diuretic. Rubbed up with sugar and with a little of the essence of lemon, it forms *dry lemonade.*

Citrine (sit'rin) **ointment.** Ointment of nitrate of mercury.

Citrion, sit're-on. See *Citrus medica.*

Citron, sit'ron. The citron; fruit of Citrus medica. Also the lemon.

Citronelle', Artemisia abrotanum; melissa.

Citrul, Sicilian, sit'rul, se-si'le-an. Cucurbita citrullus.

Citrullus, sit-rul'lus (dim. of **Citrus,** from its color). Cucurbita citrullus. **C. ama'rus,** African plant, called by the Boers *Bitterapple* or *Wild watermelon,* the pulp of which, like that of colocynth, is a drastic cathartic. **C. colocyn'this** or **vulga'ris,** Cucumis colocynthis.

Citrus, sit'rus. See *Citrus medica.* **C. ac'ida,** see *Lime.* **C. auran'tium,** systematic name of the *Orange tree,* ord. Aurantiaceæ. Its fruit is called *orange.* The flowers of the orange, *aurantii flores,* are highly odoriferous, and are used as a perfume. On distillation they yield a

small quantity of essential oil—*oleum aurantii*, oleum or essentia neroli, neroli—with spirit and water, the *Aqua aurantii florum* (Ph. U. S.), Aurantii floris aqua, Aqua aurantii, or Orange-flower water. They were once used in convulsive and epileptic cases; the leaves, *folia aurantii*, have a bitterish taste, and furnish an essential oil, and have been used for the same purposes as the flowers. The yellow rind of the fruit, *Aurantii amari cortex* (Ph. B.), of Citrus bigaradia, bigarade or bitter orange, orange-peel, is an aromatic bitter, and is used in dyspepsia and where that class of remedies is required. The *juice*, succus aurantii, orange-juice, is a grateful acid, and used as a beverage in febrile and scorbutic affections. The Ph. U. S. has *Aurantii amari cortex*, bitter orange-peel, the rind of the fruit of Citrus vulgaris; and *Aurantii dulcis cortex*, sweet orange-peel, the rind of the fruit of Citrus aurantium. Citrus aurantium has a large number of varieties in different parts of the world, the fruit differing in appearance, taste, and quality. **C. a'cris**, species of Citrus medica; its fruit is called lime. **C. auran'tium**, see *Citrus*. **C. berga'mia**, Citrus mella rosa. **C. bigara'dia**, see *Citrus aurantium*. **C. de'cumana**, shaddock. **C. limet'ta**, see *Citrus mella rosa* and *Lime;* also variety of C. medica. **C. limo'num**, C. medica. **C. med'ica**, systematic name of the lemon tree. The lemon has a fragrant odor, depending upon the essential oil of the rind, *oleum limonis*. The outer rind, cortex limonum, *Limonis cortex* (Ph. U. S. and Br.), lemon-peel, is used in the same cases as the cortex aurantii. The juice, *Succus limonis* (Ph. U. S. and Br.), limonum succus, is sharp but gratefully acid, the acidity depending upon the citric acid it contains, and is given as a refrigerant beverage in febrile affections. In doses of half an ounce to an ounce, three times a day, it has appeared to some to exert a sedative influence on the circulation, and has been given, apparently with a benefit, in acute rheumatism and rheumatic gout. Alone, or combined with wine, it is prescribed in scurvy, putrid sore throat, etc. Its general properties are refrigerant and antiseptic. Sweetened and diluted, it forms lemonade. *Artificial lemon juice* is made by dissolving an ounce of citric acid in fourteen fluidounces of water, adding a few drops of essence of lemon. *Citron tree* is likewise considered to belong to the same species—Citrus medica. Its fruit is called *cedromela*. It is larger and less succulent than the lemon. *Citron juice*, when sweetened with sugar, is called by the Italians *Agro di cedro*. **C. mel'la ro'sa of De Lamarck**, another variety of Citrus medica, affords the bergamot, as also do Citrus limetta and C. Bergamia; see *Bergamot*. **C. vulga'ris**, Citrus aurantium, var. amara. Seville orange, from E. Indies, China and Cochin China, S. Europe, N. Africa, and W. Indies. The leaves are employed in nervous diseases, and the rind is tonic and carminative.

Citta, sit'tah. Malacia.

Cittos, sit'tos. Hedera helix.

Cittosis, sit-to'sis. Chlorosis; malacia.

City a'vens. Geum urbanum.

Civ'et. Unctuous perfume, of very penetrating odor, obtained from different mammalia of the Viverra kind, particularly from Viverra civetta, contained in a fold of the skin situate between the anus and the organs of generation; very seldom employed as an antispasmodic.

Civetta, siv-et'tah. Civet.

Civiale's operation, siv-e-al''s op-e-ra'shun. Lithotrity.

Civitas Hippocratica, siv'it-as hip-po-krat'ik-ah. Salernum.

Clab'ber. Bonnyclabber.

Clabbergrass, klab'ur-grass. Galium verum.

Clacking, klak'ing (onomatopœia). Claquement.

Clades glandularia, klah'des glan-du-lah're-ah (glandular scourge). Plague.

Cladiscus, klad-is'kus (*klados*, young shoot). Ramusculus.

Cladonica islandica, klad-on'ik-ah is-lan'dik-ah (*klados*, branch, because branched). Lichen islandicus. **C. pyxida'ta**, species at one time prescribed for intermittent fever and whooping cough. **C. rangiferi'na**, European plant, pectoral and stomachic. **C. sanguin'ea**, Brazilian species, employed in aphthæ. **C. vermicula'ris**, species of S. America, stomachic.

Cladoph'ytum (*klados*, branch, *phuton*, vegetable). Growth of mycoderma in the intestines of animals.

Cladothrix, klad'o-thriks (*klados*, branch, *thrix*, hair). A genus of schizomycetes of long, filamentous formation. See *Bacteria*.

Cladrastis tinctoria, klad-ras'tris tink-to're-ah. *Yellow ash, Fustic tree, Yellow locust.* Indigenous tree, flourishing from Kentucky to Alabama. The bark of the tree and the roots are cathartic.

Cladus, klah'dus. Ramus.

Clairet, klair'et (*clarus*, clear). Claret.

Clairvoyance, klair-voy'onse (F., clear-seeing). *Mesmeric clairvoyance.* Clearness of sight, said to be communicated by animal magnetism, which not only enables the magnetized person to see in the dark, through stone walls, etc., but even to observe prospects which he has never seen previously, while he may fancy he is flying in the air. It need hardly be said that the possession of such powers is fabulous. Clairvoyance is said to have originated in the experiments of the Marquis Puységur, a disciple and rival of Mesmer, and hence it has been proposed to call it *Puysegurian* clairvoyance. See *Magnetism, animal*, and *Somnambulism*.

Clammy, klam'me (Sax. *clam*, D. *klam*, moist). Viscous, glutinous. A clammy mouth is one covered with a mucous coat. **C. weed**, Polanisea graveolens.

Clamor, klam'or. Cry; loud exercise of the voice; vociferation.

Clamp. Arrangement for holding fast to a tumor, artery, etc. by compression; see *Ovariotomy*.

Clangor, klan'gor (*klange*, loud clang or noise). See *Oxyphonia*. **C. infan'tum**, asthma thymicum; laryngismus stridulus.

Clap. Gonorrhœa impura ('leper with a *clap-dish*, to give notice he is infectious.'—Massinger). **C., exter'nal**, gonorrhœa spuria. **C. threads**, albuminous filaments in the urine in gonorrhœal inflammation of the bladder.

Clap'wort. Orobanche Americana.

Claquement (F.), klak'mon. Sound made by valves coming together, as at the mouth of the pulmonary artery and the aorta during the dilatation of the ventricles.

Claret, klar'et. Pleasant French wine, which may be used whenever wine is required. Also, a wine impregnated with spice and sugar, called likewise *Vinum Hippocraticum*. **C. stain**, a form of angioma or nævus.

Clareta, klar-et'ah (*clarus*, clear). Albumen ovi.

Claretum, klar-et'um (*clarus*, clear). Claret.

Clarificant, klar-if'ik-ant (*clarus*, clear, *facio*, to make). That which has the effect of making a liquid clear.

Clarification, klar-if-i-ka'shun (*clarus*, clear, *facio*, to make). *Depuration.* Pharmaceutical operation consisting in separating from a liquid every insoluble substance held in suspension by it that affects its transparency. Decanting and filtering are the operations necessary for this purpose.

Clar'ified hon'ey. See *Mel despumatum*.

Clarify, klar'if-i. To make clear a liquid in which foreign matter is in solution or suspension.

Clarke's corroding ulcer, kor-ro'ding ul'sur. Ulcer of the neck or of the vaginal portion of the uterus.

Clark's col'umn. See *Column, Clark's*.

Cla'ry, com'mon. Salvia sclarea.

Clasis, klas'is. Fracture; fragment.

Clasma, klaz'mah. Fragment.

Clasmatocytes, klas-mat'o-sites (*klasma*, anything broken in pieces, *kutos*, cell). Very large branched cells discovered by Ranvier in connective tissue, which tend to break up into small particles.

Clasp-knife rigid'ity. Reflex spasm of the legs in myotatic irritability of the spinal cord, the peculiar motion of extension suggesting the name.

Class. Assemblage of a certain number of objects. In natural history and in medicine, a group of objects or individuals having one or more common characters. Classes are divided into *orders*, orders into *genera*, genera into *species*, and these last into *varieties*.

Classification, klas-si-fi-ka'shun (*classis*, class, *facio*, to make). Formation of classes. Methodical distribution of any object whatever—as in natural history—into classes, orders, genera, species, and varieties. See *Nosography* and *Nosology*.

Clastic, klas'tik (*klao*, to break). Easily broken; capable of being taken apart piecemeal. **C. anat'omy,** see *Anatomy*.

Clathrocystis, klath-ro-sis'tis (*clathrus*, trellis, *kustis*, pouch). Genus of bacteria which form zoögleæ in circular layers.

Claudicatio, klawd-e-kah'she-o (*claudico*, to halt). Claudication. **C. anat'ica,** staggering, waddling. **C. sponta'nea,** limping from hip-joint, a disease noticed at an early period of that affection in children.

Claudication, klawd-i-ka'shun. The act of halting or limping; lameness. This condition may not constitute any special disease, but may be produced by different causes or affections. It may be the result of the shortening or elongation of one of the lower limbs, of ankylosis of the joints, palsy of the muscles, pain, etc.

Clauditas, klawd'it-as. Claudication.

Claudius (klawd'e-us), **cells of.** See *Corti*.

Claustrophobia, klaws-tro-fo'be-ah (*claustrum*, a closed place, *phobos*, fear). Morbid dread of confinement in closed places.

Claustrum, klaws'trum (*claudo*, to shut). Barrier. Layer of gray cerebral matter situated between island of Reil and external capsule. **C. gut'turis,** isthmus of the fauces. **C. o'ris** or **pala'ti,** velum pendulum palati. **C. virginita'tis** or **virgina'le,** hymen.

Clausura, klaw-su'rah (*claudo*, to shut). Imperforation of any canal or cavity. **C. u'teri,** preternatural imperforation of the uterus.

Clau'sus. Closed.

Clava, klav'ah (*clava*, knotty branch). Calamus aromaticus; posterior pyramid. Enlargement of funiculus gracilis in the medulla oblongata. **C. rugo'sa,** Acorus calamus.

Clavæformis, klav-e-for'mis (*clava*, *forma*). Club-shaped.

Clavaria coralloides, klav-ar'e-ah kor-al-lo-e'des (*clava*, knotty branch, club). *Coralwort*, ord. Fungi. Said to be corroborant and astringent.

Clavate nucleus, klav'ate nu'kle-us (*clava*, knotty branch). The nucleus of gray matter in funiculus gracilis in the medulla oblongata.

Clavatio, klav-ah'she-o (*clavus*, a nail). Gomphosis.

Clavelization, klav-el-i-za'shun (*clavelée*, sheep-pox). Inoculation of sheep with the virus of sheep-pox.

Clavellate, klav'el-late. Club-shaped.

Clavelli cinnamomi, klav-el'le sin-nam-o'me. Cassia buds.

Claves (pl. of **Clavis,** key) **calvariæ,** klav'es kal-var'e-e. Wormiana ossa.

Claviceps, klav'i-seps. Parasitic fungi, from one species of which ergot of rye is derived. **C. purpu'rea,** ergot of rye fungus, from which the officinal ergot, Ergota (Ph. U. S. and Br.), is obtained. Other ergots are also included in this species.

Clavicle, klav'ik'l (dim. of **Clavis,** key). *Collar-bone.* The clavicle is shaped like the letter S, and is placed transversely at the upper part of the thorax. It is articulated at one extremity with the sternum, at the other with the acromion process of the scapula. It gives attachment above to the sterno-cleido-mastoid; below, to the subclavius; before, to the pectoralis major and deltoid; and behind, to the trapezius. It serves as a point of support for the muscles of the arm, and protects the vessels and nerves passing to that extremity. The fibres connecting the lamellæ or plates of bones have also been called *Claviculi* or *Nails*.

Clavicula, klav-ik'u-lah. Clavicle.

Clavicular, klav-ik'u-lar. Relating to the clavicle or collar-bone. **C. nerves,** branches of the fourth cervical nerve which are distributed to the clavicular region.

Clavicularis, klav-ik-u-lar'is. Clavicular. Subclavius muscle.

Claviculate, klav-ik'u-late. Provided with clavicles.

Claviculi, klav-ik'u-le. See *Clavicle*.

Claviform, klav'i-form. Club-shaped.

Clavimanus, kla-vim'an-us. Having a club-shaped hand.

Claviotrachelian, klav-e-o-trak-e'le-an. Relating to the clavicle and neck; occasional muscle from transverse process of third and fourth cervical vertebræ to outer third of clavicle.

Clavipectoral, klav-i-pek'tor-al. Relating to clavicle and chest.

Clavipes, klav'e-pes. Having club-shaped feet.

Clavis, klav'is (key). Clavicle; key. **C. an'glica,** key.

Clavism, klav'izm. Ergotism.

Clavisternal, klav-i-stur'nal. Sterno-clavicular. **C. bone,** manubrium.

Claviventris, klav-e-ven'tris. Having a club-shaped belly.

Clavosus, klav-o'sus. Nail-shaped.

Clavulate, klav'u-late. Club-shaped.

Clavuliger (klav-u'le-jur) or **Clavaligero'sus.** Possessing a club-shaped appendage.

Clavus, klav'us (nail). This word is employed in medicine in various senses. It means a corn, from its resemblance to the head of a nail. Condylomatous excrescence of the uterus. Callous tumor which forms on the white of the eye, and resembles a nail, clavus oculi; considered by some as synonymous with staphyloma; by others, with staphyloma of the cornea. The penis. **C. cerea'lis,** ergot. **C. hyster'icus,** acute pain confined to a small point of the head, described by the sick as resembling that which would be produced by a nail driven into the head; particularly noticed in hysterical females, hence its name. It is called *Ovum hystericum* when the pain occupies a greater extent. **C. oculo'rum,** staphyloma. **C. secali'nus,** ergot. **C. seca'lis,** ergot. **C. silig'inis,** ergot.

Claw'hand. Deformity of the hand in which the wrist is elongated and the fingers are permanently contorted, so as to produce the effect of a claw.

Clay-eat'er. Geophagist.

Clay-eat'ing. Geophagism.

Claytonia (kla-ton'e-ah) **tubero'sa.** Plant growing in Siberia and North America; bulbs are used as food.

Cleansings, klenz'ings. Lochia.

Clear'ing-nut. Seed of Strychnos potatorum.

Clear-see'ing. Clairvoyance.

Clear'weed. Pilea pumila.

Cleav'age (Sax. *cleopan*, to split). The natural line of separation exhibited by certain substances, as minerals, when subjected to mechanical force. The term has been applied to the separation of muscles into longitudinal and circular striæ when mechanical violence is used; also to the segmentation or furrowing of the vitellus in early fœtal life. See *Segmentation*. **C. of o'vum,** see *Segmentation*.

Cleav'ers (*cleave*, to adhere). Galium aparine. **C-s' bees,** Galium aparine.

Cleave'wort. Galium verum.

Cleft (cleaved). Rima. See *Monster*. **C., acces'sory,** calibre of a portion of the Eustachian tube resembling a slit. **C., bran'chial,** cleft or fissure occurring in early fœtal life in the development of the cranium. **C., hy'oid** or **hy'o-bran'chial,** space existing between hyoid and the first branchial arches. **C., maxil'lo-intermax'illary,** space existing between fronto-nasal and maxillary plates in the fœtus; if this space remains open, cleft palate ensues. **C. of the nates,** space between the nates. **C., oc'ular,** embryonic cleft between fronto-nasal process and superior maxillary plate. **C. pal'ate,** see *Harelip*. **C., prim'itive cer'ebral,**

noticeable depression in the embryonic roof of the cerebrum, dividing the prosencephalon from the thalamencephalon. **C. ster'num**, congenital fissure of sternum due to cartilaginous defect. **C., vis'ceral**, four branchial openings in the fœtus, only one of which remains open, and from it the meatus auditorius, Eustachian tube, and tympanum are developed. **C. of the vul'va**, space embraced between labia majora of vulva.

Cleidagra, kleid'ah-grah (*cleis, agra*, seizure). Cleisagra.

Cleid'al. Pertaining to the clavicle.

Cleidarthritis (kleid-ar-thre'tis) or **Cleidarthrocace**, kleid-ar-throk'as-e (*cleis, arthritis*). Gout in the clavicle.

Cleidion, kleid'e-on. Clavicle.

Cleido. In composition, clavicle.

Cleido-atlanticus, kli'do-at-lan'tik-us. Levator claviculæ.

Cleido-brachialis, kli'do-brak-e-al'is. Relating to clavicle and arm.

Cleido-cervicalis, kli'do-sur-ve-kal'is. Relating to the clavicle and neck.

Cleido-costal, kli'do-kos'tal. Costo-clavicular.

Cleido-epistropheus, kli'do-ep-is-trof'e-us. Relating to clavicle and to cervical vertebræ.

Cleido-fascialis, kli'do-fas-se-al'is. Cleido-cervicalis.

Cleido-hyoid, kli'do-hi'oid. Sterno-hyoid. **C.-h. mus'cle**, accessory to sterno-hyoid.

Cleido-mastoïdeus, kli'do-mas-to-e'de-us. Posterior portion of the cleido-mastoïdeus, considered as a separate muscle. It has been corrupted into *clinomastoïdeus*.

Cleido-narthex, kli'do-nar'theks (*cleis*, key, *narthex*, splint). Splint for the clavicle.

Cleido-occipital, kli'do-ok-sip'it-al. Relating to clavicle and occiput.

Cleido-omohyoïdeus, kli'do-o-mo-he-o-e'de-us. Omohyoid muscle.

Cleido-sternal, kli-do-stur'nal. Sterno-clavicular.

Cleis. Clavicle; key.

Cleisagra (kleis'ah-grah) or **Cleid'agra** (*cleis, agra*, seizure). Gout in the clavicle.

Cleisis, kli'sis. A closing.

Cleithorion (kleith-or'e-on), **Cleithoris** (kleith'or-is), **Cleitorion** (kleit-or'e-on), or **Cleitoris**, kleit'or-is. Clitoris.

Cleithron, kleith'ron. See *Claustrum*.

Clematidin, klem-at'id-in. Substance obtained from Aristolochia clematitis; has properties similar to Aristolochia.

Clematine, klem'at-een. Alkaloid of Clematis vitalba.

Clematis, klem'at-is (*klematis*, branch of a vine, tendril). Genus of plants in the Linnæan system. **C. alpi'na**, leaves act as irritant, and seeds possess purgative properties. **C. angustifo'lia** grows in Southern Europe and parts of Asia. Tea is prepared from dried leaves in Siberia. **C. biterna'ta**, roots and part of stem possess sudorific and diuretic properties. **C. cam'phor**, substance with a pungent odor derived by distillation from some varieties of clematis. **C. Chinens'is**, used in China; same properties as C. biternata. **C. corymbo'sa**, C. erecta. **C. cris'pa**, see *Clematis vitalba*. **C. daphnoï'des ma'jor**, Vinca major. **C. dioi'ca**, Jamaica clematis. **C. erec'ta**, *Upright virgin's bower*, order Ranunculaceæ. Leaves contain an acrid principle; have been esteemed antivenereal, and in the form of powder have been used as an escharotic. **C. flam'mula**, sweet-scented virgin's bower; see *C. vitalba*. **C. rec'ta**, C. erecta. **C. se'pium**, C. vitalba. **C. seric'ea**, Mexican clematis. **C. vior'na**, leather-flower; see *C. vitalba*. **C. virgin'ica**, common virgin's bower; see *C. vitalba*. **C. vital'ba**, traveller's joy, common virgin's bower; has been used in the same cases as C. erecta. In infusion it has been applied in cases of itch. Leaves of *C. crispa, C. flammula, C. virginica*, and *C. viorna* have similar properties to C. vitalba.

Clematitin, klem-at-e'tin. Clematidin.

Clematitis erecta, klem-at-e'tis e-rek'tah. Clematis erecta.

Cleome, kle'o-me. Spider-flower; genus of the Capparidaceæ. **C. dodecan'dra** grows in India and United States; root is employed as a vermifuge in the latter country. **C. feli'na** grows in India; employed in that country in epistaxis. **C. frutes'cens**, found in French Guiana; leaves have vesicant properties. **C. frutico'sa**, employed as a vermifuge. **C. icosan'dra** has vesicant properties.

Cleone pentaphylla, kla-o'ne pen-tah-fil'lah. Gynandropsis pentaphylla.

Cleonicion, kle-on-ik'e-on. Clinopodium vulgare.

Cleonis collyrium, kle-o'nis kol-lir'e-um. Collyrium described by Celsus, composed of equal parts of Samian earth, myrrh, and thus mixed with white of egg (called, doubtless, after its inventor). **C. glu'ten**, astringent formula of myrrh, frankincense, and white of egg.

Clepsydra, klep-sid'rah (*klepto*, to conceal, *hudor*, water). Instrument contrived by Paracelsus to convey fumigations to the uterus; also, a water-clock.

Cleptomania, klep-to-man'e-ah (*klepto*, to steal). Kleptomania.

Clergymen's (kler'je-men's) **sore throat.** Chronic catarrhal condition of the mucous membrane of the pharynx and larynx, with alteration of the voice, to which clergymen are especially liable. See *Pharyngitis, follicular*.

Clerodendron (kler-o-den'dron) or **Cleroden'drum.** Genus of shrubs or trees. **C. iner'me** grows in India, where it is used in syphilis and scrofulosis; said to be a tonic and febrifuge. **C. infortuna'tum**, shrub of India, where it is employed as an antiperiodic and vermifuge. **C. phlomoï'des**, juice of leaves is employed in the treatment of syphilis. **C. serra'tum**, employed internally in India in fevers; also externally as an ointment.

Clethra, kle'thrah. Alnus. **C. anifo'lia**, *Sweet pepperbush, White alder;* indigenous; order Ericaceæ. Leaves and flowers are diaphoretic and excitant.

Clethropho'bia (*klethron*, a bar or bolt, *phobos*, fear). Morbid dread of enclosed places.

Cletoris, kleť or-is. Clitoris.

Cliamon'none. Jatropha gossypifolia.

Clicking, klik'ing (onomatopœia). See *Râle, sibilant*.

Clidarthrocace, klid-ar-throk'as-e. Gout in the clavicle.

Clider, kle'der. Galium aparine.

Clidion, klid'e-on. Clavicle.

Cliffortia ilicifolia, klif-fort'e-ah il-is-e-fo'le-ah (after George Cliffort, burgomaster of Amsterdam). Ord. Rosaceæ; common South African plant used by the Boers as an emollient expectorant in catarrh.

Clig'notte. Fatal disease which occurred in the mountainous part of Spain in the year 1849, characterized by ulcers in various parts of the body.

Clima, kle'mah. Climate.

Climacter, klim-ak'tur. Climacterium.

Climacteric, kli-mak'ter-ik (*klimakter*, a step). *Climateric.* Word properly signifying "by degrees," but applied to certain times of life regarded to be critical. It is now chiefly applied to periods of life at which great changes may occur, independently of any numerical estimate of years; such are the period of puberty in both sexes, and of the cessation of menses in women. **C. years**, according to some, those in the life of man which are multiples of the number 7—*septenniads*. Some have admitted only three *climacterics;* others have extended them to multiples of 9, the 63d year being the *grand climacteric*—63 being the product of the multiplication of 7 by 9. It was thought that the period of three, seven, or nine, which they respectively adopted, was necessary to the entire renewal of the body, at which times there would be found none of the parts of which it had previously consisted.

Climacterium, kli-mak-te're-um. Cessation of menses in women.

Cli'matal. Climatic.

Cli'mate (*klima*, region). In a hygienic point of view, climate means, since Hippocrates, a country or region differing from another in respect to season, qualities of the soil, heat of atmosphere, etc. It embraces, in a general manner, all the physical circumstances belonging to each region which exert an influence on living beings. The complexion of the inhabitants of one zone, as well as the prevalent diseases, are modified by climate or locality. Hot climates predispose to abdominal affections, or to abdominal complications in febrile affections; cold climates, to thoracic complications, etc.

One of the most important considerations is the comparative fitness of climates for the residence of invalids, and especially those liable to, or suffering under, bronchitic or consumptive affections. The great object is to select a climate which will admit of regular and daily exercise in the open air, so that the invalid may derive every advantage which this form of revulsion can effect. The temperature of the winter months is a most important object of attention. Equability of temperature is essential, as all sudden changes interfere with the great desideratum of exercise in the open air. Chronic rheumatism and gout are benefited by a warm climate, which, again, is unfavorable to those predisposed to cerebral diseases, especially to such as are characterized by debility and mobility of the nervous system—as paralysis, epilepsy, mania, etc. Hypochondriasis and dyspepsia require rather change of climate and travelling exercise than a sojourn in any one.

Climateric, kli-mat'er-ik. Climacteric.

Climati assuetus, kle'mat-e as-swa'tus. Acclimated.

Climatic, kli'mat-ik. *Climatal.* Belonging to or dependent upon climate. **C. diseases,** such as are caused by climate.

Climation, kli-ma'shun. Acclimation.

Climatological, kli-mat-o-loj'ik-al. Relating to climatology.

Climatology, kli-mat-ol'o-je (*klima*, region, *logos*, discourse). Treatise on climates, their effects on organized bodies, etc.

Climatotherapy, kli-mat-o-ther'a-pe (*klima*, climate, *therapeuo*, to cure). Climatic treatment of diseases.

Climber (klimb'ur), **wood'y.** Ampelopsis quinquefolia.

Climb'ing staff tree. Bark and root of Celastrus scandens; alterative, diuretic, narcotic.

Cline, klin'e. Bed. Hence:

Clineres, klin-a'rez. Confined to bed by sickness.

Cling. Diarrhœa occurring among sheep.

Cling-ras'cal. Galium aparine.

Cliniater, klin-e-at'ur (*cline*, *iatros*, a physician). Clinical physician.

Cliniatria, klin-e-at-re'ah (*cline*, *iatreia*, healing art). Clinical medicine.

Cliniatricus, klin-e-at'rik-us (*cline*, *iatros*, physician). Clinical.

Cliniatrus, klin-e-at'rus. Clinical physician.

Clinic, klin'ik (*kline*, a bed). Instruction at the bedside; but the term now includes instruction also based on cases brought before a class even when the patient is not in bed. Bedridden. One confined to bed by sickness.

Clinica, klin'ik-ah. Clinical medicine.

Clinical, klin'ik-al (*cline*). Relating to a bed. **C. lec'ture,** one given at the bedside or on a particular case or cases. **C. med'icine,** that which is occupied with the investigation of diseases at the bedside, or individually. **C. physic'ian,** one who practises or teaches clinical medicine. **C. thermom'eter,** thermometer for determining the temperature of the skin or accessible mucous membranes in fevers, etc.

Clinically, klin'ik-al-e. Viewed from a clinical standpoint.

Clinice (klin'is-e) or **Clin'ica.** Clinical medicine.

Clinician, klin-ish'e-an. Clinical physician.

Clinicist, klin'i-sist. Clinician; also pupil attending a clinic.

Clinicum, klin'ik-um. Clinic.

Clinicus, klin'ik-us. Clinician.

Clinique (F.). Clinical. The term is also used substantively for *École clinique* or *Clinical school*—a school in which medicine is taught by examining diseases on the patients themselves before the class. The term has been anglicized *Clinic* in this country.

Clinocephalia, klin-o-sef-al'e-ah (*cline*, *kephale*, head). Monstrosity in which the head is usually flattened, owing to synostosis of the parietal and sphenoid bones—*Saddle-head.*

Clinocephalous, klin-o-sef'al-us. One affected with clinocephalia; saddle-headed. See *Clinocephalia.*

Clinodactylous, klin-o-dak'til-us (*klino*, to flex, *daktulos*, finger). Flexed-fingered or toed.

Clinodes, klin-o'des (*cline*, *odes*). Clinoid.

Clinoid, klin'oid (*cline*, *eidos*, form). Resembling a bed. **C. plate,** rough plate behind sella turcica. **C. pro'cesses,** four processes at the upper surface of the sphenoid bone, which have been compared to the posts of a bed. On them the pituitary gland rests. They are divided into *anterior* and *posterior;* each of the anterior processes terminates in a point called *Transverse spinal process.*

Clinoïdeus, klin-o-e'de-us. Clinoid.

Clinology, klin-ol'o-je (*kline*, bed, *logos*, discourse). Treatise on quality of beds adapted to the sick.

Clino-mastoïdeus, klin'o-mas-to-e'de-us. Cleidomastoideus.

Clinopale, klin-op'al-e (*kline*, bed, *pale*, wrestling). Excess of sexual intercourse.

Clinopodia, klin-o-pod'e-ah. Thymus mastichina.

Clinopodiontes, klin-o-pod-e-on'tez. Polygonum aviculare.

Clinopodium arvense, klin-o-pod'e-um ar-ven'se (*cline*, *pous*, foot, so called from the shape of its flowers). C. vulgare. **C. inca'num,** Pycnanthemum incanum. **C. ma'jus,** C. vulgare. **C. vulga're,** *Wild basil.* European plant, ord. Labiatæ, formerly considered to be an antidote to the bites of venomous animals, to facilitate labor, relieve strangury, stop diarrhœa, etc.

Clinosporeæ, klin-o-spor'e-e (*kline*, bed, *spora*, seed). Division of fungi embracing ergot, etc.

Clinotechny, klin-o-tek'ne (*cline*, bed, *techne*, art). Art of preparing beds for patients.

Clinotrochos, klin-ot'ro-kos. Acer campestre.

Clipeatus, klip-e-at'us. Shield-shaped.

Cliseometer (klis-e-om'et-ur) or **Clisiom'eter** (*klisis*, inclination, *metron*, measure). Instrument intended to measure the degree of inclination of the pelvis and to determine the relation between the axis of the pelvis and that of the body.

Clis'ia. Couch.

Clisma, kliz'mah. See *Clysma.*

Clitbur (klit'bur), **Clite** (cle'te), **Clithe** (kle'the), or **Clitheren,** klith'er-en. Galium aparine; Arctium lappa.

Clitoricarcinoma, klit-or-e-kar-sin-o'mah (*clitoris*, *karkinoma*, cancer). Cancer of the clitoris.

Clitoridauxe, klit-or-id-awks'e (*clitoris*, *auxe*, augmentation). Enlargement of the clitoris.

Clitoridean, klit-or-id'e-an. Relating to the clitoris.

Clitoridectomy, klit-or-i-dek'to-me (*clitoris*, *ektome*, excision). Amputation of the clitoris.

Clitoriderector, klit-or-id-e-rek'tor. Erector clitoridis.

Clitorides inferiores lati et plani musculi, klit-or'id-es in-fe-re-o'res lat'i et plan'i mus'ku-le. Constrictores cunni.

Clitorid'ian. Clitoridean.

Clitoris, klit'or-is (*kletor*, a servant who invites guests). *Cletoris.* Small round organ, situate at the upper part of the vulva, and separated by a small space from the anterior commissure of the labia. Its base is surrounded by a slight fold, similar to the prepuce, and it is, internally, of the same structure as the corpora cavernosa penis. The artery of the clitoris is a branch of the internal pudic. The vein communicates with the internal pudic, and the nerve

with the pudic. **C. cri'ses,** occasional attacks of sexual excitement in tabetic women. **C., fræ'num of,** frænum of clitoris.

Clitorism, klit'or-izm. The abuse made of the clitoris to satisfy an unnatural sexual desire. Also, an unusually large clitoris.

Clitoritis, klit-or-e'tis. *Clitorititis.* Inflammation of the clitoris.

Clitorititis, klit-or-it-e'tis. Clitoritis.

Clitorium, klit-o're-um. Vulva.

Clits, klits. Galium aparine.

Cliver, kle'vur (*cleave,* to adhere). Galium aparine.

Clivus Blumenbachii, kle'vus blu-men-boch'e-e (*clivus,* slope). Inclining surface behind the dorsum ephippii of the sphenoid bone, which is continuous with the basilar process of the occipital bone.

Clizia, kliz'e-ah. Helianthus annuus.

Cloaca, klo-ak'ah (akin to *kluzo,* to wash). A common sewer. Pouch at the extremity of the intestinal canal, in which the solid and liquid excretions are commingled in birds, fish, and reptiles. In the male, it gives exit to the excrements, sperm, and urine; in the female, to the eggs, fecal matters, and urine. Term used in surgery to denote a cavity containing pus, from which it cannot escape. **C. congenita'lis,** condition in which the opening of the rectum is located in the genito-urinary tract. **C., u'ro-gen'ital,** congenital condition in which the vagina and urethra have a common opening. **C., ves'ico-rec'to-vagi'nal,** condition in which the bladder, rectum, and vagina have a common opening.

Cloacal (klo-a'kal) or **Cloacinus,** klo-ah-se'nus. Relating to the cloaca.

Cloacismus, klo-ah-siz'mus. Anal discharge of urine.

Cloacula, klo-a'ku-lah. Small cloaca.

Cloanx, klo'anks. Orpiment.

Clock. Leontodon taraxacum; also the Plantago lanceolata. **C. face, astigmat'ic,** employed in tests for astigmatism, consists of a card provided with lines, which extend from a centre and are marked with numbers, similar to a clock.

Clod-weed. Filago Germanica.

Cloffing. Species of hellebore.

Clog. Cone of Pinus picea.

Cloisonnement (F.), klwah-zon'mon. See *Generation.* Also, the division of a hollow organ—as in such a malformation of the bladder, vagina, and uterus into two portions by a septum.

Clonic, klon'ik (*klonos,* tumultuous movement). Term applied to irregular convulsive motions, convulsion with alternate relaxation; in contradistinction to *tonic,* which signifies a constant rigidity; *Clonus, Clonospasmus, Clonici partiales.* **C. spasm,** see *Spasm.*

Clonici universales, klon'is-e u-ne-ver-sal'es. General clonic spasms.

Clonis, klo'nis. Sacrum.

Clonism, klon'izm. Clonic spasm.

Clonodes, klo-no'des (*klonos, odes,* tumultuous movement). Convulsive. Galen applies this term to the pulse, when convulsive, as it were, and unequal. He compares the sensation it communicates to the finger to that produced by a bundle of sticks or of rods in vibration.

Clonos, klon'os. See *Clonus.* **C. epilep'sia,** epilepsy. **C. hydropho'bia,** hydrophobia.

Clonospasmus, klo-no-spaz'mus (*klonos,* agitation, *spasmos,* spasm). See *Clonic.*

Clonus, klo'nus (*klonos,* tumultuous movement). Tremulous and chronic agitation of various muscles. **C., ankle** or **foot,** morbid condition characterized by rhythmical contractions of the muscles of the calf of the leg, when sudden flexure of the foot on the sole occurs by pressure, while the leg is extended; observed in lateral sclerosis of the medulla spinalis; similar conditions affect the jaw, the toe, and the wrist. **C. nictita'tio,** nictation. **C. palpita'tio,** palpitation. **C. pendicula'tio,** pendiculation. **C. pendicula'tio maxilla'rum,** yawning. **C. singul'tus,** hiccough. **C. sternuta'tio,** sneezing. **C. subsul'tus,** twitching of tendons.

Clopemania, klope-man'e-ah (*klope,* theft, *mania*). Insanity, with an irresistible propensity to steal.

Cloquet', an'gle of. Cloquet's method of obtaining the facial angle—the intersection of the facial angle with the base being, by his method, at the centre of the superior alveolar border. **C., canal' of,** hyaloid artery. **C. fœt'idum,** bacillus fœtidus. **C., her'nia of,** femoral hernia passing behind the femoral vessels; pectineal hernia.

Closed cir'cuit. See *Circuit.*

Close'stool. A chamber cabinet for use in evacuating the bowels or bladder.

Closh. Founder; a disease attacking the feet of cattle.

Closs. Juncus acutiflorus.

Clostridium butyricum, klos-trid'e-um bu-tir'ikum. Bacillus butyricus.

Clot (*kloot,* ball, *kluit,* clod). Coagulum. See *Embolism* and *Thrombosis.* **C. of blood,** see *Blood.* **C., heart,** see *Polypus, Embolism,* and *Thrombosis.*

Clotbur, klot'bur. Xanthium.

Clothing, klo'thing. Vestitus.

Clottage, klot'aj. Coagulation. **C. of the ureters,** term applied to a surgical process intended to check profuse hematuria from a kidney due to traumatism or occurring in carcinoma. The clots are removed from the ureter by an aspirator, and pressure is exerted on the ureter, and thus a firm blood is allowed to form.

Clotted, klot'ed. Collapsed and thickened.

Clotty, klot'te. Composed of clots.

Clot'weed. Xanthium strumarium.

Cloud. Film appearing in an otherwise clear fluid.

Cloudberries, klowd'ber-rees. Rubus chamæmorus.

Cloud'berry tree. Rubus chamæmorus.

Cloudiness, klowd'e-ness. Turbidity.

Cloudy swelling, klowd'e swell'ing. A form of degeneration frequently found in the kidney, liver, and heart muscle, consisting of increase in the size of the cells and their minute granular appearance under the microscope. The cloudy swelling precedes breaking up, disintegration, and detachment of the cells, and occurs in infectious diseases and in some forms of irritant or corrosive poisoning.

Clove (*clavus,* nail). See *Eugenia caryophyllata.* **C. bark,** see *Myrtus caryophyllata.* **C. hitch,** noose-knot formed of two loops, made by combining two half hitches. **C. July' flow'er,** Dianthus caryophyllus. **C. pink,** Dianthus caryophyllus.

Clo'ver. Trifolium. **C., win'ter,** Mitchella repens.

Clo'ver's syr'inge. Syringe connected with a catheter, and employed in emptying the bladder.

Cloves. Caryophyllus. See *Eugenia caryophyllata.*

Clove-stalks. Flower-stalks of Eugenia caryophyllata, from which a volatile oil is obtained; ground cloves are sometimes adulterated with it.

Clove-tongue, klovē'-tung. Helleborus niger.

Clovorubrin, klov-o-ru'brin. Resin of a red color obtained by treating oil of cloves with concentrated sulphuric acid.

Clownism. Term given by Charcot to symptoms of emotions or contortions occurring in hystero-epilepsy.

Club foot. Kyllosis. **C. hand,** see *Kyllosis.* **C. pe'nis,** see *Kyllosis.*

Clubbed. Club-shaped, as clubbed fingers; often observed in phthisical individuals.

Clubione (klub-e-o'ne) **medicina'lis.** Species found in America; has vesicant properties.

Club'-moss. Lycopodium. **C., com'mon,** Lycopodium complanatum. **C. fir,** Lycopodium selago. **C., up'right,** Lycopodium selago.

Clunes, klu'nees (pl. of **Clunis,** buttock). Nates.

Clunesia, klu-na'ze-ah (*clunes,* nates). Inflammation of the buttocks.

Clu'nis. Sacrum; nates.

Clupea thryssa, klu'pe-ah thris'sah. *Yellow-billed sprat.* Very poisonous fish of the West Indies.

Clusia, klu'se-ah. Balsam tree; genus of plants, nat. ord. Guttiferæ. **C. insig'nis,** species of Brazil; resin is obtained from the flowers and stamens, and

used as an application to sores. **C. ro'sea**, juice possesses cathartic properties; resin is utilized in plasters.

Clutia cascaril'la (after T. A. Cluyt (L. *Clutius*), an apothecary of Leyden). Croton cascarilla. **C. Collina**, species growing in East India; bark and rind of nuts are poisonous. **C. eluteria**, Croton cascarilla.

Cluttering, klut'ur-ing. Impairment of speech is present; condition in which shortening of syllables and words and excessive rapidity of speech coexist.

Cluytia, kli'te-ah. Clutia.

Clydasmus, klid-az'mus. Condition in which splashing of fluids is present in the stomach and in other cavities of the body.

Clydon, kle'don. Flatulence.

Clypealis, klip-e-al'is. Thyroid (cartilage).

Clypeastriform, klip-e-ast're-form. Clypeate.

Clypeate (klip'e-ate) or **Clipei'form**. Shield-shaped.

Clysantlium (klis-ant'le-um) or **Clysantlion** (*kluzo*, to wash away, to give a clyster, *antlion*, a pump or syringe). Syringe; clyster.

Clysis, kle'sis. Application of a clyster; washing out by means of a clyster.

Clysma, klis'mah (*klusma*). Clysis, clyster. **C. ton'icum**, enema fœtidum.

Clysmation, klis-mat'e-on (dim. of **Clysma**). Small clyster.

Clysmic, kliz'mik (*kluzo*, to wash out). Suitable or employed for washing out.

Clysmus, kliz'mus. Application of a clyster; washing out by means of a clyster.

Clyster, klis'tur (*kluzo*, to wash away). *Glyster, Glister, Injection;* a liquid thrown into the large intestines by means of a syringe or bladder and pipe properly prepared, etc., the nozzle of the syringe or pipe being introduced into the anus. See *Enema*. **C. of al'oes**, enema aloes. **C., an'odyne**, enema anodynum. **C. of asafœt'ida**, enema asafœtidæ. **C., cathar'tic**, enema catharticum. **C. of col'ocynth**, enema colocynthidis. **C., com'mon**, enema commune. **C., domes'tic**, enema commune. **C., fet'id**, enema fœtidum. **C. pipe**, tube for injection of fluid into the bowels. **C., purg'ing**, enema catharticum. **C., starch and opium**, enema anodynum. **C., tobac'co**, enema tabaci. **C., tur'pentine**, enema terebinthinæ. **C. uteri'nus**, injection into the vagina.

Clysterion, klis-ter'e-on. Clyster.

C. m. See *Abbreviation*.

C. n. See *Abbreviation*.

Cnaphos, nah'fos. Dipsacus fullorum.

Cnecelæum. See *Cnicelæum*.

Cnecion, ne'se-on. Genista tinctoria.

Cnecos, ne'kos. Carthamus tinctorius.

Cnema, ne'ma. Cnesma.

Cneme, ne'me. Leg, tibia.

Cnemelephantiasis, nem-el-e-fant-e'a-sis (*kneme*, leg, elephantiasis). Elephantiasis affecting the leg.

Cnemerysipelas, nem-er-e-sip'el-as. Erysipelas affecting the leg.

Cnemial, ne'me-al. Relating to leg or tibia.

Cnemis, na'mis. Splint used in fracture of the leg.

Cnemitis, nem-e'tis (*kneme*, leg). Inflammation of the tibia.

Cnemodactylæus, ne-mo-dak-til-e'us (*kneme*, leg, *daktulos*, finger or toe). Extensor communis digitorum pedis.

Cnemolordosis, ne-mo-lor-do'sis (*cneme*, *lordosis*, the state of being bent forward). Bending of the leg forward.

Cnemoscoliosis, ne-mo-skol-e-o'sis (*cneme*, *skoliosis*, bending, especially sideways). Bending the leg sideways; the state of being *bow-legged* or *bandy-legged*, *outkneed*, *Valgus*.

Cneoron, ne-o'ron (*cneorum*). Daphne gnidium. **C. ni'grum**, Daphne gnidium. **C. pulverulen'tum** grows in the Canary Islands; occasionally substituted for cinchona. **C. tricoc'cum**, spurge olive; leaves and sap possess purgative properties.

Cneorum tricoccum, ne-o'rum tre-kok'kum. *Widow-wail, Spurge olive;* plant, ord. Terebinthaceæ, a native of Southern Europe, contains a very irritating acrid principle; the ancients employed its leaves as a powerful purgative; it is now sometimes used for deterging ulcers.

Cnesis, ne'sis. Painful itching.

Cnesma, nez'mah. Itching.

Cnesmodes, nez-mo'dees (*knesma*, itching, *eidos*, resemblance). Causing or affected with itching.

Cnesmona (nez'mon-ah) or **Cnes'mone**. The itch.

Cnesmopompholyx, nez-mo-pom'fol-iks (*knesma*, itching, *pompholux*, blister). Intensely itching pompholyx.

Cnesmos (nez'mos) or **Cnesmus**, nez'mus. Itching, prurigo. **C. acari'asis**, itching due to presence of lice. **C. vulga'ris**, see *Epinyctides*.

Cnethmus, neth'mus. Cnesmos.

Cnicelæum, nis-el-e'um (*cnicus*, *elaion*, oil). Oil of carthamus.

Cnicus, ne'kus. Name for Carthamus tinctorius. **C. benedic'tus**, Centaurea benedicta. **C. sylves'tris**, Centaurea benedicta.

Cnide, ne'de. Urtica.

Cnidefemera, nid-ef-em'er-ah (*knide*, nettle, *ephemeros*, ephemeral). Urticaria ephemera.

Cnidelæon, nid-el-e'on (*knidelaion*, *cnidia*, *elaion*, oil). *Cnidelæum;* oil made from the grana cnidia or mezereon berries.

Cnidia grana, nid'e-ah gran'ah. *Cnidii cocci;* berries of the Daphne gnidium.

Cnidian (nid'e-an) **school** (from Knidos, a city of Greece). A Grecian school of medicine which existed before Hippocrates.

Cnidium silaus, nid'e-um sil'ah-us. Peucedanum silaus. **C. tenuifo'lium**, Sison ammi.

Cnidoma, nid-o'mah (*knide*, nettle). Urticaria.

Cnidomecphlogiois, nid-om-ek-flo-je-o'is. Smallpox in a modified form accompanied by a rash bearing a resemblance to urticaria.

Cnidopsydracia, nid-o-sid-rah'se-ah (*knide*, nettle, *psudrakion*, small vesicle). Vesicles bearing a resemblance to lesions existing in urticaria.

Cnidopyra, nid-op'ir-ah (*knide*, nettle, *pura*, altar fire). Urticaria accompanied by fever.

Cnidoscolus (nid-os'kol-us) (*knide*, nettle, *skolos*, thorn) **quinquelo'bus**. Jatropha urens; possesses purgative properties. **C. stim'ulans**, *Tread softly*, grows in Southern United States; leaves are provided with hairs which are very irritating to the touch; roots can be eaten.

Cnidosecphlogiois, nid-os-ek-flo-je-o'is. Cnidomecphlogiois.

Cnidosis, nid-o'sis. *Knidosis;* a pungent itching compared to that produced by the nettle; urticaria, urtication.

Cnipotes, nip'o-tes (*knipotes*). Itching; dry ophthalmia, *Xerophthalmia*.

Cnisma, niz'mah. Cnesmos.

Cnismoregmia, niz-mo-reg'me-ah (*knismos*, vellication, *orego*, to put forth). Pyrosis.

Cnismos, niz'mos. Cnesmos.

Cnissa, nis'sah. Having the smell of burnt or corrupt animal matter.

Cnissoregmia, nis-so-reg'me-ah (*knissa*, the smell of burnt fat or flesh, *orego*, to put forth). Eructation having smell of corrupt animal matter, as of rotten eggs.

Cnissorrhoncus, nis-sor-rhon'kus (*knissao*, to crackle like burning fat, *rhonchos*, snoring noise). Crepitant râle.

Cniza, ne'zah. Urtica.

Cnopodium, no-pod'e-um. Polygonum aviculare.

Cnyma, ne'mah. Slight itching. Also, a puncture or vellication.

Co, ko, as a prefix, like *cum*, with.

Coa'con. Black plaster, mentioned by Celsus, and composed of litharge and resin—the litharge being first boiled in oil.

Coactio, ko-ak'she-o. See *Anance*.

Coactus, ko-ak'tus (*cogo*, *co*, and *ago*, to bring together). Coagulated or curdled.

Coagmentatio, ko-ag-men-tah'she-o (*coagmento*, to

join together). Immovable articulation, as of the teeth; gomphosis.

Coagula (ko-ag'u-lah) (pl. of **Coagulum**) **cor'dis fibrino'sa.** See *Polypus.* **C. vena'rum fibrino'sa,** fibrinous concretions in the veins.

Coagulability, ko-ag-u-lab-il'it-e. Capability of being coagulated.

Coagulable, ko-ag'u-la-ble. Capable of coagulation. **C. lymph,** fibrin, liquor sanguinis.

Coagulants (ko-ag'u-lants) or **Coagulan'tia** (*coagulo*—itself from *co* and *ago*—to bring together, or *cogo,* to drive or bring together). Remedies or poisons formerly supposed to possess the power of coagulating the blood or to give consistency to animal fluids. Now the term is applied only to agents having that effect upon other bodies, as rennet or milk.

Coagulate, ko-ag'u-late. To bring together into a clot.

Coagulated, ko-ag'u-la-ted. Curdled; clotted.

Coagulatio, ko-ag-u-lah'she-o. Coagulation. **C. cal'ida,** coagulation by heat. **C. frig'ida,** coagulation by cold.

Coagulation, ko-ag-u-la'shun. *Thrombosis.* Conversion of a liquid into a more or less soft and tremulous mass. Many animal and vegetable fluids are capable of coagulation. See *Blood.* **C. necro'sis,** necrotic coagulation of tissue. **C., ther'mic,** coagulation by heat.

Coag'ulative. Having a tendency to coagulate. **C. necro'sis,** see *Necrosis.*

Coagulatus, ko-ag-u-lat'us. Reduced to a curdled condition. See *Curds.*

Coagulum, ko-ag'u-lum (same etymon as **Coagulants**). Soft mass formed in a coagulable liquid. The *Clot of the blood* is particularly so called—the *Cruor, Insula, Placenta,* or *Hepar sanguinis, Crassamentum, Sanguis concretus*—the red mass, composed of fibrin, serum, and coloring matter, which separates when the blood is left to itself. See *Blood.* The word is also applied, in pathology, to sanguineous concretions which form in different natural and accidental cavities, and which, when they occur at the mouth of a divided artery, sometimes suspend the flow of blood. This is, indeed, one of the means by which hemorrhage is arrested. See *Thrombosis* and *Embolism.* **C. alu'minis,** *Alum curd* or *cataplasm,* is made by beating the white of egg with a little alum until a coagulum is formed. Applied in cases of ophthalmia where an astringent is necessary.

Coak'um. Phytolacca decandra.

Coal lung. See *Anthracosis.* **C. mi'ner's phthi'sis,** anthracosis. **C. oil,** petroleum. **C. tar,** this dark, thick, semiliquid substance, which is obtained as a product of the dry distillation of bituminous coal, not only supplies many valuable materials in the arts, but several which have a therapeutical importance, such as amyl, benzole, carbolic acid, creasote, etc. It is itself disinfectant, and mixed with plaster of Paris forms a powder, which may be applied on lint or mixed with poultices, or thickly sprinkled on fetid, gangrenous, and other ulcers, or applied to offensive suppurating surfaces, etc. *Coal-tar creasote* is carbolic acid.

Coalescence, ko-al-es'ens (*coalesco,* to grow together). Adhesion or union of parts previously separated, as in case of wounds and preternatural adhesions or malformations. See *Monster.*

Coalescent, ko-al-es'ent. In a condition of coalescence.

Coal'fish. See *Oleum jecoris aselli.*

Coalitio, ko-al-ish'e-o. Coalition; symphysis. **C. par'tium,** coalescence.

Coalition, ko-al-ish'un (same etymon as **Coalescence**). Union of particles in one mass. Concretion. Action of several parts of the frame which have the same nutrition.

Coalitus, ko-al'it-us. Symphysis.

Coalternæ febres, ko-al-ter'ne feb'res (*co, alterno,* to alternate). Name given to two intermittents attacking a person at the same time, but whose paroxysms are distinct, so that the attack of one supervenes when the other has ceased. The term *double intermittent* expresses the same meaning.

Coaptation, ko-ap-ta'shun (*co,* and *apto,* to adjust, adapt). The act of adapting the two extremities of a fractured bone to each other, or of restoring a luxated bone to its place. Coaptation must be effected gently. Usually extension and counter-extension are, in the first place, necessary.

Coarctatio, ko-ark-tah'she-o. Contraction; stricture. **C. ventric'uli,** stricture of the stomach.

Coarctation, ko-ark-ta'shun (*co,* and *arcto,* to straighten). Stricture; contraction.

Coarctotomy, co-ark-tot'o-me (*coarctatus,* constricted, *tome,* incision). Urethrotomy; division of a stricture in the urethra.

Coarticulated, ko-ar-tik'u-la-ted. Articulated together.

Coarticulation, ko-ar-tik-u-la'shun (*co, articulus,* joint). Diarthrosis; synarthrosis.

Coat. Covering; fur, as of the tongue. See *Enduit.* **C., buf'fy,** corium phlogisticum.

Coat'ed. Covered; having a fur, as of the tongue. See *Enduit.*

Coat'ing of pills. Wrapping pills in sugar, glycerin, etc., to mask their taste. See *Deaurentur pilulæ.*

Coatl or **Coatli.** Wood of Hæmatoxylon Campechianum.

Cobalt, ko'balt. Metal of a reddish-gray color; as an oxide much used as a pigment. **C., protox'ide of,** smalt.

Cobal'to-ni'trate of potas'sium. Salt of potassium, occurring in yellow crystals; said to be of value in cardiac dropsy.

Co'bra bean. Physostigma Amazonica, a climbing plant of Brazilian Guiana. **C. poi'son,** poison of the cobra.

Cobra di capello, ko'brah de kap-el'lo. *Cobra, C. capello* (P.), serpent of the hood; *Hooded snake, Spectacled snake.* A very venomous reptile of India, of the family Viperidæ—the *Naja tripudians.* See *Adali.*

Cob'web. Araneæ tela.

Coca, ko'kah. See *Erythroxylon coca.*

Cocaina, ko-kah-e'nah. *Cocaine.* Alkaloid obtained from leaves of Erythroxylon coca, small shrub, native of Peru, nat. ord. Erythroxylaceæ. Coca leaves are chewed in Peru by the Indians, and the plant is used very extensively in South America, serving in lieu of tea and coffee. Cocaine is employed extensively as a local anæsthetic. A wine is made of the leaves, and is considered to be of value as a tonic, and is recommended in affections of the voice in singers. **C. bo'rate,** used for eye-washes and for hypodermic injections, being very soluble.

Cocaï'næ hydrochlor'as (Ph. Br.). $C_{17}N_{21}NO_{41},HCl$. White crystalline powder, easily soluble in water; is employed as a local anæsthetic to mucous membranes in 5–10 per cent. solutions, and as a mydriatic; internally it is given in doses of from gr. $\frac{1}{8}$–gr. j; it is a diuretic nerve stimulant. *Cocainism* or the *cocaine habit* is the result of the abuse of cocaine. **C. ni'trate,** used for injections in genito-urinary passages, combined with nitrate of silver. **C. phen'ylate,** used locally to produce anæsthesia in dentistry, and painted in localized pain in catarrh of mucous membrane, etc.

Cocaine, ko-ka'een. See *Cocaina* and *Erythroxylon coca.* **C. canthar'idate,** white saline powder, employed in tuberculosis. **C. hab'it,** see *Cocainæ hydrochloras.* **C. hydrochlo'rate,** cocainæ hydrochloras. **C. o'leate,** see *Oleate.* **C. phe'nate,** analgesic, anæsthetic, etc.

Cocainism, ko'ka-in-izm. Untoward effects of cocaine from internal or external use of cocaina, as blindness, loss of speech, nausea and vomiting, epileptiform convulsions, etc.

Cocainization, ko-kah-in-iz-a'shun. The process of bringing the organism or a part under the influence of cocaine.

Cocainomania, ko-kah-in-o-man'e-ah (*cocaine, mania,* madness). Mental condition resulting from abuse of cocaine.

Cocash, ko'kash. Erigeron Philadelphicum.

Cocatannic (ko-kah-tan'nic) **acid.** Variety of tannic acid from leaves of Erythroxylon coca.

Coccaceæ, kok-kah'se-e. Single or variously ramified cocci. See *Bacteria.*

Coccarium, kok-kah're-um (*kokkos,* pill). Very small pill.

Cocchia, kok'se-ah. Purgative pills.

Cocci, kok'se (pl. of **Coccus**). Single, unaggregated spheroidal cells of schizomycetes; also, insects of the order Hemiptera. See *Bacteria, Micrococci,* and *Coccus.* **C. gra'num,** kermes. **C. orienta'les,** see *Menispermum cocculus.*

Coccidium, kok-sid'e-um. Genus of the Sporozoa. **C. ovifor'me,** parasite found in liver of rabbits and also in human liver.

Coccinella, kok-sin-el'lah (dim. of **Coccus,** berry, which it resembles). Coccus cacti. **C. septempuncta'ta,** *Lady-bird, Lady-cow, Lady-bug, Cow-lady, Cushy-cow-lady.* Insect, bruised upon an aching tooth, has been regarded as antidontalgic.

Coccion, kok'ke-on. Weight mentioned by Myrepsus; the same as the siliqua.

Coccionella, kok-se-on-el'lah. Coccus cacti.

Coccix, kok'siks. Coccyx.

Coccobacteria, kok-ko-bak-te're-ah (*kokkos,* berry, *bacterion,* bacterium). Term embracing bacteria, bacilli, etc. **C. sep'tica,** Billroth includes under this term all cocci, bacilli, or bacteria which have the power of causing peptic fermentation.

Coccobalsamum, kok-ko-bal'sam-um. See *Amyris opobalsamum.*

Coccogenis, kok-oj'en-is (*kokkos,* scarlet, *gena,* cheek). Having scarlet cheeks.

Coccogenous, kok-oj'en-us (*kokkos, gennao,* to engender). Producing cocci; due to the presence of pus cocci; term employed by Unna in sycosis nonparasitica.

Coccoglia, kok-kog'le-ah (*kokkos,* berry, *glia,* glue). Collection of micrococci joined together by a substance resembling glue.

Coccognidia, kok-ko-nid'e-ah. Cnidia grana.

Coccol'oba austra'lis. Polygonum tamnifolium. **C. grandiflo'ra,** C. pubescens. **C. niv'ea** grows in the West Indies; used as a refrigerant and in hemorrhage; fruit can be eaten. **C. pubes'cens** grows in West Indies; fruit can be eaten. **C. sagittæfo'lia,** root has astringent properties. **C. uvif'era,** see *Kino.*

Coccomelas'ma. Cutaneous granular melanosis.

Coccones, kok-ko'nes. See *Punica granatum.*

Coccos, kok'kos. Schizomyces with single round cell.

Coccosteophyte, kok-os'te-o-fite (*kokkos,* berry, *osteon,* bone, *phuton,* outgrowth). Granular or warty bony outgrowth.

Coccothrix, kok'ko-thricks (*kokkos,* berry, *thrix,* hair). Rod-form, consisting of cocci in a row united by cement substance, which differs in composition.

Cocculi officinarum, kok'ku-le of-fis-in-ah'rum. See *Menispermum cocculus.*

Cocculin, kok'u-lin. Picrotoxin.

Coc'culus crisp'us (dim. of **Coccus**). Menispermum tuberculatum. **C. In'di aromat'icus,** see *Myrtus pimenta.* **C. In'dicus,** see *Menispermum cocculus.* **C. palma'tus,** columba. **C. subero'sus,** Menispermum cocculus.

Coccum, kok'kum (*kokkos,* berry). See *Cnidia grana;* kermes. **C. baph'icum,** kermes. **C. infecto'rium,** kermes. **C. scarlati'num,** kermes. **C. tincto'rum,** kermes.

Coccus, kok'kus (*kokkos,* berry, pill). Coccus cacti; pilula. **C. America'nus,** Coccus cacti. **C. cac'ti,** systematic name of the *Cochineal insect, Coccus* (Ph. U. S. and Br.), the *Cochineal animal,* class Insecta, ord. Hemiptera. The cochineal insects are blackish-red externally, purple-red within. They are used chiefly for giving a red color to tinctures, etc. They were at one time esteemed astringent, stimulant, diuretic, and anodyne. Coccus (Ph. U. S. and Br.) refers only to the female insect. **C. i'licis,** kermes. **C. In'dicus,** see *Menispermum cocculus.* **C. In'dicus tincto'rius,** Coccus cacti. **C. polon'icus,** Coccus cacti.

Coccyalgia, kok-se-al'je-ah (*coccyx, algos,* pain). Coccyodynia.

Coccycephalus (kok-se-sef'al-us) or **Coccy'gocephalus** (*coccyx, kephale,* the head). Monster whose head has the shape of the os coccygis.

Coccygalgia, kok-sij-al'je-ah. Coccyodynia.

Coccygeal, kok-sij-e'al. Coccygeus. **C. ar'tery,** branch of the sciatic artery. **C. gland** or **body,** *Gland of Luschka, Nervous gland of the pelvis.* Ductless gland about the size of a pea in front of the top of the coccyx; its functions are unknown. As it mainly consists of a rich plexus of capillary vessels, the name *Plexus vasculosus coccygeus* has been given to it. The intervascular tissue of this gland is very liberally supplied with nerves. **C. joint,** articulation between the sacrum and coccyx. **C. lig'aments,** see *Sacro-coccygeal ligaments.* **C. mus'cle,** coccygeus. **C. nerve,** see *Sacral nerve.* **C. ver'tebræ,** see *Coccyx.*

Coccygectomy, kok-se-jek'to-me (*coccyx, ektome,* excision). Excision of the coccyx or of a portion of it.

Coccygeo-mesenteric, kok-sij-e'o-mez-en-ter'ik. Relating to the caudal and mesenteric regions.

Coccygerector, kok-sij-er-ek'tor. Extensor coccygis.

Coccygeus, kok-sij-e'us. Coccygeal; inserted into the coccyx; belonging both to the ischium and coccyx. The muscle *Ischio-coccygeus, Levator coccygis, Triangularis coccygis,* arises from the spinous process of the ischium, and is inserted into the extremity of the sacrum and into nearly the whole length of the os coccygis laterally. It retains the coccyx in place, and prevents it from being forced backward during the evacuation of the feces.

Coccygexarthrosis, kok-sij-eks-ar-thro'sis (*coccyx, exarthrosis,* dislocation). Dislocation of the coccyx.

Coccygio-analis, kok-sij'e-o-an-a'lis. Relating to coccyx and anus; also, sphincter ani.

Coccygio-pubic, kok-sij'e-o-pu'bik. Reaching from coccyx to symphysis pubis.

Coccygocephalus, kok-sij-o-sef'al-us. Coccycephalus.

Coccygodyn'ia. Coccyodinia.

Coccygotomy, kok-se-got'o-me. See *Coccygectomy.*

Coccymelia, kok-se-mel'e-ah. Prunus domestica.

Coccymelon, kok-se-ma'lon. Prune.

Coccyodinia, kok-se-o-din'e-ah (better **Coccygodyn'ia**) (*coccyx, odune,* pain). Pain in the os coccygis.

Coccy-peroneal (kok'se-per-o-ne'al) **muscle.** Muscular band extending from the coccyx to the biceps femoralis.

Coccyx, kok'siks (*kokkux,* cuckoo, whose bill it is said to resemble). *Rump-* or *Crupper-bone.* An assemblage of small bones attached to the lower part of the sacrum, the curvature of which it prolongs and of which it seems to be an appendage. Generally it consists of four bones. Behind the base of the coccyx are two small tubular eminences, called *Cornua of the coccyx.*

Cochea, kok'e-ah. See *Cochia.*

Cocheia, kok-i'ah. Cochia.

Cochenillin, ko-chen-il'in. Cochinilin.

Cocheria, kok-e're-ah. Cochia.

Cochia, kok'e-ah (*kokkos,* berry, pill, or *kochuo,* to flow profusely). *Cocchia, Cocheria.* Ancient name for several officinal purgative pills. See *Pilulæ aloes et colocynthidis.*

Co'chin Chi'na diarrhœ'a. Diarrhœa occurring in endemic form in Cochin China; a parasite, the Rhabdonema intestinale, is found in the stools. **C. C. ul'cer,** endemic non-contagious disease, whose chief symptom is an ulceration following even upon a trivial lesion of the skin, in the lower extremities especially, and which attacked the foreign soldiers in China. See *Beriberi.*

Cochin (ko'shin) **leg.** See *Elephantiasis.*

Cochineal, kosh-in-eel' (from **Coccinella**). Coccus cacti.

Cochinelifera cochinilla, ko-chin-el-if'er-ah ko-chen-il'yah. Coccus cacti.

Cochinilin, ko-chin-il'in. Carminic acid; the coloring matter of cochineal.

Cochinilla, ko-chen-il'yah. Coccus cacti.

Cochinillin, ko-chin-il'lin. Cochinilin.

Cochlea, kok'le-ah (snail's shell) (*kochlias* or *kochlos*, snail with a spiral shell; winding staircase). Anatomists have given this name to the most anterior of the three cavities which constitute the labyrinth of the ear, and that of the *Scalæ of the cochlea* to two spiral cavities in the interior of the cochlea. One of these scalæ terminates at the fenestra rotunda, and is called *Scala tympani;* the other opens at the anterior and inferior part of the vestibule, and is called *Scala vestibuli.* See *Corti.* **C., sca'læ of the,** see *Cochlea.*

Cochleaform, kok'le-ah-form (*cochlea*, *forma*, shape). Resembling a cochlea in shape. See *Cochleated.*

Cochlear, kok'le-ar. Relating or appertaining to the cochlea; see *Cochleare.* **C. ap'erture,** fenestra rotunda. **C. ar'tery,** branch of internal auditory artery. **C. canal',** osseous canal of the cochlea. **C. duct,** ductus cochlearis. **C. fos'sa,** recess in vestibule. **C. nerve,** see *Auditory nerve.*

Cochleare, kok-le-ah're. Cochlear (*cochlea;* its bowl resembling a shell). A spoonful; abbreviated in prescriptions usually to *coch;* see *Abbreviation.* Also a scoop. **C. auricula're,** ear-pick. **C. mag'num,** tablespoonful. **C. me'dium,** dessert or papspoonful. **C. min'imum,** teaspoonful.

Cochlearia, kok-le-ah're-ah (*cochleare*, spoon, so called from the resemblance of its leaves). C. officinalis. **C. an'glica,** English scurvy-grass; properties like those of C. officinalis. **C. armora'cia,** *Horse-radish,* fam. Cruciferæ; root of horse-radish is frequently used at table, and has long been in the Materia Medica; stimulant and diuretic; externally it is rubefacient. **C. Britan'nica,** C. anglica. **C. coron'opus,** *Wild scurvy grass, Swine's cress;* European plant, considered to be diuretic and antiscorbutic. **C. horten'sis,** Cochlearia officinalis. **C. officina'lis,** *Lemon scurvy grass, Common scurvy grass,* has been considered a powerful antiscorbutic; sometimes eaten in salad. **C. oil,** volatile oil obtained from Cochlearia officinalis. **C. Pyrena'ica,** C. officinalis. **C. vulga'ris,** C. officinalis.

Cochleariform, kok-le-ar'i-form (*cochleare*, spoon, *forma*, shape). Spoon-shaped. **C. pro'cess,** small, very thin plate separating the bony portion of the Eustachian tube from the canal for the passage of the tensor tympani.

Cochlearin, kok-le-ar'in. Crystalline substance from Cochlearia officinalis.

Cochlearis, kok-le-ah'ris. Gelatinous-looking tissue, seen on opening the cochlea, by which the membranous zone is connected, at its outer or convex margin, with the outer wall. It was supposed to be muscular and to have a preservative office, being placed to defend the cochlear nerves from undue vibrations of sound, in a way analogous to that in which the iris protects the retina from excessive light.

Cochlearium, kok-le-ah're-um. Cochleare.

Cochlearthrosis, kok-le-ar-thro'sis. Hinged articulation with slight capacity for angular movement.

Cochleary, kok'le-a-re. Relating or appertaining to the cochlea.

Cochleated (kok'le-a-ted) or **Coch'leate** (*cochlea*). Winding like the spiral shell of the snail; having the shape of the cochlea.

Cochleatim, kok-le-at'im. By spoonfuls.

Cochleiformis, kok-la-e-form'is. Cochleariform.

Cochleous, kok'le-us. Cochleæ and cochleate.

Cochlia, kok'le-ah. Cochlea.

Cochlias, kok'le-as. Cochlea.

Cochlitis, kok-le'tis. Inflammation of the cochlea.

Cochlolithotrypeta, kok-lo-lith-o-trip-e'tah (*kochlias*, a spiral, *lithos*, stone, *trupetes*, perforator). Drill for crushing calculi.

Cochlos, kok'los. Cochlea.

Cochlospermum gossypium, kok-lo-spur'mum gossip'e-um. Tree native of India; kuteerah gum is obtained from it. **C. insig'ne** resembles Cochlospermum gossypium; grows in Brazil, where the fruit is eaten by the Indians. **C. tincto'rum** grows in Senegambia, where it is used for dyeing; employed externally in amenorrhœa.

Cochone, kok-o'ne. Junction of the ischium, near the seat or breech; the breech proper, from the hipbones to the anus; the perineum; the coccyx.

Cocilio. Weight of eleven ounces.

Cocilla'na bark. Bark of Syocarpus Rusbyi; possesses action similar to that of ipecac; irritant narcotic in large doses.

Cocinic acid, ko-sin'ik as'id. Fatty acid derived from cocoanut oil.

Cocinin, ko'sin-in. Fatty substance which is the principal constituent of cocoanut oil.

Cock (onomatopœia). Phasianus gallus.

Cockeye, kok'i. See *Luscitas.*

Cockgrass, kok'gras. Lolium temulentum.

Cockle (kok'l), **corn.** Lychnis githago.

Cocklebur, kok'l-bur. Agrimony; xanthium.

Cockles (kok'l's) **of the heart** (*cockle,* stove). Cavities of the heart—"to warm the cockles of the heart," "to fire the heart." **C., In'dian,** see *Menispermum cocculus.*

Cockmint, kok'mint. Tanacetum balsamita.

Cockroach, kok'roach. Blatta orientalis; reputed to possess diuretic properties.

Cockspur, kok'spur. Ergot. **C. rye,** ergot.

Cockup (kok'up) **hat.** Stillingia.

Cockybaby, kok'e-ba-be. Arum maculatum.

Cocles, kok'les (blind of one eye). Borgne.

Coco, ko'ko. Cocos nucifera. **C. of the Maldives',** fruit of a palm called Lodoicea; formerly termed, in the shops, Nux medica.

Cocoa, ko'ko. Cocos nucifera, cacao. **C. but'ter,** see *Butter of cocoa.* **C. cacavif'era,** cacao. **C. nibs,** crushed seeds of Theobroma cacao. **C. palm,** Cocos nucifera. **C. root,** root of Colocasia antiquorum, used as food in the tropics.

Cocoanut. Fruit of Cocos nucifera.

Cocobay. Mal de San Lazaro.

Cocoölein, ko-ko-o'le-in. See *Cocos nucifera.*

Cocos, ko'kos. See *Arum esculentum.* **C. butyra'cea,** name of the plant which affords the *palm oil, oleum palmæ*, obtained chiefly from the fruit; is of the consistence of an ointment, with little taste and a strong, though not disagreeable, smell. It is applied to sprains, etc., but has no advantage over other oils. It has been used as the excipient for suppositories. It is procured likewise from the *Elais Guineensis* and *Elais occidentalis,* two species of palms. **C. nucif'era,** *Palma cocos,* ord. Palmæ. Systematic name of the plant whose fruit is the *cocoanut.* It has an agreeable kernel, but not easy of digestion. Emulsions, orgeat, etc. are made from it; the juice of the cocoa, *toddy,* when fermented, forms wine, and arrack is distilled from it. The expressed oil, *cocoanut oil—cocoölein*—has been found efficacious in tuberculosis. The milk of the fresh cocoanut is used in India as a blood-purifier, also in phthisis and debility, and in large doses as a purgative.

Cocostearic acid, ko-ko-ste-ar'ik as'id. Cocinic acid.

Cocostearin, ko-ko-ste'ar-in. Cocinin.

Cocostearyl, ko-ko-ste'ar-il. Cocinin.

Cocowort, ko'ko-wurt. Thlaspi bursa.

Coctio, kok'she-o. Coction, digestion. **C. cibo'rum,** digestion. **C. mor'bi,** coction.

Coction, kok'shun (*coquo*, to boil). *Concoction.* Word employed in various senses; with the ancients it meant the alteration which food experiences in the digestive organs, particularly in the stomach; a preparation from its crude state; it expressed the maturation or change which the humoral pathologists believed morbific matter experienced before elimination. It was considered that coction was produced during the violence of the disease, and hence this was called the period of coction. See *Humorism.*

Coctus, kok'tus. Boiled, cooked.

Cocyta, ko'se-tah (*kokkuzo*, to cry out, lamentation). Pain caused by introduction of poison under the skin.

Cod (kod) or **Cods** (Sax. codde, a bag). Scrotum.

Cod. The codfish, Gadus morrhua. **C. oil,** cod-liver oil.

Coda'gam. Hydrocotyle Asiatica.

Codaga'pala bark. Nerium antidysentericum.

Codamine (ko'dam-een) or **Coda'mia** ($C_{20}H_{25}NO_4$). See *Porphyroxine.*

Cod'dington lens. A spherical lens with an opaque equator.

Code. Codex. **C. of eth'ics,** laws regulating the rules of intercourse among medical men, their duties to the public, to the profession, and to their own patients.

Codeate, ko'de-ate. Salt of codeic acid.

Codeia, ko-di'ah. Codeine.

Codeic, ko-de'ik. Relating to codeine. **C. ac'id,** acid derived from codeine.

Codeine, ko'de-een (*kodia,* poppy head). *Codeia, Codeinum, Codeina* (Ph. U. S. and Br.). Alkaloid discovered by Robiquet in opium, in 1832; soluble in water, alcohol, and ether, and unites readily with acids. As a hypnotic, one grain of codeia is equal to half a grain of morphia. It has been prescribed also in diabetes mellitus. The muriate of codeia appears to be stronger than the pure codeia. *Apocodeia* has been obtained from codeia; has therapeutic qualities very similar to those of codeine; see *Apocodeia.* **C. phos'phate,** white bitter substance, soluble in water; used in mental diseases.

Codeinum, kod-e-e'num. Codeine.

Codesella, kod-a-sel'lah. Anthrax.

Codethylene, ko-deth'il-een. Compound of morphine and ethyl.

Codex, ko'deks (a book). Collection of laws; by extension, a collection of approved medical formulæ, with the processes necessary for forming the compounds referred to in it. The Parisian Pharmacopœia has been styled *Codex medicamentarius.* **C. medicamenta'rius,** pharmacopœia; see *Codex.*

Codia, ko-de'ah (*kodia* or *kodeia*). Papaver (capsule).

Codiacus, ko-de'ak-us. Codeic.

Codiæum, ko-de-e'um. Chrysosticton; shrub, native of parts of Asia and the Molucca Islands; employed in indigestion and as a sudorific.

Codling, kod'ling (dim. of **Cod**). Testicle.

Cod-liver (kod'-liv-ur) **oil.** Oleum jecoris aselli; oleum morrhuæ (Ph. U. S.). **C.-l. o'lein,** see *Oleum morrhuæ.*

Codocele, ko-do-se'le (Eng. ko'do-seel) (*kodia,* poppy head, *kele,* tumor). Bubo.

Codorarth. Atropa belladonna.

Codoscella, kod-os-sel'lah. Bubo.

Cod'weed. Centaurea nigra.

Cœcal, se'kal. Cæcal.

Cœcitas, se'se-tas. Blindness.

Cœcum, se'kum. Cæcum.

Cœlechus, se-lek'us (*koilos,* hollow, *echos,* sound). Cavernous sound.

Cœlelmintha, seel-el-min'thah (*koile,* hollow place, *helmins,* worm). Class of hollow worms, such as the ascarides, trichinæ, etc., found in the human intestines, muscles, etc.

Cœlema, sel-em'ah. Cœloma.

Cœlia, se'le-ah (*koile,* hollow place). A cavity in the body, the abdomen in particular; also the alimentary canal, etc.; alvine evacuation; excrement.

Cœliac, se'le-ak (*cœlia*). Relating to the cavity of the abdomen. **C. ar'tery,** *Cœliac axis,* is situate above the pancreas and behind the upper part of the stomach; arises from the anterior part of the abdominal aorta, where it passes between the pillars of the diaphragm, and soon divides into the *coronaria ventriculi, hepatic* and *splenic* arteries, the division being called *Tripus cœliacus* or *T. Halleri.* **C. ax'is,** C. artery. **C. flux,** *Cœliac passion;* species of diarrhœa in which the food is discharged by the bowels in an undigested condition. By some defined to be diarrhœa attended with discharges of chyle or chyme. It is, in general, symptomatic of tubercular disease of the mesenteric glands. See *Lientery.* **C. gan'glion,** semilunar ganglion. **C. glands,** lymphatic glands around the cœliac axis. **C. pas'sion,** cœliac flux. **C. plex'us,** *Solar plexus,* is formed of numerous nervous filaments which proceed from the semilunar ganglia of the great sympathetic. It is strengthened by several branches of the right and left pneumogastric nerves; is seated around the trunk of the cœliac artery, behind the stomach, and furnishes the secondary plexuses—the diaphragmatic, coronary of the stomach, splenic, and hepatic, which accompany the arteries of the same name.

Cœliaca, se-le'ak-ah (*cœlia*). Diseases of the digestive organs; also medicines that act on the digestive organs. **C. chylo'sa,** cœliac flux. **C. lac'tea,** cœliac flux. **C. myco'sa,** cœliac flux. **C. purulen'ta,** discharge of pus through the anus. **C. rena'lis,** chyluria. **C. urina'lis,** chyluria.

Cœliaco-mesenteric, sel-e'ak-o-mes-en-ter'ik. Pertaining to cœliac and mesenteric regions.

Cœliadelphus, se-le-ad-el'fus (*cœlio, adelphos,* brother). *Anocœliadelphus.* Double monster, in which the two bodies are united at the abdomen.

Cœliæmia, se-le-e'me-ah (*cœlio, haima,* blood). Hyperæmia or congestion of the blood-vessels of the abdomen.

Cœliagra, se-le'ah-grah (*cœlio, agra,* seizure). Gout of the abdomen.

Cœlialgia, se-le-al'je-ah (*cœlio, algos,* pain). Tormina.

Cœlialgio-prosopon, se-le-al'je-o-pros-o'pon (*cœlio,* belly, *algos,* pain, *prosopon,* face). Condition in which the face wears an expression symptomatic of abdominal disease.

Cœlianeurysma, se-le-an-u-riz'mah. Aneurism of the abdomen.

Cœlicus, se'lik-us. Cœliac.

Cœliitis, se-le-e'tis. Abdominal inflammation.

Cœlio, se'le-o (*koilia,* abdomen). In composition, abdomen.

Cœliocele, se-le-o-se'le (Eng. se'le-o-seel) (*cœlio, kele,* rupture). See *Hernia, hypogastric.*

Cœliochalasis, se-le-o-kal'as-is (*koilia,* belly, *chalasis,* relaxation). Relaxed condition of the abdomen.

Cœliochysis, se-le-ok'is-is (*cœlio, cheo,* to pour). Ascites.

Cœliocyesis, se-le-o-se-a'sis (*cœlio, kuo,* to conceive). Pregnancy, abdominal.

Cœliocystectomy (se-le-o-sis-tek'to-me), **puer'peral** (*cœlio, kustis,* cyst, *ektome,* excision). Excision of an ectopic gestation cyst.

Cœliocystotomy (se-le-o-sis-tot'om-e), **puer'peral** (*cœlio, kustis,* cyst, *tome,* incision). Incision into an ectopic gestation cyst for evacuation of its contents.

Cœliodel'phus. See *Cœliadelphus.*

Cœliodynia, se-le-o-din'e-ah (*cœlio, odune,* pain). Colic.

Cœlio-elytrotomy, se'le-o-el-it-rot'o-me (*cœlio, elutron,* vagina, *tome,* incision). A more correct and scientific term for gastro-elytrotomy and laparo-elytrotomy.

Cœliohæmia, se-le-o-he'me-ah. See *Celiæmia.*

Cœliohysterec'tomy (*cœlio, hustera,* uterus, *ektome,* excision). Excision of the uterus by incision through the abdomen.

Cœliohysterot'omy (*cœlio, hustera,* uterus, *tome,* incision). The more correct and scientific term for Cæsarean section.

Cœliolymph, se'le-o-limf. Cerebro-spinal fluid.

Cœliolysia, se-le-o-lis'e-ah (*cœlio, lusis,* solution). Diarrhœa.

Cœliolyticus, se-le-o-lit'ik-us. Pertaining to or producing diarrhœa.

Cœliomyalgia, se-le-o-me-al'je-ah (*cœlio, mus,* muscle, *algos,* pain). Pain in the muscles of the abdomen.

Cœliomyitis, se-le-o-me-e'tis (*cœlio, mus,* muscle). Inflammation of the abdominal muscles.

Cœliomyodynia, se-le-o-me-o-din'e-ah (*koilia,* belly, *mus,* muscle, *odune,* pain). Cœliomyalgia.

Cœlioncus, se-le-on'kus (*cœlio, onkos,* tumor). Tumor of the abdomen.

Cœlio-nephrectomy, se'le-o-nef-rek'to-me (*cœlio, nephros,* kidney, *ektome,* excision). Operation for excision of the kidney through the abdomen.

Cœlioparacentesis, se-le-o-par-ah-sen-ta'sis (*koilia,*

abdomen, *parakentesis*, tapping). Paracentesis of the abdomen.

Cœliophthœ, se-le-of'tho-e (*koilia*, *phthoe*, wasting). Phthisis abdominalis.

Cœliophyma, se-le-o-fe'mah (*cœlio*, *phuma*, tumor). Tumor of the abdomen.

Cœliophymata, se-le-o-fe'mat-ah (pl. of **Cœliophyma**). Tubercles of the peritoneum.

Cœlioplegia, se-le-o-plej'e-ah (*koilia*, belly, *plege*, stroke). Paralytic stroke affecting the abdomen; Asiatic cholera.

Cœliopsophia, se-le-o-sof'e-ah (*cœlio*, *psophos*, noise). Borborygmus.

Cœliopyosis, se-le-o-pe-o'sis (*cœlio*, *puosis*, suppuration). Suppuration of the abdomen or its parietes.

Cœliopyoticus, se-le-o-pe-ot'ik-us. Relating to or suffering from cœliopyosis.

Cœliorrheuma, se-le-or-rhu'mah (*cœlio*, *rheuma*, defluxion, rheumatism). Rheumatism of the muscles of the abdomen.

Cœliorrhœa, se-le-or-rhe'ah (*cœlio*, *rheo*, to flow). Diarrhœa.

Cœliorrhoicus, se-le-or-rho'ik-us. Pertaining to or suffering from cœliorrhœa.

Cœlioschisis, se-le-os'kis-is (*koilia*, belly, *schisis*, a splitting). Abdominal congenital fissure.

Cœlioschisticus, se-le-o-skis'tik-us. Pertaining to or suffering from cœlioschisis.

Cœliospasmus, se-le-o-spaz'mus (*cœlio*, *spasmos*, spasm). Spasm or cramp of the abdomen.

Cœliospasticus, se-le-o-spaz'tik-us. Pertaining to or suffering from cœliospasmus.

Cœlisphongioma, se-le-o-sfon-je-o'mah (*koilia*, belly, *sphongos*, sponge). Fungoid tumor of the abdominal cavity.

Cœliostegnosis, se-le-o-steg-no'sis (*koilia*, belly, *stegnosis*, a stopping). Constipation.

Cœliotic, se-le-ot'ik. Purgative.

Cœliotomy, se-le-ot'o-me (*koilia*, *tome*, incision). Correct term for abdominal section or laparotomy, the latter word denoting, literally, an incision into the flanks only.

Cœlitis, se-le'tis. Cœliitis.

Cœlo (*koilos*, hollow). In composition, hollow.

Cœlocline polycarpa, se-lo-kle'ne pol-e-kar'pah. *Berberin tree, Yellow dye tree of Soudan.* Small tree growing in Soudan, Sierra Leone, and other parts of Western Africa, the bark of which is employed topically in the treatment of obstinate ulcers, both in powder and decoction.

Cœlodont, se'lo-dont (*koilos*, hollow, *odous*, tooth). Having hollow teeth.

Cœ'lom (*koilos*, hollow). Cavity of the body.

Cœloma, se-lo'mah (*koilos*, hollow). Round ulcer of the cornea, broader and deeper than that described under the name *Bothrion*. Also, the cavity of the body.

Cœlomele, se'lo-me-le (*koilos*, hollow, *mele*, probe). Grooved probe.

Cœlon, se'lon (*koilos*, hollow). Cavity.

Cœlophlebitis, se-lo-phleb-e'tis (*cœlo*, *phleps*, vein). Inflammation of the vena cava.

Cœlophthalmia, seel-of-thal'me-ah (*koilos*, hollow, *ophthalmos*, eye). Condition of being hollow-eyed.

Cœlophthalmus, seel-of-thal'mus (*cœlo*, *ophthalmos*, eye). One who is hollow-eyed.

Cœlorrhizous, seel-or-ri'zus (*koilos*, hollow, *rhiza*, root). Hollow-rooted, applied to teeth.

Cœloscope, se'lo-skope (*koilia*, abdomen, *skopeo*, to view). Instrument for examining the cavity of the body by means of electric light.

Cœlosis, se-lo'sis. Formation of a cavity. **C., endocyt'ic**, formation of a cavity within a cell. **C., paracyt'ic**, formation of a cavity among cells.

Cœlostomia, seel-os-tom'e-ah (*cœlo*, *stoma*, mouth). A defect in speaking, when the voice seems as if it came from a cavern—that is, obscure and as if at a distance.

Cœlostomus, seel-os'tom-us (same etymon). One having a hollow voice.

Cœlotes, se-lo'tes (*koilos*, hollow). Cavity.

Cœlum, seel'um. Cavity.

Cœnadelphus, seen-ad-elf'us (*koinos*, common, *adelphos*, brother). Double monster, the two portions having, in common, one or more organs indispensable to life.

Cœnædœitis, seen-e-de-e'tis (*koinos*, common, *aidoia*, genitals). General inflammation of the genitals.

Cœnæsthesis, seen-es-the'sis (*koinos*, common, *aisthesis*, feeling), *Conesthesis*. Common feeling. Some German writers mean, by this, a sixth sense, the feeling of self-existence or individuality, manifested by the sense of buoyancy or depression which we experience without any known cause—by involuntary shuddering, feeling of chill or glow, etc.

Cœnæstheticus, seen-es-thet'ik-us. Pertaining to cœnæsthesis.

Cœnecphlogiosis, seen-ek-flo-je-o'sis (*koinos*, general, *ekphlogosis*, conflagration). Varioloid.

Cœnecthyma, seen-ek'thim-ah. General ecthyma.

Cœnerysipelas, seen-er-e-sip'el-as (*koinos*, general, *erysipelas*). General erysipelas.

Cœnerythrosis, seen-er-e-thro'sis (*koinos*, general, *eruthros*, red). General erythrosis.

Cœnichthyosis, seen-ik-the-o'sis (*koinos*, general, *ichthus*, fish). General ichthyosis.

Cœno, se'no (*koinos*, common). In composition, common.

Cœnocacostoma, seen-o-kak-os'tom-ah. Stomachic.

Cœnocauthma, seen-o-kath'mah. General urticaria.

Cœnochloasma, seen-o-klo-az'mah. General chloasma.

Cœnocnesmus, seen-ok-nez'mus. General itching.

Cœnodontitis, se-no-dont-e'tis (*koinos*, common, *odous*, tooth). General odontitis.

Cœnologia, seen-o-loj'e-ah (*koinos*, common, *logos*, discourse). Consultation.

Cœnonephritis, seen-o-nef-re'tis. Common nephritis.

Cœnoparonychia, seen-o-par-on-ik'e-ah. Common paronychia.

Cœnotes, se'no-tes (*koinos*, common). What diseases have in common. The physicians of the methodic sect asserted that all diseases arise from relaxation, stricture, or a mixture of both.

Cœnotic, se-not'ik (*koinotes*, a sharing in common). Having the same connections; applied to fungi.

Cœnurus, se-nu'rus (*koinos*, common, *oura*, tail). A hydatid, which is the larval condition of tænia cœnurus of the dog, and is the cause of the disease in the sheep, called *Sturdy, Staggers, Gid, and Turnsick.*

Coëtus, ko-e'tus. Coition.

Coffea Arabica, kof'fe-ah ar-ab'ik-ah. *Caffea.* Ord. Rubiaceæ. Plant which affords coffee; originally from Yemen. The infusion of coffee is an agreeable and wholesome article of diet; to a certain extent tonic, and employed as such in convalescence from fevers, etc. In cases of poisoning by opium, and in old asthmas, its use has been extolled. For this purpose the *Mocha* is the best. It ought to be newly-torrefied, but not too much burnt; should be strong, and drunk soon after grinding. Coffee is a cerebro-spinal stimulant, and possesses marked diuretic acton. A highly nitrogenized alkaloid was first found in coffee, and called *Cafein, Caffeine*, or *Caffeia*. It was afterward discovered in the leaves of the tea-plant, and called *Thein*, and in the Guarana of Brazil, and called *Guaranin*. Recent investigations have thrown some doubt upon the identity of caffeine and theine. See *Caffein*.

Various substitutes have been proposed for coffee, as wheat, barley, hollyberries, acorns, sunflower seeds, beech-mast, peas, beans, succory-root, seeds of gooseberries and currants left in making wine and washed, sliced turnips, etc. These have been roasted, with the addition of a little butter or oil; but they have not the aroma of coffee. The best substitute is said to be the seeds of the *Yellow water flag, Gladiolus luteus*, or *Iris pseudacorus*.

Coffee, kof'e. See *Coffea Arabica*. **C., wild**, triosteum.

Coffee-bean tree, Kentucky, Gymnocladus Canadensis.

Cof'fee-ground vom'it. Vomiting occurring in cases of cancer, of dark brown material, and considered of diagnostic value.

Coffee-tree, kof'fe-tre. Gymnocladus Canadensis.

Coffe'ic ac'id. Caffeic acid.

Coffei'na. Caffeine.

Coffeinum, kof-fe-e'num. Caffeine.

Coffeol, kof'e-ol. Caffeol; oil of coffee developed in the process of roasting.

Coffe'one. Caffeone.

Coffeotan'nic ac'id. Caffeotannic acid.

Cof'fin-bone. The os pedis of the horse.

Coffinism, kof'in-izm. Treatment of disease advocated by one Dr. Coffin, resembling Thomsonianism in its principles.

Cognac, kone'yak. Brandy made of grapes growing in France.

Cognitio physiologica, kog-nish'e-o fiz-e-o-loj'ik-ah (*cognosco,* to know). Physiological knowledge; physiology.

Cog'wheel respira'tion. See *Respiration.*

Cohabitation, ko-hab-it-a'shun (*co, habito,* to dwell). The act of dwelling together with or without marriage. In legal medicine it means the consummation of marriage—*Copulation.*

Co'hen's meth'od. Method of inducing premature labor by injecting water between the walls of the uterus and membranes enveloping the fœtus.

Coherent, ko-he'rent (*cohærens,* cohering.) Holding fast together; logical in construction as representing thought, when the term relates to speech.

Cohesion, ko-he'zhun (*co, hæreo,* to stick). *Force of cohesion, Attraction of cohesion* or *of aggregation.* That force in the particles of matter whereby they are connected in such a way as to resist any attempt toward their removal or separation; a force which has to be attended to in the management of disease. Emollients rubbed into a part act by diminishing the cohesion.

Cohibens, ko'hib-ens (holding together, *co, habeo,* to have). An agent that diminishes or restrains.

Cohibiting, ko-hib'it-ing. Preventing.

Cohn'stein's opera'tion. Cæsarean section in which the incision is made in the posterior wall of the uterus.

Cohobation, ko-ho-ba'shun (*cohob,* Paracelsian term for repetition). Distillation of a liquid, already distilled, from the same substances. When this is repeated three or four times, it is called *Recohobation.* The term is also applied to diseases which recur, although treated properly medicinally.

Cohol' (syn. of **Alcohol**). A dry collyrium.

Coholytic, ko-ho-lit'ik. Soluble in alcohol.

Cohosh, ko-hosh'. Actæa racemosa, Caulophyllum thalictroïdes. **C., black,** Actæa racemosa. **C., blue,** Caulophyllum thalictroïdes. **C., blue'berry,** Caulophyllum thalictroïdes. **C., red,** Actæa rubra. **C., white,** Actæa alba.

Cohush, ko-hush'. Caulophyllum thalictroïdes.

Coil-glands. Sudoriparous or sweat-glands.

Coilima, koil-e'mah. Swelling of the abdomen due to flatulence.

Coin-catch'er. A probang constructed so as to remove a coin lodged in the œsophagus.

Coincidentia, ko-in-se-den'she-ah (*co, incido,* to fall or happen). Things agreeing, concurring, or happening together. Occlusion of the foramen opticum by a humor.

Coindicant (ko-in'dik-ant) **signs** (*co, indico,* to indicate). Those which furnish the same indications, or which confirm the indication afforded by another sign.

Coindication, ko-in-dik-a'shun. Correspondence of signs with reference to an effect.

Coin-sound. Metallic sound elicited in pneumothorax by listening on the back of the chest while one coin is struck on another anteriorly on the chest.

Coir'a. Catechu.

Coir'as (*choiros,* hog). Scrofula.

Coital, ko'it-al. Relating to coitus.

Coition, ko-ish'un (*co, eo,* to go together). *Coitus, Coiture.* Copulation, venery, sexual intercourse. Carnal union of the sexes.

Coiture, ko'it-ure. Coitus.

Coitus, ko'it-us. Coition. **C. diffic'ilis,** difficulty in sexual intercourse, technically dyssynodus and dyspareunia. **C. nervo'rum optico'rum,** chiasm or crossing of the optic nerves. **C. Sodomit'icus,** buggery.

Co'ko disease. Disease occurring in the Sandwich Islands, and having a resemblance to yaws.

Col. See *Abbreviations.* As a prefix, the same as *co, cum,* with.

Colah, ko'lah. See *Gum.* **C. acumina'ta,** Sterculia acuminata. **C. nut,** seeds of the Sterculia acuminata.

Colalgia, kol-al'je-ah (*colon, algos,* pain). Pain in the colon.

Colation, ko-la'shun. Straining a liquid.

Colatorium, kol-at-o're-um (*colo,* to strain). Strainer of any kind. Canal or conduit through which the excrementitious humors of the body are evacuated. Ulcers, fistulæ, setons, caustics, etc. have been called *artificial* or *accidental colatoria,* because they were considered to be passages by which the animal economy is freed from some morbific matter.

Colatum, kol-at'um. Anything strained or filtered.

Colatura, kol-at-u'rah (*colo,* to strain). Filtered or strained liquor; it likewise means straining a liquid.

Colaxe, kol-awks'e. Dilated condition of colon.

Colchiceine, kol-chis'e-en. See *Colchicum autumnale.*

Col'chici cor'mus. See *Colchicum autumnale.* **C. ra'dix,** see *Colchicum autumnale.* **C. se'men** or **sem'ina,** see *Colchicum autumnale.*

Colchicia, kol-kish'e-ah. See *Colchicum autumnale.*

Colchicine, kol'chis-en. The active principle of colchicum.

Colchicinum, kol-chis-e'num. Colchicine.

Colchico-resin, kol'che-ko-rez'in. Substance of a brown color from Colchicum autumnale.

Colchicum, kol'ke-kum (*kolchikon,* Colchis, in Asia, where it is said to have been common). Colchicum autumnale. **C. autumna'le,** *Meadow saffron;* nat. ord. Colchicaceæ. Bulb or root or cormus, *Colchici radix* (Ph. U. S.), *Colchici cormus, Colchicum corm,* and the seeds, *Colchici semen* (Ph. U. S.), *C. semina* (Ph. B.), are the parts used in medicine. The taste is acrid, excoriating the mouth, but the acrimony is lost by drying. Narcotic, diuretic, and cathartic, and has been given in dropsy, gout, and rheumatism; dose, gr. j–vj of the fresh bulb. Active principle is called *Colchicia* or *Colchicine;* very poisonous; employed in gout and rheumatism hypodermically, in doses of gr. $\frac{1}{60}$–$\frac{1}{30}$. *Colchiceine* or *Colchicein* has also been obtained from it; it is very poisonous, acting on the great nervous centres; used subcutaneously in gout and rheumatism, in doses of gr. $\frac{1}{60}$. Colchicum, in an over-dose, is an acro-narcotic poison. **C. Zeylan'icum,** Kæmpferia rotunda.

Colchiticus, kol-chit'ik-us. Relating to or prepared from colchicum.

Colcothar, kol'ko-thar. *Brown red, Ferric oxide, Rouge.* Red oxide of iron, obtained by calcining sulphate of iron to redness, with or without the contact of air; possesses the general properties of the preparations of iron, and has been applied to stanch blood.

Cold (Sax. colð). Sensation produced by the abstraction of caloric from our organs. See *Heat.* Three degrees of cold are generally distinguished in disease: 1. The simple feeling of cold (*Algor*); 2. *Chilliness* (*Horror*); and, 3. *Shivering* (*Rigor*). Cold is employed in medicine chiefly as a refrigerant and sedative. Cold is also vaguely and indefinitely used for a morbid affection supposed to be induced by cold. "To take cold" is to be affected by a disease presumed to be caused by cold. Nosologically, it has no definite meaning. See *Catarrh* and *Coryza.* **C. ab'scess,** see *Abscess.* **C. bath,** see *Bath.* **C. chill,** intermittent fever. **C. cream,** unguentum aquæ rosæ. **C. in the eye,** ophthalmia, catarrhal. **C. in the head,** coryza. **C. pack,** the moist packing of hydropathic treat-

ment. **C. plaque**, vulgar name for cerebro-spinal meningitis occurring in epidemic fever among horses. **C., rose**, hay fever. **C. slaw** or **Cole slaw**, probably a corruption from (G.) *Kohlsalat*, (D.) *Kool salade* (from (G.) Kohl, *Cole, Cabbage*), *Cabbage salad.* Salad formed of the hard head of white cabbage cut into small strips, and dressed like ordinary salad. **C. sore**, herpes labialis. **C. spots**, localities on the skin where sensation of cold is present.

Coldenia (kold-en'e-ah) **procum'bens.** Herb growing in India, where it is employed in powder form to hasten suppuration.

Cole slaw. Cold slaw.

Colebrilla, kol-e-bril'lah. Guinea-worm.

Colectomy, kol-ek'tom-e (*kolon, ektome*, excision). Excision of a part of the colon.

Colein, kol'e-in. See *Chitine.*

Coleitis, kol-e-e'tis (*koleos*, vagina or sheath). Inflammation of the vagina.

Coleocele, kol-e-o-se'le (Eng. kol'e-o-seel) (*koleos*, vagina or sheath, *kele*, rupture). Hernia, vaginal. See *Hernia.*

Coleocricos, kol-e-ok'rik-os (*koleos*, sheath, *krikos*, ring). Circular pessary.

Coleœdema, kol-e-e-de'mah (*koleos, oidema*, swelling). Elytrœdema.

Coleoptosis, kol-e-op-to'sis (*koleos, ptosis*, fall). Prolapsus vaginæ.

Coleorrhectic, kol-e-or-rhek'tic (*koleos*, sheath, *rhexis*, rupture). Relating to laceration or rupture of the vagina.

Coleorrhexis, kol-e-or-rheks'is (*koleos, rhexis*, rupture). Laceration or rupture of the vagina.

Col'eos. Sheath, scrotum, testicle, vagina.

Coleositis, kol-e-o-se'tis. Leucorrhœa.

Coleostegnosis (kol-e-o-steg-no'sis) or **Colpostegno'sis** (*koleos, stegnosis*, constriction). Narrowness of the vagina, natural or acquired.

Col'eps or **Colep'ium.** The hollow of the knee; also the colon.

Cole's pad. Device employed in treating aneurism by means of pressure, which is provided with a cotton and hair pad and connected to a shank with springs.

Coles, ko'les. Penis. **C. femina'rum** or **femini'nus**, clitoris.

Cole'seed. Rape seed.

Coleus, ko'le-us. Sheath, scrotum, testicle, vagina. **C. Amboin'icus**, herb growing in Cochin China and the Moluccas; anti-asthmatic, anti-epileptic, and carminative; leaves are edible. **C. Malabar'icus** grows in the East Indies and Indian Archipelago; the root is employed by the natives in dysentery and in ailments of the stomach. **C. scutellarioi'des**, same properties as Coleus Malabaricus.

Cole'wort. Brassica oleracea and Brassica napus.

Colic, kol'ik (*kolon*, the colon). Relating to the colon or to colic. In its etymological acceptation colic signifies an affection or pain in the colon, but it is employed in a more extensive signification. It includes every acute pain of the abdomen, aggravated at intervals. *Gripes, Mulligrubs, Belly-ache, Stomach-ache.* The word has often, however, epithets affixed to it which render it more or less precise. See *Tormina.* **C. of the Antilles**, colic in endemic form, similar to lead colic. **C. ar'teries** are six in number, three of which, given off by the *superior mesenteric*, are called *Colicæ dextræ*, and three, proceeding from the inferior mesenteric, *Colicæ sinistræ.* All proceed toward the colon, passing between the two laminæ of the peritoneum, which form the mesocolon, where they ramify and anastomose with each other. The first, *Colica dextra*, is called *C. dextra superior;* the second, *C. dextra media, Colica media;* and the third, *C. dextra inferior* or *ileocolica.* Of the three *Colicæ sinistræ*, the first or *superior* is called, by Chaussier, *Colica magna sinistra;* the second or *media* is not distinguished from the preceding, as they often arise from a common trunk; and the third is called *Colica parva sinistra.* To these arteries as many *colic veins* correspond, which open into the great and little mesenteric veins. **C., arthrit'ic**, gouty colic. **C., bil'ious** or **bil'iary**, colica biliosa. **C., cal'culous**, colic caused by calculi. **C., catar'rhal**, colica pituitosa. **C., ci'der**, see *Cider* and *Colica metallica.* **C., cop'per**, due to poisoning with copper, occurring among copper-workers. **C., crap'ulent**, colica crapulosa. **C., Dev'onshire**, colica metallica. **C., gall'stone**, colica hepatica. **C., hepat'ic**, colica hepatica. **C., horn**, priapism. **C., lead**, colica metallica. **C. lobe of the liver**, great lobe of that organ. **C., Madrid'**, colica Madridensis. **C., men'strual**, colica menstrualis. **C., metal'lic**, colica metallica. **C., nephrit'ic**, colica nephretica. **C., Nor'mandy**, colica metallica. **C., paint'er's**, colica metallica. **C., plumb'er's**, colica metallica. **C. of Poitou**, colica metallica. **C. of pros'titutes**, colica scortorum. **C., re'nal**, colica nephretica. **C. root**, Aletris farinosa, Dioscorea villosa. **C., sat'urnine**, colica metallica. **C. of the stom'ach**, pain in the stomach of a neuralgic character. **C. of Sur'inam**, colica metallica. **C., u'terine**, colica uterina. **C., veg'etable**, colica metallica. **C. weed**, Dicentra Canadensis. **C., worm**, colica verminosa.

Colica, kol'ik-ah. Colic. **C. accidenta'lis**, colica crapulosa. **C. acu'ta**, enteritis. **C. arthrit'ica**, cœliagra. **C. bilio'sa**, *Bilious colic*, occasioned by an accumulation of bile in the intestines or in its own passages. Treatment required resembles that proper for colica convulsiva. **C. callo'sa**, colic attended with sense of stricture in some parts of the intestinal canal, often with flatulency and pain; the flatus gradually passing off by the stricture; the bowels tardy, and at length discharging small liquid stools. **C. convulsi'va**, colic not the symptom of any other affection, characterized by griping pain in the bowels, chiefly about the navel, with vomiting and costiveness, the pain increasing at intervals. The indications are to clear the intestines and allay spasm. Carminatives, calomel and opium—castor oil and opium—emollient and cathartic enemata, with fomentations, wet or dry, to the abdomen, usually succeed. **C. crapulo'sa**, *Crapulent colic, Surfeit, Colic from overeating;* colic arising from eating indigestible aliments or digestible aliments in too great abundance. The remedy is obvious. **C. damnonio'rum** or **damnonien'sis**, colic, metallic. **C. febrico'sa**, colica inflammatoria. **C. figulo'rum**, colica metallica. **C. flatulen'ta**, colic arising from an accumulation of air in the intestines; very common in infants, and may be relieved by aromatics, especially when combined with antacids—for example, oil of aniseed with magnesia. **C. hæmorrhoida'lis**, *Hemorrhoidal colic;* a kind of colic supposed to precede hemorrhoids or to supervene on their suppression. **C. helluo'num**, colica crapulosa. **C. hepat'ica**, *Hepatic colic, Gallstone* or *Hepatic colic;* pain in the region of the liver, chiefly about the gall-bladder, occasioned by the passing of a biliary calculus through the cystic and choledoch ducts. **C. idiopath'ica**, colica convulsiva. **C. il'eus**, ileus. **C. inflammato'ria**, *Inflammatory colic;* the same as enteritis. **C. Lappon'ica**, see *Seta equina.* **C. lochia'lis**, diminution or suppression of the lochial discharge. **C. Madriden'sis**, *Colic of Madrid, Madrid colic;* species of colic, endemic in several provinces of Spain, whose nature is not clear; symptoms resemble those occasioned by lead; see *Colica metallica.* **C. menstrua'lis**, *Menstrual colic;* colic preceding or accompanying the menstrual evacuation, or which is owing to the suppression of that evacuation. **C. metal'lica**, *Metallic colic, Painter's colic, Colic of Poitou, Colic of Surinam, Bellon, Devonshire colic, Dry bellyache, Dry gripes, Saturnine colic, Lead colic, Plumber's colic;* under this head is generally described the colic produced by lead, as well as the other colics mentioned in the synonymy, and they certainly resemble each other greatly, although some of them are more like bilious colic. There is not much to distinguish this variety of colic from others. The same violent pain about the navel is present, with retraction of the abdomen toward the spine. It is apt also to occasion palsy. The only difference of treatment is in the necessity for employing more opium along with the purgative. The paralytic sequelæ must be met by change of air, rubbing the spine, exercise, etc.

The *Colics of Madrid, of Poitou, Devonshire, Normandy,* etc. have been called *vegetable colic,* because ascribed to the use of new wine or cider, unripe fruit, etc., although really, perhaps, owing to the adulteration of wines and cider by litharge. All the symptoms indeed are those of colica metallica. **C. nephret'ica** or **nephrit'ica,** *Nephretic* or *Nephritic* or *Renal colic;* acute pains accompanying nephritis, and especially calculous nephritis, or the passage of a calculus into the ureter; see *Gravel.* **C. nervo'sa,** colica convulsiva; colica metallica. **C. pas'sio,** colica. **C. phlogis'tica,** colica inflammatoria. **C. pic'tonum,** colica metallica. **C. picto'rum,** colica metallica, **C. pituito'sa,** colica convulsiva. **C. plethor'ica,** colica inflammatoria. **C. plumbario'rum,** colica metallica. **C. pulsa'tilis,** colic, inflammatory. **C. rachial'gia,** colica metallica. **C. rena'lis,** colica nephretica. **C. rheumat'ica,** painful affection of the muscular coat of the intestines, occurring after exposure of the skin, especially of the feet and abdomen, to cold. **C. saturni'na,** colica metallica. **C. scorto'rum,** colic of prostitutes; form of colic said to have been observed among that class, but this is problematical. **C. sic'ca,** C. metallica. **C. spasmod'ica,** colica convulsiva, ileus. **C. sterco'rea** or **stercora'cea,** *Stercoraceous colic;* species of colic ascribed to the retention of fecal matters in the intestines. The retention is itself, however, an effect that may be caused in the same manner as the colic pains themselves. **C. stipa'ta,** colica stercorea. **C. uteri'na,** uterine colic; pain seated in the uterus, sometimes called *Hysteralgia.* **C. ventric'uli,** cardialgia. **C. vermino'sa,** worm colic; abdominal pain occasioned by the presence of worms in the intestines. **C. zin'ci,** see *Zinci oxidum.*

Colical, kol'ik-al. Colic.

Colicky, kol'ik-e. Having a resemblance to the pain of colic.

Colicodynia, kol-ik-o-din'e-ah (*odune,* pain). Colica.

Colicolienalis, kol-ik-o-le-en-al'is. Relating to colon and spleen.

Colicoplegia, kol-ik-o-ple'je-ah (*colic, plege,* a stroke). Colica metallica.

Col'ic-weed. Caudates glauca.

Coliform, kol'e-form. Resembling a sieve.

Colis, ko'lis. Penis. **C. femina'rum** or **femini'nus,** see *Clitoris.*

Colitis, ko-le'tis (*colon, itis*). *Colonitis.* Inflammation of the peritoneal or mucous membrane of the colon. The former is termed *Serocolitis* and *Exocolitis;* the latter, *Endocolitis* and *Dysentery.* **C., follic'ular,** see *Follicular colitis.*

Colix, ko'liks. Troche or tablet.

Colla, kol'lah. Glue. **C. anima'lis,** animal glue. **C. pis'cium** (glue of fish), ichthyocolla.

Collagen, kol'lah-jen (*kolla,* glue, *gennao,* to produce). The substance which, especially in bone and cartilage, contains the principle which is developed into glue by boiling.

Collagenous, kol-laj'en-us. Resembling or yielding gelatin.

Collapse, kol-laps'. Complete prostration of strength, either at the commencement or in the progress of a disease. **C. of the lung,** see *Atelectasis.* **C., ner'vous,** neurasthenia. **C., pul'monary,** see *Atelectasis.*

Collapsed, kol-lapsd'. In a condition of collapse.

Collapsion, kol-lap'shun. Collapse.

Collapsus, kol-lap'sus (*collabor,* to fall down). Collapse. **C. pulmo'nis,** see *Atelectasis.*

Col'lar-bone. Clavicle.

Collard, kol'lard. Dracontium fœtidum. **C., cow,** Dracontium fœtidum. **C., pole'cat,** Dracontium fœtidum.

Collarium salinum, kol-lah're-um sal-e'num (*collum,* neck). Collar of salt applied to the neck, as in case of croup.

Collarius, kol-lah're-us (*collum,* neck). Relating to the neck.

Collarpor. Achyranthes lanata.

Collateral, kol-lat'er-al (*col, latus,* side). That which accompanies or proceeds by the side of another. **C. ar'teries of the arm** are given off by the brachial, and are distinguished into—1. The *collateral—superior* or *external*—which arise from the inner part of the brachial, and extend as far as the inferior and external part of the arm. 2. The *collateral—inferior* or *internal*—which arise from the brachial, near the elbow-joint, and descend toward the upper part of the forearm. The vessels which pass to the fingers and toes are also called *collateral.* Speaking generally, *collateral branches* are those which follow nearly the same course as the vessel whence they emanate. **C. circula'tion,** see *Circulation.*

Collateralis, kol-lat-er-al'is. Ischio-cavernosus.

Collatitious, kol-lat'ish-us. Assisting digestion.

Collecting tubule, kol-lek'ting tu'bule. The portion of a tubule receiving uriniferous secretion and discharging into the excretory duct.

Collection, kol-lek'shun (*colligo,* to gather). This word is often united to the epithet *purulent, serous,* etc. to express a gathering of pus, serum, etc. **C. lig'ament,** triangular ligament of abdomen.

Collesis, kol-la'sis (*kolla,* glue). Agglutination.

Col'les's fas'cia. Inferior perineal fascia. **C.'s fracture,** fracture of the lower end of the radius; see *Fracture.* **C.'s law,** fact observed by Colles, that mothers may nurse their own syphilitic children with immunity, while nurses frequently contract chancre of the nipple.

Colletic, kol-let'ik. Agglutinant.

Colli longus, kol'le lon'gus. Longus colli.

Colliciæ, kol-lish'e-e (same etymon as **Collection,** or from *col* and *liqueo,* to be liquid). Drains to collect and convey away water. **C. puncto'rum lacrymal'ium,** union of the ducts passing from the puncta lacrymalia.

Collicular (kol-lik'u-lar) **ar'teries.** Arteries entering the corpora quadrigemina from the posterior cerebral arteries.

Colliculi (kol-lik'u-le) (pl. of **Colliculus**) **anterio'res.** Corpora quadrigemina anteriora. **C. bul'bi,** see *Corpus spongiosum urethræ.* **C. ner'vi ethmoïda'lis,** corpora striata. **C. nervo'rum optico'rum,** thalami nervorum opticorum. **C. posterio'res,** corpora quadrigemina posteriora. **C. vagi'næ,** nymphæ.

Colliculus, kol-lik'u-lus (dim. of **Collis,** hill). See *Optic nerve.* **C. cauda'tus,** nucleus caudatus. **C. ca'veæ posterio'ris ventriculo'rum latera'lium,** hippocampus minor. **C. ner'vi ethmoïda'lis,** corpus striatum. **C. papilla'ris,** tuberculum papillare of the liver. **C. semina'lis,** gallinaginis caput. **C. subpinea'lis,** small eminence situated near posterior commissure of the brain.

Collidine, kol'lid-een. Poisonous alkaloid, $C_8H_{11}N$, derivable from putrid gelatin.

Collier's (kol'yur's) **lung.** The hepatic condition induced in the lungs of coal-miners from inhalation of dust; anthracosis pulmonum.

Colligamen, kol-lig-am'en (*col, ligo,* to bind). Ligament.

Colligamentum, kol-lig-am-ent'um. Ligament; also liquid in which the primary embryonic rudiments have their origin.

Colligatio, kol-lig-ah'she-o. Binding together by ligaments.

Collin, kol'lin. Gelatin in soluble form.

Collinic, kol-lin'ik (*kolla,* glue). Relating to, or obtained from, glue.

Collinsonia, kol-lin-so'ne-ah (after Peter Collinson). *Horse-weed, Horse-balm, Rich-weed, Rich-leaf, Heal-all, Stone-root, Knot-root, Knot-weed, Knob-weed,* order Labiatæ; indigenous plant possessed of diuretic properties, which seem to reside in a volatile oil; infusion is the best form of administration; leaves in domestic practice are applied to wounds and bruises. **C. Canaden'sis,** collinsonia. **C. decussa'ta,** C. Canadensis.

Collinso'niæ her'ba. Herb of Collinsonia Canadensis. **C. ra'dix,** root of Collinsonia Canadensis.

Collinson's (kol'lin-sun's) **flower.** Collinsonia Canadensis.

Colliquamentum, kol-lik-wah-men'tum (*colliqueo*, to melt). First rudiments of an embryo.

Colliquation, kol-lik-wa'shun. *Solution, Dissolution.* Act of melting. The ancients meant, by this term, the progressive diminution of the solid parts, with copious excretion of liquids by one or more passages. They thought that all the solids melted, and that the liquids, and particularly the blood, lost a portion of their density.

Colliquative, kol-lik'wa-tive. Epithet given to various discharges which produce rapid exhaustion; hence we say colliquative sweats, colliquative diarrhœa, etc. **C. fe'ver**, hectic fever.

Colliquescens, kol-lik-wes'sens (*col, liquesco*, to grow liquid). Colliquative.

Collisio, kol-liz'e-oh (*collido*, to dash together). Contusion.

Colli-spinalis, kol'le-spin-al'is. Spinatus colli.

Colli-splenius, kol'le-splen'e-us. Splenius colli.

Collisus, kol-lis'us. Crushed; bruised; term applied to wounds.

Collix, kol'liks. Troche or tablet.

Collocystis, kol-lo-sis'tis (*kolla*, glue, *kustis*, a bladder). Capsule, gelatinous.

Collodes, kol-lo'des (*kolla*, glue). Glutinous.

Collodesmus, kol-lo-dez'mus (*kolla*, cement, *desmos*, bandage). Immovable apparatus and starch bandage.

Collodion, kol-lo'de-on (*kolla*, glue). *Collodium* (Ph. U. S. and Br.), *Liquid cuticle, Ethereal solution of gun-cotton, Maynard's adhesive liquid.* Solution obtained by dissolving *Gun-cotton—Soluble gun-cotton, Gossypium fulminans, Pyroxylin, Pyroxylon*—in a mixture of *rectified ether* and *alcohol*. *Pyroxylon* is formed by mixing *nitric acid* and *sulphuric acid* gradually, and adding cotton (freed from impurities). The U. S. Pharmacopœia contains a formula for the preparation of collodion (pyroxyl., p. 4; æther. fortior., p. 70; alcohol., p. 26). In the Ph. Br., it is made by mixing pyroxylin, ℥j, ether, f℥xxxvj (Imp.), rectified spirit, f℥xij (Imp.). When applied to a part, the ether evaporates, and the solid adhesive material is left, which contracts. Hence it is used in cases of wounds to keep their edges together. It forms, also, a coating, and has been applied in abrasions and in cases of burns. In various chronic cutaneous diseases it has been applied with advantage; and has been employed to give a coating to pills, which it deprives of their taste, without interfering with their action. Various non-officinal preparations of collodion have been employed, formulæ for several of which are herewith given: **C., abort'ive**, consists of hydrargyrum bichloride, 3 parts to 500 parts of collodion; employed for the purpose of aborting small-pox vesicles. **C., canthar'idal**, *Collodion with cantharides, Collodium cum cantharide* (Ph. U. S. and Br.). The U. S. Ph. contains a formula for its preparation, including as the ingredients cantharides, flexible collodion, and commercial chloroform; in the Ph. Br., pyroxylin and liquor epispasticus. By painting the surface with a little of this solution vesication is produced, as with the plaster of cantharides. **C. with canthar'ides**, C., cantharidal. **C., caus'tic**, prepared by dissolving 4 parts of corrosive sublimate in 30 of collodion, has been used for destroying nævi materni. **C., com'pound sal'icylated**, C. salicylatum compositum. **C., cro'ton oil**, see *Collodium crotonatum.* **C., elas'tic**, C., flexible. **C., epispas'tic**, vesicating c., consisting of a mixture of oil of mustard, glacial acetic acid, and collodion. **C., ferra'ted**, collodium ferratum. **C., ferru'ginous**, mixture of equal parts of collodion and tincture of chloride of iron, under this name, has been employed in erysipelas. **C., flex'ible**, collodium flexile (Ph. U. S.), is a mixture of collodion, Canada turpentine, and castor oil; in the Ph. Br., collodium, Canada balsam, and turpentine. The other ingredients give to the collodion softness and elasticity. **C., glyc'erized**, mixture of glycerin and collodion, which accommodates itself to the motions of the part, and does not crack when applied. **C., i'odized**, mixture of iodine, gr. x–xx, in collodion, f℥j, proposed to obtain rapidly the effects of iodine, especially on tumors. **C., io'doform**, consists of 1 part iodoform dissolved in 20 parts of flexible collodion. **C., mercu'rial**, *Caustic collodion.* Prepared by dissolving corrosive sublimate in collodion, say in the proportion of one part of the former to six of the latter; has been used in cases of nævi, and, more diluted, in different cutaneous affections, syphilitic discolorations, for example; also, to prevent pitting in small-pox. **C., ric'inated**, see *Collodion, terebinthinated.* **C., silk**, silk fibre is dissolved in chloride of zinc, and the zinc is then removed. **C., styp'tic**, collodium stypticum (Ph. U. S.); styptic colloid; xylostyptic ether. Preparation made of tannic acid, alcohol, stronger ether, and collodion; applied externally to wounded or abraded surfaces; carbolic acid, iodine, morphine, etc. may be added to it. **C., terebinth'inated** or **ric'inated**, preparation of collodion, ℥j, ol. ricini or terebinth. venet., gr. x; used by the Germans and French as a covering in erysipelas, burns, bedsores, and chronic cutaneous diseases. **C., ves'icating**, C., epispastic.

Collodium, kol-lo'de-um (Ph. U. S.). Collodion. **C. antisep'ticum**, antiseptic collodion; prepared by saturating linen or silk in solution of mastic, 1 part of narcotine in powder form and Peruvian balsam, 5 parts of chloroform; it is then allowed to dry. **C. cantharida'le**, collodion, cantharidal. **C. cum canthar'ide**, collodion, cantharidal. **C. carbol'icum**, carbolic collodion; mixture of carbolic acid and collodion, equal parts; employed locally in toothache in cavity of tooth. **C. chrysarobina'tum**, chrysarobin collodion; mixture of chrysarobin 3 parts in collodion 20 parts; used locally in the treatment of psoriasis. **C. corrosi'vum**, collodion caustic. **C. creasot'icum**, creasote collodion; preparation made of creasote and collodion; employed in dental caries. **C. crotona'tum**, croton-oil collodion; preparation consisting of croton oil and collodion, equal parts of each. **C. epispas'ticum**, see *Collodion, epispastic.* **C. escharot'icum**, see *Collodium corrosivum.* **C. ferra'tum**, preparation made of ferric chloride and collodion in the proportion of 1 to 6; used as a hemostatic. **C. flex'ile**, collodion, flexible. **C. glycerina'tum**, collodion, glycerized. **C. hæmostat'icum**, collodion, styptic. **C. iodofor'mi**, collodion, iodoform. **C. lentes'cens**, collodion, glycerized. **C. mercuria'le ioda'tum**, iodized mercurial collodion; preparation made of mercurial iodide, potassium iodide, alcohol and ether, and soluble gun-cotton. **C. phenyla'tum**, C. carbolicum. **C. plum'bicum**, lead collodion; consists of lead plaster, alcohol and ether, and collodion duplex; applied to cutaneous irritations and scales. **C. ricina'tum**, see *Collodion, terebinthinated.* **C. salicyla'tum compos'itum**, compound salicylated collodion, salicylic collodion; preparation made of extractum cannabis Indicæ, alcohol, salicylic acid, and flexible collodion. **C. saturni'num**, C. plumbicum. **C. styp'ticum** (Ph. U. S), see *Collodion, styptic.* **C. tan'nicum**, C. stypticum. **C. terebinthina'tum**, collodion, terebinthinated. **C. ves'icans**, collodion, cantharidal.

Col'loid (*kolla*, glue, *eidos*, resemblance). Resembling glue. Also, substance, as gum, gelatin, or albumin, which in solution passes with difficulty, or not at all, through minutely porous septa. **C., an'odyne**, amyl colloid. **C. can'cer**, *Alveolar cancer, Gelatinous, Areolar*, or *Gum cancer.* Epithet applied to a product of morbid secretion resembling glue or particles of jelly inlaid in a regular alveolar bed. See *Cancer.* **C., carbol'ic**, solution of carbolic acid in styptic colloid. **C. cysts**, see *Cysts.* **C. degenera'tion**, *Colloid softening.* Metamorphosis consisting in transformation of the tissues into a brownish substance like thin glue or mucilage. Its chemical composition is not constant. It occurs in glandular carcinoma and other growths. **C., i'odized**, preparation made by dissolving iodine in styptic collodion. **C. styp'tic**, *Xylostyptic ether.* A compound fluid for instant and ready use in the dressing of wounded surfaces, which is at the same time styptic, antiseptic, and a complete means of

excluding wounded, abraded, or ulcerated parts from the air. It consists in saturating ether with tannin and gun-cotton, and may be applied with a brush or mixed with an equal quantity of ether in the form of spray. It may also be made by adding together collodion, carbolic acid, tannin, and benzoic acid. **C., zinc,** prepared by dissolving sulphate of zinc in styptic collodion.

Colloidal, kol-loid'al. Colloid.

Colloidin, kol-loid'in. Albuminoid substance found in colloid tumors.

Colloma, kol-lo'mah (*kolla,* glue). Gelatiniform matter, of common occurrence in cysts; is transparent, amorphous, and devoid of vessels and nerves.

Collonema, kol-lon-a'mah (*kolla,* glue). *Colloid sarcoma.* Peculiar gelatinous tumor, consisting of a remarkably soft gelatiniform tissue, which trembles on being touched.

Collophora utilis, kol-lof'or-ah u'til-is (*kolla,* glue, *phoreo,* to bear). Brazilian lorveira; caoutchouc is obtained from the sap.

Collostrum, kol-los'trum. Colostrum.

Colloturine, kol-lo-tu'reen. Alkaloid obtained from bark of Symplocos racemosa.

Collourion, kol-lu're-on. Collyrium.

Colloxylin, kol-loks'il-in (*kolla,* glue, *xulinos,* made of cotton). Pyroxylin.

Collum, kol'lum. The neck. The part of the body situate between the head and chest; also a part of an organ resembling the neck, as in the following cases: **C. anatom'icum hu'meri,** anatomical neck of humerus. **C. astrag'ali,** *Neck of the astragalus.* Depression separating the anterior extremity of the astragalus from its body. **C. chirur'gicum hu'meri,** surgical neck of humerus. **C. costa'rum,** *Neck of the ribs.* Narrow part of the ribs between the head and tubercle. **C. den'tium,** *Neck of the teeth.* Part of the teeth between the corona and fang, which is embraced by the gum. **C. duc'tus urinif'eri,** neck of uriniferous tubule. **C. fem'oris,** *Neck of the thigh-bone.* The long, narrow, and oblique portion of the os femoris, which separates the head of the two trochanters. **C. fib'ulæ,** *Neck of the fibula.* Slight narrowness seated below the head or upper extremity of the fibula. **C. glan'dis,** see *Glans.* **C. hu'meri,** *Neck of the humerus.* Circular, depressed portion which separates the head of the os humeri from its two tuberosities; some surgeons place the neck below the tuberosities, no precise line of demarcation indicating its extent. **C. mandib'ulæ** or **maxil'læ inferio'ris,** *Neck of the lower jaw.* Depression observable on each side of the lower jaw, immediately below the condyles. **C. obsti'pum,** torticollis. **C. os'sis mag'ni** or **capita'ti,** *Neck of the os magnum.* Circular depression beneath the head of this bone of the carpus. **C. pe'dis,** instep. **C. ra'dii,** *Neck of the radius.* Narrow portion of the radius, which supports the head of the bone. **C. scap'ulæ,** *Neck of the scapula.* Narrow portion observable below the glenoid cavity of the scapula, which seems to separate it, as it were, from the rest of the bone. **C. stape'dis,** neck of stapes. **C. ta'li,** neck of astragalus. **C. u'teri,** *Neck of the uterus.* Narrow, cylindrical, and flattened portion of the uterus, which terminates it inferiorly, and opens into the vagina by the os uteri or os tincæ. This neck is perceptible on examination *per vaginam,* until near the end of uterogestation. As the uterus enlarges, however, it becomes shorter and wider, so that a manifest difference exists between its condition at seven and nine months. **C. vesi'cæ,** *Neck of the bladder.* Anterior part of the base of the bladder, which resembles the neck of a bottle, and is continuous with the urethra. **C. v. fel'leæ,** neck of gall-bladder.

Collunarium, kol-lun-ah're-um. Nasal douche.

Collurium, kol-lu're-um. Collyrium.

Collutio, kol-lu'she-o (*col, luo,* to wash). Gargarism.

Collution, kol-lu'shun. Lotion.

Collutorium, kol-lu-to're-um (same etymon as **Collutio**). Mouth wash. **C. adstrin'gens,** mel boracis. **C. o'ris,** mouth wash.

Collutory, kol'lu-to-re. Mouth wash.

Colluvies, kol-lu've-es. Filth, excrement. Discharge from an old ulcer. **C. gas'trica,** gastric disorder.

Collyrium, kol-lir'e-um (*koluo,* to check, *reo,* to flow, or *kollura,* cylindrical cake). Formerly a solid medicine, of long, cylindrical shape, proper to be introduced into the vagina, anus, or nostril, shaped like a rat's tail, containing powders and glutinous matters. At the present day collyrium means an application to the eye. Some are pulverulent and dry, *Collyria sicca,* but the greatest part are liquid, *Hygrocollyria.* The term is now little more than synonymous with *Eye-water.* **C. adstrin'gens,** aqua ophthalmica aluminosa. **C. Alexan'dri re'gis sic'cum,** see *Collyrium.* **C. alumino'sum,** aqua ophthalmica aluminosa. **C. ammoniaca'le,** preparation used in France in amaurosis and nervous debility of the eye, consisting of slaked lime, muriate of ammonia, charcoal, cinnamon, cloves, and bole Armeniac, moistened, and kept in a well-stopped bottle; the stopper being removed, the bottle is moved beneath the affected eye. **C. a'ni,** suppository. **C. antiphlogis'ticum,** liquor plumbi subacetatis dilutus. **C. Batea'num,** see *Lotion, camphorated, of Bates.* **C. of the Benedic'tines,** preparation made of extract of soot dissolved in vinegar, to which extract of roses is added; a once popular application in scrofulous ophthalmia. **C., ferru'ginous,** mixture of sulphate of iron and white sugar. **C., Gim'bernat's,** solution of caustic potash in water. **C. of King Alexan'der,** see *Alexandrine.* **C. opia'tum,** prepared by dissolving extract of opium in rose-water. **C. plumba'tum,** liquor plumbi subacetatis dilutus. **C. sic'cum,** see *Collyrium.* **C. s. Alexandri'num,** see *Alexandrine.* **C. zin'cicum,** unguentum zinci oxidi.

Coloboma, kol-o-bo'mah (*koloboma,* anything truncated, maimed, or shortened). Mutilated or maimed organ. **C. i'ridis,** *Fissure of the iris.* Congenital peculiarity of the iris, consisting of a fissure of its lower portion, and a consequent prolongation of the iris to the margin of the cornea; see *Iridorrhagus. Coloboma of the choroid* also occasionally occurs—a large defect in the choroid, usually in its lower part; coloboma of the iris and ciliary body generally coexist in this condition. **C. len'tis,** defect generally occurring with a similar defect in the iris and choroid, and this defect is due to relaxation of the zonule of Zinn. **C. of op'tic-nerve sheath,** congenital rare peculiarity due to imperfect closure of fœtal fissure. **C. pal'pebræ,** vertical wound of the eyelid, passing through it so as to divide it into two flaps, somewhat resembling the two portions of a harelip.

Colobomaticus, kol-o-bo-mat'ik-us. Affected with coloboma.

Colobosis, kol-o-bo'sis. The act of curtailing or mutilating; mutilation.

Colocasia, kol-o-kah'se-ah. A genus of Aroideæ. **C. antiquo'rum,** cultivated in India and Egypt, and used for food; juice of leaves possesses styptic properties. **C. esculen'ta,** variety of Colocasia antiquorum known as laro.

Colocentesis, kol-o-sen-ta'sis (*colon, kenteo,* to pierce). Operation of puncturing the colon, as in case of paralytic distension of that bowel.

Colocholosis, kol-o-kol-o'sis (*colon, chole,* bile). Bilious dysentery.

Colocleisis, kol-o-kleis'is (*colon, kleisis,* occclusion). Occlusion of the colon.

Colocolos'tomy (*colon, stoma,* mouth). Operation of forming artificial communication between two portions of the colon.

Colocynth, kol'o-sinth (*kolokunthis*). Cucumis colocynthis.

Colocyntha, kol-o-sinth'ah. Cucurbita lagenaria.

Colocynthein, kol-o-sinth'e-in. A derivative of colocynthin.

Colocynthin (kol-o-sinth'in) or **Colocynth'ite.** See *Cucumis colocynthis.*

Colocynthis, kol-o-sinth'is. Colocynth; see *Cucumis colocynthis. Preparations:* Extractum colocynthidis alcoholic; dose, gr. ½–ij; Extractum colocynthidis

cŏmpositum, compound extract of colocynth, composed of extract of colocynth, aloes, cardamom, resin of scammony, soap, and alcohol; dose, gr. v–xx; pilulæ catharticæ compositæ (*q. v.*).

Colocynthitin, kol-o-sinth'it-in. See *Cucumis colocynthis.*

Colodactylus, kol-o-dak'til-us (*kolos*, curtailed, *daktulos*). Provided with incomplete feet.

Colo-enteritis, ko-lo-ent-er-e'tis. Colitis.

Cologne water, co-lone' waw'ter. Eau de cologne; spiritus odoratus.

Colomba, kol-om'bah. Calumba.

Colombin, kol-om'bin. See *Calumba.*

Colombine (kol'om-been), **common.** Aquilegia vulgaris.

Colombo, kol-om'bo. Calumba.

Co'lon. That portion of the large intestine which extends from the cæcum to the rectum. (It is said to have been so called from *koilos*, hollow, or from *koluo*, to arrest, because the excrements are arrested for a considerable time in its sacs.) The colon is usually divided into four portions: 1. The *right lumbar* or *ascending, colon dextrum*, situate in the right lumbar region, and commencing at the cæcum. 2. *Transverse colon, colon transversum, transverse arch of the colon*, the portion of the colon which crosses from the right to the left side at the upper part of the abdomen. 3. The *left lumbar* or *descending colon, colon sinistrum*, extending from the left part of the transverse arch, opposite the outer portion of the left kidney, to the corresponding iliac fossa. 4. The *iliac colon* or *sigmoid flexure of the colon*, the portion of the intestine which makes a double curvature in the left iliac fossa and ends in the rectum. The muscular fibres, as in the cæcum are in three flat stripes. Membrum. **C., inflamma'tion of the**, colitis. **C., tor'por of**, disease in which the muscular coat of the colon acts with deficient energy, giving occasion to distension of the intestine, which, by pressing upon the other organs, may interfere so much with their functions as to lead to distressing gastric, cardiac, and other disorders.

Colonic, ko-lon'ik. Pertaining to the colon.

Colonitis, ko-lon-e'tis (*colon, itis*). Colitis; dysentery.

Colonization, kol-on-i-za'shun. Method employed in the treatment of the insane, which consists in keeping them in colonies, and in giving them employment and providing for them in families.

Colonopyra, ko-lon-op'ir-ah. Colopyra.

Colonoscope, ko-lon'o-skope (*colon, skopeo*, to view). Instrument for examining upper part of rectum.

Colony, kol'on e. Growth of bacteria by multiplication in favorable media. **C. treat'ment**, see *Colonization.*

Colophany, kol-of'an-e. Colophonia.

Colophene, kol'o-feen. Volatile oil from colophony.

Colopholic, kol-o-fol'ik. Relating to or obtained from colophony. **C. ac'id**, acid derived from turpentine; employed in making plasters and soaps.

Colophonia, kol-o-fo'ne-ah (from Colophon, a city of Ionia), *Colophany, Colophony, Black rosin, Pitch, Brown rosin.* Black resin remaining in the retort after the distillation of common turpentine by means of a strong fire. It is used like the turpentines in general and in some pharmaceutical preparations. **C. Mauritia'na**, tree of Mauritius yielding Mauritius elemi.

Colophon'ic ac'id. Colopholic acid.

Colophonium, ko-lo-fon'e-um. Colophony.

Colophony, ko-lof'on-e. Colophonia.

Coloproctia, ko-lo-prok'te-ah (*colon, proktos*, anus). Colostomy.

Colopuncture, ko-lo-punk'ture. Operation of puncturing the colon; colocentesis.

Colopyra, ko-lop'ir-ah (*colon, pur*, fire). Variety of dysentery accompanied with white discharges.

Coloquintida, ko-lo-kwin'tid-ah. Cucumus colocynthus.

Color, kul'ur. The visual perception arising from the reflection of light after it has undergone various changes induced by the diverse refrangibility of its component rays. **C. blind'ness**, inability to distinguish colors accurately; see *Achromatopsia.* **C. cen'tre**, see *Centre.* **C., complement'ary**, see *Colors, accidental.* **C. percep'tion**, ability of seeing and distinguishing colors. **C. p., abnor'mal**, color-blindness. **C. virgin'eus pal'lidus** (pale color of virgins), chlorosis. **C. vir'ginum fœd'us**, chlorosis.

Coloration, kul-ur-a'shun. The acquiring of color or any special hue; the effect of staining.

Colorectitis, ko-lo-rek-te'tis. Inflammation of colon and rectum; dysentery.

Colorectos'tomy (*colon, rectum, stoma*, mouth). Operation for formation of anastomosis between the rectum and colon.

Colorific, kul-ur-if'ik. Producing or giving color.

Colorimeter, kul-ur-im'et-ur (*color, metron*, measure). An instrument with which color intensity in liquids is measured.

Col'ors, accident'al. *Opposite colors, Complementary* or *Harmonic colors.* If the eye has been for some time regarding a particular color, the retina becomes insensible to this color, and if afterward it is turned to a sheet of white paper, the paper will be of the color that arises from the union of all the rays of the solar spectrum except the one to which the retina has become insensible. Thus, if the eye be directed for some time to a *red* wafer, the sheet of paper will seem to be of a *bluish-green* in a circular spot of the same dimensions as the wafer. This bluish-green image is called an *ocular spectrum*, because it is impressed upon the eye and may be retained for a short time; and the color *bluish-green* is said to be the *accidental color* of the *red.* If this experiment be made with wafers of different colors, other accidental colors will be observed, varying with the color of the wafer employed, as in the following table:

Color of the Wafer.	Accidental color, or color of the ocular spectrum.
Red	Bluish-green.
Orange	Blue.
Yellow	Indigo.
Green	Violet with a little red.
Blue	Orange-red.
Indigo	Orange-yellow.
Violet	Yellow-green.
Black	White.
White	Black.

If all the colors of the spectrum be ranged in a circle, in the proportions they hold in the spectrum itself, the accidental color of any particular color will be found directly opposite. Hence the two colors have been termed *opposite colors.* If the primary color, or that to which the eye has been first directed, be added to the accidental color, the result must be the same impression as that produced by the union of all the rays of the spectrum—*white* light. The accidental color, in other words, is what the primitive color requires to make it white light. The primitive and accidental colors are therefore *complements* of each other, and hence accidental colors have been called *complementary colors.* They have also been termed *harmonic*, because the primitive and its accidental color *harmonize* with each other in painting. **C., complement'ary**, C., accidental. **C., op'posite**, see *C., accidental.*

Colostomy, ko-los'tom-e (*kolon, stoma*, mouth). Operation for artificial anus, consisting in making a large permanent aperture in the colon.

Colostra, kol-os'trah. Colostrum.

Colostratio, kol-os-trah'she-o. Colostration.

Colostration, kol-os-tra'shun. Disease in newborn children, attributable to the colostrum.

Colostric, kol-ost'rik. Relating to the colustrum.

Colostrococca, kol-ost-ro-kok'kah. Colostrum corpuscles. See *Corpuscles.*

Colostrous, kol-ost'rus. Containing colustrum.

Colostrum, kol-os'trum (*kolon*, food, or *kolla*, glue, on account of the viscidity of the first milk. *Green milk, Beastlings, Beistings, Beestings, Biestings* or *Beastings, Beest.* First milk after accouchement; contains more serum and butter and less casein than

common milk, and seems to possess a laxative property, which renders it fit to aid in the expulsion of the meconium. Chemical analysis of the colostrum and the normal milk of woman, according to Simon, gives the following results:

	Colostrum.	Normal Milk.
Water	828	887.6
Fat	50	25.3
Casein	40	34.3
Sugar of milk	70	48.2
Ashes	3	2.3

Colostrum formerly meant an emulsion prepared of turpentine and yolk of egg. **C. cor'puscles**, granular round yellow corpuscles, abundant in the colustrum, and disappearing in the course of a week or more.

Colotomy, ko-lot'o-me (*colon, tome*, incision). Operation of cutting into the colon, as for the formation of an artificial anus. *Callisen's operation* was applied to the descending, that of *Amussat* to the ascending, colon.

Colotyphus, kol-o-ti'fus. Typhoid fever accompanied with dysentery.

Colpalgia, kol-pal'je-ah (*colpo, algos*, pain). Pain in the vagina.

Colpantlon. Instrument used for irrigating the vagina. **C., Littré's**, inguinal colotomy on the left side.

Colpatresia, kolp-at-re'ze-ah (*colpo, atretos*, without opening). Imperforation of the vagina.

Colpectasia, kolp-ek-taz'e-ah (*kolpos*, vagina, *ektasis*, distension). Condition of the vagina in which marked dilatation exists.

Colpemphracticus, kolp-em-frak'tik-us. Relating to or suffering with colpemphraxis.

Colpemphraxis, kolp-em-fraks'is (*colpo, emphrasis*, obstruction). Obstruction of the vagina by foreign bodies.

Colpeurynter, kolp-u-rin'tur (*colpo, euruno*, to dilate, to enlarge). Speculum vaginæ; also an instrument for dilating the os uteri and upper part of the vagina. The operation is called *Colpeurysis*.

Colpeurysis, kolp-u'ris-is. Distension of the vagina by means of the colpeurynter.

Colp'icus. Vaginal.

Colpitis, kolp-e'tis. Inflammation of the vagina.

Colpo, kol'po (*kolpos*, vagina). In composition, vagina.

Colpoblennozemia, kolp-o-blen-no-zem'e-ah (*colpo, blenna*, mucus). Bleunorrhœa of the vagina.

Colpocace, kolp-ok'as-e (*colpo, kakos*, evil). Putrescency or gangrene of the vagina and labia. **C. infanti'lis**, gangrene or putrescency of the vagina and genitals in young children. **C. puerpera'rum**, sloughing of the vagina and genitals in puerperal women.

Colpocele, kolp-o-se'le (Eng. kolp'o-seel) (*colpo, kele*, rupture). Vaginal hernia; elytrocele.

Colpocleisis, kolp-o-kleis'is (*kolpos, kleisis*, closure). Operation for occlusion of the vagina.

Colpocystarchosyrinx, kolp-o-sist-ark-o-sir'inks (*kolpos, kustis*, bladder, *archos*, rectum, *surinx*, passage). Fistula of the vagina, bladder, and rectum.

Colpocystic, kolp-o-sis'tik (*kolpos*, vagina, *kustis*, bladder). Relating to the vagina and bladder.

Colpocystitic, kolp-o-sist-it'ik. Relating to, or suffering with, colpocystitis.

Colpocystitis, kolp-o-sis-te'tis (*kolpos*, vagina, *kustis*, bladder). Inflammation of the vagina and bladder.

Colpocystocele, kolp-o-sis-to-se'le (Eng. kolp-o-sis'-to-seel) (*kolpos*, vagina, *kustis*, bladder, *kele*, rupture). Intrusion or prolapse of the bladder into the vagina.

Colpocystosyr'inx (*kolpos, kustis*, bladder, *surinx*, passage). Fistula communicating with the bladder and vagina.

Colpocystotomy, kolp-o-sis-tot'om-e (*colpo, kustis*, bladder, *tome*, incision). Operation for buttonholing the bladder by suturing its mucous membrane to that of the vagina. Lithotomy through the vagina.

Colpodesmorraphia, kolp-o-dez-mor-raf'e-ah (*colpo, desmos*, ligament, *rhaphe*, suture). Removal of a part of the mucous membrane of the vagina for the radical cure of prolapse of the vagina and uterus.

Colpœdema, kolp-e-de'mah (*colpo, oidema*, swelling). Œdema of the vagina.

Colpohyperplasia, kolp-o-hip-ur-plaz'e-ah. Thickening of the vaginal mucous membrane accompanied with increased secretion of mucus.

Colpoklei'sis. Colpocleisis.

Colpoleucorrhœa, kolp-o-luke-or-rhe'ah (*colpo*, vagina, *leukos*, white, *rheo*, to flow). Vaginal leucorrhœa.

Colpomyotomy, kolp-o-my-ot'o-me (*colpo, mus*, muscle, *tome*, incision). Excision of a tumor through the muscular wall of the vagina; removal of a myomatous tumor through the vagina.

Colpopathi'a. Colpopathy.

Colpopathy, kolp-op'ath-e (*kolpos*, vagina, *pathos*, disease). Any disease affecting the vagina.

Colpoperine'oplasty (*colpo, perineum, plasso*, to form). Plastic operation for repair of lesions of the vagina and perineum.

Colpoperineorrhaphy, kolp-o-per-in-e-or'rhaph-e (*colpo, perineum, rhaphe*, suture). Operation by suture to preserve the vaginal mucous membrane as much as possible, and to form a projecting ridge or crest along the middle of the posterior column of the vagina, which will act as a column of support and hold up the anterior wall and the bladder.

Colpophleghymenitis, kolp-o-fleg-him-en-e'tis (*colpo, phlegma*, mucus, *humen*, membrane, *itis*). Inflammation of the lining membrane of the vagina.

Colpopolypus, kolp-o-pol'ip-us (*kolpos*, vagina, *polypus*). Vaginal polypus.

Colpoptosis, kolp-op-to'sis (*colpo, ptosis*, fall). Prolapsus vaginæ.

Colporrhagia, kolp-or-rhaj'e-ah (*colpo, rhegnumi*, to break forth). Discharge of blood from the vagina.

Colporrhaphe, kolp-or'rhaf-e (*colpo, rhaphe*, suture). Operation of closing the vagina by suture; elytrorrhaphy.

Colporrhexis, kolp-or-rheks'is (*colpo, rhexis*, rupture). Rupture of the vagina; discharge of blood from the vagina.

Colporrhœa, kolp-or-rhe'ah (*colpo, rheo*, to flow). Leucorrhœa.

Colposis, kolp-o'sis (*kolpos*, vagina). Inflammation of the vagina. Synonymous with *Elytroitis, Elytritis, Coleitis, Colpitis, Vaginitis*. See *Leucorrhœa*.

Colpospasmus, kolp-o-spaz'mus (*kolpos, spasmos*, spasm). Spasm of the vagina.

Colpospastic, kolp-o-spas'tik. Relating to or affected with colpospasmus.

Colpostegnosis, kolp-o-steg-no'sis (*colpo, stegnoo*, to close). Atresia or narrowness or obliteration of the vagina.

Colpostenochoria, kolp-o-sten-o-kor'e-ah (*colpo, stenos*, narrow, *choros*, space). Atresia or narrowness or obliteration of the vagina.

Colpostenosis, kolp-o-sten-o'sis. Narrowing or constriction of the vagina.

Colposynizesis, kolp-o-sin-iz-e'sis (*colpo, sunizesis*, falling together). Atresia or narrowness or obliteration of the vagina.

Colpotomy, kolp-ot'o-me (*colpo, tome*, incision). Incision of the vagina in parturition.

Colpoxerosis, kolp-o-zer-o'sis (*kolpos, xerosis*, dryness.) Abnormal dryness of the vagina.

Colpus, kol'pus (*kolpos*). Vagina; mamma; sinus.

Colt's foot. Asarum Canadense; tussilago.

Coluber (kol'u-bur) (serpent) **berus.** Systematic name of the viper, *Vipera*, class Reptilia, ord. Ophidia. Poisonous reptile; the flesh is innocent, and has been used in scrofula and in cutaneous disorders.

Colubrina, kol-u-bre'nah. Polygonum bistorta. **C. dracon'tia**, Arum dracunculus. **C. Lusitan'ica**, Euphorbia capitata. **C. rectina'ta**, source of mabeebark; employed in the West Indies in fevers and as a stomachic. **C. Virginia'na**, Aristolochia serpentaria.

Colum, ko'lum. Colon; also a strainer or filter.

Columbarium, kol-um-bah're-um. A place used for keeping vases in which are contained the ashes of cremated bodies.

Colum'bian bark. Carthagena bark.

Columbine, kol'um-bine. Aquilegia vulgaris. **C., wild,** Aquilegia Canadensis.

Columbo, kol-um'bo. Calumba. **C., Amer'ican,** see *Calumba.* **C., Mariet'ta,** see *Calumba.*

Columella, kol-u-mel'lah (dim. of **Columna**). Pillar; uvula. **C. coch'leæ,** modiolus.

Column, kol'um. See *Columna, Columnæ,* and *Columns.* **C., spi'nal,** spinal or vertebral column.

Columna, kol-um'nah. *Column.* Anatomists use this word for parts resembling a column or pillar; hence, for the penis. **C. ad'stans inguin'ibus,** penis. **C. dor'si,** vertebral column. **C. foram'inis ova'lis,** see *Ovalis fossa.* **C. for'nicis,** see *Fornix.* **C. me'dia,** see *Thyroid gland.* **C. na'si,** cartilaginous part of septum of the nostrils; see *Nares.* **C. o'ris,** uvula. **C. spina'lis,** vertebral column. **C. val'vulæ Vieussen'ii,** see *Valvula Vieussenii.* **C. vertebra'lis,** vertebral column. **C. virginita'tis,** hymen.

Columnæ (kol-um'ne) **adipo'sæ.** See *Fat-columns.* **C. Berti'ni,** *Columns of Bertin, Septula renum;* processes of cortical substance of the kidney which extend between the pyramids of Malpighi as far as the hilus. **C. car'neæ** (fleshy columns), small fleshy columns, which project, more or less, into the auricles and ventricles of the heart, whose use appears to be to prevent too great dilatation of those cavities. A few of these *columnæ* are attached by one extremity to the walls of the heart, and by the other give insertion to chordæ tendinæ. See *Musculi papillares* and *Carneous columns.* **C. car'neæ of the rec'tum,** see *Rectum.* **C. car'neo-papillo'sæ,** columns of the vagina. **C. cor'dis,** columnæ carneæ. **C. for'nicis,** pillars of the fornix. **C. Morgagn'i,** see *Rectum.* **C. papilla'res,** see *Columnæ carneæ.* **C. plica'rum,** foliate papillæ of the tongue; columns of the vagina. **C. rec'ti,** columnæ Morgagni. **C. vagina'les,** columns of the vagina.

Columnar, kol-um'nar. Resembling a column. **C. epithe'lium,** see *Epithelium.*

Columnea (kol-um'ne-ah) **longifo'lia.** Bahel.

Columning (kol'um-ing) **the vagi'na.** Introduction of tampon or sponges in oiled silk bag into the vagina for the purpose of giving support to the vaginal walls, and to elevate the uterus when prolapsed.

Columns (kol'umz) **of Bertin.** Columnæ Bertini. **C. of Bur'dach,** columns of Goll. **C., car'neous,** see *Columnæ carneæ.* **C. of Clarke,** a mass of cells restricted to the dorsal region of the spinal cord, lying to the side and a little back of the central canal. **C., cu'neiform,** columns of Goll. **C. of Goll,** *C. of Burdach, Cuneiform columns;* bundle of small wedge-shaped fibres of white substance in the median subdivision of the posterior columns of the spinal cord. **C. of Morgagn'i** or **of the rec'tum,** see *Rectum.* **C., poste'rior me'dian** (of the medulla oblongata), funiculi graciles. **C. of the spi'nal cord,** see *Spinal cord.* **C. of the spi'nal mar'row,** see *Vertebral nerves.* **C. of Türck,** antero-lateral column of spinal cord situated between the anterior median fissure and the nerve-roots. **C. of the vagi'na,** see *Vagina.*

Colus Jovis, ko'lus jo'vis (staff of Jove). Salvia sclarea.

Colustrum, kol-us'trum. Colostrum.

Colu'tea arbores'cens. *Bladder senna;* ord. Leguminosæ; leaves are slightly purgative, and are often mixed with those of the Cassia senna. **C. aper'ta,** species having purgative leaves. **C. cruen'ta,** Colutea aperta. **C. hirsu'ta,** Colutea arborescens. **C. orien'ta'lis,** Colutea aperta. **C. vesica'ria,** Colutea arborescens.

Colymbades, kol-im'bad-es (pl. of **Colymbas**). *Pickled olives;* these, when bruised and applied to a burnt part, were supposed to be able to prevent vesication.

Colymbethra, kol-im-beth'rah. Swimming bath.

Colymbiferah (kol-im-bif'er-ah) **mi'nor.** Mentha crispa.

Colythrum (kol-ith'rum). Esenbeckia febrifuga.

Colza (kol'zah) **oil.** Variety of rape-seed oil.

Com. As a prefix, like *cum,* with.

Co'ma. A profound soporous condition, from which at times it is extremely difficult to rouse the individual; a symptom occurring in many diseases. Two varieties are distinguished: 1. *Coma vigil, Typhomania,* which is accompanied with delirium. The patient has his eyes closed, but opens them when called, and closes them again immediately; this state is accompanied with considerable restlessness. 2. *Coma somnolentum* or *comatodes,* in which the patient speaks when roused, but remains silent and immovable in the intervals; coma is a deeper sleep than *sopor,* but less so than *lethargy* and *carus.* Also hair; capillus (*komeo,* to adorn). **C. agrypno'des,** see *Coma.* **C., alcohol'ic,** coma due to alcoholism. **C., apoplec'tic,** cerebral apoplexy. **C. Cæsa'rea,** plica. **C. comato'des,** see *Coma.* **C., diabet'ic,** variety of coma which generally ends fatally, occurring in the latter stage of diabetes mellitus. **C. diacet'icum,** coma due to uræmia. **C., epilep'tic,** period of unconsciousness occurring after an attack of epilepsy. **C., hyster'ical,** form of coma sometimes occurring in hysterical attacks. **C. somnolen'tum,** somnolency; see *Coma.* **C., uræm'ic,** form of coma accompanying an uræmic seizure. **C. vig'il,** see *Coma.*

Coma'con or **Coma'cum.** Myristica moschata.

Comal, ko'mal (*kome,* hair). Having resemblance to a hair tuft.

Comandra umbellata, kom-an'drah um-bel-lat'ah (*kome,* hair, *andres,* stamina, in reference to the hairy tufts attached to the anthers). *Bastard toadflax.* Indigenous; has been used in fevers by some Indian tribes.

Comarum palustre, kom'ar-um pal-us'tre. *Marsh cinquefoil.* Indigenous plant; is possessed of astringent virtues.

Comarus, kom'ar-us. Arbutus unedo.

Comata, ko'mat-ah (*koma*). Diseases characterized by diminution of the powers of voluntary motion, with sleep or impaired condition of the senses.

Comate, ko'mate. Possessing long hair.

Comatodes, ko-mat-o'dees. Comatose.

Comatose, ko'mat-oze. Relating to or resembling coma, as *comatose sleep, comatose fever,* etc.

Comatous, ko'mat-us. Resembling coma.

Combre'tum Raimbault'ii. Plant of W. Africa, called kinkeibah; tonic, diuretic, emetic; used in hematuric bilious fever.

Combustibility, preternatural, kom-bus-tib-il'it-e, pre-tur-nat'u-ral. Combustion, human.

Combustio, kom-bus'te-o (*comburo,* to burn). Burn. **C. sponta'nea,** combustion, human.

Combustion, human, kom-bust'yun, hu'man. *Spontaneous combustion* or *Preternatural combustibility.* Rapid destruction of the human body by being reduced to ashes, either spontaneously or by the contact of an ignited substance. It is said to have occurred in the aged and in those who were fat and hard drinkers; in such a considerable quantity of oil was found in the serum of the blood.

Combustura, kom-bus-tu'rah. Burn.

Comedones, kom-ed-o'nees (pl. of **Comedo**) (*comedo,* to waste; to devour). See *Acne.*

Comenic acid, kom-en'ik as'id. A derivative of meconic acid.

Cõme's arsen'ical pow'der. See *Powder, arsenical, of Cõme.*
